108028. No. 735. From dry clay hills near the head of Lake Issyk, August 2, 1934. This is either a dwarf form or the plants have become stunted from lack of moisture.
108029. No. 751. Kurdi Plateau, 30 miles northeast of Frunze, July 29, 1934.
108030. No. 752. From the mountains near Lake Issyk, August 3, 1934.
108031. No. 733. Dry land near Lake Issyk, August 5, 1934.
108032. No. 760. Near the Government horse farm at Lake Issyk, August 6, 1934. A dwarf form.
108033. *AGROPYRON REPENS* (L.) Beauv. Quackgrass.
No. 746. Chu River Canyon near Lake Issyk, August 6, 1934.
108034. *AGROPYRON* sp.
No. 749. From foothills, Kurdi Plateau, 30 miles northeast of Frunze, July 29, 1934.
108035. *AGROPYRON INERME* (Scribn. and Smith) Rydb. Beardless wheatgrass.
No. 705. Chu River Canyon, east of Tokmak, on a dry hillside, August 5, 1934. A perennial bunch grass related to *Agropyron spicatum*. Native to the northwestern United States and Canada.
108036. *AGROPYRON* sp.
No. 767. Near the Government horse farm at Lake Issyk, August 5, 1934.
108037. *AGROPYRON STRIATUM* Nees.
No. 706. Along the Karakol River, near Lake Issyk, in moist soil, August 4, 1934.
- 108038 and 108039. *ANDROPOGON ISCHAEMUM* L. Poaceae.
108038. No. 729. From dry stony mountainside near Lake Issyk, August 5, 1934.
108039. No. 737. Dry land near Lake Issyk, August 5, 1934.
108040. *ASTER* sp. Asteraceae.
No. 715. Karakol Mountains, near Lake Issyk, August 4, 1934. A purple aster with yellow center.
- 108041 to 108044. *ASTRAGALUS* spp. Fabaceae.
- 108041 and 108042. Collected along the Karakol River near Lake Issyk, August 4, 1934.
108041. *ASTRAGALUS* sp.
No. 789.
108042. *ASTRAGALUS* sp.
No. 758.
108043. *ASTRAGALUS* sp.
No. 702. Dry clay foothills south of Frunze, July 31, 1934.
108044. *ASTRAGALUS* sp.
No. 730. From the sandy rocky shore of Lake Issyk, August 5, 1934.

108025 to 108119—Continued.

- 108045 and 108046. From a dry mountain-side near Lake Issyk, August 3, 1934.
108045. *AVENA* sp. Poaceae. Oats.
No. 794.
108046. *AVENA* sp. Poaceae. Oats.
No. 796.
108047. *BERBERIS* sp. Berberidaceae.
No. 728. From a mountain slope along the Karakol River near Lake Issyk, August 4, 1934.
108048. *BROMUS* sp. Poaceae. Bromegrass.
No. 748. From dry hillside near Frunze, July 31, 1934.
108049. *BROMUS INERMIS* Leyss. Poaceae. Bromegrass.
No. 725. From a dry gully near Lake Issyk, August 3, 1934.
108050. *CALAMAGROSTIS* sp. Poaceae. Grass.
No. 755. Near the river at Frunze, July 31, 1934.
108051. *CARAGANA* sp. Fabaceae.
No. 756. Along the Jetty Augus River, August 3, 1934.
108052. *CODONOPSIS OVATA* Benth. Campanulaceae.
No. 719. From mountains along the Karakol River, August 4, 1934. A decumbent perennial with stems 6 to 12 inches long, ovate-cordate leaves three-fourths of an inch long, and pale-blue, bell-shaped axillary and terminal flowers over an inch in length. Native to the Himalayas.
108053. *DELPHINIUM* sp. Ranunculaceae. Larkspur.
No. 731. From dry adobe soil in the foothills near Frunze, July 31, 1934. A larkspur with yellow flowers.
108054. *DESCHAMPSIA* sp. Poaceae. Grass.
No. 708. Collected in mountains near the Karakol River, August 4, 1934.
108055. *DIANTHUS* sp. Silenaceae. Pink.
No. 703. Near Lake Issyk, August 5, 1934. Rock pink.
108056. *EPHEDRA* sp. Gnetaceae.
No. 780. Foothills south of Frunze, July 31, 1934.
- 108057 to 108061. *FESTUCA* spp. Poaceae. Fescue.
108057. *FESTUCA OVINA* L.
No. 750. From a dry plateau 25 miles northeast of Frunze, July 29, 1934.
108058. *FESTUCA ELATIOR* ARUNDINACEA (Schreb.) Wimm.
No. 742. Foothills of Kurdi Plateau by a stream, 25 miles northeast of Frunze, July 29, 1934.
108059. *FESTUCA RUBRA* L.
No. 714. From rocks on the bank of the Karakol River, August 4, 1934.
108060. *FESTUCA* sp.
No. 710. From a dry hillside near Frunze, July 31, 1934.

108025 to 108119—Continued.

108061. *FESTUCA OVINA* L.

No. 754. From a dry ridge near Lake Issyk, August 3, 1934.

108062. *HEDYSARUM* sp. Fabaceae.

No. 734. Along the Jetty Augus River, August 3, 1934.

108063. *HIPPOPHAE RHAMNOIDES* L. Elaeagnaceae. Common sea-buckthorn.

No. 778. From a rocky river bottom near Frunze, July 31, 1934. A hardy spiny deciduous shrub with white branches, olive-green leaves, and yellow berries.

For previous introduction see 105886.

108064. *HORDEUM* sp. Poaceae.

No. 723. Kergyra, on the Chu River, 35 miles below Lake Issyk, August 1, 1934.

108065. *ELYMUS JUNCEUS* Fisch. Poaceae.

No. 736. Vigorous bunch grass on dry rocky slopes of the Chu River Canyon, east of Tokmak, August 6, 1934.

108066 to 108068. *KOELERIA* spp. Poaceae.108066. *KOELERIA* sp.

No. 739. From dry adobe hillside in the foothills near Frunze, July 21, 1934.

108067. *KOELERIA* sp.

No. 782. From dry land beside Lake Issyk, August 5, 1934.

108068. *KOELERIA CRISTATA* (L.) Pers.

No. 717. Along the Karakol River, August 4, 1934.

108069. *LATHYRUS TUBEROSUS* L. Fabaceae.

No. 732. From dry land, near an irrigation ditch in the region of Lake Issyk, August 5, 1934.

For previous introduction and description see 107941.

108070. *LATHYRUS* sp. Fabaceae.

No. 764. From the village of Jetty Augus on Lake Issyk, August 3, 1934.

108071. *LOTUS* sp. Fabaceae.

No. 722. Beside a river near Frunze, July 31, 1934.

108072 to 108075. *MEDICAGO* spp. Fabaceae.108072. *MEDICAGO FALCATA* L. Yellow-flowered alfalfa.

No. 761. From Jetty Augus on Lake Issyk, August 3, 1934.

108073. *MEDICAGO FALCATA* L. Yellow-flowered alfalfa.

No. 776. From the foothills south of Frunze, July 31, 1934.

108074. *MEDICAGO LUPULINA* L. Black medick.

No. 798. Near the city of Karakol, August 4, 1934.

108075. *MEDICAGO SATIVA* L. Alfalfa.

No. 747. From the dry hillside, Chu River Canyon, east of Tokmak, August 6, 1934.

108076. *MELICA* sp. Poaceae.

No. 783. From dry mountain slopes near Lake Issyk, August 3, 1934.

108025 to 108119—Continued.

108077. *MILIMUM EFFUSUM* L. Poaceae. Millet grass.

No. 774. From fir woods along the Karakol River, August 4, 1934.

108078. *ONOBRYCHIS* sp. Fabaceae.

No. 704. From a very steep dry stony hillside near Frunze, July 31, 1934.

108079. *ORYZOPSIS* sp. Poaceae.

No. 781. From a dry slaty hillside in the foothills of the Kurdi Plateau, about 30 miles northeast of Frunze, July 29, 1934.

108080. *ORYZOPSIS* sp. Poaceae.

No. 766. From dry rocky slopes of Lake Issyk, August 5, 1934.

108081. *OXYTROPIS* sp. Fabaceae.

No. 721. Along the Jetty Augus River, August 3, 1934.

108082. *PAPAVER* sp. Papaveraceae.

No. 701. Along the Karakol River, August 4, 1934. A plant with yellow flowers.

108083. *PHLEUM GRAECUM* Boiss. and Heldr. Timothy.

No. 775. From the village of Jetty Augus, August 3, 1934.

108084. *PHLEUM* sp. Poaceae. Timothy.

No. 740. From dry hillsides in the foothills near Frunze, July 31, 1934. An annual grass.

108085. *POA* sp. Poaceae. Bluegrass.

No. 799. Found on a rocky precipice in the mountains along the Karakol River near Lake Issyk, August 4, 1934.

108086. *POA PRATENSIS* L. Poaceae. Kentucky bluegrass.

No. 724. Along the Karakol River near Lake Issyk, August 4, 1934.

108087. *POLYPOGON* sp. Poaceae.

No. 762. Foothills about 30 miles northeast of Frunze, July 29, 1934.

108088. *PRUNUS* sp. Amygdalaceae.

No. 777. Chu River Canyon, east of Tokmak, August 6, 1934.

108089. *PRUNUS* sp. Amygdalaceae.

No. 772. From a dry rocky slope in the foothills near Frunze, July 31, 1934.

108090 to 108092. *ROSA* spp. Rosaceae. Rose.108090. *ROSA* sp.

No. 795. Along the Karakol River, August 4, 1934. A wild rose.

108091. *ROSA* sp.

No. 727. Along the Jetty Augus River, west of Karakol, August 3, 1934.

108092. *ROSA* sp.

No. 745. Rocky flats near Frunze, July 31, 1934.

108093. *SALVIA SYLVESTRIS* L. Menthaceae.

No. 712. In the mountains near Karakol, Lake Issyk region, August 4, 1934. A salvia with blue flowers.

108025 to 108119—Continued.

- 108094 to 108103. STIPA spp. Poaceae.
Feathergrass.
108094. STIPA sp.
No. 768. Near Lake Issyk, August 5, 1934.
108095. STIPA sp.
No. 716. From dry land near Lake Issyk, August 5, 1934.
108096. STIPA sp.
No. 743. From dry land near Lake Issyk, August 5, 1934.
108097. STIPA sp.
No. 757. From a clay hillside in the foothills near Frunze, July 31, 1934.
108098. STIPA sp.
No. 771. Along the Karakol River near Lake Issyk, August 4, 1934.
108099. STIPA sp.
No. 784. From dry mountains near Lake Issyk, August 3, 1934.
108100. STIPA sp.
No. 785. From dry mountains near Lake Issyk, August 3, 1934.
- 108101 and 108102. Collected near Lake Issyk, August 2, 1934.
108101. STIPA sp.
No. 792.
108102. STIPA sp.
No. 787.
108103. STIPA sp.
No. 744. From a dry adobe hillside in the foothills near Frunze, July 31, 1934. Bunch grass.
- 108104 to 108106. THALICTRUM spp. Ranunculaceae.
- 108104 and 108105. Collected along the Karakol River near Lake Issyk, August 4, 1934.
108104. THALICTRUM sp.
No. 738.
108105. THALICTRUM sp.
No. 797.
108106. THALICTRUM sp.
No. 788. From dry land along an irrigating ditch near Lake Issyk, August 5, 1934.
- 108107 to 108109. TRIFOLIUM spp. Fabaceae.
Clover.
108107. TRIFOLIUM REPENS L.
White clover.
No. 793. Along the Jetty Augus River near Lake Issyk, August 3, 1934.
108108. TRIFOLIUM PRATENSE L.
Red clover.
No. 720. Near the town of Karakol, August 4, 1934.
108109. TRIFOLIUM sp.
No. 733. Near a stream at Frunze, July 31, 1934.

108025 to 108119—Continued.

108110. TRIGONELLA ARCUATA Meyer. Fabaceae.
No. 790. From dry mountain side near Lake Issyk, August 3, 1934. An annual leguminous plant native to dry situations in Asia Minor.
For previous introduction see 61446.
108111. TRISETUM sp. Poaceae.
No. 718. From mountains near the Karakol River, August 8, 1934.
- 108112 to 108114. VICIA spp. Fabaceae.
Vetch.
108112. VICIA sp.
No. 765. Jetty Augus, near Lake Issyk, August 5, 1934.
108113. VICIA sp.
No. 770. Along the Karakol River near Lake Issyk, August 4, 1934.
108114. VICIA sp.
No. 773. From dry gravelly soil near Lake Issyk, August 6, 1934.
108115. (Undetermined.)
No. 711. Karakol River near Lake Issyk, August 4, 1934. A pernicious weed, with rootstalks and very attractive blue flowers.
108116. (Undetermined.)
No. 759. Along the Karakol River near Lake Issyk, August 4, 1934.
108117. (Undetermined.)
No. 786. A dry rocky slope near Lake Issyk, August 1, 1934. A leguminous spiny shrub.
108118. (Undetermined.)
No. 741. Rabatsky, near Lake Issyk, August 6, 1934. A prostrate shrub found in dry rocky soil.
108119. (Undetermined.)
No. 707. Along the Karakol River, August 4, 1934. Flowering rock plants found in the mountains.
- 108120 to 108216. SOLANUM spp. Solanaceae.
- From the Union of Soviet Socialist Republics. Tubers presented by the Institute of Plant Industry, Leningrad. Received January 23, 1935.
- A collection of potatoes said to be frost resistant; introduced for Department specialists. Unless otherwise stated these tubers are all hybrids.
- 108120 to 108215. SOLANUM TUBEROSUM L.
Potato.
108120. No. 2.
108121. No. 3.
108122. No. 12.
108123. No. 21.
108124. No. 26.

 108211. No. 1805/17.
 108212. No. 1805/2.
 108213. No. 2009/109.
 108214. No. 2/53. A
 wild potato.
 108215. No. 889.

108216. SOLANUM SP.

A wild potato received under the name "vavilovii," for which a place of publication has not been found.

108217 to 108228.

From Surinam. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 11, 1935.

Collected at the Experiment Station, Sandrij No. 1, in November 1934.

108217. DIOCLEA LASIOCARPA Mart. Fabaceae.

No. 2743. A small vine clambering over low shrubs. The lavender and white flowers are in terminal racemes.

108218. TEPHROSIA SESSILIFLORA (Poir.) Hassl. Fabaceae.

No. 2829. An herb 2 to 3 feet high, with compound leaves, with oblong-obtuse

108217 to 108228—Continued.

leaflets, whitish beneath, and pale yellow-green flowers. Native to the Mediterranean countries.

108219. *EUGENIA* sp. Myrtaceae.

No. 2789. A low shrub 2 to 3 feet high, with white flowers and red berries.

108220. *GALACTIA VELUTINA* Benth. Fabaceae.

No. 2848. A perennial climber, soft-hairy throughout, with oval-obtuse leaflets. Native to British Guiana.

108221. *INDIGOFERA SUFFRUTICOSA* Mill. Fabaceae. Indigo.

No. 2819. A low shrub up to 3 feet high, with rose to salmon-colored flowers.

108222. *JACARANDA COPAIA* (Aubl.) D. Don. Bignoniaceae.

No. 2801. A large handsome tree 60 to 80 feet high, with opposite bipinnate leaves 1 to 2 feet long and sky-blue flowers in large terminal panicles. Native to British Guiana.

For previous introduction see 106374.

108223. *MANIHOT ESCULENTA* Crantz. Euphorbiaceae. Cassava.

No. 2762. Cultivated at the station.

108224. *MESOSETUM LOLIIFORME* (Hochst.) Chase. Poaceae.

No. 2730. A grass found on slopes and open places where it acts as a sand binder.

For previous introduction see 47027.

108225. *MONNIERIA TRIFOLIA* L. Rutaceae.

No. 2778. *Oriri*. An annual herb up to 2 feet high, with white flowers. Native to coastal regions of northern South America.

108226. *PAULLINIA ACUMINATA* Uittien. Sapindaceae.

No. 2749. A vine from the edge of the clearing, with white flowers and orange-colored fruits.

108227. *VISMIA CAYENNENSIS* (Jacq.) Pers. Hypericaceae.

No. 2706. Scotelweg, November 12, 1934. A shrub or small tree about 18 feet high, with ovate leaves and waxy, green flowers, white-fuzzy within.

108228. (Undetermined.)

No. 2817. Near Sandrij No. 1, November 25, 1934. A scanty shrub with pale, minute flowers.

108229 to 108231. *LESPEDEZA* spp. Fabaceae.

From South Manchuria. Seeds presented by the Manshu Nosan Shokai, Inc., Dairen. Received January 18, 1935.

Introduced for Department specialists.

108229. *LESPEDEZA ROBUSTA* Nakai.

A shrub about 10 feet high, with ovate-oblong leaflets and small purple flowers in short racemes. Native to the mountains of Chosen.

108230. *LESPEDEZA DAURICA* (Laxm.) Schindler.

A tall annual, up to 3 feet high, with small white flowers.

For previous introduction see 91256.

108229 to 108231—Continued.

108231. *LESPEDEZA UKI* Nakai.

For previous introduction and description see 107755.

108232 to 108247.

From Germany. Seeds presented by the Director, Tabak-Forschungsinstitut für das Deutsche Reich, Forchheim-Karlsruhe-Baden. Received January 21, 1935.

Introduced for Department specialists.

108232 to 108243. *NICOTIANA* spp. Solanaceae. Tobacco.

108232. *NICOTIANA CHINENSIS* Forsch.

An annual relative of common tobacco, *Nicotiana tabacum*, which grows to a height of 6 feet, with pink flowers. Native to China.

For previous introduction see 72692.

108233. *NICOTIANA LONGIFLORA* Cav.

An erect annual or perennial, 2 to 3 feet tall, with slender scabrous bristly stems and somewhat clasping, spatulate to lanceolate leaves. The night-opening, fragrant flowers, 4 inches long, in loose terminal racemes, are pale violet to yellowish violet without and white within with yellowish-violet anthers. Native from Texas to Chile and Argentina.

For previous introduction see 42338.

108234. *NICOTIANA TABACUM MACROPHYLLA* Dunal.

A large-leaved variety with large red flowers, of which there are several horticultural forms.

For previous introduction see 42353.

108235. *NICOTIANA NUDICAULIS* S. Wats.

A viscid-pubescent herb 1 to 2 feet high, with entire, oblanceolate leaves up to 18 inches long. Native to Nuevo Leon, Mexico.

108236. *NICOTIANA PETIOLARIS* Schlecht.

A tall annual tobacco, closely related to the common type.

108237. *NICOTIANA PLUMBAGINIFOLIA* Viv.

An annual species, 2 feet high, with white flowers which appear in May. Native to tropical America.

For previous introduction see 42340.

108238 and 108239. *NICOTIANA RUSTICA* L.

108238. Variety *Brasilia*.

108239. Variety *Ovata*.

108240. × *NICOTIANA SANDBRAE* W. Wats.

A hybrid of *Nicotiana alata* and *N. forgetiana*. The plant is about 3 feet high with rich-green foliage. Each of the six to nine branches bears 6 to 10 large rosy red flowers, the largest over 2 inches across.

108241 and 108242. *NICOTIANA TABACUM* L.

108241. Variety *Calycina*.

108242. Variety *Lacerata*.

108243. *NICOTIANA TEXANA* Maxim.

A coarse annual, closely allied to *Nicotiana rustica*, differing in its more

108232 to 108247—Continued.

slender stems, shorter leaves, and smaller flowers.

108244 to 108246. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

108244. Variety *baccis luteis*.

108245. Variety *cerasiforme*.

108246. Variety *pyriforme*.

108247. *SOLANUM CITRULLIFOLIUM* A. Br. Solanaceae.

A prickly annual with pinnatifid leaves and large violet flowers over an inch across. Native to Texas and Arizona.

For previous introduction see 93094.

108248 and 108249.

From India. Seeds presented by W. Head, Acting Deputy Director of the Botanic Gardens, Saharanpur. Received January 23, 1935.

Introduced for Department specialists.

108248. *APIUM GRAVEOLENS* L. Apiaceae. Celery.

108249. *DAUCUS CAROTA* L. Apiaceae. Carrot.

108250 to 108265.

From Surinam. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received January 15, 1935.

Received as seeds unless otherwise stated.

Introduced for Department specialists.

108250. *AMARYLLIS* sp. Amaryllidaceae.

No. 2945. Bulbs collected at Paramaribo, December 26, 1934. A cultivated ornamental with salmon-colored blossoms.

108251. *AMARYLLIS* sp. Amaryllidaceae.

No. 2946. Bulbs collected at Paramaribo, December 26, 1934. A cultivated ornamental with white blossoms marked with green.

108252. *AMASONIA CAMPESTRIS* (Aubl.) Moldenke. Verbenaceae.

No. 2772. Sandrij No. 1, November 17, 1934. A herbaceous perennial 2 to 3 feet high, with alternate, ovate, acute leaves and solitary, axillary, yellow flowers. Native to French Guiana.

108253. *AVERRHOA BILIMBI* L. Oxalidaceae. Bilimbi.

No. 2940. Paramaribo, December 26, 1934. A tree 20 to 60 feet high, cultivated in parts of South America and the West Indies for the sake of its greenish-yellow, cucumber-shaped, acid fruits which are pickled or used as a relish with meat. It is tropical in its requirements.

For previous introduction see 64905.

108254. *BANISTERIOPSIS* sp. Malpighiaceae.

No. 2943. Paramaribo, December 26, 1934.

108255. *CALOPOCONIUM MUCUNOIDES* Desv. Fabaceae.

No. 2874. Vredenburg Weg, December 7, 1934.

For previous introduction and description see 107794.

108250 to 108265—Continued.

108256. *CLEOME PSORALIAEFOLIA* DC. Caprifoliaceae.

No. 2872. Vredenburg Weg, December 7, 1934. A swamp herb 2 to 3 feet high, with sticky leaves and pale-cream flowers.

108257. *CLIBADIUM SURINAMENSE* L. Asteraceae.

No. 2857. Vredenburg Weg, December 5, 1934. A plant 4 to 7 feet high, occurring in thick stands.

For previous introduction and description see 107797.

108258. *TEPHROSIA TOXICARIA* (Sw.) Pers. Fabaceae.

No. 2880. Along the railway about 15 miles south of Paramaribo, February 8, 1934.

For previous introduction and description see 107799.

108259. *GALACTIA JUSSIAEANA* Kunth. Fabaceae.

No. 2825. Near Sandrij No. 1, November 25, 1934. A woody climber with ternate leaves; the leaflets elliptic rounded, sticky on the upper surface and hairy beneath; and small pink flowers. Native to Venezuela.

108260. *JACARANDA* sp. Bignoniaceae.

No. 2935. Marshall Creek near the Surinam River, December 16, 1934.

108261. *PHYSALIS LAGASCAE* Roem. and Schult. Solanaceae. Groundcherry.

No. 2865. Vredenburg Weg, December 7, 1934. An herb 2 feet high, with a rank fetid odor, leaves sticky on the upper surface, and pale greenish-cream flowers.

108262. *QUASSIA AMARA* L. Simaroubaceae.

No. 2942. Paramaribo, December 26, 1934. *Indian cinchona*. A lofty tree, native to Surinam, with dark-green pinnate leaves and racemes of large showy crimson flowers, followed by beautiful and decorative fruits arranged in fives around a fleshy peduncle. The wood of this tree is extremely bitter and is used as a remedy for certain fevers.

For previous introduction see 107167.

108263. *TRIPALARIS SURINAMENSIS* Cham. Polygonaceae.

No. 2868. Vredenburg Weg, December 7, 1934. A small tropical tree with ovate acuminate alternate leaves and small cream-white flowers in pilose spikes. The young stems are hollow and are usually occupied by ants. Native to Surinam.

For previous introduction see 102619.

108264. *VIGNA SESQUIPEDALIS* (L.) Fruwirth. Fabaceae. Asparagus-bean.

No. 2881. Paramaribo market, October 10, 1934.

108265. *WEDELIA TRILOBATA* (L.) Hitchc. Asteraceae.

No. 2786. Sandrij No. 1, November 21, 1934. A prostrate perennial with opposite three-lobed leaves and bright yellow flowers. Native to tropical America.

108266. *SORBUS* sp. Malaceae.

From the Union of Soviet Socialist Republics. Seeds presented by the Insti-

108266—Continued.

tute of Plant Industry, Leningrad. Received January 24, 1935.

Nevezhenskaya Rjabina. A mountain-ash tree from Vladimir, central Russia, with edible seeds.

108267 to 108290.

From Turkey. Bulbs and rhizomes collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received January 7, 1935.

Received as bulbs unless otherwise stated. Introduced for Department specialists.

108267. *ALLIUM CEPA* L. Liliaceae. Onion.
A red onion.

108268. *ALLIUM* sp. Liliaceae.
No. T-553.

108269. *ARUM* sp. Araceae.
No. T-425. Adana, October 17, 1934.

108270 to 108274. *COLCHICUM* spp. Melanthiaceae.

108270. *COLCHICUM* sp.
No. T-167. En route from Shebinkarasibar to Giresun, October 17, 1934.

108271. *COLCHICUM* sp.
No. T-318. About 30 miles south of Kastamonu, October 8, 1934.

108272. *COLCHICUM* sp.
No. T-423. About 18 miles east of Adana, October 18, 1934.

108273. *COLCHICUM* sp.
No. T-434. About 50 miles northwest of Adana, October 18, 1934.

108274. *COLCHICUM* sp.
No. T-420. About 25 miles northeast of Adana, October 17, 1934.

108275 to 108279. *CROCUS* spp. Iridaceae.

108275. *CROCUS* sp.
No. T-516. Southeast of Bandirma, en route to Bursa, October 26, 1934.

108276. *CROCUS* sp.
No. T-516-a. Konya, about 2 miles southeast of Bandirma, October 26, 1934.

108277. *CROCUS* sp.
No. T-84. About 70 miles northeast of Sivas, September 26, 1934.

108278. *CROCUS* sp.
No. T-99. About 26 miles west of Susheeri, September 26, 1934.

108279. *CROCUS* sp.
No. T-231. Near Iskilip, en route to Tosya. Collected in the mountains, October 3, 1934.

108280. *CYCLAMEN* sp. Primulaceae.
No. T-349. Near Bolu, October 9, 1934.

108281. *CYCLAMEN* sp. Primulaceae.
No. T-451. About 50 miles northwest of Adana, October 18, 1934.

108282 to 108284. *EREMURUS* spp. Liliaceae.

108267 to 108290—Continued.

108282. *EREMURUS* sp.
No. T-427. Adana. Roots collected October 18, 1934.

108283. *EREMURUS* sp.
No. T-428. East of Adana. Roots collected October 18, 1934.

108284. *EREMURUS* sp.
No. T-518. Near Bandirma. Roots collected October 26, 1934.

108285. *GLADIOLUS* sp. Iridaceae.
No. T-493. About 55 miles northeast of Izmir.

108286 to 108289. *IRIS* spp. Iridaceae.
A collection of rhizomes.

108286. *IRIS* sp.
No. T-75. North of Kayseri 100 miles, September 25, 1934.

108287. *IRIS* sp.
No. T-168. Giresun, September 27, 1934.

108288. *IRIS* sp.
No. T-517. About 40 miles southeast of Bandirma, October 26, 1934.

108289. *IRIS* sp.
No. T-207. About 80 miles west of Samsun, October 2, 1934.

108290. *STERNBERGIA* sp. Amaryllidaceae.
No. T-410. About 15 miles east of Adana, October 17, 1934. A variety with yellow flowers which appear in the autumn.

108291. *SOJA MAX* (L.) Piper. Fabaceae. Soybean.

From Japan. Seeds presented by Yamato Shuhyo Nobu Kaisha, Sapporo, Hokkaido. Received January 18, 1935.

Hasho Mame. Introduced for Department specialists.

108292. *BUPHANE DISTICHA* (L. f.) Herbert. Amaryllidaceae.

From the Union of South Africa. Bulbs purchased from E. G. Bryant, Prieska. Received January 28, 1934.

Gif-bol. A South African plant with a very large bulb up to 1 foot in diameter which grows half out of the ground, protected by a multitude of papery coats. The stout scape, 6 inches to 1 foot high, bears a dense umbel of red flowers, and the thick distichous leaves which appear late are strap-shaped and 1 to 2 feet long.

For previous introduction see 61213.

108293 to 108297.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received January 18, 1935.

108293. *PHAEDRANASSA CHLORACRA* Herb. Amaryllidaceae.

No. 6766-a. Near Riobamba, December 19, 1934. Collected in an open field by Auguste Rimbach. A bulbous plant from the mountains of Peru, with strap-shaped leaves less than a foot high and an umbel of about six tubular flowers, reddish with yellowish-green bases and tips, on a peduncle 2 feet high.

108293 to 108297—Continued.

108294. *DATURA SANGUINEA* Ruiz and Pav. Solanaceae.

No. 6768—A. Riobamba, December 19, 1934. From a garden at over 9,000 feet altitude. A small tree or spreading shrub over 15 feet high, with pubescent, ovate-acuminate leaves and brilliant brick-red, pendulous flowers 8 inches long.

For previous introduction see 77055.

108295. *DELOSTOMA INTEGRIFOLIA* D. Don. Bignoniaceae.

No. 6769—A. From the Agricultural College garden at Ambato, at over 9,000 feet altitude, December 20, 1934. *Chalan*. A shapely spreading tree about 30 feet high, with pink flowers, growing in an arid situation where the annual rainfall is about 20 inches and there are light frosts.

108296. *JUGLANS* sp. Juglandaceae.

No. 6765—A. From the market at Riobamba, December 19, 1934.

108297. *TECOMA STANS VELUTINA* DC. Bignoniaceae.

No. 6767—A. Riobamba, December 19, 1934. A small tree or shrub 25 feet high, native to the Andes of Ecuador, at over 9,000 feet altitude, with compound leaves composed of oblong, serrate, acuminate leaflets 7 or 8 inches long and yellow flowers in terminal panicles.

108298. *ARBUTUS ANDRACHNE* L. Ericaceae.

From Greece. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received December 12, 1934.

Athens, November 9, 1934. An ornamental evergreen tree 10 to 30 feet high, native to Asia Minor. The oval, dark-green glossy leaves are up to 4 inches long, and the terminal panicles of small white flowers are succeeded by edible orange-red fruits one-half inch in diameter.

For previous introduction see 27187.

108299 and 108300.

From Siam. Seeds presented by Dr. H. M. Smith, Ministry of Lands and Agriculture, Bureau of Fisheries, Bangkok. Received January 21, 1935.

108299. *AFGEKIA SERICEA* Craib. Fabaceae.

A woody vine resembling the wistaria, with compound leaves and racemes of dark-purple flowers marked with yellow. Native to Siam.

108300. *NELUMBO NUCIFERA* Gaertn. Nymphaeaceae. Hindu lotus.

108301 and 108302.

From China. Seeds presented by Andrew Tse, Hong Kong. Received January 25, 1935.

Chinese vegetables introduced for Department specialists.

108301. *ALLIUM CEPA* L. Liliaceae. Onion.

Kau Tsai.

108302. *APIUM GRAVEOLENS* L. Apiaceae. Celery.

108303. *TSUGA DUMOSA* (D. Don.) Eichler. Pinaceae. Hemlock.

From India. Seeds presented by the divisional forest officer, Darjeeling, Bengal. Received January 25, 1935.

A tall pyramidal hemlock, sometimes 120 feet high, with gracefully drooping branches, native to northeastern India at altitudes of 8,000 to 10,000 feet. A few have become established in southwestern England, but there is no record of any in America.

108304. *DELPHINIUM ZALIL* Aitch. and Hemsl. Ranunculaceae.

Yellow larkspur.

From India. Seeds presented by the Curator, Royal Botanic Garden, Sibpur, near Calcutta, through the Economic Botanist, Lucknow, United Provinces. Received January 25, 1935.

An erect perennial, 1 to 2 feet high, with slender, ternately divided or trifernate leaves 3 to 4 inches across and yellow flowers about 1 inch in diameter in a lax raceme. Native to Khorasan, Asia.

For previous introduction see 105441.

108305 to 108312.

From China. Scions collected by Peter Liu, Peiping. Received February 1, 1935.

108305. *AMYGDALUS PERSICA* L. Amygdalaceae. Peach.

No. 13. *Shui Mi Tao*, water honey peach. From Ping Chia Ton, near Hong Chow. This is the most famous peach in the Chekiang Province. It is a white peach from 2 to over 3 inches in diameter and ripens in July.

108306 to 108310. *CASTANEA* spp. Fagaceae. Chestnut.

108306 to 108309. *CASTANEA MOLLISSIMA* Blume. Hairy chestnut.

108306. No. 11. *Huei Hua Lee Tzu*, cassia flower chestnut. This chestnut is knocked off the tree before it is ripe, and the spines cut off the bur before it is taken to market, where it is sold to be eaten fresh.

108307. No. 12. *K'uei Lee*, large chestnut. From Chiu Lee Sung village, near Hong Chow. A very common variety which is used for cooking with meat, chicken, and vegetables.

108308. No. 17. *K'uei Lee*, large chestnut. Secured near the village of Shang Yeo Tsun, near Hsin Teng.

108309. No. 15. *Sha Lee*, sand chestnut. From the village of Chin Sung Tsun, near Yu Hong, northeast of Hong Chow. Said to be a wild chestnut with white hairs at the bottom.

108310. *CASTANEA SEGUINII* Dode.

No. 10. *Ya Lee Tzu*, wild chestnut. From the mountainside of Pei Kao Feng, North High Mountain, near Hong Chow. Only bushes 2 to 5 feet high seen, apparently having been chopped back for fuel.

108305 to 108312—Continued.

108311. DIOSPYROS KAKI L. f. Diospyraceae. Kaki.

No. 16. *Huo Shih Tzu*, fire persimmon. From a hillside at Chin Sung Tsun, near Yu Hong. A small bright-red persimmon about 2 inches wide and 1 inch high.

108312. DIOSPYROS KAKI L. f. Diospyraceae. Kaki.

No. 14. *Ya Shih Tzu*, wild persimmon. From a hillside of Pei Kao Feng Mountain, near Hong Chow. A wild persimmon which grows to be a bush 5 or 6 feet high. The small fruits are about 1 inch in diameter and three-fourths of an inch high, all with seeds.

108313. PASSIFLORA QUADRANGULARIS L. Passifloraceae. Giant granadilla.

From Puerto Rico. Seeds presented by Atherton Lee, Director, Puerto Rico Agricultural Experiment Station, Mayaguez. Received January 30, 1935.

For previous introduction see 106999.

108314. EPHEDRA ALATA Decaisne. Gnetales.

From Algeria. Seeds presented by Dr. R. Maire, University of Algiers, Algiers. Received January 26, 1935.

A tall, freely-branching shrub with rough, green equisetumlike branches, small scale-like leaves, and inconspicuous flowers. Native to Arabia and northern Africa. Received under the varietal name "alenda," not different botanically from the typical form.

For previous introduction see 104316.

108315 to 108404.

From the Union of Soviet Socialist Republics. Seeds collected in Turkistan by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received November 7, 1934.

Introduced for Department specialists.

108315. AELUROPIUS LITTORALIS (Gouan) Parl. Poaceae.

No. 891. Kazilinsk, August 9, 1934. A flat alkaline desert.

108316 to 108319. AGROPYRON spp. Poaceae. Wheatgrass.

108316. AGROPYRON CRISTATUM (L.) Gaertn. Crested wheatgrass.

No. 829. A dwarf type from Lake Issyk, August 5, 1934.

108317 to 108319. Collected from the flat sandy desert at Chelkar, August 11 and 13, 1934.

108317. AGROPYRON INTERMEDIUM (Host) Beauv.

No. 883.

108318. AGROPYRON DESERTORUM (Fisch.) Schult.

No. 884.

108319. AGROPYRON DESERTORUM (Fisch.) Schult.

No. 897. A pubescent form.

108320. AGROSTIS ALBA L. Poaceae. Redtop.

No. 827. Tokmak, August 3, 1934.

108315 to 108404—Continued.

108321 and 108322. Collected along the Karakol River, near Lake Issyk, August 4, 1934.

108321. AQUILEGIA sp. Ranunculaceae. No. 830.

108322. AQUILEGIA sp. Ranunculaceae. No. 849.

108323. ARISTIDA PENNATA Trin. Poaceae.

No. 873. From moving sands at Chelkar, August 11, 1934. A grass native to Turkistan where it is found in dry sandy places.

For previous introduction see 106843.

108324. ASTRAGALUS sp. Fabaceae.

No. 854. From dry rocky soil near Lake Issyk, August 5, 1934.

108325. ASTRAGALUS sp. Fabaceae.

No. 823. Near Lake Issyk, August 3, 1934. A spiny shrub.

108326. AVENA FATUA L. Poaceae. Oats.

No. 806. Near the town of Karakol on Lake Issyk, August 4, 1934.

For previous introduction see 107893.

108327. BERBERIS sp. Berberidaceae.

No. 802. From a dry mountain slope near Lake Issyk, August 3, 1934.

108328. CALAMAGROSTIS EPIGIEIOS (L.) Roth. Poaceae.

No. 886. From low depressions in the sandy desert near Chelkar, August 11, 1934.

108329 to 108331. CALLIGONUM spp. Polygonaceae.

From the sand desert near Chelkar, August 11, 1934.

108329. CALLIGONUM sp.

No. 875.

108330. CALLIGONUM sp.

No. 874.

108331. CALLIGONUM sp.

No. 894.

108332. CARAGANA sp. Fabaceae.

No. 836. Karakol, on Lake Issyk, August 4, 1934.

108333. CAREX sp. Cyperaceae.

No. 857. Along the Karakol River, near Lake Issyk, August 4, 1934.

108334. CHONDRIILA PAUCIFLORA Led. Cichoriaceae.

No. 893. Chelkar, August 14, 1934. A biennial herb with a vertical root and numerous slender branches. The basal leaves are pinnatifid, and the yellow flower heads are solitary, terminating the branches. Native to Turkistan.

For previous introduction see 106869.

108335. CLEMATIS sp. Ranunculaceae.

No. 826. Near Lake Issyk, August 4, 1934. A form with small yellow flowers.

108336. CLEMATIS sp. Ranunculaceae.

No. 838. En route to Lake Issyk, August 2, 1934.

108315 to 108404—Continued.

108337 to 108340. *ELYMUS* spp. Poaceae.

Collected from the alkali area around Chelkar, August 11 to 13, 1934.

108337. *ELYMUS* sp.

No. 890. A bunch type.

108338. *ELYMUS* sp.

No. 878.

108339. *ELYMUS GIGANTEUS* Vahl.

No. 872.

108340. *ELYMUS* sp.

No. 887.

108341 and 108342. *EPHEDRA* spp. Gneta-
ceae.

Collected east of Tokmak in the Chu River Canyon, August 6, 1934.

108341. *EPHEDRA* sp.

No. 862.

108342. *EPHEDRA* sp.

No. 863.

108343. *ERAGROSTIS* sp. Poaceae.

No. 892. Chelkar, August 11, 1934. Found in lime soil.

108344. *EREMURUS* sp. Liliaceae.

No. 861. Frunze, August 1, 1934.

108345. *EREMURUS* sp. Liliaceae.

No. 866. Little Chingan, east of Tashkent, July 15, 1934.

108346 to 108348. *FESTUCA* spp. Poaceae.
Fescue.108346. *FESTUCA OVINA* L.

No. 899. Chelkar, August 14, 1934. Found growing on sand dunes. This is the first grass in the depressions of moving sand.

108347 and 108348. Collected August 3, 1934, near Lake Issyk, on the dry slope of a mountain.

108347. *FESTUCA* sp.

No. 815.

108348. *FESTUCA OVINA* L.

No. 809.

108349. *HALIMODENDRON HALODENDRON* (Pall.) Voss. Fabaceae. Salt tree.

No. 839. Near Rabatsky, August 6, 1934. A spiny shrub found on dry, rocky, and sometimes salty soils, along the Chu River.

108350. *HEDYSARUM* sp. Fabaceae.

No. 868. Near Lake Issyk on stony hills, August 5, 1934.

108351. *IRIS* sp. Iridaceae.

No. 837. Along the Jetty Augus River, west of Karakol, August 3, 1934.

108352. *JUNIPERUS* sp. Pinaceae.

No. 814. A prostrate plant found in the dry mountains near Lake Issyk, August 3, 1934.

108353 to 108355. *KOELERIA* spp. Poaceae.
Grass.

108315 to 108404—Continued.

108353. *KOELERIA GLAUCA* DC.

No. 895. Chelkar, in a flat sand desert, August 13, 1934. A tall perennial grass about 2 feet high, native to sandy places in central Europe.

108354. *KOELERIA* sp.

No. 813. From mountains along the Karakol River near Lake Issyk, August 4, 1934.

108355. *KOELERIA CRISTATA* (L.) Pers.

No. 812. From the dry slope of the mountains near Lake Issyk, August 3, 1934.

108356 and 108357. From dry foothills near Frunze, July 31, 1934.

108356. *LAPPULA* sp. Boraginaceae.

No. 840. A plant which resembles the forget-me-not.

108357. *LATHYRUS* sp. Fabaceae.

No. 851.

108358. *LATHYRUS* sp. Fabaceae.

No. 810. Along the Jetty Augus River near Lake Issyk, August 3, 1934. A yellow-flowered form.

108359 and 108360. Collected along the Karakol River near Lake Issyk, August 4, 1934.

108359. *LONICERA CAERULEA* L. Capri-
foliaceae. Sweetberry honeysuckle.

No. 848.

108360. *LONICERA* sp.

No. 850.

108361 to 108364. *MEDICAGO FALCATA* L. Fabaceae. Yellow-flowered alfalfa.

108361. No. 822. From Jetty Augus, on Lake Issyk, August 3, 1934.

108362. No. 831. From Lake Issyk, August 5, 1934.

108363. No. 852. From the Chu River gorge, east of Tokmak, August 6, 1934.

108364. No. 816. From Lake Issyk, August 5, 1934.

108365. *MELILOTUS* sp. Fabaceae.

No. 843. From Frunze, July 30, 1934.

108366 and 108367. From dry clay foothills south of Frunze, July 31, 1934.

108366. *ONOBRYCHIS MICRANTHA* Schrenk. Fabaceae.

No. 846.

108367. *PAPAVER* sp. Papaveraceae.

No. 841.

108368. *PAPAVER* sp. Papaveraceae.

No. 845. From rocky soil near Lake Issyk, August 5, 1934.

108369. *PAPPOPHORUM* sp. Poaceae.

No. 800. From a dry flat near Rabatsky on Lake Issyk, August 6, 1934.

108370. *PHLEUM* sp. Poaceae.

No. 855. From the Animal Husbandry Experiment Station, Frunze, July 30, 1934.

108315 to 108404—Continued.

108371. *PHLEUM* sp. Poaceae.
No. 860. Along the Karakol River near Lake Issyk, August 4, 1934.
108372. *PHRAGMITES COMMUNIS* Trin. Poaceae.
No. 879. From a low alkali area near a salt pond at Chelkar, August 13, 1934. A very abundant grass which grows over 4 feet high.
For previous introduction see 90201.
108373. *PICEA TIANSHANICA* Rupr. Pinaceae. Spruce.
No. 834. Along the Karakol River near Lake Issyk, August 4, 1934. A large tree, sometimes 100 feet high under favorable conditions, with dark shining-green leaves. Native to central Asia and closely allied to *Picea schrenkiana*.
108374. *PUCCINELLIA DISTANS* (L.) Parl. Poaceae.
No. 876. From an alkali flat near Chelkar, August 13, 1934.
- 108375 to 108378. *POA* spp. Poaceae. Bluegrass.
108375. *POA* sp.
No. 817. From rocky soil in the foothills south of Frunze, August 3, 1934.
108376. *POA* sp.
No. 858. From moist areas in the mountains along the Karakol River near Lake Issyk, August 4, 1934.
108377. *POA* sp.
No. 803. From a dry gravelly clay flat along the Jetty Augus River near Lake Issyk, August 3, 1934.
108378. *POA* sp.
No. 811. From a dry mountain slope near Lake Issyk, August 3, 1934.
108379. *POTENTILLA* sp. Rosaceae.
No. 844. Foothills near Frunze, July 31, 1934. A low-growing plant found in hard clay soil.
108380. *PUCCINELLIA* sp. Poaceae.
No. 898. Found in the alkali area around Chelkar, August 17, 1934.
108381. *PUCCINELLIA DISTANS* (L.) Parl. Poaceae.
No. 882. From alkali flats near Lugovaya, August 8, 1934.
- 108382 and 108383. Collected in dry rocky soil along the Chu River, east of Tokmak, August 6, 1934.
108382. *ROSA* sp. Rosaceae. Rose.
No. 864.
108383. *SCHISMUS BARBATUS* (L.) Chase. Poaceae. Grass.
No. 853. An annual grass.
108384. *SCHISMUS BARBATUS* (L.) Chase. Poaceae. Grass.
No. 808. Along the Chu River in very dry soil, about 30 miles from Lake Issyk, August 1, 1934.
108385. *SCUTELLARIA* sp. Menthaceae.
No. 859. From foothills south of Frunze, July 31, 1934. An attractive low-growing labiate.

108315 to 108404—Continued.

108386. *SILENE* sp. Silenaceae.
No. 847. About 40 miles west of Alma Ata, July 29, 1934. An annual flowering plant.
108387. *LIMONIUM* sp. Plumbaginaceae.
No. 888. From alkali flats near Chelkar, August 14, 1934.
- 108388 to 108395. *STIPA* spp. Poaceae. Feathergrass.
108388 and 108389. *STIPA CAPILLATA* L.
From the flat sand desert a few miles north of Chelkar, August 12 and 13, 1934.
For previous introduction see 107700.
108388. No. 877. 108389. No. 896.
108390. *STIPA* sp.
No. 807. From a dry mountain side near Lake Issyk, August 13, 1934.
108391 to 108393. Collected in dry rocky soil at Jetty Augus, near Lake Issyk, August 3, 1934.
108391. *STIPA* sp.
No. 819.
108392. *STIPA* sp.
No. 820.
108393. *STIPA* sp.
No. 821.
108394. *STIPA* sp.
No. 880. From the clay desert near Chelkar, August 12, 1934.
108395. *STIPA* sp.
No. 801. Near Lake Issyk, August 2, 1934.
108396. *DIGITARIA* sp. Poaceae. Grass.
No. 885. Chelkar Experiment Station, August 10, 1934. A very tall, erect type.
108397. *THALICTRUM* sp. Ranunculaceae.
No. 818. Jetty Augus, near Lake Issyk, August 3, 1934.
- 108398 to 108400. Collected along the Karakol River near Lake Issyk, August 4 and 5, 1934.
108398. *TRIFOLIUM PRATENSE* L. Fabaceae. Red clover.
No. 805. A large hairy type.
108399. *VICIA* sp. Fabaceae.
No. 804.
108400. *VICIA* sp. Fabaceae.
No. 835.
108401. *NITRARIA SCHOBERI* L. Zygophyllaceae.
No. 871. From the sand desert near Chelkar, August 11, 1934.
108402. (Undetermined.)
No. 828. Along the Chu River about 15 miles below Lake Issyk, August 1, 1934. A thick-leaved herbaceous plant.
108403. (Undetermined.)
No. 870. From the foothills south of Frunze, July 31, 1934. A small annual spring flower.

108315 to 108404—Continued.

108404. ZIZIPHORA CLINOPODIOIDES SERPYLLACEA (Bieb.) Boiss. Menthaceae.

No. 856. Lake Issyk, August 6, 1934. A much-branched perennial, shrubby at the base and about a foot high, with terminal heads of small flowers which vary in color from white to magenta. Native to Georgia.

108405 to 108414. TULIPA spp. Liliaceae. Tulip.

From the Union of Soviet Socialist Republics. Bulbs presented by Dr. A. Popov, Department of New Cultures and Introduction, Leningrad. Received February 1, 1935.

Introduced for Department specialists.

108405. TULIPA BORSZCZOWI Regel.

No. 598. A Siberian tulip with stems 10 to 18 inches high, bluish-green, narrowly ovate leaves up to 6 inches in length, and red flowers with black blotches at the base of the petals.

For previous introduction see 61447.

108406. TULIPA FOSTERIANA Hoog.

No. 589.

For previous introduction see 107585.

108407. TULIPA sp.

No. 587.

108408. TULIPA KAUFMANNIANA Regel.

No. 596.

For previous introduction see 106774.

108409. TULIPA KOLPAKOWSKIANA Regel.

No. 595.

For previous introduction see 107588.

108410. TULIPA KUSCHKENSIS B. Fedtsch.

No. 593.

For previous introduction and description see 107857.

108411. TULIPA LINIFOLIA Regel.

No. 588.

For previous introduction see 107590.

108412. TULIPA OSTROWSKIANA Regel.

No. 592.

For previous introduction see 106780.

108413. TULIPA PRAESTANS Hoog.

No. 597.

For previous introduction see 107591.

108414. TULIPA WILSONIANA Hoog.

No. 591.

For previous introduction and description see 107859.

108415 to 108548.

From the Union of Soviet Socialist Republics. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received November 9, 1934.

108415 to 108437. AGROPYRON spp. Poaceae. Wheatgrass.

108415 to 108422. AGROPYRON CRISTATUM (L.) Gaertn. Crested wheatgrass.

108415 to 108548—Continued.

108415. No. 918. Along the railroad near Orenburg, August 15, 1934.

108416. No. 972. From the lower Volga.

108417. No. 973. From the Altai.

108418 to 108422. From the middle Volga region.

108418. No. 975. 108421. No. 985.

108419. No. 978. 108422. No. 986.

108420. No. 984.

108423. AGROPYRON TRITICEUM Gaertn. No. 981. From Armenia. An annual Siberian grass, much branched at the base, with stems up to 8 inches in length.

For previous introduction see 106834.

108424 and 108425. AGROPYRON RAMOSUM (Trin.) Richt.

From the middle Volga region.

108424. No. 979. 108425. No. 987.

108426 to 108428. AGROPYRON REPENS (L.) Beauv.

108426. No. 974. From western Siberia.

108427. No. 976. From eastern Kazakhstan.

108428. No. 988. From the middle Volga region.

108429 to 108435. AGROPYRON SIBIRICUM (Willd.) Beauv.

108429 to 108431. From Chelkar.

108429. No. 906.

108430. No. 907.

108431. No. 908.

108432. No. 917. Near Orenburg, along the railroad, August 15, 1934.

108433. No. 980. From Altai-Zaisakin.

108434. No. 982. From Kazakhstan.

108435. No. 983. From Alma Ata.

108436. AGROPYRON sp.

No. 977. Collected at Katta-Kurgan. Received under the name "orientali," for which a place of publication has not been found.

108437. AGROPYRON sp.

No. 915. Collected June 13, 1934, along the railroad near the Aral Sea.

108438 to 108450. AGROSTIS ALBA L. Poaceae. Redtop.

108438 and 108439. From southern Kazakhstan.

108438. No. 923. 108439. No. 924.

108440 and 108441. From Omsk, Siberia.

108440. No. 925. 108441. No. 926.

108442 to 108444. From the Ukraine.

108442. No. 927. 108444. No. 929.

108443. No. 928.

108445. No. 931. From Ural Province.

108446 to 108449. From western Siberia.

108446. No. 932. 108448. No. 934.

108447. No. 933. 108449. No. 936.

108415 to 108548—Continued.

108450. No. 937. From eastern Kazakstan.
108451. *POA NEMORALIS* L. Poaceae.
Wood bluegrass.
No. 938. From the Ukraine.
108452. *AGROSTIS ALBA* L. Poaceae.
Redtop.
No. 939. From eastern Kazakstan.
108453. *POA* sp. Poaceae. Bluegrass.
No. 940. From eastern Kazakstan.
- 108454 to 108456. *AGROSTIS ALBA* L. Poaceae.
Redtop.
108454 and 108455. From eastern Kazakstan.
108454. No. 941. 108455. No. 942.
108456. No. 943. From Ural Province.
108457. *AGROSTIS* sp. Poaceae.
No. 930. From Altai.
108458. *ASTRAGALUS* sp. Fabaceae.
No. 902. August 11, 1934. From the sand desert, Chelkar.
- 108459 to 108477. *BROMUS* spp. Poaceae.
Brome-grass.
- 108459 to 108468. *BROMUS INERMIS* Leyss.
Common brome-grass.
108459. No. 1014. From Armenia.
108460. No. 1006. From the Altai-Zaisansk Experiment Station.
- 108461 and 108462. From eastern Kazakstan.
108461. No. 1007. 108462. No. 1008.
- 108463 and 108464. From the Altai Tchujsk Experiment Station.
108463. No. 1009. 108464. No. 1010.
108465. No. 1011. From the Altai-Zaisansk Experiment Station.
- 108466 and 108467. From Omsk, Siberia.
108466. No. 1012. 108467. No. 1021.
108468. No. 1023. From the Altai-Zaisansk Experiment Station.
- 108469 to 108471. *BROMUS SQUARROSUS* L.
108469. No. 1015. From the Ukraine.
108470. No. 1016. From the lower Volga.
108471. No. 1022. From the Ukraine.
108472. *BROMUS ARVENSIS* L.
No. 1017. From Armenia.
108473. *BROMUS ERECTUS* Huds.
No. 1013. From Armenia.
108474. *BROMUS* sp.
No. 1018. From Armenia.
108475. *BROMUS ERECTUS* Huds.
No. 913. From near Kelif, Tajikistan Province.
108476. *BROMUS SQUARROSUS* L.
No. 1019. From southern Kazakstan.

108415 to 108548—Continued.

108477. *BROMUS* sp.
No. 1020. From Alma-Ata.
- 108478 to 108496. *ELYMUS* spp. Poaceae.
Grass.
- 108478 and 108479. *ELYMUS ANGUSTUS* Trin.
An erect perennial grass about 2 feet high, with flat rigid leaves. Native to central Asia.
108478. No. 998. From the Altai region.
108479. No. 999. From the lower Volga region.
- 108480 to 108482. *ELYMUS ARENARIUS* L.
From the Altai region.
European dunegrass.
108480. No. 997.
108481. No. 996.
108482. No. 1003.
- 108483 to 108486. *ELYMUS DAHURICUS* Turcz.
108483. No. 994. From the Altai region.
108484. No. 993. From the Altai region.
108485. No. 992. From western Siberia.
108486. No. 995. From eastern Kazakstan.
- 108487 to 108491. *ELYMUS GIGANTEUS* Vahl.
Siberian wild-rye.
108487. No. 910. From Chelkar.
108488. No. 909. From Chelkar.
108489. No. 905. From Chelkar.
108490. No. 1001. From eastern Kazakstan.
108491. No. 1000. From the lower Volga region.
- 108492 to 108494. *ELYMUS JUNCEUS* Fisch.
An erect perennial grass, with terminal spikes resembling rye. Native to Russia.
For previous introduction see 75737.
108492. No. 989. From eastern Kazakstan.
108493. No. 990. From eastern Kazakstan.
108494. No. 991. From the middle Volga region.
108495. *ELYMUS SIBIRICUS* L.
No. 1002. From the Altai region.
108496. *ELYMUS JUNCEUS* Fisch.
No. 1004. From the Altai region.
108497. *EREMURUS* sp. Liliaceae.
No. 911. Collected July 8, 1934, along the Varsov River, north of Stalinabad, Tajikistan Province, at 5,500 feet altitude.
- 108498 to 108528. *FESTUCA* spp. Poaceae.
Fescue.
- 108498 to 108501. *FESTUCA ELATIOR* ARUNDINACEA (Schreb.) Wimm.

108415 to 108548—Continued.

108498. No. 959. From the middle Volga region.
108499. No. 960. From the middle Volga region.
108500. No. 972-A. From the Ural Province.
108501. No. 1005. From northern Kazakstan.
- 108502 to 108513. *FESTUCA ELATIOR* L.
Meadow fescue.
108502. No. 944. From eastern Kazakstan.
108503. No. 945. From western Siberia.
108504. No. 946. From Armenia.
108505. No. 947. From Armenia.
108506. No. 948. From eastern Kazakstan.
108507. No. 949. From Armenia.
108508. No. 950. From Armenia.
108509. No. 951. From Armenia.
108510. No. 952. From the Altai region.
108511. No. 953. From the Union of Soviet Socialist Republics.
108512. No. 954. From Armenia.
108513. No. 955. From western Siberia.
108514. *FESTUCA OVINA* L. Sheep fescue.
No. 967. From the middle Volga region.
108515. *FESTUCA ELATIOR* L.
Meadow fescue.
No. 968. From Armenia.
108516. *FESTUCA OVINA* L. Sheep fescue.
No. 969. From Armenia.
108517. *FESTUCA ELATIOR* L.
Meadow fescue.
No. 970. From Armenia.
108518. *FESTUCA OVINA* L.
Sheep fescue.
No. 971. From Armenia.
- 108519 to 108525. *FESTUCA OVINA* SULTANATA Hack.
Fescue.
108519. No. 904. From Chelkar.
108520. No. 961. From the Ural Province.
108521. No. 962. From the Ukraine.
108522. No. 963. From Crimea.
108523. No. 964. From the Ukraine.
108524. No. 965. From the lower Volga region.
108525. No. 966. From Kalmyk Province.
- 108526 to 108528. *FESTUCA RUBRA* L.
Red fescue.
108526. No. 956. From Moscow Province.
108527. No. 957. From Armenia.
108528. No. 958. From Moscow Province.

108415 to 108548—Continued.

108529. *HORDEUM BULBOSUM* L. Poaceae.
No. 919. From the Kopet Dag, Ashkhabad.
- 108530 to 108543. *POA* spp. Poaceae.
Bluegrass.
108530. *POA BULBOSA* L.
No. 1031. From Azerbaijan.
108531. *POA LONGIFOLIA* Trin.
No. 1032. From Armenia. A perennial grass with a creeping rhizome and very narrow leaves. Native to the Caucasus.
108532. *POA PRATENSIS* L.
Kentucky bluegrass.
No. 1026. From the Ural district.
- 108533 to 108536. From the Altai region.
- 108533 and 108534. *POA TIBETICA* Munro.
A tall stout grass 1 to 2 feet high, with firm, linear, acute leaves about 8 inches long. Native to northwestern India at altitudes of 9,000 to 16,000 feet.
108533. No. 1030. 108534. No. 1033.
- 108535 and 108536. *POA ATTENUATA* Trin.
108535. No. 1028. 108536. No. 1034.
108537. *POA* sp.
No. 1029. From the Crimea.
108538. *POA* sp.
No. 1024. From Ivanoosk Province.
- 108539 to 108541. *POA PRATENSIS* L.
Kentucky bluegrass.
108539. No. 1025. From the middle Volga region.
108540. No. 1035. From northern Kazakstan.
108541. No. 1036. From the Ukraine.
108542. *POA* sp.
No. 1037. From western Siberia.
108543. *POA PRATENSIS* L.
Kentucky bluegrass.
No. 1027. From the Altai region.
108544. *SALVIA SPINOSA* L. Menthaceae.
No. 922. From the Botanic Garden, Tashkent. A perennial mint about a foot high, with pale-green, viscid-pubescent, rounded-ovate leaves and whorls of small white flowers. Native to Arabia.
108545. *SCALIGERA UGAMICA* Korovin.
Apiaceae.
No. 921. A perennial about 3 feet high, with oblong-ovate, bipinnately divided leaves up to 10 inches long and numerous umbels of small white flowers. Native to Turkistan.
108546. *SCHISMUS* sp. Poaceae.
No. 912. Collected June 20, 1934, along the railroad between Kelif and Termez, Tajikistan Province.
108547. *SILENE* sp. Silenaceae.
No. 900. Collected August 13, 1934, in Chelkar.

108415 to 108548—Continued.

108548. (Undetermined.)

No. 914. July 3, 1934. A leguminous shrub found in rocky soil near the Government rest house on the Varsov River, north of Stalinabad, Tajikistan Province.

108549. MAHONIA TENUIFOLIA (Lindl.) Loud. Berberidaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received January 28, 1935.

A large evergreen shrub about 10 feet high, with alternate pinnate bright-green leaves and long racemes of yellow flowers. Native to Vera Cruz, Mexico.

108550 to 108555. CASTANEA spp. Faba-ceae. Chestnut.

From China. Seeds collected by Peter Liu and sent through Owen L. Dawson, American agricultural commissioner, Shanghai. Received February 1, 1935.

108550 and 108551. CASTANEA HENRYI (Skan.) Rehd. and Wils.

108550. *Feng Chiao Chu Lee*, Pearl chestnut of Feng Chiao, Chekiang Province.

108551. Pearl chestnut of Hsiao Feng, Anhwei Province.

108552 to 108554. CASTANEA MOLLISSIMA Blume. Hairy chestnut.

Kuei Lee, large chestnut. Collected in Chekiang Province.

108552. From Hang Chow.

108553. From Hsin Teng.

108554. From Feng Chiao.

108555. CASTANEA SEGUINII Dode.

Ya Lee Tzu, wild chestnut. From the mountains near Hang Chow.

108556 to 108558.

From Shilka, Siberia. Plants and cuttings collected by Prof. N. E. Hansen, South Dakota State College of Agriculture and Mechanic Arts, Brookings, S. Dak. Received November 27, 1934. Numbered in January 1935.

108556. RIBES sp. Grossulariaceae.

Siberian black currant.

108557. SALIX sp. Salicaceae.

108558. ULMUS PUMILA L. Ulmaceae. Chinese elm.

Collected in the northern part of Siberia where it appears to be immune from the Dutch elm disease.

108559. CHENOPodium QUINOA Willd. Chenopodiaceae. Quinoa.

From Peru. Seeds presented through J. L. Colom, Chief, agricultural cooperation, Pan American Union, Washington, D. C. Received February 4, 1935.

Introduced for Department specialists.

108560 to 108562. PHASEOLUS COCCINEUS L. Fabaceae. Scarlet Runner bean.

From Mexico. Seeds presented by Mrs. Walter Douglas, Chauncey, N. Y. Re-

108560 to 108562—Continued.

ceived December 6, 1934. Numbered in January 1935.

108560. A wild form with white seeds.

108561. A very hardy and prolific variety, said to be a cross between the Spanish white bean and the wild Mexican perennial bean.

108562. A variety with purple seeds.

108563 to 108592.

From Surinam, South America. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 26, 1935.

Introduced for Department specialists.

108563. BANISTERIOPSIS sp. Malpighiaceae.

No. 2921. *Koni Koni bita*, December 16, 1934. From the Djuka lumber camp on Marshall Creek, Surinam River, 20 miles above Carolina.

108564. CENTROSEMA DASYANTHUM Benth. Fabaceae.

No. 2931. From the Surinam River banks, above Carolina, December 17, 1934. A vine with white flowers, the standard marked in the center with purple stripes.

108565. BYRSONIMA sp. Malpighiaceae.

No. 2901. *Hulia*. From the Simon Creek, Surinam River, above Carolina, December 14, 1934. Found in white sand.

108566. CACOUCIA COCCINEA Aubl. Com-bretaceae.

No. 2902. *Freinousoe notto*, bat nut. From the Simon Creek, Surinam River, above Carolina, December 14, 1934. A woody vine with crimson flowers and flat ribbed fruits 3 by 2 inches.

108567. CALOPOGONIUM CAERULEUM (Benth.) Hemsl. Fabaceae.

No. 2913. *Atéi*. Near the Surinam River above Carolina, December 15, 1934. A twining vine with blue flowers.

108568. CASSIA MULTIJUGA L. C. Rich. Caesalpinaceae.

No. 2906. *Krekre*. From the Surinam River bank near Carolina, December 15, 1934. A small tree with compound leaves made up of linear leaves about one-half inch long and large yellow flowers followed by flat glabrous pods 6 inches long and less than an inch wide. It is native to tropical America.

For previous introduction see 92195.

108569. CLEOME PSORALIAEFOLIA DC. Cap-paridaceae.

No. 2872-A. *Makka*. Vredenburg Weg, December 7, 1934. A swamp herb 2 to 3 feet high, with sticky leaves and pale-cream flowers.

108570 and 108571. CLIBADIUM SYLVESTRE (Aubl.) Baill. Asteraceae.

An herb to 4 to 10 feet high with white flowers.

108570. No. 2893. *Koenami*. From Carolina on the Surinam River, December 13, 1934.

108571. No. 2919. *Windiku*. From the Djuka lumber camp on Marshall Creek, Surinam River, above Carolina, December 16, 1934.

108563 to 108592—Continued.

108572. *CLITORIA ARBOREA* Benth. Fabaceae.

No. 2854. *Haiariballi*. Near Scotelweg, December 1, 1934. A shrubby vine climbing on bushes and small trees in open places. The flowers are purple on the margins, shading to white in the center where reddish lines appear.

108573 and 108574. *TEPHROSIA TOXICARIA* (Sw.) Pers. Fabaceae.

108573. No. 2880-A. *Asikuna*. Collected along the railway about 70 miles south of Paramaribo, February 8, 1934. An herb 4 to 5 feet high; the flowers have grayish-green standards with pure-green spot at center and greenish-white wings with purple spot at the base.

108574. No. 2883. *Asikuna*. From Carolina, Surinam River, December 13, 1934. An herb 2 to 4 feet high with enlarged carrotlike roots. The inside of the flowers is lavender and the outside is greenish gray.

108575. *DALBERGIA* sp. Fabaceae.

No. 2933. *Motosilan*. Carolina, Surinam River, December 18, 1934. Seeds of a vine found on the beach in the flotsam of the river.

108576. *DALBERGIA MONETARIA* L. f. Fabaceae.

No. 2885. *Motosilan*. Carolina, Surinam River, December 18, 1934. A tropical shrub with ternate leaves and small white flowers in axillary spikes. Native to Surinam.

108577. *DERRIS PTEROCARPUS* (DC.) Killip. Fabaceae.

No. 2930. From Marshall Creek, Surinam River, 20 miles above Carolina at the Djuka lumber camp, December 16, 1934. A climbing shrub, native to French Guiana, with trifoliolate leaves and racemes of rather large white flowers.

108578. *DIODCLEA LASIOCARPA* Mart. Fabaceae.

No. 2912. Above Carolina, on the Surinam River, December 15, 1934. A shrubby vine twining over tall trees, with sparsely pubescent trifoliolate leaves, the somewhat-pointed leaflets 2 to 5 inches long. The purple-violet flowers, with fringed keel and papery deciduous branchlets, are on peduncles 1 to 1½ feet long. Native to tropical American forests.

For previous introduction see 107217.

108579. *DIODCLEA* sp. Fabaceae.

No. 2909. Received without notes.

108580. *INGA ACUMINATA* Benth. Mimosaceae.

No. 2907. Near Carolina, Surinam River, December 15, 1934. A tropical American shrub with pinnate leaves; the 4 to 6 leaflets are ovate-lanceolate and 4 to 5 inches long. The white flowers are in small spikes.

108581. *MONNIERIA TRIFOLIA* L. Rutaceae.

No. 2910. *Koffie messa*. Near Carolina, Surinam River, December 15, 1934.

For previous introduction and description see 108225.

108563 to 108592—Continued.

108582. *MUCUNA* sp. Fabaceae.

No. 2934. *Kowai*. Carolina, Surinam River, December 18, 1934. From flotsam on the beach.

108583. *MUCUNA* sp. Fabaceae.

No. 2905. Near Carolina, Surinam River, December 15, 1934. Flowers from ground, said to belong to *Kowai*.

108584. *PENTACLETHRA MACROLOBA* (Willd.) Kuntze. Mimosaceae.

No. 2896. *Koroballi* and *Kroebara*. From Simon Creek, above Carolina, Surinam River, December 14, 1934. A large tree, common in this region, which quickly sprouts from the stump if cut back. The flowers have red sepals and white stamens.

108585. *PHASEOLUS HIRSUTUS* L. Fabaceae.

No. 2891. *Krumata*. From Carolina, Surinam River, December 13, 1934. A cultivated bean used by the Caribs as a vegetable. Said to have been cultivated before the advent of the white man.

108586. *PHYSALIS LAGASCAE* Roem. and Schult. Solanaceae.

No. 2865-A. *Sibeero beemi* and *Batoto Bita*. From Vredenburg Weg, December 7, 1934. An herb 2 feet high with a rank fetid odor. The leaves are sticky on the upper surface and the flowers are pale greenish yellow. Native to tropical America.

For previous introduction see 108261.

108587. *SOLANUM MAMMOSUM* L. Solanaceae. Nightshade.

No. 2903. *Njoe Wintje Bobbie*. Outskirts of Paramaribo, December 13, 1934. A spiny shrub with indigo flowers and yellow fruits 2 to 2½ inches wide and 2 to 3 inches long, which have the odor of tomato.

For previous introduction see 101801.

108588. *SOLANUM* sp. Solanaceae.

No. 2904. Outskirts of Paramaribo, December 13, 1934. A plant with white flowers and bright orange-red spherical fruit 1 inch in diameter.

108589. *SPIGELIA ANTHELMIA* L. Loganiaceae.

No. 2911. *Droegoeman*. Near Carolina, Surinam River, December 15, 1934. An annual 1 to 2 feet high, with lanceolate leaves and spikes of pink-tinged white flowers, followed by green fruits. It grows by preference near water, but is also found on dry ground. The stems have the rank odor of *Nekoe* (*Lonchocarpus chrysophyllus*). Native to the West Indies.

108590. *TETRAPTERIS* sp. Malpighiaceae.

No. 2929. From Marshall Creek, Surinam River, 20 miles above Carolina at the Djuka lumber camp, December 16, 1934. A vine.

108591. *VIGNA SESQUIPEDALIS* (L.) Fruwirth. Fabaceae. Asparagus-bean.

No. 2875. *Jare pesi*, yard bean. From Vredenburg Weg, December 7, 1934. A local variety.

108592. (Undetermined.)

No. 2932. *Batie batie*. From Marshall Creek, Surinam River, December 16, 1934.

108563 to 108592—Continued.

An introduced tree with edible fruit shaped like cacao; the flavor is like that of *Spondias* sp. (Pomme de Cythere).

108593 to 108748.

From the Union of Soviet Socialist Republics. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received November 10, 1934.

Introduced for Department specialists.

108593 to 108601. *ALOPECURUS PRATENSIS* L. Poaceae. Meadow foxtail.

108593. No. 1038. From the Ukraine.

108594. No. 1040. From the Ukraine.

108595. No. 1043. From Ivanovsk Province.

108596. No. 1046. From the Ukraine.

108597. No. 1051. From western Siberia.

108598. No. 1052. From the lower Volga region.

108599. No. 1053. From the Moscow region.

108600. No. 1055. From the middle Volga region.

108601. No. 1056. From the Moscow region.

108602 to 108604. *GASTRIDIDIUM VENTRICOSUM* (Gouan) Schinz and Thell. Poaceae.

108602. No. 1041. From northern Kazakhstan.

108603. No. 1042. From the middle Volga region.

108604. No. 1044. From Omsk, Siberia.

108605. *ALOPECURUS ARUNDINACEUS* Poir. Poaceae.

No. 1045. From Omsk, Siberia.

108606 to 108609. *GASTRIDIDIUM VENTRICOSUM* (Gouan) Schinz and Thell. Poaceae.

108606. No. 1047. From the Altai region.

108607. No. 1049. From Buriato, Mongolia.

108608. No. 1050. From the Ural district.

108609. No. 1054. From western Siberia.

108610. *ALOPECURUS* sp. Poaceae.

No. 1048. From the Ukraine.

108611. *ASTRAGALUS TESTICULATUS* Pall. Fabaceae.

No. 1191. From western Siberia. A perennial, caespitose, densely hairy astragalus, native to Siberia.

For previous introduction see 61397.

108612. *ASTRAGALUS* sp. Fabaceae.

No. 1190. From southern Kazakhstan.

108613 to 108618. *BECKMANNIA* spp. Poaceae.

108613 to 108616. *BECKMANNIA ERUCAEFORMIS* (L.) Host. Sloughgrass.

108593 to 108748—Continued.

108613. No. 1057. From White Russia; central region of the Dnieper River.

108614. No. 1059. From Moscow Province.

108615. No. 1060. From Yakut Province.

108616. No. 1058. From the Ukraine.

108617 and 108618. *BECKMANNIA SYZYGACHNE* (Steud.) Fern.

108617. No. 1061. Eastern Kazakhstan region, Irtish district.

108618. No. 1071. From Buriato, Mongolia.

108619. *CAREX* sp. Cyperaceae.

No. 916. Collected near Tashkent, Turkistan, June 14, 1934.

108620 to 108628. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.

108620. No. 1062. From the northern Caucasus.

108621. No. 1063. From Azerbaijan, Turkistan.

108622. No. 1064. From the Altai region.

108623. No. 1065. From the Altai region.

108624. No. 1066. From eastern Kazakhstan.

108625. No. 1067. From Armenia.

108626. No. 1068. From western Siberia.

108627. No. 1069. From western Siberia.

108628. No. 1070. From eastern Kazakhstan.

108629. *GALEGA ORIENTALIS* Lam. Fabaceae.

No. 1193. From Armenia. A leguminous shrub with ovate-acute leaflets and racemes of blue flowers. Native to the Caucasus.

108630 to 108632. *LATHYRUS* spp. Fabaceae.

108630. *LATHYRUS ERECTUS* Lag.

No. 1187. From Kazakhstan. A slender-stemmed annual about 6 inches high, with linear-lanceolate leaflets and very small lilac flowers. Native to southeastern Europe.

108631 and 108632. *LATHYRUS PRATENSIS* L. Yellow vetchling.

108631. No. 1186. From the Ural district, western Siberia.

108632. No. 1189. From southern Kazakhstan.

108633. *VICIA SATIVA* L. Fabaceae.

No. 1188. From southern Kazakhstan.

108634. *LOTUS CORNICULATUS CILIATUS* (Tenore) C. Koch. Fabaceae.

No. 1192. From Armenia.

108635 to 108657. *MELILOTUS* spp. Fabaceae. Sweetclover.

108635 to 108646. *MELILOTUS ALBA* Desf. White sweetclover.

108593 to 108748—Continued.

108635. No. 1166. From the middle Volga region.
108636. No. 1171. From western Siberia.
108637. No. 1150. From Semipalatinsk.
108638. No. 1152. From western Siberia.
108639. No. 1153. From Omsk, Siberia.
108640. No. 1154. From the Ukraine.
108641. No. 1158. From western Siberia.
108642. No. 1159. From the Ukraine.
108643. No. 1160. From eastern Kazakhstan.
108644. No. 1168. From the lower Volga region.
108645. No. 1169. From the Ural district.
108646. No. 1172. From Moscow Province.
108647. *MELILOTUS CASPIA* Gruner.
No. 1162. From the lower Volga region. A biennial sweetclover with an upright stem 20 to 30 inches high, somewhat sparse foliage, and bright-yellow flowers in short racemes. Native to southern Soviet Union.
- 108648 to 108655. *MELILOTUS OFFICINALIS* (L.) Lam.
108648. No. 1151. From the lower Volga region.
108649. No. 1155. From the Ukraine.
108650. No. 1157. From the lower Volga region.
108651. No. 1161. From the Ukraine.
108652. No. 1163. From the lower Volga region.
108653. No. 1165. From the Ukraine.
108654. No. 1167. From Don Province.
108655. No. 1170. From the lower Volga region.
108656. *MELILOTUS* sp.
No. 1164. From Armenia.
108657. *MELILOTUS* sp.
No. 1166-A. From the Ural district.
- 108658 to 108670. *ONOBRYCHIS* spp. Fabaceae.
108658. *ONOBRYCHIS ARENARIA* DC.
No. 1178. From western Siberia. A forage plant of much promise, which is said to make a more rapid growth the first year than the ordinary sort.
For previous introduction see 84463.
- 108659 and 108660. *ONOBRYCHIS MICHALXII* DC.
From Azerbaijan.
108659. No. 1175. 108660. No. 1177.
- 108661 and 108662. *ONOBRYCHIS OXYTRIPOIDES* Bunge.
From Armenia. A stemless herbaceous perennial with a woody spreading

108593 to 108748—Continued.

- rhizome and compound leaves 2 to 3 inches long. Native to Asia Minor.
108661. No. 1180. 108662. No. 1183.
108663. *ONOBRYCHIS PETRAEA* Desv.
No. 1176. From eastern Kazakhstan. An erect perennial with pinnate leaves, the leaflets oblong-lanceolate. Native to the Caucasus region.
108664. *ONOBRYCHIS SUBCAULIS* Boiss.
No. 1173. From Armenia. A low annual 1 or 2 inches high, native to arid places in Asia Minor.
- 108665 to 108669. *ONOBRYCHIS TRANSCASICA* Grossh.
From Armenia. An erect herbaceous perennial 1 to 2 feet high, with a thick rhizome, pinnate leaves, and small pink flowers. Native to the Caucasus region.
108665. No. 1174. From the Akhtinsk district.
108666. No. 1179. From the Katinskii district.
108667. No. 1182. From Privolokoe Village.
108668. No. 1184. From the Akhtinsk district.
108669. No. 1185. From the Stepnsi district.
108670. *ONOBRYCHIS* sp.
No. 1181. From Armenia, Badar-zehersk district.
- 108671 to 108694. *PHLEUM* spp. Poaceae. Timothy.
108671. *PHLEUM ALPINUM* L.
No. 1094. From Armenia.
- 108672 to 108681. *PHLEUM PHLEOIDES* (L.) Karst.
108672. No. 1080. From Armenia.
108673. No. 1082. From Kazakhstan
108674. No. 1083. From eastern Kazakhstan.
108675. No. 1084. From eastern Kazakhstan.
108676. No. 1085. From the middle Volga region.
108677. No. 1086. From eastern Kazakhstan.
108678. No. 1089. From Stone Steppe.
108679. No. 1091. From Kazakhstan.
108680. No. 1092. From eastern Kazakhstan.
108681. No. 1093. From eastern Kazakhstan.
- 108682 to 108689. *PHLEUM PRATENSE* L.
108682. No. 1072. From western Siberia.
108683. No. 1073. From Armenia.
108684. No. 1074. From western Siberia.
108685. No. 1075. From eastern Kazakhstan.
108686. No. 1076. From eastern Kazakhstan.

108593 to 108748—Continued.

108687. No. 1078. From the Ural district.
108688. No. 1079. From eastern Kazakstan.
108689. No. 1095. From western Siberia.
108690. *PHLEUM GRAECUM* Boiss. and Heldr.
No. 1081. From eastern Kazakstan.
108691. *PHLEUM* sp.
No. 1087. From the Ural Province.
108692. *PHLEUM* sp.
No. 1088. From eastern Kazakstan.
- 108693 and 108694. *PHLEUM GRAECUM* Boiss. and Heldr.
From Armenia.
108693. No. 1090. 108694. No. 1077.
- 108695 to 108722. *TRIFOLIUM* spp. Fabaceae. Clover.
- 108695 and 108696. *TRIFOLIUM AGRARIUM* L.
From the Ukraine.
108695. No. 1140. 108696. No. 1141.
- 108697 and 108698. *TRIFOLIUM ALPESTRE* L.
From Armenia.
108697. No. 1148. 108698. No. 1149.
108699. *TRIFOLIUM AMBIGUUM* Bieb.
No. 1143. From the Crimea.
108700. *TRIFOLIUM CANESCENS* Willd.
No. 1136. From Armenia. A perennial clover about 6 inches high, with obovate villous leaflets and grayish-white flower heads. Native to Asia Minor.
- 108701 to 108703. *TRIFOLIUM FRAGIFERUM* L.
For previous introduction see 107579.
108701. No. 1137. From the Ukraine.
108702. No. 1138. From Armenia.
108703. No. 1139. From Armenia.
108704. *TRIFOLIUM HYBRIDUM* L.
Alsike clover.
No. 1135. From eastern Kazakstan.
- 108705 to 108707. *TRIFOLIUM LUPINASTER* L.
No. 1075. No. 1144. From western Siberia.
108706. No. 1145. From western Kazakstan.
108707. No. 1143. From western Siberia.
108708. *TRIFOLIUM MEDIUM* Huds.
Mammoth clover
No. 1142. From Armenia.
108709. *TRIFOLIUM MONTANUM* L.
No. 1147. From Ivanovsk Province.
- 108710 to 108719. *TRIFOLIUM PRATENSE* L.
Red clover.
108710. No. 1122. From the Altai region.

108593 to 108748—Continued.

108711. No. 1123. From the Ural district.
108712. No. 1124. From southern Kazakstan.
108713. No. 1125. From eastern Kazakstan.
108714. No. 1126. From the Ural Province.
108715. No. 1127. From the Ural Province.
108716. No. 1128. From Ivanovsk Province.
108717. No. 1129. From the Ural Province.
108718. No. 1130. From eastern Kazakstan.
108719. No. 1131. From the Altai region.
- 108720 to 108722. *TRIFOLIUM REPENS* L.
White clover.
108720. No. 1132. From western Siberia.
108721. No. 1133. From the Ural district.
108722. No. 1134. From eastern Kazakstan.
- 108723 to 108725. *VICIA AMOENA* Fisch.
A perennial hairy vetch, native to Siberia, with stems up to 2 feet high and purplish flowers.
For previous introduction see 107709.
108723. No. 1104. From Buriato, Mongolia.
108724. No. 1105. From western Siberia.
108725. No. 1106. From Buriato, Mongolia.
108726. *VICIA TENUIFOLIA* Roth.
No. 1107. From the Altai region.
- 108727 to 108732. *VICIA CRACCA* L.
Cow vetch.
108727. No. 1108. From the Westoblast Province.
108728. No. 1109. From the Altai region.
108729. No. 1110. From the Ivanovsk Province.
108730. No. 1111. From the Moscow Province.
108731. No. 1112. From the White Russian Republic.
108732. No. 1113. From western Siberia.
108733. *VICIA HIRSUTA* (L.) S. F. Gray.
No. 1101. From the Ukraine. A small vetch.
For previous introduction see 81050.
108734. *VICIA MICHAUXII* Spreng.
No. 1121. From southern Kazakstan. A creeping or climbing annual vetch, native to Syria.
For previous introduction see 67066.
108735. *VICIA SATIVA* L. Common vetch.
No. 1116. From Armenia.

108593 to 108748—Continued.

108736. *VICIA SEPIUM* L.
No. 1096. *Bush vetch*. From western Siberia.
For previous introduction and description see 108009.
- 108737 and 108738. *VICIA SYLVATICA* L.
For previous introduction see 52279.
108737. No. 1102. From Siberia.
108738. No. 1103. From western Siberia.
108739. *VICIA VILLOSA* Roth. *Hairy vetch*.
No. 1097. From the northern Caucasus.
108740. *VICIA TENUIFOLIA* Roth.
No. 1098. From western Siberia.
For previous introduction and description see 108011.
- 108741 and 108742. *VICIA UNIJUGA* A. Br.
For previous introduction see 90585.
108741. No. 1114. From Buriato, Mongolia.
108742. No. 1115. From western Siberia.
108743. *VICIA VARIABILIS* Freyn and Sint.
No. 1100. From the northern Caucasus. A herbaceous perennial with ascending stems, linear-lanceolate leaflets, and blue or purplish flowers in a dense raceme. Native to Armenia.
108744. *VICIA VILLOSA* Roth. *Hairy vetch*.
No. 1099. From the Ukraine.
108745. *VICIA* sp.
No. 1117. From western Siberia.
- 108746 to 108748. *VICIA* spp.
From Armenia.
108746. *VICIA* sp.
No. 1118.
108747. *VICIA* sp.
No. 1119.
108748. *VICIA* sp.
No. 1120.
108749. *DAUCUS CAROTA* L. *Apiaceae*.
Carrot.
From Morocco. Seeds presented by H. Brayard, Directeur de la Station Experimentale de Marrakech. Received January 29, 1935.
A carrot cultivated by the natives. Introduced for Department specialists.
- 108750 to 108753. *TRITICUM AESTIVUM* L. *Poaceae*. *Common wheat*.
From Australia. Seeds presented by H. Wenzholz, Director of Plant Breeding, Department of Agriculture, New South Wales, through R. C. May, Experiment Farm, Bathurst, New South Wales. Received February 6, 1935.
Wheat crosses made at the Experiment Farm, Bathurst, New South Wales. Introduced for Department specialists.
108750. (*Galgalos* × *Bena*) × *Federation*.
5/1-1-1.

108750 to 108753—Continued.

108751. (*Galgalos* × *Bena*) × *Federation*.
6/1-1-1-1.
108752. (*Galgalos* × *Bena*) × *Federation*.
6/3-2-1-1.
108753. (*Galgalos* × *Federation*) × *Federation*.
5/1-1-1.
- 108754 and 108755. *PRUNUS* spp. *Amygdalaceae*.
From California. Scions presented by W. B. Clarke & Co., San Jose. Received February 7, 1935.
For use by Department specialists.
108754. *PRUNUS SERRULATA* Lindl.
Oriental cherry.
Daikoku.
108755. *PRUNUS SUBHIRTELLA* Miq.
Higan cherry.
Beni-hoshi.
108756. *SCHAEFFLERA ACTINOPHYLLA* (Endl.) Harms (*Brassaia actinophylla* Endl.). *Araliaceae*.
From Coconut Grove, Fla. Seeds originally from Brisbane, Australia, collected by F. G. Walsingham at Woodlawn Cemetery and brought to the Plant Introduction Garden January 8, 1929. Numbered for convenience in distribution, February 1935.
An evergreen tree up to 40 feet high, native to Queensland, Australia, with compound leaves made up of 6 to 16 oblong leathery leaflets a foot long. The racemes, several feet long, of fragrant flowers, are followed by small heads of angled dry fruits. This is a very good honey tree and does best in moist situations.
For previous introduction see 98137.
108757. *CROCUS ALATAVICUS* Regel. *Iridaceae*.
From the Union of Soviet Socialist Republics. Seeds presented by the Botanic Garden, Alma Ata, through Dr. A. Popov, Department of New Cultures and Introduction, Leningrad. Received February 7, 1935.
A spring-blooming crocus from central Asia, with linear, white-striped leaves and white flowers.
108758. *STYLOMA THURSTONI* (Muell. and Drude) O. F. Cook (*Pritchardia thurstoni* Muell. and Drude). *Phoenicaceae*.
From Puerto Rico. Seeds presented by David Barry, Jr., Los Angeles, Calif. Received February 2, 1935.
A tall palm with a slender, ringed trunk crowned by a cluster of spreading, fan-shaped leaves 3 to 6 feet in diameter. The clusters of small greenish flowers are borne on long stalks resembling fishing poles. It is native to the Fiji Islands.
For previous introduction see 86695.
- 108759 to 108778.
From Europe. Seeds collected by Dr. Edgar Anderson, of the Arnold Arboretum Balkan expedition. Received January 26, 1935.

108759 to 108778—Continued.

The following were collected in regions unusually cold and high for these particular species.

108759. CLEMATIS VITALBA L. Ranunculaceae. Travelers-joy.

From the Balkan Mountains, Bulgaria. A handsome strong-growing vine with pinnate, ovate leaflets and axillary and terminal panicles of slightly fragrant white flowers. Native to the Mediterranean region.

For previous introduction see 76326.

108760. FORSYTHIA EUROPAEA Degen and Bald. Oleaceae.

No. 143-A. From Peč, Yugoslavia. A bushy shrub with firm opposite, ovate-lanceolate leaves about 2 inches long and yellow flowers about 1 inch across. Native to Albania.

108761. ILEX AQUIFOLIUM L. Aquifoliaceae. English holly.

From above Sarajevo, Yugoslavia. A variety with duller leaves and more winter hardy than the type. It thrives in rather shady places.

108762 to 108764. LIGUSTRUM VULGARE L. Oleaceae. European privet.

Collected on the edge of the steppe in situations where practically no other shrubs can survive.

108762. From Fanata, Cluj, Rumania.

108763. From Sarajevo, Yugoslavia.

108764. From Babadag, Rumania.

108765. LINUM sp. Linaceae.

No. 153. From the Ravna Mountains, Yugoslavia.

108766. LUNARIA REDIVIVA L. Brassicaceae.

No. 39-A. From the Rila Mountains, Bulgaria. A herbaceous perennial with large broadly-cordate leaves, terminal racemes of gray-purple flowers, and large flat, disk-shaped, translucent fruits. Native to southern Europe.

For previous introduction see 106526.

108767. PRUNUS LAUROCERASUS L. Amygdalaceae. English cherry-laurel.

From Ljutljana, Yugoslavia. Variety *schipkaensis*. A shrubby form with nearly entire leaves 2 to 5 inches long.

For previous introduction see 103598.

108768. PRUNUS WEBBII (Spach) Vierhapper. Amygdalaceae.

No. 151. From the Botanical Museum, Sarajevo, Yugoslavia. A much-branched shrub, native to Asia Minor, with light-green, lanceolate-oblong leaves and small fruits less than 1 inch long.

108769. PYRUS ELAEOGRIFOLIA Pail. Malaceae.

From Niculital, Rumania. An ornamental wild pear, native to Asia Minor, which becomes a large bush or small tree. The small white flowers appear in May, and the small globose fruits are crowned with a prominent calyx. The leaves are lanceolate, oblong-lanceolate, or linear lanceolate and covered with a whitish silky pubescence.

108759 to 108778—Continued.

108770. SAMBUCUS NIGRA L. Caprifoliaceae. European elder.

No. 68. From Tarda-Schlecht, Rumania.

108771. SAMBUCUS RACEMOSA L. Caprifoliaceae. European red elder.

No. 23. From the Rila Monastery, Bulgaria.

For previous introduction see 92061.

108772. SILENE ROEMERI Friv. Silenaceae.

No. 19. From Mount Vitoska, above Sofia, Bulgaria. A perennial alpine, native to southeastern Europe, with hairy, narrow-spulate leaves and small whitish flowers in headlike racemes.

108773. SYRINGA VULGARIS L. Oleaceae. Lilac.

No. 114. From Mount Domogled, Rumania. A dwarf form.

108774. SYRINGA VULGARIS L. Oleaceae. Lilac.

No. 106. From the Cazan Pass, Rumania.

108775. VACCINIUM MYRTILLUS L. Vacciniaceae. European whortleberry.

No. 22. From the Rila Mountains, Bulgaria. A low deciduous shrub about 1 foot high, native to northern and central Europe, with bright-green, ovate leaves. The globose black berries, one-third of an inch in diameter, are sometimes sold in the markets, but the plant is not generally cultivated.

For previous introduction see 42640.

108776. VACCINIUM VITIS-IDAEA L. Vacciniaceae. Cowberry.

No. 57. From the Bihor Mountains, Rumania, in a rather dry situation. A small evergreen bush, 6 to 10 inches high, with racemes of small pinkish flowers, which grows wild in the northern regions of Europe, Asia, and North America. The deep-red berries have a tart taste and are used in northern regions as a substitute for cranberries.

For previous introduction see 95437.

108777. VERBASCUM LYCHNITIS L. Scrophulariaceae.

No. 25. From the Rila Monastery, Bulgaria, at 4,200 feet altitude, August 13, 1934. A tomentose biennial, found in turf in full sun, with oblong-elliptic, crenate leaves and panicles of small yellow flowers. Native to Europe and the Caucasus.

For previous introduction see 106534.

108778. VERBASCUM SPECIOSUM Schrad. Scrophulariaceae.

No. 113. From Mount Domogled, Rumania. A tall biennial mullein with pale-green, oblong-lanceolate leaves more than a foot long at the base of the stem, becoming much smaller toward the top. The yellow flowers are in a long panicle raceme. Native to eastern Europe.

108779 to 108802.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanic Garden, Tiflis, Caucasus. Received January 29, 1935.

108779 to 108802—Continued.

108779. *ALLIUM VICTORIALIS* L. Liliaceae.
Onion.

One of the most distinctive species of European onions, with stems about 2 feet high, leaves resembling those of the lily-of-the-valley, and white to greenish-white flowers.

For previous introduction see 97582.

108780. *ANTHEMIS IBERICA* Bieb. Asteraceae.

An alpine perennial, native to Spain, with ascending stems 1 foot high, hairy pinnate leaves, and small flower heads with white rays.

108781. *ANTHEMIS MARSCHALLIANA* Willd. Asteraceae.

A perennial, native to the Caucasus region, with ascending stems, bipinnate leaves with linear pinnae, and yellow flower heads.

108782 to 108785. *BELLEVALIA* spp. Liliaceae.

108782. *BELLEVALIA FOMINII* Voronov.

A bulbous plant with three to five narrow basal leaves 8 inches long and about one-half inch wide, and small pinkish flowers in a lax cylindrical raceme. Native to the Transcaucasian region.

108783. *BELLEVALIA LONGISTYLA* (Misc.) Grossh.

A bulbous plant with lanceolate leaves about a foot high and one-half inch wide and a panicle of 15 to 25 small, rusty-purple, campanulate flowers. Native to the Caucasus.

108784. *BELLEVALIA MAKUENSIS* Voronov.

A bulbous plant, native to dry places in the Caucasus, with leaves 8 to 12 inches high and one-half inch wide and a broad panicle of small brown-violet flowers.

108785. *BELLEVALIA SPECIOSA* Voronov.

A bulbous plant, native to Armenia and Transcaucasia, with four to five lobate, narrow leaves about 6 inches long with narrow cartilaginous margins and small yellow flowers in a dense raceme about 7 inches long.

108786. *DELPHINIUM FLEXUOSUM* Bieb. Ranunculaceae.

A hardy herbaceous perennial with violet flowers. Native to the mountains of Armenia.

For previous introduction see 104849.

108787. *DELPHINIUM LINEARILOBUM* Busch. Ranunculaceae.

A herbaceous perennial with deeply palmately lobed leaves, the segments linear, and blue flowers in lax racemes. Native to the Transcaucasian region.

108788. *DIGITALIS FERRUGINEA* L. Scrophulariaceae.
Foxglove.

A biennial or perennial, 5 to 6 feet high, densely leafy, with long dense racemes of rusty-red flowers. Native to southern Europe.

For previous introduction see 104574.

108779 to 108802—Continued.

108789 to 108791. *GAGEA* spp. Liliaceae.

108789. *GAGEA ALEXEENKOANA* Miscz.

A plant about 5 inches high, with narrow-linear leaves slightly exceeding the scape. The small flowers, yellow inside and green without, are borne in small clusters. Native to the Caucasus.

108790. *GAGEA CHLORANTHA* (Bieb.) Schult. f.

A bulbous plant with filiform or narrow-lanceolate leaves and corymbs of greenish-yellow flowers. Native to dry stony places in the Caucasus.

For previous introduction see 92984.

108791. *GAGEA TENUIFOLIA* (Boiss.) Fomin.

A tufted, bulbous plant with narrow linear, recurved leaves and small flowers, yellow within, in small clusters. Native to dry slopes in the Caucasus region.

108792. *HEDERA COLCHICA* Koch. Araliaceae.
Colechis ivy.

A high-climbing vine with the young growth covered by golden-yellow scales, broadly cordate, almost entire bright-green leaves of firm texture, and small umbels of greenish-yellow flowers in paniculate clusters, followed by black fruits. It is native to the Caucasus region.

For previous introduction see 81345.

108793 to 108798. *IRIS* spp. Iridaceae.

108793 to 108796. *IRIS PUMILA* L.

108793. *Albidis*. A form with white flowers.

108794. *Luteis*. A form with light-yellow flowers.

108795. *Pallidis*. A form with pale-violet flowers, rarely white.

108796. *Violaceis*. A form with violet flowers.

108797. *IRIS SULPHUREA* Koch.

A dwarf hardy iris of the Pogoniris section, with linear leaves 2 to 4 inches long and sulphur-yellow flowers. Native to southern Russia.

108798. *IRIS IMBRICATA* Lindl.

A Pogoniris with about six pale-green, broadly ensiform leaves 6 to 8 inches long at flowering time and a stem 12 to 20 inches long, bearing clusters of greenish-yellow flowers about 2 inches in length. Native to northern Iran and Transcaucasia.

For previous introduction see 81349.

108799. *PAEONIA ABCHASICA* Misch. Ranunculaceae.

A herbaceous perennial with deep-green leaves, paler beneath, and yellow flowers about 3 inches across. Native to the Caucasus region.

108800. *RHODODENDRON CAUCASICUM* Pall. Ericaceae. Caucasian rhododendron.

For previous introduction see 103392.

108801. *RHODODENDRON FLAVUM* G. Don. Ericaceae.

A shrub 4 to 6 feet high, with ovate-oblong, pilose, ciliated shining-green leaves and handsome yellow flowers. Native to Asia Minor.

108779 to 108802—Continued.

108802. VIOLA SIEHEANA W. Beck. Viola-ceae.

A perennial about 5 inches high, with reniform-cordate basal leaves and broadly ovate stem leaves, and pale-blue or white flowers. Native to Asia Minor.

108803 and 108804.

From Rumania. Seeds collected by Dr. Edgar Anderson, of the Arnold Arboretum Balkan expedition. Received February 2, 1935.

108803. QUERCUS sp. Fagaceae.

No. 1.

108804. QUERCUS sp. Fagaceae.

No. 2.

108805 to 108813.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received February 2, 1935.

A collection of local vegetable varieties introduced for Department specialists.

108805 to 108812. ALLIUM CEPA L. Liliaceae. Onion.

108805. *Brown Spanish.*

108806. *Early White Globe.*

108807. *Hunter River Brown.*

108808. *Hunter River White.*

108809. *Late White Globe.*

108810. *Odourless.*

108811. *Silver King.*

108812. *White Queen.*

108813. DAUCUS CAROTA L. Apiaceae. Carrot.

Red Top Colonial carrot.

108814. ALLIUM SATIVUM L. Liliaceae. Garlic.

From Yugoslavia. Seeds presented by Prof. Ivo. Volarić, State Agronomist, Samobor, Croatia. Received February 8, 1935.

Introduced for Department specialists.

108815. CASTANEA CRENATA Sieb. and Zucc. Fagaceae. Japanese chestnut.

From Japan. Seeds purchased from the Yokohama Nursery Co., Yokohama. Received December 28, 1934. Numbered in January 1935.

Introduced for Department specialists.

108816 to 108819.

From China. Seeds purchased through Albert N. Steward, College of Agriculture and Forestry, University of Nanking, Nanking. Received February 6, 1935.

Locally grown seeds introduced for Department specialists; obtained from farmers in the vicinity of Nanking.

108816. ALLIUM CEPA L. Liliaceae. Onion.

Yang Ts'ong.

108817. ALLIUM SATIVUM L. Liliaceae. Garlic.

Chui Ts'ai.

108816 to 108819—Continued.

108818. APIUM GRAVEOLENS L. Apiaceae. Celery.

Peh Ch'ing.

108819. DAUCUS CAROTA L. Apiaceae. Carrot.

Hu Lo Po.

108820 to 108823.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received January 31, 1935.

108820. BOMAREA sp. Amaryllidaceae.

No. 6800-A. Collected on the lower slopes of the volcano of Pichincho, Province of Pichincho, December 29, 1934, between 9,000 and 12,000 feet altitude. A climbing shrub about 6 feet high, the flowers are crimson without and orange flecked with black on the inside. The shrub is quite common in this region and is seen also in the valley of Quito south of Chillo.

108821. DIOSPYROS sp. Diospyraceae.

No. 6749.

108822. JUGLANS HONOREI Dode. Juglandaceae.

No. 6781-B. Purchased January 12, 1935, at Quito, Pichincho Province, altitude about 10,500 feet. A wild walnut, native to the highlands of northern South America, which resembles closely the black walnut of the United States. The thick-shelled nut contains a kernel of mild pleasant flavor.

For previous introduction see 106450.

108823. JUGLANS PERUVIANA Dode. Juglandaceae.

No. 6782. The *nogal*, or native black walnut tree, occasionally seen in cultivation, but more commonly wild. It is a shapely tree up to 50 feet high, and the nuts are much like those of *Juglans nigra*, but with a thicker shell. The wood is considered valuable.

For previous introduction see 49375.

108824. DAUCUS CAROTA L. Apiaceae. Carrot.

From India. Seeds presented by Ralph Stewart, systematic botanist, Gordon College, Rawal, Pindi. Received February 7, 1935.

Locally grown seeds introduced for Department specialists.

108825 to 108827.

From Algeria. Seeds presented by Julian Briche, Chef du Service de L'Arboriculture a la Direction de l'Agriculture, Algiers. Received February 8, 1935.

Introduced for Department specialists.

108825. ALLIUM CEPA L. Liliaceae. Onion.

108826. APIUM GRAVEOLENS L. Apiaceae. Celery.

108827. PIMPINELLA ANISUM L. Apiaceae. Anise.

108828 to 108831.

From Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 2, 1935.

Introduced for Department specialists.

108828 to 108831—Continued.

108828. PAULLINIA LEOCARPA Griseb. Sapindaceae.

No. 2950. Antimano, near Caracas, January 12, 1935. A climbing shrub with pinnate leaves having ovate-oblong leaflets 3 to 4 inches long, racemes of small white flowers, and purple-black seeds. Native to the West Indies.

108829. PASSIFLORA LIGULARIS Juss. Passifloraceae. Sweet granadilla.

No. 2947. Caracas, January 8, 1935. *Parche amarilla*. This is said to be the best of the genus and is sold in the market. The light-yellow or green-yellow fruit is egg-shaped and has a rather thin rind. The seed is surrounded by an edible translucent arillus which is very refreshing.

For previous introduction see 102612.

108830. POLYGONUM sp. Polygonaceae.

No. 2949. From near Caracas, January 12, 1935. Found in shaded places near the stream. A plant with reddish stems.

108831. POLYGONUM HYDROPIFEROIDES Michx. Polygonaceae.

No. 2948. *Barbasco blanco*. From Antimano, near Caracas, January 12, 1935. Native to the southeastern United States.

108832. PORLIERIA ANGUSTIFOLIA (Engelm.) A. Gray. Zygophyllaceae.

From Texas. Seeds presented by H. B. Parks, San Antonio, through F. J. Crider, Tucson, Ariz. Received February 11, 1935.

A shrub or small tree, native to northern Mexico, with compound leaves, the 8 to 12 linear leaflets about one-half inch long and the small sweet-scented purple flowers about one-half inch across.

108833. PRUNUS SALASII Standl. Amygdalaceae.

From Guatemala. Seeds presented by the Director, Department of Agriculture, Guatemala City. Received February 11, 1935.

Carreto. A tropical evergreen cherry which is native to the highlands of Antigua, Guatemala. The light-green, leathery, narrow, oblong leaves are 3 to 5 inches long, and the small white flowers are in racemes about 6 inches long.

For previous introduction see 98929.

108834. TRIFOLIUM sp. Fabaceae.

From Africa. Seeds presented by Raymond Hook, Nanyuki, Kenya. Received February 11, 1935.

A locally grown variety of medium purple clover.

108835 to 108977.

From the Union of Soviet Socialist Republics. Seeds collected in Turkistan by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received December 7, 1934.

Introduced for Department specialists.

108835 to 108840. AEGILOPS spp. Poaceae. Grass.

108835 to 108977—Continued.

108835. AEGILOPS CRASSA Boiss.

No. 99. Near Tashkent, June 13, 1934. A decumbent annual grass with flat leaves. Native to Asia Minor.

For previous introduction see 107479.

108836 to 108838. AEGILOPS CYLINDRICA Host.

For previous introduction see 94301.

108836. No. 93. Between Milibash and Tashkent, Uzbekistan, June 14, 1934.

108837. No. 102. Near Arice, Uzbekistan, June 13, 1934.

108838. No. 108. Between Milibash and Tashkent, June 14, 1934.

108839 and 108840. AEGILOPS TRIUNCIALIS L.

Collected June 19, 1934, on clay flats west of Ashkhabad, Turkmenistan. A thickly branched annual grass with ascending stems and flat rough leaves. Native to dry places in the Mediterranean region.

For previous introduction see 107478.

108839. No. 96. 108840. No. 97.

108841 to 108843. AELUROPOUS LITTORALIS (Gouan) Parl. Poaceae.

From the Karakum Desert near Ashkhabad, June 18, 1934.

A good grazing plant found in moist places, as well as in very dry situations.

For previous introduction see 108315.

108841. No. 90. 108842. No. 95.

108843. No. 15. Collected from plants growing along the railroad near the Syr Darya and Milibash, Uzbekistan, June 13, 1934.

108844. AGRIOPHYLLUM LATIFOLIUM Fisch. and Mey. Chenopodiaceae.

No. 114. From the Repetek Sand Desert Station, Turkmenistan. A much-branched annual with ovate or subcordate, long-cuspidate leaves and small inconspicuous flowers in globular axillary clusters. Native to sandy deserts in Turkistan.

For previous introduction see 101976.

108845 to 108849. AGROPYRON spp. Poaceae. Grass.

108845. AGROPYRON ORIENTALE (L.) Roem. and Schult.

No. 110. June 18, 1934. From the edge of the desert near Ashkhabad. An annual much-branched grass, prostrate-ascending in habit, native to sandy places in Asia Minor and Turkistan.

For previous introduction see 106830.

108846. AGROPYRON ORIENTALE LASTANTHUM Boiss.

No. 126. June 26, 1934. From the Repetek Sand Desert Station, Turkmenistan. An annual grass thickly branched at the base, with numerous mostly prostrate stems scarcely 8 inches high. Native to Asia Minor and northern Africa.

For previous introduction see 98528.

108835 to 108977—Continued.

108847. *AGROPYRON SIBIRICUM* (Willd.) Beauv.
No. 122. June 13, 1934. At Mili-bash on the Syr Darya.
For previous introduction see 108435.
- 108848 and 108849. *AGROPYRON SQUARROSUM* (Roth) Link.
A perennial grass of possible use as forage.
For previous introduction see 92961.
108848. No. 92. June 18, 1934. Ashkhabad, at the edge of the desert.
108849. No. 118. June 28, 1934. Repetek Sand Desert Station, Turkmenistan.
108850. *ALLIUM SABULOSUM* Stev. Liliaceae.
No. 112. June 28, 1934. From the Repetek Sand Desert Station, Turkmenistan. A yellow-flowered allium, from sandy places in eastern Turkistan, with terete, filiform leaves. The flowers are in lax globose heads.
- 108851 and 108852. *AMMODENDRON CONOLYI* Bunge. Fabaceae.
An evergreen, silky-leaved shrub, native to Siberia, and used as a sand binder. Collected at the Repetek Sand Desert Experiment Station, Turkmenistan, June 28, 1934.
For previous introduction see 101978.
108851. No. 98. 108852. No. 124.
- 108853 and 108854. *AMMOTHAMNUS LEHMANNI* Bunge. Fabaceae.
A much-branched shrub up to 2 feet high, with compound pinnate leaves, the leaflets cuneate obovate and one-half inch long. The small white flowers are in long, lax racemes. Native to Turkistan. Collected near the edge of the Karakum Desert, June 18, 1934.
108853. No. 106. 108854. No. 73.
108855. *AMYGDALUS SPINOSISSIMA* Bunge. Amygdalaceae.
No. 89. From Kopet Dagh, south of Ashkhabad, near the Persian border, June 19, 1934. A wild almond.
For previous introduction see 86302.
108856. *AMYGDALUS* sp. Amygdalaceae.
No. 88. From Kopet Dagh, near Ashkhabad, June 21, 1934. A wild almond.
- 108857 to 108865. *ARISTIDA* spp. Poaceae. Grass.
- 108857 to 108860. *ARISTIDA PENNATA* KARELINI Trin. and Rupr.
A perennial grass of possible value as a forage crop.
For previous introduction see 106844.
- 108857 to 108859. Collected at the Repetek Sand Desert Experiment Station where they were growing in moving sand.
108857. No. 128. 108859. No. 85.
108858. No. 113.
108860. No. 125. Collected June 27, 1934, 15 miles west of Repetek, at Behl Kaduk Wells in the Karakum Desert, Turkmenistan.

108835 to 108977—Continued.

- 108861 to 108865. *ARISTIDA PENNATA* MINOR Litv.
A perennial grass, of possible value as a forage crop.
For previous introduction see 98204.
108861. No. 87. June 27, 1934. From Behl Kaduk Wells in the Karakum Desert, west of Repetek, Turkmenistan.
108862. No. 109. June 18, 1934. Collected north of Ashkhabad at the edge of sand hills, Turkmenistan.
- 108863 to 108865. June 28, 1934; from the sands at Repetek, Turkmenistan.
108863. No. 127. 108865. No. 94.
108864. No. 86.
- 108866 to 108877. *ASTRAGALUS* spp. Fabaceae.
- 108866 and 108867. *ASTRAGALUS ALOPECIAS* Pall.
June 18, 1934. From the Karakum Desert north of Ashkhabad. A perennial with white-woolly ovate leaflets and pale-yellow flowers. Native to central Asia.
For previous introduction see 106846.
108866. No. 116. 108867. No. 119.
- 108868 and 108869. *ASTRAGALUS AMMODENDRON* Bunge.
June 18, 1934. From the Karakum Desert, north of Ashkhabad. A large shrub native to sandy places near the Caspian Sea. The pinnate leaves have three leaflets, and the small purplish flowers are in short racemes.
Received under the varietal name "confirans," for which a place of publication has not been found.
For previous introduction see 94925.
108868. No. 103. 108869. No. 115.
- 108870 and 108871. *ASTRAGALUS CHIWENSIS* Bunge.
June 18, 1934. From the Karakum Desert, north of Ashkhabad. An erect, densely villous herb with pinnate leaves, the leaflets roundish and retuse. The light-yellowish flowers are in lax racemes. Native to Turkistan.
108870. No. 104. 108871. No. 120.
108872. *ASTRAGALUS* sp.
No. 105. June 18, 1934. From the Karakum Desert. Received under the name "drobowii," for which a place of publication has not been found.
108873. *ASTRAGALUS MAXIMOWICZII* Trautv.
No. 117. Collected near Ashkhabad. A yellow-flowered herb with long white-hairy compound leaves, the leaflets broadly elliptic, obtuse. The flowers are in dense axillary spikes. Native to Turkistan.
108874. *ASTRAGALUS PAUCIJUGUS* Schrenk.
No. 111. June 23, 1934. Found on moving sands at Repetek.

108835 to 108977—Continued.

108875. *ASTRAGALUS* sp.

No. 101. June 13, 1934. From Milibash on the Syr Darya.

108876. *ASTRAGALUS* sp.

No. 91. June 18, 1934. From the Karakum Desert, north of Ashkhabad.

108877. *ASTRAGALUS* sp.

No. 121. June 21, 1934. From the Ashkhabad Mountains. Excellent fodder for both grazing and hay.

108878 and 108879. *ATRIplex DIMORPHOS-TEGIA* Kar. and Kir. *Chenopodiaceae*.

An annual 18 inches high, with alternate membranous ovate leaves and terminal or axillary inconspicuous flowers. Native to dry places in Arabia and Iran.

For previous introduction see 98205.

108878. No. 123. June 30, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan.

108879. No. 107. June 18, 1934. From the Karakum Desert near Ashkhabad.

108880 to 108885. *BROMUS* spp. *Poaceae*.
Bromegrass.108880 to 108883. *BROMUS DANTHONIAE* Trin.

108880. No. 131. June 19, 1934. From Kopet Dagh, Ashkhabad.

108881. No. 132. June 18, 1934. From the foothills west of Ashkhabad. Found in rocky soil.

108882. No. 133. June 14, 1934. From Montifash, near Ashkhabad, Turkmenistan.

108883. No. 134. June 14, 1934. Arice, Uzbekistan.

108884. *BROMUS SCOPARIUS* L.

No. 13. June 14, 1934. From Montifash, between Ashkhabad and Tashkent. An annual grass with erect culms up to 16 inches high. Native to Turkistan.

108885. *BROMUS TECTORUM* L.

No. 129. Collected in June 1934 at the Repetek Sand Desert Station, Turkmenistan. A weedy annual grass with erect slender stems 1 to 2 feet tall and hairy narrow leaf blades. It will produce a good cover crop with very little rainfall. Native to Europe.

For previous introduction see 107032.

108886 to 108894. *CALLIGONUM* spp. *Polygonaceae*.

108886 to 108891. Collected in June 1934 at the Repetek Sand Desert Experiment Station, Turkmenistan.

108886 and 108887. *CALLIGONUM ARBORESCENS* Litv.

A drought-resistant shrub 10 feet high.

For previous introduction see 107507.

108886. No. 5. 108887. No. 2.

108888 and 108889. *CALLIGONUM CAPUT-MEDUSAE* Schrenk.

Native to northern and central Asia, where it is used as a sand binder.

108835 to 108977—Continued.

For previous introduction see 107508.

108888. No. 4. 108889. No. 145.

108890. *CALLIGONUM COMOSUM* L'Her.

No. 7. A densely branched shrub 10 to 15 feet high, with minute subulate leaves and small, ovate, densely spiny, nutlike fruits. Native to the eastern Mediterranean region.

For previous introduction see 106616.

108891. *CALLIGONUM ERIPODUM* Bunge.

No. 8. A slender-branched shrub with whitish branchlets and linear-subulate minute leaves which are nearly deciduous. Native to Turkistan. Used as a sand binder.

For previous introduction see 107511.

108892 to 108894. *CALLIGONUM SETOSUM* Litv.

A leafless shrub, native to the Caspian region, where it is used as a sand binder.

For previous introduction see 107513.

108892. No. 136. June 18, 1934. From the Karakum Desert, north of Ashkhabad.

108893 and 108894. From the Repetek Sand Desert Experiment Station, Turkmenistan, June 28, 1934.

108893. No. 6. 108894. No. 3.

108895 to 108897. *CAREX* spp. *Cyperaceae*.108895. *CAREX DESERTORUM* Litv.

No. 140. June 19, 1934. From west of Ashkhabad on a clay flat. A desert-loving sedge from Turkistan with a creeping rhizome, a solitary stem 2 to 8 inches high, and flat rigid leaves half as long as the stem.

108896. *CAREX PHYSDODES* Bieb.

No. 146. June 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A perennial sedge, usually about 6 inches high, with filiform leaves. Native to sandy deserts in Turkistan.

For previous introduction see 107517.

108897. *CAREX* sp.

No. 135. June 13, 1934. From Milibash on the Syr Darya.

108898. *CONVOLVULUS DIVARICATUS* Regel and Schmalh. *Convolvulaceae*.

No. 137. June 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A densely hairy, erect or ascending plant with small ovate, acute, sessile leaves two-fifths of an inch long and very small terminal or axillary flowers. Native to sandy places near Chiva, central Asia.

For previous introductions see 98211.

108899. *CORISPERMUM PAPPILOSUM* (Kuntze) Iljin. *Chenopodiaceae*.

No. 143. June 18, 1934. From the Karakum Desert near Ashkhabad. A low bushy plant up to a foot high, with slender, arched branches. The lower leaves

108835 to 108977—Continued.

are oblanceolate, the upper ones almost linear. Native to Turkistan.

For previous introduction see 92977.

108900. CRAMBE KOTOCHYANA Boiss. Brassicaceae.

No. 130. Collected June 18, 1934, about 10 miles west of Ashkhabad in rocky soil. An erect herb with rounded-ovate dentate leaves 7 to 9 inches long and large white flowers. Native to Iran (Persia).

For previous introduction see 107520.

108901 to 108905. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

Presented by Director Frezi, Peoples Commissioner of Agriculture, Chardjui, Turkmenistan, June 24, 1934.

108901. No. 67. *Orange gulabe.* From Kerke; their best selection.

108902. No. 68. *Persian gulabe.*

108903. No. 69. *Green Chardjui gulabe.*

108904. No. 70. *Black Chiva gulabe.*

108905. No. 71. *Brown Chardjui gulabe.* Large meat, but not so sweet.

108906. CUTANDA MEMPHITICA (Spreng.) Richter. Poaceae. Grass.

No. 1. June 28, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A perennial grass of possible value as forage.

For previous introduction see 92978.

108907. DACTYLIS GLOMERATA L. Poaceae. Orchard grass.

No. 11. Collected June 20, 1934, in the Ashkhabad Mountains.

108908. DANTHONIA FORSKALII Trin. Poaceae. Grass.

No. 9. June 27, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A tufted perennial grass about 16 inches tall, with broad linear leaves over 2 inches long. Native to sandy places in Egypt.

108909 and 108910. DELPHINIUM CAMPTOCARPUM Fisch. and Mey. Ranunculaceae.

A somewhat bushy annual 6 inches high, with biternate leaves and small grayish-blue flowers. Native to sandy places in southeastern Europe.

For previous introduction see 106873.

108909. No. 10. From the Repetek Sand Desert Experiment Station, Turkmenistan.

108910. No. 111. Collected June 18, 1934, in the Karakum Desert.

108911. DIANTHUS sp. Silenaceae.

No. 144. June 21, 1934. From the Kopet Dag, near Ashkhabad.

108912 and 108913. ELYMUS CAPUT-MEDUSAE L. Poaceae.

108912. No. 26. June 13, 1934. From Arice, Uzbekistan.

108913. No. 24. June 14, 1934. From the foothills west of Ashkhabad in dry rocky soil.

108835 to 108977—Continued.

108914. EPHEDRA STROBILACEA Bunge. Gnetaeaceae.

No. 12. June 23, 1934. Repetek Sand Desert Experiment Station, Turkmenistan. A large bushy shrub about 6 feet high, with irregularly whorled, terete, yellowish branches and minute triangular leaves. Native to central Asia.

108915. EREMOSPARTON FLACCIDUM Litv. Fabaceae.

No. 17. June 23, 1934. Repetek. A bushy tree about 15 feet high, native to sandy places in the Transcasian region. The branches are threadlike and limp, and the small flowers are dark violet.

For previous introduction see 98213.

108916. EREMOSTACHYS sp. Menthaceae.

No. 75. Collected June 14, 1934, between Milibash and Tashkent. An erect perennial with large dentate leaves, mostly radical. The yellowish flowers are in dense whorls.

108917. FERULA BADRAKEMA K.-Pol. Apiaceae.

No. 150-G. June 17, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A large coarse perennial, 4 to 5 feet high, with pinnatisect leaves and whitish flowers in dense terminal umbels. Native to the Transcasian region.

108918. FRITILLARIA KARELINI (Fisch.) Baker. Liliaceae.

No. 47. June 18, 1934. From the Kopet Dag near Ashkhabad. A dwarf compact species, with flowers which vary from pink to lilac, in 3- to 12-flowered racemes.

For previous introduction see 61423.

108919. HEDYSARUM WIGHTIANUM Aitch. and Baker.

No. 20. June 21, 1934. From the mountains near Ashkhabad. A low shrub up to a foot high, with compound leaves 2 to 4 inches long and small reddish-yellow flowers in racemes. Native to Afghanistan.

108920 to 108923. HORDEUM spp. Poaceae.

108920 and 108921. HORDEUM BULBOSUM L. Grass.

108920. No. 22. June 20, 1934. From the Kopet Dag, south of Ashkhabad.

108921. No. 25. June 20, 1934. From the Ashkhabad Mountains.

108922. HORDEUM MURINUM L. Grass.

No. 21. June 1934. From Montitash near Arice, Uzbekistan.

For previous introduction see 99130.

108923. HORDEUM SPONTANEUM C. Koch. Barley.

No. 23. June 1934. From the Kopet Dag, south of Ashkhabad.

For previous introduction see 107062.

108924. IRIS FILIFOLIA Boiss. Iridaceae.

No. 58. June 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. An iris with pale-green filiform leaves 2 feet or more long and violet-purple flowers about 1 inch long on a scape 2 feet high. Native to Spain.

108835 to 108977—Continued.

108925. IRIS sp.

No. 27. June 1934. Collected north of Ashkhabad.

108926 to 108928. ISATIS spp. Brassicaceae.

108926 and 108927. ISATIS MINIMA Bunge.

A low annual with oblong sinuate radical leaves, linear-lanceolate stem leaves, and yellow flowers.

For previous introduction see 92985.

108926. No. 138. June 14, 1934. Between Milibash and Tashkent.

108927. No. 59. June 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan.

108928. ISATIS VIOLASCENS Bunge.

No. 28. May 28, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A slender annual about a foot high, with oblong-lanceolate, entire leaves and yellow flowers. Native to Iran (Persia).

For previous introduction see 92986.

108929. ECHINOSPERMUM SEMIGLABRUM Ledeb. Boraginaceae.

No. 14. June 18, 1934. North of Ashkhabad, in the Karakum Desert. A sand-loving annual, native to somewhat salty places in central Asia, with a tuft of erect stems 6 to 10 inches high, obtuse-spatulate leaves, and small white flowers in racemes.

108930. LATHYRUS sp. Fabaceae.

No. 42. June 26, 1934. From the Kopet Dagh near Ashkhabad.

108931. LEONTICE EVERSMAINI Bunge. Berberidaceae.

No. 16. From Repetek, Turkmenistan. A herbaceous perennial about a foot high, with pinnatisect leaves and terminal racemes of small yellow flowers. Native to Turkistan.

108932. LYCIUM RUTHENICUM Murr. Solanaceae.

No. 30. June 18, 1934. From the edge of the Karakum Desert, Ashkhabad. A shrub up to 6 feet high, with fascicled, linear leaves about 1 inch long and small purple flowers. Native to salty areas in southwestern Asia.

108933. MALCOMIA CIRCINNATA Boiss. Brassicaceae.

No. 72. June 8, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. An annual about a foot high, with oblong-lanceolate, runcinate leaves and racemes of small pale-pink flowers. Native to Turkistan.

108934. MATRICARIA LAMELLATA Bunge. Asteraceae.

No. 31. From Repetek, June 23, 1934. A low annual, 3 to 5 inches high, with fleshy, hairy, pectinate leaves less than an inch long and small flower heads, the ray flowers white and the disk flowers yellow. It is a good grazing plant and is native to central Asia.

108935 to 108941. Collected in June 1934 in the clay foothills of the Kopet Dagh, south of Ashkhabad, near the border of Iran.

108835 to 108977—Continued.

108935. MEDICAGO RADIATA L. Fabaceae.

No. 57.

108936 to 108939. ONOBRYSCHIS spp. Fabaceae.

108936. ONOBRYSCHIS CHORASSANICA Bunge.

No. 34.

108937. ONOBRYSCHIS PULCHELLA Schrenk.

No. 33. An erect annual with narrow acute leaflets, stems about 2 feet high, and dull-yellow flowers. A forage plant native to the Soviet Union.

108938. ONOBRYSCHIS sp.

No. 80. Received under the name "perrisanica," for which a place of publication has not been found.

108939. ONOBRYSCHIS PULCHELLA Schrenk.

No. 32. An annual less than a foot high, with narrow leaflets and pink flowers. Native to the Soviet Union.

108940. PAPAVER sp. Papaveraceae.

No. 35.

108941. PAPAVER sp. Papaveraceae.

No. 36.

108942. PEGANUM HARMALA L. Zygophyllaceae.

No. 81. June 18, 1934. From the edge of the Karakum Desert, near Ashkhabad. In Iran this plant is used medicinally.

108943. PENNISETUM ORIENTALE L. Rich. Poaceae.

No. 45. June 19, 1934. From the foothills of the Kopet Dagh, 15 miles west of Ashkhabad.

108944 to 108946. PHELUM PANICULATUM Huds. Poaceae.

Collected June 20, 1934, in the Kopet Dagh, south of Ashkhabad, near the Iranian frontier.

108944. No. 40. 108946. No. 41.

108945. No. 29.

108947 to 108949. POA BULBOSA L. Poaceae. Bluegrass.

108947. No. 37. June 1934. From near Arice, Uzbekistan.

108948. No. 44. June 14, 1934. Montitash near Tashkent, Uzbekistan.

108949. No. 38. From the Kopet Dagh, south of Ashkhabad, in a rolling wheatfield, June 20, 1934.

108950. PRUNUS MICROCARPA Meyer. Amygdalaceae.

No. 43. June 20, 1934. From a mountain top in the Kopet Dagh, near Ashkhabad. A bush 3 to 7 feet high, with coarsely serrate leaves, rosy pink flowers less than an inch across, and small yellowish or red fruits. Native to Asia Minor.

108951 to 108953. RHEUM spp. Polygonaceae.

108835 to 108977—Continued.

108951. RHEUM sp.

No. 39. June 21, 1934. From the Kopet Dagh, south of Ashkhabad. Received under the name "turcomanicum," for which a place of publication has not been found.

108952 and 108953. RHEUM TURKESTANICUM Janischew.

June 23, 1934. Repetek, Tur'menistan. A wild rhubarb from the Transcaspian region, over 2 feet high, with a large thick rhizome and a short thickened, densely leafy stem. The cordate-reniform leaves, up to 8 in number, are about a foot wide.

For previous introduction see 98217.

108952. No. 48. 108953. No. 49.

108954. ROSA sp. Rosaceae.

No. 46. June 20, 1934. From the Kopet Dagh.

108955. SALSOLA ARBORESCENS RICHLERI Moquin. Chenopodiaceae.

No. 62. From the Repetek Sand Desert Experiment Station, Turkmenistan. A much-branched shrub with semiterete leaves and small inconspicuous flowers. Native to the deserts of Siberia.

For previous introduction see 107575.

108956 to 108958. SENECIO SUBDENTATUS Ledeb. Asteraceae.

An erect annual up to 9 inches high, with broadly linear leaves about 2 inches long, more or less entire, and corymbs of yellow flower heads. A good grazing plant, native to central Asia.

108956. No. 63. June 18, 1934. From sandy soil in the Karakum Desert.

108957 and 108958. From the Repetek Sand Desert Experiment Station, Turkmenistan.

108957. No. 61. May 28, 1934.

108958. No. 51. June 1934.

108959 and 108960. SMIRNOWIA TURKESTANA Bunge. Fabaceae.

June 24, 1934. From the Repetek Sand Desert Experiment Station, Turkmenistan. A much-branched shrub with long, almost filiform branches and leaves reduced to a single obovate leaflet. Native to the deserts of Turkistan.

For previous introduction see 101980.

108959. No. 53. 108960. No. 50.

108961 to 108964. STIPA spp. Poaceae. Grass.

108961. STIPA CAUCASICA Schmalh.

No. 54. June 17, 1934. Collected in the sandy soil of the Karakum Desert north of Ashkhabad. A tufted perennial grass over a foot high with narrow panicles. Native to the Caucasus.

108962. STIPA FONTANESII Parl.

No. 52. June 21, 1934. From the Kopet Dagh, in clay soil. A perennial grass with slender leaves. Native to Europe.

108835 to 108977—Continued.

108963 and 108964. STIPA SZOVITZIANA Trin.

A tufted perennial grass with fibrous roots and short rigid leaves. Native to Asia Minor, Arabia, and Iran.

For previous introduction see 106905.

108963. No. 55. June 20, 1934. From clay soil, in the Kopet Dagh, near Ashkhabad.

108964. No. 56. June 13, 1934. From Milibash on the Syr Darya.

108965 and 108966. June 8, 1934; from the Repetek Sand Desert Experiment Station, Turkmenistan.

108965. SUAEDA LYPKII Litv. Chenopodiaceae.

No. 60. An erect annual up to 16 inches high, with terete filiform leaves and inconspicuous flowers. Native to the Transcaspien region.

108966. TAMARIX KARELINI Bunge. Tamaricaceae.

No. 65. Received as *T. ramosissima*, a synonym of the above species. A bushy shrub with glaucous, deciduous branchlets and slender racemes of deep-purple flowers. Native to the vicinity of the Caspian Sea.

108967. TOURNEFORTIA sp. Boraginaceae.

No. 19. June 18, 1934. From the Karakum Desert north of Ashkhabad. Received under the name "sogdiana," for which a place of publication has not been found. A sand-binding plant.

108968 to 108970. TRIGONELLA spp. Fabaceae.

108968. TRIGONELLA ARCUATA Meyer.

No. 83. June 13, 1934. From Montitash near Arice.

For previous introduction and description see 108110.

108969 and 108970. Collected between Milibash on the Syr Darya and Tashkent, June 13, 1934.

108969. TRIGONELLA sp.

No. 82.

108970. TRIGONELLA sp.

No. 77.

108971. TULIPA sp. Liliaceae.

No. 78. Collected between Milibash on the Syr Darya and Tashkent, June 13, 1934.

108972 to 108974. Collected June 19 and 20, 1934, on the Kopet Dagh, near Ashkhabad.

108972. VICIA sp. Fabaceae.

No. 64.

108973. VICIA sp. Fabaceae.

No. 150-F. Found in dry rocky soil.

108974. VICIA sp. Fabaceae.

No. 66.

108975. (Undetermined.)

No. 141. June 13, 1934. A crucifer collected along the railroad south of Milibash along the Syr Darya.

108835 to 108977—Continued.

108976. (Undetermined.)

No. 142. June 13, 1934. A crucifer from Milibash on the Syr Darya.

108977. (Undetermined.)

No. 76. June 14, 1934. Collected on rolling land between Milibash and Tashkent.

108978. *ALLIUM SATIVUM* L. Liliaceae.
Garlic.

From Europe. Bulbs presented by Prof. Ivo Volarić, State Agronomist, Croatia, Yugoslavia. Received February 16, 1935.

Native garlic, introduced for Department specialists.

108979 to 108982. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From New Zealand. Seeds presented by R. B. Tennent, Director, Fields Division, Department of Agriculture, Wellington. Received February 16, 1935.

Introduced for Department specialists.

108979. Solid straw Tuscan (standard).

108980. Solid straw Tuscan (variant).

108981. Solid straw Tuscan, Selection 13/28.

108982. Cross 7.

108983. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

From Venezuela, South America. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received February 16, 1935.

From the market at Caracas. A cultivated variety of the Andes section of Venezuela, said to be the only potato that will produce a crop there.

108984 to 108989.

From Egypt, Africa. Seeds presented by Thomas W. Brown, Ministry of Agriculture, Giza. Received February 18, 1935.

Locally grown strains introduced for Department specialists.

108984. *ALLIUM CEPA* L. Liliaceae. Onion.108985 to 108987. *ALLIUM SATIVUM* L. Liliaceae. Garlic.108988. *APIUM GRAVEOLENS* L. Apiaceae. Celery.108989. *DAUCUS CAROTA* L. Apiaceae. Carrot.108990. *NEPHELIUM LAPPACEUM* L. Sapindaceae. Rambutan.

From Java. Seeds presented by A. M. Cramer, Sr., Wonosobo. Received February 11, 1935.

Tangkoeve, a freestone variety of an erect tropical tree 35 to 40 feet high, native to the Malay Archipelago, and not yet extensively cultivated elsewhere. The compound leaves are composed of five to seven pairs of elliptic, obovate or oblong, glabrate leaflets about 4 inches long, shining dark-green above, paler beneath. The small flowers are in loose axillary and terminal panicles. The crimson or yellowish fruits, in clusters of 10 to 12, are oval, about 2 inches

108990—Continued.

long, and covered with soft fleshy spines less than an inch long. The white juicy translucent flesh (aril) which adheres to the oblong flattened seed is acidulous in flavor.

For previous introduction see 101158.

108991 and 108992.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos. Received February 9, 1935.

108991. *GILBERTIA ARBOREA* (L.) E. March. Araliaceae.

A large shrub or small tree, with oval-oblong or three-lobed leaves and umbels of small whitish flowers, succeeded by black fruits. Native to the Canal Zone.

108992. *QUISQUALIS INDICA* L. Combretaceae. Rangoon-creeper.

A rambling, subscandent shrub native to India, with opposite obovate leaves 4 inches long and short axillary and terminal spikes of tubular pink or red flowers. The obovoid fruits are 1 to 2 inches long and are sharply five-angled.

For previous introduction see 98380.

108993. *EPHEDRA* sp. Gnetaceae.

From India. Seeds presented by Ralph R. Stewart, Gordon College, Rawalpindi. Received February 7, 1935.

Introduced for Department specialists.

108994 to 109001.

From California. Seeds presented by James N. Robinson, Cash Nurseries, Sebastopol. Received February 12, 1935.

108994. *AGAPETES* sp. Vacciniaceae.

The agapetes are tender evergreen shrubs with handsome lustrous foliage and showy, usually scarlet, flowers. Native to the Himalayas at altitudes between 3,000 and 6,000 feet.

108995. *LEUCOSPERMUM REFLEXUM* Buek. Proteaceae.

An erect shrub with linear-oblong leaves, dentate at the apex, 1 to 2 inches long, and small yellow flowers in roundish heads 3 inches across. Native to South Africa.

108996. *PRIMULA KINGII* Watt. Primulaceae. Primrose.

A glabrous perennial, native to the Sikkim Himalayas. The elliptic-lanceolate, crenulate leaves, 2 to 3 inches long, are in a crowded rosette, and the slender scapes, 6 to 10 inches high, bear four or five claret-colored, funnel-shaped flowers nearly an inch across.

For previous introduction see 102324.

108997. *PRIMULA WATTHI* King. Primulaceae. Primrose.

A handsome primrose from the Sikkim Himalayas, with oblong-oblancoate, membranous, lobed-crenate leaves one-half inch across and small violet flowers in heads 2 inches across on a scape 5 to 6 inches high.

108998. *RHODODENDRON ANTHOPOGON* Don. Ericaceae.

A small shrub 1 foot high, with rough densely scaly branches and leaves which

108994 to 109001—Continued.

are over an inch long, cinnamon brown beneath, and tomentose from the layer of glands. The yellow flowers are in numerous short terminal fascicles.

For previous introduction see 58914.

108999. RHODODENDRON AUCKLANDII Hook. f. Ericaceae.

A rare shrub up to 8 feet high, native to the Sikkim Himalayas between 7,000 and 9,000 feet altitude. The oblong-elliptical, bright-green leaves are 4 to 10 inches long, and the flowers, white, tinged with pink, and 4 inches across, are in terminal clusters of three to five.

109000. SWERTIA MULTICAULIS D. Don. Gentianaceae.

A caespitose herbaceous perennial about 2 inches high, with lanceolate obtuse leaves and small purplish flowers. Native to the mountains of Nepal, India.

109001. TSUGA MERTENSIANA Carriere. Pinaceae.

A large tree, 200 feet or more in height, of pyramidal habit. Closely allied to *Tsuga canadensis*, but differing in its un-forked trunk and spirelike summit. Native to the Pacific coast of North America from Oregon to Alaska.

109002 to 109189.

From Turkey. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received January 8, 1935.

109002 to 109009. AEGILOPS sp. Poaceae.

109002. AEGILOPS SPELTOIDES Tausch.

No. T-104. Collected September 26, 1934, about 10 miles east of Sivas. A bushy grass with slender erect stems and narrow rough leaves. It is native to western Asia, especially Syria.

For previous introduction see 45802.

109003. AEGILOPS sp.

No. T-59. September 25, 1934, at Palas Lake.

109004 and 109005. Collected September 21, 1934, at Ankara.

109004. AEGILOPS sp.

No. T-10.

109005. AEGILOPS sp.

No. T-5.

109006. AEGILOPS sp.

No. T-40. September 24, 1934. Near Kirshehir.

109007 and 109008. Collected September 21, 1934, at Ankara.

109007. AEGILOPS sp.

No. T-2.

109008. AEGILOPS sp.

No. T-7.

109009. AEGILOPS sp.

No. T-46. September 24, 1934. About 15 miles southeast of Kirshehir.

109010 to 109022. AGROPYRON spp. Poaceae. Wheatgrass.

109010 to 109012. AGROPYRON CRISTATUM (L.) Gaertn. Crested wheatgrass.

109002 to 109189—Continued.

109010. No. T-33. About 25 miles southeast of Ankara, September 23, 1934.

109011. No. T-68. September 25, 1934. Found on very dry red loam near Palas Lake, northeast of Kayseri.

109012. No. T-3. September 21, 1934. Found on dry gravelly clay soil at Ankara.

109013 to 109016. AGROPYRON TRICOPHORUM (Link) Richt.

For previous introduction see 107483.

109013. No. T-44. September 24, 1934. About 15 miles southeast of Kirshehir.

109014. No. T-95. September 26, 1934. Between 35 and 40 miles east of Sivas in dry limestone hills.

109015. No. T-58. September 25, 1934, at Palas Lake.

109016. No. T-45. September 24, 1934. About 15 miles southeast of Kirshehir.

109017. AGROPYRON sp.

No. T-16. September 23, 1934. About 30 miles northeast of Kirshehir on a dry mountainside.

109018. AGROPYRON sp.

No. T-32. September 23, 1934; Ankara.

109019. AGROPYRON sp.

No. T-121. September 27, 1934. In rocky soil in a mountain gorge, 50 miles south of Giresun.

109020. AGROPYRON sp.

No. T-100. September 26, 1934. Found in dry clay soil 65 miles northeast of Sivas.

109021. AGROPYRON sp.

No. T-79. About 50 miles northeast of Sivas on a mountain slope.

109022. AGROPYRON sp.

No. T-148. September 27, 1934. About 15 miles from Shebinkarahisar and Giresun.

109023 and 109024. AGROSTIS ALBA L. Poaceae. Redtop.

109023. No. T-127. From Shebinkarahisar.

109024. No. T-64. September 25, 1934. From a low area near Palas Lake, northeast of Kayseri.

109025 and 109026. AGROSTIS INTERRUPTA L.

An annual bushy grass up to 2 feet high. Native to sandy places in the Mediterranean countries.

For previous introduction see 107483.

109025. No. T-80. September 26, 1934. From a dry rocky mountainside about 65 miles east of Sivas.

109026. No. T-132. September 27, 1934. From rocky soil in a mountain gorge, 50 miles south of Giresun.

109002 to 109189—Continued.

109027 to 109029. ALLIUM spp. Liliaceae.

109027 and 109028. ALLIUM CEPA L.
Onion.

109027. No. T-180. From Samsun.

109028. No. T-135. From the bazaar
at Shebinkarahisar, September 27,
1934.

109029. ALLIUM sp.

No. T-72. September 25, 1934.
From Palas Lake.

109030. ALTHAEA sp. Malvaceae.

No. T-143. September 27, 1934.
About 65 miles south of Gitesun in a
mountain gorge.109031 to 109033. ANDROPOGON ISCHAEMUM
L. Poaceae.109031. No. T-6. September 21, 1934.
Ankara. From very dry permanent
sod growing on gravelly clay.109032. No. T-47. September 24, 1934.
From a very dry clay rolling plain,
about 7 miles east of Kirshehir.109033. No. T-60. September 25, 1934.
Kayseri. Collected on dry rocky soil.109034. ANETHUM GRAVEOLENS L. Api-
ceae. Dill.No. T-178. September 30, 1934. From
Samsun.109035. ARBUTUS ANDRACHNE L. Erica-
ceae.No. T-155. September 27, 1934. From
Giresun.For previous introduction and descrip-
tion see 108298.109036. AVENA DESERTORUM Less. Poa-
ceae.No. T-136. September 27, 1934. From
rocky soil in a mountain gorge, about 65
miles south of Giresun. A perennial
grass, native to central Asia, with a black
fibrous rhizome and rigid, elongated
leaves.

109037. RHODODENDRON sp. Ericaceae.

No. T-165. September 27, 1934.
From Giresun.

109038 to 109040. BETA VULGARIS L. Chenopodiaceae. Beet.

109038 and 109039. September 30, 1934.
From Samsun.

109038. No. T-179. 109039. No. T-184.

109040. No. T-169. September 27, 1934.
From the bazaar at Shebinkarahisar.109041 and 109042. BRASSICA OLERACEA CA-
PUTATA L. Brassicaceae. Cabbage.

September 30, 1934, at Samsun.

109041. No. T-187. 109042. No. T-183.

109043. BRIZA MEDIA L. Poaceae.

No. T-122. About 20 miles north of
Shebinkarahisar. A low perennial grass
with erect culms. Native to Europe.

109044. BRIZA MINOR L. Poaceae.

No. T-91. September 26, 1934. About
65 miles northeast of Sivas. An erect
annual grass, up to 3 feet high. Native
to Europe.

109002 to 109189—Continued.

109045. BROMUS sp. Poaceae.

No. T-62. September 25, 1934. An
annual grass collected 35 miles north-
east of Kayseri near Palas Lake.

109046. BROMUS sp. Poaceae.

No. T-70. September 25, 1934. About
105 miles northeast of Kayseri. A per-
ennial grass.

109047. BROMUS sp. Poaceae.

No. T-88. September 26, 1934. A
perennial grass found on dry limestone
hills about 65 miles east of Sivas.

109048. BROMUS sp. Poaceae.

No. T-123. September 27, 1934. Col-
lected at the mouth of a small canyon
about 10 miles from Shebinkarahisar, en
route to Giresun.

109049. CALAMAGROSTIS sp. Poaceae.

No. T-163. September 27, 1934.
10 miles from Shebinkarahisar, en route
to Giresun.

109050. CALAMAGROSTIS sp. Poaceae.

No. T-85. September 26, 1934. About
55 miles northeast of Sivas in the moun-
tains.

109051. CAMPANULA sp. Campanulaceae.

No. T-177. September 28, 1934. From
a mountainside at Giresun.

109052. CAMPANULA sp. Campanulaceae.

No. T-128. September 27, 1934. From
Giresun. A form with white flowers.

109053 and 109054. CAPSICUM ANNUUM L. Solanaceae. Common redpepper.

109053. No. T-37. September 24, 1934.
From the Kayseri bazar.109054. No. T-189. September 30, 1934.
A sweet pepper from Samsun.

109055. CISTUS sp. Cistaceae.

No. T-176. September 24, 1934. From
Giresun.

109056. CLEMATIS sp. Ranunculaceae.

No. T-166. September 27, 1934. From
Giresun.109057. CORIANDRUM SATIVUM L. Api-
ceae. Coriander.No. T-191. September 30, 1934. From
Samsun.

109058. COTONEASTER sp. Malaceae.

No. T-20. September 23, 1934. From
a dry rocky hillside about 65 miles south-
east of Ankara.

109059 to 109062. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

109059. No. T-81. September 26, 1934.
A long, gray netted melon from Sivas.109060. No. T-48. September 24, 1934.
A green-skinned melon of very good
flavor from Kirshehir.109061. No. T-141. September 27, 1934.
A round yellow melon from She-
binkarahisar.109062. No. T-49. September 24, 1934.
From Ankara. A melon with a
mottled green and yellow skin.

109002 to 109189—Continued.

109063. *CUCUMIS SATIVUS* L. Cucurbitaceae.
Cucumber.
No. T-148. September 27, 1934. From the bazar at Shebinkarahisar.
109064. *CUCURBITA MAXIMA* Duchesne. Cucurbitaceae. Squash.
No. T-196. September 30, 1934. From Samsun.
109065. *CYNANCHUM* sp. Asclepiadaceae.
No. T-161. September 27, 1934. From Giresun. An attractive vine with milky juice and seed pods like the milkweed.
- 109066 to 109068. *CYNODON DACTYLON* (L.) Pers. Poaceae. Bermuda grass.
109066. No. T-8. September 21, 1934. Along the roadside at Ankara.
109067. No. T-30. September 23, 1934. Along the roadside in dry stony clay soil about 65 miles southeast of Anlara.
109068. No. T-63. September 25, 1934. About 35 miles northeast of Kayseri.
- 109069 and 109070. *CYNOSURUS CRISTATUS* L. Poaceae. Crested dogtail.
109069. No. T-134. September 27, 1934. Collected in stony soil in a mountain canyon about 50 miles south of Giresun.
109070. No. T-130. September 27, 1934. About 10 miles from Shebinkarahisar, en route to Giresun.
- 109071 to 109073. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.
109071. No. T-69. September 25, 1934. Collected about 25 miles northeast of Kayseri near Palas-Lake, on reddish clay loam.
109072. No. T-14. September 23, 1934. Collected 80 miles southeast of Ankara in very dry loam.
109073. No. T-19. September 23, 1934. From a dry overgrazed hillside of stony loam soil between 6 and 25 miles southeast of Ankara.
- 109074 and 109075. *DAUCUS CAROTA* L. Apiaceae. Carrot.
109074. No. T-182. September 30, 1934. From Samsun.
109075. No. T-131. September 27, 1934. From the bazaar at Shebinkarahisar.
- 109076 and 109077. *DESCHAMPSIA CAESPI-TOSA* (L.) Beauv. Poaceae.
109076. No. T-142. September 27, 1934. From rocky soil in a mountain gorge, 50 miles south of Giresun.
109077. No. T-160. September 27, 1934. Twenty miles from Shebinkarahisar, en route to Giresun.
109078. *DIANTHUS* sp. Silenaceae.
No. T-34. September 24, 1934. South-east of Kirshehir.
109079. *DIANTHUS* sp. Silenaceae.
No. T-74. September 21, 1934. From dry rocky soil at Kayseri.
109080. *ECHINOPS BANNATICUS* Roch. Asteraceae.
No. T-109. September 26, 1934. An ornamental, thistlelike plant with blue

109002 to 109189—Continued.

- stems and blue flowers, collected about 50 miles northeast of Sivas.
- 109081 to 109083. *ELICHRYSUM* spp. Asteraceae.
Strawflowers collected September 26, 1934, from 7 to 40 miles east of Sivas.
109081. *ELICHRYSUM* sp.
No. T-101.
109082. *ELICHRYSUM* sp.
No. T-112. A yellow strawflower found growing in limestone.
109083. *ELICHRYSUM* sp.
No. T-117.
109084. *EREMURUS* sp. Liliaceae.
No. T-50. September 25, 1934. From Kayseri.
109085. *EREMURUS* sp. Liliaceae.
No. T-57. September 25, 1934. From Kayseri.
- 109086 to 109088. *FESTUCA OVINA* L. Poaceae. Sheep fescue.
109086. No. T-66. September 25, 1934. About 100 miles from Kayseri, en route to Sivas, in barren limestone soil.
109087. No. T-110. September 26, 1934. Collected about 8 miles east of Sivas in limestone hills.
109088. No. T-77. About 8 miles northeast of Sivas on a dry stony mountainside. September 26, 1934.
109089. *GLAUCIUM* sp. Papaveraceae.
No. T-12. September 21, 1934. Ankara. A plant with orange-colored flowers like the California-poppy.
- 109090 and 109091. *HOLCUS LANATUS* L. Poaceae. Velvet grass.
September 27, 1934. About 12 miles from Shebinkarahisar, en route to Giresun.
109090. No. T-125. 109091. No. T-126.
109092. *HORDEUM BULBOSUM* L. Poaceae.
No. T-27. September 23, 1934. From a dry rocky hillside about 70 miles southeast of Ankara.
- 109093 to 109095. *JUNIPERUS* spp. Pinaceae.
109093. *JUNIPERUS COMMUNIS* L. Common juniper.
No. T-83. September 26, 1934. From a mountainside, 40 miles east of Sivas.
- 109094 and 109095. *JUNIPERUS OXYCEDRUS* L. Prickly juniper.
An ornamental evergreen tree, native to Europe, about 15 feet high, with light-green foliage covered somewhat with a whitish bloom. It is reported to thrive in dry rocky places.
For previous introduction see 79922.
109094. No. T-92. September 26, 1934. About 50 miles east of Sivas.
109095. No. T-26. September 23, 1934. About 65 miles southeast of Ankara.

109002 to 109189—Continued.

- 109096 to 109098. *KOELERIA CRISTATA* (L.) Pers. Poaceae.
109096. No. T-106. September 26, 1934. From a dry rocky mountainside, about 40 miles northeast of Sivas.
109097. No. T-61. September 25, 1934. About 107 miles northeast of Kayseri.
109098. No. T-93. September 26, 1934. From a dry stony mountainside, about 7 miles northeast of Sivas.
109099. *KOELERIA* sp. Poaceae.
No. T-15. September 23, 1934. From permanent grazing land on a stony hillside about 25 miles southeast of Ankara.
- 109100 and 109101. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.
109100. No. T-170. September 27, 1934. From the bazar at Shebinkarahisar.
109101. No. T-186. September 30, 1934. From Samsun.
109102. *LATHYRUS* sp. Fabaceae.
No. T-97. September 26, 1934. About 50 miles northeast of Sivas.
109103. *LEPIDIUM SATIVUM* L. Brassicaceae. Garden cress.
No. T-185. September 30, 1934. From Samsun.
- 109104 to 109106. *LINUM* spp. Linaceae. Flax.
109104. *LINUM* sp.
No. T-111. September 26, 1934. About 37 miles east of Sivas, from dry limestone hills.
- 109105 and 109106. *LINUM USITATISSIMUM* L.
109105. No. T-71. September 15, 1934. Thirty miles east of Kayseri.
109106. No. T-35. September 24, 1934. From the bazar at Kayseri.
109107. *LOLIUM PERENNE* L. Poaceae. Perennial ryegrass.
No. T-159. September 27, 1934. From a mountain gorge 50 miles south of Giresun.
- 109108 to 109111. *LOTUS* spp. Fabaceae.
Shrubby perennials found in woods and thickets on the mountainside near Giresun, September 27 and 28, 1934.
109108. *LOTUS* sp.
No. T-156.
109109. *LOTUS* sp.
No. T-174.
109110. *LOTUS* sp.
No. T-173.
109111. *LOTUS* sp.
No. T-158.
- 109112 and 109113. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.
109112. No. T-38. September 24, 1934. From the Kayseri bazar.
109113. No. T-181. September 30, 1934. From Samsun.

109002 to 109189—Continued.

109114. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.
No. T-120. September 26, 1934. From the Sivas bazar.
109115. *MEDICAGO FALCATA* L. Fabaceae. Yellow-flowered alfalfa.
No. T-115. September 26, 1934. About 50 miles northeast of Sivas.
- 109116 and 109117. Collected September 28, 1934, in woods near Giresun.
109116. *MESPILUS GERMANICA* L. Malaceae. Medlar.
No. T-172. This so-called wild-apple is acid and much like a quince until it turns brown, when it has a delicious flavor and aroma. Native to the Balkan region.
For previous introduction see 91842.
109117. *MOLINIA CAERULEA* (L.) Moench. Poaceae.
No. T-175. A grass with striped leaves which is cultivated as an ornamental for use in borders.
For previous introduction see 50540.
109118. *ONOBRYCHIS* sp. Fabaceae.
No. T-113. September 26, 1934. About 37 miles east of Sivas.
109119. *PEGANUM HARMALA* L. Zygophyllaceae.
No. T-11. September 21, 1934. From Ankara. A shrub common in dry soil in Turkey and Turkistan.
109120. *PENNISETUM* sp. Poaceae.
No. T-25. September 23, 1934. From a dry rocky hillside about 65 miles southeast of Ankara.
- 109121 to 109123. *PETROSELINUM HORTENSE* Hoffm. Apiaceae. Parsley.
109121. No. T-139. September 27, 1934. From the market at Shebinkarahisar.
- 109122 and 109123. Collected September 30, 1934, at Samsun.
109122. No. T-188. 109123. No. T-190.
- 109124 and 109125. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.
Collected September 30, 1934, at Samsun.
109124. No. T-195. A pole bean.
109125. No. T-194. A bush bean.
- 109126 to 109130. *PHLEUM* spp. Poaceae. Timothy.
- 109126 to 109129. *PHLEUM ARENARIUM* L.
109126. No. T-65. September 25, 1934. From a very dry, rocky clay field, much overgrazed, about 7 miles east of Kayseri.
109127. No. T-89. September 26, 1934. From a mountain slope about 55 miles northeast of Sivas.
109128. No. T-13. September 23, 1934. From a permanent grazing field on a dry stony loam hillside about 25 miles southeast of Ankara.
109129. No. T-154. September 27, 1934. From the rocky soil of a mountain gorge, 50 miles south of Giresun.

109002 to 109189—Continued.

109130. *PHLEUM PHLEOIDES* (L.) Karst.
No. T-17. From dry rocky soil about 65 miles southeast of Ankara, en route to Kirshehir.
109131. *PINUS* sp. Pinaceae.
No. T-76. September 26, 1934. Abundant in the mountains of northern Turkey.
- 109132 to 109142. *POA* spp. Poaceae.
Bluegrass.
- 109132 to 109135. *POA BULBOSA* L.
109132. No. T-43. September 24, 1934. From very dry clay soil of the rolling plain about 7 miles east of Kirshehir.
109133. No. T-55. September 25, 1934. About 8 miles northeast of Kayseri.
109134. No. T-105. September 26, 1934. From a dry stony mountainside, about 7 miles northeast of Sivas.
109135. No. T-41. September 24, 1934. Collected near Kirshehir.
109136. *POA* sp.
No. T-22. September 23, 1934. From a permanent grazing field on a dry stony hillside near Ankara.
109137. *POA* sp.
No. T-98. September 26, 1934. About 7 miles east of Sivas in limestone hills.
109138. *POA* sp.
No. T-107. September 26, 1934. From a mountain slope about 55 miles northeast of Sivas.
109139. *POA* sp.
No. T-24. September 23, 1934. From a dry rocky hillside about 65 miles southeast of Ankara.
109140. *POA* sp.
No. T-90. September 26, 1934. From a mountain slope about 55 miles northeast of Sivas.
109141. *POA* sp.
No. T-51. September 25, 1934. About 107 miles from Kayseri, en route to Sivas.
109142. *POA* sp.
No. T-116. September 26, 1934. About 7 miles east of Sivas on low limestone mountains.
109143. *POLYPOGON MONSPELIENSIS* (L.) Desf. Poaceae.
No. T-67. September 25, 1934. From a low area northeast of Kayseri near Palas Lake. An annual grass with soft bristly green or yellowish spikes up to 6 inches long.
For previous introduction see 107113.
109144. *PRUNUS* sp. Amygdalaceae.
No. T-147. September 27, 1934. A wild plum found at the entrance to a canyon about 12 miles north of Shebin-karahisar, en route to Giresun.

109002 to 109189—Continued.

109145. *PYRACANTHA COCCINEA* Roem. Malvaceae.
Scarlet firethorn.
No. T-133. September 27, 1934. A rather spiny, ornamental shrub with red fruit, collected at Giresun.
- 109146 to 109148. *RAPHANUS SATIVUS* L. Brassicaceae.
Radish.
109146. No. T-36. September 24, 1934. From the Kayseri bazar.
109147. No. T-193. September 30, 1934. From Samsun.
109148. No. T-137. September 27, 1934. From the Shebin-karahisar bazar.
109149. *RHAPHIS GRYLLOS* (L.) Desv. Poaceae.
No. T-23. September 23, 1934. From a dry rocky hillside about 65 miles southeast of Ankara.
109150. *RHODODENDRON* sp. Ericaceae.
No. T-162. September 27, 1934. From Giresun.
109151. *ROBINIA PSEUDACACIA* L. Fabaceae.
Common locust.
No. T-4. September 21, 1934. Black locust, collected along a roadside near Ankara.
- 109152 to 109154. *ROSA* spp. Rosaceae.
Rose.
109152. *ROSA* sp.
No. T-54. September 25, 1934. Near Palas Lake, about 27 miles northeast of Kayseri.
109153. *ROSA* sp.
No. T-53. September 25, 1934. A wild rose collected 100 miles northeast of Kayseri.
109154. *ROSA* sp.
No. T-198. October 1, 1934. A wild rose from Samsun.
109155. *RUBUS* sp. Rosaceae.
No. T-129. September 27, 1934. A wild blackberry collected near a mountain stream about 65 miles south of Giresun on the road from Shebin-karahisar. The berries are large, with a fine flavor, and the bush is a prolific bearer.
- 109156 and 109157. Collected September 27, 1934, at Giresun.
109156. *RUSCUS ACULEATUS* L. Convalariaceae.
Butchersbroom.
No. T-152. A shrub found growing in deep shade. The bright-red berries are borne on the leaves.
For previous introduction see 98159.
109157. *SCABIOSA* sp. Dipsacaceae.
No. T-149. A species with white flowers.
109158. *SILENE* sp. Silenaceae.
No. T-118. September 26, 1934. From Sivas. A plant found growing on almost bare limestone.
- 109159 and 109160. *SOLANUM MELONGENA* L. Solanaceae.
Eggplant.
109159. No. T-39. September 24, 1934. From the Kayseri bazar.

109002 to 109189—Continued.

109160. No. T-42. September 26, 1934. From Sivas. A long narrow type, grown commercially in Turkey.
- 109161 and 109162. SPINACIA OLERACEA L. Chenopodiaceae. **Common spinach.**
109161. No. T-146. September 27, 1934. From the bazar at Shebinkarahisar.
109162. No. T-192. September 30, 1934. From Samsun.
109163. STAPHYLEA PINNATA L. Staphyleaceae. **European bladdernut.**
- No. T-171. September 27, 1934. About 27 miles south of Giresun, en route to Shebinkarahisar. A treelike shrub with deciduous leaves and terminal clusters of small white flowers and much inflated membranaceous podlike fruits.
- For previous introduction see 50306.
- 109164 to 109172. STIPA spp. Poaceae. **Feathergrass.**
109164. STIPA CAPILLATA L.
- No. T-29. September 23, 1934. From a dry mountainside, 20 miles northeast of Kirshehir.
109165. STIPA sp.
- No. T-9. September 21, 1934. From Ankara.
109166. STIPA sp.
- No. T-78. September 26, 1934. From a dry rocky mountainside about 35 miles east of Sivas.
- 109167 to 109169. Collected September 23, 1934, from 25 miles to 85 miles southeast of Ankara.
109167. STIPA sp.
- No. T-18.
109168. STIPA sp.
- No. T-21. From a permanent grazing field on a stony dry hillside.
109169. STIPA sp.
- No. T-28. From very dry loam.
109170. STIPA sp.
- No. T-56. September 25, 1934. From dry red clay loam soil near Palas Lake, northeast of Kayseri.
- 109171 and 109172. Collected September 26, 1934, from a dry stony mountainside about 7 miles northeast of Sivas.
109171. STIPA sp.
- No. T-94.
109172. STIPA sp.
- No. T-108.
- 109173 to 109181. TRIFOLIUM spp. Fabaceae. **Clover.**
109173. TRIFOLIUM AGRARIUM L.
- No. T-144. September 27, 1934. *Hop clover*, found on a fairly moist mountain slope about 35 miles south of Giresun.
- For previous introduction see 108696.
- 109174 and 109175. TRIFOLIUM PRATENSE L. **Red clover.**

109002 to 109189—Continued.

109174. No. T-145. September 27, 1934. Collected along a mountain road 50 miles south of Giresun.
109175. No. T-96. September 26, 1934. Collected in the mountains about 50 miles northeast of Sivas.
109176. TRIFOLIUM sp.
- No. T-157. September 27, 1934. From Giresun.
- 109177 and 109178. Collected October 1, 1934, in the flats along the Black Sea, 10 miles east of Samsun.
109177. TRIFOLIUM sp.
- No. T-197.
109178. TRIFOLIUM sp.
- No. T-199.
- 109179 and 109180. Collected September 26, 1934, about 50 miles northeast of Sivas.
109179. TRIFOLIUM sp.
- No. T-86. From a dry mountain slope.
109180. TRIFOLIUM sp.
- No. T-82.
109181. TRIFOLIUM sp.
- No. T-138. September 27, 1934. From Giresun.
109182. VIBURNUM sp. Caprifoliaceae.
- No. T-124. September 27, 1934. An ornamental shrub with large clusters of bright-red berries one-half inch in diameter, found on the bank of a canyon near Giresun.
- 109183 to 109185. VICIA spp. Fabaceae. **Broadbean.**
109183. VICIA FABA L. **Broadbean.**
- No. T-149-A. September 27, 1934. From the Shebinkarahisar bazar.
109184. VICIA sp.
- No. T-114. September 27, 1934. From about 50 miles northeast of Sivas.
109185. VICIA sp.
- No. T-140. September 26, 1934. From basalt soil near Giresun.
109186. (Undetermined.)
- No. T-73. September 25, 1934. From Kayseri. A shrub.
109187. CORNUS MAS L. Cornaceae. **Cornelian-cherry.**
- No. T-1. September 18, 1934. *Kizil-jik*. From the Ankara bazar. Small, dark-red fruits with a distinctive flavor.
- For previous introduction see 107624.
109188. PLUMBAGO EUROPAEA L.
- No. T-52. September 25, 1934. A flowering plant from Kayseri.
109189. (Undetermined.)
- No. T-153. September 27, 1934. From Giresun. A shrub with black berries.
109190. FURCRAEA FOETIDA (L.) Haw. Amaryllidaceae.
- From Venezuela, South America. Bulbils collected by W. A. Archer, Bureau of

109190—Continued.

Plant Industry. Received February 16, 1935.

No. 2995. *Coquisa*. Collected January 27, 1935, near Caracas. A tropical American plant, resembling the agaves in general habit, with little or no trunk, and broadly oblanceolate spineless leaves 5 to 8 feet long. The loose panicles of greenish-white flowers are borne on a slender scape about 25 feet high.

109191 to 109198.

From Australia. Seeds presented by Arthur Yates & Co., Ltd., seed merchants, at the request of Dr. H. Wenbolz, Department of Agriculture, Sydney, New South Wales. Received February 21, 1935.

Locally grown varieties introduced for Department specialists.

109191 to 109196. *ALLIUM CEPA* L. Liliaceae. **Onion.**

109191. *Brown Spanish; Yates select Werwent Long Keeping.*

109192. *Early Golden Gloc.*

109193. *Hunter River Early Brown.*

109194. *Hunter River Early White.*

109195. *Odourless.*

109196. *White Imperial Spanish.*

109197 and 109198. *APIUM GRAVEOLENS* L. Apiaceae. **Celery.**

109197. *South Australian Green.*

109198. *South Australian White.*

109199. *CASSIA SIEBERIANA* DC. Caesalpiaceae.

From Africa. Seeds presented by F. W. Hall, Senior Agricultural Superintendent, Department of Agriculture, Gambia, British West Africa, at the request of Sir Arthur Hill, Director of the Royal Botanic Gardens, Kew, England. Received February 19, 1935.

A small handsome tropical tree with pinnate foliage and long racemes of large yellow flowers. It is closely related to *Cassia fistula*.

For previous introduction see 73928.

109200. (Undetermined.)

From China. Seeds presented by Dr. Joseph F. Rock, Yunnanfu, Yunnan. Received February 9, 1935.

Chung Tien Tz. A large tree with fruits the size of a peach, which burst when ripe and expose the seeds.

109201 to 109203. *ROBINIA PSEUDACACIA* L. Fabaceae. **Common locust.**

From France. Seeds purchased from Vilmoir-Andrieux & Cie., Paris. Received February 18, 1935.

Introduced for Department specialists.

109201. Variety *Bessoniana*. A form with a rather dense ovoid head.

109202. Variety *Fastigiata*. A fastigiate pyramidal form.

109203. Variety *Spectabilis*. A spineless form.

109204 to 109208.

From India. Seeds presented by Judson College, through Winfield H. Scott, American consul, Rangoon, Burma. Received February 19, 1935.

109204. *BAUHINIA* sp. Caesalpiaceae.

A shrub with white flowers.

109205. *BAUHINIA* sp. Caesalpiaceae.

A climbing baubinia with deeply-lobed leaves 2 inches long and mauve flowers 2 inches across.

109206. *BAUHINIA* sp. Caesalpiaceae.

A shrub with attractive foliage and cream-colored flowers.

109207. *CAESALPINIA PULCHERRIMA* (L.) Swartz. Caesalpiaceae. **Flowerfence.**

Peacock flower. A handsome tropical evergreen shrub about 7 feet high, with mimosalike foliage and yellow flowers which appear on the new growth.

For previous introduction see 73096.

109208. *DELONIX REGIA* (Boj.) Raf. Caesalpiaceae. **Royal poinciana.**

Known in India as the *Golden Mohur* tree.

For previous introduction see 39964.

109209. *FESTUCA CAPILLATA* Lam. Poaceae. **Hair fescue.**

From Germany. Seeds presented by Ernst & Von Spreckelsen, Saathandel, Hamburg. Received February 21, 1935.

Introduced for Department specialists.

109210. *AMBURANA CLAUDII* Schwacke and Taub. Fabaceae.

From Brazil. Seeds presented through the Bureau of Entomology and Plant Quarantine, Washington, D. C. Received February 20, 1935.

A large tropical tree with odd-pinnate leaves composed of 11 to 15 alternate leaflets and large clusters of cream-white flowers borne on the old wood. The seeds are crushed and used to perfume tobacco. Both the seeds and the wood have a strong odor of coumarin. Native to dry regions in Brazil and northern Argentina.

For previous introduction see 37906.

109211 to 109213. *FESTUCA* spp. Poaceae. **Fescue.**

From Germany. Seeds presented by R. Liefmann Söhne Nachf., Hamburg. Received February 21, 1935.

Introduced for Department specialists.

109211. *FESTUCA CAPILLATA* Lam. **Hair fescue.**

109212. *FESTUCA OVINA* L. **Sheep fescue.**

109213. *FESTUCA RUBRA* L. **Red fescue.**

109214 to 109406.

From Turkey. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received January 11, 1935.

109214 and 109215. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. **Okra.**

109214. No. T-293. October 4, 1934. From the Kastamonu bazar.

109214 to 109406—Continued.

109215. No. T-368. October 10, 1934.
From the Adapazari bazar.

109216. *ABIES* sp. Pinaceae. Fir.

No. T-314. October 5, 1934. About 15 miles south of Kastamonu.

109217. *AELUROPUS LITTORALIS* (Gouan) Parl. Poaceae.

No. T-263. October 5, 1934. From a rocky mountainside about 7 miles south of Tosya.

For previous introduction see 108843.

109218 to 109220. *AGROPYRON* spp. Poaceae. Wheatgrass.

109218. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.

No. T-391. October 15, 1934. From the Sazova Experiment Station near Eskishehir.

109219. *AGROPYRON INTERMEDIUM* (Host.) Beauv.

No. T-322. October 8, 1934. About 20 miles east of Bolu.

109220. *BRACHYPODIUM CAESPITOSUM* (Host.) Roem. and Schult. Poaceae.

No. T-376. October 10, 1934. From rocky clay on dry mountainside, about 20 miles southwest of Bolu.

109221 to 109225. *AGROSTIS* spp. Poaceae. Grass.

109221. *AGROSTIS ALBA* L. Redtop.

No. T-333. October 9, 1934. About 10 miles west of Duzce.

109222. *AGROSTIS SPICA-VENTI* L.

No. T-233. October 3, 1934. From dry clay hillside and flat about 6 miles west of Chorum. An annual grass, usually about 20 inches high, with feathery panicles 4 to 8 inches long. Native to Europe.

109223 to 109225. *AGROSTIS ALBA* L. Redtop.

109223. No. T-222. October 2, 1934. About 12 miles south of Samsun.

109224. No. T-259. October 4, 1934. About 12 miles north of Tosya.

109225. No. T-319. October 8, 1934. About 18 miles north of Kizilja Hammam.

109226 to 109231. *ALLIUM* spp. Liliaceae.

109226 to 109229. *ALLIUM CEPA* L. Onion.

109226. No. T-251. October 1, 1934. From the Chasamba bazar.

109227. No. T-289. October 4, 1934. From the Kastamonu bazar.

109228. No. T-350. October 10, 1934. From the Adapazari bazar.

109229. No. T-384. October 11, 1934. From the Nallihan bazar.

109230 and 109231. *ALLIUM PORRUM* L. Leek.

109230. No. T-380. October 11, 1934. From the Nallihan bazar.

109231. No. T-354. October 10, 1934. From the Adapazari bazar.

109214 to 109406—Continued.

109232 to 109234. *ALTHAEA* spp. Malvaceae.

Collected October 2, 1934.

109232. *ALTHAEA* sp.

No. T-211. Collected about 30 miles west of Samsun.

109233. *ALTHAEA* sp.

No. T-215. Collected about 12 miles south of Samsun. A form with pink flowers.

109234. *ALTHAEA* sp.

No. T-227. Collected about 70 miles south of Samsun.

109235. *ANETHUM GRAVEOLENS* L. Apiaceae. Dill.

No. T-353. October 10, 1934. From the Adapazari bazar.

109236. *APIUM GRAVEOLENS* L. Apiaceae. Celery.

No. T-359. October 10, 1934. From the Adapazari bazar.

109237. *ASCLEPIAS* sp. Asclepiadaceae.

No. T-323. October 8, 1934. Found growing abundantly on dry rocky hills in the vicinity of Kizilja Hammam.

109238. *ASTRAGALUS* sp. Fabaceae.

No. T-310. October 5, 1934. A perennial shrub 3 feet high found about 40 miles northeast of Ankara on a dry hillside.

109239. *ASTRAGALUS* sp. Fabaceae.

No. T-398. October 15, 1934. From the Sazova Experiment Station, Eskishehir.

109240. *BERBERIS* sp. Berberidaceae.

No. T-239. October 3, 1934. About 2 miles north of Iskilip.

109241 to 109243. *BRACHYPODIUM PINNATUM* (L.) Beauv. Poaceae. Grass.

109241. No. T-202. October 2, 1934. Collected about 30 miles west of Samsun on a rocky clay hillside; an excellent sod grass.

109242. No. T-320. October 8, 1934. Southwest of Bolu about 36 miles.

109243. No. T-374. October 10, 1934. About 12 miles southwest of Bolu on a rocky mountainside.

109244. *BRACHYPODIUM* sp.

No. T-201. October 2, 1934. About 12 miles west of Samsun on a steep hillside.

109245 to 109248. *BRASSICA* spp. Brassicaceae.

109245 to 109247. *BRASSICA OLERACEA CAPITATA* L. Cabbage.

109245. No. T-265. October 4, 1934. From Tosya.

109246. No. T-287. October 4, 1934. From the Kastamonu bazar.

109247. No. T-358. October 10, 1934. From the Adapazari bazar.

109248. *BRASSICA* sp.

No. T-268. October 4, 1934. From Tosya.

109214 to 109406—Continued.

109249. CALAMAGROSTIS sp. Poaceae.
No. T-257. October 4, 1934. From high mountains about 15 miles north of Tosya.
- 109250 and 109251. CANNABIS SATIVA L. Moraceae. Hemp.
109250. No. T-285. October 4, 1934. From the Kastamonu bazar.
109251. No. T-297. October 4, 1934. From the Agricultural Museum, Kastamonu.
- 109252 to 109255. CAPSICUM ANNUM L. Solanaceae. Common redpepper.
109252. No. T-366. October 10, 1934. From the Adapazari bazar.
109253. No. T-288. October 4, 1934. From the Kastamonu bazar.
109254. No. T-278. October 4, 1934. Large peppers from the Kastamonu bazar.
109255. No. T-363. October 10, 1934. A hot pepper from the Adapazari bazar.
- 109256 and 109257. LEPIDIUM SATIVUM L. Brassicaceae. Garden cress.
109256. No. T-383. October 11, 1934. From the Nallihan bazar.
109257. No. T-271. October 11, 1934. From the Kastamonu bazar.
109253. CENTAURIUM sp. Gentianaceae.
No. T-344. October 9, 1934. About 12 miles west of Duzce. A small plant with attractive pink flowers found in dry situations.
109259. CICER ARIETINUM L. Fabaceae. Chickpea.
No. T-361. October 10, 1934. From the Adapazari bazar.
109260. CICER sp. Fabaceae.
No. T-348. October 9, 1934. From a steep roadside bank about 12 miles west of Bolu.
109261. CISTUS sp. Cistaceae.
No. T-255. October 4, 1934. From rocky mountain slopes south of Tosya.
- 109262 and 109263. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.
109262. No. T-387. October 11, 1934. From the Nallihan bazar.
109263. No. T-232. October 3, 1934. From Chorum. A melon with orange-colored flesh and a yellow skin.
- 109264 and 109265. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.
109264. No. T-316. October 3, 1934. From Samsun. A melon with mottled green and yellow skin and white flesh of a delicious flavor.
109265. No. T-386. October 11, 1934. From the Nallihan bazar.
109266. CORONILLA VARIA L. Fabaceae. Crown vetch.
No. T-301. October 5, 1934. From a moist rocky mountain slope, about 25 miles south of Kastamonu.

For previous introduction see 106521.

109214 to 109406—Continued.

109267. COTONEASTER sp. Malaceae.
No. T-243. October 3, 1934. From a dry rocky slope about 3 miles north of Iskilip.
109268. CRATAEGUS sp. Malaceae.
No. T-206. October 2, 1934. About 85 miles west of Samsun on a dry hillside.
109269. CRATAEGUS sp. Malaceae.
No. T-238. October 3, 1934. From Samsun. Fruit the size of a crab apple.
- 109270 to 109275. CUCUMIS spp. Cucurbitaceae.
109270 to 109272. CUCUMIS MELO L. Muskmelon.
109270. No. T-390. October 12, 1934. From Ankara. A melon with dark green rind and delicious white flesh.
109271. No. T-254. October 4, 1934. From Chorum. A round melon with green netted-type rind and white flesh which is only fair.
109272. No. T-230. October 3, 1934. From Chorum. A green-netted type.
- 109273 to 109275. CUCUMIS SATIVUS L. Cucumber.
109273. No. T-260. October 4, 1934. From Tosya.
109274. No. T-385. October 11, 1934. From the Nallihan bazar.
109275. No. T-277. October 4, 1934. From the Kastamonu bazar.
- 109276 to 109278. CUCURBITA spp. Cucurbitaceae.
109276 and 109277. CUCURBITA MAXIMA Duchesne. Squash.
October 4, 1934. From the Kastamonu bazar.
109276. No. T-286. 109277. No. T-282.
109278. CUCURBITA PEPO L. Pumpkin.
No. T-388. October 11, 1934. From the Nallihan bazar.
109279. DACTYLIS GLOMERATA L. Poaceae. Orchard grass.
No. T-375. October 10, 1934. From a dry clay hillside, 20 miles southwest of Bolu.
109280. DAUCUS CAROTA L. Apiaceae. Carrot.
No. T-273. October 10, 1934. From the Kastamonu bazar.
- 109281 to 109283. DIANTHUS spp. Silenaceae.
109281. DIANTHUS sp.
No. T-241. October 3, 1934. A rock pink collected about 3 miles north of Iskilip.
109282. DIANTHUS sp.
No. T-395. October 15, 1934. From a dry hillside at the Dry Land Experiment Station near Eskisbehir.
109283. DIANTHUS sp.
No. T-373. October 10, 1934. From rocks about 15 miles southwest of Bolu.

109214 to 109406—Continued.

109234. *DIGITALIS* sp. Scrophulariaceae.

No. T-325. October 8, 1934. Collected 50 miles north of Kizilja Hammam.

109235. *EREMURUS* sp. Liliaceae.

No. T-392. October 15, 1934. From the Dry Land Experiment Station near Eskishehir.

109236. *ERIANTHUS HOSTII* Griseb. Poaceae.

No. T-205. October 2, 1934. About 7 miles west of Samsun, in gullies and steep hillsides in rocky clay loam. A perennial reedlike grass with dense woolly panicles. Native to southern Europe and Asia Minor.

109237. *EUONYMUS* sp. Celastraceae.

No. T-347. October 9, 1934. A shrub growing beside a stream, about 15 miles north of Duzce.

109238. *EUONYMUS* sp. Celastraceae.

No. T-315. October 5, 1934. A tree with rose-colored berries found 20 miles south of Kastamonu.

109239. *FAGOPYRUM ESCULENTUM* Moench. Polygonaceae. Common buckwheat.

No. T-294. October 4, 1934. From the Agricultural Museum at Kastamonu.

109290 to 109292. *FESTUCA* spp. Poaceae.

109290. *FESTUCA* sp.

No. T-258. October 4, 1934. About 15 miles north of Tosya in the high mountains.

109291. *FESTUCA* sp.

No. T-336. October 9, 1934. A grass 3 feet tall found on the rocky slope of a stream bank about 15 miles west of Duzce.

109292. *FESTUCA* sp.

No. T-262. October 4, 1934. About 15 miles north of Tosya.

109293. *GENTIANA* sp. Gentianaceae.

No. T-302. October 5, 1934. About 25 miles south of Kastamonu.

109294. *HEDYSARUM* sp. Fabaceae.

No. T-87. October 26, 1934. Found in dry limestone at Sivas.

109295. *HIPPOPHAE RHAMNOIDES* L. Elaeagnaceae. Common sea-buckthorn.

No. T-203. October 2, 1934. About 50 miles south of Samsun. A rather thorny tree with leaves like the Russian-olive and great masses of fragrant orange-colored berries.

For previous introduction and description see 108063.

109296. *ILEX* sp. Aquifoliaceae.

No. T-337. October 9, 1934. About 9 miles west of Bolu.

109297. *IRIS HISTRIOIDES* Foster. Iridaceae.

No. T-216. October 4, 1934. About 70 miles south of Samsun.

109298 and 109299. *KOELERIA CRISTATA* (L.) Pers. Poaceae.

109214 to 109406—Continued.

109298. No. T-204. October 2, 1934. From a dry hillside about 2 miles south of Chorum.

109299. No. T-324. October 8, 1934. About 53 miles north of Kizilja Hammam.

109300 to 109304. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.

109300 to 109302. Collected October 4, 1934, in the Kastamonu bazar.

109300. No. T-270. Ordinary variety.

109301. No. T-291. Curly variety.

109302. No. T-290. Black variety.

109303. No. T-266. October 4, 1934. From Tosya.

109304. No. T-379. October 11, 1934. From Nallihan.

109305. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. T-281. October 4, 1934. From the Kastamonu bazar.

109306. *LEPTOCHLOA* sp. Poaceae. Grass.

No. T-221. October 2, 1934. Collected 75 miles south of Samsun on a dry rocky hillside.

109307. *LINUM USITATISSIMUM* L. Linaceae. Flax.

No. T-272. October 4, 1934. From the Kastamonu bazar.

109308. *LOLIUM PERENNE* L. Poaceae. Perennial ryegrass.

No. T-332. October 9, 1934. About 12 miles west of Bolu along a roadside. A large percentage of the sod of this section consists of this grass.

109309. *LOLIUM RIGIDUM* Gaud. Poaceae. Grass.

No. T-396. October 15, 1934. From the Dry Land Experiment Station near Eskishehir. A native grass used for lawns at Ankara.

109310 to 109314. *LOTUS* spp. Fabaceae.

109310. *LOTUS* sp.

No. T-342. October 9, 1934. About 12 miles west of Duzce.

109311. *LOTUS* sp.

No. T-321. October 8, 1934. About 75 miles northwest of Ankara near Kizilja Hammam.

109312. *LOTUS* sp.

No. T-209. October 2, 1934. About 15 miles south of Samsun.

109313. *LOTUS* sp.

No. T-311. October 5, 1934. From a moist rocky mountain slope 24 miles south of Kastamonu.

109314. *LOTUS* sp.

No. T-371-A. October 10, 1934. Collected in a river bottom 13 miles east of Adapazari.

109315 and 109316. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

109315. No. T-356. October 10, 1934. From the Adapazari bazar.

109316. No. T-280. October 4, 1934. From the Kastamonu bazar.

109214 to 109406—Continued.

109317. *MALUS* sp. Malaceae.
No. T-308. October 5, 1934. Wild apple trees found 12 miles south of Kastamonu.
- 109318 to 109321. *MEDICAGO* spp. Fabaceae.
109318. *MEDICAGO FALCATA* × *SATIVA*.
No. T-210. October 2, 1934. About 69 miles south of Samsun.
109319. *MEDICAGO LUPULINA* L.
Black medick.
No. T-331. October 9, 1934. From a steep bank by a roadside 6 miles west of Bolu.
109320 and 109321. *MEDICAGO SATIVA* L.
Alfalfa.
109320. No. T-299. October 4, 1934. From Tosya.
109321. No. T-397. October 15, 1934. From the Dry Land Experiment Station near Eslishehir.
109322. *MELICA CILIATA* L. Poaceae.
No. T-244. October 3, 1934. From a rocky clay hillside, 6 miles west of Chorum.
- 109323 to 109326. *MELILOTUS* spp. Fabaceae.
Sweetclover.
109323 and 109324. *MELILOTUS ALBA* Desr.
White sweetclover.
109323. No. T-225. October 2, 1934. Sixty-nine miles south of Samsun.
109324. No. T-371. October 10, 1934. From the heavy soil of flat bottom land 18 miles southeast of Adapazari.
109325. *MELILOTUS OFFICINALIS* (L.) Lam.
No. T-329. October 9, 1934. From a steep bank on a roadside, 6 miles west of Bolu.
109326. *MELILOTUS* sp.
No. T-305. October 5, 1934. From the mountains, 24 miles south of Kastamonu.
109327. *ONOBRYCHIS VULGARIS* Hill. Fabaceae.
No. T-394. October 15, 1934. From the Dry Land Experiment Station near Eslishehir where it grows profusely under irrigation; becomes 30 inches high and is cut three times in a season.
- 109328 to 109330. *ORYZA SATIVA* L. Poaceae.
Rice.
109328. No. T-327. October 8, 1934. From near Kizilja Hammam, 54 miles northwest of Ankara.
109329. No. T-378. October 11, 1934. From Nallihan.
109330. No. T-298. October 4, 1934. From Tosya.
- 109331 and 109332. *ORYZOPSIS PUBIFLORA* Hack. Poaceae.
Grass.
A densely tufted perennial grass with narrow linear leaves, the blades being about 4 inches long. Native to mountainous places in southern Iran.
109331. No. T-245. October 3, 1934. From 10 miles west of Chorum.

109214 to 109406—Continued.

109332. No. T-213. October 2, 1934. From 70 miles south of Samsun.
109333. *PALURUS SPINA-CHRISTI* Mill. Rhamnaceae.
Christ-thorn.
No. T-200. October 1, 1934. A spiny shrub found on flats near Charashamba.
For previous introduction see 46425.
109334. *PAPAVER* sp. Papaveraceae.
No. T-102. September 26, 1934. Collected 35 miles east of Sivas.
- 109335 to 109337. *PETROSELINUM HORTENSE* Hoffm. Apiaceae.
Farsley.
109335. No. T-292. October 4, 1934. From the Kastamonu bazar.
109336. No. T-381. October 11, 1934. From the Nallihan bazar.
109337. No. T-360. October 10, 1934. From the Adapazari bazar.
- 109338 to 109344. *PHASEOLUS* spp. Fabaceae.
Bean.
109338 and 109339. *PHASEOLUS COCCINEUS* L. Scarlet Runner bean.
109338. No. T-296. October 4, 1934. From the Agricultural Museum at Kastamonu.
109339. No. T-279. October 4, 1934. From the Kastamonu bazar.
109340 to 109344. *PHASEOLUS VULGARIS* L. Common bean.
109340. No. T-295. October 4, 1934. From the Agricultural Museum at Kastamonu. A bean eaten while green.
109341 to 109343. October 10, 1934. From the Adapazari bazar.
109341. No. T-367. *Cali fasulyiye*.
109342. No. T-365. *Barbonrye fasulyiye*.
109343. No. T-364. *Haray fasulyiye*.
109344. No. T-373-A. October 10, 1934. A red kidney bean collected about 12 miles east of Adapazari.
109345. *PHLEUM ARENARIUM* L. Poaceae.
Timothy.
No. T-252. October 3, 1934. Collected about 9 miles west of Chorum.
109346. *PHLEUM PHLEOIDES* (L.) Karst. Poaceae.
No. T-214. October 2, 1934. About 6 miles south of Samsun.
109347. *PHYSALIS ALKEKengi* L. Solanaceae.
Strawberry ground-cherry.
No. T-339. October 9, 1934. Collected near Duzce.
For previous introduction see 65536.
109348. *PISUM SATIVUM* L. Fabaceae. Pea.
No. T-370. October 10, 1934. *Bezeliye*. From the Adapazari bazar.
- 109349 to 109351. *POA* spp. Poaceae.
Bluegrass.
109349. *POA BULBOSA* L.
No. T-249. October 3, 1934. From a dry rocky clay hillside about 6 miles west of Chorum.

109214 to 109406—Continued.

109350. *POA COMPRESSA* L.
No. T-246. October 3, 1934. From a dry clay hillside about 6 miles west of Chorum.
109351. *POA* sp.
No. T-219. October 2, 1934. Collected 12 miles south of Samsun.
109352. *PYRACANTHA* sp. Malaceae.
No. T-208. October 2, 1934. A shrub collected 6 miles south of Samsun.
- 109353 to 109359. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.
109353 and 109354. October 4, 1934. From the Kastamonu bazar.
109353. No. T-284. A red variety.
109354. No. T-269. A black variety.
109355. No. T-351. *Salgom*. October 10, 1934. From the Adapazari bazar.
109356. No. T-293. October 4, 1934. From the Kastamonu bazar. A white variety.
109357. No. T-369. *Kirmizi turup*. October 10, 1934. From the Adapazari bazar. A red variety.
109358. No. T-274. October 4, 1934. From the Kastamonu bazar. A long red variety.
109359. No. T-357. October 10, 1934. *Trup*. From the Adapazari bazar.
- 109360 and 109361. *RHAPHIS GRYPHUS* (L.) Desv. Poaceae. Grass.
109360. No. T-234. October 3, 1934. Collected 9 miles west of Chorum.
109361. No. T-218. October 2, 1934. From a dry rocky wash on a hillside 78 miles south of Samsun. This grass forms a good sod.
109362. *RHODOENDRON* sp. Ericaceae.
No. T-338. October 9, 1934. Collected 6 miles west of Bolu.
109363. *RHUS CORIARIA* L. Anacardiaceae. Sumac.
No. T-235. October 3, 1934. From a dry rocky hillside 4 miles west of Iskilip.
109364. *ROSA* sp. Rosaceae. Rose.
No. T-389. October 10, 1934. A wild rose collected 9 miles southwest of Bolu.
109365. *RUBUS* sp. Rosaceae.
No. T-228. October 3, 1934. An ever-bearing blackberry from Charshamba.
- 109366 and 109367. *SALVIA* spp. Menthaceae.
Collected October 5, 1934, 15 miles south of Kastamonu.
109366. *SALVIA* sp.
No. T-306.
109367. *SALVIA* sp.
No. T-304.
109368. *SECALE CEREALE* L. Poaceae. Rye.
No. T-317. October 4, 1934. From the Agricultural Museum at Kastamonu.

109214 to 109406—Continued.

- 109369 to 109371. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.
109369. No. T-276. October 4, 1934. From the Kastamonu bazar.
109370. No. T-393. October 15, 1934. From Eskishehir. An eggplant 15 inches long and over an inch in diameter.
109371. No. T-362. October 10, 1934. *Patlican kemey*. From the Adapazari bazar.
- 109372 and 109373. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.
109372. No. T-382. October 11, 1934. From the Nallihan bazar.
109373. No. T-355. October 10, 1934. *Tspanek*. From the Adapazari bazar.
- 109374 to 109377. *STIPA* spp. Poaceae. Feathergrass.
109374 and 109375. *STIPA BROMOIDES* (L.) Beck.
A tufted perennial grass up to 2 feet high. Native to dry mountain regions of southern Europe.
109374. No. T-224. October 2, 1934. From a rocky clay hillside 31 miles west of Samsun.
109375. No. T-220. October 2, 1934. From a dry rocky hillside 72 miles south of Samsun.
109376. *STIPA CAPILLATA* L.
No. T-399. October 15, 1934. From a protected situation on a dry hillside at the Dry Land Experiment Station, Eskishehir.
109377. *STIPA* sp.
No. T-261. October 11, 1934. From a rocky mountain slope south of Tosya.
- 109378 to 109391. *TRIFOLIUM* spp. Fabaceae. Clover.
109378 to 109381. *TRIFOLIUM PRATENSE* L. Red clover.
109378. No. T-212. October 2, 1934. From a steep hillside 12 miles west of Samsun.
109379. No. T-309. October 5, 1934. From the mountains 25 miles south of Kastamonu.
109380. No. T-335. October 9, 1934. Collected 10 miles west of Duzce.
109381. No. T-340. October 9, 1934. Collected along the bank of a stream 6 miles west of Bolu.
- 109382 to 109386. *TRIFOLIUM REPENS* L. White clover.
109382. No. T-248. October 3, 1934. From the top of a mountain northwest of Iskilip.
109383. No. T-264. October 4, 1934. Collected 12 miles north of Tosya.
109384. No. T-300. October 5, 1934. Collected in the mountains 25 miles south of Kastamonu.
109385 and 109386. Collected October 9, 1934, about 11 miles west of Duzce on a mountain slope.
109385. No. T-341.
109386. No. T-343.

109214 to 109406—Continued.

109387. TRIFOLIUM sp.
No. T-256. October 4, 1934. Collected 12 miles north of Tosya.
109388. TRIFOLIUM sp.
No. T-226. October 2, 1934. Collected along an irrigation ditch, 62 miles south of Samsun.
- 109389 to 109391. TRIFOLIUM spp.
A collection of hop clovers with large bright-yellow flowers.
109389. TRIFOLIUM sp.
No. T-313. October 5, 1934. Collected 25 miles south of Kastamonu.
109390. TRIFOLIUM sp.
No. T-267. October 4, 1934. Collected 15 miles north of Tosya.
109391. TRIFOLIUM sp.
No. T-330. October 9, 1934. Found near a stream 12 miles from Bolu.
109392. TRIGONELLA sp. Fabaceae.
No. T-326. October 8, 1934. From dry gravelly soil in a valley 46 miles north of Kizilja Hammam. It does not seem to be eaten by stock to any extent.
- 109393 and 109394. Collected October 5, 1934, in the mountains south of Kastamonu.
109393. VICIA sp. Fabaceae.
No. T-312.
109394. SATHYRUS PRATENSIS L. Fabaceae.
No. T-303.
109395. VICIA sp. Fabaceae.
No. T-217. October 2, 1934. Collected 12 miles south of Samsun.
109396. VIGNA SINENSIS (Torner) Savi. Fabaceae.
No. T-352. October 10, 1934. *Borulse*, black-eyed peas from Adapazari.
109397. VITIS VINIFERA L. Vitaceae.
European grape.
No. T-247. October 3, 1934. From Chorum. A very large blue grape which is almost seedless.
- 109398 to 109400. ZEA MAYS L. Poaceae.
Corn.
- 109398 and 109399. October 10, 1934; two types of corn grown in the vicinity of Adapazari.
109398. No. T-377. White.
109399. No. T-377-A. Yellow.
109400. No. T-275. October 4, 1934. Popcorn from the Kastamonu bazar.
109401. (Undetermined.)
No. T-223. October 2, 1934. Collected about 30 miles west of Samsun.
109402. (Undetermined.)
No. T-334. October 9, 1934. A shrub collected near a stream 6 miles west of Bolu.

109214 to 109406—Continued.

109403. (Undetermined.)
No. T-240. October 3, 1934. A low-growing shrub found on a dry rocky slope 9 miles north of Iskilip. The shrub is grazed by goats.
109404. DIGITALIS sp. Scrophulariaceae.
No. T-237. October 3, 1934. A flowering plant found on rocky slopes about 4 miles north of Iskilip.
109405. (Undetermined.)
No. T-328. October 9, 1934. An unknown legume found on a steep roadside bank 12 miles west of Bolu.
109406. (Undetermined.)
No. T-307. October 5, 1934. A flowering plant found about 15 miles south of Kastamonu.
- 109407 and 109408.
From Java. Seeds presented through A. M. Cramer, Sr., Wonosobo. Received February 25, 1935.
109407. BOEUA GANDARIA Blume. Anacardiaceae.
A large tropical evergreen tree, with glossy oblong leaves, racemes of very small yellow flowers, and egg-shaped fruits about 3 inches long. The small young fruits are pickled in a salt solution and eaten like olives with meat. When ripe, the red fruits are eaten fresh. Native to the East Indies.
For previous introduction see 31865.
109408. LANSIUM DOMESTICUM Jack. Meliaceae. Langsat.
Doekoe. A Malayan tree up to 40 feet high, with pinnate leaves composed of five to seven elliptic leaflets each 4 to 8 inches long. The fruits, borne in dense pendulous clusters, vary from oval to round and from 1 to 2 inches in diameter, velvety and straw colored, with a thick leathery skin enclosing juicy aromatic flesh, and one to three large seeds. The seeds are extremely bitter. The best fruits are found in the village of Menteng, near Batavia.
For previous introduction see 80998.
109409. FRAXINUS HOLOTRICHA Koehne. Oleaceae. Ash.
From Rumania. Seeds collected by Dr. Edgar Anderson, Arnold Arboretum Balkan expedition. Received February 20, 1935.
A small tree with leaves about 8 inches long composed of 9 to 13 leaflets. Collected in the hybrid Fraxinus "Forest" on the Danube delta, a region of very low rainfall and very cold winters.
109410. PASSIFLORA LIGULARIS Juss. Passifloraceae. Sweet granadilla.
From South America. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry, at Baños, Tunguragua Province, Ecuador. Received February 25, 1935.
Introduced for Department specialists.
For previous introduction and description see 108829.

109411 to 109419.

From Burma. Seeds presented by D. Rhind, Economic Botanist, Mandalay. Received February 25, 1935.

A collection of locally grown varieties, introduced for Department specialists.

109411 to 109414. *APIUM GRAVEOLENS* L. Apiaceae. **Celery.**

109411. *Golden Self-Blanching.*

109412. *Rose Standard.*

109413. *White Plume.*

109414. *White Solid.*

109415 to 109419. *DAUCUS CAROTA* L. Apiaceae. **Carrot.**

109415. *Champion.*

109416. *Earliest Short Horn.*

109417. *Early Gem.*

109418. *Exhibition.*

109419. *Nantes.*

109420 to 109422.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanic Garden, Samara. Received February 25, 1935.

109420. *ATRIPLEX NITENS* Schkuhr. Chenopodiaceae.

A large erect-stemmed annual about 6 feet high, growing in cultivated places.

109421. *ATRIPLEX TATARICA* L. Chenopodiaceae.

A bushy annual up to 3 feet tall. Native to coastal deserts in Asia Minor.

109422. *SALSOLA MUTICA* C. A. Mey. Chenopodiaceae.

A desert annual, upright or rarely ascending, about 2 feet high. The gray-green linear leaves are about one-sixth of an inch long. Native to southeastern Europe.

109423 to 109435. *MEDICAGO SATIVA* L. Fabaceae. **Alfalfa.**

From the Union of Soviet Socialist Republics. Seeds presented by A. T. Belov, Central Plant Breeding Station, Tashkent, Turkistan, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received January 30, 1935.

109423 to 109426. Each sample of seed was collected from a single plant of wild alfalfa.

109423. No. 1199. From Khorog, the Pamirs.

109424. No. 1200. From Porshnev near Khorog, the Pamirs.

109425. No. 1201. From Porshnev near Khorog, the Pamirs.

109426. No. 1202. From near Khorog, the Pamirs.

109427. No. 1203. Wild alfalfa from near Khorog, the Pamirs.

109428. No. 1204. Wild alfalfa collected near the plant breeding station at Tashkent.

109429. No. 1205. From Chartim in the Ghund Valley, the Pamirs.

109423 to 109435—Continued.

109430. No. 1206. From the Ghund Valley, the Pamirs.

109431. No. 1207. Wild alfalfa from the Kishlan, Upper Khorog, Ghund Valley, the Pamirs.

109432. No. 1208. Wild alfalfa from the Ghund Valley, the Pamirs.

109433. No. 1209. From Kishlan Jaben in the Sarch-Dara Valley, the Pamirs.

109434 and 109435. From Khorog, the Pamirs.

109434. No. 1210. **109435.** No. 1211.

109436. *PHASEOLUS VULGARIS* L. Fabaceae. **Common bean.**

From Maine. Seeds presented by H. S. Howard, Waterville, through the Bureau of Entomology and Plant Quarantine. Received March 4, 1935.

Wild Goose beans.

109437 to 109447.

From the Union of Soviet Socialist Republics. Seeds presented by the Repetek Sand Desert Station, Turkmenistan, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received February 2, 1935.

Introduced for Department specialists.

109437. *AGROPYRON ORIENTALE* (L.) Roem. and Schult. Poaceae. No. 1218.

For previous introduction and description see 108846.

109438. *AGROPYRON SQUARROSUM* Roth. Poaceae.

No. 1213.

109439. *AMMODENDRON CONOLLYI* Bunge. Fabaceae.

No. 1212.

For previous introduction and description see 108852.

109440. *ARISTIDA PENNATA* MINOR Litv. Poaceae.

No. 1221.

For previous introduction and description see 108865.

109441. *ATRIPLEX DIMORPHOSTEGIA* Kar. and Kir. Chenopodiaceae.

No. 1222.

For previous introduction and description see 108879.

109442. *BROMUS TECTORUM* L. Poaceae. No. 1215.

For previous introduction and description see 108885.

109443. *CUTANIDA MEMPHITICA* (Spreng.) Richter. Poaceae.

No. 1214.

For previous introduction and description see 108906.

109444. *ISATIS VIOLASCENS* Bunge. Brassicaceae.

No. 1220.

For previous introduction and description see 108928.

109437 to 109447—Continued.

109445. *KOCHIA STELLARIS* Moq. Chenopodiaceae.
 No. 1217. An erect annual plant, native to the Karakum Desert, Turkistan; up to a foot high, much branched, with flat linear leaves and very small greenish flowers. In general appearance it resembles *Kochia scoparia*.
 For previous introduction see 98216.
109446. *MALCOMIA CIRCINNATA* Boiss. Brassicaceae.
 No. 1216.
 For previous introduction and description see 108933.
109447. *SENECIO SUBDENTATUS* Ledeb. Asteraceae.
 No. 1219.
 For previous introduction and description see 108958.

109448. *PRUNUS ARMENIACA* L. Amygdalaceae. **Apricot.**

From Syria. Trees presented by Joseph Dabbous, Bab Rouma, Damascus, through the American consulate general at Beirut. Received March 7, 1935.
Hamway.
 Introduced for Department specialists.

109449. *AMYGDALUS PERSICA* L. Amygdalaceae. **Peach.**

From Java. Seeds presented by A. M. Cramer, Sr., Wonosobo. Received February 25, 1935.
Tosari peach. A naturalized peach from Tosari.
 Introduced for Department specialists.

109450 to 109605.

From Turkey and Rumania. Seeds collected by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received January 17, 1935.
 The numbers preceded by a capital T were collected in Turkey and those preceded by a capital R from Rumania.

Introduced for Department specialists.

109450 to 109452. *AGROPYRON* spp. Poaceae. **Wheatgrass.**

109450. *AGROPYRON CRISTATUM* (L.) Gaertn. **Crested wheatgrass.**

No. T-554. October 24, 1934. Collected 12 miles east of Kirshehir.

109451. *AGROPYRON* sp.

No. T-489. October 24, 1934. Collected 50 miles northeast of Izmir on rolling land, in heavy soil.

109452. *AGROPYRON INTERMEDIUM* (Host) Beauv.

No. T-508. October 26, 1934. A large bunch grass collected 31 miles southeast of Bandirma along the road to Bursa, on low flat land.

109453. *BACHYPODIUM PINNATUM* (L.) Beauv. Poaceae. **Grass.**

No. T-464. October 23, 1934. Collected 25 miles east of Izmir on the road to Kasaba.

109450 to 109605—Continued.

109454 to 109456. *AGROSTIS* spp. Poaceae.

109454. *AGROSTIS ALBA* L.

No. R-561. September 9, 1934. Collected at Constanza in a depression along the sandy beach.

109455. *AGROSTIS* sp.

No. R-564. September 10, 1934. Found in pure sand at Mamaia, near Constanza.

109456. *AGROSTIS SCABRIGLUMIS* Boiss. and Reut.

No. T-463. October 23, 1934. Collected 25 miles east of Izmir near a gully on the road to Kasaba.

109457. *ALLIUM CEPA* L. Liliaceae. **Onion.**

No. T-522. October 30, 1934. From the Ankara bazar.

109458. *ALTHAEA* sp. Malvaceae.

No. T-497. October 24, 1934. From Bergama.

109459 and 109460. *ANDROPOGON ISCHAEMUM* L. Poaceae.

For previous introduction see 109033.

109459. No. T-415. October 17, 1934. Collected about 22 miles northeast of Adana.

109460. No. T-411. October 17, 1934. From a dry flat plain 12 miles east of Adana.

109461. *ASTRAGALUS* sp. Fabaceae.

No. T-439. October 18, 1934. A perennial shrub collected 44 miles northwest of Adana.

109462 to 109465. *BACHYPODIUM* spp. Poaceae. **Grass.**

109462. *BACHYPODIUM RAMOSUM* (L.) Roem. and Schult.

No. T-501. October 26, 1934. Collected about 25 miles southeast of Bandirma. A blue-green, perennial, creeping grass, much branched at the base, found in the warmer portions of the Mediterranean countries, especially on chalky soil and in dry rocky places.
 For previous introduction see 88904.

109463. *BACHYPODIUM* sp.

No. T-422. October 17, 1934. Collected 22 miles northeast of Adana.

109464. *BACHYPODIUM* sp.

No. T-445. October 18, 1934. From a rocky slope in the foothills 25 miles west of Adana.

109465. *BACHYPODIUM* sp.

No. T-512. October 26, 1934. A bunch grass collected about 16 miles southeast of Bandirma.

109466 and 109467. October 30, 1934; from the Ankara bazar.

109466. *BRASSICA ALBA* (L.) Boiss. Brassicaceae. **White mustard.**

No. T-525.

109467. *BRASSICA* sp.

No. T-528.

109450 to 109605—Continued.

- 109468 to 109471. *CAPSIUM ANNUUM* L. Solanaceae. Common redpepper.
109468. No. T-527. From the Ankara bazar, October 30, 1934.
- 109469 and 109470. Collected October 21, 1934, at the Konya bazar.
109469. No. T-474.
109470. No. T-476. A hot pepper.
109471. No. T-407. Collected October 16, 1934, at the Adana bazar.
109472. *CELTIS* sp. Ulmaceae.
No. T-555. October 18, 1934. A shrub collected northwest of Adana.
109473. *CERCIS SILIQUASTRUM* L. Caesalpiniaceae. Judas-tree.
No. T-452. October 18, 1934. Collected 44 miles northwest of Adana.
For previous introduction see 26684.
109474. *CISTUS LADANIFERUS* L. Cistaceae. Gum rockrose.
No. T-470. October 23, 1934. Collected 12 miles east of Izmir on the road to Kasaba. A handsome bushy evergreen from 4 to 8 feet in height, with large deep-green leaves, silvery white below, and numerous large showy white flowers. Native to the Mediterranean countries.
For previous introduction see 48666.
109475. *CLEMATIS* sp. Ranunculaceae.
No. T-437. October 18, 1934. Collected about 47 miles northwest of Adana.
- 109476 and 109477. *CORNUS MAS* L. Cornaceae. Cornelian-cherry.
Collected October 3, 1934. *Kiziljick* (plumlike).
109476. No. T-229. Collected about 31 miles south of Samsun.
109477. No. T-236. Collected about 16 miles north of Iskilip.
- 109478 to 109485. *CUCUMIS* spp. Cucurbitaceae.
- 109478 and 109479. *CUCUMIS MELO* L. Muskmelon.
109478. No. T-556. October 26, 1934. A green and yellow melon from Balikesir.
109479. No. T-526. October 30, 1934. From the Ankara bazar.
- 109480 to 109485. *CUCUMIS SATIVUS* L. Cucumber.
- 109480 and 109481. Collected October 20, 1934, at the Ankara bazar.
109480. No. T-531. A long green cucumber.
109481. No. T-530.
109482. No. T-400. From the Adana bazar. A large cucumber grown under irrigation.
109483. No. T-475. October 21, 1934. From the Konya bazar.
109484. No. T-403. October 16, 1934. From the Adana bazar. A cucumber grown on dry land.
109485. No. T-408. October 16, 1934. From the Adana bazar. A cucumber adapted to either dry or irrigated

109450 to 109605—Continued.

- land; irrigation improves development.
109486. *CUCURBITA PEPO* L. Pumpkin.
No. T-524. October 30, 1934. From the Ankara bazar.
- 109487 and 109488. *CYNODON DACTYLON* (L.) Pers. Poaceae. Bermuda grass.
109487. No. T-412. October 17, 1934. Collected from a cultivated field on dry land, 22 miles northeast of Adana.
109488. No. T-482. October 21, 1934. Collected in a dry ravine about 3 miles west of Konya.
- 109489 to 109492. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.
109489. No. T-447. October 18, 1934. From a rocky mountain slope about 38 miles northwest of Adana.
109490. No. T-461. October 23, 1934. Collected on a mountain slope 12 miles east of Izmir.
109491. No. T-491. October 24, 1934. From Bergama, found among the old ruins.
109492. No. T-484. October 21, 1934. From a dry ravine, about 3 miles west of Konya.
- 109493 and 109494. *DIANTHUS* spp. Silenaceae.
109493. No. T-494. October 24, 1934. From Bergama.
109494. No. T-510. October 26, 1934. About 16 miles southeast of Bandirma.
109495. *ERIANTHUS HOSTII* Griseb. Poaceae. Grass.
No. T-468. October 23, 1934. Collected near a gully about 22 miles east of Izmir on the road to Kasaba.
For previous introduction and description see 109286.
109496. *ERIANTHUS RAVENNAE* (L.) Beauv. Poaceae. Ravenna grass.
No. T-416. October 17, 1934. Found near a spring about 16 miles east of Adana.
For previous introduction see 78779.
109497. *FESTUCA OVINA* L. Poaceae. Sheep fescue.
No. T-486. October 21, 1934. From dry rocky mountains about 3 miles south of Konya.
109498. *FESTUCA* sp. Poaceae.
No. T-346. October 9, 1934. Collected in deep shade near Bolu.
109499. *GENISTA* sp. Fabaceae.
No. T-432. October 18, 1934. A shrub, collected 38 miles west of Adana.
109500. *GENISTA* sp. Fabaceae.
No. T-467. October 23, 1934. A shrub or small tree, collected about 18 miles east of Izmir.
109501. *HAYNALDIA HORDEACEA* (Coss. and Dur.) Hack. Poaceae. Grass.
No. T-462. October 23, 1934. From the roadside 5 miles east of Izmir on the

109450 to 109605—Continued.

road to Kasaba. A tufted perennial grass with rigid leaves. Native to the mountains of Algeria.

109502 and 109503. HORDEUM BULBOSUM L. Grass. Poaceae.

109502. No. T-515. October 26, 1934. Collected about 9 miles southeast of Bandirma, en route to Bursa.

109503. No. T-417. October 14, 1934. Collected 12 miles northeast of Adana.

109504. ONONIS sp. Fabaceae.

No. R-566. September 10, 1934. A spiny perennial growing on the sands at Mamaia near Constanza.

109505. IRIS sp. Iridaceae.

No. T-490. October 24, 1934. Collected 50 miles northeast of Izmir.

109506. IRIS sp. Iridaceae.

No. T-514. October 26, 1934. Collected about 31 miles southeast of Bandirma.

109507. JUNIPERUS OXYCEDRUS L. Pinaceae. Prickly juniper.

No. T-440. October 18, 1934. Collected 38 miles west of Adana.

109508. LACTUCA SATIVA L. Cichoriaceae. Garden lettuce.

No. T-477. October 21, 1934. From the Konya bazar.

109509 and 109510. LINUM USITATISSIMUM L. Linaceae. Flax.

109509. No. T-479. October 21, 1934. From the Konya bazar.

109510. No. T-523. October 30, 1934. From the Ankara bazar.

109511. LOLIUM REMOTUM Schrank. Grass. Poaceae.

No. T-505. October 26, 1934. Collected 18 miles southeast of Bandirma.

109512 to 109514. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

109512. No. T-529. October 30, 1934. From the Ankara bazar.

109513. No. T-409. October 16, 1934. Large tomatoes from the Adana bazar.

109514. No. T-473. October 21, 1934. From the Konya bazar.

109515 and 109516. MANISURIUS DIGITATA (Sidth. and Smith) Kuntze. Poaceae. Grass.

A perennial grass native to Asia Minor, with stems over 4 feet high.

109515. No. T-426. October 17, 1934. From the railroad embankment 12 miles east of Adana.

109516. No. T-513. October 26, 1934. From a low area 28 miles southeast of Bandirma.

109517 to 109522. MEDICAGO spp. Fabaceae.

109517. MEDICAGO FALCATA L. Yellow-flowered alfalfa.

No. R-567. September 10, 1934. Found in great abundance on pure sands at Mamaia, near Constanza.

109450 to 109605—Continued.

109518 and 109519. MEDICAGO SATIVA L. Alfalfa.

109518. No. T-472. October 21, 1934. From the Konya bazar.

109519. No. T-550. October 30, 1934. From the Ankara bazar.

109520. MEDICAGO sp.

No. T-500. October 24, 1934. *Bur clover*. Collected 3 miles southeast of Bergama.

109521. MEDICAGO sp.

No. T-498. October 21, 1934. *Bur clover*. Found growing on rather low ground near Bergama.

109522. MEDICAGO sp.

No. T-471. October 23, 1934. *Bur clover*. Gathered from a thick stand on the mountain side 18 miles east of Izmir on the road to Kasaba.

109523 to 109526. MELILOTUS spp. Fabaceae. Sweetclover.

109523. MELILOTUS ALBA Desr. White sweetclover.

No. R-562. September 9, 1934. From the sand along the beach at Constanza. A variety with large seeds.

109524. MELILOTUS INDICA (L.) All.

No. R-565. September 10, 1934. Collected at Constanza on moist sandy land near the Black Sea.

For previous introduction see 107562.

109525. MELILOTUS sp.

No. T-507. October 26, 1934. Collected about 15 miles southeast of Bandirma.

109526. MELILOTUS sp.

No. T-469. October 23, 1934. Collected 18 miles east of Izmir.

109527 to 109529. Collected October 18, 1934, about 30 miles northwest of Adana.

109527 and 109528. MYRTUS COMMUNIS L. Myrtaceae. True myrtle.

109527. No. T-448. *Leucocarpa*. A form with white berries.

109528. No. T-441. *Melanocarpa*. A form with black berries.

109529. NERIUUM OLEANDER L. Apocynaceae. Oleander.

No. T-443. A shrub with pink flowers.

109530. OLEA EUROPAEA L. Oleaceae. Olive.

No. T-418. October 17, 1934. A wild olive from a rocky mountain slope about 12 miles east of Adana.

109531 to 109536. ORYZOPSIS spp. Poaceae. Grass.

109531 to 109533. ORYZOPSIS COERULESCENS (Desf.) Hack.

For previous introduction see 88917.

109531. No. T-455. October 23, 1934. Collected on a rough hillside about 12 miles east of izmir, en route to Kasaba.

109450 to 109605—Continued.

109532. No. T-436. October 18, 1934. From a dry rocky slope 44 miles northwest of Adana.
109533. No. T-421. October 17, 1934. From bare limestone hills about 15 miles east of Adana.
- 109534 to 109536. *ORYZOPSIS MILIACEA* (L.) Benth. and Hook.
109534. No. T-442. October 18, 1934. Collected 25 miles west of Adana on rocky slopes in scrub oak clumps.
109535. No. T-456. October 23, 1934. From a mountain side east of Izmir on the road to Kasaba.
109536. No. T-438. October 18, 1934. From rocky slopes in the foothills about 30 miles northwest of Adana.
109537. *PASSIFLORA* sp. Passifloraceae. No. T-483. October 21, 1934. From a garden at Konya.
109538. *PENNISETUM ORIENTALE* L. Rich. Poaceae. Grass. No. T-487. October 21, 1934. From a very dry ravine, about 3 miles west of Konya. For previous introduction see 108943.
- 109539 and 109540. *PHALARIS MINOR* Retz. Poaceae. Grass. An erect or ascending annual grass with linear leaves from 2 to 6 inches long, and tufted culms up to 3 feet high. Native to the Mediterranean countries. For previous introduction see 49158.
109539. No. T-506. October 26, 1934. Collected about 15 miles from Bandirma.
109540. No. T-492. October 24, 1934. From heavy soil on rolling land, 50 miles northeast of Izmir.
- 109541 to 109545. *PHASEOLUS* spp. Fabaceae. Bean. Collected October 21, 1934, at the Konya bazar.
109541. *PHASEOLUS COCCINEUS* L. Scarlet Runner bean. No. T-478-A.
- 109542 to 109545. *PHASEOLUS VULGARIS* L. Common bean.
- 109542 to 109544. Collected October 21, 1934, at the Konya bazar.
109542. No. T-478.
109543. No. T-478-B.
109544. No. T-478-C.
109545. No. T-532. October 30, 1934. From the Ankara bazar.
109546. *PHLEUM PHLEOIDES* (L.) Karst. Poaceae. Timothy. No. T-435. October 18, 1934. From the rocky foothills about 40 miles northwest of Adana.
109547. *PHLEUM SUBULATUM* (Savi) Aschers. and Graebn. Poaceae. Timothy. No. T-457. October 23, 1934. From the flat plain east of Izmir on the road to Kasaba.

109450 to 109605—Continued.

- 109548 and 109549. *PHRAGMITES COMMUNIS* Trin. Poaceae. For previous introduction see 108372.
109548. No. T-511. October 26, 1934. Collected about 22 miles southeast of Bandirma beside a stream.
109549. No. T-454. October 18, 1934. Collected about 31 miles northwest of Adana.
- 109550 and 109551. *PINUS HALEPENSIS* Mill. Pinaceae. Aleppo pine. For previous introduction see 30815.
109550. No. T-450. October 18, 1934. Collected about 31 miles northwest of Adana.
109551. No. T-552.
109552. *PISTACIA LENTISCUS* L. Anacardiaceae. Lentisk. No. T-496. October 24, 1934. An attractive shrub with dense clusters of bright-red berries which become black. Collected 50 miles northeast of Izmir.
109553. *PISTACIA VERA* L. Anacardiaceae. Pistache. No. T-405. October 16, 1934. Purchased in Adana, but grown on dry places at Gaziantep.
- 109554 and 109555. *PISUM ELATIUS* Bieb. Fabaceae. Collected October 23, 1934, 18 miles east of Izmir.
109554. No. T-450.
109555. No. T-459-A.
- 109556 to 109560. *POA* spp. Poaceae. Bluegrass.
- 109556 to 109558. *POA BULBOSA* L.
109556. No. T-460. October 23, 1934. Collected about 18 miles east of Izmir on the road to Kasaba.
109557. No. T-431. October 18, 1934. Collected in a moist gully in the foothills 44 miles northwest of Adana.
109558. No. T-488. October 21, 1934. From dry slopes about 3 miles west of Konya.
109559. *POA* sp. No. T-458. October 23, 1934. From dry rocky soil about 15 miles east of Izmir.
109560. *POA* sp. No. T-253. October 4, 1934. Collected about 12 miles north of Tosya.
109561. *PYRUS* sp. Malaceae. No. T-502. October 26, 1934. A wild pear collected about 12 miles southeast of Bandirma.
- 109562 to 109567. *RAPHANUS SATIVUS* L. Brassicaceae. Radish. 109562. No. T-519. October 30, 1934. A red radish from the Ankara bazar.
- 109563 and 109564. Collected October 16, 1934, at the Adana bazar.
109563. No. T-406. A long red radish.

109450 to 109605—Continued.

109564. No. T-402. A globular radish.
109565. No. T-480. October 21, 1934. A red radish from the Konya bazar.
109566. No. T-521. October 30, 1934. A black radish from the Ankara bazar.
109567. No. T-401. October 16, 1934. A white radish from the Adana bazar.
- 109568 to 109570. RHUS spp. Anacardiaceae.
109568. RHUS sp.
No. T-499. October 24, 1934. Collected in the old ruins at Bergana.
109569. RHUS sp.
No. T-504. October 25, 1934. Collected between Izmir and Bandirma, near Harta.
109570. RHUS sp.
No. T-551. October 30, 1934. Collected about 3 miles south of Ankara.
109571. SOLANUM MELONGENA L. Solanaceae. Eggplant.
No. T-404. October 16, 1934. From the Ankara bazar.
109572. SORGHUM sp. Poaceae.
No. T-449. October 18, 1934. A large grass, 5 feet tall, collected in heavy soil in flat country about 23 miles west of Adana.
- 109573 and 109574. SPARTIUM JUNCEUM L. Fabaceae. Weavers-broom.
Collected October 18, 1934, 44 miles northwest of Adana.
109573. No. T-429. 109574. No. T-430.
- 109575 to 109577. STIPA spp. Poaceae. Grass.
109575. STIPA BROMOIDES (L.) Beck.
No. T-414. October 17, 1934. Collected in dwarf oak clumps on a flat dry plain, about 12 miles east of Adana.
109576. STIPA sp.
No. T-485. October 21, 1934. Collected on dry stony mountains about 3 miles south of Konya.
109577. STIPA sp.
Seeds mixed with other seed.
109578. STRAX OFFICINALIS L. Styracaceae. Snowbell.
No. T-433. October 18, 1934. Collected about 31 miles northwest of Adana. A shrub or small tree with broadly oval leaves over 2 inches long and fragrant white flowers three-fourths of an inch long, in small clusters. Native to southern Europe and Asia Minor.
109579. THEMEDA QUADRIVALVIS (L.) Kuntze. Poaceae. Grass.
No. T-424. From a dry rocky mountain slope 15 miles northeast of Adana. A coarse rather tough annual which grows in tufts from 1 to 3 feet high. It is native to India and is closely related to the kangaroo grass of Australia and Tasmania.

For previous introduction see 59362.

109450 to 109605—Continued.

- 109580 to 109582. TRIFOLIUM spp. Fabaceae. Clover.
109580. TRIFOLIUM sp.
No. T-520. October 30, 1934. From the Ankara bazar.
- 109581 and 109582. TRIFOLIUM REPENS L. White clover.
109581. No. R-563. October 10, 1934. From moist sandy soil near the Black Sea at Constanza.
109582. No. T-503. October 26, 1934. Collected 18 miles southeast of Bandirma.
- 109583 to 109600. TRITICUM spp. Poaceae. Wheat.
- 109583 to 109599. TRITICUM AESTIVUM L. Common wheat.
October 30, 1934. From the Seed Improvement Station, Ankara.
109583. No. T-533.
109584. No. T-534.
109585. No. T-535.
109586. No. T-536.
109587. No. T-537.
109588. No. T-538.
109589. No. T-539.
109590. No. T-540.
109591. No. T-541.
109592. No. T-542.
109593. No. T-543.
109594. No. T-544.
109595. No. T-545.
109596. No. T-546.
109597. No. T-547.
109598. No. T-548.
109599. No. T-549.
109600. TRITICUM AESTIVUM \times SECALE CEREALE. Wheat-rye hybrid.
No. R-560. August 1934. From Moscow.
For previous introduction see 94611.
109601. VICIA FABA L. Fabaceae. Broadbean.
No. T-481. October 21, 1934. From the Konya bazar.
109602. VITEX AGNUS-CASTUS L. Verbenaceae. Lilac chaste-tree.
No. T-444. October 18, 1934. A large tree with very aromatic foliage and delicate lavender flowers. Collected 28 miles northwest of Adana.
For previous introduction see 96518.
109603. VITEX sp. Verbenaceae.
No. T-465. October 23, 1934. Collected 18 miles east of Izmir.
109604. (Undetermined.)
No. T-413. October 17, 1934. Collected about 12 miles east of Adana.
109605. (Undetermined.)
No. T-495. October 24, 1934. A shrub with bright-green leaves and clusters of blue berries. Collected 50 miles northeast of Izmir.

109606 to 109792.

Plants growing at the United States Plant Introduction Garden, Glenn Dale, Md.; originally grown by the Office of Crop Physiology and Breeding Investigations (CPB), a section of the Division of Horticultural Crops and Diseases. Numbered in January 1935 for convenience in distribution.

109606. AEGLOPSIS CHEVALIERI Swingle. Rutaceae.

CPB. 7633. A small spiny evergreen tree about 10 feet high, native to the Ivory Coast, western tropical Africa, with simple ovate leaves about 5 inches long. It has white flowers in short panicles, and the roundish or pear-shaped, brownish-orange, hard-shelled fruits are 2 to 4 inches in diameter.

109607 and 109608. ARGANIA SPINOSA (L.) Skeels (*A. sideroxylon* Roem. and Schult.). Sapotaceae. **Argan.**

Originally from Morocco. The argan tree of western Morocco grows to a large size and bears an abundance of very acrid fruits, somewhat resembling small plums, that are eaten by cattle and goats.

For previous introduction see 100480.

109607. CPB. 7729-A.

109608. CPB. 12746. Originally received as seeds from R. Maire, Botanic Garden, University of Algiers, Algeria, June 29, 1926.

109609 to 109616. ATALANTIA spp. Rutaceae.

109609. ATALANTIA sp.

CPB. 10089.

109610. ATALANTIA sp.

CPB. 11226. Originally from India.

109611. ATALANTIA CEYLANICA (Arn.) Oliver.

CPB. 11225. From India. A much-branched spiny evergreen shrub or small tree, native to Ceylon and India, of interest chiefly as a stock for citrus fruits.

For previous introduction see 98732.

109612 and 109613. ATALANTIA MONOPHYLLA DC.

A small tropical evergreen, usually spiny, tree native to British India. It has oval emarginate leaves and orange-like fruits three-fourths of an inch in diameter.

For previous introduction see 74237.

109612. CPB. 10256. Originally received as seeds from the Experiment Station, Santiago de las Vegas, Cuba, June 24, 1924.

109613. CPB. 10258. Originally received as seeds from the Experiment Station, Santiago de las Vegas, Cuba, July 14, 1924.

109614. ATALANTIA DISTICHA (Blanco) Merrill.

CPB. 10261-H. A small tropical evergreen tree, native to the Philippines, with lanceolate, doubly serrate leaves and terminal corymbs of small white flowers.

109606 to 109792—Continued.

109615 and 109616. ATALANTIA RACEMOSA Wight.

A small evergreen tree or shrub found in the lower mountain regions of Ceylon and in southern India. The white flowers are produced in short racemes, and the small round berry has two to six seeds.

For previous introduction see 36102.

109615. CPB 7518.

109616. CPB. 7518-A.

109617. BALSAMOCITRUS DAWEI Stapf. Rutaceae.

CPB. 2920. A tree about 60 feet tall, native to the subtropical plateau of Uganda, Africa. It has panicles of white flowers and subglobose fruits, 4 to 6 inches in diameter, with a thick hard shell, containing numerous large seeds.

109618. AFRÆGLE GABONENSIS (Swingle) Engler. Rutaceae.

CPB. 7516-B. A thorny tree or shrub with simple or trifoliate leaves 5 to 8 inches long. The hard-shelled fruits are pear-shaped, about 4 inches in diameter. Native to the French Congo.

109619. CAVANILLESIA PLATANIFOLIA H. B. K. Bombacaceae.

CPB. 12627. Originally received as seeds from J. E. Higgins, Summit, Canal Zone, May 10, 1928. A Colombian tree up to 100 feet high, with a large thick trunk, smooth pale bark, large shallowly five- to seven-lobed leaves, and red flowers 1 inch long.

For previous introduction see 98928.

109620. CITRUS MEDICA L. Rutaceae. **Citron.**

CPB. 11178. *Etirog* citron.

For previous introduction see 105957.

109621. CITROPSIS SCHWEINFURTHII (Engler) Swingle and Kellerman. Rutaceae.

CPB. 2902. A spiny shrub or small tree with three- to five-foliate leaves and large white flowers in small axillary clusters. The orange-like fruits are about 1 inch in diameter. Native to tropical Africa.

109622. CITROPSIS sp.

CPB. 7800-g-c. A species from Kisantu, Belgian Congo, which has a much larger leaf than *Citropsis schweinfurthii*.

109623 to 109639. CITRUS spp. Rutaceae.

109623. CITRUS sp.

CPB. 2826. *Kinokuni* orange.

109624 to 109631. Presented by the Director of Agriculture, Manila, Philippine Islands.

109624. CITRUS sp.

CPB. 7819. *Limon Real* No. 18. Originally received as seeds; collected on the island of Bohol. Received February 21, 1914.

109625 to 109627. Originally received as seeds; collected on the island of Bohol. Received April 1, 1914.

109625. CITRUS sp.

CPB. 7825. *Amontay* No. 7.

109606 to 109792—Continued.

109626. CITRUS sp.
CPB. 7826. *Talamisan* No. 11.
109627. CITRUS sp.
CPB. 7827. *Talamisan* No. 11.
109628. CITRUS AURANTIUM L.
CPB. 7829. *Dalandan*. A sour orange. Received April 1, 1914.
109629. CITRUS LIMONIA Osbeck. Lemon.
CPB. 7833. A small lemon collected in Moro Province, Philippine Islands. Presented by the Director of Agriculture, April 1, 1934.
109630. CITRUS sp.
CPB. 7835. *Mamis*. Received from the Director of Agriculture, Philippine Islands, April 1, 1914.
109631. CITRUS LIMONIA Osbeck. Lemon.
CPB. 7837. *Davao* lemon. Received April 1, 1914.
109632. CITRUS AURANTIFOLIA (Christm.) Swingle. Lime.
CPB. 7861. *Mandarin* lime. Budsticks brought from Manila by H. H. Boyle. Received May 22, 1914.
109633. CITRUS LIMONIA Osbeck. Lemon.
CPB. 1158. Sweet lemon. Originally received as seeds from Jaffa, Palestine, March 4, 1914.
109634. CITRUS WEBBERI Wester. Alsem.
CPB. 10026. *Kalpi*. Originally received as seeds and presented by P. J. Wester, Philippine Islands. Received February 24, 1919.
- 109635 and 109636. Received March 19, 1919, from Atherton Lee, Bureau of Plant Industry; collected by him in China.
109635. CITRUS NOBILIS Lour. King orange.
CPB. 10031. *Chu-Kai*, vermillion orange.
109636. CITRUS sp.
CPB. 10032. *Pong-Kaa*, honey orange.
- 109637 and 109638. From China; originally received as seeds, presented by G. Weidman Groff. Received March 29, 1919.
109637. CITRUS sp.
CPB 10034. *Chinka*.
109638. CITRUS sp.
CPB. 10036. *Pook Ling Mung*.
109639. CITRUS sp.
CPB. 10046. *Iskalan*. From the Philippine Islands. Presented by P. J. Wester. Received April 16, 1919.
109640. MICROMELUM TEPHROCARPUM Turcz. Rutaceae.
CPB. 10048. A small evergreen tree with unequally pinnate leaves. The small white flowers, in large terminal panicles, are followed by small dry berries. Native to thickets in the Philippine Islands.

109606 to 109792—Continued.

- 109641 to 109646. CITRUS spp. Rutaceae.
109641. CITRUS sp.
CPB. 10052. *Kisum*. From the Philippine Islands. Collected in the Amboanga district by E. D. Merrill. Received January 21, 1920.
109642. CITRUS sp.
CPB. 10056. *Chamoudi* orange. From Egypt. Plants collected by S. C. Mason, Alexandria. Received August 7, 1920.
- 109643 and 109644. From Egypt; plants collected by S. C. Mason. Received July 21, 1922.
109643. CITRUS sp.
CPB. 10173-A. *Chamoudi* orange.
109644. CITRUS sp.
CPB. 10173-D. *Chamoudi* orange.
109645. CITRUS sp.
CPB. 10076-A. From the Philippine Islands. A seedling from CPB. 10076, brought in by P. J. Wester. Received June 18, 1930.
109646. CITRUS NOBILIS UNSHIU Swingle. Satsuma orange.
CPB. 10077. From the Philippine Islands. Plants presented by P. J. Wester. Received May 18, 1930.
For previous introduction see 105226.
109647. PARAMIGNYA LONGIPEDUNCULATA Merr. Rutaceae.
CPB. 10200. From Los Banos, Philippine Islands. Presented by G. B. Lontok. Received May 24, 1923. A woody climber with elliptic-ovate leaves about 3 inches long and small white flowers. Native to the Philippine Islands.
- 109648 to 109762. CITRUS spp. Rutaceae.
109648. CITRUS sp.
CPB. 10280. From Japan. Originally introduced as seeds, presented by Dr. T. Tanaka, Imperial University, Hako-zaki, Fukuoka. Received February 18, 1925, under the name "pectinifera," for which a place of publication has not been found.
109649. CITRUS sp.
CPB. 10301. Budwood presented by Dr. H. J. Webber, from Buitenzorg, Java. Received August 11, 1935. *Dejerock limoli*, a small fruited species with a rough skin.
109650. CITRUS AURANTIUM L. Seville orange.
CPB. 10330-A. *Chinotto* orange. A seedling of CPB. 10330, which came originally from C. Allegra, Catania, Sicily. Received November 18, 1925.
See 65128 for the introduction of CPB. 10330.
109651. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Mandarin orange.
CPB. 10346. *Szinkom*. Received from the Director of Agriculture, Philippine Islands, February 20, 1925.
109652. CITRUS sp.
CPB. 10358. From Japan. Originally received as seed, from Dr. T. Tanaka, Miyazaki, March 30, 1926.

109606 to 109792—Continued.

109653. CITRUS AURANTIFOLIA (Christm.) Swingle. **Lime.**

CPB. 10385. *Dayap lime*. Received from T. D. Bagarino, Los Banos, Philippine Islands, November 6, 1926.

109654. CITRUS sp.

CPB. 10552. *Sour Kat*. Plants received from F. A. McClure, Canton, China, June 27, 1927.

109655. CITRUS sp.

CPB. 10652. Mandarin × lemon. Plants from H. R. Wright, Auckland, New Zealand. Received July 12, 1930.

109656. CITRUS sp.

CPB. 14002. *Ling Mung*. From China. Budwood presented by G. Weidman Groff, Canton. Received August 20, 1919.

109657. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. **Mandarin orange.**

CPB. 14003. *Chin Chow Kom*. Swatow orange. Originally received as budwood. Collected on the Canton Christian College grounds, Canton, China. Received August 20, 1919.

109658. CITRUS SINENSIS (L.) Osbeck.

CPB. 14007. *Tim Kat*. Budwood of a sweet orange, collected near Canton, China, by E. May, Jr. Received August 1919.

109659 to 109661. Originally received as budwood, collected in Japan by W. T. Swingle.

109659. CITRUS sp.

CPB. 14027. *Hime Buntan*. Received in 1919.

109660. CITRUS sp.

CPB. 14041. *Sambo*. Received in 1919.

109661. CITRUS AURANTIUM L.

CPB. 14043. *Zadaidai*. Received in January 1918.

109662. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. **Mandarin orange.**

CPB. 14045. *Swatow orange*. Collected by E. May near the College of Agriculture, Los Banos, Philippine Islands, in 1919.

109663. CITRUS sp.

CPB. 14046. From Japan. Originally collected as budwood by E. May at the Ikeda Nursery, Ikeda. Received November 3, 1919.

109664. CITRUS sp.

CPB. 14026. *Natsume daidai*. Originally collected at the Los Banos Nursery, Philippine Islands, by E. May. Received December 1919.

109665 and 109666. CITRUS AURANTIFOLIA (Christm.) Swingle. **Lime.**

Dayap lime. Received from the Department of Agriculture, Manila, January 12, 1927.

109665. CPB. 10527-C.

109666. CPB. 10527-D.

109667. CITRUS SINENSIS (L.) Osbeck.

CPB. 10841. *Avana*.

109606 to 109792—Continued.

109668. CITRUS SINENSIS (L.) Osbeck.

CPB. 10842. *Avana blood*.

109669. CITRUS MEDICA L. **Citron.**

CPB. 10843. *Yemen citron*.

109670. CITRUS sp.

CPB. 11587. *Yuzu*. Obtained at Seattle, Wash., January 13, 1931, by Paul Hedtke, plant quarantine inspector.

109671. CITRUS GRANDIS (L.) Osbeck. **Grapefruit.**

CPB. 11893. *Shaddock*. Seedling plants received from Thomas R. Towns, Holguin, Cuba, June 23, 1922. Seeds of this same shaddock were received and given the F. P. I. No. 55030.

109672. CITRUS LIMONIA Osbeck.

CPB. 12702-C. *Rough lemon*. From T. Ralph Robinson, Terra Ceia, Fla. Received November 4, 1932.

109673. CITRUS sp.

CPB. 15130. *Som Sa*. Budded plants received from Los Banos, Philippine Islands, but originally collected by O. A. Reinking on a trip to Siam in 1920. Received June 14, 1921.

109674. CITRUS AURANTIUM L. **Seville orange.**

CPB. 10339. From San Juan, Puerto Rico; presented by O. W. Barrett. Received December 1, 1925.

109675. CITRUS sp.

CPB. 11430. Received from Tahiti, May 1919, under the name, "cambra-voixora odoratissima," for which a place of publication has not been found.

109676 to 109678. CITRUS GRANDIS (L.) Osbeck. **Grapefruit.**

109676. CPB. 7834. From the Philippine Islands. Presented by O. W. Barrett, Bureau of Agriculture, Manila. Received April 1, 1914.

109677. CPB. 10044. Siamese pummelo. From Hong Kong, China. Collected by W. T. Swingle. Received April 11, 1919.

109678. CPB. 10059. Red pummelo. From Saharanpur, India. Received March 22, 1920.

109679. CITRUS sp.

CPB. 10072. *Ichang*. From Nanking, China. A large-fruited hybrid, presented by Prof. J. H. Reisner. Received May 5, 1920.

109680 to 109715. CITRUS GRANDIS (L.) Osbeck. **Grapefruit.**

109680 to 109689. Received October 15, 1920, from Siam. Collected by O. A. Reinking.

109680 to 109688. *Kao Pan*.

109680. CPB. 10078.

109681. CPB. 10079.

109682. CPB. 10080.

109683. CPB. 10081.

109684. CPB. 10082.

109685. CPB. 10083.

109606 to 109792—Continued.

109686. CPB. 10084.
 109687. CPB. 10085.
 109688. CPB. 10087.
 109689. CPB. 10088. *Phuang*.
 109690 and 109691. Collected in Java by O. A. Reinking. Received January 26, 1922.
 109690. CPB. 10126.
 109691. CPB. 10127.
 109692. CPB. 10129. *Koon Non*. Collected by O. A. Reinking in China or Siam. Received January 26, 1922.
 109693. CPB. 10130. *Nakorn Chaisi*. Collected by O. A. Reinking in Siam. Received January 26, 1922.
 109694. CPB. 10132. *Kao Ruantia*. Collected by O. A. Reinking in Indo-China or Siam. Received January 26, 1922.
 109695. CPB. 10210. From Johannesburg, South Africa. Presented by R. A. Davis. Received October 6, 1923.
 109696. CPB. 10242. *Marsh seedless* grapefruit. Budwood presented by C. S. Pomeroy, Riverside, Calif. Received March 26, 1931.
 109697 to 109702. From Java. Originally received as seed, collected by H. J. Webber. Received August 11, 1925.
 109697. CPB. 10304.
 109698 to 109700. Especially selected pink-fleshed shaddock.
 109698. CPB. 10305.
 109699. CPB. 10306.
 109700. CPB. 10707.
 109701. CPB. 10311. Especially selected deep-red-fleshed shaddock.
 109702. CPB. 10312. Especially selected pink-fleshed shaddock.
 109703. CPB. 10343. *Pummelo Siamese*. From Bangkok, Siam. Seeds presented by Yai S. Sanitwongse. Received December 20, 1925.
 109704. CPB. 10359. *Better Pummelo*. From Los Banos, Philippine Islands. Presented by J. D. Bagarino. Received March 31, 1926.
 109705 and 109706. Ichang hybrid. Originally received as seeds. Collected by W. T. Swingle, China-Japan trip, 1926. Received January 7, 1927.
 109705. CPB. 10500—H.
 109706. CPB. 10504—A.
 109707. CPB. 11468. *Siamese seedless*.
 109708. CPB. 14012. *Siamese*. From Los Banos, Philippine Islands. Budwood collected by E. May. Received October 30, 1919.
 109709 to 109715. Budded plants presented by G. Weidman Groff through O. A. Reinking, Los Banos, Philippine Islands.

109606 to 109792—Continued.

109709. CPB. 15072. *Pin Shan Kong Yan*. From Dengo Shan, Kwangtung Province, China. Received June 14, 1921.
 109710. CPB. 15073. *Kong Yan*. From Lakkau, China. Received June 14, 1921.
 109711. CPB. 15076. *Sha Tin Yau*. From Wuchow, Kwangtung Province, China. Received in 1920.
 109712. CPB. 15079. *Song Ma Yau*. From Lip Tak, Kwangtung Province, China. Received January 26, 1922.
 109713. CPB. 15080. *Song Ma Yau*. From Szwei, Kwangtung Province, China. Received June 14, 1921.
 109714. CPB. 15084. *Wong Yau*. From Lip Tak, China. Received June 14, 1920.
 109715. CPB. 15123. *Kao Pan*. From Nakon Chaisi, Siam. Received June 9, 1920.
 109716 to 109719. CITRUS HYSTRIX DC. Rutaceae.
 109716. CPB. 7831. *Cobuyao*. From the Philippine Islands. Seeds presented by O. W. Barrett, Bureau of Agriculture, Manila. Received April 1, 1914.
 109717. CPB. 10049. From the Philippine Islands. A wild orange collected by W. T. Swingle at Mount Maquiling, Los Banos. Received April 16, 1919.
 109718. CPB. 10272. Originally received as seeds presented by C. B. Lontok, through J. E. Higgins, Los Banos, Philippine Islands. Received November 6, 1924.
 109719. CPB. 14011. Budwood from a wild tree on Mount Maquiling, Los Banos, Philippine Islands, presented through E. May. Received October 30, 1919.
 109720 and 109721. CITRUS LIMONIA Osbeck. Rutaceae. Lemon.
 109720. CPB. 7341. *Matta* lemon. From Lahore, India. Seeds of this variety, when received June 6, 1911, were given the P. I. No. 31215.
 109721. CPB. 10247—A. *India* lemon. A seedling presented by H. E. Peake, Khaltoo Fruit Orchards, Solan Brewery KS. Ry., India. Received April 15, 1924.
 109722. CITRUS sp.
 CPB. 10267. From India. Plants presented by H. E. Peake, Khaltoo Fruit Orchards, Solan Brewery KS. Ry. Received October 3, 1934.
 109723 to 109726. CITRUS LIMONIA Osbeck. Lemon.
 Originally received as seeds; from Surinam, February 11, 1922.
 109723. CPB. 11845. *Borneo* lemon.
 109724. CPB. 11846. *Baboon* lemon.
 109725. CPB. 12920. *Meyer* lemon. Budwood received from T. Ralph Robinson, Terra Ceia, Fla., January 27, 1931.

109606 to 109792—Continued.

109726. CPB. 15115. From Saigon, Indo-China. Budded plants presented by G. Weidman Groff, through O. A. Reinking, Los Banos, Philippine Islands. Received June 14, 1921.

109727 and 109728. CITRUS spp. Rutaceae.

Received December 12, 1921, under the name "moi," for which a place of publication has not been found.

109727. CITRUS sp.

CPB. 10123.

109728. CITRUS sp.

CPB. 10124.

109729. CITRUS NOBILIS Lour. Rutaceae.

CPB. 10582. Plants presented by C. W. Edwards, United States Experiment Station, Guam. Received August 29, 1928.

109730. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Rutaceae. Mandarin orange.

CPB. 12384. *Batangas Mandarin*. Plant collected by E. May, Philippine Islands. Received May 1919.

109731. CITRUS NOBILIS UNSHIU Swingle. Rutaceae. Satsuma orange.

CPB. 14009. *Owari* (C. A. 4411) Budsticks from the College of Agriculture, Los Banos, Philippine Islands. Received September 2, 1919.

109732 to 109735. CITRUS spp. Rutaceae

From Kwangtung Province, China. Plants presented by G. Weidman Groff, through O. A. Reinking, Los Banos, Philippine Islands. Nos. 109732 and 109733 were received June 14, 1921.

109732. CITRUS NOBILIS Lour.

CPB. 15097. *Chiu Kom*. Collected at Swatow.

109733. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Mandarin orange.

CPB. 15099. *Tim Kon*. A mandarin orange from Szwui.

109734 and 109735. CITRUS NOBILIS Lour.

109734. CPB. 15102. *Kat*. Collected at Lo Kong Tung. Received January 26, 1922.

109735. CPB. 15106. *Sun Chu Sha Kat*. Collected at Szwui. Received June 14, 1921.

109736 to 109753. CITRUS NOBILIS UNSHIU Swingle. Rutaceae.

Satsuma orange.

109736. CPB. 867. *Moriya*. Plant collected by W. T. Swingle on his China-Japan trip, 1926. Received January 4, 1927.

109737 to 109749. From Japan. Budwood presented by Dr. T. Tanaka. Received April 27, 1921.

109737. CPB. 10093. *Shintani Wase*.

109738. CPB. 10094. *Hozaki Wase*.

109606 to 109792—Continued.

109739. CPB. 10095. *Ishikawa Wase*.

109740. CPB. 10096. *Horie Wase*.

109741. CPB. 10097. *Sueoka Wase*.

109742. CPB. 10098. *Hozaki Wase*.

109743. CPB. 10099. *Sueoka Wase*.

109744. CPB. 10101. *Mizometo's round Owari*.

109745. CPB. 10102. *Moriguch's Ikeda*.

109746. CPB. 10103. *Gyotoku's Zairai*.

109747. CPB. 10104. *Yoshino*.

109748. CPB. 11101. *Kawano Wase*.

109749. CPB. 12996. *Kawano Wase*.

109750 and 109751. Plants grown from budwood of trees brought by E. May from the Ikeda Nursery, Ikeda, Japan. Received November 3, 1919.

109750. CPB. 14046. *Kawano Wase*.

109751. CPB. 14047. *Hira*.

109752. CPB. 14048. *Ikiriki*. From Kobe, Japan. Received from Dr. T. Tanaka, December 1919.

109753. CPB. 14051. *Kawano Wase*. From Japan. Budwood collected by Dr. T. Tanaka. Received December 1919.

109754. CITRUS sp. Rutaceae.

CPB. 12080. *Sveequeasaa*. From Japan. Originally received as seeds, presented by Dr. T. Tanaka, Imperial University, Hakozaki, Fukuoka. Received February 18, 1935, under the name "pectinitera," for which a place of publication has not been found. See also F. P. I. 109648.

109755 and 109756. CITRUS SINENSIS (L.) Osbeck. Rutaceae. Orange.

109755. CPB. 10252. *Poorman* orange. From New Zealand. Budsticks presented by George A. Green, Auckland. Received June 17, 1924.

109756. CPB. 14007. *Tim Kat*. Budwood collected by E. May near Canton, China. Received in August 1919.

109757. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Mandarin orange.

CPB. 14054. *Swatow* orange. From Hong Kong, China. Plants collected by Mr. Byrd and given to E. May. Received October 29, 1919.

109758. PARAMIGNYA MONOPHYLLA Wight. Rutaceae.

CPB. 11433. A stout climbing evergreen shrub, native to the Sikkim Himalayas and the mountains of Khasi, between 2,000 and 5,000 feet altitude. The root contains large crystals of oxalate of lime and is used by the country people as an alternative tonic.

For previous introduction see 45159.

109759 to 109761. CITRUS SINENSIS (L.) Osbeck.

From Kwangtung Province, China. Budded plants presented by G. Weidman

109606 to 109792—Continued.

Groff, through O. A. Reinking, Los Banos, Philippine Islands. Received June 14, 1921.

109759. CPB. 15093. *Lau Ch'ang*. From Szwui.

109760. CPB. 15094. From Paak Shan.

109761. CPB. 15095. *Hang Chang*. From Szwui.

109762. CITRUS SOUTHWICKII Wester. Rutaceae. *Limao*.

From the Philippine Islands. Plant presented by the Bureau of Agriculture, Manila. Received May 26, 1915. A compact thorny tree which becomes about 20 feet high, with dark-green, thick, distinct leaves and attractive oblate inedible fruits, used by the Boholanos for washing clothes. Native to the Philippine Islands, from the island of Bohol through Mindanao.

For previous introduction see 41387.

109763. FERONIELLA OBLATA Swingle. Rutaceae. *Krassan*.

CPB. 7521. (Date of origin not found.) A spiny tree up to 65 feet high, native to forests in Cambodia and Cochin-China. The leaflets of the pinnate leaves are oval with rounded or flattened tips, and the very fragrant white flowers appear in panicles on the branches of the previous year's growth. The small fruits, less than 3 inches in diameter, are borne in clusters and have a pronounced orange flavor when young. The edible pinkish pulp is subacid and is used as a condiment in sauces.

For previous introduction see 43968.

109764. FICUS sp. Moraceae. *Fig*.

CPB. 10348. *Kazzi*. From Syria. Cuttings presented by A. E. Day, American University, Beirut. Received March 4, 1926.

109765. FORTUNELLA HINDSII (Champ.) Swingle. Rutaceae.

CPB. 7462-A. From Hong Kong, China. Originally presented by S. T. Dunn, Superintendent, Botanical and Forestry Department, January 1909. A small shrub with oval-elliptic, leathery leaves and small orange fruits. Native to southeastern China.

For previous introduction see 24587.

109766. HESPERETHUSA CRENULATA (Roxb.) Roemer. Rutaceae.

CPB. 2758. (Date of origin not found.) A shrub or small tree, native to India, where it grows in dry situations up to 4,000 feet altitude. The very small fruits are occasionally eaten.

109767. HYDNOCARPUS ANTHELMINTHICA Pierre. Flacourtiaceae.

CPB. 15132. Seedling plants collected by O. A. Reinking in Siam in 1920; received from Los Banos, Philippine Islands, June 14, 1921. The *maikrabao*, as this tree is called in Siam, where it is native, is 30 to 60 feet tall, with large leathery leaves a foot long, pale yellow above and greenish below. The rose or purplish flowers are followed by round fruits 3 inches in diameter which contain about 80 seeds, from which a fatty oil is expressed. This oil closely resembles chaul-

109606 to 109792—Continued.

moogra oil, which is used in the treatment of leprosy.

For previous introduction see 65731.

109768. LITCHI CHINENSIS Sonner. Sapindaceae. *Lychee*.

CPB. 12978-C. Specimen of fruit from Estero, Fla., from P. W. Campbell, June 30, 1931.

109769 to 109773. MICROCITRUS AUSTRALASICA (F. Muell.) Swingle. Rutaceae. *Finger lime*.

A spiny shrub or small tree 15 to 30 feet high, with small oval or ovate leaves up to 1½ inches long. The finger-shaped, slender fruits, up to 4 inches long, contain very acid juice. Native to New South Wales and Queensland.

For previous introduction see 57702.

109769. CPB. 7307. From Australia.

109770. CPB. 7307-B. A seedling of CPB. 7307.

109771. CPB. 7775-B. Received originally as seeds from James Pink, Brisbane, Australia, in May 1906, and assigned P. I. No. 18550.

109772. CPB. 11372. Originally received as seeds from Australia.

109773. CPB. 11411. *Sang*.

109774 and 109775. MICROCITRUS GARRAWAYI (Bail.) Swingle.

A small tree or shrub with very small, white flowers and ovoid to finger-shaped fruits. Native to Queensland, Australia.

109774. CPB. 11008.

109775. CPB. 11466.

109776. MICROCITRUS sp.

CPB. 7775-E. Original seed from Australia. Received under the name "virgata," for which a place of publication has not been found.

109777. MURRAYA EXOTICA L. Rutaceae. *Orange-jasmine*.

CPB. 7380. From India. An evergreen shrub, native throughout tropical Asia to the East Indies and as far as New Zealand. It has handsome pinnate foliage and large fragrant white flowers.

109778. PEDILANTHUS TITHYMALOIDES Poit. Euphorbiaceae.

CPB. 13104. A tender, cactuslike shrub about 5 feet high, native to tropical America. The red or purple flowers are in dense terminal cymes. In Mexico this is known as the *candelilla*.

109779. PISTACIA MEXICANA H. B. K. Anacardiaceae.

CPB. 7581. Originally received as seeds from Mexico, July 1, 1912. A slender shrub or small tree with pinnate leaves composed of 11 to 29 oblique-oblong leaflets and small dry fruits with edible seeds. Native to Mexico.

109780 to 109786. SEVERINIA BUXIFOLIA (Poir.) Ten. Rutaceae.

A small spiny shrub, native to southern China, with elliptical, wavy margined, glossy-green leaves. The small pure-white flowers are borne in axillary clusters, and the black succulent berries are about the size of a pea.

109606 to 109792—Continued.

109780 and 109781. The original plants were received as *Atalantia bilocularis* from the Director of Agriculture, Buitenzorg, Java, in June 1910.

109780. CPB. 2916-A.

109781. CPB. 2916-C.

109782 to 109784. No data of origin found.

109782. CPB. 2760-A.

109783. CPB. 2760-AA.

109784. CPB. 2760-C.

109785. CPB. 11115. From the Philippine Islands.

109786. CPB. 11321. No data of origin found.

109787 and 109788. *CHAETOSPERMUM GLUTINOSUM* (Blanco) Swingle. Rutaceae.

109787. CPB. 10168-A. Originally received from the Hawaii Agricultural Experiment Station, Honolulu, June 27, 1922.

109788. CPB. 10524. Collected by W. T. Swingle on his China-Japan trip in 1926.

109789. *TRIPHASIA TRIFOLIA* (Burm. f.) P. Wilson. Rutaceae.

CPB. 7788. (No data of origin.) A spiny shrub with compound leaves composed of three ovate leaflets notched at the tip. The white, sweet-scented axillary flowers are followed by small berries which are used in making jams and preserves.

109790. *CITRUS GRANDIS* (L.) Osbeck. Rutaceae. **Grapefruit.**

CPB. 11250. *Buntan*. (No data of origin.)

109791. *CITRUS SINENSIS* (L.) Osbeck. Rutaceae.

CPB. 10556. From Australia. Presented by G. Williams, Director, Department of Agriculture and Stock, Brisbane, Queensland. Received August 11, 1927.

109792. *GLYCOSMIS PENTAPHYLLA* (Retz.) Correa. Rutaceae.

CPB. 2914. From Java. An unarmed shrub with evergreen compound leaves, panicles of small white fragrant flowers, and small white berries. Originally received as seed and assigned P. I. No. 28124.

109793. *AMYGDALUS PERSICA* L. **Amygdalaceae.** **Peach.**

From central Asia. Seeds presented through the Institute of Plant Industry, Leningrad. Received March 1, 1935.

Variety *Ferganensis*. Introduced for Department specialists.

109794 to 109803.

From the Union of Soviet Socialist Republics. Bulbs presented by V. Alferov, Introduction Garden of Subtropical Cultures, Sukhum, through the Institute of Plant Industry, Leningrad. Received March 1, 1935.

109794. *CYCLAMEN IBERICUM* Stev. Primulaceae.

No. 833. A dwarf herbaceous perennial, native to the Caucasus region, with

109794 to 109803—Continued.

oval-rounded leaves zoned with white above and purple flowers with darker-colored throats.

For previous introduction see 89093.

109795 to 109803. *TULIPA* spp. Liliaceae. **Tulip.**

109795. *TULIPA BORSZCZOWI* Regel.

No. 832.

For previous introduction and description see 108405.

109796. *TULIPA FOSTERIANA* Hoog.

No. 838.

For previous introduction and description see 107585.

109797. *TULIPA GREIGH* Regel.

No. 837.

For previous introduction and description see 108407.

109798. *TULIPA KAUFMANNIANA* Regel.

No. 836.

For previous introduction and description see 108408.

109799. *TULIPA KOROLKOVII* Regel.

No. 831.

For previous introduction see 106776.

109800. *TULIPA KUSCHKENSIS* B. Fedtsch.

No. 839.

For previous introduction and description see 108410.

109801. *TULIPA LEHMANNIANA* Merck.

No. 830. A tulip from Bokhara, Turkistan, with four very narrow leaves about 4 inches long and a bright-yellow flower, the segments being less than 2 inches long.

109802. *TULIPA OSTROWSKIANA* Regel.

No. 829.

For previous introduction and description see 108412.

109803. *TULIPA SCHRENKII* Regel.

No. 840. A tulip from Turkistan, with broadly campanulate yellow or purple-yellow flowers borne on a stem nearly a foot high. The leaves are wavy margined.

For previous introduction see 100645.

109804. *ZIZIPHUS JUJUBA* Mill. **Rhamnaceae.** **Chinese jujube.**

From Japan. Seeds presented by Kan Yashiroda, Tonosho-Kyoku, Kagawaken. Received February 27, 1935.

Variety *Inermis*. A form without spines, from the coldest part of Japan.

109805 to 109830.

From Manchuria. Seeds presented by the Kungchuling Experiment Station of the South Manchurian Railway, through H. G. MacMillan and J. L. Stephens, Bureau of Plant Industry. Received February 26, 1935.

109805 to 109830—Continued.

Introduced for Department specialists.

109805 to 109809. AGROPYRON spp. Poaceae. Wheatgrass.

109805. AGROPYRON CILIARE (Trin.) Franch.

No. 84. A tall-growing, short-awned grass.

For previous introduction see 88967.

109806. AGROPYRON CRISTATUM (L.) Gaertn. Crested wheatgrass.

No. 70.

For previous introduction see 109450.

109807. AGROPYRON REPENS (L.) Beauv. Quackgrass.

No. 80.

For previous introduction see 108428.

109808. AGROPYRON SEMICOSTATUM Nees.

No. 75. A perennial, fibrous-rooted grass with erect stems and narrowly linear leaves. Native to Asia from Afghanistan to Manchuria.

For previous introduction see 101645.

109809. AGROPYRON SEMICOSTATUM Nees.

No. 85.

109810. ARTHRAXON HISPIDUS (Thunb.) Makino. Poaceae. Grass.

No. 86. A slender branching annual grass with decumbent or creeping stems about 2 feet long. Native to Japan.

109811. ASTRAGALUS DAVURICUS (Pall.) DC. Fabaceae.

No. 79. A perennial from 2 to 5 feet high with purple flowers.

For previous introduction see 105583.

109812. BROMUS INERMIS Leyss. Poaceae. Bromegrass.

No. 77.

For previous introduction see 107898.

109813. BROMUS RAMOSUS Huds. Bromegrass.

No. 76.

109814. CHLORIS sp. Poaceae. Grass.

No. 81.

109815. DIGITARIA ISCHAEMUM (Schreb.) Muhl. Poaceae. Grass.

No. 87.

For previous introduction see 101653.

109816. DIGITARIA SANGUINALIS (L.) Scop. Poaceae. Grass.

No. 82.

For previous introduction see 59298.

109817. ELYMUS sp. Poaceae.

No. 78.

109818. ERAGROSTIS CILIANENSIS (All.) Link. Poaceae.

No. 65.

For previous introduction see 107053.

109819. ERAGROSTIS PILOSA (L.) Beauv. Poaceae.

No. 67. A grass over 2 feet tall, found in moist situations.

For previous introduction see 107673.

109805 to 109830—Continued.

109820. ERIOCHLOA VILLOSA (Thunb.) Kunth. Poaceae.

No. 89.

For previous introduction see 101659.

109821. HORDEUM BREVISUBULATUM (Trin.) Link. Poaceae.

No. 66.

For previous introduction see 107932.

109822. KOELERIA CRISTATA (L.) Pers. Poaceae.

No. 90.

For previous introduction see 109299.

109823. LESPEDEZA BICOLOR Turcz. Fabaceae.

No. 91.

For previous introduction see 104671.

109824. LESPEDEZA STRIATA (Thunb.) Hook. and Arn. Fabaceae.

No. 71.

For previous introduction see 90359.

109825. ECHINOCHLOA CRUS-GALLI FRUMENTACEA (Roxb.) W. F. Wight. Poaceae.

No. 74.

For previous introduction see 87718.

109826. POA sp. Poaceae.

No. 73.

109827. SETARIA LUTESCENS (Weigel) Hubbard. Poaceae. Grass.

No. 88. An annual grass about 2 feet high, erect or sometimes prostrate. Native to central Europe.

109828. SETARIA VIRIDIS (L.) Beauv. Poaceae. Grass.

No. 83.

For previous introduction see 107699.

109829. SOJA MAX (L.) Piper. Fabaceae. Soybean.

No. 68.

109830. VICIA AMOENA Fisch. Fabaceae.

No. 72.

For previous introduction and description see 108726.

109831 to 109838. LYCOPERSICON ESCULENTUM Mill. Solanaceae.

From northern Africa. Seeds presented by H. Brayard, Director, Experiment Station, Marrakech, Morocco. Received March 5, 1935.

A collection of French varieties, introduced for Department specialists.

109831. *De Marmande.*

109832. *Des Allies.*

109833. *Joffre.*

109834. *Merville des Marches.*

109835. *Pierrette.*

109836. *Precoce des Halles.*

109837. *Premiere.*

109838. *Profusion.*

109839 to 109875.

From Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 28, 1935.

Introduced for Department specialists.

109839 and 109840. *ARACHIS HYPOGAEA* L. Fabaceae. **Peanut.**

Cultivated peanuts obtained in the market at Caracas, January 23, 1935. Said to be native.

109839. No. 2971. *Mani.*

109840. No. 2972. *Mani americano.*

109841. *ARRABIDAEA* sp. Bignoniaceae.

No. 3039. Collected near La Democracia, February 4, 1935. An ornamental climbing shrub.

109842. *BANISTERIOPSIS* sp. Malpighiaceae.

No. 2951. January 22, 1935. From the lower Catuche Woods, near Caracas. A vine 20 to 30 feet high, clambering over other vegetation.

109843. *BANISTERIOPSIS GUATEMALENSIS* (Ndu.) C. B. Robinson. Malpighiaceae.

No. 3005. February 5, 1935. Collected between Limon and El Sombrero. A climbing shrub about 20 feet high; native to Guatemala.

109844. *CAJANUS INDICUS* Spreng. Fabaceae. **Pigeon-pea.**

No. 2969. January 23, 1935. *Quinchoncho.* Obtained in the market at Caracas.

109845. *CICER ARIETINUM* L. Fabaceae. **Chickpea.**

No. 2956. January 23, 1935. *Garbanzo.* A cultivated variety originally from Spain. Obtained in the market at Caracas.

For previous introduction see 109259.

109846. *CLEOME STYLOSA* Eichl. Capparidaceae.

No. 2990. January 27, 1935. *Barbacajo.* Collected on the outskirts of Caracas. A shrub about 4 feet high with sticky compound leaves of 5 to 11 lanceolate leaflets and small white to pinkish flowers. Native to Venezuela.

109847. *CHENOPIDIUM AMBROSIODES* L. Chenopodiaceae.

No. 2989. Collected on the outskirts of Caracas, January 27, 1935.

109848. *COMBRETUM FRUTICOSUM* (Loefl.) Stuntz. Combretaceae.

No. 3014. February 3, 1935. Near El Sombrero, State of Guarico. An ornamental climbing shrub with opposite elliptical leaves and spikes of orange and green flowers. Native to temperate regions from Argentina to Brazil.

For previous introduction see 107292.

109849. *ERYTHRINA* sp. Fabaceae.

No. 3021. February 4, 1935. Near El Sombrero, State of Guarico. A large tree.

109850. *HURA CREPITANS* L. Euphorbiaceae. **Sandboxtree.**

No. 3016. *Habillo.* February 3, 1935. Near El Sombrero, State of Guarico. A tall tree with large poplarlike leaves and

109839 to 109875—Continued.

globose explosive capsules about 3 inches in diameter. Native to tropical America.

For previous introduction see 106992.

109851. *INDIGOFERA SUFFRUTICOSA* Mill. Fabaceae.

No. 2984. January 27, 1935. Near Caracas. A scantily branching open shrub 4 to 5 feet high.

For previous introduction see 107471.

109852. *INDIGOFERA SUFFRUTICOSA* Mill. Fabaceae.

No. 2985. January 27, 1935. Near Caracas. In habit and appearance this is much like No. 2984 (109851) except that the fruit and leaves are larger.

109853. *JACARANDA FILICIFOLIA* (Anders.) Don. Bignoniaceae.

No. 2997. January 28, 1935. Near Caracas. A cultivated shade tree with fernlike leaves and showy panicles of large blue-purple flowers.

109854. *BONTIA DAPHNOIDES* L. Myoporaceae.

No. 3000. *Olivo.* Collected near Caracas, January 8, 1935. A small tree with small glossy alternate lanceolate leaves and axillary flowers which are either solitary or in pairs. The fruit is a fleshy drupe containing eight hard seeds.

For previous introduction see 44907.

109855. *NISSOLIA FRUTICOSA* Jacq. Fabaceae.

No. 3009. Collected between Limon and El Sombrero, State of Guarico, February 3, 1935. A somewhat woody vine with opposite pinnate leaves and axillary racemes of small yellow flowers. Native to Central America.

109856. *PAULLINIA LEIOCARPA* Greisb. Sapindaceae.

No. 2950. Collected at Antimano, near Caracas, January 12, 1935. A climbing shrub.

109857 and 109858. *PHASEOLUS LUNATUS* L. Fabaceae. **Lima bean.**

From the market at Caracas, January 23, 1935.

109857. No. 2968. *Guaracaros.*

109858. No. 2970. *Guaracaros blanco.*

109859 to 109864. *PHASEOLUS VULGARIS* L. Fabaceae. **Common bean.**

From the market at Caracas, January 23, 1935.

109859. No. 2959. *Frijol.*

109860. No. 2961. *Carraotas negras.* The most popular variety; widely cultivated also in Central America.

109861. No. 2962. *Carraotas amarillas.*

109862. No. 2964. *Taitaguita.*

109863. No. 2966. *Poucha rosada.*

109864. No. 2967. *Carraota dominó.*

109865 and 109866. *PISUM SATIVUM* L. Fabaceae. **Pea.**

From the market at Caracas, January 23, 1935.

109865. No. 2957. *Arvejas amarillas.*

109839 to 109875—Continued.

109866. No. 2963. *Arvejas verdes*.
 109867. RUPRECHTIA CORIACEA (Karst.) Blake. Polygonaceae.
 No. 3015. *Biscochito*. From near El Sombrero, State of Guarico, February 3, 1935. A small tree, 20 feet high, native to Venezuela, with ovate-lanceolate, acute leaves about 3 inches long.
 109868. RUPRECHTIA sp. Polygonaceae.
 No. 3030. Collected between El Sombrero and La Democracia, State of Guarico, February 4, 1935. A small tree.
 109869. SAPINDUS SAPONARIA L. Sapindaceae. Southern soapberry.
 No. 3031. *Para Para, pepo*. Collected between El Sombrero and La Democracia, State of Guarico, February 4, 1935.
 For previous introduction see 51410.
 109870. SCHOENOCALON OFFICINALE (Schlecht.) A. Gray. Melanthiaceae.
 No. 2994. *Cebadilla*. From Antimano, near Caracas, January 28, 1935. A bulbous plant, native to tropical America, about 3 feet high, with long linear, grass-like leaves and small white flowers on a long spike.
 For previous introduction see 45810.
 109871. SERJANIA GLABRATA H. B. K. Sapindaceae.
 No. 2954. From the lower Catuche Woods, near Caracas, January 22, 1935. A climbing shrub with alternate biternate leaves and white flowers in axillary spike-like racemes. Native to temperate regions in Peru.
 For previous introduction see 101251.
 109872. SICANA ODORIFERA (Vell.) Naud. Cucurbitaceae. Casabanana.
 No. 2975. *Cajúa*. From the market at Caracas, January 23, 1935. A subtropical ornamental vine with cylindrical fruits over a foot long, which have finely mottled dark reddish rinds and yellow flesh with a pleasing odor somewhat like that of the muskmelon. The fruit is used for preserves or dulces.
 For previous introduction see 98882.
 109873 to 109875. VIGNA spp. Fabaceae.
 From the market at Caracas, January 23, 1935.
 109873 and 109874. VIGNA CYLINDRICA (Stickm.) Skeels. Catjang.
 109873. No. 2958. *Frijol blanco de sopa*.
 109874. No. 2965. *Frijoles negros*.
 109875. VIGNA SINENSIS (Torner) Savi. Cowpea.
 No. 2960. *Frijol caia de santo*.
 109876 to 109878. FESTUCA spp. Poaceae. Fescue.
 From Germany. Seeds presented by Gustav Zülzer, Hamburg. Received March 5, 1935.
 Introduced for Department specialists.
 109876. FESTUCA CAPILLATA Lam. Hair fescue.
Sapi.
 For previous introduction see 109211.

109876 to 109878—Continued.

- 109877 and 109878. FESTUCA OVINA L. Sheep fescue.
 For previous introduction see 109497.
 109877. *Sano*. 109878. *Saru*.
 109879 to 109883.
 From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received February 28, 1935.
 109879. CASSIA BACILLARIS L. f. Caesalpinaceae.
 A small tree of rather straggly habit with pinnate foliage and golden-yellow flowers in loose racemes.
 For previous introduction see 106514.
 109880. CASSIA EXCELSA Schrad. Caesalpinaceae.
 Received under the varietal name "angustifolia," for which a place of publication has not been found.
 109881. ENTADA GIGAS (L.) Fawcett and Rendle. Mimosaceae.
 A woody climber with stems often 100 feet long, bipinnate leaves about 6 inches long, and small racemes of yellow or white flowers. The fruit is a large, flat, jointed pod 3 to 7 feet long, with one seed to a joint. The handsome deep-brown seeds are 2 inches across. Native to the West Indies.
 109882. IPOMOEA SINUATA Ortega. Convolvulaceae.
 A handsome vine with attractive palmately-divided leaves and bell-shaped flowers 1 to 2 inches wide, white with a purple center. Native to Mexico.
 For previous introduction see 26411.
 109883. TECTONA GRANDIS L. f. Verbenaceae. Teak.
 A tall evergreen tree, native to southern and central Asia, with opposite ovate leaves and white or bluish flowers in terminal panicles 6 inches long. The wood is highly prized by shipbuilders because of its great strength and durability.
 For previous introduction see 94201.
 109884. ALOE sp. Liliaceae.
 From Venezuela. Plants collected by W. A. Archer, Bureau of Plant Industry. Received March 12, 1935.
 No. 3072. *Zabila*. Collected February 16, 1935, near the sea on a dry hillside, on the road between Caracas and Cabo Blanco. A stemless aloe about a foot high with dull yellow flowers.
 109885 to 109888.
 From China. Seeds and bulbs presented by Andrew Tse, Hong Kong. Received March 7, 1935.
 A collection of Chinese vegetables introduced for Department specialists.
 109885. ALLIUM CEPHA L. Liliaceae. Onion.
 109886. ALLIUM SATIVUM L. Liliaceae. Garlic.
 Bulbs.
 109887. APIUM GRAVEOLENS L. Apiaceae. Celery.

109885 to 109888—Continued.

109888. *DAUCUS CAROTA* L. Apiaceae.
Carrot.

109889 to 109893.

From Japan. Seeds and bulbs presented by Takatsuga Abiko, Director, Hokkaido Agricultural Experiment Station, Kotoni, Sapporo. Received March 7, 1935.

Introduced for the use of Department specialists.

109889 to 109892. *ALLIUM* spp. Liliaceae.

109889. *ALLIUM CEPA* L. Onion.

Sapporo ki-tamanegi.

109890 to 109892. *ALLIUM SATIVUM* L.
Garlic.

Bulbs: *Nin-niku.*

109893. *DAUCUS CAROTA* L. Apiaceae.
Carrot.

Sapporo futo-ninjin (big carrot).

109894 to 109896.

From Venezuela. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received March 12, 1935.

109894. *HIPPEASTRUM AULICUM* Herb.
Amaryllidaceae.

No. 3074. February 18, 1935. From the market at Caracas. A form with six to nine broadly linear leaves 1 to 2 feet long and a scape 2 feet high bearing, usually, two large bright-red tubular flowers having segments 5 to 6 inches long and a green corona in the throat of the flowers. Native to Brazil.

For previous introduction see 93158.

109895. *AMARYLLIS* sp. Amaryllidaceae.

No. 3073. *Lirio sanjuanero*. Collected at the market in Caracas, February 18, 1935. A cultivated ornamental with red flowers.

109896. *FREESIA* sp. Iridaceae.

No. 3075. *Nardo*. From the market at Caracas, February 18, 1935. A cultivated ornamental.

109897 to 109899. *FESTUCA* spp. Poaceae.

From Germany. Seeds presented by Gustav Schott, Samenwerke, Hamburg-Wandsbek und Aschaffenburg a. M. Received March 5, 1935.

Introduced for Department specialists.

Seeds grown in Bavaria.

109897. *FESTUCA CAPILLATA* Lam.
Hair fescue.

109898. *FESTUCA RUBRA* L. Red fescue.

Received as variety "parva," for which a place of publication has not been found.

109899. *FESTUCA RUBRA* L. Red fescue.

Received as variety "sylvaticus," for which a place of publication has not been found.

109900. *PRUNUS SUBHIRTELLA* Miquel.
Amygdalaceae. Higan cherry.

From England. Scions presented by Collingwood Ingram, Benenden, Kent. Received March 15, 1935.

109900—Continued.

Variety *Rosea-plena*. A form with rather large, double, pink flowers produced in profusion.

For previous introduction see 108755.

109901. *PYRUS COMMUNIS* L. Malaceae.
Pear.

From Michigan. Scions presented by Stanley Johnson, Horticultural Experiment Station, South Haven. Received March 15, 1935.

Gorabella pear. Introduced for Department specialists.

For previous introduction see 107639.

109902 to 109909. *AMYGDALUS* spp.
Amygdalaceae.

From England. Scions presented by Thomas Rivers & Son Ltd., Sawbridgeworth, at the request of R. G. Hutton, East Malling Research Station, East Malling, Kent. Received March 15, 1935.

Introduced for Department specialists.

109902 to 109908. *AMYGDALUS PERSICA* L.
Peach.

109902. *Bellegrade.*

109503. *Golden Eagle.*

109904. *Kestrel.*

109905. *Magdala.*

109906. *Prince of Wales.*

109907. *Princess of Wales.*

109908. *Violetta Hatvie.*

109909. *AMYGDALUS PERSICA* NECTARINA
Ait. Nectarine.

Newton. A nectarine of delicious quality.

For previous introduction see 107335.

109910 to 109913. *ZEPHYRANTHES* spp.
Amaryllidaceae. Zephyrily.

From India. Bulbs purchased from the Chandra Nursery, Rhenock, Siklim State. Received March 15, 1935.

Introduced for Department specialists.

109910. *ZEPHYRANTHES* sp.

109911. *ZEPHYRANTHES* sp.

109912. *ZEPHYRANTHES ROSEA* Lindl.

For previous introduction see 107147.

109913. *ZEPHYRANTHES* sp.

Received under the name "sulphurea," for which a place of publication has not been found.

109914 to 109945.

From Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 4, 1935.

Introduced for Department specialists.

109914. *ALLIUM CEPA*. Liliaceae. Onion.

No. 3037. From La Victoria, February 5, 1935. A cultivated red onion, said to have been introduced from the Canary Islands.

109914 to 109945—Continued.

109915. *CALLIANDRA MARGINATA* Griseb. Mimosaceae.

No. 3003. Collected between Caracas and Maracay, February 2, 1935. An unarmed shrub or tree. Native to Trinidad.

109916. *BOWDICHIA VIRGILIOIDES* H. B. K. Fabaceae.

No. 3002. *Aicornoque*. From a dry hillside at Limón near Maracay, Department of Aragua, February 2, 1935. A small usually crooked tree about 25 feet high, with leathery compound leaves and terminal panicles of small purplish-blue flowers. Native to dry regions in Venezuela and Brazil.

109917. *CENTROSEMA PLUMIERI* (Turp.) Benth. Fabaceae.

No. 3028. Collected February 4, 1935, between El Sombrero and La Democracia in a river bed. A tropical ornamental vine, native to Brazil, with white and red flowers. Of value as a green manure.

For previous introduction see 106591.

109918. *CENTROSEMA PUBESCENS* Benth. Fabaceae.

No. 3038. Collected between El Sombrero and La Democracia, February 4, 1935.

109919. *CENTROSEMA VIRGINIANUM* (L.) Benth. Fabaceae.

No. 2998. January 29, 1935. From a dry hillside at Antimano, near Caracas.

109920. *CASSIA RETICULATA* Willd. Caesalpinaceae.

No. 3017. Collected February 4, 1935, at El Sombrero. An evergreen shrub about 10 feet high, with racemes of small yellow flowers. Native to tropical America.

109921 and 109922. *CASSIA BIFLORA* L. Caesalpinaceae.

A shrub about 10 feet high, native to tropical America, with compound leaves and small racemes of showy yellow flowers.

109921. No. 2953. Collected January 22, 1935, in the lower Catuche Woods, near Caracas, on a dry hillside.

109922. No. 3008. Collected February 3, 1935, between Limón and El Sombrero, Department of Aragua.

109923. *CAYAPONIA AMERICANA* (Lam.) Cogn. Cucurbitaceae.

No. 3029. Collected between El Sombrero and La Democracia, February 4, 1935. *Benenito*. A woody vine with large rough, deep-green, five-lobed leaves and small ovoid fruits, less than an inch long that turn red when ripe.

For previous introduction see 98823.

109924. *CHAETOCALYX PARVIFLORA* Benth. Fabaceae.

No. 2992. Collected January 28, 1935, at Antimano, near Caracas. An evergreen vine with pinnate leaves and small pale-yellow flowers in short axillary racemes. Native to eastern Brazil.

109925. *CHENOPodium AMBROSIOIDES* L. Chenopodiaceae. **Wormseed.**

No. 2982. Pasote. From Antimano, near Caracas, January 26, 1935.

109914 to 109945—Continued.

109926. *GYNANDROPSIS PENTAPHYLLA* (L.) DC. Capparidaceae.

No. 3026. Collected February 4, 1935, between El Sombrero and La Democracia, in a river bed. An annual up to 15 feet high.

109927. *CENTROSEMA PUBESCENS* Benth. Fabaceae.

No. 3027. Collected between El Sombrero and La Democracia, February 4, 1935.

109928. *TEPHROSIA CINEREA* L. Fabaceae.

No. 3033. Collected near Los Teques, State of Miranda, February 5, 1935. A shrubby perennial with a thick rootstalk, slender ascending stems 3 to 4 feet long, and purplish flowers in rather dense racemes. Native to the West Indies.

109929. *BENTHAMANTHA CARIBAEA* (Jacq.) Kuntze. Fabaceae.

No. 3010. February 3, 1935. Collected on dry banks between Limón and El Sombrero. A shrub up to 6 feet high.

109930. *CUCUMIS MELO* L. Cucurbitaceae. **Muskmelon.**

No. 3036. February 5, 1935. From La Democracia. Fruit oval, yellow, ribbed, 8 inches long and about 5 inches in diameter, of unusually good flavor.

For previous introduction see 109479.

109931. *CASSIA BIFLORA* L. Caesalpinaceae.

No. 3007. Collected between Limón and El Sombrero, Department of Aragua, February 3, 1935.

For previous introduction see 109921.

109932. *DESMANTHUS VIRGATUS* (L.) Willd. Mimosaceae.

No. 2978. From Miramar, near El Valle, Federal District, January 24, 1935. A slender climbing shrub 5 to 6 feet high, with sensitive bipinnate leaves.

For previous introduction see 107161.

109933. *DESMANTHUS DEPRESSUS* Humb. and Bonpl. Mimosaceae.

No. 3023. Collected February 4, 1925, between El Sombrero and La Democracia, State of Guárico. A dwarf, prostrate perennial, native to dry sandy places in tropical America.

109934. *GALACTIA STRIATA* (Jacq.) Urban. Fabaceae.

No. 3001. Collected February 2, 1935, at Limón, near Maracay, Department of Aragua, on a dry hillside. A small vine with pink, pea-shaped flowers.

For previous introduction see 95692.

109935. *INDIGOFERA SUBULATA* Vahl. Fabaceae.

No. 3034. Collected near Los Teques, State of Miranda, February 5, 1935. A shrubby herb up to 3 feet high, with salmon-pink flowers in racemes 5 to 10 inches long. Native to tropical America.

For previous introduction see 24763.

109914 to 109945—Continued.

109936. *INDIGOFERA SUFFRUTICOSA* Mill. Fabaceae.

No. 2952. *Anil*. From the lower Catuche Woods, near Caracas, January 22, 1935.

For previous introduction and description see 109851.

109937. *JACARANDA FILICIFOLIA* (Anders.) Don. Bignoniaceae.

No. 2997. January 28, 1935. From Antimano, near Caracas.

For previous introduction and description see 109853.

109938. *LONCHOCARPUS FENDLERI* Benth. Fabaceae.

No. 3006. *Majomo*. Collected February 3, 1935, between Limón and El Sombrero, Department of Aragua. A small to medium-sized deciduous tree with seven to nine oblong, subovate, downy-woolly leaflets, and pink flowers less than an inch long in axillary racemes. Native to Venezuela.

109939. *LONCHOCARPUS STENURUS* Pittier. Fabaceae.

No. 3019. February 4, 1935, from El Sombrero. A shrub or small tree, sometimes 30 feet high. Native to Venezuela.

109940. *NICOTIANA TABACUM* L. Solanaceae.

No. 2955. January 22, 1935. From the lower Catuche Woods, near Caracas, on a dry hillside; escaped from cultivation.

109941. *PAULLINIA* sp. Sapindaceae.

No. 2996. *Bejuco mulato*. January 27, 1935. Collected near Caracas.

109942. *PHYLLANTHUS ACUMINATUS* Vahl. Euphorbiaceae.

No. 2979. *Hediondo*. January 24, 1935. From Miramar, near El Valle, Federal District. A small tree 20 feet high.

109943. *POLYGONUM PUNCTATUM* Ell. Polygonaceae.

No. 2983. *Barbasco*. Collected near Caracas, January 27, 1935.

109944. *SERJANIA* sp. Sapindaceae.

No. 2981. *Cruceta*. From the Catuche Woods, Caracas, January 26, 1935.

109945. *TERAMNUS VOLUBILIS* Sw. Fabaceae.

No. 3024. Collected February 4, 1935, between La Democracia and El Sombrero, from a dry bank. A small woody vine with oblong or elliptical-lanceolate leaflets and very small, violet-rose flowers in axillary racemes. Native to tropical America.

109946 and 109947.

From India. Seeds presented by W. Gregson, Director of Agriculture, Tenasserim Circle, Moulmein. Received March 11, 1935.

Introduced for Department specialists.

109946. *APIUM GRAVEOLENS* L. Apiaceae.
Celery.

Tayoke Nan Nan.

109946 and 109947—Continued.

109947. *DAUCUS CAROTA* L. Apiaceae.
Carrot.

Mone-Lar-U-Ni.

109948 to 109950.

From Germany. Seeds presented by Rudolf Neumüller, Frankenthal, Pfalz. Received March 12, 1935.

Introduced for Department specialists.

109948 and 109949. *ALLIUM CEPA* L. Liliaceae.
Onion.

109948. *Zittau Yellow Giant*.

109949. No. 2444. *Nürnbergger*.

109950. *SCORZONERA HISPANICA* L. Cichoriaceae.
Black salsify.

Heinemann, One Year Giant.

109951 to 109956. *CUCURBITA PEPO* L. Cucurbitaceae.

From Austria. Seeds purchased from M. Eifer & Co., through Francis R. Stewart, American consul, Vienna. Received March 7, 1935.

Introduced for Department specialists.

A collection of soft-seeded pumpkin varieties grown in Austria.

109951. *Zitronen* (citron).

109952. *Apfel* (apple).

109953. *Bischofsmitre* (bishop's miter).

109954. *Pomeranzen* (orange).

109955. *Turkenbund* (turban).

109956. *Birne* (pear).

109957 to 109962. *SOLANUM TUBEROSUM* L. Potato.

From the Netherlands. Tubers purchased from Professor Brockema, Director, Instituut voor Plantenveredeling, Wageningen. Received March 18, 1935.

Introduced for Department specialists.

For previous introduction see 108215.

109957. *Albion*.

109958. *Bevlander*.

109959. *Frisco*.

109960. *Neordeling*.

109961. *Triumph*.

109962. *West Brabander*.

109963. *EUCHARIS NARCISSIFLORA* Huber. Amaryllidaceae.

From Ecuador. Bulbs collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received March 15, 1935.

No. 6855. February 5, 1935. Province of Napo-Pastaza, along the trail between Indillama and Canelos, in a dense forest at 13,000 feet altitude. A little-known Amazonilly that differs from other species in having smaller flowers in dense umbels. The leaves are lanceolate-ovate and the scape is about 15 inches high. Native to tropical South America.

109964 to 109966.

From Venezuela. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received March 15, 1935.

109964 to 109966—Continued.

109964. AMARYLLIS sp. Amaryllidaceae.

No. 3094. *Lirio*. Collected February 23, 1935, along the highway between Valencia and El Cambul. A cultivated form with salmon-pink flowers.

109965. HIPPEASTRUM REGINAE (L.) Herb. Amaryllidaceae.

No. 3104. *Lirio morado*. A cultivated form with purplish flowers; collected along the highway between Valencia and El Cambul, February 23, 1935.

109966. HYMENOCALLIS CARIBAEA. Amaryllidaceae. Caribbean spiderlily.

No. 3103. *Lirio*. A cultivated form, collected February 23, 1935, along the highway between Valencia and El Cambul, of the West Indian spiderlily, with 12 or more strap-shaped leaves over 2 feet long and an umbel of 6 to 12 white flowers, with linear perianth segments about 3 inches long.

109967. PISTACIA CABULICA Stocks. Anacardiaceae.

From India. Seeds presented by Harindar Singh Dinsa, Government Gardens, Lahore, Punjab. Received March 12, 1935.

A tree about 15 feet high, native to Afghanistan, with compound leaves 2 inches long, having five to nine lanceolate-oblong leaflets and rounded-compressed fruits.

For previous introduction see 18635.

109968 to 109970. LINUM USITATISSIMUM L. Linaceae. Flax.

From the Netherlands. Seeds presented by B. C. Algra, Stiens. Received March 16, 1935.

Introduced for Department specialists.

109968. *Dorst's Original "I" B.*

109969. *Dorst's Original "F" 6.*

109970. *Dorst's Original Concurrent.*

109971 to 109986.

From Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 11, 1935.

Introduced for Department specialists.

109971. ANGELONIA SALICARIAEFOLIA Humb. and Bonpl. Scrophulariaceae.

No. 3045. *Mastranto morado*. Collected February 12, 1935, near Sabana Grande. A bushy annual up to 2 feet high, with numerous sessile, oblong, viscid-hairy leaves 1 to 2 inches long. The solitary, long-stalked, axillary flowers vary in color from bright violet to deep lavender. Native to Venezuela.

109972. ASPIDOSPERMA VARGASII A. DC. Apocynaceae.

No. 3022. From La Democracia, near Para, State of Guario, February 4, 1935. A tree up to 30 feet tall, with elliptic leaves about 4 inches long and numerous small yellow flowers in dense cymes. Native to Venezuela.

109973. BONTIA DAPHNOIDES L. Myoporaceae.

No. 3063. *Olivo*. Collected on the road between Caracas and Cabo Blanco, Federal District, February 16, 1935.

For previous introduction and description see 109854.

109971 to 109986—Continued.

109974. CANAVALLIA GLADIATA (Jacq.) DC. Fabaceae. Swordbean.

No. 3061. Caracas, February 15, 1935. Presented by the Director, Ministerio de Agricultura.

For previous introduction see 80505.

109975. CARDIOSPERMUM HALICACABUM L. Sapindaceae. Balloonvine.

No. 3020. *Farolita de la Virgen*. From El Sombrero, February 4, 1935.

109976. CASSIA OCCIDENTALIS L. Caesalpiniaceae.

No. 3048. *Brusca*. Collected on the highway southeast of Antimano, February 15, 1935.

For previous introduction see 106566.

109977. CROTON FLAVENS L. Euphorbiaceae.

No. 3069. *Carcanapire*. Collected February 15, 1935, on dry hillsides near the sea on the road between Caracas and Cabo Blanco. An aromatic shrub 2 to 10 feet high, with ovate leaves 1 to 4 inches long and pale-yellow or white flowers. Native to the West Indies.

109978. DATURA METEL L. Solanaceae.

No. 3049. *Nongue*. February 15, 1935. Southwest of Antimano on the highway.

109979. HURA CREPITANS L. Euphorbiaceae. Sandbottle.

No. 3057. Collected February 15, 1935, on the highway southwest of Antimano.

For previous introduction and description see 109850.

109980. JATROPHA GOSSYPIFOLIA STAPHYSAGRIFOLIA (Mill.) Muell. Arg. Euphorbiaceae.

No. 3046. *Tuatua morada*. Collected February 15, 1935, on the highway southwest of Antimano. A shrub about 5 feet high, native to tropical America, with three- to five-lobed leaves about 5 inches across and small red to purplish flowers in cymes.

109981. NICOTIANA GLAUCA R. Grah. Solanaceae.

No. 3062. *Almorranera*. Collected February 16, 1935, on the road between Caracas and Cabo Blanco. A slender shrub or small tree 10 to 20 feet high, with yellow flowers in loose terminal panicles. It is native to South America from Argentina to Bolivia.

For previous introduction see 42336.

109982. PAROSELA CARTHAGINENSIS (Jacq.) Killip. Fabaceae.

No. 2993. *Barbasco blanco*. Collected January 28, 1935, at Antimano, near Caracas, on a dry hillside. A shrub about 4 feet high, with small pinnate leaves less than 2 inches long and dense spikes of purple, rose, or white flowers. Native to northern South America.

109983. PASSIFLORA LIGULARIS JUSS. Passifloraceae. Sweet granadilla.

No. 3058. *Parche amarilla*. Purchased near Los Teques, February 13, 1935.

For previous introduction and description see 109410.

109971 to 109986—Continued.

109984. *PLUCHEA* sp. Asteraceae.

No. 3066. *Salvia*. Collected on the road between Caracas and Cabo Blanco, February 15, 1935. A shrub 2 to 5 feet high, with aromatic leaves and stems and bright-lavender flowers.

109985. *SCHOENOCALON OFFICINALE* (Schlecht.) A. Gray. Melanthiaceae.

No. 3060. *Cebadilla*. From Caracas, February 15, 1935. Presented by Señor Alamo, Director, Ministerio de Agricultura.

For previous introduction and description see 109870.

109986. *TERAMNUS UNCINATUS* (L.) Swartz. Fabaceae.

No. 3047. Collected on the highway southwest of Antimano, February 15, 1935. A small vine with a fleshy taproot, native to tropical America. It is used as forage in Brazil and in the Virgin Islands.

For previous introduction see 92941.

109987 and 109988. *BACCHARIS PILULARIS* DC. Asteraceae.

From California. Seeds presented by Carl B. Wolf, Rancho Santa Ana Botanic Garden, Anaheim. Received February 7, 1935.

An evergreen shrub 2 to 5 feet high, native to the Pacific coast of the United States, with sessile, obovate leaves less than an inch long and whitish flower heads.

109987. B-226. 109988. B-227.

109989. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

From India. Seeds presented by the Director of Agriculture, North-West Frontier Province, Peshawar, through M. I. Shah, Utah State Agricultural College, Logan, Utah. Received March 15, 1935.

Kulachi melon. Introduced for Department specialists.

109990. *NEPHELIUM MUTABILE* Blume. Sapindaceae. Pulasan.

From Java. Seeds presented by A. M. Cramer, Wonosobo, through H. S. Wolfe, horticulturist in charge, Subtropical Experiment Station, Homestead, Fla. Received March 19, 1935.

A small Malayan tree 30 feet high, with compound leaves and small clusters of red fruits, commonly about the size of walnuts. The juicy flesh (properly the aril) is translucent, whitish, has a sweet, slightly acidulous flavor, and encloses a single large oblong seed.

For previous introduction see 106102.

109991 to 110020.

From northern Africa. Plants and cuttings presented by H. Brayard, Directeur de la Station Expérimentale, Marrakech, Morocco. Received March 23, 1935.

109991 to 110011. *PRUNUS* spp. Amygdalaceae.109991 to 110007. *PRUNUS ARMENIACA* L.109991. *Pêche Précoce*.109992. *Angoumeis*.

109991 to 110020—Continued.

109993. *Bergeron*.109994. *Blanc Rose à Confre*.109995. *Cluster*.109996. *Corot*.109997. *Doctor Mascle*.109998. *Galta Rocha*.109999. *Gros Blanc d'Auvergne*.110000. *Hemskirke*.110001. *Luizet Special*.110002. *Précoce d'Alexandria*.110003. *Précoce du Portugal*.110004. *Re Imberto*.110005. *Saint Ambroise*.110006. *Shiplay's Early*.110007. *Stella*.110008 to 110010. *PRUNUS AVIUM* L. Sweet cherry.110008. *Bigarreau Grosse Bombellaise*.110009. *Bigarreau Marmotte*.110010. *Bigarreau Pelissier*.110011. *PRUNUS* sp.Cherry, *La Plus Précoce de la Marché*.110012 to 110020. *VITIS* spp. Vitaceae.110012. *Abbot*.110013. *Ahmed ould Ali*.110014. *Ain Kelba*.110015. *Assoued Zine*.110016. *Bezoul el kedim*.110017. *Bezoul el Kelba*.110018. *Bou Asserghim*.110019. *Geir*.110020. *Zene Abiot*.110021 to 110051. *JUGLANS* spp. Juglandaceae. Walnut.

From Canada. Seeds purchased from G. H. Corsan, Islington, Ontario. Received March 12, 1935.

A collection of Carpathian walnuts, introduced for Department specialists.

110021 to 110045. *JUGLANS REGIA* L. Persian walnut.

110021. No. 1.

110034. No. 17.

110022. No. 2.

110035. No. 20.

110023. No. 3.

110021 to 110051—Continued.

- 110046 to 110051. JUGLANS spp.
 110046. No. 34. *Manchurian heartnut*.
 110047. No. 8. *Japanese walnut*.
 110048. No. 35. *Faust heartnut*.
 110049. [No data.]
 110050. No. 23. *Globe*.
 110051. No. 23—A. (Long nuts.)

110052 to 110060.

From Mexico. Seeds collected in the State of Yucatan by J. H. Kempton, Bureau of Plant Industry. Received March 15, 1935. Introduced for Department specialists.

110052. GOSSYPIUM sp. Malvaceae. Cotton.

Cultivated cotton, collected between Merida and Pisti, January 29, 1935. The Mayas often grow a few plants for candlewicks.

110053. VIGNA SINENSIS (Turner) Savi. Fabaceae. Cowpea.

- 110054 to 110060. ZEA MAYS L. Poaceae. Corn.

110061 to 110083.

From the Union of Soviet Socialist Republics. Seeds presented by the Botanic Garden, Alma Ata, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received March 11, 1935.

Introduced for Department specialists.

The field numbers are those of the Westover and Enlow series.

110061. AEGILOPS SQUARROSA L. Poaceae.

No. 1223. For previous introduction see 107866.

- 110062 to 110065. AGROPYRON spp. Poaceae. Wheatgrass.

110062. AGROPYRON CRISTATUM (L.) Gaertn. Crested wheatgrass.

No. 1224.

110063. AGROPYRON REPENS (L.) Beauv. Quackgrass.

No. 1225.

110064. AGROPYRON SIBIRICUM (Willd.) Beauv.

No. 1226. For previous introduction see 108847.

110065. AGROPYRON UGAMICUM Drobov.

No. 1227. A tufted perennial grass about 2 feet high, native to Turkistan.

110066. ALOPECURUS PRATENSIS L. Poaceae. Meadow foxtail.

No. 1229.

110067. ALOPECURUS ARUNDINACEUS Poir. Poaceae.

No. 1230.

110068. ARISTIDA PENNATA Trin. Poaceae.

No. 1231. For previous introduction see 108323.

110061 to 110083—Continued.

110069. ARTEMISIA LEUCODES Schrenk. Asteraceae.

No. 1232. A biennial, white-woolly throughout, with erect stems, leaves palmately and finely divided, and white flower heads in axillary clusters. Native to sandy places in central Asia.

110070. ARTEMISIA RUPESTRIS L. Asteraceae.

No. 1233. A perennial herb, native to Siberia, with bipinnatisect leaves and inconspicuous flower heads in racemes.

- 110071 to 110073. ASTRAGALUS spp. Fabaceae.

110071. ASTRAGALUS DENDROIDES Kar. and Kir.

No. 1234. A large erect shrub with oval-lanceolate leaflets and oblong spikes of pale-blue flowers. Native to the mountains of central Asia.

110072. ASTRAGALUS SIEVERSIANUS Pall.

No. 1235. An erect or ascending perennial, with oblong hairy leaflets and axillary clusters of pale-yellow flowers. Native to central Asia.

For previous introduction see 107496.

110073. ASTRAGALUS VULPINUS Willd.

No. 1236. A perennial astragalus native to the desert regions of south-eastern Siberia.

For previous introduction see 61398.

110074. BROMUS INERMIS Leyss. Poaceae. Bromegrass.

No. 1237.

110075. BROMUS JAPONICUS Thunb. Poaceae. Bromegrass.

No. 1238. A biennial upright or ascending grass of wide distribution in Europe and Asia. It is commonly from 1 to 2 feet high.

- 110076 to 110079. ELYMUS spp. Poaceae.

110076. ELYMUS ARALENSIS Regel.

No. 1240. A tall erect perennial grass, native to Siberia.

For previous introduction see 61416.

110077. ELYMUS SIBIRICUS L.

No. 1241.

For previous introduction see 108495.

110078. ELYMUS sp.

No. 1228.

110079. ELYMUS sp.

No. 1239.

110080. LEPIDIUM REPENS Boiss. Brassicaceae.

No. 1242. A stout perennial about a foot high, with oblong, wavy-margined leaves and inconspicuous white flowers. Native to central Asia.

110081. ONOBRYCHIS CHORASSANICA Bunge. Fabaceae.

No. 1243.

For previous introduction see 108936.

110061 to 110083—Continued.

110082. *PEGANUM HARMALA* L. Zygophyllaceae.

No. 1244.

For previous introduction see 109119.

110083. *TRIFOLIUM FRAGIFERUM* L. Fabaceae.

No. 1245.

110084. *SCABIOSA CAUCASICA* Bieb. Dipsacaceae.

From Chile. Seeds presented by Miss Elsie Brown, editor of the Bulletin of the Pan American Union, through J. L. Colom, Chief, division of agricultural cooperation, Pan American Union. Received March 15, 1935.

From Santiago, Chile. Said to be a superior strain of the Caucasian scabiosa.

110085 to 110091. *MALUS SYLVESTRIS* Mill. Malaceae. **Apple.**

From Poland. Scions presented by W. I. Filewicz, Sinoleka Experiment Station, Sosnowe, near Siedlce. Received March 22, 1935.

Introduced for Department specialists.

110085. *Baumann's Reinette*.

For previous introduction see 102132.

110086. *Boshopskie* (Belle de Boskoop).

110087. *Glogierowka*.

110088. *Kosztela*.

110089. *Landsberger Reinette*.

110090. *Malinowe Oberlandskie*.

110091. *Reinette Kolsa* (Cox Orange Pippin).

110092. *PRUNUS SUBHIRTILLA* Miquel. Amygdalaceae. **Higan cherry.**

From Maryland. Scions collected by H. C. Skeels at Takoma Park. Received September 18, 1931. Numbered in March 1937.

Var. *Shidarehigan*. A strain with deep-pink flowers borne in great profusion; tree growing in front of the residence of H. W. Hochbaum, 7529 Blair Road.

For previous introduction see 91465.

110093. *CAREX PHYSODES* Bieb. Cyperaceae.

From the Union of Soviet Socialist Republics. Roots collected in Turkistan by H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received October 11, 1934.

Introduced for Department specialists.

No. 150-B. From the Repetek Sand Desert Station, Turkmenistan, June 1934. A perennial sedge, usually about 6 inches high, with filiform leaves, said to be an excellent forage plant. Native to sandy deserts in Turkistan.

For previous introduction see 108896.

110094 and 110095. *DIOSCOREA* spp. Dioscoreaceae. **Yam.**

From Venezuela. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received March 15, 1935.

110094 and 110095—Continued.

Introduced for Department specialists.

From the market at Valencia, February 24, 1935.

110094. No. 3105. *Name pino*.

110095. No. 3106. *Name criollo*.

110096. *CITRUS* sp. Rutaceae.

From Algeria. Scions presented by J. Brichet, Directeur, Jardin d'Essai du Hamma, Algiers. Received March 29, 1935.

Introduced for Department specialists.

Bedmar Vernia. A late-ripening Spanish orange.

110097. *TEPHROSIA* sp. Fabaceae.

From Africa. Seeds presented by R. Andersen, Ypata Estate, Kitall, Kenya Colony. Received March 21, 1935.

Introduced for Department specialists.

An upright leguminous plant found on rocky slopes.

110098 and 110099.

From India. Seeds purchased from Mrs. P. Kohli, Baramula, Kashmir. Received March 23, 1935.

Introduced for Department specialists.

110098. *IRIS KUMAONENSIS* Wall. Iridaceae.

A dwarf iris of the Pseudevansia section, 2 to 12 inches high, native to the western Himalayas from Kashmir to Kumaon between 9,000 and 12,000 feet altitude. The flaccid linear leaves are 12 to 14 inches long, and the solitary flowers have a perianth tube 2 to 3 inches long. The bright-lilac falls, 1 to 2 inches long, are blotched with darker lilac, and the claw has a beard of yellow-tipped hairs on a white crest. The erect standards are over an inch broad.

For previous introduction see 101782.

110099. *LILIUM POLYPHYLLUM* D. Don. Liliaceae.

A lily with stoloniferous white, pink-tinged bulb, a smooth green stem 4 to 5 feet high, and numerous erect scattered, linear to oblong-lanceolate leaves 2 to 8 inches long. The fragrant nodding flowers, 2 to 12 in a lax umbel or raceme, are pale creamy yellow outside, marbled white spotted and streaked with purple within, and are 2 to 3 inches across. It is native to the western Himalayas at altitudes between 6,000 and 12,000 feet.

For previous introduction see 90981.

110100 to 110151.

From the Union of Soviet Socialist Republics. Seeds presented by the Botanic Garden, Alma Ata. Received March 11, 1935.

Introduced for Department specialists.

110100. *ACONITUM EXCELSUM* Reichb.

For previous introduction and description see 107865.

110101. *ACONITUM NAPELLUS* L. Ranunculaceae.

For previous introduction see 66909.

110100 to 110151—Continued.

110102 to 110105. ALLIUM spp. Liliaceae.

110102. ALLIUM sp.

110103. ALLIUM sp.

110104. ALLIUM sp.

110105. ALLIUM sp.

110106. ANEMONE ALBANA Stev. Ranunculaceae.

A low alpine perennial, native to Asia Minor, with tripinnatifid leaves and nodding yellow campanulate flowers.

110107. ARCHANGELICA SONGORICA Lipsky. Apiaceae.

A stout perennial about 1 foot high, with pinnately dissected leaves and large terminal umbels of small white flowers. Native to high altitudes in central Asia.

110108. ASTER ALPINUS L. Asteraceae.

For previous introduction and description see 107891.

110109 to 110111. ATRAPHAXIS spp. Polygonaceae.

110109. ATRAPHAXIS MUSCHKETOWI Krassn.

A dwarf spreading shrub, about 3 feet high and wide, with narrow-oblong leaves up to 2 inches long and small white flowers in terminal racemes. Native to central Asia.

110110. ATRAPHAXIS PYRIFOLIA Bunge.

A spiny shrub about 1 foot high, with thick, leathery, round leaves about 1 inch wide. Native to central Asia.

110111. ATRAPHAXIS SPINOSA L.

A spiny shrub 1 to 1½ feet high, with small, cordate, prickly leaves and inconspicuous flowers. Native to dry stony places in Asia Minor.

110112. CHAEROPHYLLUM LONGILOBUM (Kar. and Kir.) O. and B. Fedtsch. Apiaceae.

An aromatic herb, native to central Asia, with pinnately dissected foliage and compound umbels of small white flowers.

110113. CODONOPSIS OVATA Benth. Campanulaceae.

For previous introduction and description see 108052.

110114. CRYPTODISCUS CACHROIDES Schrenk. Apiaceae.

A herbaceous perennial with small greenish flowers. Native to Turkistan.

110115. DELPHINIUM sp. Ranunculaceae.

110116. DESCHAMPSIA KOELERIOIDES Regel. Poaceae.

A tufted, hardy perennial grass about 1 foot high. Native to Tien Shan, central Asia, at 8,000 feet altitude.

110117. ECHINOPS ALBICAULIS Kar. and Kir. Asteraceae.

A perennial with thistlelike leaves and pale-blue, one-flowered heads, densely clustered at the ends of the branches. Native to sandy locations of central Asia.

110100 to 110151—Continued.

110118. EPHEDRA EQUISETINA Bunge. Gnetaceae.

An erect or ascending shrub up to 6 feet high, with slender greenish branches and scalelike leaves. Native to China.

110119. EREMOSTACHYS MOLUCCELLOIDES Bunge. Menthaceae.

A hardy perennial mint, over a foot high, with cordate or ovate-oblong leaves and yellowish-white flowers, over an inch long, in whorls. Native to Mongolia and Siberia.

110120. EREMURUS ANISOPTERUS Regel. Liliaceae.

An eremurus about 2 feet high, native to Asia Minor, with small, milky-white flowers in a long raceme and narrow linear leaves.

110121 to 110123. FERULA spp. Apiaceae.

110121. FERULA sp.

110122. FERULA sp.

110123. FERULA sp.

110124. GENTIANA ALGIDA Pall. Gentianaceae.

A perennial alpine gentian with numerous stems 4 to 5 inches high, lanceolate-linear leaves, and numerous white flowers over 2 inches long, with narrow lines of blue spots. Native to central Asia.

110125. GYPSOPHILA TIANSCHANICA M. Popov and B. Schischk. Silenaceae.

A hardy herbaceous perennial, with ascending stems, native to the Tien Shan in central Asia, with straight lanceolate leaves and numerous corymbs of small white flowers.

110126. HEDYSARUM HEDYSAROIDES (L.) Stuntz. Fabaceae.

A hardy herbaceous ornamental perennial, native to the alpine regions of central Europe. It is about a foot high and produces spikes of purple flowers in midsummer.

For previous introduction see 67895.

110127. HEDYSARUM SEMENOWII Regel and Herd. Fabaceae.

An erect hardy herbaceous perennial with purplish flowers. Native to Turkistan.

For previous introduction see 107546.

110128. HIEROCHLOE ODORATA (L.) Beauv. Poaceae.

Sweetgrass.

For previous introduction see 53174.

110129. INULA RHIZOCEPHALA Schrenk. Asteraceae.

A stemless perennial with numerous oblong radical leaves about 3 inches long and 10 to 20 small yellowish flower heads. Native to mountainous regions of central China.

110130 to 110132. IRIS spp. Iridaceae.

110130. IRIS ALBERTI Regel.

For previous introduction and description see 107933.

110100 to 110151—Continued.

110131. IRIS ENSATA Thunb. Russian iris.

A very hardy Chinese form of the Russian iris, found in moist places.

For previous introduction see 107678.

110132. IRIS SONGARICA Schrenk.

A densely tufted Apogon iris about 1 foot high, with narrow-linear, strongly ribbed leaves up to a foot long and two to three lilac-colored flowers over an inch long. Native to central Asia.

110133. ISATIS COSTATA C. A. Mey. Brassicaceae.

An erect bushy annual about 3 feet high, native to northern India, with oblong leaves 3 to 4 inches long and small yellow flowers in a many-branched panicle raceme.

110134. LIBANOTIS SUBSIMPLEX M. Popov. Apiaceae.

A hardy perennial native to the Alatau Mountains, central Asia, with finely divided leaves and umbels of small white flowers.

110135. LINUM sp. Linaceae. Flax.

Received under the specific name "chionophilum," for which a place of publication has not been found.

110136. LINUM HETEROSEPALUM Regel. Linaceae. Flax.

A perennial with erect stems over a foot high, ovate-lanceolate leaves, and corymbs of rather large yellow flowers. Native to Turkistan.

110137. MALCOMIA AFRICANA (Willd.) Ait. Brassicaceae.

A summer-blooming annual about 9 inches high, with lanceolate dentate leaves and racemes of small purple flowers. Native to tropical Africa.

For previous introduction see 107554.

110138. NEOGAYA sp. Apiaceae.

Received under the name "urbis marorum," for which a place of publication has not been found.

110139. NITRARIA SCHOBERI L. Zygophyllaceae.

A hardy, densely-branched shrub of spreading habit, with small bluish-green leaves and small berries which change from light green through red into a violet black. It is native to China, where it grows on strongly alkaline flats.

For previous introduction see 106621.

110140. OXYTROPIS RECOGNITA Bunge. Fabaceae.

A stemless alpine, native to central Asia, with pinnate leaves and racemes of comparatively large buff-colored flowers.

110141. PEDICULARIS DOLICHO RHIZA Schrenk. Scrophulariaceae.

A hardy herbaceous perennial about a foot high, with deeply pinnately cut leaves resembling those of *Achillea millefolium* and terminal spikes of golden-yellow flowers. Native to central Asia.

110142. POLYGONUM SONGARICUM Schrenk. Polygonaceae.

For previous introduction and description see 107981.

110100 to 110151—Continued.

110143. POTENTILLA SIBIRICA Th. Wolf. Rosaceae.

A perennial alpine, native to Siberia, with erect or ascending stems about 1 foot high, pinnatifid leaves, and dense cymes of small yellow flowers; closely related to *Potentilla pennsylvanica*, but not so tall and with smaller foliage.

110144. PRIMULA ALGIDA Adam. Primulaceae.

A perennial primrose, white-mealy or yellow-mealy throughout, with oblong-spatulate leaves and deep rose-violet flowers. It is native to marshy areas in Asia Minor and is closely related to *Primula farinosa*.

For previous introduction see 91992.

110145. PRIMULA NIVALIS Pall. Primulaceae.

A hardy primrose, with glabrous, sometimes farinose, lanceolate or oblong-ovate leaves 3 to 5 inches long, and erect white or purple flowers three-fourths of an inch across, in a dense umbel terminating a stout scape 3 to 10 inches high. A variable species with well-marked geographical forms; native to western and central Asia.

110146. PUCCINELLIA DISTANS (L.) Parl. Poaceae.

An erect or decumbent perennial grass, native to Europe and Asia; naturalized in the United States.

For previous introduction see 64793.

110147. RHEUM SONGARICUM Schrenk. Polygonaceae.

A coarse herbaceous perennial with deeply cordate, reniform leaves. Native to alkaline deserts in central Asia.

110148. RUMEX CONFERTUS Willd. Polygonaceae.

A perennial about 4 feet high, with lanceolate leaves. Native to the mountains of Asia Minor.

110149. RUMEX sp. Polygonaceae.

110150. SEMENOVIA TRANSILIENSIS Regel and Herd. Apiaceae.

A perennial about a foot high, native to central Asia, with pinnately dissected leaves and compound umbels of small white flowers.

110151. SPARTIUM JUNCEUM L. Fabaceae. Spanish broom.

For previous introduction see 51151.

110152 to 110171.

From Manchuria. Seeds collected by the Asiatic Expedition. Received March 20, 1935.

Introduced for Department specialists.

110152. AGROPYRON CRISTATUM (L.) Gaertn. Poaceae. Crested wheatgrass.

No. 8-IV. September 7, 1934. From Arshan-yamen, Barga District. Found in sandy, half-desert soil on the border of a deep valley.

110153. ARUNDINELLA ANOMALA Steud. Poaceae. Grass.

No. 7-IV. September 28, 1934. Collected at Barim station, western line of the Chinese Eastern Railway, in a river valley, and from a stony mountain slope.

110152 to 110171—Continued.

For previous introduction see 90130.

110154 to 110158. *ELYMUS* spp. Poaceae.
Grass.

110154. *ELYMUS DASYSTACHYS* Trin.

No. 18a-IV. September 5, 1934. From sand dunes near the Ganjour Monastery, Barga District. A perennial grass 2 to 3 feet high, with creeping rhizomes. Native to central Asia.

110155 to 110158. *ELYMUS PSEUDO-AGROPYRON* Trin.

A perennial grass with a creeping rhizome and flat leaves.

For previous introduction see 107672.

110155. No. 9-IV. August 7, 1934. From marshy alkaline shore of Lake Khangai-nor, Barga District.

110156. No. 10-IV. September 25, 1934. Collected on a damp saline steppe north of the Manlou station, western line of the Chinese Eastern Railway.

110157. No. 10a-IV. October 1934. Collected on an alkaline steppe in the vicinity of Manlou station, western line of the Chinese Eastern Railway.

110158. No. 10c-IV. October 1934. Collected on an alkaline steppe in the vicinity of Manlou station, western line of the Chinese Eastern Railway.

110159. *LESPEDEZA BICOLOR* Turcz. Fabaceae.

No. 12-IV. October 1, 1934. Collected on the rocky shore of the Tal River, below Barim station, western line of the Chinese Eastern Railway.

For previous introduction see 109823.

110160. *OXYTROPIS MYRIOPHYLLA* (Pall.) DC. Fabaceae.

No. 11-IV. September 9, 1934. Collected near Khandagal, Barga District, on the sunny side of a steep mountain slope in stony half-desert soil on the road to Khalyim-Arshan. A stemless perennial with a large root, pinnate leaves about 8 inches long, and purplish flowers in racemes. Native to the mountains of Siberia.

110161. *SETARIA VIRIDIS* (L.) Beauv. Poaceae.

No. 6-IV. October 24, 1934. Collected on an alkaline steppe northeast of Manlou station, western line of the Chinese Eastern Railway.

For previous introduction see 109828.

110162 to 110166. *STIPA* spp. Poaceae.
Grass.

110162 and 110163. *STIPA BAICALENSIS* Roshev.

A tufted perennial grass up to 2 feet tall, native to the steppes of Siberia.

110162. No. 4-IV. September 28, 1934. Collected in a river valley on the mountain slope near Barim station, western line of the Chinese Eastern Railway.

110163. No. 5-IV. September 2, 1934. From a stony steppe, Tal River Valley near Barim station, west-

110152 to 110171—Continued.

ern line of the Chinese Eastern Railway.

110164 to 110166. *STIPA SIBIRICA* Lam.

From a stony mountain slope of the Tal River Valley, near Barim station, western line of the Chinese Eastern Railway. An erect perennial grass, native to Siberia, up to 4 feet tall with well-developed roots.

For previous introduction see 107703.

110164. No. I-IV and No. Ia-IV. September 28, 1934.

110165. No. 2-IV. July 2, 1934.

110166. No. 3-IV. September 29, 1934.

110167 and 110168. *THERMOPSIS LANCEOLATA* R. Br. Fabaceae.

September 6, 1934. From sand dunes in the neighborhood of the Ganjour Monastery, Barga District. A perennial herb up to 2 feet high, with oblong-lanceolate leaflets and bright-yellow flowers in terminal racemes. Native to Siberia and Alaska where it is found in moist sandy places.

For previous introduction see 107705.

110167. No. 16-IV. 110168. No. 17-IV.

110169 and 110170. *TRIFOLIUM LUPINASTER* L. Fabaceae.

Collected on stony wooded steppes on a mountain slope near Barim station, western line of the Chinese Eastern Railway.

110169. No. 14-IV. September 30, 1934.

110170. No. 15-IV. September 28, 1934.

110171. *VICIA* sp. Fabaceae.

No. 13-IV. September 28, 1934. From stony steppes in the vicinity of Barim station, western line of the Chinese Eastern Railway.

110172 to 110196.

From Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 15, 1935.

Introduced for Department specialists.

110172. *ACHRAS ZAPOTA* L. Sapotaceae.
Sapodilla.

No. 3109. *Nispero*. Collected February 24, 1935, at Valencia. A small tropical American tree with dark-green leathery leaves and roundish fruits about 2 inches in diameter; these have thin skin and pale-brown, soft, juicy, sweet pulp.

For previous introduction see 103804.

110173. *CENTROSEMA PUBESCENS* Benth. (*Bradburya pubescens* (Benth.) Kuntze). Fabaceae.

No. 3078. February 23, 1935. Collected on the highway between Valencia and El Cambul, State of Carabobo.

110174. *BROWNEA GRANDICEPS* Jacq. Caesalpiniaceae.

No. 3110. *Rosa de monte*. Collected February 26, 1935, at Valencia. A handsome evergreen tropical American tree about 30 feet in height, with attractive pinnate foliage and bright-red flowers in large dense capitate spikes borne at the ends of the branches.

For previous introduction see 98808.

110172 to 110196—Continued.

110175. *CALOPOGONIUM CAERULEUM* (Benth.) Hemsl. Fabaceae.

No. 3077. *Semiruco*. Collected February 23, 1935, along the highway between Valencia and El Cambul, State of Carabobo.

For previous introduction and description see 108657.

110176. *CALOTROPIS GIGANTEA* (L.) R. Br. Asclepiadaceae.

No. 3068. Collected February 16, 1935, on the road between Caracas and Cabo Blanco.

110177. *CANAVALIA* sp. Fabaceae.

No. 3118. Collected February 26, 1935, between Valencia and Guataporo, State of Carabobo.

110178. *CLITORIA TERNATEA* L. Fabaceae.

No. 3076. *Zapitico de reina*. A vine collected on the highway between Valencia and El Cambul, State of Carabobo, February 23, 1935.

110179. *TEPHROSIA CANDIDA* DC. (*Cracca candida* (DC.) Kuntze). Fabaceae.

No. 3111. *Barbasco*. Collected on the farm of Sr. L. Stelling at Valencia, February 26, 1935.

For previous introduction see 107461.

110180 to 110183. Collected on the highway between Valencia and El Cambul, State of Carabobo, February 23, 1935.

110180. *TEPHROSIA SENNA* H. B. K. (*Cracca senna* (H. B. K.) Kuntze). Fabaceae.

No. 3088. A shrub with membranous pinnate leaves and violet flowers in racemes 5 or 6 inches long. Native to Colombia.

110181. *CROTALARIA INCANA* L. Fabaceae.

No. 3080. *Espadilla*.

For previous introduction see 106572.

110182. *CROTALARIA STIPULARIA* Desv. Fabaceae.

No. 3096. An annual about a foot high, native to the West Indies.

110183. *CROTON* sp. Euphorbiaceae.

No. 3102.

110184 and 110185. Collected at the market at Valencia, February 24, 1935.

110184. *CUCUMIS ANGURIA* L. Cucurbitaceae. West Indian gherkin.

No. 3107. *Pepino de monte*. A cultivated vegetable used as sweets or desserts, in salads, and in soups.

For previous introduction see 51222.

110185. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

No. 3108.

For previous introduction see 109989.

110172 to 110196—Continued.

110186 to 110191. Collected along the highway between Valencia and El Cambul, State of Carabobo, February 23 to 25, 1935.

110186. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 3079. *Cunde'amor*.

110187. *DATURA METEL FASTUOSA* (L.) Safford. Solanaceae.

No. 3099. *Nongué morada*.

110188. *DESMANTHUS VIRGATUS* (L.) Willd. Mimosaceae.

No. 3081. *Sensitiva*.

For previous introduction see 109932.

110189. *EUPATORIUM ODORATUM* L. Asteraceae.

No. 3083. *Cruceta*.

110190. *EUPATORIUM* sp. Asteraceae.

No. 3100. *Cruceta moranda*.

110191. *HURA CREPITANS* L. Euphorbiaceae.

No. 3101. *Jabillo*.

110192. *MELINIS MINUTIFLORA* Beauv. Poaceae. Molasses grass.

No. 3112. *Yaragua*, a cultivated forage grass collected on the farm of Sr. E. Stelling at Valencia, February 26, 1935.

For previous introduction see 105780.

110193 and 110194. Collected on the highway between Valencia and El Cambul, February 23 and 25, 1935.

110193. *SAPINDUS SAPONARIA* L. Sapindaceae. Southern soapberry.

No. 3087. *Para para*. A tree 50 feet high.

For previous introduction see 109869.

110194. *SCOPARIA DULCIS* L. Scrophulariaceae.

No. 3086. *Escobilla*. A glabrous annual 1 to 3 feet high.

110195. *STIZOLOBIUM PRURITUM* (Wight) Piper and Tracy. Fabaceae.

No. 3113. *Pica pica*. Collected between Valencia and Guataporo, February 26, 1935. A vine with curved pods covered with brown stinging hairs.

For previous introduction see 89016.

110196. *XYLOPIA AROMATICA* (Lam.) Baill. Annonaceae.

No. 3089. *Fruta de burra*. Collected along the highway between Valencia and El Cambul, State of Carabobo, February 23, 1935. A low tree about 20 feet high. Native to the Guianas.

110197. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

From Canada. Scions presented by Prof. M. B. Davis, Central Experiment Station, Ottawa. Received March 30, 1935.

Lawfam. Introduced for Department specialists.

Introductory statement.....	1
Inventory.....	3
Index of common and scientific names.....	57

INTRODUCTORY STATEMENT

This inventory, No. 123, records the plant material (Nos. 110198 to 111857) received by the Division of Plant Exploration and Introduction during the period from April 1 to June 30, 1935.

As a direct result of the agricultural explorations carried on in central Asia by H. L. Westover and C. R. Enlow, of the Bureau of Plant Industry, the Department received nearly 500 lots of seeds from the Institute of Plant Industry, Leningrad, Union of Soviet Socialist Republics. One particular shipment (Nos. 111477-111585) consisted almost wholly of distinct local strains of forage grasses; another shipment (Nos. 111605-111685) was made up entirely of local strains of alfalfa and other species of *Medicago*. This material is intended primarily for the use of the specialists of the Soil Conservation Service of this Department, and will be tested in the colder and drier sections of the West.

During the summer of 1935, W. A. Archer was still collecting in northern South America and, during the period covered by this inventory, nearly 200 lots of seeds were sent in by him, mostly from Colombia. As before, leguminous plants occupied a conspicuous place in these collections, while the markets of small villages and towns yielded seeds of numerous local strains of vegetables and fruits that will be tested in the vegetable-breeding program for our Southern States.

Eighty-three lots of grasses (Nos. 111249-111331), including several not before introduced into the United States, were presented by the Jardin Botanique de l'Université de Cluj, Rumania. Grasses also constituted the greater part of 37 lots of seeds from Australia (Nos. 110518-110555), presented by the Division of Plant Industry, Canberra.

The introduction of nearly 50 species and varieties of *Allium* from widely scattered sources throughout the globe is a result of an attempt to assemble and grow all available members of this hitherto much-neglected genus. These will, of course, be of value to vegetable breeders interested in the close relatives of those species commonly grown for food, but their introduction will also bring about a more definite knowledge concerning the ornamental value of many little-known species.

Several apparently new species of *Prunus* and *Solanum* are recorded in a shipment of 58 lots of seeds presented by A. H. Lee, Kulu, Punjab, India (Nos. 111764-111821), along with a considerable number of new perennial and woody plants of ornamental value, mostly from the temperate highlands of northern India. Two other shipments of new or rare, mostly woody, plants from western China also should be noted: One of 12 lots (Nos. 111737-111748), presented by Lord Aberconway, Tal-y-Cafn, North Wales; the other of 53 lots of seeds (Nos. 111349 to 111401) from H. H. Chung, National Wu-Han University, Hupeh, China.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., January 18, 1939.

INVENTORY¹

110198 to 110212.

From Italy. Plants purchased from Fratelli Sgaravatti, Saonara (Padova). Received April 2, 1935.

Introduced for Department specialists.

110198 to 110202. *AMYGDALUS PERSICA* L. Amygdalaceae. Peach.

110198. *Agosticella*.

110199. *Clara Mayer*.

110200. *Lugliatica*.

110201. *Paviagiatta*.

110202. *Perla di Zolia*.

110203. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

Renetta di Berk.

110204 and 110205. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

110204. *Bianco de Carpentras*.

110205. *Della val Venosta*.

110206 to 110212. *PYRUS COMMUNIS* L. Malaceae. Common pear.

110206. *Bergamotta d'estate*.

110207. *Butirra a sapore di mandorla*.

110208. *Butirra Liegel*.

110209. *Conte di Parigi*.

110210. *Direttoro Alphand*.

110211. *Moscato S. Pietro*.

110212. *Soldato Agricoltore*.

110213 to 110216. *ERIOBOTRYA JAPONICA* (Thunb.) Lindl. Malaceae. Loquat.

From Syria. Scions presented by Mahmud Shurwaf, Beirut. Received April 2, 1935.

Introduced for Department specialists.

For previous introduction see 104381.

110213. *Ahmar*. 110215. *Khoudrie*.

110214. *Boidee*. 110216. *Mawie*.

110217 to 110221. *FESTUCA* spp. Poaceae. Fescue.

From England. Seeds presented by Sutton & Sons Ltd., Reading. Received March 26, 1935.

Introduced for Department specialists.

110217. *FESTUCA OVINA DURUSCULA* (L.) Koch. Hard fescue.

A grass which does well on sterile or stony soil.

For previous introduction see 55834.

110218. *FESTUCA CAPILLATA* Lam. Hair fescue.

For previous introduction see 109897.

110219. *FESTUCA RUBRA COMMUTATA* Gaud. Chewings fescue.

A perennial grass with loosely tufted culms, originally from New Zealand.

For previous introduction see 73392.

110220. *FESTUCA RUBRA GENUINA* Gren. and Godr. Creeping red fescue.

A loosely tufted, perennial grass over a foot high, native to central Europe.

110221. *FESTUCA RUBRA* L. Red fescue.

A glaucescent form of red fescue.

For previous introduction see 109899.

110222. *ABRUS PRECATORIUS* L. Fabaceae. Rosary-pea.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received March 27, 1935. Numbered in April 1935.

Var. *Alba*. A white-flowered form of the well-known rosary-pea.

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identifications, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

110223. ZEPHYRANTHES sp. *Amaryllidaceae.*

From Trinidad, British West Indies. Bulbs presented by Dr. S. C. Harland, Cotton Research Station. Received April 5, 1935.

A pink-flowered species, collected in Colombia.

110224 and 110225.

From Scotland. Seeds presented by the Royal Botanic Garden, Edinburgh. Received February 25, 1930. Numbered in April 1935.

110225. ALLIUM NUTANSL. *Liliaceae.*

For previous introduction see 104629.

110225. ALLIUM NUTANS L. *Liliaceae.*

Onion.

110226. ALLIUM TANGUTICUM Regel. *Liliaceae.* *Onion.*

From England. Seeds presented by the Royal Botanic Garden, Kew. Received March 1, 1935. Numbered in April 1935.

For previous introduction see 78997.

110227. ALLIUM CAERULEUM Pall. *Liliaceae.* *Onion.*

From the Netherlands. Bulbs purchased from C. G. Van Tubergen, Ltd., Zwanenburg Nurseries, Haarlem. Received November 1, 1930. Numbered in April 1935.

A blue-flowered onion with slender grassy leaves and 14-inch stalks bearing close heads of small deep-blue flowers.

For previous introduction see 106747.

110228 to 110245.

From Africa. Seeds presented by J. B. H. Lejeune, Director, Experiment Station of Kisozi, Kisozi, Ruanda-Urundi. Received March 21, 1935. Numbered in April 1935.

110228 to 110233. PHASEOLUS VULGARIS L. *Fabaceae.* *Common bean.*

A collection of beans from the territory of Urundi.

110228. A white bean.

110229. A white bean veined with violet.

110230. A white bean veined with black.

110231. A brown bean.

110232. A black bean.

110233. A pink bean veined with brown.

110234 and 110235. RICINUS COMMUNIS L. *Euphorbiaceae.* *Castor-bean.*

Collected in the territory of Urundi.

110234. The common type.

110235. A form with larger seeds.

110236 to 110245. SORGHUM VULGARE Pers. *Poaceae.* *Sorghum.*

Sorghums from the territory of Ruanda.

110236. *Igihori.*

110237. *Nyagachara.*

110238. *Mugabo.*

110239. *Amauenzi.*

110240. *Urukina.*

110241. *Nyirogikori.*

110242. *Amagunu.*

110228 to 110245—Continued.

110243. *Amagunu B.*

110244. *Ruyonge.*

110245. *Rugori.*

110246 to 110253. SORGHUM VULGARE Pers. *Poaceae.* *Sorghum.*

From India. Seeds presented by the Agricultural Research Institute, Coimbatore, South India. Received March 25, 1935. Numbered in April 1935.

110246. Pearly white seed.

110247. Chalky or milky-white seed.

110248. Brown seed.

110249. Red seed.

110250. Yellow seed without brown tint.

110251. White seed with yellow base.

110252. Yellow seed with brown tint.

110253. White seed with red base.

110254 to 110260. AVENA SATIVA L. *Poaceae.* *Oats.*

From Italy. Seeds presented by Professor Todaro, Istituto Sperimentale di Cerealicoltura, Bologna. Received March 25, 1935. Numbered in April 1935.

110254. *Bruna delle Alpi.* No. 227.

110255. *Crema.* No. 226.

110256. *Di Lacomia.* No. 224.

110257. *Nera di Tunisia.* No. 221. A very early-maturing black oat.

110258. *Romana primaveraile.* No. 9.

110259. *Rousse.* No. 220.

110260. *Soldanelle primaveraile.* No. 232.

110261 and 110262.

From British Guiana. Seeds presented by the Director of Agriculture, Georgetown, at the request of W. A. Archer, Bureau of Plant Industry. Received March 26, 1935. Numbered in April 1935.

Introduced for Department specialists.

110261. *ALEXA* sp. *Fabaceae.*

Hairaballi.

110262. *STRYCHNOS NUX-VOMICA L.* *Loganiaceae.*

For previous introduction see 7210.

110263 and 110264.

From England. Plants presented by G. T. Spinks, University of Bristol Research Station, Long Ashton, Bristol. Received April 4, 1935.

Introduced for Department specialists.

110263. *FRAGARIA* sp. *Rosaceae.* *Strawberry.*

Royal Sovereign.

110264. *RUBUS FRUTICOSUS L.* *Rosaceae.* *Blackberry.*

Ashton Cross.

110265 and 110266.

From the Union of South Africa. Seeds presented by E. G. Bryant, Prieska. Received March 26, 1935.

Introduced for Department specialists.

110265 and 110266—Continued.

110265. *ENNEAPOGON BRACHYSTACHYUS* (Jaub. and Spach) Stapf. Poaceae. Grass.

A perennial grass, often cespitose, native to Arabia and northern Africa, with genic lately ascending, slender stems 2 to 6 inches long.

110266. *PENNISETUM CILIARE* (L.) Link. Poaceae. Grass.

A perennial grass with ascending stems up to 2 feet long. Native to southern Africa.

For previous introduction see 75345.

110267 to 110269. *AMYGDALUS PERSICA* L. Amygdalaceae. Peach.

From Brazil. Seeds presented by C. A. Kurg, Chefe, Departamento Genetica, Instituto Argonomico de São Paulo. Received March 29, 1935. Numbered in April 1935.

Local varieties from Campinas, Minas Geraes, originally selected and propagated from trees naturalized in Brazil. Introduced for Department specialists.

110267. *Abobora*. 110269. *Branca*.

110268. *Amarella*.

110270. *LAWSONIA INERMIS* L. Lythraceae. Henna.

From Florida. Seeds presented by Hamilton P. Traub, Horticultural Field Laboratory, Bureau of Plant Industry, Orlando. Received March 23, 1935. Numbered in April, 1935.

The henna bush of the Orient; the foliage contains an orange dye. It is a good hedge plant, comparable to *Dodonaea viscosa*.

For previous introduction see 97722.

110271 to 110273.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received March 15, 1935. Numbered in April 1935.

110271. *BOMAREA* sp. Amaryllidaceae.

Collected on the lower slopes of the volcano of Pichincho, Province of Pichincho, December 29, 1934, between 9,000 and 12,000 feet altitude. A climbing shrub about 6 feet high; the flowers are crimson without and orange, flecked with black on the inside. The shrub is quite common in this region and is seen also in the valleys of Quito south of Chilo.

For previous introduction see 108820.

110272. *CEDRELA ODORATA* L. Meliaceae. Cigarbox-cedar.

From Quito, January 1934. *West Indian* or *Spanish* cedar. The soft fragrant wood is easily worked and is in great demand for cigar boxes. The tree is also used for shade on coffee plantations.

For previous introduction see 104253.

110273. *PASSIFLORA LIGULARIS* Juss. Passifloraceae. Sweet granadilla.

From the market in the Valle de Chillo, January 1935.

For previous introduction see 109983.

110274. (Undetermined.)

From Cochinchina. Seeds presented by M. Poilane, Arboretum de Erang Bom, Erang Bom. Received August 21, 1934. Numbered in April 1935.

110275 to 110278. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

From Germany. Tubers presented by Dr. A. Schlumberger, Horticultural Institute, Berlin-Dahlem. Received April 8, 1935.

A collection of scab-resistant potatoes, introduced for Department specialists.

110275. *Aal*. 110277. *Rheingold*.

110276. *Ostragis*. 110278. *Treff As*.

110279 to 110282. *FESTUCA RUBRA COMUTATA* Gaud. Poaceae. Chewings fescue.

From New Zealand. Seeds presented by A. S. Paterson & Co., Ltd., Dunedin. Received April 2, 1935.

Introduced for Department specialists.

110279. *Leg*. 110281. *Pol*.

110280. *Cun*. 110282. *M. J*.

110283 and 110284. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

From Michigan. Plants presented by Stanley Johnson, Superintendent, Horticultural Experiment Station, South Haven. Received April 8, 1935.

Introduced for Department specialists.

110283. *Isabella*. 110284. *Phillips*.

110285 to 110301.

From China. Seeds collected by Prof. Ira J. Condit, University of California, College of Agriculture, Los Angeles. Received March 28, 1935. Numbered in April 1935.

110285. *ACANTHOPANAX TRIFOLIATUM* (L.) C. Schneid. Araliaceae.

From Swatow, Kwangtung. A hardy spiny climbing shrub, native to western China, with slender-stemmed, three-parted, light-green leaves and compound terminal umbels of small greenish flowers followed by small black berries.

For previous introduction see 63330.

110286. *ARGYREIA OBTUSIFOLIA* Lour. Convolvulaceae.

From Canton district, Kwangtung. A woody unarmed climber, native to southern Indo-China, with ovate, obtuse leaves and panicles of showy, white flowers followed by bright-red fruits.

110287. *BISCHOPIA TRIFOLIATA* (Roxb.) Hook. Euphorbiaceae.

From Swatow, Kwangtung. A handsome tropical tree, native to southeastern Asia, with bronze-green, trifoliate leaves; suitable for street planting in subtropical regions.

For previous introduction see 67677.

110288. *HIBISCUS TILIACEUS* L. Malvaceae. Linden hibiscus.

From Swatow, Kwangtung. A tall shrub or small tree up to 30 feet high, widely cultivated in the Tropics. The broadly cordate leaves are hoary beneath, and the yellow flowers are 2 to 3 inches long.

For previous introduction see 98781.

110285 to 110301—Continued.

110289. *ILEX PUBESCENS* Hook. and Arn. Aquifoliaceae.

From Chinchow, Kwangtung, on the North River at 1,000 feet altitude, November 1934. An evergreen shrub or small tree native to southeastern China, with densely pubescent, slender branches, entire acute ovate-oblong leaves about 3 inches long, and axillary umbels of small lilac-colored, rarely white, flowers followed by small red berries.

110290. *PSYCHOTRIA SERPENS* L. Rubiaceae.

From Swatow, Kwangtung, January 19, 1935. A woody trailer with stems 2 to 6 feet long, opposite, ovate-acute succulent leaves, and terminal corymbs of small inconspicuous flowers. Native to the East Indies.

110291. *RANDIA SINENSIS* Roem. and Schult. Rubiaceae.

From near Lingnan University, Canton, November 23, 1934. A spiny sarub about 5 feet high, native to southern China, with simple lanceolate leaves and terminal racemes of small white flowers followed by spherical fruits up to an inch in diameter.

110292 to 110294. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

A collection of Manchurian radishes presented by Dr. S. Kumazawa, Director of the Vegetable Breeding Station, Taihoku, Taiwan, January 25, 1935.

110292. A round red radish.

110293. A radish with red flesh and green skin.

110294. Green skin variety.

110295. *RHUS* sp. Anacardiaceae. Sumac.

From White Cloud Mountain at 1,500 feet altitude, near Canton, December 16, 1934. A subtropical shrub with beautiful autumn-colored foliage.

110296. *ROSA CYMOSA* Tratt. Rosaceae. Rose.

From the Baptist Mission Compound, Swatow, Kwangtung, January 19, 1935. A tall bushy climber with clusters of small, single, white flowers and dull-red hips.

For previous introduction see 32949.

110297. *SMILAX RIPARIA* A. DC. Smilacaceae. Greenbrier.

From near Lingnan University, Canton, December 20, 1934. An unarmed herbaceous climber with umbels of red berries. Native to southeastern China.

110298. *VIBURNUM LUZONICUM FORMOSANUM* (Hance) Rehd. Caprifoliaceae.

From a hillside near Taihoku, Taiwan, January 24, 1935. A slender-branched shrub with ovate, membranous, sinuate-dentate leaves, terminal corymbs of fragrant white flowers, and ovoid red fruits. Native to Taiwan.

110299. *VIBURNUM ODORATISSIMUM* Ker. Caprifoliaceae. Sweet viburnum.

From the Baptist Mission Compound, Swatow, Kwangtung, November 12, 1934. An evergreen shrub or small tree with shining leathery leaves up to 8 inches long. The fragrant white flowers are pro-

110285 to 110301—Continued.

duced in large broad panicles and are followed by red fruits which turn black as they ripen.

For previous introduction see 66321.

110300. *VANIERIA* sp. Moraceae.

From near Lingnan University, Canton, November 27, 1934. Received under the name "rectispina," for which a place of publication has not been found. The vanierias are woody, spiny plants, native to southeastern Asia, closely related to the cudranias. The inconspicuous flowers are followed by fleshy subglobose fruits that resemble mulberries.

110301. (Undetermined.)

From near the Lingnan University, Canton, January 9, 1935. Received as *Eurya chinensis*, but the seeds are not of that genus.

110302 to 110307.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received March 21, 1935. Numbered in April 1935.

The field numbers are those of the Westover-Enlow series. Introduced for Department specialists.

110302. *AGROPYRON DESERTORUM* (Fisch.) Schult. Poaceae. Wheatgrass.

No. 1346. From the Lower Volga region.

110303. *AGROPYRON STRIGOSUM* (Bieb.) Boiss. Poaceae. Wheatgrass.

No. 1347. For previous introduction see 101140.

110304. *ATRIPLEX TATARICA* L. Chenopodiaceae. Saltbush.

No. 1351. A bushy annual up to 3 feet tall. Native to coastal deserts in Asia Minor.

For previous introduction see 109421.

110305. *CAREX STENOPHYLLA* Wahlenb. Cyperaceae.

No. 1349. A perennial grasslike herb with triangular stems from 2 to 10 inches high. Native to dry grounds in northern Eurasia.

110306. *KOCHIA PROSTRATA* (L.) Schrad. Chenopodiaceae.

No. 1350. A more or less prostrate, shrubby perennial with linear leaves. Native to Asia Minor.

110307. *POA TATARICA* Fisch. Poaceae. Bluegrass.

No. 1348. A tall tufted perennial grass, native to dry regions of southeastern Europe and Asia Minor.

110308 and 110309.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received March 15, 1935. Numbered in April 1935.

110308. *BEGONIA* sp. Begoniaceae.

No. 6861-a. *Acangogarachí*. From Napo-Pastaza Province, February 7, 1935, at 1,000 feet altitude, in dense forest. A climbing form 15 feet high with red flowers.

110308 and 110309—Continued.

110309. *TEPHROSIA TOXICARIA* (Sw.) Pers.
Fabaceae.

No. 6836-a. *Barbasco chico*. From Napo-Pastaza Province, February 5, 1935, near Payo in an open field, at 1,100 feet altitude. A plant about 5 feet high with whitish flowers.

110310. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

From Idaho. Scions presented by Ed. L. Dailey, Priest River. Received April 11, 1935.

A seedling apple, introduced for Department specialists.

110311. *PHYTELEPHAS MACROCARPA* Ruiz and Pav. Phoenicaceae. Ivory-nut palm.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received March 15, 1935.

No. 6905-a. *Chilimoyo*. From Napo-Pastaza Province near Canchos in dense forest. A tall tropical-American palm with a thick rough trunk and foliage resembling the coconut palm. The large bony fruits are commonly used for making buttons.

For previous introduction see 93759.

110312 to 110315. *EREMURUS* spp. Liliaceae. Desertcandle.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received April 5, 1935.

Introduced for Department specialists.

The field numbers are those of the Westover and Enlow series.

110312. *EREMURUS AURANTIACUS* Baker.

No. 1352. A perennial herb over a foot high, native to Afghanistan, with small yellow flowers in a dense raceme 6 inches long.

110313. *EREMURUS ROBUSTUS* Regel. Giant desertcandle.

No. 1353. A tall hardy herbaceous perennial with pale-pink flowers on a stalk 5 to 8 feet high. Native to Turkistan.

For previous introduction see 107528.

110314. *EREMURUS TAURICUS* Stev.

No. 1354. A large xerophytic perennial with a rosette of broadly linear acute leaves a foot or more long and white flowers in a simple dense raceme over a foot long on a stout scape as long as the leaves. It is native to the mountains of Turkey and is closely related to the yellow-flowered *Eremurus spectabilis*.

For previous introduction see 100638.

110315. *EREMURUS* sp.

No. 1355. From central Asia.

110316 to 110324. *CUCURBITA* spp. Cucurbitaceae.

From Czechoslovakia. Seeds purchased from A. Spaldak, Experimental Arboretum, Olomouc. Received April 5, 1935.

110316 to 110320. *CUCURBITA MAXIMA* Duchesne. Squash.

110316 to 110324—Continued.

110316. Round green.

110317. Round yellow.

110318. No. 1411.

110319. No. 1407.

110320. Received as *Cucurbita pepo* × *metlopepo*.

110321 to 110324. *CUCURBITA PEPO* L. Pumpkin.

110321. Long, green, pear-shaped.

110322. Yellow, egg-shaped.

110323. Yellow.

110324. No. 1419.

110325 to 110327.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 8, 1935.

110325. *COMBRETUM GRANDIFLORUM* Don. Combretaceae.

An ornamental climbing shrub producing long flowering branches of brilliant red flowers in closely packed spikes. It is native to upper Guinea and the Congo region, in tropical Africa, and is adapted to hot muggy summers and very dry winters.

For previous introduction see 72993.

110326. *ELAEODENDRON* sp. Celastraceae.

Seeds originally from the Department of Agriculture, Mauritius.

110327. *TERMINALIA SUPERBA* Engl. and Diels. Combretaceae.

A large handsome tree, 60 to 120 feet high, with obovate-oblong leaves 4 to 6 inches long and small whitish flowers in spikes as long as the leaves. Native to tropical Africa.

110328 to 110331. *NICOTIANA* spp. Solanaceae. Tobacco.

From Iraq. Seeds presented by M. S. Radi, Director of Agriculture, Baghdad. Received April 10, 1935.

A collection of tobaccos from Iraq and the Near East, introduced for Department specialists.

110328. *NICOTIANA RUSTICA* L.110329 to 110331. *NICOTIANA TABACUM* L.110332. *JUGLANS NIGRA* L. Juglandaceae. Black walnut.

From Canada. Scions presented by Dane Learn, Aylmer, Ontario. Received April 18, 1935.

Introduced for Department specialists.

Learn.

110333. *FRAGARIA* sp. Rosaceae. Strawberry.

From England. Plants presented by the East Malling Research Station, East Malling, Kent. Received April 18, 1935.

Introduced for Department specialists.

Royal Sovereign.

110334 to 110338.

From England. Plants presented by Sir Arthur W. Hill, Director, Royal Botanic Gardens, Kew, Surrey. Received April 19, 1935.

110334. ARUNDINARIA ANCEPS Mitf. Poaceae. **Bamboo.**

Because of the uncertainty of its origin, this arundinaria was named anceps. It is now believed to be native to northern India. The culms are round and slender and are reported to grow 10 to 15 feet high in England. On small plants there are two or three branches at each node, with rather long branchlets having 8 to 10 linear-lanceolate leaves. The leaves are light green, over 3 inches long and three-eighths of an inch wide. The tessellation (cross venation) is minute and unusually regular.

For previous introduction see 89699.

110335. CHIMONOBAMBUSA FALCATA (Nees) Nakai. Poaceae. **Bamboo.**

A slender clump bamboo growing to a height of 20 feet, but not exceeding half an inch in diameter, having the young stems covered with a bluish-white, waxy coating soon turning yellowish green. The light-green, striate-veined leaves are 4 to 6 inches long by one-third of an inch wide, with downy sheaths. The species is not very hardy, being native to the lower slopes of the Himalayas in north-western India.

For previous introduction see 45902.

110336. SINARUNDINARIA NITIDA (Mitf.) Nakai. Poaceae. **Bamboo.**

A bamboo, native to central China, which becomes 15 feet tall in England. The light-green leaves, four to six on a branch, are over 2 inches long by three-eighths of an inch wide and have three pairs of prominent secondary veins and six intermediate veins. The tessellation is close and regular and the culm sheaths are rather persistent.

For previous introduction see 89704.

110337. THANNOCALAMUS SPATHIFLORUS (Trin.) Munro. Poaceae. **Bamboo.**

A running bamboo, native to the north-western Himalayas, said to grow 20 to 25 feet high. The thin delicate leaves, three to six on a branch, are up to 3 inches long by seven-sixteenths of an inch wide. The midrib and secondary veins are inconspicuous. There are three pairs of the latter and five to seven intermediate veins between. The tessellation is rather close and regular. In its native habitat the species is said to occur as undergrowth in coniferous forests, and it is inferred that it will prefer partial shade.

For previous introduction see 89706.

110338. PSEUDOSASA DISTICHA (Mitf.) Nakai.

A dwarf bamboo of running habit growing 3 to 5 feet high, with rather narrow leaves 2 to 4 inches long, in pronouncedly distichous arrangement.

For previous introduction see 101174.

110339. ALLIUM CEPA L. Liliaceae. **Onion.**

From Germany. Seeds presented by Rudolph Neumüller, Frankenthal, Palz. Received April 15, 1935.

Gochsheim, a pear-shaped onion; introduced for Department specialists.

110340 to 110349. CUCURBITA spp. Cucurbitaceae.

From Yugoslavia. Seeds presented by Ive Volarić, Stenjevec, Croatia. Received April 20, 1935.

Introduced for Department specialists.

110340 to 110343. CUCURBITA MAXIMA Duchesne. **Squash.**

These varieties are used baked for food.

110340. *Misirace.*110341. *Stambolka.*110342. *Velike bele za peć.* (A large variety.)110343. *Stambolka* of Belentija.110344 to 110349. CUCURBITA PEPO L. **Pumpkin.**110344. *Poliske I.*110345. *Poliske II.*110346. *Riberke za kuhat*, for home use.

110347 and 110348. For home use; also fed to hogs.

110347. No. 10. 110348. No. 11.

110349. No. 12. Fed to hogs.

110350 to 110449.

From the Union of Soviet Socialist Republics. Seeds presented by the Department of New Cultures, Institute of Plant Industry, Leningrad, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received March 20, 1935. Numbered in April 1935.

Introduced for Department specialists; the field numbers are those of the Westover and Enlow series.

110350 to 110352. ALOPECURUS PRATENSIS L. Poaceae. **Meadow foxtail.**

110350. No. 1246. From Armenia.

110351. No. 1247. From Georgia, Transcaucasia.

110352. No. 1248. From Georgia, Transcaucasia.

110353. ARRHENATHERUM ELATIUS (L.) Beauv. Poaceae. **Tall oatgrass.**

No. 1255. From Azerbaijan.

For previous introduction see 89811.

110354 to 110357. ASTRAGALUS spp. Fabaceae. **Milkvetch.**

110354. No. 1249. From Armenia.

110355. No. 1250. From Armenia.

110356. No. 1251. From Armenia.

110357. No. 1252. From Georgia, Transcaucasia.

110358. BECKMANNIA ERUCAEFORMIS (L.) Host. Poaceae. **Sloughgrass.**

No. 1256. From Armenia.

110359. BRACHYPODIUM PINNATUM (L.) Beauv. Poaceae. **Grass.**

No. 1258. From Georgia, Transcaucasia.

110360. BROMUS JAPONICUS Taunb. Poaceae. **Bromegrass.**

No. 1259. From Georgia, Transcaucasia.

110350 to 110449—Continued.

110361. *BROMUS* sp. Poaceae.
Brome-grass.
No. 1257. From Karaklis, Armenia.
- 110362 to 110376. *DACTYLIS GLOMERATA* L. Orchard grass.
Poaceae.
110362. No. 1260. From Georgia, Transcaucasia.
110363. No. 1261. From Armenia.
110364. No. 1262. From Armenia.
110365. No. 1263. From Georgia, Transcaucasia.
110366. No. 1264. From Armenia.
110367. No. 1265. From Armenia.
110368. No. 1266. From Armenia.
110369. No. 1267. From Georgia, Transcaucasia.
110370. No. 1268. From Georgia, Transcaucasia.
110371. No. 1269. From near Tiflis, Georgia, Transcaucasia.
110372. No. 1270. From Armenia.
110373. No. 1271. From Daghestan.
110374. No. 1272. From Georgia, Transcaucasia.
110375. No. 1273. From Georgia, Transcaucasia.
110376. No. 1274. From Armenia.
110377. *FESTUCA OVINA* L. Poaceae.
Sheep fescue.
No. 1275. From Armenia.
110378. *FESTUCA RUBRA* L. Poaceae.
Red fescue.
No. 1276. From Armenia.
- 110379 to 110384. *GALEGA* spp. Fabaceae
Goatsrue.
110379. *GALEGA ORIENTALIS* Lam.
No. 1281. From Georgia, Transcaucasia.
For previous introduction see 108629.
110380. *GALEGA* sp.
No. 1253. From Georgia, Transcaucasia.
110381. *GALEGA* sp.
No. 1277. From Armenia.
110382. *GALEGA* sp.
No. 1278. From Armenia.
110383. *GALEGA* sp.
No. 1279. From Georgia, Transcaucasia.
110384. *GALEGA* sp.
No. 1280. From Georgia, Transcaucasia.
- 110385 to 110387. *KOELERIA* spp. Poaceae.
Grass.
110385. *KOELERIA CRISTATA* (L.) Pers.
No. 1284. From Georgia, Transcaucasia.
- 110386 and 110387. *KOELERIA HIRSUTA* Gand.

110350 to 110449—Continued.

- From Armenia. A slender perennial grass with upright, densely tufted culms up to 2 feet high. Native to central Europe.
110386. No. 1282. 110387. No. 1285.
110388. *LATHYRUS PRATENSIS* L. Fabaceae.
Yellow vetchling.
No. 1286. From Georgia, Transcaucasia.
110389. *MELICA TRANSILVANICA* Schur. Poaceae.
No. 1287. From Karaklis, Armenia. A perennial grass up to 3 feet high, closely related to *Melica ciliata*. Native to central Europe.
- 110390 to 110392. *MELILOTUS OFFICINALIS* (L.) Lam. Fabaceae. Sweetclover.
110390. No. 1288. From Armenia.
110391. No. 1289. From Georgia, Transcaucasia.
110392. No. 1290. From Tiflis, Georgia, Transcaucasia.
- 110393 to 110404. *ONOBRYCHIS VULGARIS* Hill. Fabaceae. Sanfoin.
110393. No. 1297. From Armenia.
110394. No. 1291. From Georgia, Transcaucasia.
110395. No. 1292. From Azerbaijan.
110396. No. 1293. From Georgia, Transcaucasia.
110397. No. 1294. From Armenia.
110398. No. 1295. From Armenia.
110399. No. 1296. From Armenia.
110400. No. 1298. From Armenia.
110401. No. 1299. From Daghestan.
110402. No. 1300. From Georgia, Transcaucasia.
110403. No. 1301. From Armenia.
110404. No. 1302. From Armenia.
110405. *ONOBRYCHIS* sp. Fabaceae.
No. 1303. From Georgia, Transcaucasia.
110406. *ONOBRYCHIS* sp. Fabaceae.
No. 1304. From Georgia, Transcaucasia.
- 110407 to 110412. *PHLEUM* spp. Poaceae.
Timothy.
- 110407 to 110410. *PHLEUM PRATENSE* L.
110407. No. 1344. From Georgia, Transcaucasia.
110408. No. 1306. From Georgia, Transcaucasia.
110409. No. 1307. From Armenia.
110410. No. 1308. From Georgia, Transcaucasia.
110411. *PHLEUM* sp.
No. 1305. From Armenia.
110412. *PHLEUM PRATENSIS* L.
No. 1283. From Armenia.
110413. *PISUM SATIVUM* L. Fabaceae. Pea.
No. 1343. From Armenia.

110350 to 110449—Continued.

110414 to 110444. *TRIFOLIUM* spp. Fabaceae.

110414 and 110415. *TRIFOLIUM ALPESTRE* L.

110414. No. 1309. From Armenia.

110415. No. 1310. From Armenia.

110416. *TRIFOLIUM AMBIGUUM* Bieb.

No. 1311. From Armenia.

110417 and 110418. *TRIFOLIUM ELEGANS* Savi.

A smooth perennial clover with stems 8 to 20 inches long, found throughout Europe and the Caucasus, especially in siliceous soils. The flowers are whitish or pink, and the plant is used for forage.

For previous introduction see 56672.

110417. No. 1312. From Armenia.

110418. No. 1313. From Armenia.

110419 to 110428. *TRIFOLIUM PRATENSE* L. Red clover.

110419. No. 1314. From Georgia, Transcaucasia.

110420. No. 1315. From the State Farm, Bideny, Armenia.

110421. No. 1316. From Armenia.

110422. No. 1317. From Georgia, Transcaucasia.

110423. No. 1318. From Armenia.

110424. No. 1319. From Barmakin, Georgia, Transcaucasia.

110425. No. 1320. From the State Farm, Bideny, Armenia.

110426. No. 1321. From the State Farm, Bideny, Armenia.

110427. No. 1329. From Lenkoran, Armenia.

110428. No. 1322. From Georgia, Transcaucasia.

110429. *TRIFOLIUM REPENS*. White clover.

No. 1323. From Armenia.

110430 to 110432. *TRIFOLIUM RESUPINATUM* L. Strawberry clover.

110430. No. 1324. From the State Farm, Bideny, Armenia.

110431. No. 1325. From Afghanistan.

110432. No. 1326. From Persia.

110433. *TRIFOLIUM SUBTERRANUM* L. Subterranean clover.

No. 1333. From Lenkoran, Armenia.

110434. *TRIFOLIUM* sp.

No. 1327. From Armenia. Received under the name "trichaeifolium," for which a place of publication has not been found.

110435. *TRIFOLIUM* sp.

No. 1328. From Georgia, Transcaucasia.

110436. *TRIFOLIUM* sp.

No. 1329. From Georgia, Transcaucasia.

110350 to 110449—Continued.

110437. *TRIFOLIUM* sp. No. 1330. From Georgia, Transcaucasia.

110438. *TRIFOLIUM* sp.

No. 1331. From Georgia, Transcaucasia.

110439. *TRIFOLIUM* sp.

No. 1332. From the Borzhom region, Georgia, Transcaucasia.

110440. *TRIFOLIUM* sp.

No. 1334. From Georgia, Transcaucasia.

110441. *TRIFOLIUM* sp.

No. 1335. From Georgia, Transcaucasia.

110442. *TRIFOLIUM* sp.

No. 1336. From the State Farm, Z. U. K., Georgia, Transcaucasia.

110443. *TRIFOLIUM* sp.

No. 1337. From Daghestan.

110444. *TRIFOLIUM* sp.

No. 1338. From the State Farm, Bideny, Armenia.

110445. *TRisetum FLAVESCENS* (L.) Beauv. Poaceae. Grass.

No. 1254. From Armenia. A grass resembling tall meadow oatgrass, growing on open ground, in copses, and in meadows, which may prove valuable as a forage.

For previous introduction see 101585.

110446 to 110449. *VICIA* spp. Fabaceae. Vetch.

110446. *VICIA* sp.

No. 1342. From Armenia.

110447. *VICIA* sp.

No. 1341. From Georgia, Transcaucasia.

110448. *VICIA* sp.

No. 1340. From Georgia, Transcaucasia.

110449. *VICIA* sp.

No. 1345. From Armenia.

110450 to 110466.

From England. Plants purchased from Maurice Pritchard & Sons, Christchurch, Hants, England. Received April 20, 1935.

Introduced for Department specialists.

110450 to 110452. *ASTER* spp. Astera-ceae.

110450. *Marjorie*.

110451. *Nancy*.

110452. *Victor*.

110453 to 110461. *KNIPHOFIA* spp. Lilia-ceae.

110453. *Dr. Legate*.

110454. *Greybeard*.

110455. *Lighthouse*.

110456. *Mrs. Samuel Smith*.

110450 to 110466—Continued.

110457. *Northiae Kathari*.
 110458. *Preziosa*.
 110459. *R. Wilson Kerr*.
 110460. *Scarchlight*.
 110461. *Vincent's Delight*.
 110462 to 110466. TRADESCANTIA VIRGINIANA L. Commelinaceae.
 110462. *Henry Marshall*.
 110463. *Lilac Time*.
 110464. *Pauline*.
 110465. *Purple Dome*.
 110466. Delicate pale gray.

110467 to 110478. PRUNUS spp. Amygdalaceae.

From Germany. Plants purchased from Otto Schmitz-Hübsch, Merten, Kreis Bonn. Received April 2, 1935.

Introduced for Department specialists.

- 110467 to 110471. PRUNUS AVIUM L. Sweet cherry.
 110467. *Büttner's rote Knorpelkirsche*.
 110468. *Dönissens gelbe Knorpelkirsche*.
 110469. *Grosse schwarze Knorpelkirsche*.
 110470. *Hedelfinger Riesen*.
 110471. *Jabulay*.
 110472 and 110473. × PRUNUS EFFUSA (Host) Schneid. Duke cherry.
 A semisour cherry.
 110472. *Kaiserin Eugenie*.
 110473. *Königin Hortense*.
 110474 and 110475. PRUNUS AVIUM L. Sweet cherry.
 110474. *Coburger Maiherzkirsche*.
 110475. *Mohrenkirsche*.
 110476. × PRUNUS EFFUSA (Host) Schneid. Duke cherry.
Rote Maikirsche. A semisour cherry.
 110477 and 110478. PRUNUS CERASUS L. Sour cherry.
 110477. *Königliche Amarelle*.
 110478. *Schattenmorelle*.

110479 to 110505.

From Manchuria. Seeds presented by B. W. Skvortzov, botanical department, second high school, Chinese Eastern Railway, Harbin, through H. G. MacMillan, Bureau of Plant Industry. Received April 12, 1935.

Introduced for Department specialists.

110479. ACONITUM KUSNEZOFFII Reichenb. Ranunculaceae. Monkshood.
 An erect hardy herbaceous perennial, native to northeastern Asia, with terminal clusters of bluish flowers.
 For previous introduction see 101395.
 110480. AGROPYRON REPENS (L.) Beauv. Poaceae. Quackgrass.
 For previous introduction see 110063.

110479 to 110505—Continued.

110481. BECKMANNIA SYZIGACHNE (Steud.) Fern. Poaceae.
 For previous introduction see 108618.
 110482 and 110483. CHLORIS VIRGATA Swartz. Poaceae. Feather fingergrass.
 110484. CLEISTOGENES SEROTINA (L.) Keng. Poaceae. Grass.
 A loosely tufted or solitary perennial grass over a foot high, native to low grounds in southern Europe.
 110485. DIGITARIA sp. Poaceae. Grass.
 110486. ECHINOCHLOA CRUSGALLI (L.) Beauv. Poaceae. Grass.
 For previous introduction see 109825.
 110487. ELYMUS DAHURICUS Turcz. Poaceae. Grass.
 For previous introduction see 108486.
 110488. ERAGROSTIS PILOSA (L.) Beauv. Poaceae. Grass.
 For previous introduction see 109819.
 110489. ERIOCHLOA VILLOSA (Thunb.) Kunth. Poaceae. Grass.
 For previous introduction see 109820.
 110490. GLYCINE GRACILIS Skvortzov. Fabaceae.
 A procumbent or twining herb about 3 feet long, native to northern Manchuria, with bright-green, hairy, petioled leaves, and clusters of small white or reddish-violet flowers.
 110491. SOJA sp. Fabaceae.
 Received under the name "ussuriensis," for which a place of publication has not been found.
 110492. HETEROPAPPUS HISPIDUS (Thunb.) Less. Asteraceae.
 A perennial herb, native to eastern Asia, with rough stems and linear leaves. The clear-blue, asterlike flower heads are borne singly at the ends of the branchlets, forming broad corymblike clusters 8 to 10 inches across.
 For previous introduction see 101395.
 110493 to 110496. LESPEDEZA spp. Fabaceae.
 110493 and 110494. LESPEDEZA BICOLOR Turcz.
 110495. LESPEDEZA DAURICA (Laxm.) Schindler.
 A tall annual up to 3 feet high, with small white flowers.
 For previous introduction see 108230.
 110496. LESPEDEZA sp.
 110497. MEDICAGO LUPULINA L. Fabaceae.
 110498 and 110499. MELILOTUS SUAVEOLENS Ledeb. Fabaceae.
 For previous introduction see 90558.
 110500. SETARIA LUTESCENS (Weigel) Hubbard. Poaceae. Grass.
 110501. SETARIA VIRIDIS (L.) Beauv. Poaceae. Grass.

110479 to 110505—Continued.

110502. *THLADIANTHA DUBIA* Bunge. Cucurbitaceae.

A tuberous rooted climber with pale-green, heart-shaped leaves and numerous campanulate yellow flowers. Native to northern China.

For previous introduction see 90410.

110503 to 110505. *VICIA* spp. Fabaceae. Vetch.

110503. *VICIA JAPONICA* A. Gray.

For previous introduction see 81659.

110504. *VICIA* sp.

110505. *VICIA JAPONICA* A. Gray.

110506. *SACCHARUM SPONTANEUM* L. Poaceae. Grass.

From India. Cuttings presented by the Imperial Sugar Cane Station, Coimbatore. Received April 25, 1935.

Introduced for Department specialists.

Variety *Burma*. A grass closely related to sugarcane.

For previous introduction see 106899.

110507 and 110508. *OLEA EUROPAEA* L. Oleaceae. Olive.

From Spain. Cuttings presented by Ramon Sala, Balagu r-Pc., Lerida. Received April 25, 1935.

Introduced for Department specialists.

110507. *Cordovi* variety.

110508. An unnamed variety which produces very large fruits, but does not bear a large crop.

110509 to 110513.

From China. Plants presented by the Lingnan University, Canton. Received April 9, 1935.

Introduced for Department specialists.

110509. *ARENDINARIA AMABILIS* McClure. Poaceae.

A bamboo with erect cylindrical culms usually 20 feet high, rarely 40 feet, and near-lanceolate leaves about a foot long; probably of garden origin.

110510. *BAMBUSA TULDROIDES* Munro. Poaceae.

Chang ko chuk. A thick-walled, stiff, straight bamboo of the sympodial type cultivated for its culms which in well-established clumps are 24 feet high and about 5 inches in circumference. It is one of the most important economic bamboos in this part of China.

For previous introduction see 80875.

110511. *PHYLLOSTACHYS* sp. Poaceae.

110512. *SCHIZOSTACHYUM FUNGHOMI* McClure. Poaceae.

A cultivated clump bamboo, native to southern China, with erect culms up to 30 feet high and about 3 inches in diameter.

110513. (Undetermined.)

An undetermined bamboo.

110514. *PASSIFLORA LIGULARIS* Juss. Passifloraceae. Sweet granadilla.

From Venezuela. Seeds presented by Dr. Henry Pittier. Received April 19, 1935.

Introduced for Department specialists.

For previous introduction see 110273.

110515. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.

From Peru. Seeds presented by the Estación Agronómica de Piura. Received April 18, 1935.

A wild tobacco collected in the fields around Lima; introduced for Department specialists.

110516 and 110517. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

From Michigan. Scions and trees purchased from Frank Keplinger, Farwell. Received April 26, 1935.

Introduced for Department specialists.

110516. *Admiral Byrd*.

110517. *Sherman*.

110518 to 110555.

From Australia. Seeds presented by Dr. A. McTaggart, Senior Plant Introduction Officer, Division of Plant Industry, Canberra, Federal Commonwealth Territory. Received April 17, 1935.

A collection of forage plants introduced for Department specialists; the field numbers are those of the Federal Commonwealth Territory.

110518 and 110519. *BROMUS* spp. Poaceae. Bromegrass.

110518. *BROMUS* sp.

FCT. No. 1963.

110519. *BROMUS* sp.

FCT. No. 1494.

110520. *DESCHAMPSIA CAESPITOSA* (L.) Beauv. Poaceae. Tufted hairgrass.

FCT. No. 3639.

For previous introduction see 109077.

110521 to 110552. *FESTUCA* spp. Poaceae. Fescue.

110521. *FESTUCA ALOPECUROS* Schousb.

FCT. No. 2518. An annual grass, native to the western Mediterranean region, with tufted culms up to a foot high, seldom reaching 2 feet high.

110522. *FESTUCA AMETHYSINA* L.

FCT. No. 2383. A densely caespitose perennial grass with fibrous roots, stout culms, and very narrow leaves. Native to the Mediterranean countries.

For previous introduction see 58700.

110523 and 110524. *FESTUCA ELATIO* ARUNDINACEA (Schreb.) Wimm.

For previous introduction see 108501.

110523. FCT. No. 5609.

110524. FCT. No. 5760.

110525. *FESTUCA CAPILLATA* Lam. Hair fescue.

FCT. No. 2475.

110518 to 110555—Continued.

- 110526 to 110531. *FESTUCA ELATIOR* L.
Meadow fescue.
110526. FCT. No. 1144.
110527. FCT. No. 5875.
110528. FCT. No. 2100.
110529. FCT. No. 5610.
110530. FCT. No. 5712.
110531. FCT. No. 5713.
110532. *FESTUCA RUBRA* HETEROPHYLLA
(Lam.) Mutel. Shade fescue.
- FCT. No. 2101. A densely tufted perennial grass, used for lawns in shady places. Native to Europe.
110533. *FESTUCA MAIREI* St. Yves.
- FCT. No. 1499. A grass native to Morocco.
- For previous introduction see 74166.
110534. *FESTUCA MARITIMA* L.
- FCT. No. 5792. A tufted annual grass, native to Spain, with culms about a foot high.
110535. *FESTUCA OVINA* L. Sheep fescue.
- FCT. No. 2102.
- 110536 to 110538. *FESTUCA OVINA* SULTANA Hack.
110536. FCT. No. 2092.
110537. FCT. No. 2385.
110538. FCT. No. 2093.
- 110539 to 110541. *FESTUCA OVINA* VALESIACA (Schleich.) Link.
- A perennial grass, with slender culms about 1 foot high. Native to central Europe.
110539. FCT. No. 2094.
110540. FCT. No. 2386.
110541. FCT. No. 2478.
110542. *FESTUCA VARIA* Haenke.
- FCT. No. 2362.
- 110543 to 110547. *FESTUCA RUBRA* L.
Red fescue.
110543. FCT. No. 1294.
110544. FCT. No. 3460.
110545. FCT. No. 2104.
110546. FCT. No. 5761.
110547. FCT. No. 1295.
110548. *FESTUCA RUBRA* COMMUTATA
Gaud. Chewings fescue.
- FCT. No. 1293.
110549. *FESTUCA SPADICEA* L.
- FCT. No. 2363.
- For previous introduction see 89827.
110550. *FESTUCA VARIA* Haenke.
- FCT. No. 2387.
- For previous introduction see 89828.
110551. *FESTUCA* sp.
- FCT. No. 2519.
110552. *FESTUCA* sp.
- FCT. No. 2103.

110518 to 110555—Continued.

- 110553 to 110555. *SCLERPOPOA RIGIDA* (L.)
Griseb.
- An annual tufted grass up to a foot in height, with linear, sharp-pointed leaves and rigid panicles. Native to Asia Minor.
- For previous introduction see 58709.
110553. FCT. No. 1763.
110554. FCT. No. 2477.
110555. FCT. No. 2520.
- 110556 to 110558.
- From Paraguay. Seeds presented by the Botanic Garden, Asunción. Received April 18, 1935.
- Introduced for Department specialists.
110556. *MALVASTRUM* sp. Malvaceae.
- Originally from Napalpi, Chaco, Argentina.
110557. *MALVASTRUM* sp. Malvaceae.
110558. *SPHAERALCEA BONARIENSIS* (Cav.)
Griseb. Malvaceae.
- A tender shrubby perennial about 1 foot high. Native to Argentina.
- 110559 to 110590.
- From France. Seeds and bulbs presented by the Director, Botanic Garden, Nantes. Received April 20, 1935.
- Introduced for Department specialists.
- Unless otherwise mentioned, the material was received as seed.
- 110559 to 110567. *ALLIUM* spp. Liliaceae.
Onion.
110559. *ALLIUM CARINATUM* L.
- Bulbets of a species with narrowly linear leaves and lilac-purple flowers, produced in a comparatively large head. It is found throughout southern Europe, especially in the Alps.
- For previous introduction see 104626.
110560. *ALLIUM CEPA* L.
110561. *ALLIUM OCHROLEUCUM* Waldst.
and Kit.
- An allium, native to central Europe, with terete stems over a foot high, linear leaves, and umbels of 15 to 20 yellowish-white flowers.
110562. *ALLIUM ODORUM* L.
- A European onion cultivated in Japan for its leaves, which are produced abundantly in the spring and eaten as greens.
- For previous introduction see 78986.
110563. *ALLIUM OLERACEUM* L.
- Bulbets of a central European allium with stems 2 to 3 feet high, semiterete leaves, and greenish-yellow flowers.
110564. *ALLIUM PORRUM* L. Leek.
110565. *ALLIUM SIBIRICUM* L.
- An allium, native to Siberia, with semiterete leaves, cylindrical scape up to 2 feet high, and an umbel of many rose-colored flowers.

110559 to 110590—Continued.

110566. *ALLIUM SPHAEROCEPHALON* L.

Bulbs of a European onion with a scape 1 to 2 feet high, leafy only a third of its length. The half-terete leaves are much shorter than the stem and the bright or dark-purple flowers are freely borne in globose or ovoid umbels about an inch in diameter.

110567. *ALLIUM VINEALE* L.

Bulbets of a pink-flowered wild onion, about a foot high, native to England.

For previous introduction see 78999.

110568. *CUCUMIS MELO* L. Cucurbitaceae.
Muskmelon.110569 to 110574. *CUCURBITA PEPO* L. Cucurbitaceae.
Pumpkin.110569. *Annulata*.110570. *Oviformis*.110571. *Patisson*.110572. *Platycarpa striata*.110573. *Pyriformis*.110574. *Verrucosa*.110575 to 110580. *FESTUCA* spp. Poaceae.
Fescue.110575. *FESTUCA ELATIOR ARUNDINACEA* (Schreb.) Wimm.110576. *FESTUCA OVINA GLAUCA* (Lam.) Koch. Blue fescue.110577. *FESTUCA RUBRA* L. Red fescue.110578 and 110579. *FESTUCA RUBRA HETEROPHYLLA* (Lam.) Mutel.110580. *FESTUCA SPADICEA* L.110581. *POA NEMORALIS* L. Poaceae.
Wood bluegrass.

For previous introduction see 78805.

110582 to 110584. *RHEUM* spp. Polygo-
naceae. Rhubarb.110582. *RHEUM AUSTRALE* Dob.

For previous introduction see 31037.

110583. *RHEUM OFFICINALE* Baill.

For previous introduction see 104375.

110584. *RHEUM RHAPONTICUM* L.
Common rhubarb.110585 to 110590. *SOLANUM* spp. Solana-
ceae.110585. *SOLANUM CILIATUM* Lam.

A spiny perennial with cordate leaves and small clusters of white flowers.

110586. *SOLANUM DULCAMARA* L.
Bitter nightshade.110587. *SOLANUM GUINEENSE* L.

For previous introduction see 93096.

110588. *SOLANUM MELONGENA* L.
Eggplant.110589. *SOLANUM MINIATUM* Bernh.

An annual, native to southern Europe, with unarmed stems over a foot high, ovate glabrous leaves, and racemes of small white flowers.

110590. *SOLANUM NIGRUM* L.
Black nightshade.

110591 to 110593.

From Guatemala. Seeds collected by Nancy Bell Fairchild, at Antigua. Received April 22, 1935.

110591. *CASSIA* sp. Caesalpiniaceae.

A shrub with yellow flowers.

110592. *CEDELEA* sp. Meliaceae.

110593. (Undetermined.)

Jaapa.

110594 to 110611.

From England. Seeds presented by the Director, Cambridge University Botanic Garden. Received April 18, 1935.

Introduced for Department specialists.

110594. *CUCUMIS SATIVUS* L. Cucurbita-
ceae. Cucumber.110595 to 110597. *LYCOPERSICON ESCULEN-
TUM* Mill. Solanaceae. Tomato.

110595. [No varietal name.]

110596. *Cerasiforme*.110597. *Piriforme*.110598 to 110604. *PASSIFLORA* spp. Passi-
floraceae. Passionflower.110598. *PASSIFLORA BANKSII* Benth.

An evergreen climber with broad three-lobed leaves nearly 3 inches across and about 2 inches wide. Native to New South Wales and Queensland.

For previous introduction see 35104.

110599. *PASSIFLORA CAPSULARIS* L.

A tall slender climber with red tendrils, two-lobed leaves, and solitary, rosy-red flowers about 2 inches across. Native to Brazil and northeastern Paraguay.

For previous introduction see 45168.

110600. *PASSIFLORA EDULIS* Sims.
Purple granadilla.110601. *PASSIFLORA GRACILIS* Jacq.
Crinkled passionflower.

A Brazilian vine with smooth slender stems and bluntly three-lobed, membranous leaves up to 3 inches long. The pale-green to whitish flowers are about 1 inch across, and the ovoid purple fruits are about 2 inches long.

For previous introduction see 49026.

110602. *PASSIFLORA LIGULARIS* JUSS.
Sweet granadilla.110603. *PASSIFLORA LUTEA* L.
Yellow passionflower.

For previous introduction see 43115.

110604. *PASSIFLORA SUBEROSA* L.
Cork passionflower.

A woody climber with roundish, three-lobed leaves, small greenish-yellow flowers, and ovoid black berries. Native to tropical America.

For previous introduction see 97776.

110605 to 110607. *PISUM* spp. Fabaceae.
Pea.110605. *PISUM JOMARDI* Schrank.

A hardy white-flowered annual pea about 3 feet high, native to Egypt.

For previous introduction see 104858.

110594 to 110611—Continued.

110606. *PISUM SATIVUM* L.110607. *PISUM SATIVUM UMBELLATUM* L.

A form of the ordinary garden pea with the flowers in umbellike clusters.

For previous introduction see 59396.

110608 to 110611. *SOLANUM* spp. Solanaceae.110608. *SOLANUM ATROPURPUREUM* Schrank.

For previous introduction see 104863.

110609. *SOLANUM CAPSICASTRUM* Link.
False Jerusalem-cherry.110610. *SOLANUM MARGINATUM* L. f.
Nightshade.

A prickly shrub from 3 to 6 feet high with white-tomentose, blue-veined foliage and white, blue-veined flowers about 1 inch in diameter. Native to Ethiopia.

For previous introduction see 25097.

110611. *SOLANUM MELONGENA* L.
Eggplant.110612. *JUBAEA CHILENSIS* (Molina) Baill. Phoenicaceae. Sirup palm.

From Chile. Seeds presented by W. R. Grace & Co., Santiago, at the request of H. G. McMillan, Bureau of Plant Industry. Received April 18, 1935.

A Chilean palm, 40 feet high, which thrives on very dry soil. The pinnate leaves are 6 to 12 feet long, and the coconutlike fruits are 2 inches in diameter. It is ornamental but a slow grower.

For previous introduction see 89995.

110613 and 110614.

From Cuba. Seeds presented by R. M. Grey, Superintendent of the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 24, 1935.

110613. *ACROCOMIA MEXICANA* Karw.
Phoenicaceae. Palm.

A prickly palm about 20 feet high, with a spiny, brown-woolly trunk often a foot thick and terminal leaves from 6 to 8 feet in length. The sheathing bases of the leaves are armed with long black spines, and the spathe also is very spiny. The fragrant yellow flowers are followed by round fruits in very long clusters. This palm is found in the cooler parts of Mexico up to 3,000 feet altitude.

For previous introduction see 101695.

110614. *CRESCENTIA CUJETE* L. Bignoniaceae.
Calabash-tree.

A handsome tree, native to tropical America, with wide-spreading branches and glossy, oblong, dark-green leaves 4 to 6 inches long. The globose, pendulous fruits, 18 to 20 inches in diameter, have woody shells, and, when dried are used for domestic purposes.

For previous introduction see 102279.

110615 to 110617. *ZEPHYRANTHES* spp. Amaryllidaceae.

From Mexico. Bulbs purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Vera Cruz. Received April 30, 1935.

110615 to 110617—Continued.

110615. *ZEPHYRANTHES PALLIDA* M. Roem.

A tropical American zephyranthes with narrow-linear, radical leaves about 1 foot long and large white flowers tinged with red.

110616 and 110617. *ZEPHYRANTHES VERECUNDA* Herb.

A bulbous perennial with narrowly lanceolate leaves and funnel-shaped flowers, 1 to 2 inches long, which vary in color from greenish white to red. It is native to the highlands of central Mexico.

For previous introduction see 91835.

110616. A form with white flowers tinged with rose red.

110617. A form with light rose-red flowers.

110618 to 110633.

From Sweden. Seeds presented by the Director, Botanic Garden, Upsala. Received April 18, 1935.

Introduced for Department specialists.

110618. *CUCURBITA PEPO* L. Cucurbitaceae.
Pumpkin.110619. *FESTUCA AMETHYSTINA* L. Poaceae.
Fescue.110620. *FESTUCA ELATIOR ARUNDINACEA* (Schreb.) Wimm.
Fescue.110621. *IRIS RUTHENICA* Ker. Iridaceae.

A Chinese iris with a tuft of linear leaves about 6 inches long at flowering time, becoming a foot long later. The outer segments of the violet-scented flowers are lilac, marked with bluish purple; the inner segments are deep purple violet.

For previous introduction see 67004.

110622. *PASSIFLORA SUBEROSA* L. Passifloraceae.
Cork passionflower.

For previous introduction see 110604.

110623 and 110624. *PISUM SATIVUM* L. Fabaceae.
Pea.110623. *Medullare*.110624. *Saccharatum*.110625 to 110629. *RHEUM* spp. Polygonaceae.
Rhubarb.110625. *RHEUM FRANZENBACHII* Muentzer.

For previous introduction see 105160.

110626. *RHEUM MACROPTERUM* Mart.

For previous introduction see 69106.

110627. *RHEUM OFFICINALE* Baill.110628. *RHEUM UNDULATUM* L.

For previous introduction see 104648.

110629. *RHEUM WEBBIANUM* Royle.

A stout perennial up to 6 feet high, native to the Himalayas at altitudes of 10,000 to 14,000 feet.

110630 to 110633. *SOLANUM* spp. Solanaceae.110630. *SOLANUM CAPSICASTRUM* Link.
False Jerusalem-cherry.110631. *SOLANUM DULCAMARA* L.
Bitter nightshade.

110618 to 110633—Continued.

110632. SOLANUM SISYMBRIFOLIUM Lam.

A plant with small round black fruits.

For previous introduction see 93098.

110633. SOLANUM TRIFLORUM CALOPHYLLUM (Phil.) Bitter.

A coarse annual nightshade, native to Argentina and Chile.

110634 to 110637. FESTUCA spp. Poaceae. Fescue.

From New South Wales. Seeds presented by G. D. Ross, Under Secretary, Department of Agriculture, Sydney. Received April 24, 1935.

Introduced for Department specialists.

110634 and 110635. FESTUCA ELATIOR L. Meadow fescue.

110636. FESTUCA ELATIOR ARUNDINACEA (Schreb.) Wimm.

110637. FESTUCA RUBRA L. Red fescue.

110633 to 110663.

From Sweden. Seeds presented by Dr. A. H. Magnusson, Director, Botanic Garden, Göteborg. Received April 22, 1935.

Introduced for Department specialists.

110638 to 110648. ALLIUM spp. Liliaceae. Onion.

110638. ALLIUM CERNUUM Roth. Nodding onion.

For previous introduction see 66425.

110639. ALLIUM DELICATULUM Sievers.

A Siberian allium about a foot high, with three or four narrow leaves and straw-colored flowers in flat umbels.

110640. ALLIUM FLAVUM L.

A wild onion with an upright or ascending stem up to a foot high, narrowly linear leaves about as long as the stem, and small yellow bell-shaped flowers in a rather dense cluster. Native to dry rocky places, especially in chalky soil, in south-central Europe.

For previous introduction see 104632.

110641. ALLIUM FRIGIDUM Boiss. and Heldr.

An allium with stems 3 to 5 inches high, two to three semi-terete leaves, and small umbels of reddish-yellow flowers. Native to Greece.

110642. ALLIUM HELDREICHII Boiss.

A Grecian species, a foot or less in height with thin terete leaves shorter than the scape and rosy flowers.

For previous introduction see 58873.

110643. ALLIUM ODORUM L.

For previous introduction and description see 110562.

110644. ALLIUM PULCHELLUM Don.

An onion with narrow-linear leaves about 1 foot long and a rather dense umbel of bell-shaped, violet flowers. Native to Asia Minor.

For previous introduction see 104634.

110638 to 110663—Continued.

110645. ALLIUM SENESCENS L.

A wild European onion, 1 to 2 feet high, with narrow erect often twisted leaves and numerous rather small pink or lilac flowers in dense heads.

For previous introduction see 78993.

110646. ALLIUM STELLATUM Fraser.

For previous introduction see 78994.

110647. ALLIUM TANGUTICUM Regel.

For previous introduction see 110226.

110648. ALLIUM VICTORIALIS L.

For previous introduction see 103779.

110649 to 110652. FESTUCA spp. Poaceae. Fescue.

110649. FESTUCA OVINA BRACHYPHYLLA (Schult.) Piper. Alpine fescue.

An alpine perennial grass, native to central Europe.

110650. FESTUCA OVINA INDIGESTA (Boiss.) Hack.

A dwarf perennial grass, native to Spain at altitudes between 6,000 and 9,000 feet.

110651. FESTUCA VARIA ALPESTRIS (Roem. and Schult.) Hack.

A perennial grass, native to the mountains of central Europe, with culms 1 to 2 feet high.

110652. FESTUCA VARIA SCOPARIA Kern. and Hack.

A perennial grass about a foot high, native to western Europe.

110653. QUAMOCLIT COCCINEA (L.) Moench. Convolvulaceae. Scarlet starglory.

For previous introduction see 97783.

110654 to 110656. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

110657. RHEUM ALEXANDRAE Batal. Polygonaceae.

A stout herbaceous perennial, native to China, with a rosette of elliptic-ovate, dark, glossy-green leaves, and flower stems 3 to 4 feet high, bearing large pale-yellow, overlapping leaflike bracts.

For previous introduction see 105159.

110658 to 110663. SOLANUM spp. Solanaceae.

110658. SOLANUM AVICULARE Forst. f. Nightshade.

A bushy shrub, 6 to 8 feet high, with lacinate leaves 10 inches long, small cymes of large dark-purple flowers, and yellowish fruits 1 inch in diameter which are used for making marmalade.

For previous introduction see 95397.

110659. SOLANUM GRACILE Otto.

A slender branching perennial about 2 feet high, with oval to oblong-lanceolate leaves and white flowers in small racemes, followed by black berries. Native to tropical America.

110660. SOLANUM HETERODOXUM Dun.

A tall annual, native to Mexico, with pilose stems 2 to 3 feet high, lobed leaves, and pale-blue flowers followed by black berries.

110638 to 110663—Continued.

110661. *SOLANUM HUMILE* Lam.

A dwarf, shrubby perennial with ovate leaves and violet-colored flowers. Known only in cultivation.

110662. *SOLANUM LUTEUM* Mill.

A hairy herb, with branching stems over 2 feet high, woolly ovate leaves, and umbels of small white flowers followed by yellow berries. Native to temperate South America.

110663. *SOLANUM MINIATUM* Bernh.

For previous introduction and description see 110589.

110664 to 110675.

From Australia. Seeds presented by Dr. H. Wenholtz, Department of Agriculture, Sydney, New South Wales. Received April 26, 1935.

A collection of seeds from the Bathurst Experiment Farm, introduced for Department specialists.

110664 to 110670. *ALLIUM CEPA* L. Liliaceae. Onion.110664. *Barletta B. 321.*110665. *Dubbo White.*110666. *Lord Howe Island B. 319.*110667. *Odorless B. 337.*110668. *Hunter River Brown Spanish.*110669. *Maitland White.*110670. *White Pearl.*110671. *APIUM GRAVEOLENS* L. Apiaceae. Celery.

South Australian celery.

110672 to 110675. *DAUCUS CAROTA* L. Apiaceae. Carrot.110672. *Colonial B. 345.*110673. *Fine Long Red B. 343.*110674. *Long Bunching.*110675. *Coreless Long Red.*110676. *HABRANTHUS BRACHYANDRUS* (Baker) Sealy. Amaryllidaceae.

From Argentina. Bulbs presented by Ing. Paul Ramella, Director de la Estación Experimental Central, Bergamino. Received May 4, 1935.

A Paraguayan habranthus with three or four erect, pale-green leaves and a peduncle about a foot long bearing a single flower; this has a large funnel-shaped perianth, purplish red with pale pink tips.

110677. *ORYZA SATIVA* L. Poaceae. Rice.

From the Fiji Islands. Seeds presented through the Division of Cereal Crops and Diseases, Bureau of Plant Industry. Received April 27, 1935.

Sonacalif rice; introduced for Department specialists.

110678. *BAUHINIA PURPUREA* L. Caesalpiniaceae.

From India. Seeds presented by F. G. Dickason, through Winfield E. Scott,

110678—Continued.

American consul, Rangoon, Burma. Received April 25, 1935.

A small tree with pink flowers; collected February 17, 1935, in the nursery at Judson College, Rangoon.

110679 to 110681. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.

From Brazil. Seeds presented by Henrique Barradas, Ministerio da Agricultura Campo de Sementes de Fumo, Tracuateua. Received April 30, 1935.

Introduced for Department specialists.

110679. *Barury.*110680. *Preitinho.*110681. *Saracá.*

110682 to 110684.

From Cuba. Seeds presented by R. M. Grey, Superintendent of the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 29, 1935.

Introduced for Department specialists.

110682. × *DOMBEYA CAYEUXII* Andre. Sterculiaceae.

A hybrid between *Dombeya mastersii* and *D. wallichii*. It is a handsome shrub about 6 feet high, with large cordate leaves and pendent corymbs of showy pink flowers. The parents are native to tropical Africa and Madagascar, respectively.

110683. *DOMBEYA SPECTABILIS* Bojer. Sterculiaceae.

A tree up to 30 feet high, with large velvety cordate-lobed leaves and drooping umbels of showy scarlet flowers. Native to Madagascar.

110684. *AVERRHOA BILIMBI* L. Oxalidaceae. Bilimbi.

A tree 20 to 60 feet high, cultivated in parts of South America and the West Indies for the sake of its greenish-yellow, cucumber-shaped acid fruits which are pickled or used as a relish with meat. It is tropical in its requirements.

For previous introduction see 108253.

110685 to 110764.

From Lithuania. Seeds and bulbs presented by Dr. C. Regel, Director, Botanic Garden, Kaunas. Received April 24, 1935.

Introduced for Department specialists, and, unless otherwise specified, the material was received as seeds.

110685. *AGROPYRON* sp. Poaceae. Grass.110686 to 110702. *ALLIUM* spp. Liliaceae. Onion.110686. *ALLIUM AFLATUNENSE* B. Fedtsch.

A large allium with broad-oblong leaves and umbels of purple flowers on a scape up to 4 feet high. Native to Turkistan.

110687. *ALLIUM ALBIDUM* Fisch.

A species with clustered oblong bulbs, very narrow semi-terete leaves, and white or yellowish-white flowers. Native to the southeastern part of Europe.

For previous introduction see 95567.

110685 to 110764—Continued.

110688. *ALLIUM CANADENSE* L.
Meadow garlic.
Bulbs received.
110689. *ALLIUM CARINATUM* L.
Bulbs received.
For previous introduction and description see 110559.
110690. *ALLIUM CAERULEUM* Pall.
For previous introduction and description see 110227.
110691. *ALLIUM FISTULOSUM* L.
Welsh onion.
110692. *ALLIUM FISTULOSUM* L.
Welsh onion.
Bulbs received under the varietal name "viviparum," for which a place of publication and a description have not been found.
110693. *ALLIUM FLAVUM* L.
For previous introduction and description see 110640.
110694. *ALLIUM PULCHELLUM* Don.
For previous introduction and description see 110644.
110695. *ALLIUM SATIVUM* L. Garlic.
Bulbs received.
110696. *ALLIUM SCHOENOPRASUM* L.
Chives.
110697. *ALLIUM SCORODOPRASUM* L.
Bulbs received.
For previous introduction see 73528.
110698. *ALLIUM SIBIRICUM* L.
For previous introduction and description see 110565.
110699. *ALLIUM STELLATUM* Fraser.
For previous introduction see 110646.
110700. *ALLIUM SUAVEOLENS* Jacq.
An allium up to 18 inches high with flat, linear leaves and an umbel of numerous pink fragrant flowers. Native to central Europe.
110701. *ALLIUM URCEOLATUM* Regel.
Bulbs of an onion, native to Turkistan, with linear leaves and bright-blue flowers borne in a hemispherical head.
For previous introduction see 66433.
110702. *ALLIUM VIVIPARUM* Kar. and Kir.
An allium, native to Siberia, with flattened leaves and hemispherical umbels of small azure flowers.
110703. *ARRHENATHERUM ELATIUS* (L.) Beauv. Poaceae. Tall oatgrass.
For previous introduction see 110353.
- 110704 to 110719. *CUCURBITA* spp. Cucurbitaceae.
- 110704 and 110705. *CUCURBITA MAXIMA* Duchesne. Squash.
- 110706 and 110707. *CUCURBITA MOSCHATA* Duchesne.
110706. *Maliformis striata*.
110707. *Maliformis striata maxima*.

110685 to 110764—Continued.

- 110708 to 110719. *CUCURBITA PEPO* L. Pumpkin.
110708. *Cucumiformis aurea viridistriata*.
110709. *Cucumiformis striata*.
110710. *Elongata striata*.
110711. *Lageniformis verrucosa viridis*.
110712. *Maliformis aurea*.
110713. *Maliformis aurea striata*.
110714. *Maliformis lutea*.
110715. *Maliformis striata minor*.
110716. *Paragonica*.
110717. *Pyriformis albo-striata*.
110718. *Pyriformis striata oblonga*.
110719. *Pyriformis verrucosa*.
- 110720 to 110723. *FESTUCA* spp. Poaceae. Fescue.
110720. *FESTUCA ELATIOR* L. Meadow fescue.
110721. *FESTUCA MAIREI* St. Yves.
For previous introduction and description see 110533.
110722. *FESTUCA MYUROS* L.
An annual grass with culms about a foot high and narrow leaf blades. Native to Europe.
For previous introduction see 107057.
110723. *FESTUCA ELATIOR* L. Meadow fescue.
110724. *MUHLENBERGIA FOLIOSA* (Roem. and Schult.) Trin. Poaceae.
A perennial grass of garden origin with decumbent culms rooting at the base.
- 110725 to 110756. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.
110725. *Athanensis*.
110726. *Amersfoort*.
110727. *Atropurpurea*.
110728. *Atrosanguinea*.
110729. *Brazil*.
110730. *Derebcinska*.
110731. *Drinovec*.
110732. *Ercegovina stolak*.
110733. *Friedrichstaler*.
110734. *Galente*.
110735. *Gigantea*.
110736. *Gundi*.
110737. *Havanensis*.
110738. *Kentucky*.
110739. *Longifolia*.
110740. *Macrophylla*.
110741. *Maryland*.
110742. *Muscatteller*.
110743. *Ohio*.
110744. *Platana arcadia*.

110685 to 110764—Continued.

110745. *Portorico*.
 110746. *Saloniki*.
 110747. *Samsun*.
 110748. *Spagnuolo di Comiso*.
 110749. *Sumatra*.
 110750. *Sarmalinsky*.
 110751. *Tiubek*.
 110752. *Tykkulak*.
 110753. *Unguschet*.
 110754. *Virginica*.
 110755. *Wigandoides*.
 110756. *Brazil beneventano*.
 110757. *PHASEOLUS VULGARIS* L. Fabacae. Common bean.
Butterkönigin.

110758 to 110761. *RHEUM* spp. Polygono-rhubarb.

110758. *RHEUM PALMATUM* L.

Received under the varietal name "przewalskii," for which a place of publication and a description have not been found.

110759. *RHEUM PALMATUM TANGUTICUM* Maxim.

A tall perennial up to 6 feet high, with large rounded cordate leaves. Native to northeastern Asia.

For previous introduction see 31035.

110760. *RHEUM RHAPONTICUM* L. Common rhubarb.

110761. *RHEUM UNDULATUM* L. Rhubarb.

For previous introduction see 110628.

110762. *SOLANUM CAPSICASTRUM* Link. Solanaceae. False Jerusalem-cherry.

110763. *ARALIA* sp. Araliaceae.

110764. *SOLANUM DULCAMARA* L. Solanaceae. Bitter nightshade.

Albiflora.

110765 to 110817.

From France. Seeds and bulblets presented by the Muséum d'Histoire Naturelle, Paris. Received April 26, 1935.

Introduced for Department specialists and, unless stated otherwise, the material was received as seeds.

110765 to 110786. *ALLIUM* spp. Liliaceae. Onion.

110765. *ALLIUM ANGULOSUM* L.

An onion originally from Tonkin, French Indo-China, the leaves of which are used like chives.

For previous introduction see 59347.

110766. *ALLIUM CANADENSE* L. Meadow garlic.

Bulblets received.

110767. *ALLIUM CARINATUM* L.

110768. *ALLIUM DIOSCORIDIS* Sibth. and Smith.

110765 to 110817—Continued.

A tall white-flowered onion up to 3 feet high, with long, broadly linear leaved leaves as long as the scape. The nodding umbel consists of 20 to 30 flowers. Native to France and Corsica.

For previous introduction see 95355.

110769. *ALLIUM FALLAX* Schult. f.

An Austrian allium 5 to 10 inches high, with linear leaves and lilac-purple flowers in a hemispherical head.

For previous introduction see 104883.

110770. *ALLIUM FISTULOSUM* L. Welsh onion.

110771. *ALLIUM FLAVUM* L.

110772. *ALLIUM MOLY* L. Lily leek.

An allium with broad glaucous leaves and a scape 10 to 15 inches high, bearing a compact head of bright-yellow flowers. Native to southern Europe.

For previous introduction see 91381.

110773. *ALLIUM MUTABILE* Michx. Wild onion.

An allium with linear leaves about 1 foot long and a dense erect umbel of white, pink, or rose-colored flowers. Native to the southeastern United States.

110774. *ALLIUM NUTANS* L.

A Siberian species with narrow leaves, all radical, and nodding heads of rosy-white flowers.

For previous introduction see 58683.

110775. *ALLIUM OBLIQUUM* L.

A species cultivated in Siberia as a substitute for garlic. It has narrowly egg-shaped bulbs and stems up to 3 feet in height.

For previous introduction see 73525.

110776. *ALLIUM ODORUM* L.

110777. *ALLIUM OLERACEUM* L.

Bulblets received.

110778. *ALLIUM PANICULATUM* L.

A Mediterranean allium up to 2 feet high, with linear half-terete leaves and purplish flowers.

For previous introduction see 66952.

110779. *ALLIUM POLYPHYLLUM* Kar. and Kir.

A Siberian species, 1 to 2 feet high, with flat, linear leaves and rose-colored flowers.

For previous introduction see 60230.

110780. *ALLIUM ROTUNDUM* L.

A Hungarian allium, about 2 feet high, with broadly linear leaves and a globular head of purple or rarely whitish flowers.

110781. *ALLIUM SCHOENOPRASUM* L. Chives.

110782. *ALLIUM SPHAEROCEPHALON* L.

For previous introduction and description see 110566.

110765 to 110817—Continued.

110783. ALLIUM STRICTUM Schrad.

An allium, native to Siberia, with several linear leaves on a stem over a foot high and an umbel of rose-colored flowers.

110784. ALLIUM SUBHIRSUTUM L.

A Mediterranean allium with narrow, hairy-margined leaves a foot long and white flowers.

For previous introduction see 91380.

110785. ALLIUM URSINUM L.

A wild European onion which grows in large masses in the open woods. When in flower it is very effective, clothing the ground with its broad green leaves, above which the numerous umbels of white flowers are borne on scapes a foot high.

For previous introduction see 78998.

110786. ALLIUM VINEALE L.

Bullets received.

For previous introduction and description see 110567.

110787. CARICA PAPAYA L. Papayaceae.
Papaya.110788. CARICA QUERCIFOLIA (St. Hil.)
Benth. and Hook.

For previous introduction see 105864.

110789. CUCUMIS SATIVUS L. Cucurbita-
ceae. Cucumber.110790 to 110792. CUCURBITA spp. Cucur-
bitaceae.110790. CUCURBITA MAXIMA Duchesne.
Squash.110791. CUCURBITA MOSCHATA Duchesne.
Cushaw.

110792. CUCURBITA PEPO L. Pumpkin.

110793 to 110801. FESTUCA spp. Poaceae.
Fescue.

110793. FESTUCA ALOPECUROS Schousb.

For previous introduction and description see 110521.

110794. FESTUCA CAPILLATA Lam.
Hair fescue.110795. FESTUCA BERTONENSIS (All.)
Asch. and Graebn.

An annual grass with decumbent stems about a foot high. Native to southern Europe.

110796. FESTUCA ELATIOR L.
Meadow fescue.110797. FESTUCA ELATIOR ARUNDINACEA
(Schreb.) Wimm.

110798. FESTUCA MAIREI St. Yves.

For previous introduction see 110721.

110799. FESTUCA MYUROS L.

For previous introduction and description see 110722.

110800. FESTUCA OVINA DURUSCULA (L.)
Koch.

For previous introduction and description see 110217.

110801. FESTUCA SPADICEA L.

110765 to 110817—Continued.

110802. CATAPODIUM TUBERCULOSUM Moris.
Poaceae.

An annual grass about 8 inches high, with slender stems. Native to southern Europe.

For previous introduction see 74161.

110803. FESTUCA sp. Poaceae. Fescue.

110804. FESTUCA sp. Poaceae. Fescue.

110805 and 110806. LYCOPERSICON ESCU-
LENTUM Mill. Solanaceae. Tomato.110807. PASSIFLORA GRACILIS Jacq. Pas-
sifloraceae. Crinkled passionflower.

For previous introduction and description see 110601.

110808. PHASEOLUS LUNATUS L. Faba-
ceae. Lima bean.110809. SCLEROPOA RIGIDA (L.) Griseb.
Poaceae. Grass.

For previous introduction and description see 110555.

110810 to 110817. SOLANUM spp. Solana-
ceae.110810. SOLANUM AURICULATUM Ait.
Nightshade.

A shrubby perennial, 4 feet high, with large hairy mulleinlike leaves up to 7 inches long and small violet flowers in dense corymbs. Native to Madagascar.

For previous introduction see 104593.

110811. SOLANUM CALDASII Humb. and
Bonpl.

A white-hairy perennial with unequally pinnatisect leaves 4 inches long and small flowers one-half inch across, in long-stalked racemes. Native to Ecuador.

For previous introduction see 104594.

110812. SOLANUM DULCAMARA L.
Bitter nightshade.

110813. SOLANUM GRACILE Otto.

For previous introduction and description see 110659.

110814. SOLANUM HETERODOXUM Dun.

For previous introduction and description see 110630.

110815. SOLANUM SISYMBRIFOLIUM Lam.

For previous introduction and description see 110632.

110816. SOLANUM SODOMEUM L.
Nightshade.

A subtropical bushy evergreen about 3 feet high with small violet flowers. Native to the warmer regions of the Old World.

For previous introduction see 8881.

110817. SOLANUM TRIFLORUM Nutt.

For previous introduction see 104598.

110818 to 110821. SOLANUM TUBEROSUM
L. Solanaceae. Potato.

From Norway. Tubers presented by the Åkervekstforsøkene Landbrukshøiskolen, Oslo. Received May 3, 1935.

110818 to 110821—Continued.

Introduced for Department specialists.

110818. No. 1.

110819. No. 2.

110820. No. 3. A new variety derived from a cross between *Hindenburg* and *Centifolia*. It is wart immune and resistant to late blight and black scab. It has also proved to be a heavy yielder with well-shaped tubers.

110821. No. 4. *Centifolia*.

110822 to 110829.

From Cuba. Seeds presented by R. M. Grey, Superintendent of the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 27, 1935.

110822. *ALBIZZIA* sp. Mimosaceae.

110823. *ARCHONTOPHOENIX ALEXANDRAE* (F. Muell.) Wendl. and Drude. *Phoenixaceae*. Palm.

A pinnate-leaved palm 70 to 80 feet high, with leaves several feet long and lanceolate, usually entire, leaflets up to 2 feet in length and whitish beneath. The yellow-green flowers are borne in a cluster about a foot long and are followed by small dry round fruits. It is native to Queensland, Australia.

For previous introduction see 104679.

110824. *BIGNONIA MAGNIFICA* Bull. *Bignoniaceae*.

A vigorous climbing vine, native to Colombia, with attractive deep-green simple elliptic-ovate leaves and large trumpet-shaped flowers over 3 inches across. These range in color from mauve to purple red, the throat being primrose.

For previous introduction see 76488.

110825. *CASSIA GRANDIS* L. f. *Caesalpiniaceae*. Pink-shower.

A leguminous tree, 40 to 50 feet high, that produces masses of pale-pink flowers in the early spring before the leaves appear. Native to Panama.

For previous introduction see 106917.

110826 and 110827. *COCHLOSPERMUM VITIFOLIUM* (Willd.) Spreng. *Cochlospermaeae*.

From Cuba. Seeds presented by the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 27, 1935.

A deciduous shrub or small tree, native to Central America, with grapelike leaves and bright-yellow flowers, sometimes 6 inches across, in large clusters.

For previous introduction see 93266.

110826. Cuban type.

110827. Panama type.

110828. *LYCOSERIS OBLONGIFOLIA* Rusby. *Asteraceae*.

A shrub about 8 feet high, with leathery lanceolate leaves, densely white-hairy beneath, and showy orange-yellow flower heads. Native to Guatemala.

110829. *MYRCIARIA CAULIFLORA* (Mart.) Berg. *Myrtaceae*. Jaboticaba.

A Brazilian tree up to 35 feet high, with narrowly elliptic acuminate leaves, short-pedicelled flowers produced directly

110822 to 110829—Continued.

from the bark of the trunk and branches, and purplish-violet, globose edible fruits up to nearly 2 inches in diameter.

For previous introduction see 105745.

110830 to 110832.

From Venezuela and Colombia. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received May 3, 1935.

Introduced for Department specialists.

110830. *FURCRAEA* sp. *Amaryllidaceae*.

No. 3193. Collected near Capacho, Tachira, Venezuela, March 12, 1935.

110831. *GLADIOLUS PSITTACINUS* Hook. *Iridaceae*. Parrot gladiolus.

No. 3262. *Palmaña San Jose*. From a mountain plateau in Colombia, March 24, 1935. A gladiolus with a stout stem 3 feet or more high and usually four rigid swordlike leaves up to 2 feet long. The many-flowered spike reaches a foot or more in length. The flowers are a rich yellow, grained and overlaid with red, particularly about the margins of the segments.

For previous introduction see 57797.

110832. *AMARYLLIS BELLADONNA* L. *Amaryllidaceae*.

No. 3261. *Azucana*. From a paramo swamp in Colombia, March 24, 1935. Flowers pink and white.

110833. *FURCRAEA CUBENSIS* (Jacq.) Vent. *Amaryllidaceae*.

From Haiti. Bulbils presented by Russell Bean. Received May 25, 1935.

Collected March 6, 1935, south of Fort Liberty Bay, Haiti, found growing on lime soil in partial shade. A nearly trunkless, succulent plant with lanceolate, bright-green leaves 3 to 6 feet long which yield fiber softer and finer than sisal. The small greenish-white flowers are borne on a stalk sometimes 20 feet high. The bulbils are as plentiful as seeds.

For previous introduction see 33493.

110834 to 110837. *AVENA SATIVA* L. *Poaceae*. Oats.

From the Union of Soviet Socialist Republics. Seeds presented by G. N. Shlykov, Department of New Cultures, Institute of Plant Industry, Leningrad. Received May 8, 1935.

Introduced for Department specialists.

110834. No. 3444. *Zhentshushina*. From Vyatka.

110835. No. 8231. No. 26-2015. From Ukraine.

110836. No. 8232. No. 21-18. From Ukraine.

110837. No. 7237. *Verkhnistchesky 053*. From Ukraine.

110838 and 110839.

From Mexico. Seeds purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Vera Cruz. Received April 30, 1935.

110838. *AECHMEA BRACTEATA* (Sw.) Griseb. *Bromeliaceae*.

A West Indian epiphyte, with 12 to 20 spiny, oblong, radical leaves about 2 feet

110838 and 110839—Continued.

long and a showy spike of small yellow flowers on a stout scape up to 3 feet high.

110839. *AECHMEA MEXICANA* Baker. Bromeliaceae.

A tropical epiphyte with a basal rosette of 20 to 30 large, fine-toothed leaves and a lax panicle of crimson flowers borne on a long stalk arising from the center of the plant. Native to central Mexico.

For previous introduction see 108016.

110840 to 110844.

From Germany. Seeds presented by Gebrüder Dippe A. G., Quedlinburg. Received April 26, 1935.

Introduced for Department specialists.

110840. *BETA VULGARIS* L. Chenopodiaceae. Common beet.

Delicacy. A blood-red table beet of excellent flavor.

110841. *BRASSICA OLERACEA* BOTRYTIS L. Brassicaceae. Cauliflower.

Success.

110842. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.

Ideal. A pickling cucumber.

110843 and 110844. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.

Stringless wax bushbeans.

110843. *Dippegold.* 110844. *Superba.*

110845 to 110858.

From Colombia and Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 30, 1935.

Introduced for Department specialists.

110845. *BOCCONIA FRUTESCENS* L. Papaveraceae.

No. 3280. *Trompillo.* Presented April 4, 1935, by Dr. Perez, Departamento Tolima, Colombia. A large showy shrub 10 feet high, with large deeply lobed attractive leaves which are pale beneath. The small greenish-yellow flowers are borne in great numbers in large pendent panicles often a foot long.

For previous introduction see 88211.

110846. *HYLOCEREUS POLYRHIZUS* (Weber) Britt. and Rose. Cactaceae. Nightblooming cereus.

No. 3268. *Pitahaya.* From the market at Bogotá, Colombia, March 27, 1935. A triangular-stemmed cactus, sometimes a shrub and in other situations a climbing vine, with large bright-red flowers. The plant is cultivated for its pale-yellow fruits which are about 5 inches long, something like an artichoke in appearance, with pulp of delicious flavor.

For previous introduction see 54973.

110847. *CESTRUM MUTISII* Willd. Solanaceae.

No. 3222. *Tinto.* Pamplona, Colombia, March 23, 1935. A shrub 4 to 10 feet high, with oblong-acuminate leaves and pale-green flowers.

110848. *CESTRUM SANTANDERIANUM* Franey. Solanaceae.

No. 3255. Collected March 24, 1935, in a paramo swamp along the highway between Pamplona and Malaga, Colombia.

110845 to 110858—Continued.

A bushy shrub up to 20 feet high, with oblong or elliptic leaves about 5 inches long and pale greenish-yellow flowers in loose clusters in the upper axils. Native to northern South America.

110849. *TEPHROSIA TOXICARIA* (Sw.) Pers. Fabaceae.

No. 3279. *Barbasco.* From the Departamento del Huila, Colombia, April 4, 1935. Presented by Dr. Pérez Arbalaz.

110850 and 110851. *CUCUMIS MELO* L. Cucurbitaceae. Melon.

From the Bogotá, Colombia market, March 27, 1935.

110850. No. 3269. 110851. No. 3270.

110852. *PLATYMISCIUM DIADELPHUM* Blake. Fabaceae.

No. 3214. *Peraco.* March 19, 1935. Outskirts of Cucuta, Colombia. A shrub 2 to 6 feet high, or sometimes a tree, found in dry semidesert areas growing among cacti.

110853. *MAMMEA AMERICANA* L. Clusiaceae. Mamey.

No. 3271. *Zapote mamey.* From the market at Bogotá, Colombia, April 2, 1935. A tropical tree with glossy dark-green foliage and large gray-green, edible fruits.

For previous introduction see 98868.

110854. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

No. 3277. From La Uribe, near Bogotá, Colombia, April 3, 1935. A cultivated plant 15 feet high, with vermilion flowers.

110855. *PASSIFLORA* sp. Passifloraceae.

No. 3267. *Curuba de castilla.* From the market at Bogotá, Colombia, March 27, 1935.

110856. *PAULLINIA FUSCESCENS* H. B. K. Sapindaceae.

No. 3207. From the outskirts of San Cristobal, Tachira, Venezuela, March 13, 1935. A twining vine, native to northern Brazil, with bright-red fruits.

110857. *PHYLLANTHUS SALVIAEFOLIUS* H. B. K. Euphorbiaceae.

No. 3273. *Cedrillo, Barbasquillo, Chirrinchao.* From La Uribe, near Bogotá, Colombia, April 3, 1935. A shrub 15 to 20 feet high, native to Colombia.

110858. *PHYSALIS* sp. Solanaceae.

No. 3265. *Uchuba.* From the market at Bogotá, Colombia, March 27, 1935. A cultivated fruit, used for jellies and preserves.

110859. *LUPINUS* sp. Fabaceae.

From Washington, D. C. Seeds presented by Dr. A. Hrdlicka, Curator, Division of Physical Anthropology, United States National Museum. Received May 6, 1935.

A pink lupine collected on Kodiak Island, Alaska, in the summer of 1934.

110860. *GOSSYPIUM KIRKII* Masters. Malvaceae. Cotton.

From Trinidad, British West Indies. Seeds presented by Dr. S. C. Harland, Empire Cotton Growing Corporation, Cotton Research Station. Received April 27, 1935.

Introduced for Department specialists.

110860—Continued.

A bushy, somewhat climbing plant from eastern tropical Africa with palmately five-lobed leaves and light-yellow flowers.

For previous introduction see 80210.

110861. CYCAS SIAMENSIS Miquel.
Cycadaceae.

From Burma, India. Seeds presented by W. V. Palmer, silviculturist, Mayayo. Received May 3, 1935.

A small eventually palmlike tree with a trunk 2 to 6 feet high, much swollen at the base. The stiffly spreading light-green, pinnately compound leaves are 3 feet long, and the ovoid fruits, about 6 inches long, are covered with orange wool. Native to Siam.

For previous introduction see 102373.

110862. HETEROSPATHE ELATA Scheff.
Phoenicaceae. Palm.

From Manila, Philippine Islands. Seeds presented by David Barry, Jr., Los Angeles, Calif. Received May 11, 1935.

Bonga. A tall unarmed palm with a straight slender stem and long pinnate leaves, growing in protected situations where the rainfall is evenly distributed. It is one of the most attractive and graceful palms and will make a good plant for the conservatory and possibly a good house plant. Native to Netherland India.

110863. ZEPHYRANTHES sp. Amaryllidaceae.

From Mexico. Bulbs purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Vera Cruz. Received May 11, 1935.

Introduced for Department specialists.

A species with white flowers.

110864 and 110865.

From Puerto Rico. Seeds presented by Atherton Lee, Director, Agricultural Experiment Station, Mayaguez. Received May 8, 1935.

Introduced for Department specialists.

110864. CASSIA NODOSA Buch.—Ham. Caesalpinziaceae.

A moderate-sized, deciduous tree with long drooping branches and glossy bipinnate leaves. In the spring it bears a profusion of beautiful pink, rose-scented flowers in dense long-stalked racemes. The leaves and flowers appear at the same time. Native to northwestern India.

For previous introduction see 101435.

110865. ERYTHRINA POEPPIGIANA (Walp.) O. F. Cook (E. micropteryx Poepp.). Fabaceae. Bucare.

A handsome, tender, leguminous tree with showy red flowers; native to Peru.

For previous introduction see 102606.

110866. ZEPHYRANTHES TUBISPATHA (L'Herit.) Herb. Amaryllidaceae.

From the British West Indies. Bulbs presented by F. G. Harcourt, Agricultural Superintendent, Agricultural Department, Dominica. Received May 15, 1935.

Brujita blanca. A summer flowering plant with four or five narrow-linear leaves 5 to 12 inches long and a slender scape 4

110866—Continued.

inches long bearing a white flower about 2 inches in length. Native to the West Indies.

For previous introduction see 107148.

110867. ILEX CORNUTA Lindl. and Paxt. Aquifoliaceae. Chinese holly.

Plants growing at the United States Plant Introduction Garden, Chico, Calif. Numbered in May, 1935, for convenience in distribution.

A seedling of P. I. 24638; this has a beautiful round habit of growth, and the large, attractive berries are parthenocarpic.

110868. POA PALUSTRIS L. Poaceae. Fowl meadow grass.

From Canada. Seeds presented by H. F. Roberts, University of Manitoba, Winnipeg. Received May 8, 1935.

For previous introduction see 104677.

110869 and 110870.

From Cuba. Seeds presented by R. M. Grey, Superintendent of the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received May 10, 1935.

110869. HETEROPHRAGMA ADENOPHYLLUM (DC.) Seem. Bignoniaceae.

A handsome tree related to the catalpa, but adapted for cultivation in tropical regions only, as it is very susceptible to frost. It reaches a height of 30 to 50 feet, with large opposite pinnate leaves and woolly, brownish-yellow flowers in terminal panicles. Native to tropical Africa.

For previous introduction see 105788.

110870. TECOMA STANS (L.) Juss. Bignoniaceae.**110871 to 110877.**

From the Union of Soviet Socialist Republics. Seeds presented by the Botanic Garden, Samara 2. Received May 13, 1935. Introduced for Department specialists.

110871. ARTEMISIA GLAUCA Pall. Asteraceae.

A herbaceous perennial up to 2 feet high. Native to Siberia.

110872. ASTER HOLOPHYLLUS Hemsl. Asteraceae.

An annual or biennial, with oblong-linear puberulent leaves and small sky-blue flower heads. Native to the Amur River region, Siberia.

110873. ASTRAGALUS ALOPECUROIDES L. Fabaceae. Foxtail milkvetch.

An erect pubescent Siberian species 2 to 5 feet high, with narrowly oval leaves and yellow flowers produced in thick oblong spikes.

For previous introduction see 66536.

110874. CAYLUSEA ABYSSINICA (Fres.) Fisch. and Mey. Resedaceae.

A bushy annual up to 3 feet high, with narrow leaves and large racemes of inconspicuous flowers. Native to Ethiopia.

110875. LATHYRUS sp. Fabaceae.**110876. LYCOPERSICON ESCULENTUM Mill.** Solanaceae. Tomato.

110871 to 110877—Continued.

110877. *LYCOPERSICON ESCULENTUM* Mill.
Solanaceae. Tomato.

Reine de Hative.

110878 to 110882.

From the Union of Soviet Socialist Republics. Seeds presented by the Botanic Garden of the Academy of Sciences, Minsk. Received May 11, 1935.

Introduced for Department specialists.

110878. *DESCHAMPSIA CAESPITOSA* (L.) Beauv. Poaceae. Tufted hairgrass.

110879 to 110882. *FESTUCA* spp. Poaceae. Fescue.

110879. *FESTUCA OVINA* L. Sheep fescue.

110880. *FESTUCA OVINA DURIUSCULA* (L.) Koch.

110881. *FESTUCA OVINA GLAUCA* (Lam.) Koch.

110882. *FESTUCA OVINA SULCATA* Hack.

110883 to 110975.

From Colombia and Venezuela. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received May 3, 1935.

Introduced for Department specialists.

110883. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. Okra.

No. 3126. *Quimbombo*. From the market at Barquisimeto, Venezuela, March 2, 1935. The seeds are roasted and ground to make a beverage like coffee.

110884. *LEUCAENA GLAUCA* (L.) Benth. Mimosaceae.

No. 3216. From Cucuta, Colombia, March 19, 1935.

For previous introduction see 94782.

110885. *ACNISTUS* sp. Solanaceae.

No. 3188. *Uvita*. Collected March 12, 1935, near Capacho, Tachira, Venezuela. A small tree 10 to 20 feet high, with white flowers. It is cultivated for its edible fruits.

110886. *ALLIUM SCHOENOPRASUM* L. Liliaceae. Chives.

No. 3168. *Cebollin*. Locally grown seed purchased March 7, 1935, at Casa de Hierro, a hostelry in the Andes, Venezuela.

110887. *ALTHAEA ROSEA* (L.) Cav. Malvaceae. Hollyhock.

No. 3148. From El Sol de los Andes, near San Cristobal, Tachira, Venezuela, March 8, 1935. A cultivated hollyhock with fringed pink petals.

110888. *AMBROSIA CUMANENSIS* H. B. K. Ambrosiaceae.

No. 3199. *Altamisia*. From San Cristobal, Tachira, Venezuela, March 13, 1935. A herbaceous perennial about 2 feet high. Native to Venezuela.

110889. *ANETHUM GRAVEOLENS* L. Apiaceae. Dill.

No. 3130. *Hinojo*. From the market at Barquisimeto, Venezuela, March 2, 1935. A cultivated plant, used medicinally and as a refreshing drink.

110883 to 100975—Continued.

110890. *ASPIDOSPERMA* sp. Apocynaceae.

No. 3201. From San Cristobal, Tachira, Venezuela, March 13, 1935. A slender tree 20 feet high.

110891. *BANISTERIOPSIS* sp. Malpighiaceae.

No. 3117. Collected between Valencia and Guatoporo, Carabobo, Venezuela, February 26, 1935. A small shrub 2 to 3 feet high with semitwining branches.

110892. *BANISTERIOPSIS* sp. Malpighiaceae.

No. 3192. From near Capacho, Tachira, Venezuela, March 12, 1935. A woody vine about 20 feet high.

110893 to 110895. *BAUHINIA* spp. Caesalpiniaceae.

110893 and 110894. *BAUHINIA CUMANENSIS* H. B. K.

Bejuca de cadena. Collected along the highway between Valencia and El Cambul, Carabobo, Venezuela, February 23, 1935. A shrubby climber about 30 feet long, native to Venezuela, with bifid ovate leaves and terminal racemes of small white fragrant flowers.

110893. No. 3085. 110894. No. 3098.

110895. *BAUHINIA MOLLICELLA* Blake.

No. 3179. *Librito*. From near Capacho, Tachira, Venezuela, March 12, 1935. A spiny tree about 20 feet high, with white flowers. Native to Venezuela.

110896. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 3135. *Pepino extranjero*. From the market at Barquisimeto, Venezuela, March 2, 1935. A cultivated waxgourd 6 by 7 inches, covered with thick gray bloom. The white flesh smells like a cucumber. It is boiled as a vegetable, also used raw in salads. Probably introduced from China by the local Chinese.

For previous introduction see 105334.

110897. *BOWDICHIA VIRGILIOIDES* H. B. K. Fabaceae.

No. 3120. *Chaparro*. Collected between Valencia and Guatoporo, Carabobo, Venezuela, February 26, 1935. A small, usually crooked tree about 25 feet high, with leathery compound leaves and terminal panicles of small blue flowers, followed by seed pods which turn reddish when near maturity. Native to dry regions in Venezuela and Brazil.

For previous introduction see 109916.

110898. *CENTROSEMA PUBESCENS* Benth. Fabaceae.

No. 3218. Collected between Cucuta and Pamplona, Colombia, March 20, 1935.

For previous introduction see 110173.

110899 to 110901. *BRASSICA* spp. Brassicaceae.

110899 and 110900. Locally grown seed from Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935.

110899. *BRASSICA CAMPESTRIS* L. Rutabaga.

No. 3164. *Ruta*.

110883 to 110975—Continued.

110900. BRASSICA OLERACEA BOTRYTIS L.
Cauliflower.

No. 3167. *Coliflor*.

110901. BRASSICA sp.

No. 3128. *Mostaza*. From the market at Barquisimeto, Venezuela, March 2, 1935. A mustard cultivated for birdseed.

110902 and 110903. BUDDLEIA AMERICANA L. Loganiaceae.

A shrub or small tree with fragrant small yellow flowers in paniced spikes. Native to tropical America.

110902. No. 3071. Collected on the road between Caracas and Cabo Blanco, Federal District, Venezuela, February 16, 1935.

110903. No. 3189. *Salvia, Santa Maria*. Collected near Capacho, Tachira, Venezuela, March 13, 1935.

110904. CAJANUS INDICUS Spreng. Fabaceae.
Pigeonpea.

No. 3187. *Quinchocho*. From near Capacho, Tachira, Venezuela, March 12, 1935. A shrub 6 to 10 feet high with yellow flowers. It is cultivated and used as a food.

110905. CALOTROPIS PROCERA Ait. Asclepiadaceae.

No. 3067. Collected on the road between Caracas and Cabo Blanco, Federal District, Venezuela, February 15, 1935. The giant milkweed, which becomes a shrub 6 to 15 feet high. The stems furnish a fine fiber, and the floss from the fruits is used for stuffing mattresses. Introduced from India, the plant has now become naturalized in Venezuela.

For previous introduction see 73507.

110906. CANAVALLA MACROPLEURA Piper. Fabaceae.

No. 3041. From near Sabana Grande, Federal District, Venezuela, February 12, 1935. A woody vine native to Venezuela.

110907. CAPSICUM sp. Solanaceae.

No. 3136. From Barquisimeto, Venezuela, March 3, 1935. A cultivated ornamental.

110908. CARDIOSPERMUM GRANDIFLORUM Sw. Sapindaceae.

No. 3115. *Farolita de la virgen*. Collected between Valencia and Guataporo, Venezuela, February 26, 1935. A woody vine up to 25 feet long, with biternate leaves about 8 inches long and white flowers in axillary corymbs. Native to Jamaica.

110909. URVILLEA ULMACEA H. B. K. Sapindaceae.

No. 3186. From near Capacho, Tachira, Venezuela, March 12, 1935. A large climbing shrub with tendrils, trifoliate leaves, and axillary racemes of small whitish flowers. Native to Venezuela.

110910 and 110911. CARICA PAPAYA L. Papayaceae.
Papaya.

From the market at Barquisimeto, Venezuela, March 2, 1935.

110883 to 110975—Continued.

110910. No. 3132. *Lechosa*. A cultivated fruit 13 by 3 inches, with pale cream-colored flesh.

110911. No. 3131. *Lechosa*. A cultivated fruit 8 by 4 inches, five-ribbed, with orange-colored flesh.

110912. CASSIA sp. Caesalpinaceae.

No. 3194. *Brusca negra*. From near Capacho, Tachira, Venezuela, March 12, 1935.

110913. PHYTOLACCA ICOSANDRA L. Phytolaccaceae.

No. 3173. *Tabonera*. From Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935. An erect ornamental perennial, somewhat succulent, 3 to 10 feet high, with elliptic-ovate leaves 3 to 12 inches long, greenish flowers, and racemes of black berries. Native to tropical America.

110914. CLEOME ACULEATA L. Capparidaceae.

No. 3206. From near San Cristobal, Tachira, Venezuela, March 13, 1935. An annual up to 3 feet high, with digitately three-foliolate leaves and small solitary white flowers. Native to tropical America.

For previous introduction see 107762.

110915. CLITORIA DENDRINA Pittier. Fabaceae.

No. 3092. Along the highway between Valencia and El Cambul, Carabobo, Venezuela, February 23, 1935. A shrubby tree about 15 feet high, with small dark-purple flowers in dense terminal clusters which appear before the trifoliate leaves. Native to Venezuela.

110916. TEPHROSIA CINEREA (L.) Pers. Fabaceae.

No. 3212. From a dry river bed near San Cristobal, Tachira, Venezuela, March 13, 1935. A shrubby perennial with a thick rootstalk, slender ascending stems 3 to 4 feet long, and small purplish flowers in rather dense showy racemes. Native to the West Indies.

For previous introduction see 109928.

110917. BENTHAMANTHA CARIBAEA (Jacq.) Kuntze. Fabaceae.

No. 3154. Near El Cobre, Tachira, Venezuela, along the roadside, March 8, 1935. A shrub up to 6 feet high.

For previous introduction see 109929.

110918. TEPHROSIA TOXICARIA (Sw.) Pers. Fabaceae.

No. 3200. *Barbasco de raiz*. San Cristobal, Tachira, Venezuela, March 13, 1935.

For previous introduction and description see 110309.

110919 to 110921. CROTON spp. Euphorbiaceae.

110919. CROTON PUNGENS Jacq.

No. 3223. Collected between Cucuta and Pamplona, Colombia, March 20, 1935. A small shrub about 6 feet high, native to Brazil, with small cream-colored flowers.

110883 to 110975—Continued.

110920. *CROTON GOSSYPIFOLIUS* Vahl.

No. 3190. Near Capacho, Tachira, Venezuela, March 12, 1935. A slender tree up to 45 feet high. Native to Trinidad.

110921. *CROTON DOLICHOSTACHYUS* Pitier.

No. 3146. *Pringamozza*. Collected between Barquisimeto and Carora, Lara, Venezuela, March 6, 1935. A shrub or small tree up to 9 feet high. Native to Venezuela.

110922 and 110923. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cushaw.

Aullama. From the market at Barquisimeto, Venezuela, March 2, 1935. A small squash, 12 by 8 inches, with green skin covered with yellow blotches.

110922. No. 3133. 110923. No. 3134.

110924. *DALBERGIA* sp. Fabaceae.

No. 3202. From San Cristobal, Tachira, Venezuela, March 13, 1935. A large tree.

110925. *DATURA ARBOREA* L. Solanaceae. Floripondio.

No. 3224. Collected between Cucuta and Pamplona, Colombia, March 20, 1935. A shrub or small tree with ovate-lanceolate leaves and large trumpet-shaped, greenish-white, fragrant flowers.

For previous introduction see 91414.

110926. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 3163. *Zanahoria*. Chachopo, Merida, Venezuela. Locally grown seed purchased at Casa de Hierro, Venezuela, March 7, 1935.

110927 and 110928. *ESPELETIA* spp. Asteraceae.

Fruitejon. An attractive yellow-flowered shrub up to 4 feet high, found growing in paramos, where it makes small thickets. The dense wool that covers the leaves is used in making cushions and mattresses.

110927. No. 3157. From the roadside near El Cobre, Tachira, Venezuela, March 8, 1935.

110928. No. 3243. From the highway between Pamplona and Malaga, Colombia, March 24, 1935.

110929. *FICUS ANGUSTIFOLIA* Blume. Moraceae.

No. 3140. *Matapolo*. From near Timotes, Venezuela, March 6, 1935. A woody vine up to 20 feet long. Native to the Molucas, Netherland India.

110930. *GLIRICIDIA SEPIUM* (Jacq.) Kunth. Fabaceae.

No. 3119. *Mataraton*. Collected between Valencia and Guataporo, Carabobo, Venezuela, February 26, 1935. A small tree up to 30 feet high, with alternate compound leaves. The flowers resemble those of the black locust in size, but are pink.

For previous introduction see 106990.

110931. *GOSSYPIUM HIRSUM* L. Malvaceae. Upland cotton.

110883 to 110975—Continued.

No. 3217. Collected between Cucuta and Pamplona, Colombia, March 20, 1935. Scanty plants 2 feet high; either wild or escaped from cultivation.

For previous introduction see 102751.

110932. *GOSSYPIUM* sp. Malvaceae. Cotton.

No. 3221. Collected between Cucuta and Pamplona, Colombia, March 20, 1935. Plants 3 feet high, probably escaped from cultivation.

110933 and 110934. *HORDEUM VULGARE* L. Poaceae. Barley.

Cebada. From the market at Barquisimeto, Venezuela, March 2, 1935. Used for making soft drinks.

110933. No. 3124. 110934. No. 3125.

110935. *JATROPHA URENS* L. Euphorbiaceae.

No. 3144. *Pringamozza*. Collected between Barquisimeto and Carora, Lara, Venezuela, March 6, 1935. A shrubby perennial up to 10 feet high, covered with stinging hairs; with ternate leaves 6 to 15 inches across and small sweet-scented white flowers. Native to tropical America.

110936 to 110938. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.

110936. No. 3165. *Lechuga taza*. From Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935. A curly lettuce.

110937. No. 3166. *Lechuga blanco*. From Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935. A white lettuce.

110938. No. 3137. *Lechuga*. From the market at Barquisimeto, Venezuela, March 2, 1935.

110939. *LINUM USITATISSIMUM* L. Linaceae. Flax.

No. 3129. *Linaza*. From the market at Barquisimeto, Venezuela, March 2, 1935.

For previous introduction see 109970.

110940. *LONCHOCARPUS SERICEUS* (Poir.) H. B. K. Fabaceae.

No. 3185. *Zapato*. From near Capacho, Tachira, Venezuela, March 12, 1935. A slender tree up to 60 feet high with racemes of lavender flowers.

For previous introduction see 106996.

110941. *LONCHOCARPUS PUNCTATUS* H. B. K. Fabaceae.

No. 3213. *Peraco*. Near San Antonio, Venezuela, March 18, 1935. A small tree or shrub about 9 feet high. Native to Venezuela.

110942 to 110944. *LUPINUS* spp. Fabaceae.110942. *LUPINUS* sp.

No. 3156. *Choco*. From paramo near Timotes, Merida, Venezuela, March 7, 1935, at 13,000 feet altitude. An herb 2 feet high, with purple flowers.

110943 and 110944. *LUPINUS PANICULATUS* Desr.

110883 to 110975—Continued.

A stout perennial lupine over 2 feet high, with lanceolate leaflets and racemes of showy purple flowers, the standards pink tipped and with a yellow margin. Native to Peru.

110943. No. 3155. *Chocho*, *Quinchoco*. From Sabana Grande, Venezuela, March 8, 1935.

110944. No. 3196. *Tuna*. From San Cristobal, Tachira, Venezuela, March 13, 1935.

110945 and 110946. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

110945. No. 3159. From Sabana Grande, Merida, Venezuela, March 8, 1935. Escaped from cultivation; fruit up to 1 inch in diameter.

110946. No. 3215. *Ovita*. From the Cucuta market, Colombia, March 19, 1935. A small, red, five-ribbed tomato with scanty seeds, dry pulp, and tough skin. Said to be a local variety.

110947. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.

No. 3162. A cultivated tobacco purchased at the Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935. Locally grown seed.

110948. *OENOTHERA TETRAPTERA* Cav. Onagraceae.

No. 3242. From the highway between Pamplona and Malaga, Colombia, March 24, 1935. A perennial about a foot high, with alternate subpinnate leaves and large, solitary flowers, white, becoming rose with age. Native to Mexico.

110949. *ORTHROSANTHUS CHIMBORACENSIS* (H. B. K.) Baker. Iridaceae.

No. 3151. Paramo near Bailadores, Tachira, Venezuela, March 8, 1935. An irishike plant, native to the Andes, where it grows at the frost line, 12,500 feet or more altitude. It has a stout woody rhizome, grasslike leaves a foot or more long, and small blue flowers, opening in succession along a lax narrow panicle.

110950 and 110951. *PASSIFLORA* spp. Passifloraceae.

From the market at San Cristobal, Venezuela, March 9, 1935. A cultivated vine. The fruits are used in making a refreshing drink.

110950. *PASSIFLORA* sp.

No. 3176. *Parchita*.

110951. *PASSIFLORA* sp.

No. 3175. *Curuba*. A pale cream-colored, faintly scented fruit, 3 inches long and 2 inches in diameter, with seeds enclosed in orange-colored pulp which smells and tastes something like grapefruit.

110952. *PAULLINIA ERIANTHA* Benth. Sapindaceae.

No. 3183. Collected near Capacho, Tachira, Venezuela, March 12, 1935. A woody vine, native to Colombia and Peru.

110953. *PHYSALIS* sp. Solanaceae.

No. 3237. Collected along the highway between Pamplona and Malaga, Colombia, March 24, 1935. An herb 1 foot high; the flowers are cream-colored with a brown star-shaped marking at the base of the corolla.

110883 to 110975—Continued.

110954 to 110956. *PIPER* spp. Piperaceae. Pepper.

110954. *PIPER TUBERCULATUM* Jacq.

No. 3118-A. Between Valencia and Guataporo, Carabobo, Venezuela, February 28, 1935. A slender shrub 10 feet high.

110955 and 110956. From San Cristobal, Tachira, Venezuela, March 13, 1935.

110955. *PIPER* sp.

No. 3209. *Cordoncillo*.

110956. *PIPER* sp.

No. 3211.

110957 and 110958. *SAMANEA SAMAN* (Jacq.) Merr. Mimosaceae.

The *rain tree* of the West Indies. A large spreading tree up to 60 feet high, native to Central America, but widely distributed throughout the Tropics as an ornamental shade tree.

For previous introduction see 99004.

110957. No. 3122. *Saman*. Collected between Valencia and Guataporo, Carabobo, Venezuela, February 26, 1935.

110958. No. 3208. *Saman*. Collected at San Cristobal, Tachira, Venezuela, March 13, 1935.

110959. *POLYGONUM PUNCTATUM* Ell. Polygonaceae. Fleecflower.

No. 3198. From near San Cristobal, Tachira, Venezuela, March 13, 1935, found growing in a ditch. A slender shrub 2 to 3 feet high with white flowers.

For previous introduction see 106580.

110960. *PSIDIOPSIS MORITZIANUM* Berg. Myrtaceae.

No. 3150. *Siete cueros*. From Sabana Aura, Tachira, Venezuela, March 8, 1935. An ornamental evergreen shrub about 6 feet high, with small sweet aromatic guavalike fruits.

110961. *RUPRECHTIA* sp. Polygonaceae.

No. 3191. From near Capacho, Tachira, Venezuela, March 12, 1935. A tree about 15 feet high.

110962 to 110965. *SERJANIA* spp. Sapindaceae.

110962. *SERJANIA RHOMBEA* Radlk.

No. 3184. Near Capacho, Tachira, Venezuela, March 12, 1935. A climbing shrub, native to Venezuela.

110963 and 110964. *SERJANIA GLABRATA* H. B. K.

A climbing shrub with alternate bi-ternate leaves. Native to the temperate regions of Peru.

For previous introduction see 109871.

110963. No. 3177. Near Capacho, Tachira, Venezuela, March 12, 1935.

110964. No. 3116. Collected between Valencia and Guataporo, Carabobo, Venezuela, February 26, 1935. A vine 30 feet high.

110965. *SERJANIA* sp.

No. 3178. From near Capacho, Tachira, Venezuela, March 12, 1935.

110883 to 110975—Continued.

110966. *SESAMUM ORIENTALE* L. Pedalia-
ceae. Sesame.

No. 3123. *Ajonjali*. From the market at Barquisimeto, Venezuela, March 2, 1935.

For previous introduction see 104263.

110967. *SOLANUM* sp. Solanaceae.

No. 3195. *Tuna*. From San Cristobal, Tachira, Venezuela, March 13, 1935. An herb 2 feet high, with ovoid or ellipsoid orange fruits.

110968. *TAGETES APEPALA* Posada. Aster-
ceae.

No. 3147. *Ruda de perro*, *Amapola*. From El Sol de los Andes, near San Cristobal, Tachira, Venezuela, March 8, 1935. An erect annual, native to Colombia at an altitude of about 5,500 feet.

110969. *TRAGOPOGON PORRIFOLIUS* L. Ci-
choriaceae. Vegetable-oyster.

No. 3169. From Casa de Hierro, Chachopo, Merida, Venezuela, March 7, 1935.

110970. *TRIPLARIS FELIPENSIS* Wedd.
Polygonaceae.

No. 3197. *Palo Santo*. From San Cristobal, Tachira, Venezuela, March 13, 1935. A tree up to 20 feet high, with ovate-elliptic leaves about 1 foot long. Native to Venezuela at about 1,000 feet altitude.

110971 to 110975. *ZEA MAYS* L. Poaceae.
Corn.

Cultivated varieties used for food.

110971. No. 3203. *Blandito*. From San Cristobal, Tachira, Venezuela, March 13, 1935.

110972. No. 3161. *Chiquito*. From Tovar, Tachira, Venezuela, March 7, 1935. A white variety which produces well in cold climates. Stalks 2 to 3 feet high, ears 6 to 8 inches long, 1 to 3 per stalk.

110973. No. 3138. *Cariaca*. From the market at Barquisimeto, Venezuela, March 2, 1935.

110974. No. 3204. *Blanco*. From San Cristobal, Tachira, Venezuela, March 13, 1935.

110975. No. 3160. *Chiquito*, *Chimirito*, *Perrito*. From Tovar, Tachira, Venezuela, March 7, 1935. A yellow form of No. 3161. [See 110972 for description.]

110976 to 110989.

From the Union of Soviet Socialist Republics. Seeds presented by W. Kern, Botanic Garden, Academy of Sciences, Alma-Ata, Kazakstan. Received May 9, 1935.

Introduced for Department specialists.

110976 to 110978. *ALLIUM* spp. Liliaceae.

110976. *ALLIUM GLACIALE* Vved.

An allium with terete stems about 1 foot high, linear leaves, and dense umbels of small pink flowers. Native to Turkistan.

110977. *ALLIUM MONADELPHUM* Turcz.

An allium, native to eastern Siberia, with terete leaves and a scape over 1 foot high, with a dense umbel of small rose-purple flowers.

110976 to 110989—Continued.

110978. *ALLIUM PLATYSPATHUM* Schrenk.

An allium with a scape 3 to 6 inches high, several linear leaves, and an umbel of small purple flowers. Native to Turkistan.

110979. *ALLIUM* sp.

110980. *FESTUCA ELATIOR ARUNDINACEA* (Schreb.) Wimm. Poaceae. Fescue.

For previous introduction see 110797.

110981. *FESTUCA OVINA SULCATA* Hack. Poaceae. Fescue.

For previous introduction see 110882.

110982 to 110984. *IRIS* spp. Iridaceae.

110982. *IRIS SONGARICA* Schrenk.

A densely tufted Apogon iris about 1 foot high, with narrow-linear, strongly ribbed leaves up to a foot in length and two to three lilac-colored flowers over an inch long. Native to central Asia.

For previous introduction see 110132.

110983. *IRIS* sp.

110984. *IRIS* sp.

110985. *PICEA SCHRENKIANA* Fisch. and Mey. Pinaceae. Schrenk spruce.

A large tree up to 100 feet high, with ashy gray branchlets, often narrowly pyramidal in habit. The dark-green, rigid leaves are over an inch long, and the dark shining brown cylindrical cones are 3 to 5 inches long and an inch in diameter. Native to central Asia at altitudes between 4,500 and 10,000 feet.

For previous introduction see 52659.

110986 to 110989. *RHEUM* spp. Polygonaceae. Rhubarb.

110986 and 110987. *RHEUM SONGARICUM* Schrenk.

A coarse herbaceous perennial with deeply cordate, reniform leaves. Native to alkaline deserts in central Asia.

For previous introduction see 110147.

110988. *RHEUM WITTROCKII* Lundstroem.

A tall broad-leaved European species with light-pink flowers and fruits.

For previous introduction see 69107.

110989. *RHEUM* sp.

110990 to 111018.

From Colombia. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received May 10, 1935.

Introduced for Department specialists.

110990. *BOCCONIA FRUTESCENS* L. Papaveraceae.

No. 3308. *Trompeto*. Collected along the railroad track between Anolaima and Cachipay, Cundinamarca.

For previous introduction and description see 110845.

110991. *BOMAREA* sp. Amaryllidaceae.

No. 3275. *Pecosa*. From La Uribe, near Bogotá, April 3, 1935. A climbing plant which grows 20 feet high, with golden-brown flowers marked with darker spots.

110990 to 111018—Continued.

110992. *DIOCLEA SERICEA* H. B. K. Fabaceae.

No. 3291. From La Esperenza, Cundinamarca, April 11, 1935. A tender shrubby twiner about 4 feet long, with ternate leaves and long axillary racemes of showy lavender flowers. Native to Colombia.

110993. *CANAVALIA* sp. Fabaceae.

No. 3345. From La Esperenza, Cundinamarca, April 12, 1935.

110994. *CARICA PAPAYA* L. Papayaceae.
Papaya.

No. 3292. From La Mesa, Cundinamarca, April 13, 1935. A cultivated papaya.

110995. *CHAMAECRISTA FLAVICOMA* (H. B. K.) Greene. Caesalpiniaceae.

No. 3303. From Anolaima, Cundinamarca, April 16, 1935. A small yellow-flowered shrub 2 to 3 feet high. Native to Venezuela.

110996. *CISSAMPELOS PAREIRA* L. Menispermaceae.

No. 3290. From La Esperenza, Cundinamarca, April 11, 1935. A climbing shrub, with pettate, downy leaves and small greenish flowers in axillary cymes, followed by red drupes. Native to tropical America.

110997 and 110993. *CLIBADIUM SURINAMENSE* L. Asteraceae.

A plant 4 to 7 feet high, with white flowers occurring in thick stands.

For previous introduction see 108257.

110997. No. 3281. From La Esperenza, Cundinamarca, April 11, 1935.

110998. No. 3305. From Anolaima, Cundinamarca, April 16, 1935.

110999. *CENTROSEMA PLUMIERI* (Turp.) Benth. Fabaceae.

No. 3338. From La Esperenza, Cundinamarca, April 11, 1935. A tropical ornamental vine, native to Brazil, with red and white flowers. It is of value as a green manure.

For previous introduction see 109917.

111000. *CROTON GOSSYPHIFOLIUS* Vahl. Euphorbiaceae.

No. 3287. From La Esperenza, Cundinamarca, April 11, 1935.

For previous introduction and description see 110920.

111001. *ERYTHRINA CORALLODENDRUM* L. Fabaceae.
Coraltree.

No. 3311. *Chochito*, *Cortes*, *Perez* Collected April 16, 1935, along the railroad track between Anolaima and Cachipay, Cundinamarca. A Central American tree about 20 feet high, with showy crimson flowers in loose racemes. It is cultivated in Colombia as an ornamental and for living fence posts.

111002. *GALACTIA VELUTINA* Benth. Fabaceae.

No. 3288. From La Esperenza, Cundinamarca, April 11, 1935. A slender perennial climber, soft-hairy throughout, with oval-obtuse leaflets and purple flowers. Native to British Guiana.

For previous introduction see 108220.

110990 to 111018—Continued.

111003. *NICOTIANA* sp. Solanaceae.

No. 3296. *Tabaquilla*. From Anolaima, Cundinamarca, April 16, 1935. A cultivated ornamental herb 3 feet high, with the basal leaf up to 6 inches long and viscid-pubescent as in tobacco. The flowers are crimson.

111004. *NICOTIANA ALATA* Link and Otto. Solanaceae.
Winged tobacco.

No. 3297. *Tabaquilla*. From Anolaima, Cundinamarca, April 16, 1935. A cultivated ornamental herb, 3 feet high, with viscid leaves and white flowers which are deep pink inside.

For previous introduction see 42334.

111005 to 111008. *PASSIFLORA* spp. Passifloraceae.

From Mesa, Cundinamarca, April 13, 1935.

No. 3293. Fruits slightly ribbed, golden yellow, oval, 2½ by 3½ inches.

111005. *PASSIFLORA* sp.

111006. *PASSIFLORA* sp.

No. 3294. *Curuba de India*. Fruits 2¾ by 3¾ inches; ground color pale greenish cream, with bright red blush which may cover the major part of the surface.

111007. *PASSIFLORA* sp.

No. 3295. *Curuba de India*. Fruits the same size and shape as 3294 (PI. 111006), but pale green without the red blush.

111008. *PASSIFLORA RUBRA* L.

No. 3309. From the railroad between Anolaima and Cachipay, Cundinamarca, April 17, 1935. A softly pubescent vine with crescent-shaped, cordate leaves 2 to 4 inches broad, greenish flowers 2 inches across, and red fruits 2 inches long. Native to the West Indies.

For previous introduction see 102353.

111009 and 111010. *PHYLLANTHUS ACUMINATUS* Vahl. Euphorbiaceae.

From La Esperenza, Cundinamarca, April 11, 1935. A large shrub or sometimes a tree 25 feet high, with ovate-acuminate leaflets 1 inch long and small greenish flowers.

For previous introduction see 106936.

111009. No. 3282. 111010. No. 3289.

Nos. 111011 to 111013 were collected at La Uribe, near Bogotá, April 3, 1935.

111011. *PIPER* sp. Piperaceae.

No. 3274. *Cordoncillo*. A shrub 10 feet high with small greasy, globular fruits.

111012 to 111014. *POLYGONUM* spp. Polygonaceae.
Fleeceflower.

111012. *POLYGONUM SAGITTATUM* L.

No. 3276. *Barbasco*. A form with pink flowers.

111013. *POLYGONUM HYDROPIPEROIDES* Michx.

No. 3278. *Barbasco*. A form with white flowers.

110990 to 111018—Continued.

111014. *POLYGONUM PUNCTATUM* ELL.

No. 3312. *Barbasco*. From the railroad between Anolaima and Cachipay, Cundinamarca, April 17, 1935. A plant with red stems found on small knolls, but not near water. The dry plant has a peppery odor.

For previous introduction and description see 110959.

111015. *POTHOMORPHE PELTATA* (L.) Miq. Piperaceae.

No. 3285. From La Esperanza, Cundinamarca, April 11, 1935. An erect shrub with rounded-cordate, peltate leaves, closely allied to Piper. Native to western India.

For previous introduction see 107767.

111016. *TAGETES AETALA* Posada. Asteraceae.

No. 3286. *Ruda*. From La Esperanza, Cundinamarca, April 11, 1935.

For previous introduction and description see 110968.

111017. *VIGNA PILOSA* (Klein) Baker. Fabaceae. Cowpea.

No. 3283. From La Esperanza, Cundinamarca, April 11, 1935.

For previous introduction see 30963.

111018. *ZEA MAYS* L. Poaceae. Corn.

No. 3337. From Cachipay, Cundinamarca, April 17, 1935. A cultivated popcorn.

111019 to 111023.

From the Union of Soviet Socialist Republics. Bulbs presented by the Plant Quarantine Board, Sukhum, Abkhasia, Transcaucasus. Received May 20, 1935.

Bulbs collected in the Abkhasian Mountains and in the plains and deserts of Turkistan; introduced for Department specialists.

111019. *COLCHICUM* sp. Melanthiaceae.111020. *GALANTHUS* sp. Amaryllidaceae.111021. *MUSCARI* sp. Liliaceae.111022. *PANCRATIUM* sp. Amaryllidaceae.111023. *POLIANTHES TUBEROSA* L. Amaryllidaceae. Tuberosa.

For previous introduction see 21635.

111024. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

From Colombia. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received May 25, 1935.

Introduced for Department specialists.

No. 3373. *Papa criolla amarilla*. From the market at Popayan, Cundinamarca, May 7, 1935.

111025. *CITRUS GRANDIS* (L.) Osbeck. Rutaceae. Grapefruit.

From Brazil. Budsticks presented by Dr. Agésilau Bitancourt, Subdirector de Biologia Vegetal, São Paulo. Received May 25, 1935.

Introduced for Department specialists.

Paraiso. A sweet grapefruit with a rind of uniform thickness, pink flesh, and rather coarse juice vesicles. Some of the fruits weigh over 5 pounds.

111026. *ZEPHYRANTHES* sp. Amaryllidaceae.

From Colombia. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received May 22, 1935.

Introduced for Department specialists.

No. 3307. Collected along the railroad between Anolaima and Cachipay, Cundinamarca, April 17, 1935. A pink-flowered form.

111027 and 111028.

From the Straits Settlements. Seeds presented by the Director, Botanic Gardens, Singapore. Received May 21, 1935.

Introduced for Department specialists.

111027. *CALAMUS SCIPIONUM* Lour. Phoenicaceae. Rattan palm.

A climbing palm 40 to 50 feet high, with alternate pinnatisect leaves 4 to 5 feet long; the male spadix is 20 feet long and the female 10 feet. This rattan is native to Malaysia, where the canes are used for making furniture, for which purpose it is especially suitable because of the ease with which it splits.

For previous introduction see 51708.

111028. *DAEMONOROPS GRANDIS* (Griff.) Mart. Phoenicaceae.

A climbing palm from the Malay Peninsula, with very stout, more or less prickly stems and pinnatisect leaves about 15 feet long, with narrow leaflets over a foot in length.

111029 to 111033. *PISTACIA VERA* L. Anacardiaceae. Pistachio.

From the Union of Soviet Socialist Republics. Seeds presented by A. M. Popov, Institute of Plant Industry, of the Lenin Academy of Agricultural Sciences, Leningrad. Received May 20, 1935.

Introduced for Department scientists. From Azerbaijan.

111029. No. 1668. 111032. No. 1672.

111030. No. 1670. 111033. No. 1669.

111031. No. 1671.

111034 to 111039.

From Colombia. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received May 16, 1935.

Introduced for Department specialists.

111034 to 111036. *TEPHROSIA* spp. Fabaceae.111034. *TEPHROSIA CINEREA* (L.) Pers.

No. 3342. *Barbasco*. From Tocaima, Cundinamarca, April 19, 1935.

For previous introduction and description see 110916.

111035. *TEPHROSIA TOXICARIA* (Sw.) Pers.

No. 3350. *Barbasco*. From Obanda, April 6, 1935.

For previous introduction and description see 110918.

111036. *TEPHROSIA* sp.

No. 3352. *Barbasco*. From Valle de Cauca, Huila, April 1935.

111034 to 111039—Continued.

111037. *PASSIFLORA ANTIOQUIENSIS* Karst. Passifloraceae.

No. 3544. *Curuba de Antioquia*. From La Mesa, Cundinamarca, April 20, 1935. A woody vine with deeply three-lobed leaves and large purple flowers, solitary in the leaf axils. It is cultivated for its edible, spindle-shaped green fruits over 4 inches long and 1½ inches in diameter. Native to Colombia.

111038. *PAULLINIA* sp. Sapindaceae.

No. 3339. From Tocaima, Finca Chunday, Cundinamarca, April 19, 1935. A climbing shrub whose red fruits are borne in clusters on the stem.

111039. *POLYGONUM* sp. Polygonaceae.

No. 3351. *Barbasco*. From Neiva, Huila, April 6, 1935.

111040 to 111103.

From India. Seeds presented by the Lloyd Botanic Garden, Darjeeling, at the request of the Director of the Botanical Survey of India, Calcutta. Received May 13, 1935.

Introduced for Department specialists.

111040. *CLEMATIS BUCHANIANA* DC. Ranunculaceae.

A vigorous Himalayan species which will cover a large wall space with buoyant hairy leaves and in September is covered with cymes of pendent, fragrant, whitish-yellow flowers.

For previous introduction see 52676.

111041. *CLEMATIS CONNATA* DC. Ranunculaceae.

A large woody climbing vine native to the temperate Himalayas at altitudes between 4,000 and 10,000 feet. The leaves are made up of three to seven broadly cordate leaflets 2 to 4 inches long, with coarsely serrate or three-lobed margins, and the small creamy tubular flowers are borne in large panicles.

For previous introduction see 102755.

111042. *CREPIS GLOMERATA* (Decaisne) Benth. and Hook. Cichoriaceae.

A herbaceous perennial up to 6 inches high, with variable foliage and many densely crowded heads of yellow flowers. Native to the Himalayas between 13,000 and 17,000 feet altitude.

111043. *CRYPTOLEPIS ELEGANS* Wall. Asclepiadaceae.

A slender climber with oblong or linear-oblong leaves over 2 inches long and fragrant yellow flowers in axillary and terminal cymes. Native to eastern and northeastern India.

For previous introduction see 47669.

111044. *CYNOGLOSSUM FURCATUM* Wall. Boraginaceae.

A perennial, native to India, with numerous stems from a rosette of lanceolate, soft-haired, entire leaves. The small blue flowers are borne in long slender clusters similar to those of the forget-me-not.

For previous introduction see 76034.

111040 to 111103—Continued.

111045. *EMBELIA FLORIBUNDA* Wall. Myrsinaceae.

A large evergreen woody climber with narrow leaves over 8 inches long and large, axillary, bushy racemes of very small white flowers. Native to northeastern India.

For previous introduction see 47677.

111046. *ERIGERON* sp. Asteraceae.

111047. *EUPHORBIA SIKKIMENSIS* Boiss. Euphorbiaceae.

A stout perennial 3 to 4 feet high, native to the Sikkim Himalayas at altitudes of 8,000 to 10,000 feet. The linear-lanceolate, glabrous leaves are 2 to 4 inches long, and the small inconspicuous flowers are surrounded by broad ovate yellow bracts.

For previous introduction see 102759.

111048. *GAULTHERIA NUMMULARIODES* Don. Ericaceae.

A procumbent shrub covering banks with much-branched densely leafy stems, native to the Himalayas at altitudes up to 9,000 feet. The leathery ovate leaves are one-half inch long, and the small reddish, or nearly white, tubular flowers are solitary on densely bracted axillary pedicels; they are followed by small fleshy blue-black fruits.

For previous introduction see 102762.

111049. *GENTIANA ELWESII* C. B. Clarke. Gentianaceae.

A perennial herb about 1 foot high, with elliptic or oblong leaves and showy blue flowers about an inch long, in small terminal heads. Native to the Himalayas from 13,000 to 15,000 feet altitude.

111050. *GERBERA KUNZEANA* Braun and Aschers. Asteraceae.

A herbaceous perennial with a rosette of oblong to ovate lyrate-pinnatifid leaves 5 to 10 inches long and bracted scapes a foot high bearing white or pink asterlike flower heads 1 to 3 inches across. Native to temperate slopes of the Himalayas from 7,000 to 12,000 feet altitude.

For previous introduction see 86676.

111051. *HERACLEUM WALLICHII* DC. Apiaceae.

A stout perennial, about 4 feet high, with compound umbels of small yellow flowers. Native to the Himalayas at 10,000 feet altitude.

111052. *HELWINGIA HIMALAICA* Hook. f. and Thoms. Cornaceae.

An undershrub with lanceolate or ovate-lanceolate leaves and umbels of small greenish flowers. Native to the Himalayas between 5,000 and 9,000 feet altitude.

111053. *HERACLEUM NEPALENSE* D. Don. Apiaceae.

A herbaceous perennial 2 to 5 feet high, with large pinnate leaves and compound umbels of small white flowers. Native to the Himalayas between 5,000 and 12,000 feet altitude.

111040 to 111103—Continued.

111054. *HYPERICUM HOOKERIANUM* Wight and Arn. Hypericaceae. St. Johnswort.

A compact shrub up to 6 feet high, with bright red-brown branches, evergreen leaves 1 to 4 inches long, and many-flowered corymbs of large golden-yellow flowers, each about 2 inches across. Native to the Himalayas.

For previous introduction see 102766.

111055. *IMPATIENS URTICIFOLIA* Wall. Impatiéntaceae.

A slender herb, 2 to 3 feet high, native to the temperate slopes of the Himalayas up to 12,000 feet altitude in Sikkim, India. The alternate membranous leaves, 4 to 6 inches long, are elliptic-ovate with a long point and have crenate margins. The flowers, nearly 1 inch in diameter, are yellow with white to purple streaks and are borne in small axillary clusters on slender pedicels.

For previous introduction see 99733.

111056. *INULA HOOKERI* C. B. Clarke. Asteraceae.

A simple or branched perennial herb, native to the Himalayas between 7,000 and 10,000 feet altitude. The shaggy stem is 1 to 2 feet high, with elliptic-lanceolate membranous leaves 3 to 5 inches long and terminal clusters of one to three yellow sunflowerlike heads 1 to 2 inches across.

For previous introduction see 100197.

111057. *JUNIPERUS PSEUDOSABINA* Fisch. and Mey. Pinaceae. Juniper.

A low shrub, with globose berries, native to dry sunburned mountain slopes in Turkistan.

For previous introduction see 34140.

111058. *LACTUCA HASTATA* DC. Cichoriaceae.

A robust perennial up to 7 feet high, with pinnatifid leaves about a foot long and small heads of blue, purple, or dark-red flowers. Native to the Himalayas between 4,000 and 12,000 feet altitude.

111059. *LARIX GRIFFITHII* Hook. f. and Thoms. Pinaceae.

A slender tree 20 to 60 feet high, with long pendulous branchlets and large erect cones 2 to 4 inches long. Native to the Himalayas from 8,000 to 12,000 feet altitude.

111060. *LEEA ASPERA* Wall. Vitaceae.

A shrubby perennial up to 4 feet high, with handsome pinnate foliage and juicy black fruits the size of large currants. Native to the Himalayas up to 6,000 feet altitude.

111061. *LILIUM GIGANTEUM* Wall. Liliaceae. Giant lily.

A lily native to the Himalayas between 5,000 to 12,000 feet altitude, with bulbs that grow close to the surface. The hollow stems are 6 to 9 feet high, and the handsome cordate leaves are shining dark green above and paler beneath. The large fragrant white flowers, often 12 in a raceme, are slightly greenish without, and the inner surface of the segments is tinged with deep purple.

For previous introduction see 105893.

111040 to 111103—Continued.

111062. *LILIUM WALLICHIANUM* Schult. f. Liliaceae. Wallich lily.

A lily 4 to 6 feet high, with linear leaves 6 to 9 inches long and, usually, solitary waxy creamy-white fragrant flowers 9 inches long which are golden yellow at the base inside and green outside.

For previous introduction see 92409.

111063. *MACHILUS GAMMIEANA* King. Lauraceae.

An evergreen tree with linear or oblanceolate leaves about 6 inches long and axillary panicles of small whitish flowers. Native to the Himalayas at about 7,500 feet altitude.

111064. *MECONOPSIS HORRIDULA* Hook. f. and Thoms. Papaveraceae.

A low alpine perennial herb native to the Sikkim Himalayas at altitudes between 14,000 and 17,000 feet. The lanceolate, nearly entire leaves are 3 to 5 inches long, and the blue-purple poppy-like flowers, 1 to 2 inches across, are borne singly on scapes 4 to 8 inches high.

For previous introduction see 99923.

111065. *MECONOPSIS PANICULATA* (Don) Prain. Papaveraceae.

A herbaceous perennial with yellow flowers found on the slopes of the Himalayas in the provinces of Nepal, Sikkim, and Bhutan in northern India.

For previous introduction see 33362.

111066. *MICROGLOSSA ALBESCENS* (DC.) Benth. Asteraceae.

An ornamental subtropical shrub with narrow, sharp-pointed leaves and heads of light lilac flowers. Native to the temperate Himalayas in India.

For previous introduction see 76038.

111067. *MUSSAENDA MACROPHYLLA* Wall. Rubiaceae.

A large shrub, native to the tropical Himalayas, with stout branches, slightly hairy leaves up to 10 inches in length, and cymes of flowers with orange-lobed corollas and white-lobed calyces.

For previous introduction see 47738.

111068. *NYSSA SESSILIFLORA* Hook. f. and Thoms. Cornaceae. Tupelo.

An Asiatic relative of the black gum (*Nyssa sylvatica*), which is a tree 60 feet tall, with oblong, punctate leaves. The soft, gray, even-grained wood is used for building purposes.

For previous introduction see 93221.

111069. *OSTODES PANICULATA* Blume. Euphorbiaceae.

An evergreen tree, native to India and Java, with pubescent branchlets and stout white-barked branches. The leathery, long-pointed serrate leaves are 8 to 12 inches long, and the inconspicuous flowers, in glabrous panicles a foot long, are followed by rough three-lobed woody capsules an inch long.

For previous introduction see 102769.

111070. *NICANDRA PHYSALODES* (L.) Gaertn. Solanaceae. Apple-of-Peru.

For previous introduction see 95220.

111040 to 111103—Continued.

111071. POLYGONUM SPHAEROSTACHYUM Meisn. Polygonaceae. Fleecflower.

A perennial herb 6 to 12 inches high, native to the Himalayas at an altitude of 15,000 feet in India and Tibet. The long-petioled radicle leaves are linear-lanceolate with crenulate margins, and the small drooping crimson flowers are borne in solitary erect cylindrical or capitate spikes.

For previous introduction see 100211.

111072. POLYGONATUM VERTICILLATUM (L.) All. Convallariaceae. Solomonseal.

A perennial herb with a creeping rootstock, angled and grooved stems 2 to 4 feet high, whorls of four to eight linear leaves 3 to 6 inches long, and axillary peduncles bearing two or three tubular, whitish flowers with green tips, followed by red berries. Native to Europe and temperate Asia.

For previous introduction see 93157.

111073. POTENTILLA GRIFFITHII Hook. f. Rosaceae.

An erect or ascending herbaceous perennial 1 to 2 feet high, with compound leaves about 2 inches long and yellow flowers in paniced corymbs. Native to the Himalayas between 6,000 and 14,000 feet altitude.

111074. PRIMULA ELONGATA Watt. Primulaceae. Primrose.

A primrose with a rosette of glabrous obovate leaves about 4 inches long and golden yellow flowers an inch across, in a small dense umbel on a scape a foot high. Native to the Sikkim Himalayas at 13,500 feet altitude.

For previous introduction see 41581.

111075. PRIMULA FLORIBUNDA Wall. Primulaceae. Buttercup primrose.

A glandular-pubescent primrose 5 to 8 inches high, with ovate or elliptic membranous leaves and small golden-yellow, fragrant flowers in three to five dense superimposed umbels. Native to the Himalayas at altitudes of 2,500 to 6,500 feet.

111076. RHODODENDRON EDGEWORTHII Hook. f. Ericaceae.

A shrub, often epiphytic, 4 to 6 feet high, native to the Himalayas in Sikkim, India. The elliptic-ovate leaves, 4 inches long, are strongly bullate above and densely cobwebby-tomentose beneath. The fragrant white or pink-tinged flowers are broadly tubular and 3 to 4 inches long.

For previous introduction see 97392.

111077. RHODODENDRON GRANDE Wight. Ericaceae.

A tree up to 30 feet high, native to the Sikkim Himalayas between 8,000 and 10,000 feet altitude. The elliptic to oblanceolate leaves, 6 to 12 inches long, are shining deep green above and silvery white beneath. The mortar-shaped flowers, 2 to 3 inches long, are pale rose in the bud, opening creamy white with basal purple blotches, and are borne in large rounded clusters of 20 to 25.

For previous introduction see 102779.

111078. RUBUS ALPESTRIS Blume. Rosaceae. Raspberry.

A straggling shrub found on the temperate slopes of the Himalayas between 7,000 and 18,000 feet altitude.

For previous introduction see 41674.

111040 to 111103—Continued.

111079. RUBUS ELLIPTICUS J. E. Smith. Rosaceae. Yellow Himalayan raspberry.

A very stout shrub which, especially when young, is densely covered with long red, almost hairlike, spines. The flowers are white, and the deep yellow, almost orange, very juicy acid fruits are edible. The shrub is found in the Himalayas at altitudes between 6,000 and 7,000 feet.

For previous introduction see 76914.

111080 to 111082. SAUSSUREA spp. Asteraceae.

111080. SAUSSUREA DELTOIDEA (DC.) C. B. Clarke.

A tall herbaceous perennial 4 to 8 feet high, with large leaves having cottony lower surfaces. The extremely variable flower heads are often tipped with purple, and the corollas are white. Native to the central and eastern Himalayas at altitudes of 6,000 to 11,500 feet.

For previous introduction see 73154.

111081. SAUSSUREA GOSSIPIPHORA D. Don.

A curious perennial over a foot high, found in the Himalayas in poor soil among limestone rocks between 14,000 and 15,500 feet altitude. The plant grows as a white woolly mass, with linear-lanceolate basal leaves. The oblong and densely cottony bluish flower heads are buried among cottony scales.

For previous introduction see 59265.

111082. SAUSSUREA UNIFLORA Wall.

A slender herbaceous perennial about 2 feet high, native to the Himalayas at altitudes between 10,000 and 15,000 feet. The purple flowers are in campanulate heads about 2 inches across.

111083. SCABIOSA HOOKERI C. B. Clarke. Dipsacaceae.

A perennial herb with linear-spatulate leaves about 6 inches long and globose, dense, pale-violet flower heads over an inch in diameter, on scapes up to a foot high. Native to the Himalayas at 10,000 to 14,000 feet altitude.

111084. SELINUM PAPYRACEUM C. B. Clarke. Apiaceae.

A large branching perennial 2 to 6 feet high, with ovate tripinnate leaves, the lower ones a foot long, and compound umbels of small whitish flowers. Native to the Sikkim Himalayas.

111085. SELINUM TENUIFOLIUM Wall. Apiaceae.

A hardy perennial about 8 feet high, with fernlike foliage, the ultimate segments of the leaves being narrowly lanceolate and acute. The small white flowers are borne in umbels. Native to the Himalayas.

For previous introduction see 47790.

111086 to 111089. SENECIO spp. Asteraceae.

111086. SENECIO ALATUS Wall.

A stout perennial 1 to 2 feet high, with membranous ovate leaves 5 to 12 inches long and yellow flower heads less than an inch across, in large panicles. Native to the Himalayas at altitudes of 6,000 to 13,000 feet.

111040 to 111103—Continued.

111087. *SENECIO GRACILIFLORUS* DC.

An erect perennial 2 to 6 feet high, with large pinnatifid leaves and corymbs of small erect or drooping yellow flower heads. Native to the Himalayas at altitudes of 8,000 to 13,000 feet.

111088. *SENECIO LIGULARIA* Hook. f.

A stout perennial with cordate-sagittate leaves, 1 foot or less in diameter, and numerous many-flowered yellow flower heads. Native to the temperate Himalayas from 9,000 to 12,000 feet altitude.

111089. *SENECIO SCANDANS* Buch-Ham.
Climbing groundsel.

An attractive autumn-flowering composite from the Himalayas, with a woody stem and climbing habit. The yellow flower heads are in few-flowered loose paniclelike clusters.

For previous introduction see 61623.

111090. *SMILAX FEROX* Wall. Smilacaceae.

A stout prickly shrub with ovate leathery leaves about 3 inches long and umbels of small red berries. Native to the Himalayas at altitudes of 5,000 to 8,000 feet.

111091. *SMILAX RIGIDA* Wall. Smilacaceae.

A small erect shrub with leathery, rounded-oval leaves about 1 inch long, a few small prickles, and dense umbels of small black berries. Native to the Himalayas at altitudes of 7,000 to 10,000 feet.

111092. *SOLANUM MACRODON* Wall. Solanaceae.

An erect shrubby plant, clothed with minute, glistening, jointed hairs, growing at altitudes of 3,000 to 8,000 feet in the temperate Himalayas. The lanceolate leaves, 2 to 6 inches long, are setulose above, and the purple-rose or nearly white flowers are followed by small globose berries.

For previous introduction see 49656.

111093 to 111095. *SWERTIA* spp. Gentiana-ceae.111093. *SWERTIA BIMACULATA* (Sieb. and Zucc.) Hook. f. and Thoms.

An erect annual 2 to 6 feet in height, with numerous white or yellowish-green flowers in panicles. The plant is native to the eastern Himalayas at altitudes of 5,000 to 8,000 feet.

For previous introduction see 47807.

111094. *SWERTIA DILATATA* C. B. Clarke.

An herb 1 to 3 feet high, with lanceolate leaves over an inch long and paniculate cymes of greenish-yellow flowers. Native to the Himalayas between 4,000 and 12,000 feet altitude.

111095. *SWERTIA PURPURASCENS* (D. Don) Wall.

This species is very closely related to *Swertia bimaculata*, from which it differs in having purple flowers with reflexed corolla lobes. It grows on the western Himalayas at altitudes ranging from 5,000 to 12,000 feet.

For previous introduction see 47808.

111040 to 111103—Continued.

111096. *SYMPLOCOS GLOMERATA* King. Symplocaceae.

A shrub or small tree becoming 10 feet high, with narrow leathery leaves 6 inches long and axillary clusters of small white flowers. This shrub is rather common in the hills of Sikkim and Bhutan, India, at altitudes of 1,000 to 8,000 feet.

For previous introduction see 55910.

111097. *THALICTRUM CHELIDONII* DC. Ranunculaceae.

A handsome ornamental plant 15 inches high, with pale-green foliage, pubescent beneath. The delicate silvery lavender flowers, over an inch across, are borne in graceful sprays. Native to the temperate Himalayas at altitudes between 8,000 and 12,000 feet.

For previous introduction see 102331.

111098. *THALICTRUM CULTRATUM* Wall. Ranunculaceae. Meadowrue.

A glabrous herbaceous perennial 2 to 4 feet high, with compound leaves made up of obovate leaflets half an inch long and lax panicles of greenish-white flowers. Native to the temperate Himalayas in India.

For previous introduction see 86688.

111099. *THERMOPSIS LANCEOLATA* R. Br. Fabaceae.

A perennial herb up to 2 feet high, with oblong-lanceolate leaflets and bright-yellow flowers in terminal racemes. Native to Siberia and Alaska, where it is found in moist sandy places.

For previous introduction see 110168.

111100. *URARIA LAGOPUS* DC. Fabaceae.

A woody, densely caespitose perennial up to 12 feet high, with trifoliate leaves and terminal and axillary racemes of purple flowers. Native to India from the Punjab to Assam.

For previous introduction see 47857.

111101. *VACCINIUM RETUSUM* (Griff.) Hook. f. Vacciniaceae.

A small shrub, usually epiphytic, native to the Himalayas between 7,000 and 9,000 feet altitude, with obovate-oblong leaves about 1 inch long and racemes of small white flowers.

111102. *VIBURNUM STELLULATUM* Wall. Caprifoliaceae.

A large evergreen shrub with elliptic-lanceolate leaves about 3 inches long and small orange-red berries. Native to the temperate Himalayas and said to be hardy in England.

For previous introduction see 68348.

111103. *WALLICHIA DENSIFLORA* Mart. Phoenicaceae.

A low, usually caespitose palm found throughout the tropical Himalayas from Kumaon eastward. The pinnatisect leaves are 8 to 10 feet long, with linear-oblong segments, dentate, and white beneath. The dull-purple fruits are about one-half inch long.

For previous introduction see 94086.

111104 to 111123. DIGITARIA spp.
Poaceae. Fingergrass.

From the Union of South Africa. Plants purchased from Dr. I. B. Pole Evans, Division of Plant Industry, Department of Agriculture, Pretoria. Received May 17, 1935.

A collection of different strains of the fingergrass; introduced for Department specialists.

111104. DIGITARIA PENTZII Stent.

The true woolly fingergrass.

111105. DIGITARIA SERIATA Stapf.

Kuruman.

111106. DIGITARIA sp.

Port Elizabeth.

111107. DIGITARIA sp.

Inkruip.

111108. DIGITARIA SWAZILANDENSIS Stent.

Swaziland.

111109. DIGITARIA DECUMBENS Stent.

Low Veld.

For previous introduction see 106624.

111110. DIGITARIA sp.

Pangola River.

111111. DIGITARIA DIVERSINERVIS (Nees)
Stapf.

Unkomaas. From the Natal coast. A perennial grass with weak ascending stems up to 18 inches high and linear-lanceolate leaves 1 to 3 inches long. Native to the Cape of Good Hope.

111112. DIGITARIA sp.

Makarikari.

111113. DIGITARIA sp.

Vukwe River.

111114. DIGITARIA sp.

Pitsani.

111115. DIGITARIA sp.

Muden.

111116. DIGITARIA sp.

Koster strain.

111117. DIGITARIA sp.

Messina.

111118. DIGITARIA sp.

Slurry.

111119. DIGITARIA sp.

Molopo River.

111120. DIGITARIA PENTZII MINOR Stent.

P. P. Rust.

111121. DIGITARIA sp.

Olifants River strain.

111122. DIGITARIA sp.

Huhluwe strain.

111123. DIGITARIA sp.

Smutsii strain.

111104 to 111123—Continued.

111124. DIGITARIA sp.

Hertzogii.

111125. DIGITARIA sp.

Pretoria Small strain.

111126. DIGITARIA sp.

Mbabana strain.

111127. DIGITARIA sp.

Government House strain.

111128. DIGITARIA sp.

Milanfiana grass.

111129 to 111150.

From northern India. Seeds collected by the Asiatic Expedition. Received May 23, 1935.

A collection of medicinal seeds introduced for Department specialists.

111129. ANGELICA sp. Apiaceae.

No. 13.

111130. ANGELICA sp. Apiaceae.

No. 3.

111131 to 111134. CARDUUS spp. Astera-
ceae.

111131. CARDUUS sp.

No. 8.

111132. CARDUUS sp.

No. 7.

111133. CARDUUS sp.

No. 9.

111134. CARDUUS sp.

No. 15.

111135 to 111137. CIRSIUM spp. Astera-
ceae.

111135. CIRSIUM sp.

No. 6.

111136. CIRSIUM sp.

No. 4.

111137. CIRSIUM sp.

No. 5.

111138. GENTIANA sp. Gentianaceae.

No. 17.

111139. OCIMUM BASILICUM L. Mentha-
ceae. Common basil.

No. 16.

111140. PINUS sp. Pinaceae.

No. 22.

111141 to 111143. PLEUROSPERMUM spp.
Apiaceae.

111141. PLEUROSPERMUM sp.

No. 2.

111142. PLEUROSPERMUM sp.

No. 21.

111143. PLEUROSPERMUM sp.

No. 18.

111129 to 111150—Continued.

111144. *PTEROCARPUS* sp. Fabaceae.
No. 19.
111145. *RHEUM* sp. Polygonaceae.
No. 1.
111146. *RHEUM* sp. Polygonaceae.
No. 20.
- 111147 to 111149. *SAUSSUREA* spp. Asteraceae.
111147. *SAUSSUREA* sp.
No. 10.
111148. *SAUSSUREA* sp.
No. 11.
111149. *SAUSSUREA* sp.
No. 12.
111150. (Undetermined.)
No. 14.

111151 to 111153. *FESTUCA* spp. Poaceae. **Fescue.**

From New Zealand. Seeds presented by Wright, Stephenson & Co., Ltd., Wellington. Received May 27, 1935.

Introduced for Department specialists.

111151. *FESTUCA* sp.
111152. *FESTUCA* sp.
111153. *FESTUCA* sp.

111154 to 111196.

From the Union of Soviet Socialist Republics. Seeds presented by the Kazakstan Institute of Agriculture, Turkistan, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received May 20, 1935.

Introduced for Department specialists.

The field numbers are those of the Westover and Enlow series.

111154. *AEGILOPS CYLINDRICA* Host. Poaceae.
No. 1357. From southern Kazakstan.
For previous introduction see 108838.
111155. *AGRIOPHYLLUM ARENARIUM* Bieb. Chenopodiaceae.
No. 1356. From Alma Ata. An annual, native to the Caucasus region and Siberia.
111156. *AGROSTIS ALBA* L. Poaceae.
No. 1358. From Alma Ata.
For previous introduction see 109221.
111157. *ALOPECURUS PRATENSIS* L. Poaceae. **Meadow foxtail.**
No. 1390. From Alma Ata.
For previous introduction see 110352.
111158. *ALOPECURUS ARUNDINACEUS* Poir. Poaceae.
No. 1360. From Alma Ata. A perennial grass with creeping rhizomes and leafy stems over a foot high. Native to Europe and Asia.

111154 to 111196—Continued.

111159. *ANDROPOGON ISCHAEMUM* L. Poaceae.
No. 1363. From Alma Ata.
For previous introduction see 109460.
- 111160 to 111162. *ASTRAGALUS* spp. Fabaceae.
111160. *ASTRAGALUS SIEVERSIANUS* Pall.
No. 1362. From Alma Ata. An erect or ascending perennial, with oblong, hairy leaflets and axillary clusters of pale-yellow flowers. Native to central Asia.
For previous introduction see 110072.
111161. *ASTRAGALUS* sp.
No. 1364. From the mountains of southern Kazakstan.
111162. *ASTRAGALUS* sp.
No. 1365. From Alma Ata.
111163. *BRASSICA ELONGATA* Ehrh. Brassicaceae.
No. 1367. Tashkent. An annual herb native to south-central Europe.
For previous introduction see 67907.
- 111164 to 111166. *BROMUS* spp. Poaceae. **Bromegrass.**
111164. *BROMUS SQUARROSUS* L.
No. 1370. From southern Kazakstan.
For previous introduction see 108471.
111165. *BROMUS* sp.
No. 1368. From Alma Ata.
111166. *BROMUS* sp.
No. 1369. From southern Kazakstan.
111167. *CLAMAGROSTIS EPIGEIOS* (L.) Roth. Poaceae.
No. 1371. From Alma Ata. A stout perennial grass, native to Manchuria, where it grows on rather poor soil.
For previous introduction see 107662.
111168. *CERATOCARPUS ARENARIUS* L. Chenopodiaceae.
No. 1372. From southern Kazakstan. An annual, native to sandy situations in central Asia, with subulate, coriaceous leaves, and inconspicuous flowers.
111169. *CYNODON DACTYLON* (L.) Pers. Poaceae. **Bermuda grass.**
No. 1374. From Alma Ata.
For previous introduction see 109488.
111170. *DACTYLIS GLOMERATA* L. Poaceae. **Orchard grass.**
No. 1375. From southern Kazakstan.
For previous introduction see 110376.
111171. *ELYMUS CRINITUS* Schreb. Poaceae. **Wild rye.**
No. 1380. From Alma Ata. An annual grass over a foot high. Native to Asia Minor and the Transcaucasus region.
111172. *FERULA KARATAVICA* Regel and Schmalh. Apiaceae.
No. 1376. From the mountains of southern Kazakstan. A perennial herb 3 to 4 feet high, with broad biternate leaves.

111154 to 111196—Continued.

and umbels of flat ovate fruits. Native to Turkistan.

For previous introduction see 107536.

111173. FESTUCA ELATIOR ARUNDINACEA
(Schreb.) Wimm. Poaceae. **Fescue.**

No. 1377. From the mountains of southern Kazakstan.

For previous introduction see 110980.

111174. FESTUCA OVINA L. Poaceae.

No. 1378. From the mountains of southern Kazakstan.

111175. GLYCYRRHIZA TRIPHYLLA Fisch.
and Mey. Fabaceae. **Licorice.**

No. 1779. From southern Kazakstan. An erect perennial plant 1 to 2 feet high, with pinkish-white flowers. Native to Siberia.

For previous introduction see 61426.

111176. HEDYSARUM SONGARICUM Bong.
Fabaceae.

No. 1381. From Alma Ata. An erect herbaceous perennial a foot or more high, with several branched stems, small compound leaves, and pink flowers in spike-like clusters. Native to central Asia.

For previous introduction see 105473.

111177. HERACLEUM VILLOSUM Fisch. Api-
aceae.

No. 1382. From the mountains of southern Kazakstan. A tall stout biennial or triennial herb with pinnatifid leaves and large umbels of white flowers. Native to the Caucasus region.

111178. KOCHIA TRICHOPHYLLA Stapf. Che-
nopodiaceae. **Common summer cypress.**

No. 1383. From southern Kazakstan.

111179. LATHYRUS PRATENSIS L. Faba-
ceae. **Yellow vetchling.**

No. 1384. From Alma Ata.

For previous introduction see 110388.

111180. LEPIDIUM REPENS (Schrenk)
Boiss. Brassicaceae.

No. 1385. From southern Kazakstan. A stout perennial about a foot high, with oblong wavy-margined leaves and inconspicuous white flowers. Native to central Asia.

For previous introduction see 110080.

111181. LOTUS ANGUSTISSIMUS L. Faba-
ceae.

No. 1386. From Alma Ata. An upright, slender-stemmed, leguminous annual, about a foot high, with yellow flowers.

For previous introduction see 87466.

111182. MEDICAGO FALCATA L. Fabaceae.
Yellow-flowered alfalfa.

No. 1387. From Alma Ata.

For previous introduction see 109517.

111183. MELICA ALTISSIMA L. Poaceae.
Grass.

No. 1401. From Alma Ata.

For previous introduction see 84455.

111184. MELILOPUS ALBA Desr. Fabaceae.
White sweetclover.

111154 to 111196—Continued.

No. 1388. From Alma Ata.

For previous introduction see 109523.

111185. MELILOTUS OFFICINALIS (L.) Lam.
Fabaceae. **Sweetclover.**

No. 1389. From Alma Ata.

For previous introduction see 110392.

111186. ONOBRYCHIS PULCHELLA Schrenk.
Fabaceae.

No. 1391. From southern Kazakstan. An annual less than a foot high, with narrow leaflets and small pink flowers. Native to central Asia.

For previous introduction see 108939.

111187. NICANDRA PHYSALODES (L.)
Gaertn. Solanaceae.

No. 1396. From southern Kazakstan.

For previous introduction see 111070.

111188. PHELEUM PANICULATUM Huds.
aceae. **Timothy.**

No. 1392. From southern Kazakstan.

For previous introduction see 108946.

111189. PHYSLIS ALKEKENGII L. Solana-
ceae. **Strawberry groundcherry.**

No. 1397. From Alma Ata.

For previous introduction see 109347.

111190. PRANGOS UOPTERA DC. Apiaceae.

No. 1395. From southern Kazakstan. A tall herbaceous perennial with linear-lobed leaves and small yellow flowers in compound umbels. Native to central Asia.

111191. PSORALEA DRUPACEA Bunge. Faba-
ceae.

No. 1394. From Tashkent. A woody perennial about a foot high, with roundish dentate leaflets nearly an inch long and small white flowers in dense axillary racemes. Native to central Asia.

For previous introduction see 106896.

111192. PUCCINELLIA sp. Poaceae.

No. 1366. From Alma Ata.

111193. SOPHORA ALOPECUROIDES L. Faba-
ceae.

No. 1398. From Alma Ata. A semi-hardy, grayish, pubescent undershrub with upright branches and dense terminal racemes of yellow flowers. Native to western Asia.

For previous introduction see 60346.

111194. TRIGONELLA sp. Fabaceae.

No. 1399. From Alma Ata.

For previous introduction see 109392.

111195. TRIFOLIUM PRATENSE L. Faba-
ceae. **Red clover.**

No. 1400. From Alma Ata.

For previous introduction see 110428.

111196. VICIA sp. Fabaceae.

No. 1402. From Alma Ata.

111197. IPOMOEA PURPUREA (L.) Roth.
Convolvulaceae.

Common morning-glory.

111197—Continued.

From China. Seeds presented by the Director, Botanic Garden, the Sun Yat-Sen Tomb and Memorial Park Commission, Nanking. Received May 25, 1935.

Introduced for Department specialists.

For previous introduction see 24029.

111198. SPHAERALCEA MINIATA RHOMBI-FOLIA (Griseb.) Schum. Malvaceae.

From Argentina. Seeds presented by the Museo de la Plata, Buenos Aires, through Thomas H. Kearney, Bureau of Plant Industry. Received June 4, 1935.

A bushy shrub about 4 feet high, with lobed leaves and showy rose-colored flowers in few-flowered racemes. Native to Argentina.

111199 to 111206. LESPEDEZA spp. Fabaceae. Bushclover.

From France. Seeds presented by J. Dufrenoy, Station de Pathologie Végétale, La Grande Ferrade, Pont-de-la-Maye. Received May 25, 1935.

Introduced for Department specialists.

111199. LESPEDEZA MACROCARPA Bunge.

A variety with purple flowers.

For previous introduction see 92051.

111200. LESPEDEZA CAPITATA Michx. Roundhead bushclover.

111201. LESPEDEZA CYRTOBOTRYA Miquel.

A shrub about 6 feet high, resembling *Lespedeza bicolor* in habit, with oval-oblong leaflets and dense clusters of purple flowers. Native to Japan.

For previous introduction see 104066.

111202. LESPEDEZA DAURICA (Laxm.) Schindler.

A tall annual up to 3 feet high, with small white flowers.

For previous introduction see 110495.

111203. LESPEDEZA FORMOSA (Vogel) Koehne. Purple bushclover.

An erect semishrubby plant 6 to 12 feet high, with trifoliate leaves of oblong leaflets and racemes of rose-purple flowers. Native to Chosen.

For previous introduction see 104669.

111204. LESPEDEZA KIUSIANA Nakai.

A tall herbaceous perennial 6 to 9 feet high, with small deep-purple flowers in axillary racemes 1 to 3 inches long. Native to Japan and Chosen.

111205. LESPEDEZA HIRTA (L.) Hornem.

111206. LESPEDEZA TOMENTOSA (Thunb.) Sieb.

A rather coarse, tall *lespedeza* which seeds freely. Native to Japan.

111207 to 111214.

From Colombia. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received May 22, 1935.

Introduced for Department specialists.

111207 to 111214—Continued.

111207. ANTIGONON LEPTOPUS Hook. and Arn. Polygonaceae.

No. 3361. *Coralita*. From the Agricultural Experiment Station, Palmira, May 2, 1935. A large-flowered variety.

For previous introduction see 104252.

111208. ARISTOLOCHIA sp. Aristolochiaceae.

No. 3360. From the Agricultural Experiment Station, Palmira, May 2, 1935. A vine, cultivated as an ornamental.

111209. ARISTOLOCHIA ELEGANS Masters. Aristolochiaceae. Calicoflower.

No. 3359. From the Agricultural Experiment Station, Palmira, May 2, 1935. A slender vine, with long-stalked reniform leaves 2 to 3 inches across and solitary flowers with a yellow-green tube $\frac{1}{2}$ inches long, the limb 3 inches across, purple and white blotched and entirely devoid of any unpleasant odor. Native to Brazil.

111210. BARNADESIA SPINOSA L. Astera-ceae.

No. 3348. From the Salto de Tequendama, near Bogotá, April 22, 1935. A spiny, ornamental shrub with long arching branches and white flower heads which are pale pink at the base of the florets.

111211. CASSIA HIRSUTA L. Caesalpinia-ceae.

No. 3357. From near Cali, May 2, 1935. A shrub up to 2 feet high, covered throughout with long hairs. The compound leaves are made up of three to five pairs of ovate leaflets 2 to 3 inches long, and the small yellow flowers are borne in axillary racemes. Native to Brazil.

For previous introduction see 107156.

111212. CLEOME ANOMALA H. B. K. Cap-paridaceae.

No. 3347. From the Salto de Tequendama, near Bogotá, April 22, 1935. A hairy shrub up to 20 feet high, with digitate leaves, the lobes oblong-lanceolate, membranous. The small whitish flowers are in terminal racemes. Native to Colombia.

111213. BENTHAMANTHA CARIBAEA (Jacq.) Kuntze. Fabaceae.

No. 3341. From Tocaima, Finca Chucunday, Cundinamarca, April 19, 1935. An erect shrub up to 6 feet high, found in the shade near rivers and creeks. The odd-pinnate leaves are 2 to 5 inches long, and the large flowers, yellow striped with red, are in axillary racemes. Native to tropical America.

111214. TEPHROSIA sp. Fabaceae.

No. 3362. Collected on dry mountain sides near the Agricultural Experiment Station, Palmira. The plants are 4 to 5 feet high, with racemes of small white flowers.

111215 to 111217.

From Manchuria. Plants collected near Hailar by H. G. MacMillan and J. L. Stephens, Bureau of Plant Industry. Received October 5, 1934. Numbered in May, 1935.

Introduced for Department specialists.

111215 to 111217—Continued.

111215. (Undetermined.)

No. 2. An undetermined grass.

111216 and 111217. CALAMAGROSTIS EPIGIOS (L.) Roth. Poaceae. Grass.

For previous introduction and description see 111167.

111216. No. 3. 111217. No. 4.

111218. DIPTERYX ODORATA (Aubl.) Willd. (*Coumarouna odorata* Aubl.). Fabaceae. Tonka-bean.

From Venezuela. Seeds presented through P. Lorillard Co., New York City, N. Y. Received June 6, 1935.

Introduced for Department specialists.

For previous introduction see 39142.

111219. TEPHROSIA VOGELII Hook. f. Fabaceae.

From the Ivory Coast, Africa. Seeds presented by O. M. Freeman, Bureau of Plant Industry. Received in 1933. Numbered in June, 1935, for convenience in distribution.

A shrubby legume, native to tropical Africa; introduced for Department specialists.

For previous introduction see 98926.

111220. MANGIFERA INDICA L. Anacardiaceae. Mango.

From Haiti. Seeds presented by Pierre G. Syivain, Service National de la Production Agricole et de l'Enseignement Rural, Port-au-Prince. Received June 11, 1935.

Madame Francis; introduced for Department specialists.

111221. MEDICAGO SATIVA L. Fabaceae. Alfalfa.

From Ecuador. Seeds presented by Enrique Malo, Cuenca. Received May 29, 1935.

Guaranda. A native variety introduced for Department specialists.

111222. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

From Antigua, British West Indies. Seeds presented by the Ffryes Estate. Received June 4, 1935.

Introduced for Department specialists.

For previous introduction see 109840.

111223 to 111225. ALLIUM CEPA L. Liliaceae. Onion.

From Egypt. Seeds and bulbs presented by M. Stina, Heliopolis. Received June 6, 1935.

Introduced for Department specialists.

111223. *Beheiri*. (Bulbs.)111224. *Saidi*. (Bulbs.)

111225. Seeds.

111226 and 111227. PHAEDRANASSA spp. Amaryllidaceae.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received June 11, 1935.

111226 and 111227—Continued.

111226. PHAEDRANASSA LEHMANNI Regel.

A summer-blooming, bulbous plant with oblong-lanceolate leaves 6 to 8 inches long and an umbel of three or four nodding, bright-red flowers over an inch long on a scape. Native to Colombia at an altitude of 7,000 feet.

111227. PHAEDRANASSA VIRIDIFLORA Regel.

A Peruvian phaedaranassa with a single lanceolate leaf about 1 foot long and an umbel of about four nodding flowers, over an inch long, green at the tip and whitish toward the base, on a scape as long as the leaf.

111228 to 111235.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received June 3, 1935.

111228. ACACIA DETINENS Burchell. Mimosaceae.

Zwart Haak (black thorn). A thorny shrub or small tree with small bifoliolate leaves and showy globular heads of small yellow flowers. Native to southern Africa.

For previous introduction see 48754.

111229. ALOE GLOBULIGEMMA Pole Evans. Liliaceae.

A stemless succulent with a rosette of erect-spreading, sword-shaped leaves 1 to 2 feet long, having cartilaginous wavy-toothed margins. The flower stalk, 3 to 4 feet high, carries a dense raceme a foot long of tubular flowers which are globular and red in the bud, becoming elongated and sulphur yellow tinged with red at the base. It is native to South Africa.

For previous introduction see 107275.

111230. ALOE GRANDIDENTATA Salm-Dyck. Liliaceae.

A short-stemmed, fleshy plant with a dense rosette of 12 to 20 bright-green lanceolate leaves a foot or more long, with crowded brown-tipped marginal teeth. The pale-red or reddish-yellow flowers are in three to seven racemes on a stout peduncle up to 2 feet long. Native to South Africa, where it is very robust and spreads rapidly.

For previous introduction see 81119.

111231. CARALLUMA LUTEA N. E. Brown. Asclepiadaceae.

Slang gaap. A dwarf leafless succulent with crowded purple-mottled green stems 4 inches long, sharply four-angled, and armed with stout horizontal teeth nearly half an inch long. The yellow flowers, in a cluster of 20 to 25, are 2 to 3 inches broad and most of them open at the same time. Native to South Africa.

For previous introduction see 78190.

111232. OLEA VERRUCOSA (Roem. and Schult.) Link. Oleaceae. Olive.

A tree up to 30 feet high, native to southern Africa, with linear-lanceolate leaves 3 inches long, covered with small yellow scales beneath, and short axillary panicles of inconspicuous flowers followed by small globose dry fruits.

For previous introduction see 99446.

111233. RHUS LANCEA L. f. Anacardiaceae. Sumac.

Karree-boom. A small bushy tree with gray bark and long-stalked leaves with

111228 to 111235—Continued.

linear-lanceolate leaflets 4 to 5 inches long. It is a valuable hardwood tree for regions of limited rainfall. Native to the Cape of Good Hope.

For previous introduction see 106813.

111234. *TRIRAPHIS FLECKII* Hack. Poa-Grass.

A suberect, annual grass up to a foot high; native to the Union of South Africa.

111235. *VERNONIA* sp. Asteraceae.

From Barberton, a low veld region of the Transvaal.

111236 to 111239. *PHLEUM PRATENSE* L. Poaceae. Timothy.

From Sweden. Seeds presented by the Swedish State Seed Testing Station, Stockholm. Received June 10, 1935.

Introduced for Department specialists.

111236 to 111238. Varieties developed by the Swedish Plant Breeding Institute of Svalöf.

111236. *Bore*.

111237. *Bottnia*.

111238. *Gloria*.

111239. *Kümpe II*, developed at the Weibullsholm Plant Breeding Institute.

111240 to 111245. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From Turkey. Seeds presented by the Tobuna Islahi Institute, Istanbul, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received June 13, 1925.

The field numbers are those of the West-Enlow series.

Introduced for Department specialists.

111240. No. 1403. *Bursa*.

111241. No. 1404. *Bursa-Kocaleugd*.

111242. No. 1405. *Gebje-Darica*.

111243. No. 1406. *Kocaeli-Gebje*.

111244. No. 1407. *Edirv*.

111245. No. 1408. *Kirkklarele Damirgikoy*.

111246 to 111248. *PHLEUM PRATENSE* L. Poaceae. Timothy.

From Wales. Seeds presented by the Welsh Plant Breeding Station, Aberystwyth. Received June 12, 1935.

Introduced for Department specialists.

111246. No. S-48. A late flowering, leafy type, developed especially for permanent pastures.

111247. No. S-50. A relatively prostrate type with fine leaves; it is essentially a type for permanent pastures; derived from material collected from old British pastures.

111248. No. S-51. A late-flowering leafy type of lighter green color than usual; better as hay than for pasture.

111249 to 111331.

From Rumania. Seeds presented by the Jardin Botanique de l'Université de Cluj. Received May 28, 1935.

111249 to 111331—Continued.

Introduced for Department specialists.

111249. *AEGILOPS* sp. Poaceae. Grass.

111250. *AGROPYRON CRISTATUM* (L.) Gaertn. Poaceae. Wheatgrass.

111251. *AGROPYRON INTERMEDIUM* (Host) Beauv. Poaceae. Wheatgrass.

For previous introduction see 107481.

111252. *AGROSTIS ALBA* L. Poaceae. Redtop.

111253. *AGROSTIS* sp. Poaceae. Bentgrass.

111254. *AIRA* sp. Poaceae. Grass.

111255. *ALOPECURUS PRATENSIS* L. Poaceae. Meadow foxtail.

111256. *ANTHOXANTHUM ODORATUM* L. Poaceae. Sweet vernalgrass.

For previous introduction see 107887.

111257. *ARRHENATHERUM ELATIUS* (L.) Beauv. Poaceae. Tall oatgrass.

For previous introduction and description see 110703.

111258 to 111264. *AVENA* spp. Poaceae. Grass.

111258. *AVENA BARBATA* Brot.

An annual or biennial grass, up to 30 inches high. Native to southern Europe.

For previous introduction see 66004.

111259. *AVENA COMPRESSA* Heuff.

A perennial grass over a foot high. Native to central and southern Europe.

111260. *AVENA DECORA* Janka.

An annual grass about 2 feet high. Native to central Europe.

111261. *AVENA FATUA* L. Wild oats.

For previous introduction see 103326.

111262. *AVENA NUDA* Hoejer. Naked oats.

For previous introduction see 91319.

111263 and 111264. *AVENA SATIVA* L. Oats.

111265. *BECKMANNIA ERUCAEFORMIS* (L.) Host. Poaceae. Sloughgrass.

For previous introduction and description see 110358.

111266. *BOUTELOUA CURTIPENDULA* (Michx.) Torr. Poaceae.

For previous introduction see 106421.

111267. *BRACHYPODIUM PINNATUM* (L.) Beauv. Poaceae. Grass.

For previous introduction and description see 110359.

111268. *BRIZA MAXIMA* L. Poaceae. Big quaking grass.

An annual grass with erect or decumbent culms up to 2 feet high and large showy spikelets. Native to southern Europe.

111269. *BRIZA MEDIA* L. Poaceae. Quaking grass.

A low perennial grass with erect culms.

For previous introduction see 109043.

111249 to 111331—Continued.

111270 to 111279. *BROMUS* spp. Poaceae.
Brome-grass.

111270. *BROMUS ARVENSIS* L.

An annual grass with erect culms up to 2 feet high. Native to eastern Europe.

111271. *BROMUS CATHARTICUS* Vahl.

An annual or biennial grass up to 2 feet high, native to South America. A good forage grass.

111272. *BROMUS COMMUTATUS* Schrad.
Hairy chess.

An annual grass with tufted culms up to 2 feet tall. Native to central Europe.

111273 and 111274. *BROMUS INERMIS* Leyss.
Common brome-grass.

111275. *BROMUS MACROSTACHYUS LANUGINOSUS* (Poir.) Coss. and Dur.

For previous introduction see 64914.

111276. *BROMUS SECALINUS* L. Chess.

111277. *BROMUS STERILIS* L.

111278. *BROMUS TECTORUM* L.

111279. *BROMUS ERECTUS* Huds.

111280. *RHAPHIS GRYLUS* (L.) Desv. Poaceae.
Grass.

A grass which forms a good sod even on dry rocky hillsides.

For previous introduction see 109361.

111281. *COIX LACRYMA-JOBI* L. Poaceae.
Jobs-tears.

111282. *CORNUCOPIAE CUCULLATUM* L. Poaceae.
Grass.

An ornamental annual grass, native to the Mediterranean countries.

For previous introduction see 74200.

111283. *CYNOSURUS CRISTATUS* L. Poaceae.
Crested dogtail.

A tufted perennial 1 to 2 feet high with panicles 2 to 4 inches long.

For previous introduction see 109070.

111284. *CYNOSURUS ECHINATUS* L. Poaceae.
Grass.

For previous introduction see 88721.

111285. *DESCHAMPSIA CAESPITOSA* (L.) Beauv. Poaceae.

For previous introduction and description see 110878.

111286. *DESMAZERIA SICULA* (Jacq.) Dum. Poaceae.
Grass.

An annual bushy upright slender-stemmed grass usually about 8 inches high. Native to the Mediterranean countries.

For previous introduction see 74165.

111287. *ELEUSINE CORACANA* (L.) Gaertn. Poaceae.
Ragi.

For previous introduction see 104078.

111288. *ELYMUS CAPUT-MEDUSAE* L. Poaceae.
Grass.

An annual grass native to Europe.

For previous introduction see 108913.

111249 to 111331—Continued.

111289. *ELYMUS SABULOSUS* Bieb. Poaceae.
Wild rye.

A perennial grass 2 to 4 feet high; native to the Caucasus region.

For previous introduction see 20646.

111290 to 111294. *FESTUCA* spp. Poaceae.
Fescue.

111290. *FESTUCA ELATIOR ARUNDINACEA* (Schreb.) Wimm.

For previous introduction and description see 111173.

111291. *FESTUCA GIGANTEA* (L.) Vill.
Great fescue.

For previous introduction see 107917.

111292. *FESTUCA OVINA* L. Sheep fescue.

111293. *FESTUCA OVINA SULCATA* Hack.

For previous introduction and description see 110981.

111294. *FESTUCA* sp.

111295. *HYSTRIX PATULA* Moench. Poaceae.
Bottlebrush.

111296. *LAGURUS OVATUS* L. Poaceae.
Rabbittail grass.

111297. *LAMARCKIA AUREA* (L.) Moench. Poaceae.
Grass.

An annual grass with decumbent or erect stems 4 to 16 inches tall and soft flat leaves. Native to the Mediterranean region.

111298. *LOLIUM REMOTUM* Schrank. Poaceae.
Grass.

An annual grass, native to Europe, with stems over 2 feet high.

111299. *LOLIUM TEMULENTUM* L. Poaceae.
Darnel.

111300 and 111301. *MELICA ALTISSIMA* L. Poaceae.
Grass.

111302. *MUHLENBERGIA* sp. Poaceae.
Grass.

111303 to 111305. *PANICUM* spp. Poaceae.

111303. *PANICUM CAPILLARE* L.

111304 and 111305. *PANICUM MILIACEUM* L.
Broomcorn millet.

111306. *SETARIA VIRIDIS* L. Poaceae.

111307. *ECHINOCHLOA CRUSGALLI FRUMENTACEA* (Roxb.) W. F. Wight. Poaceae.
Japanese millet.

For previous introduction see 109825.

111308. *PASPALUM RACEMOSUM* Lam. Poaceae.

A tropical American grass with rather coarse tender stems and leaves, reaching a height of about 2 feet.

For previous introduction see 74169.

111309. *PENNISETUM GLAUCUM* (L.) R. Br. Poaceae.
Pearl millet.

For previous introduction see 81210.

111310. *PENNISETUM VILLOSUM* R. Br. Poaceae.
Grass.

For previous introduction see 88932.

111311 to 111313. *PHALARIS* spp. Poaceae.

111311. *PHALARIS CANARIENSIS* L.
Canary grass.

For previous introduction see 88725.

111249 to 111331—Continued.

111312. *PHALARIS MINOR* Retz.

For previous introduction see 109540.

111313. *PHALARIS PARADOXA* L.

An annual tufted grass over 2 feet high, native to the Mediterranean countries.

For previous introduction see 44697.

111314 to 111316. *PHLEUM* spp. Poaceae. Timothy.111314. *PHLEUM MICHELI* All.

Native to southern Europe.

For previous introduction see 30233.

111315 and 111316. *PHLEUM PRATENSE* L.111317 to 111320. *POA* spp. Poaceae. Bluegrass.111317. *POA ANNUA* L.

For previous introduction see 78802.

111318. *POA BADENSIS* Haenke.

A tufted perennial grass; native to central Europe.

111319. *POA* sp.111320. *POA* sp.111321. *POLYPOGON MONSPELIENSIS* (L.) Desf. Poaceae.

An annual European grass up to 2 feet high.

For previous introduction see 109143.

111322. *SECALE CEREALE* L. Poaceae. Rye.111323 to 111326. *SESLERIA* spp. Poaceae.111323 and 111324. *SESLERIA COERULEA* Arduino. Moor grass.

A hardy, blue-gray, perennial grass over a foot high, native to the British Isles.

For previous introduction see 53159.

111325 and 111326. *SESLERIA RIGIDA* Heuff. Grass.

A perennial grass, usually less than a foot high; native to central Europe.

111327. *SETARIA VIRIDIS* (L.) Beauv. Poaceae.111328. *SPOROBOLUS* sp. Poaceae.111329. *STIPA CAPILLATA* L. Poaceae. Feathergrass.

For previous introduction see 109376.

111330. *TRAGUS BERTERONIANUS* Schult. Poaceae. Grass.111331. *UNIOLA LATIFOLIA* Michx. Poaceae. Grass.111332 and 111333. *PHLEUM PRATENSE* L. Poaceae. Timothy.

From England. Seeds purchased from A. G. Leighton Ltd., Whitchurch, Shropshire. Received June 12, 1935.

Early varieties; introduced for Department specialists.

111332. No. S-48.

111333. No. S-50.

111334 to 111338.

From Mexico. Seeds and bulbs presented by Dr. C. A. Purpus, Huatusco, Vera Cruz. Received June 7, 1935.

111334 to 111336. *AECHMEA* spp. Bromeliaceae.111334. *AECHMEA BRACTEATA* (Sw.) Griseb.

For previous introduction and description see 110838.

111335. *AECHMEA MEXICANA* Baker.

For previous introduction and description see 110389.

111336. *AECHMEA NUDICAULIS* (L.) Griseb.

A species widely distributed in tropical America. The horny strap-shaped leaves, 2 to 3 feet long, are armed with small triangular marginal prickles, and the pale lemon-yellow flowers are in a lax drooping spike on a peduncle 1 to 2 feet long.

For previous introduction see 89440.

111337. *ZEPHYRANTHES* sp. Amaryllidaceae.

Bulbs of a variety with white flowers.

111338. *ZEPHYRANTHES* sp. Amaryllidaceae.

Bulbs of a variety with dark-red flowers.

111339 and 111340. *PINUS SYLVESTRIS* L. Pinaceae. Scotch pine.

From the Union of Soviet Socialist Republics. Seeds presented by G. N. Shlykov, Head of Department of New Cultures and Introduction, Lenin Academy of Agricultural Sciences, Leningrad. Received June 4, 1935.

Local varieties of Scotch pine from White Russia, Union of Soviet Socialist Republics; introduced for Department specialists.

111339. No. 2031.

111340. No. 2186. Received under the varietal name *rigensis*.111341. *DALBERGIA COCHINCHINENSIS* Pierre. Fabaceae.

From Cuba. Seeds presented by R. M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received June 4, 1935.

Originally from the Botanic Gardens, Saigon, Cochinchina. A large tropical evergreen tree with a maximum height of about 80 feet, pinnate leaves 6 to 8 inches long, and small white flowers in axillary panicles 3 to 6 inches long. Native to Cochinchina.

111342. *ULMUS AMERICANA* L. Ulmaceae. American elm.

From Canada. Cuttings presented by H. F. Roberts, Department of Botany, University of Manitoba, Winnipeg. Received June 19, 1935.

Winnipeg elm; introduced for Department specialists.

111343 to 111345.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received May 23, 1935.

Collected April 19 and 20, 1935, near Archidona, Napo Canton, Napo-Pastaza Province, at 2,000 feet altitude; introduced for Department specialists.

111343. *PASSIFLORA* sp. Passifloraceae.

No. 7284. *Granadilla de Quiso*. A vine found climbing over forest trees. The edible fruits have a thick leathery yellow skin.

111344. (Undetermined.)

No. 7262. *Aya muyo*. A vine with scarlet fruits, found climbing over small trees in open woods.

111345. (Undetermined.)

No. 7265. *Ti-caso*. A climbing shrub with attractive green six-lobed fruits. The vine is occasionally cultivated and the seeds used as food.

111346 and 111347. *SACCHARUM SPONTANEUM* L. Poaceae. Grass.

From New Guinea. Seeds presented by Percival H. Leigh, Port Moresby, Papua. Received June 20, 1935.

For previous introduction and description see 110506.

111346. From Eriama Swamp near Port Moresby, Papua.

111347. From near Rona Falls, 8 miles from Port Moresby.

111348. *TEPHROSIA VOGELII* Hook. f. Fabaceae.

From Africa. Seeds presented by Miss Margaret Haines, Bangassou, French Equatorial Africa. Received June 20, 1935.

Introduced for Department specialists.

For previous introduction and description see 111219.

111349 to 111401.

From China. Seeds presented by H. H. Chung, National Wu-Han University. Wu-chang, Hupeh. Received June 21, 1935.

Collected in Patung, Chiensih, and Enshih Districts of western Hupeh, and introduced for Department specialists.

111349. *CATALPA DUCLOUXII* Dode. Bignoniaceae.

No. 55. A small tree, native to central and western China, with ovate-cordate leaves 4 to 8 inches in length and rose-pink flowers, more than an inch long, borne in corymbose clusters.

For previous introduction see 100520.

111350. *CEPHALOTAXUS* sp. Taxaceae.

No. 11.

111351. *CLEMATIS APIIFOLIA OBTUSIDENTATA* Rehd. and Wils. Ranunculaceae.

No. 104. A handsome woody climber about 12 feet high, with trifoliate leaves, the leaflets coarsely dentate. The white flowers, less than an inch across, are in short dense axillary cymes. Native to western China.

111349 to 111401—Continued.

111352. *CLEMATIS* sp. Ranunculaceae.

No. 105.

111353. *CORNUS KOUSA CHINENSIS* Osborn. Cornaceae.

No. 63. A Chinese dogwood which becomes about 25 feet high, with dark-green, elliptic-ovate leaves nearly 6 inches long and showy white flowers 2 to 3 inches across, which appear in June after the leaves. The fruiting heads are globose, pinkish, and about an inch across.

For previous introduction see 77826.

111354. *COTONEASTER* sp. Malaceae.

No. 82.

111355. *EURYA CHINENSIS* R. Br. Theaceae.

No. 25. An evergreen shrub up to 12 feet high, with obovate leaves over an inch long and inconspicuous greenish flowers in small axillary clusters, followed by berrylike fruits. Native to southern China.

For previous introduction see 102397.

111356. *FRAXINUS GRIFFITHII* Clarke. Oleaceae.

No. 87. An ash about 30 feet high, with leaves composed of 5 to 11 leathery elliptic leaflets about 4 inches long and panicles of small white flowers. Native to western China and northeastern India.

111357. *GYMNOCLADUS CHINENSIS* Baill. Caesalpiaceae.

No. 23. A Chinese tree which closely resembles the Kentucky coffeetree, *Gymnocladus dioica*, but the oblong-obtuse leaflets are smaller and are pubescent on both sides. The lilac-purple flowers are borne in large panicles and appear before the leaves.

For previous introduction see 98373.

111358. *HOVENIA DULCIS* Thunb. Rhamnaceae. Raisintree.

No. 86. A deciduous tree with broadly ovate leaves, often 5 inches long, and inconspicuous white or greenish-white flowers. After flowering, the peduncles thicken and become edible, being brown, pulpy, and of a sweetish taste. Native to China; cultivated in Japan.

For previous introduction see 105319.

111359 and 111360. *ILEX MICROCOCCA* Maxim. Aquifoliaceae. Holly.

A large tree with deciduous, oblong leaves 3 to 4 inches long and very small red berries. Native to China and Japan.

For previous introduction see 100561.

111359. No. 18. 111360. No. 74.

111361. *LIGUSTRUM COMPACTUM* Hook. f. and Thoms. Oleaceae.

No. 95. A shrub or small tree sometimes 30 feet high, native to the mountains of southwestern China. The persistent leaves are 3 to 6 inches long, and the small white flowers in large panicles are followed by blue-black fruits.

For previous introduction see 103428.

111349 to 111401—Continued.

111362. *LIRIODENDRON CHINENSE* (Hemsl.) Sargent. Magnoliaceae.

Chinese tuliptree.

No. 90. An ornamental deciduous tree up to 50 feet high, native to central China. The leaves, 5 to 6 inches long, have four acute or acuminate lobes, rounded or slightly cordate at the base; the tuliplike flower is almost 2 inches long. This species is somewhat more tender than our native species, *Liriodendron tulipifera*.

For previous introduction see 105650.

111363. *LITSEA* sp. Lauraceae.

No. 19. The members of this genus are shrubs or small trees with alternate leathery leaves, small white or yellow flowers in umbellike clusters, and small usually black fruits.

111364. *BENZOIN GRANDIFOLIUM* Rehder. Lauraceae.

No. 59. An evergreen shrub or tree up to 60 feet high, with large oblong or oblanceolate lustrous leaves and umbels of numerous small yellow flowers appearing in March and April. Native to central China.

111365. *LITSEA* sp. Lauraceae.

No. 78.

111366. *LITSEA* sp. Lauraceae.

No. 80.

111367. *ORYZA SATIVA* L. Poaceae. Rice.

No. 53.

111368. *PTEROCARYA PALIURUS* Batalin. Juglandaceae.

No. 60. A deciduous tree up to 60 feet high, with large pinnate leaves and long drooping racemes of winged fruits. Native to central China.

111369. *PAULOWNIA TOMENTOSA* (Thunb.) Sieb. and Zucc. Scrophulariaceae.

Royal paulownia.

No. 57.

111370. *PINUS ARMANDI* Franch. Pinaceae. Armand pine.

No. 101.

For previous introduction see 105326.

111371. *PITOSPORUM GLABRATUM* Lindl. Pitosporaceae.

No. 37. An evergreen shrub or small tree, native to northeastern India and central China, with oblong-lanceolate leaves. The small, fragrant yellow flowers, produced in corymbs, are succeeded by orange fruits.

For previous introduction see 105027.

111372. *PRUNUS* sp. Amygdalaceae.

No. 6.

111373. *PYRACANTHA CRENATO-SERRATA* (Hance) Rehder. Malaceae. Firethorn.

No. 84. A handsome spiny evergreen shrub up to 7 feet tall, with corymbs of small white flowers and scarlet berries. Native to central and western China.

For previous introduction see 72814.

111374. *RHAMNUS UTILIS* Decaisne. Rhamnaceae. Buckthorn.

No. 24. A slender branched shrub up to 10 feet high, with narrow elliptic, yellowish-green leaves 3 to 5 inches long, small yellowish-green flowers, and small black fruits. Native to central and eastern China.

111349 to 111401—Continued.

lowish-green leaves 3 to 5 inches long, small yellowish-green flowers, and small black fruits. Native to central and eastern China.

For previous introduction see 76594.

111375. *RHAMNUS* sp. Rhamnaceae. Buckthorn.

No. 85.

111376. *RHUS* sp. Anacardiaceae.

No. 69.

111377. *RHUS SYLVESTRIS* Sieb. and Zucc. Anacardiaceae.

No. 83. An ornamental tree up to 30 feet high, with 7 to 12 ovate to ovate-oblong leaflets and loose axillary panicles of small brownish-yellow flowers. The handsome foliage turns dark red or scarlet in the autumn. Native to China and Japan.

111378. *STYRAX SUBERIFOLIA* Hook. and Arn. Styracaceae.

No. 48. An evergreen tree up to 30 feet high, with oblong-lanceolate leaves about 2 inches long and small white flowers in few-flowered simple racemes. Native to southeastern China.

111379. *CAMELLIA OLEOSA* (Lour.) Rehd. Theaceae.

No. 64. An evergreen tree up to 25 feet high, with elliptic lanceolate leaves. The flowers, about 1 inch across, are white and fragrant, and a sweet oil, expressed from the seeds, is much esteemed in cooking. Native to eastern China.

For previous introduction see 99229.

111380 to 111384. *VIBURNUM* spp. Caprifoliaceae.

111380. *VIBURNUM BUDDLEIFOLIUM* C. H. Wright. Woolly viburnum.

No. 16. A densely tomentose shrub, native to central China, closely related to *Viburnum veitchii*. It is 6 feet high, with oblong-lanceolate leaves 3 to 6 inches long and dense clusters about 3 inches across of small white flowers and ovoid black fruits.

For previous introduction see 78557.

111381. *VIBURNUM* sp.

No. 17.

111382. *VIBURNUM* sp.

No. 20.

111383. *VIBURNUM BETULIFOLIUM* Batalin.

No. 51. An upright shrub up to 10 feet high, with coarsely toothed leaves, white flowers in cymes 2 to 4 inches wide, and red fruits. Native to central and western China.

For previous introduction see 66609.

111384. *VIBURNUM PROPINQUUM* Hemsl.

No. 9. An evergreen shrub with short lustrous reddish-brown branchlets, elliptic to ovate-lanceolate, nearly entire leaves 2 to 4 inches long, and greenish-white flowers followed by globular blue-black fruits. Native to central and western China.

For previous introduction see 82382.

111349 to 111401—Continued.

111385. CINNAMOMUM PEDUNCULATUM (Thunb.) Presl. Lauraceae.

No. 10. A semitropical evergreen tree 30 to 40 feet high, with thick oblong-lanceolate leaves 3 to 5 inches long and small whitish flowers in axillary corymbs. Native to China and Japan.

111386. (Undetermined.)

No. 14.

111387. (Undetermined.)

No. 15.

111388. ILEX PURPUREA OLDHAMII (Miq.) Loes. Aquifoliaceae.

No. 21. An evergreen tree, about 30 feet tall, with shining-green, spineless leaves, rather more narrow than those of the type, and red berries. Native to southern China.

For previous introduction see 95236.

111389. ACANTHOPANAX sp. Araliaceae.

No. 28. A spiny shrub.

111390. MELIOSMA PANNOSA Hand.-Mazz. Sabiaceae.

No. 33. A small evergreen tree native to southwestern China, with cuneate-lanceolate leaves and large terminal panicles of small yellow fragrant flowers.

111391. ANTIDESMA DELICATULUM Hutch. Euphorbiaceae.

No. 34. A shrub up to 12 feet high, with papery oblong or oblong-lanceolate leaves about 3 inches long and small clusters of inconspicuous flowers followed by bright-red drupes. Native to western China.

111392. ENGELHARDTIA CHRYSOLEPIS Hance. Juglandaceae.

No. 35. A subtropical tree with leathery pinnate foliage resembling that of the walnut and small bracted nuts borne in attractive graceful catkinlike spikes more than a foot long. Native to Kwangtung, China.

111393. GARDENIA AUGUSTA (L.) Merril. Rubiaceae. Cape-jasmine.

No. 42. An evergreen bush 7 feet high, with flowers which resemble a double white camellia, but with most exquisite perfume. The yellowish fruits are used by the Chinese to produce an indelible yellow dye.

For previous introduction see 99174.

111394. DAPHNIPHYLLUM MACROPODIUM Miquel. Euphorbiaceae.

No. 50. An evergreen shrub with handsome elliptic-oblong, dark-green leathery leaves 5 to 8 inches long, inconspicuous flowers, and small ellipsoidal fruits in axillary racemes 3 inches long. Native to eastern Asia.

111395. DALBERGIA DYERIANA Prain. Fabaceae.

No. 52. A large shrubby climber with the branchlets sometimes hooked, pinnate leaves, and small whitish flowers in axillary panicles. Native to central and western China.

111396. MAGNOLIA OFFICINALIS Rehd. and Wils. Magnoliaceae.

No. 61. A deciduous magnolia up to 45 feet high, with obovate, pale yellow-

111349 to 111401—Continued.

ish-green leaves over a foot long and large white fragrant flowers produced in early summer at the end of the leafy young growth. Native to western China.

111397. IDESIA POLYCARPA Maxim. Flacourtiaceae.

No. 68.

111398. DAPHNIPHYLLUM GLAUDESCENS Blume. Euphorbiaceae.

No. 73. A tropical evergreen tree with entire, oblong-lanceolate leaves, inconspicuous flowers, and black fleshy drupes. The tree is valued for the ornamental character of its laurel-like foliage. Native to the East Indies.

111399. LIGUSTRUM sp. Oleaceae. Privet.

No. 92.

111400. POUPARTIA AXILLARIS (Roxb.) King and Prain. Anacardiaceae.

No. 94. A deciduous tree, native to western China, where it becomes 50 to 80 feet high with a gray-barked trunk often 3 feet in diameter near the base. The oval, yellow fruits, about an inch long, are eaten by the Chinese.

111401. (Undetermined.)

No. 96.

111402. CAPSICUM ANNUUM L. Solanaceae.

From Europe. Seeds collected by Dr. Edgar Anderson, Arnold Arboretum Balkan Expedition. Received June 15, 1935.

Croatian peppers; from Krahan, Zagreb, Yugoslavia. A sweet yellow pepper of very high quality; commonly grown in the northern Balkans.

111403. OURATEA AGROPHYLLA (V a n Tiegh.) Urb. Ochnaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received June 20, 1935.

An evergreen shrub or small tree, native to Cuba, with thick shining, coarsely dentate, oval-oblong leaves, and showy yellow flowers in terminal panicles.

111404 to 111410.

From Panama. Seeds presented by Dr. Menalco Solis, Department of Agriculture and Industries, Panama. Received June 19, 1935.

Introduced for Department specialists.

111404. CAPSICUM ANNUUM L. Solanaceae. Redpepper.

Morrón.

111405 to 111409. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

111405. Ciruelo.

111406. Mercado.

111407. Monte Oscuro.

111408. Pacora.

111409. Soná.

111410. SOLANUM MELONGENA L. Solanaceae. Eggplant.

Calidad.

111411. ZEPHYRANTHES sp. **Amaryllidaceae.**

From Mexico. Seed and bulbs presented by Dr. C. A. Purpus, Huatusco, Vera Cruz. Received June 24, 1935.

Collected from the mountains near Huatusco.

111412 to 111414.

From Australia. Plants presented by George W. Althofer, Dripstone, New South Wales. Received June 25, 1935.

Introduced for Department specialists.

111412. AMYGDALUS PERSICA NECTARINA Ait. **Amygdalaceae.** **Nectarine.**
Irrewarra nectarine.

111413 and 111414. PRUNUS SALICINA Lindl. **Amygdalaceae.** **Japanese plum.**

111413. *Narrabeen.* A large flattish red plum with yellow dots. The yellow flesh is juicy and sugary, and the stone is small; a good cropper.

111414. *Wilson.* A medium large, round, bright-crimson plum with yellow flesh.

111415. BRASSICA RAPA L. **Brassicaceae.** **Turnip.**

From China. Seeds presented by Dr. J. F. Rock. Received June 20, 1935.

Introduced for Department specialists.

Rape turnip. A turnip grown by the Chinese tribes of southwestern China, as well as by the Tibetans. The young leaves, as well as the root, are used as a vegetable.

111416 and 111417.

From Siam. Seeds presented by Mrs. William Harris, Prince Royal College, Chiangmai. Received June 19, 1935.

111416. CASSIA sp. **Caesalpinaceae.**

A cassia which blooms in Siam from May through July. The deep-pink flowers and leaves appear at the same time.

111417. CASSIA sp. **Caesalpinaceae.**

A cassia with light-pink flowers that appear before the leaves. The flowering period in Siam is from 3 to 4 weeks, from late March to early April.

111418 and 111419. MACADAMIA TERNI-FOLIA F. Muell. **Proteaceae.**

Queensland-nut.

From Australia. Seeds purchased from S. M. Greer, Upper Dungary, Tweed River, New South Wales. Received June 25, 1935.

An evergreen tree up to 50 feet high, native to eastern Australia. It is cultivated for its edible nuts which have sweet white flesh with the flavor of chestnuts, incased in a shell which is typically very hard.

For previous introduction see 103735.

111418. A medium-sized nut with a thin shell.

111419. *Mammoth.* A variety with large nuts.

111420 and 111421. SOLANUM TUBEROSUM L. **Solanaceae.** **Potato.**

From Colombia. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received June 26, 1935.

111420 and 111421—Continued.

Cultivated potatoes collected May 15, 1935, between Dos Rios and La Union, El Cauca; introduced for Department specialists.

111420. No. 3396. *Guata.*

111421. No. 3397. *Chaucha.*

111422. CITRUS GRANDIS (L.) Osbeck. **Rutaceae.** **Grapefruit.**

From Brazil. Budwood presented by João Dierberger, Jr., São Paulo. Received June 28, 1935.

Introduced for Department specialists.

Zambôa variety. Budwood from a tree growing on the farm of Dierberger & Cia, Fazenda Citra, Limeira.

111423. DIGITARIA LITTORALIS PROSTRATA Stent. **Poaceae.** **Grass.**

From the Union of South Africa. Seeds presented by D. Moses, African Explosives and Industries, Johannesburg. Received June 20, 1935.

Introduced for Department specialists.

A densely tufted grass with numerous runners rooting at the nodes.

For previous introduction see 91766.

111424 and 111425.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received June 17, 1935.

Originally from La Mortola, Ventimiglia, Italy; introduced for Department specialists.

111424. ALOE. **Liliaceae.**

A hybrid of *Aloe striata*; other parent unknown.

111425. DYCKIA FRIGIDA (Linden) Hook. f. **Bromeliaceae.**

A stemless succulent with a dense rosette of spiny, sword-shaped leaves up to 2 feet long, and a lateral ascending scape with a panicle about a foot long of showy yellow flowers. Native to Brazil.

111426 and 111427. ACTINIDIA CHINENSIS Planch. **Dilleniaceae.** **Yangtao.**

From New Zealand. Seeds presented by H. R. Wright, Avondale, Auckland. Received June 25, 1935.

Introduced for Department specialists.

For previous introduction see 99144.

111428. TROPAEOLUM TUBEROSUM Ruiz and Pav. **Tropaeolaceae.** **Nasturtium.**

From Colombia. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received June 26, 1935.

No. 3398. *Cubios, cubia.* Collected between Dos Rios and La Union, El Cauca, May 11, 1935. A tuberous-rooted herbaceous climber, with red and yellow flowers, native to the highlands of northern South America, where the tubers are boiled and eaten as a vegetable. The plant is said to be able to withstand a slight frost.

For previous introduction see 99110.

111429 and 111430. ZEPHYRANTHES spp.
Amaryllidaceae. **Zephyrily.**

From Mexico. Bulbs purchased from Dr. C. Conzatti, Oaxaca de Juarez, Oaxaca. Received June 28, 1935.

111429. ZEPHYRANTHES CONZATTI Greenm.

A Mexican zephyranthes with a showy rose-colored or crimson-purple flower, on a scape about 7 inches high, appearing before the leaves. It thrives best on dry slopes.

111430. ZEPHYRANTHES SESSILIS Herb.

A Mexican zephyrily with three to six narrow linear leaves up to 1 foot long and an equally long scape bearing a showy white flower tinged with red.

111431 to 111465.

From Colombia. Material collected by W. A. Archer, Bureau of Plant Industry. Received June 20, 1935.

Introduced for Department specialists; unless otherwise stated, the material is seeds.

111431. HIPPEASTRUM EQUESTRE (L. f.)
Herb. Amaryllidaceae.

No. 3413. *Cebolleta*. From Moscoa, Comisario del Putumayo, May 21, 1935. Bulbs of a West Indian hippeastrum with six to eight strap-shaped leaves over a foot long, and an umbel of two to four red flowers over 4 inches long.

111442. BACCHARIS TRINERVIS RHEXIODES
(H. B. K.) Baker. Asteraceae.

No. 3411. From Moscoa, Comisario del Putumayo, May 21, 1935. A semiclambering lax herb 10 feet high, with narrow leaves about 3 inches long and yellow flower heads in dense panicles. Native to Brazil.

111433. STIGMAPHYLLON BOGOTENSE Tr. and
Planch. Malpighiaceae.

No. 3385. Collected near Popayan, May 10, 1935. A woody vine 20 feet high, with gummy buds and flowers. Native to Colombia.

111434 to 111438. BOMAREA spp. Amaryllidaceae.

The bomareas are a large genus of twining plants, native to tropical America. They have showy, often spotted flowers, usually in umbels.

111434. BOMAREA sp.

No. 3424. *Peca*. Sibundoy, Comisario del Putumayo, May 25, 1935. Tubers and rootstocks of a species with red flowers.

111435. BOMAREA sp.

No. 3384. Collected near Popayan, May 10, 1935. A form with orange-yellow flowers.

111436. BOMAREA OLIGANTHA Baker.

No. 3378. From the roadside between Popayan and Tambo, May 7, 1935.

111437. BOMAREA sp.

No. 3406. Collected in the Paramo del Tabano, Comisario del Putumayo, May 15, 1935. A vine 2 to 3 feet long with red flowers.

111431 to 111465—Continued.

111438. BOMAREA sp.

No. 3405. From the Paramo del Tabano, Comisario del Putumayo, May 15, 1935. Collected from plants growing in damp moss; the flower bracts were red and the flowers yellow.

111439. BUDDLEIA AMERICANA L. Loganiaceae.

No. 3421. From the mountains between Mocoa and Sibundoy, Comisario del Putumayo, May 24, 1935. A shrub 4 to 5 feet high with white flowers.

111440. CALEA GLOMERATA Klatt. Asteraceae.

No. 3376. *Chicharon*. Collected along the roadside between Popayan and Tambo, May 7, 1935. A clambering shrub 15 feet high with aromatic leaves. Native to Colombia.

111441 to 111444. CARICA CANDAMARCENSIS
Hook. f. **Papaya.**

A small papaya, the fruit less than 4 inches long, with very thin flesh which is highly acid and is used only in making preserves and sirups. The fruit is orange yellow when ripe, and the pale-yellow flesh has a spicy, aromatic flavor and fragrance, but is never eaten fresh.

For previous introduction see 106501.

111441. No. 3395. *Chilauca*. From the market at Pasto, May 15, 1935.

111442. No. 3417. From the mountains between Mocoa and Sibundoy, Comisario del Putumayo, May 19, 1935.

111443. No. 3372. *Higo*. From the market at Popayan, May 5, 1935. A form from the cold regions. The fruit is oval and smooth, i. e., not ribbed.

111444. No. 3371. *Higuillo*. From the market at Popayan, May 7, 1935. A form which grows in cold regions. The yellow fruits are five ribbed and slightly tapered towards the stem.

111445. CLEOME ANOMALA H. B. K. Capparidaceae.

No. 3420. *Mano de oso*. From Sibundoy, Comisario del Putumayo, May 18, 1935.

For previous introduction and description see 111212.

111446. GYNANDROPSIS GRACILIS (Tr. and
Planch.) Macbride. Capparidaceae.

No. 3423. From the mountains between Mocoa and Sibundoy, Comisario del Putumayo, May 24, 1935. An unarmed shrub with slender branches, ternate leaves, and orange-red flowers in long graceful terminal racemes. Native to Colombia.

111447. CLEOME sp. Capparidaceae.

No. 3427. From Mocoa, Comisario del Putumayo, May 19, 1935. An herb 3 to 4 feet high with greenish flowers.

111448. CLIBADIUM GLABRESCENS Blake.
Asteraceae.

No. 3415. From the mountains between Mocoa and Sibundoy, Comisario del Putumayo, May 19, 1935. A slender aromatic shrub 4 to 6 feet high.

111431 to 111465—Continued.

111449. *CORIARIA THYMIFOLIA* Humb. and Bonpl. Coriariaceae.

No. 3428. From near Santiago, Comisario del Putumayo, May 27, 1935. A clambering shrub about 10 feet high with black fruits. The bark and roots are said to be rich in tannin.

For previous introduction see 46224.

111450. *TEPHROSIA CINEREA* (L.) Pers. Fabaceae.

No. 3387. From El Bordo, Departamento El Cauca, May 10, 1935. An herb 6 to 10 inches high with pink flowers.

For previous introduction and description see 111034.

111451. *TEPHROSIA TOXICARIA* (Sw.) Pers. Fabaceae.

No. 3409. *Guaranga*. From Mocoa, Comisario del Putumayo, May 21, 1935.

111452 and 111453. *DIOCLEA SERICEA* H. B. K. Fabaceae.

For previous introduction and description see 110992.

111452. No. 3367. From Capinero, near Bogotá, April 26, 1935.

111453. No. 3391. *Juan Blanco*. From El Bordo, Departamento El Cauca, May 10, 1935.

111454. *EUPHORBIA COTINIFOLIA* L. Euphorbiaceae.

No. 3389. *Manzanillo*. From El Bordo, Departamento El Cauca, May 10, 1935. An unarmed shrub 10 to 15 feet high, with opposite, ovate, long-pointed leaves up to 2 inches long, and small inconspicuous flowers in terminal cymes. Native to the West Indies.

111455. *INDIGOFERA LESPEDEZIOIDES* H. B. K. Fabaceae.

No. 3381. *Barbasquilla*. From Gelina, near Popayan, May 9, 1935. A slender woody perennial, up to 3 feet high, with small leaflets and salmon-colored flowers in axillary racemes. Native to Mexico.

111456. *INDIGOFERA SUFFRUTICOSA* Mill. Fabaceae. Indigo.

No. 3392. *Tinta*. From Dos Rios, Departamento El Cauca, May 11, 1935.

111457. *LUPINUS* sp. Fabaceae.

No. 3400. *Chocho*. Near Pasto, May 15, 1935. A shrub 2 feet high.

111458. *LYCOSERIS OBLONGIFOLIA* Rusby. Asteraceae.

No. 3388. From El Bordo, Departamento El Cauca, May 10, 1935. A woody vine up to 30 feet long, with thick oblong leaves about 6 inches long and small solitary terminal heads of purple flowers. Native to Colombia.

111459. *NICOTIANA TABACUM* L. Solanaceae.

No. 3414. From Florencia, Comisario del Putumayo, May 1935.

111460 and 111461. *PASSIFLORA CUMBALENSIS* (Karst.) Harms. Passifloraceae.

A woody climber with trilobed leaves, the leaflets rhomboid, and solitary axillary pink flowers. Native to Colombia.

111431 to 111465—Continued.

111460. No. 3401. *Taosá*. From the Paramo del Tabano, Comisario del Putumayo, May 15, 1935.

111461. Collected in Guayaquil, Ecuador, June 1935.

111462. *SOLANUM* sp. Solanaceae.

No. 3407. *Culebrilla*. From Mocoa, Comisario del Putumayo, May 21, 1935. A shrub up to 3 feet high, with yellow flowers striped with brown and red fruits.

111463 and 111464. *SPIGELIA PEDUNCULATA* H. B. K. Loganiaceae.

Guambia. From Comisario del Putumayo. A herbaceous perennial about 4 feet high, with pink flowers. Native to Colombia.

111463. No. 3426. Collected May 23, 1935, at Sibundoy.

111464. No. 3419. Collected May 18, 1935, at San Francisco.

111465. *VIOLA TRICOLOR* L. Violaceae. Common pansy.

No. 3399. Collected near Pasto, Comisario del Putumayo, May 15, 1935. Seen several times, always near habitations.

For previous introduction see 28262.

111466 to 111470.

From British Honduras. Seeds purchased from William A. Schipp, Punta Gorda, Temash River. Received June 26, 1935.

Introduced for Department specialists.

111466. *CHAMAEDOREA GEONOMAIFORMIS* Wendl. Phoenicaceae. Palm.

A small graceful palm about 4 feet high, with deeply pinnatisect leaves about 9 inches long. Native to Guatemala.

For previous introduction see 50520.

111467. *CHAMAEDOREA OBLONGATA* Mart. Phoenicaceae. Palm.

An erect spineless palm with a slender trunk about 8 feet high, with large pinnate leaves of 10 to 14 narrow segments. Native to Brazil.

111468 to 111470. *GEONOMA* spp. Phoenicaceae. Palm.

111468. *GEONOMA* sp.

111469. *GEONOMA BINERVIA* Oerst.

A slender spineless palm up to 18 feet high, with pinnate leaves over 4 feet long and small black fruits. Native to Central America.

111470. *GEONOMA LONGEPETIOLATA* Oerst.

A slender palm, native to Central America, with a smooth trunk 8 feet high and pinnatisect leaves over a foot long.

111471 to 111473. *PHLEUM PRATENSE* L. Poaceae. Timothy.

From Sweden. Seeds presented by Dr. G. Nilsson Lissner, Swedish Plant Breeding Institute, Svalöf. Received June 28, 1935.

Varieties developed at the Plant Breeding Institute, Svalöf; introduced for Department specialists.

111471 to 111473—Continued.

111471. *Bors.*111472. *Bottmia.*111473. *Gloria.*111474 to 111476. *PHLEUM PRATENSE L.*
Poaceae. Timothy.

From the Union of Soviet Socialist Republics. Seeds presented by G. N. Shlykov, Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received June 27, 1935.

Introduced for Department specialists.

111474. No. 9862. From the Krasnie Experiment Station, Moscow region.

111475. No. 17799. From Kolbasi.

111476. No. 18180. From Morshansk.

111477 to 111585.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received June 20, 1935.

The field numbers are those of the Westover and Enlow series.

Introduced for Department specialists.

111477 to 111502. *AGROPYRON* spp. *Poaceae.* Wheatgrass.111477 to 111480. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.

111477. No. 1409. 111479. No. 1412.

111478. No. 1410. 111480. No. 1413.

111481. *AGROPYRON DESERTORUM* (Fisch.) Schult.

No. 1411.

111482 to 111484. *AGROPYRON RAMOSUM* (Trin.) C. Richt.

A perennial grass about a foot high, native to central Asia.

111482. No. 1414. 111484. No. 1416.

111483. No. 1415.

111485 to 111498. *AGROPYRON REPENS* (L.) Beauv. Quackgrass.

111485. No. 1417. 111492. No. 1424.

111486. No. 1418. 111493. No. 1425.

111487. No. 1419. 111494. No. 1426.

111488. No. 1420. 111495. No. 1427.

111489. No. 1421. 111496. No. 1428.

111490. No. 1422. 111497. No. 1430.

111491. No. 1423. 111498. No. 1431.

111499 to 111502. *AGROPYRON* spp.

111499. No. 1429. 111501. No. 1433.

111500. No. 1432. 111502. No. 1434.

111503 to 111513. *AGROSTIS ALBA* L. *Poaceae.* Redtop.

111503. No. 1435. 111509. No. 1444.

111504. No. 1436. 111510. No. 1445.

111505. No. 1437. 111511. No. 1446.

111506. No. 1440. 111512. No. 1447.

111507. No. 1442. 111513. No. 1441.

111508. No. 1443.

111477 to 111585—Continued.

111514 to 111517. *ALOPECURUS* spp. *Poaceae.*111514. *ALOPECURUS PRATENSIS* L.

No. 1448.

111515 to 111517. *ALOPECURUS ARUNDINACEUS* Poir.

111515. No. 1449. 111517. No. 1451.

111516. No. 1450.

111518. *ASTRAGALUS ONOBRYCHIS* L. *Poaceae.*

No. 1452.

For previous introduction see 101410.

111519. *ASTRAGALUS SEMIBILOULARIS* DC. *Fabaceae.*

No. 1453. An erect herbaceous perennial; native to Siberia.

111520. *BECKMANNIA SYZYGACHNE* (Steud.) Fern. *Poaceae.*

No. 1455.

111521 to 111534. *BROMUS* spp. *Poaceae.* Bromegrass.111521 to 111528. *BROMUS INERMIS* Leyss. Common bromegrass.

111521. No. 1457. 111525. No. 1461.

111522. No. 1458. 111526. No. 1462.

111523. No. 1459. 111527. No. 1463.

111524. No. 1460. 111528. No. 1464.

111529. *BROMUS TECTORUM* L.

No. 1465.

111530. *BROMUS TOMENTELLUS* Boiss.

No. 1456.

111531. *BROMUS SIBIRICUS* Drob.

No. 1466.

111532. *BROMUS INERMIS* Leyss. Common bromegrass.

No. 1467.

111533. *BROMUS* sp.

No. 1485.

111534. *BROMUS* sp.

No. 1487.

111535 to 111544. *DACTYLIS GLOMERATA* L. *Poaceae.* Orchard grass.

111535. No. 1469. 111540. No. 1474.

111536. No. 1470. 111541. No. 1475.

111537. No. 1471. 111542. No. 1476.

111538. No. 1472. 111543. No. 1477.

111539. No. 1473. 111544. No. 1478.

111545 and 111546. *DESCHAMPSIA CAESPITOSA* (L.) Beauv. *Poaceae.* Grass.

111545. No. 1438. 111546. No. 1439.

111547 to 111557. *ELYMUS* spp. *Poaceae.* Wild-rye.111547 and 111548. *ELYMUS DAHURICUS* Turcz.

111547. No. 1479. 111548. No. 1480.

111549 to 111553. *ELYMUS JUNCEUS* Fisch.

111477 to 111585—Continued.

111549. No. 1481. 111552. No. 1509.
 111550. No. 1507. 111553. No. 1510.
 111551. No. 1508.
 111554 and 111555. *ELYMUS DASYSTACHYS* Trin.
 111554. No. 1482. 111555. No. 1483.
 111556. *ELYMUS SIBIRICUS* L.
 No. 1484.
 111557. *ELYMUS* sp.
 No. 1486.
 111558 to 111567. *FESTUCA* spp. Poaceae.
 Fescue.
 111558 to 111560. *FESTUCA ELATIOR* L.
 Meadow fescue.
 111558. No. 1492. 111560. No. 1494.
 111559. No. 1493.
 111561 to 111564. *FESTUCA OVINA* L.
 Sheep fescue.
 111561. No. 1488. 111563. No. 1490.
 111562. No. 1489. 111564. No. 1491.
 111565 and 111566. *FESTUCA RUBRA* L.
 Red fescue.
 111565. No. 1495. 111566. No. 1496.
 111567. *FESTUCA* sp.
 No. 1497.
 111568 to 111572. *GALEGA* spp. Fabaceae.
 Goatsrue.
 111568 to 111571. *GALEGA ORIENTALIS*
 Lam.
 111568. No. 1498. 111570. No. 1500.
 111569. No. 1499. 111571. No. 1501.
 111572. *GALEGA* sp.
 No. 1502.
 111573 to 111575. *HEDYSARUM* spp. Fa-
 baceae.
 111573 and 111574. *HEDYSARUM HEDYSAR-
 OIDES* (L.) Stuntz.
 111573. No. 1503. 111574. No. 1504.
 111575. *HEDYSARUM POLYMORPHUM*
 Ledeb.
 No. 1505.
 For previous introduction see 60342.
 111576. *HIEROCHLOE ODORATA* (L.) Beauv.
 Poaceae. Sweetgrass.
 No. 1506.
 111577 and 111578. *KOELERIA GRACILIS*
 Pers. Poaceae. Grass.
 111577. No. 1511. 111578. No. 1512.
 111579 to 111581. *LATHYRUS PRATENSIS* L.
 Fabaceae. Yellow vetchling.
 111579. No. 1513. 111581. No. 1515.
 111580. No. 1514.
 111582. *LOTUS CORNICULATUS* L. Faba-
 ceae. Birdsfoot trefoil.
 No. 1517.
 For previous introduction see 91982.

111477 to 111585—Continued.

111583. *ORYZOPSIS* sp. Poaceae. Grass.
 No. 1468.
 111584. *PUCCINELLIA DISTANS* (L.) Parl.
 Poaceae. Grass.
 No. 1454.
 111585. *TRIFOLIUM* sp. Fabaceae. Clover.
 No. 1516.
 111586 to 111602.
 From Colombia. Seeds collected by W. A.
 Archer, Bureau of Plant Industry. Re-
 ceived in May and June 1935.
 Introduced for Department specialists.
 111586. *BACCHARIS MORITZIANA* Hieron.
 Asteraceae.
 No. 3375. *Almanga*. Collected May 7,
 1935, on the roadside between Popayan
 and Tambo. A clambering shrub from
 10 to 15 feet high. Native to northern
 South America.
 111587. *BRIZA MINOR* L. Poaceae.
 Little quaking grass.
 No. 3370. *Illusion*. From the market
 at Popayan, May 7, 1935. An erect an-
 nual grass up to 3 feet high; sold as an
 ornamental.
 For previous introduction see 109044.
 111588. *CESTRUM MUTISII* Willd. Solana-
 ceae.
 No. 3346. *Tinto*. From Salto de Te-
 quendama, near Bogota, April 22, 1935.
 For previous introduction see 110847.
 111589 and 111590. *CLIBADIUM SURINA-
 MENSE* L. Asteraceae.
 111589. No. 3356. Collected near Cali,
 May 2, 1935. A shrub up to 5 feet
 high.
 111590. No. 3374. *Pintadilla*. Col-
 lected along the road between Po-
 payan and Tambo, May 7, 1935. A
 shrub up to 10 feet high.
 111591. *TEPHROSIA TOXICARIA* (Sw.) Pers.
 Fabaceae.
 No. 3382. *Barbasco*. Collected near
 the railroad tunnel, at Helena, near Po-
 payan, May 9, 1935.
 111592. *BENTHAMANTHA CARIBAEA* (Jacq.)
 Kuntze. Fabaceae.
 No. 3341. From Tocaima, Finca Chu-
 cunday, Departamento Cundinamarca,
 May 19, 1935.
 For previous introduction and descrip-
 tion see 11213.
 111593. *EROSEMA VIOLACEA* (Aubl.) Don.
 Fabaceae.
 No. 3380. Collected at Helena, near
 Popayan, May 9, 1935. A slender un-
 branched herb, 3 feet high, with yellow
 flowers.
 For previous introduction see 97844.
 111594. *MYRCIA XILOPIOIDES* (H. B. K.)
 DC. Myrtaceae.
 No. 3366. *Namu*. From Cali, May 3,
 1935. A tropical evergreen shrub up to
 10 feet high, with lanceolate leaves and
 numerous small white flowers in axillary
 panicles. Native to Colombia.

111586 to 111602—Continued.

111595. *FICUS ARCHERI* Standley. Moraceae.

No. 3369. *Uvillo*. From Granja, Departamento de Cauca, Popayan, May 7, 1935.

111596. *PALICOUREA LINEARIFLORA* Wernham. Rubiaceae.

No. 3353. From Chapinero, near Bogotá, April 26, 1935. A slender shrub 10 to 15 feet high, with long drooping branches and pale greenish-cream flowers. Native to Colombia.

111597. *PASSIFLORA* sp. Passifloraceae.

No. 3368. *Triponas*. From the market at Cali, May 4, 1935. A small pale-yellow fruit overlaid with yellow mottling and stripes. The acid flavor resembles that of the grapefruit.

111598. *PETREA* sp. Verbenaceae.

No. 3358. From the Agricultural Experiment Station, Palmira, May 2, 1935. A small ornamental tree, cultivated for its blue flowers.

111599. *PHASEOLUS LATHYROIDES* L. Fabaceae.

No. 3363. From near Cali, May 2, 1935. A bean which is apparently indigenous. A semierect annual legume which makes a good growth on poor land. The dark-red flowers are very ornamental. It is cultivated as a cover crop.

For previous introduction see 106931.

111600. *TERAMNUS UNCINATUS* (L.) Sw. Fabaceae.

No. 3377. Along the roadside between Popayan and Tambo, May 7, 1935. A small vine with a fleshy taproot, native to tropical America. It is used as forage in Brazil and the Virgin Islands.

For previous introduction see 109986.

111601. *AMBROSIA* sp. Ambrosiaceae.

No. 3256. *Altamisa*. From the highway between Pamplona and Malaga, March 24, 1935.

111602. *AMBROSIA* sp. Ambrosiaceae.

No. 3219. *Altamisa*. Between Cucuta and Pamplona, March 20, 1935.

111603 to 111735.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received June 21, 1935.

Introduced for Department specialists.

The field numbers are those of the Westover and Enlow series.

111603. *BECKMANNIA ERUCAEFORMIS* (L.) Host. Poaceae. Sloughgrass.

No. 1629.

111604. *KOELERIA CRISTATA* (L.) Pers. Poaceae. Grass.

No. 1599.

111605 to 111685. *MEDICAGO* spp. Fabaceae.

111605 to 111617. *MEDICAGO FALCATA* L. Yellow-flowered alfalfa.

111605. No. 1518. 111612. No. 1525.

111603 to 111735—Continued.

111606. No. 1519. 111613. No. 1526.

111607. No. 1520. 111614. No. 1527.

111608. No. 1521. 111615. No. 1528.

111609. No. 1522. 111616. No. 1529.

111610. No. 1523. 111617. No. 1530.

111611. No. 1524.

111618. *MEDICAGO HEMICYCLA* Grossh.

No. 1531. A perennial alfalfa with ascending stems about 2 feet high. Native to the Transcaucasus region, at altitudes between 2,000 and 6,000 feet.

111619 to 111680. *MEDICAGO SATIVA* L. Alfalfa.

111619. No. 1532. 111650. No. 1563.

111620. No. 1533. 111651. No. 1564.

111621. No. 1534. 111652. No. 1565.

111735. *VICIA CRACCA* L. Fabaceae. **Cow vetch.**
 No. 1650.
111736. *AMARYLLIS* sp. **Amaryllidaceae.**
 From Brazil. Bulbs collected near Rio de Janeiro by Dr. Doris Cochran, United States National Museum. Received June 10, 1935.
 Collected about 50 yards from the sea-coast.
- 111737 to 111748.
 From Wales. Seeds collected in western China and presented by Lord Aberconway, Bodnant Gardens, Tal-y-Cafn, North Wales. Received June 26, 1935.
111737. *ALBIZZIA JULIBRISSIN MOLLIS* (Wall.) Benth. **Mimosaceae.**
 No. 86. A densely pubescent variety with broader, more leathery leaflets than the type. Native to Nepal.
111738. *DALBERGIA MIMOSOIDES* Franch. **Fabaceae.**
 No. 42. A shrub 12 to 18 feet high, with pinnate leaves about 3 inches long and numerous small white flowers in axillary panicles. Native to southwestern China.
111739. *EREMURUS CHINENSIS* O. Fedtsch. **Liliaceae.**
 No. 56. An eremurus about 2 feet high, with thin, flaccid, keeled, narrow leaves and flower spikes about 16 inches long. Native to western China.
111740. *GORDONIA CHRYSANDRA* Cowan. **Theaceae.**
 No. 153. An evergreen shrub or tree up to 35 feet high, with shiny elliptic-ovate leaves about 4 inches long and large white or creamy-white flowers, solitary or several in a raceme. Native to Yunnan, China, at altitudes between 5,000 and 9,000 feet.
111741. *INCARVILLEA LUTEA* Bur. and Franch. **Bignoniaceae.**
 No. 1. A perennial herb native to southwestern China at altitudes between 10,000 and 12,000 feet. The long-petioled radical leaves, 8 to 15 inches long, are pinnately divided into broad-lanceolate crenate segments, and the pendulous yellow flowers, 2 inches across, are borne in clusters of 6 to 20 on scapes 2 to 4 feet high.
 For previous introduction see 100194.
111742. *KETELEERIA DAVIDIANA* (Bertrand) Beissner. **Pinaceae.**
 No. 77. A coniferous tree, native to western China, closely allied to the firs. It sometimes becomes 100 feet tall, is of pyramidal habit, and has handsome glossy, green, firlike foliage.
 For previous introduction see 105669.

111737 to 111748—Continued.

111743. *PHOTINIA FRANCHETIANA* Diels. Malaceae.

No. 156. A small evergreen tree or shrub, with lustrous, obovate-elliptic or obovate leaves about 5 inches long and numerous panicles of small white flowers. Native to Yunnan, China, at about 7,000 feet altitude.

111744 to 111746. *RHODODENDRON* spp. Ericaceae.

111744. *RHODODENDRON BULLATUM* Franch.

No. 158. A loosely branched shrub up to 8 feet high, native to Yunnan, China. The branchlets are densely and softly woolly; the elliptic-ovate leaves, 2 to 4 inches long, are puckered above and loosely woolly pubescent beneath; and the broadly tubular pink-tinged white flowers, 2 to 3 inches long, are borne in terminal clusters.

For previous introduction see 103137.

111745. *RHODODENDRON CRASSUM* Franch.

No. 129. A shrub 8 feet high, found in southwestern China between 10,000 and 12,000 feet altitude. The dark-green, oval-oblong, acute leaves are greenish-brown punctate beneath; the white tubular flowers are up to 4 inches across.

For previous introduction see 84166.

111746. *RHODODENDRON HAEMATODES* Franch.

No. 131. A shrub up to 10 feet high, native to Yunnan, China. The oblong to obovate leaves, 2 to 4 inches long, are dark green above and densely rufous-woolly tomentose beneath. The fleshy, tubular-campinulate, crimson flowers, in umbels of 6 to 8, are 2 inches long.

For previous introduction see 97666.

111747. *SORBUS POTERIFOLIA* Hand-Mazz. Malaceae.

No. 136. A shrub up to 15 feet high, with pinnate leaves 2 to 4 inches long and corymbs of small crimson flowers. Native to southwestern China.

111748. *TERNSTROEMIA GYMNANTHERA* (Wight and Arn.) Sprague. Theaceae.

No. 150. An evergreen tree about 20 feet high, with oblong-ovate leaves and small, pale-yellow, fragrant flowers followed by yellow berries about the size of a cherry. Native to southeastern Asia.

111749 to 111760.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received June 25, 1935.

Introduced for Department specialists.

111749 to 111752. *BOMAREA* spp. Amaryllidaceae.

Collected near Baeza, Canton Napo, Province of Napo-Pastaza, at 6,000 feet altitude, May 5, 1935. Flowers not seen.

111749. *BOMAREA* sp.

No. 7345. A perennial herb found climbing among the undergrowth along the trail.

111749 to 111760—Continued.

111750. *BOMAREA* sp.

No. 7346. A clambering herb found in open forest.

111751. *BOMAREA* sp.

No. 7344. On the trail between Baeza and Papallacta. A herbaceous climber on undergrowth in open woods.

111752. *BOMAREA* sp.

No. 7347. A trailing plant found growing in light shade.

111753. *GRIAS LORETENSIS* R. Kunth. Lecythidaceae.

No. 7232. A slender-trunked tropical evergreen tree up to 45 feet high, with long narrow-lanceolate leaves and racemes of showy yellow flowers. Native to Peru.

111754. *GUAREA* sp. Meliaceae.

No. 7064.

111755. *JACARANDA* sp. Bignoniaceae.

No. 7295.

111756. *JUGLANS HONOREI* Dode. Juglandaceae.

No. 7338. *Tocte*. A wild walnut, native to the highlands of northern South America, which resembles closely the black walnut of the United States. The thick-shelled nut contains a kernel of mild pleasant flavor.

For previous introduction see 108822.

111757. *SOLANUM* sp. Solanaceae.

No. 7124.

111758. (Undetermined.)

No. 7240.

111759. (Undetermined.)

No. 7030.

111760. (Undetermined.)

No. 1240.

111761 to 111763.

From Africa. Seeds presented by the Experiment Station, Department of Agriculture, Southern Rhodesia, through H. S. Hering, Penacook, N. H. Received June 29, 1935.

Introduced for Department specialists.

111761. *AGROPYRON CRISTATUM* (L.) Gaertn. Poaceae. Crested wheatgrass.

Variety *Fairway*.

111762 and 111763. *CYNODON DACTYLON* (L.) Pers. Poaceae. Bermuda grass.

111762. Variety *Royal Cape*.

111763. Variety *Magennis*.

111764 to 111821.

From India. Seeds presented by A. H. Lee, Bandra, Kulu, Punjab, through Walter Koelz Grass Lake, Mich. Received June 24, 1935.

Introduced for Department specialists.

111764. *ALLIUM* sp. Liliaceae.

No. 44.

111764 to 111821—Continued.

111765. AMPHICOME ARGUTA Royle. Bigoniaceae.
No. 56. A perennial herb with pink flowers.
111766. BARLERIA sp. Acanthaceae.
No. 40. An evergreen shrub.
111767. CALAMINTHA sp. Menthaceae.
No. 70. A herbaceous perennial with pink or violet flowers.
111768. CHAEROPHYLLUM sp. Apiaceae.
No. 6. A tall herbaceous perennial with white flowers.
111769. CHRYSANTHEMUM sp. Asteraceae.
No. 18.
111770. CLEMATIS sp. Ranunculaceae.
No. 25.
111771. COTONEASTER sp. Malaceae.
No. 9.
111772. COTONEASTER sp. Malaceae.
No. 10.
111773. DEUTZIA sp. Hydrangeaceae.
No. 60.
111774. ELAEAGNUS sp. Elaeagnaceae.
No. 2.
111775. ERIGERON sp. Asteraceae.
No. 19.
111776. ERIGERON sp. Asteraceae.
No. 51.
111777. FESTUCA GIGANTEA (L.) Vill. Poaceae.
Great fescue.
No. 33.
111778. HYPERICUM sp. Hypericaceae.
No. 69.
111779. INDIGOFERA sp. Fabaceae.
No. 74.
111780. LACTUCA sp. Cichoriaceae.
No. 37.
111781. LATHYRUS sp. Fabaceae.
No. 71.
111782. LEPTODERMIS LANCEOLATA Wall. Rubiaceae.
No. 43. A spreading shrub 3 to 5 feet high, with lanceolate leaves 1 to 2 inches long and small white flowers in terminal heads. Native to the Himalayas from 4,000 to 10,500 feet altitude.
111783. PIERIS sp. Ericaceae.
No. 75.
111784. PRIMULA sp. Primulaceae.
No. 17.
- 111785 to 111789. PRUNUS spp. Amygdalaceae.
111785. PRUNUS sp.
No. 23.
111786. PRUNUS sp.
No. 3.

111764 to 111821—Continued.

111787. PRUNUS sp.
111788. PRUNUS sp.
No. 22.
111789. PRUNUS sp.
No. 4.
111790. RHUS sp. Anacardiaceae.
No. 61.
111791. RIBES sp. Grossulariaceae.
No. 34.
111792. RUMEX sp. Polygonaceae.
No. 66.
111793. RUMEX sp. Polygonaceae.
111794. ROSA sp. Rosaceae.
No. 68.
111795. SALVIA GLUTINOSA L. Menthaceae.
Sage.
No. 28. A perennial sage about 3 feet tall, glutinous hairy throughout, with ovate-oblong, dentate leaves up to 7 inches long and pale-yellow flowers an inch long in lax whorls. Native to Europe and Asia.
For previous introduction see 104587.
111796. SORBARIA Hindleyana Maxim. Rosaceae.
No. 54.
- 111797 to 111799. SENECIO spp. Astera-ceae.
111797. SENECIO sp.
No. 15.
111798. SENECIO sp.
No. 57.
111799. SENECIO sp.
No. 20.
111800. GYNURA ANGULOSA DC. Astera-ceae.
No. 41. A succulent herbaceous plant 3 to 10 feet high, with large sessile, acuminate stem leaves 6 to 12 inches long; the basal leaves are sometimes 2 feet long. The yellow or purplish flower heads are up to an inch in length. Native to the temperate regions of the Himalayas.
For previous introduction see 47690.
- 111801 to 111803. SOLANUM spp. Solanaceae.
111801. SOLANUM sp.
No. 47.
111802. SOLANUM sp.
No. 26.
111803. SOLANUM sp.
No. 11.
111804. SOPHORA MOLLIS (Royle) Grah. Fabaceae.
No. 1. A low shrub, with odd-pinnate leaves 6 inches long and small yellow flowers in numerous racemes 2 to 3 inches long. Native to the Himalayas at an altitude of about 4,000 feet.

111764 to 111821—Continued.

111805. VIBURNUM sp. Caprifoliaceae.
No. 21.
111806. (Undetermined.)
No. 7.
111807. (Undetermined.)
No. 59.
111808. BERBERIS sp. Berberidaceae.
No. 53.
111809. (Undetermined.)
111810. (Undetermined.)
No. 8.
111811. (Undetermined.)
No. 64.
111812. (Undetermined.)
No. 42.
111813. BERGENIA sp. Saxifragaceae.
No. 24.
111814. (Undetermined.)
No. 5.
111815. (Undetermined.)
111816. (Undetermined.)
No. 67.
111817. (Undetermined.)
No. 12.
111818. (Undetermined.)
111819. (Undetermined.)
No. 52.
111820. (Undetermined.)
No. 50.
111821. (Undetermined.)
No. 29.

111822 to 111825. PRUNUS spp. Amygdalaceae.

From Norway. Plants purchased from Prof. Olav Moen, Planteskolen, Norges Landbrukskøiskole, Ås. Received May 21, 1935.

Introduced for Department specialists.

- 111822 to 111824. PRUNUS AVIUM L. Sweet cherry.
111822. *Hedelfinger kjempe.*
111823. *White Spanish.*
111824. *Kronberg.*
111825. PRUNUS CERASUS L. Sour cherry.
Skyggekirsclear.

111826 to 111849.

From Australia. Plants purchased from L. P. Rosen & Son, Carlingford, New South Wales. Received May 23, 1935.

Introduced for Department specialists.

111826 to 111849—Continued.

- 111826 to 111839. AMYGDALUS spp. Amygdalaceae.
- 111826 to 111836. AMYGDALUS PERSICA L. Peach.
111826. *Bell's November.*
111827. *Braddock.*
111828. *Duchess of Cornwall.*
111829. *Early Silver.*
111830. *Manning.*
111831. *Marquis of Downshire.*
111832. *Royal George Cling.*
111833. *Royal George Slip.*
111834. *Watt's Early.*
111835. *Wiggins.*
111836. *Wooton.*
- 111837 and 111838. AMYGDALUS PERSICA NECTARINA Ait. Nectarine.
111837. *Masterpiece.*
111838. *River's Orange.*
111839. AMYGDALUS PERSICA L. Peach.
- 111840 to 111849. PRUNUS AVIUM L. Amygdalaceae. Sweet cherry.
111840. *Bedford Prolific.*
111841. *Belle d'Orleans.*
111842. *Eagles.*
111843. *Early Lyons.*
111844. *Early Purple Guigne.*
111845. *Florence.*
111846. *Noble.*
111847. *Precoce de Boppard.*
111848. *Ramen Oliva.*
111849. *St. Margaret.*

111850 to 111857. PRUNUS spp. Amygdalaceae.

From Sweden. Trees and scions purchased from Stensborgs Trädskolor, Karlstad. Received May 22, 1935.

Introduced for Department specialists.

- 111850 to 111855. PRUNUS AVIUM L. Sweet cherry.
111850. *Bigarra allmän gulröd.*
111851. *Brysselska brunkörsbär.*
111852. *Elton.*
111853. *Bigarra svart.*
111854. *Karlstads klarbär.*
111855. *Klarbär stora.*
- 111856 and 111857. PRUNUS CERASUS L. Sour cherry.
111856. *Ostheimer.*
111857. *Skuggmorell.*

INDEX OF COMMON AND SCIENTIFIC NAMES

- Abelmoschus esculentus*, 110883.
Abrus precatorius, 110222.
Acacia detinens, 111228.
Acanthopanax sp., 111389.
 trifoliatum, 110285.
Aconitum sp., 110885.
Aconitum kusnezoffii, 110479.
Acrocomia mexicana, 110613.
Actinidia chinensis, 111426, 111427.

UNITED STATES DEPARTMENT OF AGRICULTURE

INVENTORY No. 124

Washington, D. C.

Issued January, 1940

PLANT MATERIAL INTRODUCED BY THE DIVISION OF PLANT EXPLORATION AND INTRODUCTION, BUREAU OF PLANT INDUSTRY, JULY 1 TO SEPTEMBER 30, 1935 (Nos. 111858 to 112306)

CONTENTS

	Page
Introductory statement.....	1
Inventory.....	3
Index of common and scientific names.....	21

INTRODUCTORY STATEMENT

This inventory, No. 124, records the plant material (Nos. 111858 to 112306) received by the Division of Plant Exploration and Introduction during the period from July 1 to September 30, 1935.

In order to assist Department pathologists who are attempting to develop disease-resistant tobacco varieties for the United States, W. A. Archer spent several months traveling through Mexico, collecting seeds of all available types of cultivated tobacco from many widely separated sections in that country.

A special collection of desert shrubs and perennials (Nos. 112043 to 112051) from the Repetek Sand Desert Station, sent in as the result of the agricultural explorations of H. L. Westover and C. R. Enlow, are for testing by specialists in the Soil Conservation Service of this Department.

Mrs. Ynes Mexia,¹ to whom the Department has been indebted for a number of rare plants from eastern Ecuador, was still carrying on botanical explorations in that country during the autumn of 1935. Included in four shipments of seeds sent in by Mrs. Mexia were two lots of local alfalfa varieties (*Medicago sativa*, Nos. 111968 and 112216) and several rare ornamentals.

Ten shipments of peanut varieties, introduced from Brazil, Uruguay, and the Union of South Africa, and representing local strains developed in those countries, are intended for the use of plant breeders who are attempting to develop better oil-producing varieties.

From Auckland, New Zealand, H. R. Wright sent in to the Department plants of 13 fruit varieties, including new local forms of peach,

¹ Died July 11, 1938.

apple, pear, oriental persimmon, and mandarin orange (Nos. 112053-112065). These, of course, are destined for trial in the Southern States and the Pacific coast, where some of Mr. Wright's earlier introductions have already become successfully established.

The tropical hibiscus, one of the characteristic ornamental plants of the warmer parts of both the Old World and the New World, succeeds outdoors throughout most of Florida, where it is one of the most popular dooryard plants. It is of special interest to Florida gardeners, therefore, to record the introduction of a collection of 28 hibiscus varieties from Puerto Rico (Nos. 111886-111913). These are the results of crosses made by T. B. McClelland while at the Puerto Rico Agricultural Experiment Station at Mayaguez.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., March 15, 1939.

INVENTORY²

111858. COFFEA ZANGUEBARIAE Lour.
Rubiaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received July 15, 1935.

Introduced for Department specialists.

A small erect tree, 6 feet or more high, with ovate-lanceolate leaves and ovoid-oblong, red berries. Native to the Zanzibar coast and Mozambique, Africa.

111859. CORTADERIA SELLOANA (Schult.)
Aschers. and Graebn. Poaceae.
Pampasgrass.

From New Zealand. Plants presented by Alexander McClean, Weiteraruru, Hauraki Plains, Auckland, at the request of the Director-General of Agriculture, Wellington. Received July 24, 1935.

Introduced for Department specialists.

A perennial reedlike grass with stout culms; up to 10 feet high. Native to Brazil and Argentina.

111860. CITRUS LIMONIA Osbeck. Ruta-
ceae. Lemon.

From the Soviet Union. Seeds presented by the Dry Subtropical Station, Tashkent. Received August 2, 1935.

Introduced for Department specialists.

111861. EUPHORIA DIDYMA Blanco. Sa-
pindaceae.

From Puerto Rico. Seeds collected by H. P. Traub at the Agricultural Experiment Station, Mayaguez. Received August 1, 1935.

Introduced for Department specialists.

Alpay or *alupag*. A small attractive tree, up to 50 feet high, with pinnate leaves made

111861—Continued.

up of prominently veined, leathery, lanceolate leaflets and compact terminal clusters of green warty edible fruits. These are an inch in diameter with a shell-like rind and juicy sweet translucent pulp of good flavor, enclosing a large seed. Native to the Philippine Islands.

For previous introduction see 106101.

111862 to 111868. ARACHIS HYPOGAEA L.
Fabaceae. Peanut.

From the Union of South Africa. Seeds presented by Jacq. Seilschop, School of Agriculture and Experiment Station, Potchefstroom, through W. A. Carver, experiment station, Gainesville, Fla. Received July 23, 1935.

Introduced for Department specialists.

111862. *Java 15 AP.*

111863. *Natal Common*, a local variety.

111864. *Red × Rio de Janeiro.*

111865. *Rustenburg.*

111866. *Virginia bunch (71-4).*

111867. *Potchefstroom No. 570 (Yellow × Rio de Janeiro).*

111868. Native peanuts grown by the aborigines of the Transvaal.

111869. ZEPHYRANTHES SESSILIS Herb.
Amaryllidaceae. Zephyrilly.

From Mexico. Seeds and bulbs presented by Dr. José Figueroa, Instituto Biotecnico, Distrito Federal. Received July 26, 1935. Introduced for Department specialists.

A Mexican zephyrilly with three to six narrow linear leaves up to 1 foot long and an equally long scape bearing a showy white flower tinged with red.

For previous introduction see 111430.

² It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identification, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

111870 to 111875. EUCALYPTUS spp.
Myrtaceae.

From Australia. Seeds presented by F. H. Baker, Richmond, Victoria. Received July 23, 1935.

Introduced for Department specialists.

111870. EUCALYPTUS CAESIA Benth.

A small tree with the branches and foliage pale glaucous to nearly white. The ovate-lanceolate leaves are rather thick and generally about 3 inches long. Native to Western Australia.

111871. EUCALYPTUS CRUCIS Maiden.

A small tree 25 feet or less high, glaucous throughout, with small thick ovate to lanceolate leaves over an inch long. Native to Western Australia.

111872. EUCALYPTUS ERYTHROCORYS Muell.

Usually a shrub 8 to 10 feet high, but sometimes a tree up to 30 feet. The broadly linear, rigid leaves are 6 inches long, and the large flowers, in axillary clusters, have bright-red, fleshy caps over the buds; the long stamens are yellow. The ribbed, hemispherical fruits are 1 to 2 inches long. It is native to Western Australia.

For previous introduction see 106337.

111873. EUCALYPTUS MACROCARPA Hook.

A stout shrub or small tree up to 15 feet high, with thick rigid cordate glaucous leaves 6 inches long and large solitary, brilliant orange or crimson flowers. Native to Western Australia.

For previous introduction see 104169.

111874. EUCALYPTUS PREISSIANA Schauer.

A shrubby eucalyptus about 8 feet high, with rigid branchlets, shining-green, oblong-elliptic leaves nearly 4 inches long, and small yellowish flowers in axillary clusters. Native to Western and South Australia.

For previous introduction see 106342.

111875. EUCALYPTUS PYRIFORMIS Turcz.

Red Mallet. A shrub or small tree, found in Western and South Australia, where it attains a height of 8 to 10 feet. The very thick, narrow leaves are rarely more than 3 inches long, and the large flowers are red when fresh. The yellowish-white wood is hard, heavy, and durable.

For previous introduction see 106343.

111876. ASTREBLA LAPPACEA (Lindl.)
Domin. Poaceae.

Hook Mitchell grass.

From Australia. Seeds purchased from Arthur Yates & Co., Ltd., Sydney, New South Wales. Received July 23, 1935.

Introduced for Department specialists.

A tall perennial grass with broad succulent leaves. Native to Australia, where it is considered an excellent pasture grass.

For previous introduction see 75697.

111877. PHOENIX PALUDOSA Roxb. Phoenicaceae. Date palm.

From India. Seeds presented by the Royal Botanic Gardens, Sibpur, near Calcutta. Received July 26, 1935.

111877—Continued.

Introduced for Department specialists.

A small tree found in the estuarine regions along the coast of India from Bengal to Burma and in the Andaman Islands. It is a typical mangrove plant which forms alternating bands of associations with another mangrove palm, *Nipa fruticans*.

For previous introduction see 32822.

111878 and 111879.

From Puerto Rico. Seeds presented by Claud L. Horn, Agricultural Experiment Station, Mayaguez. Received July 26, 1935.

Introduced for Department specialists.

111878. AERIA ATTENUATA O. F. Cook.
Phoenicaceae. Palma de coyor.

Locally known also as the *coyore*. The tallest of the Puerto Rican palms, it reaches a height of 60 to 100 feet. Its pinnate foliage resembles that of the royal palm, but is shorter; the trunk never exceeds 6 to 8 inches in diameter. This palm is found only on limestone hills and usually feeds upon nothing but the humus collected in the cracks of these rocks. The large bunches of orange-red berries, which are the size of a small cherry, are very attractive and are fed to chickens and hogs.

For previous introduction see 39189.

111879. EUPHORIA DIDYMA Blanco. Sapindaceae.

For previous introduction and description see 111861.

111880 to 111885. ARACHIS spp. Fabaceae. Peanut.

From Brazil. Seeds presented by the Director, Instituto Agronomico, Campinas São Paulo. Received July 26, 1935.

Introduced for Department specialists.

111880 and 111881. ARACHIS HYPOGAEA L.

111880. *Amarello.*

111881. *Commum.*

111882. ARACHIS NAMBYQUARAE Hoehne.

Listed as *Arachis hypogaea* var. *Nhambiguara*; changed for taxonomic reasons. A native variety, cultivated by the Indians; seeds large and variable in color.

111883 to 111885. ARACHIS HYPOGAEA L.

111883. *Porto-Alegere.*

111884. *Rasteiro.*

111885. *Rozo.*

111886 to 111913. HIBISCUS. Malvaceae.

From Puerto Rico. Cuttings presented by Atherton Lee, Director, Puerto Rico Agricultural Experiment Station, Mayaguez. Received August 1, 1935.

A collection of hibiscus varieties, largely the results of crosses, many of them between varieties of hybrid or uncertain origin, made at Mayaguez by T. B. McClelland, formerly director of the Puerto Rico Agricultural Experiment Station.

Introduced for Department specialists.

111886. *Christine.* A dwarf, small-flowered yellow variety.

111886 to 111913—Continued.

111887. *Dr. N. L. Britton*. A pale-yellow flower, 6 inches or more in diameter, flushed with red in the center with a lighter reddish flush extending along the veins. The long silky, slightly narrow petals suggest those of a lily.
111888. *Flame*. A scarlet hibiscus, which is a cross between a red-centered yellow hybrid variety from St. Thomas, Virgin Islands, and the common large Puerto Rican red.
111889. *Jean Whittemore*. A carrot-red flower, 6 inches across, with full crinkly petals.
111890. *Lily*. A lilylike white flower with a pink center.
111891. *Mary McClelland*. A cross between a white with a red eye and a self-colored yellow. The flower is 5 inches across, with rounded petals of crepe-like texture, snow white in effect; the leaves are dark glossy green.
111892. *Minnie Troutman*. A self-colored yellow flower; a cross between a white flower with a red eye and a self-colored yellow.
111893. *P. R. No. 1142*. Female parent, a yellow with red center, from St. Thomas, Virgin Islands.
111894. *P. R. No. 1422*. Female parent, a yellow with red center, from St. Thomas, Virgin Islands.
111895. *P. R. No. 1435*. A soft pink flower with salmon shading; a cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111896. *P. R. No. 1443*. A cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111897. *P. R. No. 1929*. A beautiful lively pink flower; a cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111898. *P. R. No. 1946*. One of the most attractive pinks obtained from the cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111899. *P. R. No. 2029*.
111900. *P. R. No. 2030*.
111901. *P. R. No. 2130*.
111902. *P. R. No. 2228*. A cream-colored flower.
111903. *P. R. No. 2232*.
111904. *P. R. No. 2413*. Female parent, *Laurita Sherman*.
111905. *P. R. No. 2631*.
111906. *P. R. No. 2673*. Female parent, Hawaiian variety, No. 100:1.
111907. *P. R. No. 2968*. A cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111908. *P. R. No. 2971*. A cross between Hawaiian variety No. 205:2 and *Hibiscus schizopetalus*.
111909. *P. R. No. 3160*.
111910. Hawaiian variety No. 205:2.
111911. *No. P-1*. A variety received in Puerto Rico from Panama.

111886 to 111913—Continued.

111912. *No. P-11*.
111913. A large-flowered, handsome pink flower with darker center. Origin unknown.
111914. *SACCHARUM SPONTANEUM L.*
Poaceae. Grass.
From New Guinea. Cuttings collected by Percival H. Leigh, Port Moresby, Papua. Received August 2, 1935.
A grass closely related to sugarcane; introduced for Department specialists.
For previous introduction see 111347.
111915. *LITCHI CHINENSIS Sonner.* Sapindaceae. Lychee.
From China. Seeds collected by a Mr. Lee in the market at Canton, and presented through Ira D. Condit, University of California. Received August 6, 1935.
Introduced for Department specialists.
A mixture of two varieties; mostly *Waaai Chi*, with a few *Chan Chi*. Received as seedlings.
For previous introduction see 109768.
- 111916 to 111931.
From Australia. Plants purchased from F. Ferguson & Son, Hurstville and Camden, New South Wales. Received August 7, 1935.
Introduced for Department specialists.
- 111916 to 111922. *AMYGDALUS PERSICA L.*
Amygdalaceae. Peach.
111916. *Camden Golden*.
111917. *Downing*.
111918. *Early Newington*.
111919. *George IV*.
111920. *Kirshler Prize*.
111921. *Lewis Cling*.
111922. *Newington*.
- 111923 to 111926. *AMYGDALUS PERSICA NECTARINA Ait.* Amygdalaceae. Nectarine.
111923. *Ben's Rick*.
111924. *Mrs. Dr. Chisholm*.
111925. *Newington*.
111926. *Precoce de Croncels*.
- 111927 and 111928. *PRUNUS ARMENIACA L.*
Amygdalaceae. Apricot.
111927. *Campbellfield's Seedling*.
111928. *Red Masculine*.
- 111929 to 111931. *PRUNUS AVIUM L.* Amygdalaceae. Sweet cherry.
111929. *Bigarreau Twyford*.
111930. *Burgdoff's Seedling*.
111931. *Chapman*.
- 111932 to 111934. *ARACHIS spp.* Fabaceae. Peanut.
From Brazil. Seeds presented by F. C. Hoehne, Chefe de Serviço Científico, Serviço de Botânica e Agronomia, São Paulo. Received August 8, 1935.

111932 to 111934—Continued.

Native varieties of peanuts introduced for Department specialists.

111932 and 111933. *ARACHIS HYPOGAEA* L.

111932. *Forma Grande*.

111933. *Forma Jumbo*.

111934. *ARACHIS NAMBYQUARAE* Hoehne.

A Brazilian relative of the peanut, which is a much-branched, prostrate or ascending plant. The pod is 2 to 3 inches long, with usually two seeds, which are edible and very oily.

For previous introduction see 68831.

111935 and 111936. *TRIFOLIUM SUBTERRANEUM* L. Fabaceae.

Subterranean clover.

From Australia. Seeds purchased from F. H. Brunning, Melbourne. Received August 2, 1935.

Introduced for Department specialists.

111935. *Dwalganup*. An extra early maturing strain.

111936. *Midseason* or *Mount Barker* strain.

111937. *BRASSICA RAPA* L. Brassicaceae.

Turnip.

From China. Seeds purchased from Dr. J. F. Rock, Yunnanfu, Yunnan. Received August 6, 1935.

Introduced for Department specialists.

Received under the varietal name "depressa," for which a place of publication has not been found.

111938 to 111940. *ARACHIS HYPOGAEA* L. Fabaceae.

Peanut.

From Brazil. Seeds presented by J. C. Bela Lisboa, Director, Escola Superior de Agricultura e Medicina Veterinaria, Vigosa, Minas Geraes. Received July 26, 1935.

Introduced for Department specialists.

111938. *Hespanhol*.

111939. *Porto-Alegre*.

111940. *Roxo*.

111941. *ARCHONTOPHOENIX ALEXANDRAE* (F. Muell.) Wendl. and Drude. Phoenicaceae.

Palm.

From Mexico. Plants collected by W. E. Sexton, of the McKee Jungle Gardens, Vero Beach, Fla., and presented through the Bureau of Entomology and Plant Quarantine. Received July 18, 1935.

For previous introduction see 110823.

111942. *CITRUS MYRTIFOLIA* Raf. Rutaceae.

From the Belgian Congo. Seeds presented by Rev. J. Gillet, Kisantu. Received July 26, 1935.

Introduced for Department specialists.

A small unarmed tree with narrow leaves that bears small, flattened, very sour oranges. Native to China.

111943. *ALLIUM CEPA* L. Liliaceae.

Onion.

From Australia. Seeds presented by Dr. H. Wenholz, Department of Agriculture, Syd-

111943—Continued.

ney, New South Wales. Received July 20, 1935.

Introduced for Department specialists.

McKimm strain of *Hunter River Brown*.

111944 to 111946. *IRIS* spp. Iridaceae.

From the Soviet Union. Roots presented by N. I. Sharapov, Head of the Department of New Cultures and Introduction, Leningrad, at the request of the Subtropical Introduction Garden, Sukhum, Transcaucasia. Received July 17, 1935.

111944. *IRIS LYCOTIS* Woron.

An iris of the *Oncocyclus* section, closely related to *Iris paradoxa*.

111945. *IRIS PARADOXA* Stev. Velvet iris.

A dwarf, linear-leaved *Oncocyclus* iris 2 to 6 inches high, with large lilac or white flowers. Native to northern Iran (Persia) and Asia Minor, where it grows in dry situations.

For previous introduction see 68166.

111946. *IRIS* sp.

Received under the name "vavilovii," for which a place of publication has not been found.

111947 and 111948. *PHOENIX* spp. Phoenicaceae.

Palm.

From Africa. Seeds collected by J. F. Ward and presented by the Agricultural Department of Samaru, Zaria, Northern Provinces, Nigeria. Received July 13, 1935.

The wild date is practically always confined to swamps and banks of streams and is commonly found in broad grassy swampy glades growing on old decomposed anthills. These hills, being raised above the surrounding level, do not get flooded. Introduced for Department specialists.

111947. *Wamba*, 624. From Wamba I, Southern Division, Plateau Province.

111948. *Ukum*, 623. From Ukum district of Tiv Division, Benue Province.

111949. *LITCHI CHINENSIS* Sonner. Sapindaceae.

Lychee.

From China. Seeds presented by the Lingnan University, Canton, at the request of Dr. G. Weidman Groff, and shipped by Ira J. Condit, visiting professor at Lingnan University, 1934-35. Received July 15, 1935.

Introduced for Department specialists.

111950 to 111956. *CITRUS* spp. Rutaceae.

From Spain. Budsticks presented by D. Manuel Herrero, Ingeniero-Director, Estación Naranja de Levante, Valencia. Received July 10, 1935.

Introduced for Department specialists.

111950 to 111954. *CITRUS SINENSIS* (L.) Osbeck. Orange.

111950. *Cadenera*.

111951. *Sangre Fina*.

111952. *Torregrosa*.

111953. *Valencia Comán*.

111954. *Washington Sangre*.

111950 to 111956—Continued.

111955. *CITRUS NOBILIS DELICIOSA* (Ten.) Swingle. Mandarin orange.

111956. *CITRUS LIMONIA* Osbeck. Lemon.

111957 to 111965. *ARACHIS* spp. Fabaceae. Peanut.

From Brazil. Seeds presented by A. Correa Meyer, Director, Estação Experimental de Cana de Assucar e Plantas Oleaginosas, Piracicaba, São Paulo. Received July 5, 1935.

A collection of peanut varieties, introduced for Department specialists.

111957 to 111963. *ARACHIS HYPOGAEA* L.

111957. *Comum.*

111958. *Jambo.*

111959. *Java Graúdo.*

111960. *Java Miúdo.*

111961. *Porto Alegre.*

111962. *Preto.*

111963. *Roxo.*

111964. *ARACHIS NAMBYQUARAE* Hoehne.

Nhambiquara.

111965. *ARACHIS HYPOGAEA* L.

Rasteiro. A prostrate perennial peanut, native to Brazil.

111966 to 111968.

From Ecuador. Seeds and bulbs collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received July 3, 1935.

Introduced for Department specialists.

111966. *URCEOLINA PERUVIANA* (Presl) Macbr. Amaryllidaceae.

No. 7355. Cerro del Panecillo, Quito, at 9,800 feet altitude. Seeds and bulbs of a tender plant, with wide oblong leaves 1 foot long and a solitary scape with an umbel of four to six nodding yellow to orange-red flowers. Native to the Andes of Peru.

111967. *LUPINUS* sp. Fabaceae.

No. 7357-A (Archer No. 3431). A shrub collected June 1, 1935, near Quito, Provincia Pinchincha, at about 10,000 feet altitude by W. A. Archer and sent in by Mrs. Mexia. Seeds.

111968. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 7356-A. From Hacienda La Chine, near Guaranda, Canton San Miguel, Provincia Bolivar. Seeds presented by Sr. Regulo de More, through Dr. Luis Boya.

111969 to 111981.

From the Soviet Union. Seeds presented by the Director, Botanical Garden of the Academy of Sciences, Leningrad. Received July 5, 1935.

Introduced for Department specialists.

111969 to 111977. *FESTUCA* spp. Poaceae. Fescue.

111969. *FESTUCA AMETHYSTINA* L.

111970. *FESTUCA ELATIOR* L.

Meadow fescue.

111969 to 111981—Continued.

111971. *FESTUCA ELATIOR ARUNDINACEA* (Schreb.) Wimm.

111972 and 111973. *FESTUCA OVINA* L. Sheep fescue.

111974. *FESTUCA OVINA GLAUCA* (Lam.) Koch.

111975. *FESTUCA OVINA SULCATA* Hack.

111976. *FESTUCA OVINA VALLESIIA* C A (Schleich.) Link.

111977. *FESTUCA* sp.

111978 to 111981. *IRIS* spp. Iridaceae.

111978. *IRIS SPURIA HALOPHILA* (Pall.) Dykes.

A variety from central Asia, distinguished by numerous relatively short stems and very narrow perianth segments. The flowers vary in color from white veined with yellow to dull yellow or gray purple.

For previous introduction see 76346.

111979. *IRIS PRISMATICA* Pursh. Cubeseed iris.

111980. *IRIS SPURIA HALOPHILA* (Pall.) Dykes.

See 111978 for description.

111981. *IRIS* sp.

111982 and 111983.

From Mexico. Seeds and plants presented by C. A. Purpus, Zacuapam, Huatusco, Veracruz. Received July 9, 1935.

Introduced for Department specialists.

111982. *DIOON* sp. Cycadaceae.

A plant received as *Dioon pinos*, for which a place of publication has not been found.

111983. *PRUNUS CAPULI* Cav. Amygdalaceae. Capulin.

Seeds of a small tree closely related to the wild black cherry of the eastern United States (*Prunus serotina* Ehrh.). It is native to the highlands of Mexico and South America, and the black globose cherries are usually about one-half inch in diameter.

For previous introduction see 98346.

111984. *PACHYRHIZUS TUBEROSUS* (Lam.) Spreng. Fabaceae. Jicama.

From Mexico. Seeds presented by Prof. A. L. Herrera, Laboratorio de Plasmogonia, Mexico, D. F. Received July 9, 1935.

A twining herbaceous vine up to 20 feet long, with a large edible tuberous root. Native to tropical America.

111985 and 111986. *AGROSTIS TENUIS* Sibth. Poaceae.

From New Zealand. Seeds presented by A. S. Patterson & Co., Ltd., Dunedin. Received July 10, 1935.

Introduced for Department specialists.

For previous introduction see 101101.

111985. *Blue, Certified Brountop.*

111986. *Harvey, Certified Brountop.*

- 111987. CASUARINA RUMPHIANA** Miquel.
Casuarinaceae.
From Java. Seeds presented by the Director, Botanic Garden, Buitenzorg. Received July 6, 1935.
Introduced for Department specialists.
A rather scraggly tree with very slender, delicate green, pendent branches and cones having few seeds. It is native to Java.
For previous introduction see 92374.
- 111988 to 111991. CASUARINA spp.** Casuarinaceae.
From Australia. Seeds presented by C. A. Gardner, Government Botanist, Perth, Western Australia. Received July 9, 1935.
Introduced for Department specialists.
- 111988. CASUARINA ACUARIA** F. Muell.
A leafless shrub with erect rigid branches and numerous deciduous branchlets; these are erect, slender, but rigid, and each consists of but two internodes. The cones, globular and solitary or in small clusters, are about 1 inch in diameter. Native to Western Australia.
For previous introduction see 105789.
- 111989. CASUARINA GREVILLEOIDES** Diels.
A low bushy shrub about 1 foot high, with the branches and branchlets much-jointed and the younger joints white tomentose. Native to Western Australia.
For previous introduction see 105795.
- 111990. CASUARINA HELMSII** Ewart and Gordon.
A Western Australian tree 5 feet high, with slender terete branchlets 4 to 5 inches long. The nearly smooth cones are 1 inch long and about half an inch in diameter.
For previous introduction see 93789.
- 111991. CASUARINA TRICHODON** Miq.
An erect leafless shrub about 8 feet high with branchlets usually pendulous; closely resembling *Casuarina stricta*. Native to rocky places in Western Australia.
- 111992. ARACHIS HYPOGAEA** L. Fabaceae. **Peanut.**
From Brazil. Seeds presented by the Director, Instituto de Biologia Vegetal, Rio de Janeiro. Received July 12, 1935.
Introduced for Department specialists.
- 111993. CITRUS SINENSIS** (L.) Osbeck. Rutaceae. **Orange.**
From Spain. Budsticks presented by D. Manuel Herrero, Ingeniero-Director, Estación Naranjera de Levante, Valencia. Received July 17, 1935.
Macetra. Introduced for Department specialists.
- 111994 to 111997. PHALARIS spp.** Poaceae. **Canary grass.**
From Australia. Seeds presented by the Waite Agricultural Research Institute, Adelaide University, Glen Osmond, South Australia. Received July 9, 1935.
Introduced for Department specialists.
- 111994. PHALARIS COERULESCENS** Desf. Gb. 414. A caespitose perennial grass.
- 111994 to 111997—Continued.**
For previous introduction see 88726.
- 111995 to 111997. PHALARIS TUBEROSA** L. Toowoomba canary grass.
A forage grass which has proved successful at the Waite Agricultural Research Institute.
For previous introduction see 104988.
111995. Gb. 299. 111997. Gb. 421.
111996. Gb. 409.
- 111998 and 111999. CARICA PAPAYA** L. Papayaceae. **Papaya.**
From California. Seeds presented by Col. James Stewart, Ardsheal Ranch, La Habra Heights. Received July 13, 1935.
Introduced for Department specialists.
- 111998. A Tahitian variety** with large fruit.
111999. A South African variety with smaller fruit.
- 112000 to 112012. PISTACIA VERA** L. Anacardiaceae. **Pistachio.**
From the Soviet Union. Seeds presented by the Dry Subtropical Station, Tashkent. Received August 3, 1935.
Introduced for Department specialists.
- 112000. No. O-2815. 112007. No. O-2822.**
112001. No. O-2816. 112008. No. O-2823.
112002. No. O-2817. 112009. No. O-2824.
112003. No. O-2818. 112010. No. O-2837.
112004. No. O-2819. 112011. No. O-2838.
112005. No. O-2820. 112012. No. O-2839.
112006. No. O-2821.
- 112013 to 112016. COIX LACRYMA-JOBI** L. Poaceae. **Jobs-tears.**
From the Philippine Islands. Seeds presented by the College of Agriculture, University of the Philippines, Los Baños, Laguna. Received August 5, 1935.
Introduced for Department specialists.
- 112013. A cultivated glutinous variety.**
112014. Lokfao. A cultivated variety.
112015. A wild variety.
112016. A wild variety.
- 112017. RUBUS MACROCARPUS** Benth. Rosaceae. **Colombian blackberry.**
From Colombia. Seeds collected by Guevera Amortegui Baltasar, Fusagasuga, and presented by Dr. W. E. Maxon, Smithsonian Institution, Washington, D. C. Received August 12, 1935.
Introduced for Department specialists.
For previous introduction see 74553.
- 112018 and 112019. PERSEA AMERICANA** Mill. Lauraceae. **Avocado.**
From Costa Rica. Budsticks presented by Dr. Oton Jiminez, San José. Received August 14, 1935.
Introduced for Department specialists.
- 112018. A large-fruited variety** with small seeds.
112019. A seedless variety.

112020. CITRUS GRANDIS (L.) Osbeck.
Rutaceae. **Grapefruit.**

From Plant Introduction Garden, Glenn Dale, Md. Plant growing under C. P. B. No. 10696; numbered August 19, 1935.

Song Ma Yau.

112021. ALLIUM SATIVUM L. Liliaceae.
Garlic.

From China. Bulblets presented by T. Y. Wang, Head of Horticultural Department, the Sun Yat-Sen Tomb and Memorial Park Commission, Nanking. Received August 20, 1935.

Introduced for Department specialists.

112022 to 112025. SOLANUM TUBEROSUM L. Solanaceae.

From Buenos Aires, Argentina. Tubers received August 20, 1935.

Introduced for Department specialists.

112022. *Bocha.*

112023. *Chaguena.*

112024. *Limon.*

112025. No. 1. *North American Blanco Larga.*

112026. GARCINIA MANGOSTANA L. Clusiaceae.
Mangosteen.

From the Canal Zone. Seeds presented by J. E. Higgins, Director, Canal Zone Experiment Gardens, Summit. Received August 20, 1935.

Introduced for Department specialists.

For previous introduction see 106110.

112027 and 112028. PHELUM PRATENSE L. Poaceae. **Timothy.**

From Sweden. Seeds presented by E. Akerberg, Weibullsholm Plant Breeding Institute, Landskrona. Received August 13, 1935.

Introduced for Department specialists.

112027. W: s. Orig. Kämpfe II.

112028. W: s. Orig. Kämpfe.

112029. MELINIS MINUTIFLORA Beauv. Poaceae. **Molasses grass.**

From Venezuela. Seeds presented by Ernesto Stelling, Valencia, through W. A. Archer, Bureau of Plant Industry. Received August 15, 1935.

Introduced for Department specialists.

No. 3112. *Yaragua.* A cultivated forage grass, collected on the farm of Ernesto Stelling, Valencia, February 26, 1935.

For previous introduction see 110192.

112030. DELPHINIUM LIKIANGENSE Franch. Ranunculaceae. **Larkspur.**

From China. Seeds collected by Dr. Joseph F. Rock, Yunnanfu, Yunnan. Received August 15, 1935.

One of the finest larkspurs, with stems 4 to 8 inches high, and dark-green, glossy leaves in cushionlike rosettes. The large rich-blue flowers are an inch across, and there are several spikes on a plant at one time. It is endemic in Yunnan and peculiar to the Likang Snow Range, where it grows in wet

112030—Continued.

gravelly soil at the foot of glaciers and in mountain meadows at 13,000 feet altitude.

For previous introduction see 103216.

112031. PRUNUS SIMONII Carr. Amygdalaceae. **Simon plum.**

From the Soviet Union. Scions presented by N. I. Sharapov, Head of Department of New Cultures and Introduction, Leningrad. Received March 8, 1935. Numbered in August 1935.

Introduced for Department specialists.

A locally grown variety from middle Asia.

For previous introduction see 91527.

112032 to 112040.

From India. Plants purchased from the Government Botanical Garden, Saharanpur. Received February 28, 1934. Numbered in August 1935.

Introduced for Department specialists.

112032 to 112035. AMYGDALUS PERSICA L. Amygdalaceae. **Peach.**

112032. *Saharanpur No. 1.*

112033. *Saharanpur No. 2.*

112034. *Saharanpur No. 6.*

112035. *Shanghai freestone.*

112036 to 112040. PRUNUS spp. Amygdalaceae.

112036. *Botanky plum.*

112037. *Dwarf early yellow plum.*

112038. *Early round plum.*

112039. *Katanky plum.*

112040. *Shirosumomo plum.*

112041. RUBUS GLAUCUS Benth. Rosaceae. **Andes raspberry.**

From Java. Seeds presented by A. M. Cramer, Wonosobo. Received June 1, 1934. Numbered in August 1935.

Introduced for Department specialists.

A red-fruited raspberry with canes 6 feet high.

For previous introduction see 101218.

112042. PRUNUS ARMENIACA L. Amygdalaceae. **Apricot.**

From the Soviet Union. Plants presented by the Institute of Plant Industry, Leningrad. Received March 19, 1935. Numbered in August 1935.

No. 6. Introduced for Department specialists.

112043 to 112051.

From the Soviet Union. Seeds presented by the Repetek Sand Desert Station, Turkmenistan, through H. L. Westover and C. R. Enlow, Bureau of Plant Industry. Received August 15, 1935.

The field numbers are those of the Westover and Enlow series.

Introduced for Department specialists.

112043. ASTRAGALUS sp. Fabaceae.

No. 1651.

112043 to 112051—Continued.

112044 to 112047. CALLIGONUM spp. Polygonaceae.

112044. CALLIGONUM ARBORESCENS Litv.
No. 1652. A drought-resistant shrub
10 feet high.

For previous introduction see 108887.

112045. CALLIGONUM CAPUT - MEDUSAE
Schrenk.

No. 1654. A leafless shrub, native to
northern and central Asia, where it is
used as a sand binder.

112046. CALLIGONUM COMOSUM L'Her.

No. 1653. A densely branched shrub
10 to 15 feet high, with minute subulate
leaves and small ovate, densely spiny,
nutlike fruits. Native to the eastern
Mediterranean region.

For previous introduction see 108890.

112047. CALLIGONUM SETOSUM Litv.

No. 1655. A leafless shrub, native to
the Caspian region, where it is used as
a sand binder.

For previous introduction see 108893.

112048. FERULA LITWINOWIANA K.-Pol.
Apiaceae.

No. 1659. A low hairy herbaceous peren-
nial with numerous small triangular
pinnately cut leaves and inconspicuous
flowers in compound umbels. Native to the
Transcaspian region.

For previous introduction see 98214.

112049. JURINEA DERDERIOIDES C. Winkl.
Asteraceae.

No. 1662. A hardy herbaceous perennial
about 3 feet high, with gray oblong-lance-
olate leaves and small heads of purple
flowers. Native to Turkistan.

112050. RHEUM TURKESTANICUM Janischew.
Polygonaceae.

No. 1667. A wild rhubarb from the
Transcaspian region, over 2 feet high, with
a large thick rhizome and a short, thick-
ened, densely leafy stem. The cordate-
reniform leaves, up to 8 in number, are
about a foot wide.

For previous introduction see 108953.

112051. ULMUS FOLIACEA Gilib. Ulmaceae.
Smoothleaf elm.

No. 1668. A slender pyramidal tree with
corky branches. The leaves are obliquely
oval or ovate, doubly toothed, and up to 4
inches long. Native to Europe and west-
ern Asia.

For previous introduction see 38491.

112052. CARICA PAPAYA L. Papayaceae.
Papaya.

From California. Seeds presented by Col.
James Stewart, Ardsheal Ranch, La Habra
Heights. Received August 26, 1935.

Sandwich Island papaya; introduced for
Department specialists.

112053 to 112065.

From New Zealand. Plants presented by
H. R. Wright, Auckland. Received August
22, 1935.

Introduced for Department specialists.

112053 to 112065—Continued.

112053. ACTINIDIA CHINENSIS Planch. Dil-
leniaceae. Yangtao.

A form with very large fruits.

For previous introduction see 111427.

112054 and 112055. AMYGDALUS PERSICA L.
Amygdalaceae. Peach.

112054. *Gray's seedling*. An early semi-
cling with white flesh of superb flav-
or; an *Elberta* seedling.

112055. *Gus Friedrich*. A large, highly
colored peach of superb flavor.

112056. PRUNUS. Amygdalaceae.

A peach-plum hybrid which makes an
ornamental tree.

112057 to 112059. CITRUS spp. Rutaceae.

112057. CITRUS sp.

A new grapefruit, grapefruit-orange
hybrid, preferred to our New Zealand
grapefruit or *Poorman's* orange, being
less bitter.

112058. CITRUS GRANDIS (L.) Osbeck.
Grapefruit.

The Chinese pomelo, much prized by
white people in China.

112059. CITRUS NOBILIS DELICIOSA (Ten.)
Swingle. Mandarin orange.

Richard's Special Mandarin. The tree
produces an abundance of large fruits.

112060 and 112061. DIOSPYROS KAKI L. f.
Diospyraceae. Kaki.

112060. *Purple Splendor*. Fruit non-
astringent even when hard.

112061. *Tricolor*.

112062. MALUS SYLVESTRIS Mill. Malaceae.
Apple.

A red sport of *Cox Orange Pippin*.

112063. PRUNUS sp. Amygdalaceae.

A Japanese plum, *Lock's Purple*; a *Pur-
ple King* seedling.

112064 and 112065. PYRUS COMMUNIS L.
Malaceae. Common pear.

112064. *Garber* seedlings.

112065. *Packham Late*. A very large
and very late pear of fine flavor.

112066 to 112076.

From Puerto Rico. Plants collected by H.
P. Traub, Bureau of Plant Industry. Re-
ceived August 21, 1935.

Introduced for Department specialists.

112066. ANANAS COMOSUS (L.) Merr.
Bromeliaceae. Pineapple.

Mayaguez No. 1.

Nos. 112067 to 112076 were collected in
Luquillo National Forest.

112067. ANTHURIUM sp. Araceae.

112068. (Undetermined.)

112069. (Undetermined.)

A bromeliad.

112070. (Undetermined.)

A terrestrial orchid.

112071. (Undetermined.)

An orchid.

112066 to 112076—Continued.

112072. (Undetermined.)

An orchid.

112073. PIPER sp. Piperaceae.

112074. (Undetermined.)

A fern.

112075. (Undetermined.)

An ornamental grass.

112076. SELAGINELLA sp. Selaginellaceae.

112077 and 112078. ARACHIS HYPOGAEA
L. Fabaceae. Peanut.

From Uruguay. Seeds presented by the Director, Granja Modelo del Instituto Nacional de Agronomía. Received August 19, 1935.

Introduced for Department specialists.

112077. *Salteña No. 1.*112078. *Salteña No. 2.*112079. SACCHARUM. Poaceae.
Sugarcane.

From the Netherland East Indies. Cuttings presented by a Mr. Douglas. Received August 29, 1935.

Introduced for Department specialists.

112080. SEMIARUNDINARIA FASTUOSA
(Marl.) Makino. Poaceae.

Narihira bamboo.

Plants growing at the Barbour Lathrop Plant Introduction Garden, Savannah, Ga. Re-numbered August 1935.

One of the handsomest and hardiest of all bamboos; culms up to 20 feet or more in height are ultimately produced where the minimum temperature is not lower than about -3° F. The smaller culms are densely clothed from near the ground up with dark-green leaves borne on short ascending branches. Native to Japan. Previously carried under P. I. No. 38913, but as this bamboo is not the same species originally listed and described there, this new number is assigned. The original source of the plants is uncertain.

112081 to 112091.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received August 24, 1935.

112081. CALPURNIA AUREA (Lam.) Benth.
Fabaceae.

From Kenya Colony, Africa. A tall leguminous shrub, very rarely tree-like, with large, evergreen, odd-pinnate leaves and showy racemes of yellow flowers, much like those of *Laburnum*, but which appear in the winter.

For previous introduction see 42829.

112082. CASSIA SURATENSIS Burm. f. Caesalpinaceae.

From the Botanic Gardens, Buitenzorg, Java. A tropical leguminous shrub or small tree up to 15 feet high, with pale-green compound leaves and clusters of pale-yellow flowers. Native to the East Indies.

For previous introduction see 106918.

112081 to 112091—Continued.

Nos. 112083 to 112091 were collected by the Forest Department of Kenya Colony, Africa, and sent to the Atkins Institution.

112083. CASUARINA SUBEROSA Otto and Dietr. Casuarinaceae.

A species with very large fruits ($1\frac{1}{2}$ inches) and long coarse pendent branchlets, very distinct from *Casuarina equisetifolia*. It is native to Australia.

For previous introduction see 92485.

112084. CUPRESSUS GLABRA Sudw.
Pinaceae. Smooth cypress.

A tree from 25 to 30 feet high, with thin, smooth, dark purple-red bark, upright branches, and bright blue-green foliage. Native to southern Arizona.

For previous introduction see 41690.

112085. CUPRESSUS TORULOSA Don.
Pinaceae. Bhutan cypress.

A pyramidal tree up to 150 feet high, short horizontal branches, slender drooping branchlets, and bright-green or bluish-green leaves. Native to the Himalayas at altitudes ranging from 5,000 to 9,000 feet.

112086. DOYALIS ABYSSINICA (A. Rich.)
Warb. Flacourtiaceae.

A bushy shrub, 3 to 10 feet high, with ovate, glabrous leaves, small white flowers, and yellow edible astringent berries about 1 inch in diameter, with a sweetish taste resembling that of persimmons. Native to Ethiopia.

112087. DURANTA REPENS L. Verbenaceae.
Skyflower.

A shrub up to 15 feet high, armed with stiff sharp thorns. Its pale-blue flowers, borne in clusters 3 or 4 inches long, are followed by golden berries less than an inch in diameter. Native to the West Indies.

For previous introduction see 52575.

112088. MELALEUCA ARMILLARIS (Soland.)
J. E. Smith. Myrtaceae.

A tall shrub with gracefully drooping branchlets, narrowly linear leaves less than an inch long, and cylindrical spikes, 2 inches long, of small white flowers. It is native to Australia.

For previous introduction see 90712.

112089. MILETTIA OBLATA Dunn. Fabaceae.

A tree about 90 feet high, with large, pale-green leaves and showy lavender flowers in fascicled racemes. Native to eastern tropical Africa.

112090. SPATHODEA NILOTICA Seem. Bigoniaceae.

A shrubby tree up to 20 feet high; native to the northern part of tropical Africa. The leaves, which are opposite, are composed of 9 to 15 leathery leaflets and are covered, beneath with dense short hairs, and the scarlet flowers, about 3 inches long, are in short terminal clusters. Both the leaves and flowers resemble those of *Spathodea campanulata*.

For previous introduction see 102617.

112081 to 112091—Continued.

112091. *SYNCARPIA GLOMULIFERA* (J. E. Smith) Niedenzu. Myrtaceae.

A tall slender evergreen tree, native to Australia, with broadly ovate leaves 2 to 3 inches long, appearing as if in whorls from two pairs being close together. The small white flowers are in globular clusters of 6 to 10 on short peduncles at the base of the new shoots. The wood is valuable for posts and for underground construction work.

For previous introduction see 90861.

112092 to 112099.

From Jamaica Plain, Mass. Seeds collected by Dr. Edgar Anderson on the Arnold Arboretum Balkan expedition and presented by the Arnold Arboretum. Received August 22, 1935.

Introduced for Department specialists.

112092. *EPHEDRA DISTACHYA* L. Gnetaceae.
Common jointfir.

No. 72. From the Danube delta, Rumania. A low-growing, rigid, tufted shrub, with erect green leafless branches and small red fruits. Native to Europe and Asia.

For previous introduction see 77619.

112093. *FRAXINUS HOLOTRICHA* Koehne. Oleaceae. Ash.

A small tree with leaves about 8 inches long, composed of 9 to 13 leaflets; of unknown origin.

For previous introduction see 109409.

112094. *HESPERIS* sp. Brassicaceae.

No. 152.

112095 and 112096. *LIGUSTRUM VULGARE* L. Oleaceae. European privet.

Collected on the edge of the steppe in situations where practically no other shrubs can survive.

112095. From Cluj, Rumania.

112096. From Fanata, Cluj, Rumania.

112097 to 112099. *SORBUS AUCUPARIA* L. Malaceae. European mountain-ash.

For previous introduction see 98156.

112097 and 112098. From Sofia, Bulgaria.

112099. No. 66-35. From Mount Vitasha, near Sofia, Bulgaria.

112100. *CEROXYLON ANDICOLA* Humb. and Bonpl. Phoenicaceae. Wax palm.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received August 22, 1935.

No. 7501-A. *Palma de cera*. From Los Olivos, Canton Tulcan, Provincia Carchi, July 11, 1935.

112101. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

From Brazil. Seeds presented by Mario Pereira Ramos, Sub-Assistente, Ministerio da Agricultura, Campo de Sementes de Fumo de S. Gonçalo dos Campos, Bahia.

Seeds from seedling plants, collected in the region of Bahia; introduced for Department specialists.

112102 to 112108. *SACCHARUM*. Poaceae. Sugarcane.

From Tabiti, Society Islands. Cuttings collected by E. W. Brandes, Bureau of Plant Industry. Received September 3, 1935.

Introduced for Department specialists.

112102. No. T-1. 112106. No. T-5.

112103. No. T-2. 112107. No. T-6.

112104. No. T-3. 112108. No. T-7.

112105. No. T-4.

112109 to 112112.

From India. Bulbs purchased from Mrs. P. Kohli, Baramulla, Kashmir. Received September 4, 1935.

Introduced for Department specialists.

112109. *COLCHICUM LUTEUM* Baker. Melanthiaceae.

A spring-blooming colchicum with few fleshy strap-shaped leaves about 9 inches long and one to three golden-yellow flowers over an inch across. Native to the temperate Himalayas from 4,000 to 7,000 feet altitude.

112110. *CROCUS SATIVUS* L. Iridaceae. Saffron.

Received as "cashmerianus," a geographic form.

For previous introduction see 47577.

112111. *LILIUM THOMSONIANUM* (D. Don) Lindl. Liliaceae. Thomson lily.

A lily of unusual appearance, suggesting in habit *Fritillaria*, *Ornithogalum*, and *Hosta*. The erect stem is over a foot high, and the narrow grasslike leaves are mostly crowded at the base of the stem. The pale-mauve or rosy bell-shaped drooping flowers with deep-purple anthers are over an inch long and in a terminal raceme containing 8 to 10 flowers. This lily is native to mild-wintered regions of the Himalayas from western China to northern India.

For previous introduction see 58490.

112112. *STERNBERGIA FISCHERIANA* (Herb.) Roem. Amaryllidaceae.

A spring-blooming *Sternbergia* with strap-shaped leaves about a foot long and one to four bright-yellow flowers, the segments over an inch long. Native to the Caucasus region.

112113 and 112114. *PISTACIA WEINMANIFOLIA* Poiss. Anacardiaceae.

From China. Seeds presented by Dr. J. F. Rock, Yunnanfu, Yunnan. Received September 4, 1935.

Introduced for Department specialists.

A handsome evergreen tree up to 60 feet high, with shining dark-green, pinnate leaves about 6 inches long and red fruits the size of peas. Native to southwestern China at altitudes of 3,000 to 5,000 feet.

112113. From Ta Ku district, Likiang, eastern slope of the northern end of the Likiang Snow Range, a hot dry place that in the summer gets plenty of rain.

112114. From the Yangtze Valley, a 3-day journey west of Likiang on the western slopes of the Likiang Snow Range.

112115. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Honduras. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received September 5, 1935.

Introduced for Department specialists.

Chichicaste. From Portillo Grande, Yorito, Departamento Yoro; June 1935 at 4,100 feet altitude.

112116. ULMUS PUMILA PILOSA Rehder. Ulmaceae. Chinese elm.

From China. Seeds presented by Dr. Albert N. Steward, College of Agriculture and Forestry, Nanking University, Nanking. Received April 28, 1934. Numbered in September 1935.

F. 110. From Chung Shen Park, Kwei Ling Kian. A variety of the Chinese elm with the young branchlets densely pilose and reddish brown and the leaves pubescent.

112117 to 112119.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received September 22, 1935.

Introduced for Department specialists.

112117. HARRISIA ERIOPHORA (Pfeiff.) Britton. Cactaceae.

A tall subcylindrical-stemmed cactus, native to Cuba. The large white flowers are nocturnal.

For previous introduction see 87512.

112118. KALANCHOE BLOSSFELDIANA Poellnitz. Crassulaceae.

Received from the Parks Department of Port Elizabeth, South Africa.

112119. STACHYTARPHETA INDICA (L.) Vahl. Verbenaceae.

Received from the Agri-Horticultural Society of Madras.

112120 to 112122.

From France. Seeds presented by R. Salgues, Directeur de Station Botanique de Brignoles. Received September 14, 1935.

Introduced for Department specialists.

112120. CALYCOTOME SPINOSA (L.) Link. Fabaceae.

A low spiny shrub, about 5 feet high, with trifoliate leaves, hairy beneath, and yellow flowers about three-fourths of an inch long. Native to the Mediterranean region.

For previous introduction see 101411.

112121. CENTAUREA CONIFERA L. Asteraceae.

A white-woolly perennial about 1 foot high, with large heads of purple or purplish-brown flowers. Native to southern Europe.

112122. DIANTHUS BALBISII Ser. Silenaceae.

A herbaceous perennial 2 feet or less in height, with flat straight linear-lanceolate leaves about 3 inches long and rosy or purple flowers in small heads. Native to southern Europe.

For previous introduction see 105016.

112123 to 112125. SACCHARUM. Poaceae. Sugarcane.

From the Cook Islands. Cuttings collected at Rarotonga Island by E. W. Brandes, Bureau of Plant Industry. Received September 16, 1935.

Introduced for Department specialists.

112123. No. T-1. **112125.** No. T-3.

112126 to 112194. NICOTIANA TABACUM L. Solanaceae. Tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 13, 1935.

Introduced for Department specialists.

112126 to 112128. Bonanza.

112126. No. 3438. Collected August 23, 1935, at Santiago Ixcuintla, Nayarit.

112127. No. 3443. Collected August 24, 1935, at El Nuevo, Nayarit.

112128. No. 3456. Collected August 31, 1935, at Santiago Ixcuintla, Nayarit.

112129. No. 3445. *Burley huero.* Collected August 24, 1935, at El Nuevo, Nayarit.

112130. No. 3447. *Burley negro.* Collected August 24, 1935, at El Nuevo, Nayarit.

112131. No. 3458. *Cash.* Collected August 31, 1935, at Santiago Ixcuintla, Nayarit.

112132 to 112165. Córdoba type tobacco, collected in August 1935. Furnished by El Aguila cigarette factory of Mexico City.

112132. No. 3457. From Santiago Ixcuintla, Nayarit.

Nos. 112133 to 112165 were collected in the State of Veracruz in August 1935.

112133. No. 3467. From Tecama.

112134. No. 3468. From Monte Blanco.

112135. No. 3469. *Mata de caña.* From San Juan de la Punta.

112136. No. 3470. From Hacienda La Capilla.

112137. No. 3471. From Tecamilla.

112138. No. 3472. From Tecama.

112139. No. 3473. From Cuautlapa.

112140. No. 3474. From Monte Blanco.

112141. No. 3475. From San Lorenzo.

112142. No. 3476. From Monte Blanco.

112143. No. 3477. From Coapichapa.

112144. No. 3478. From Hacienda Buenavista.

112145. No. 3479. From Cerro La Totola.

112146. No. 3480. From El Gallego.

112147. No. 3481. From Cerro La Totola.

112148. No. 3482. From Coapichapa.

112149. No. 3483. From Sumidero.

112150. No. 3484. From Cerro La Totola.

112151. No. 3485. From El Gallego.

112152. No. 3486. From Sumidero.

112153. No. 3487. From Lagunilla.

112126 to 112194—Continued.

112154. No. 3488. From Barrauca, San Miguel.
112155. No. 3489. From Tecamilla.
112156. No. 3490. From Sumidero.
112157. No. 3491. From Coapichapa.
112158. No. 3492. From La Cumbre, Escamela.
112159. No. 3493. From the Trapiche Mesa, San Juan de la Punta.
112160. No. 3494. From Dos Caminos, San Juan de la Punta.
112161. No. 3495. From San Juan de la Punta.
112162. No. 3496. From San Juan de la Punta.
112163. No. 3497. From San Juan de la Punta.
112164. No. 3498. From San Juan de la Punta.
112165. No. 3499. From San Juan de la Punta.
- 112166 and 112167. *Oriollo*, collected August 19, 1935, at La Piedad, Michoacan.
112166. No. 3433. 112167. No. 3435.
- 112168 to 112170. *Jamaica*. Collected in the State of Nayarit.
112168. No. 3441. From Santiago Ixcuintla, August 24, 1935.
112169. No. 3448. From El Nuevo, August 24, 1935.
112170. No. 3459. From Santiago Ixcuintla, August 31, 1935.
112171. No. 3466. *Negro aplador*. From San Antonio, Gutierrez-Zamora, Veracruz, August 29, 1935.
112172. No. 3444. *Orinoco*. Collected August 24, 1935, at El Nuevo, Nayarit.
112173. No. 3455. *Orinoco*. From Navolato, Sinaloa, August 30, 1935.
112174. No. 3439. *Orinoco blanco*. Collected August 23, 1935, at Santiago Ixcuintla, Nayarit.
112175. No. 3460. *Orinoco hoja ancha*. Collected August 31, 1935, at Santiago Ixcuintla, Nayarit.
112176. No. 3446. *Orinoco huero*. Collected August 24, 1935, at El Nuevo, Nayarit.
- 112177 and 112178. *Orinoco negro*. Collected August 23, 1935, at Santiago Ixcuintla, Nayarit.
112177. No. 3437. 112178. No. 3440.
112179. No. 3449. Cultivated at Tuxpan, Nayarit, August 26, 1935. A mixed sample containing *Orinoco negro*, *Vallejano*, *Cubano*, and perhaps others.
112180. No. 3462. *San Andres Tuxtla*. Collected August 29, 1935, at Los Tuxtlas, Veracruz.
112181. No. 3500. *Tabaco mulato*. Collected August 20, 1935, at San Juan de La Punta, Veracruz.
112182. No. 3436. *Tabaco corriente*. From Guadalajara, Jalisco, August 20, 1935.
112183. No. 3454. *Vallejano*. From Puerto Vallarta, Jalisco, August 30, 1935.

112126 to 112194—Continued.

- 112184 to 112186. *Vena amarilla*. Collected August 29, 1935, in the State of Veracruz.
112184. No. 3463. From Gutierrez-Zamora.
112185. No. 3464. From Joloapan.
112186. No. 3465. From Puerto Rico.
- 112187 to 112189. *Virginia*.
112187. No. 3442. Collected August 24, 1935, at Santiago Ixcuintla, Nayarit.
112188. No. 3450. Collected August 27, 1935, at Acaponeta, Nayarit.
112189. No. 3461. Collected August 31, 1935, at Cuicatlan, Oaxaca.
112190. No. 3451. Collected August 27, 1935, at Tecuala, Nayarit.
112191. No. 3432. A commercially cultivated variety, collected August 17, 1935, at Morelia, Michoacan.
112192. No. 3434. A volunteer plant from La Piedad, Michoacan, August 19, 1935.
- 112193 and 112194. Mixed samples of locally grown seed from Tecuala, Nayarit, August 27, 1935.
112193. No. 3452. 112194. No. 3453.
- 112195 and 112196. *EUPHORBIA INTISY* Drake. Euphorbiaceae.
- From Madagascar. Plants presented by Miss Bargyla Rateaver, Fort Dauphin. Received September 18, 1935.
- Introduced for Department specialists.
- An arborescent succulent about 12 feet high, native to southern Madagascar. It has gray bark, dichotomous or somewhat whorled branches, and minute scattered leaves. The small and inconspicuous greenish flowers are in very short cymes near the tips of the branches.
- For previous introduction see 99378.
- 112197 to 112199. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.
- From Italy. Seeds presented by Dr. E. Pantanelli, Director, Stazione Agraria Sperimentale, Bari. Received September 13, 1935.
- Introduced for Department specialists.
112197. *Bengasina*.
112198. *Emiliana C. R.*
112199. *Mohisana*.
- 112200 to 112209. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.
- From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 17, 1935.
- Introduced for Department specialists.
112200. No. 3502. Cordoba type. Collected September 5, 1935, on the Hacienda Zonquimixtla, Teziutlan, Puebla.
- 112201 to 112203. Collected September 9, 1935, at Ojitlan, Oaxaca.
112201. No. 3509. *Oriollo*.
112202. No. 3508. *Habanero blanco*.
112203. No. 3510. *Habanero legitimo*.

112200 to 112209—Continued.

112204. No. 3504. *Valle nacional*. Collected August 31, 1935, at Tuxtepec, Oaxaca.
112205. No. 3501. *Vena amarilla*. From Martinez de La Torre, Veracruz, September 5, 1935.
112206. No. 3507. From Escamela, Veracruz, September 9, 1935.
112207. No. 3505. *Tlapacoyan*. From Martinez de La Torre, Veracruz, September 9, 1935.
112208. No. 3506. From Merida, Yucatan, September 9, 1935.
112209. No. 3503. From San Andres, Veracruz, September 9, 1935.

112210 to 112219.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received August 22, 1935.

Introduced for Department specialists.

112210. *ANAGALLIS ARVENSIENSIS CAERULEA* (Schreb.) Ledeb. Primulaceae.

No. 7397-A. From Ibarra Canton, Provincia Imbabura, June 30, 1935.

112211. *BOMAREA* sp. Amaryllidaceae.

No. 7431-A.

112212. *LADENBERGIA MACROCARPA* (Vahl) Klotzsch. Rubiaceae.

No. 7459-A. *Cascarilla amarilla*. July 11, 1935. From Los Olivos, Canton Tulcan, Provincia Carchi. A small tree related to the cinchonas, with leathery, oblong-elliptic leaves about 2 inches long and terminal panicles of small fragrant white flowers. Native to Colombia.

112213 and 112214. *LAPLACEA INTERMEDIA* Benth. Theaceae.

Roja. An evergreen shrub, allied to *Gordonia*, with obovate-elliptic leaves and white flowers about 1 inch across. Native to Ecuador.

112213. No. 7460.

112214. No. 7460-A.

112215. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 7404-A. July 1, 1935. Near Salinas, Canton Ibarra, Provincia Imbabura, at 5,000 feet altitude. A wild tomato with small crimson fruits, the size of marbles, borne in clusters like grapes.

112216. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 7406-A. June 30, 1935. Ibarra, Canton Ibarra, Provincia Imbabura, at about 7,000 feet altitude. Locally grown alfalfa presented by José Felix Tamayo.

112217. *PASSIFLORA* sp. Passifloraceae.

No. 7405-A. *Taco*. June 28, 1935. Hacienda La Victoria, Canton Ibarra, Provincia Imbabura, at about 7,000 feet altitude. A granadilla with rose-pink flowers followed by oval yellow fruits.

112218. *URCEOLINA* sp. Amaryllidaceae.

No. 7450-A. Northeast of Angel, Canton Angel, Provincia Carchi, at about 7,000 feet altitude. An erect plant with orange flowers found growing among grass on the bank of a stream.

112210 to 112219—Continued.

112219. *OPUNTIA* sp. Cactaceae. No. 7380-A.

112220 and 112221. *SACCHARUM*. Poaceae. Sugarcane.

From South Africa. Cuttings presented by H. H. Dodds, South African Sugar Association, Mount Edgecombe, Received September 20, 1935.

Introduced for Department specialists.

112220. *Striped Uba*.

112221. *Striped Co. 281*.

112222. *ILEX* sp. Aquifoliaceae. Holly.

From China. Seeds presented by Dr. Albert N. Steward, College of Agriculture and Forestry, Nanking University, Nanking. Received April 28, 1934. Numbered in September 1935.

Introduced for Department specialists.

No. F. 47. From Ta Tseh Tsuen, Yung Hsien.

112223. *CLEMATIS BOJERI* Hook. Ranunculaceae.

From Madagascar. Plant presented by Miss Bargyla Rateaver, Fort Dauphin. Received September 18, 1935.

Introduced for Department specialists.

An erect herbaceous clematis with pinnate leaves or the upper ones ternate and large terminal creamy-white flowers, marked with violet red. Native to Madagascar.

112224. *CARYOCAR NUCIFERUM* L. Caryocaraceae. Sawarri nut.

From South America. Seeds presented by Dr. J. Stahel, Landbouw-Proefstation, Paramaribo, Surinam. Received September 16, 1935.

Introduced for Department specialists.

From the Nickerie district, Paramaribo. A lofty tree, eventually 100 feet high, with trifoliate leaves and large purple flowers with very numerous white stamens. The large fruit, several inches in diameter, contains two to four flat kidney-shaped nuts with edible white almondlike meat. Native to British Guiana.

For previous introduction see 106370.

112225. *NEOMAMMILLARIA* sp. Cactaceae.

From Mexico. Plants collected by Dr. Donald Reddick, Cornell University, and Max Souviron, Bureau of Plant Industry. Received November 19, 1930. Numbered in September 1935.

Collected southeast of Real del Monte. A globular cactus, about 2 inches in diameter, with three or four stout pale-brown central spines and about 20 bristly white radial spines from each areola.

112226 to 112231. *NICOTIANA* spp. Solanaceae. Tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 25, 1935.

Introduced for Department specialists.

112226 to 112231—Continued.

112225 to 112229. *NICOTIANA TABACUM* L.

Collected September 12 and 13, 1935, at Oaxaca, Oaxaca.

112226. No. 3511. A volunteer plant with white flowers.

112227. No. 3512. A volunteer plant 8 feet high with pink flowers.

112228. No. 3513. *Tabaquillo*. A wild tobacco used to make cigarettes, but of poor quality.112229. No. 3514. *Tabaquillo*. A volunteer plant 8 feet high; a common tobacco of this region; grows in gardens, waste places, or even on house-tops.112230. *NICOTIANA* sp.

No. 3515. September 12, 1935. Oaxaca, Oaxaca. Plants 6 to 8 inches high, growing in the streets of the city.

112231. *NICOTIANA* sp.No. 3516. *Tabaco monteís*. Mitla, Oaxaca, September 13, 1935. Plants 12 to 18 inches high, common in this section especially on Mitla ruins.112232. *PHLEUM PRATENSE* L. Poaceae.
Timothy.

From Sweden. Seeds presented by Dr. G. Nilsson Leissner, Allmänna Svenska Ut-sädesaktiebolaget, Svalöf. Received September 23, 1935.

Introduced for Department specialists.

Svalöf No. 968.112233. *CAPSICUM ANNUM* L. Solanaceae.
Common redpepper.

From Spain. Seeds purchased through Samuel R. Thompson, American consul, Valencia. Received September 23, 1935.

Introduced for Department specialists.

A large sweet Spanish pepper.

112234 to 112243. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 26, 1935.

Introduced for Department specialists.

112234 and 112235. Collected August 29, 1935, at El Verde, Sinaloa.

112234. No. 3520. 112235. No. 3524.

112236. No. 3523. *Bonanza*. Collected August 14, 1935, at Santiago Ixcuintla, Nayarit.112237. No. 3521. *Cash*. Collected August 14, 1935, at Santiago Ixcuintla, Nayarit.112238. No. 3526. *Orinoco*. Collected August 30, 1935, at Acaponeta, Nayarit.112239. No. 3522. *Orinoco blanco*. Collected August 14, 1935, at Santiago Ixcuintla, Nayarit.112240. No. 3528. *Orinoco claro*. Collected September 7, 1935, at Puerto Vallarta, Jalisco.112241. No. 3525. *Orinoco negro*. Collected August 30, 1935, at Acaponeta, Nayarit.

112234 to 112243—Continued.

112242. No. 3529. *Orinoco oscuro*. Collected September 7, 1935, at Puerto Vallarta, Jalisco.112243. No. 3527. *Virginia*. Collected August 30, 1935, at Acaponeta, Nayarit.112244. *HEVEA BRASILIENSIS* (H. B. K.) Muell. Arg. Euphorbiaceae.

Para rubber tree.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received September 25, 1935.

Introduced for Department specialists.

112245. *PACHYRHIZUS EROSUS* (L.) Urban. Fabaceae. Yam bean.

From Mexico. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received September 25, 1935.

Introduced for Department specialists.

No. 3519. *Jicamo*. From the market at Oaxaca de Juarez, Oaxaca, September 12, 1935.

For previous introduction see 22971.

112246. *TERMINALIA OKARI* C. T. White. Combretaceae. Okari nut.

From the Society Islands. Seeds presented by Harrison W. Smith, Papeari, Tahiti. Received September 23, 1935.

Introduced for Department specialists.

Collected in Sangara, Territory of Papua, Australia. A tall evergreen tree, native to New Guinea, with large reddish purple edible nuts that are said to be excellent, either raw or cooked.

112247 and 112248.

From Cuba. Seeds presented by F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos. Received September 7, 1935.

Introduced for Department specialists.

112247. *CEREUS HEXAGONUS* (L.) Mill. Cactaceae.

A tall columnar cactus up to 45 feet high, branching at the base, the joints usually six-angled. The flowers are 8 to 10 inches long, with the outer segments purple and the inner ones white. The ovoid edible fruits, 3 to 6 inches long, have white or pinkish pulp. It is native to the West Indies and the northern part of South America.

For previous introduction see 101491.

112248. *VERNONIA* sp. Asteraceae.

From the Horticultural Section, Giza, Egypt.

112249. *SESAMUM RADIATUM* Schum. Pedaliaceae.

From Africa. Seeds presented by the Director, Jardin Botanique D'Éala, Coquilhatville, Belgian Congo. Received September 20, 1935.

An erect oil-producing species, closely related to the sesame of commerce; introduced for Department specialists.

For previous introduction see 100991.

112250. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

From Brazil. Seeds presented by the Director, Instituto de Biologia Vegetal, Jardim Botânico, Rio de Janeiro. Received September 27, 1935.

Amendoim; introduced for Department specialists.

112251. PHLEUM PRATENSE L. Poaceae. Timothy.

From Wales. Seeds purchased from the Welsh Plant Breeding Station, Aberystwyth. Received September 28, 1935.

S. 50, Extreme pasture strain; introduced for Department specialists.

112252 to 112257. CAMPANULA CARPATICA Jacq. Campanulaceae. Carpathian bellflower.

From England. Plants purchased from Prichard & Sons, Christ Church, Hants. Received September 30, 1935.

Introduced for Department specialists.

112252. *Elegant.*

112253. *Harmony.*

112254. *Harvest Moon.*

112255. *Princess.*

112256. *Viscountess Byng.*

112257. *White Star.*

112258 to 112262. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

From Uruguay, South America. Seeds presented by the Director of the Jardin Botânico, Montevideo. Received September 28, 1935.

A collection of native varieties introduced for Department specialists.

112258. *Bunch.*

112259. *Jumbo.*

112260. From the Departamento de Rivera.

112261. From Brazil.

112262. *Valencia.*

112263. FEROCACTUS COVILLEI Britt. and Rose. Cactaceae.

From Arizona. Seeds presented by F. J. Crider, Boyce Thompson Arboretum, Superior. Received April 9, 1932. Numbered in September 1935.

Introduced for Department specialists.

A globular or short-cylindric cactus about 5 feet high, with 20 to 30 thin high ribs and stout straight or hooked annulate spines 2 to 3 inches long, varying from red to white. The flowers, about 3 inches long, vary in color from yellow to crimson. Native to the southwestern United States and northern Mexico.

112264 and 112265.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 25, 1935.

Introduced for Department specialists.

112264 and 112265—Continued.

112264. DAHLIA COCCINEA Cav. Asteraceae.

No. 3517. A wild dahlia, collected September 12, 1935, at Monte Albán, Oaxaca. A species with small single orange flowers.

112265. ZINNIA sp. Asteraceae.

No. 3518. A wild zinnia, collected September 12, 1935, at Monte Albán, Oaxaca.

112266. CALAMUS ORNATUS Blume. Phoenicaceae. Rattan.

From the Philippine Islands. Seeds presented by Arthur Fischer, Director of Forestry, Manila. Received September 26, 1935.

Introduced for Department specialists.

112267 to 112292.

From Manchuria. Seeds collected by the Asiatic Expedition. Received September 30, 1935.

Introduced for Department specialists.

112267 and 112268. ACONITUM KUSNEZOFFII Reichenb. Ranunculaceae. Monkshood.

An erect hardy herbaceous perennial, native to northeastern Asia, with terminal clusters of bluish flowers.

For previous introduction see 110479.

112267. No. 13. IV. From Barim, September 27, 1934.

112268. No. 14. IV. From Barim, September 30, 1934.

112269. ALLIUM SENESCENS L. Liliaceae. No. 7. IV. From Barim.

112270. ASTRAGALUS sp. Fabaceae.

No. 17. IV. September 4, 1934. Collected along the road from Hailar to Ganjour Monastery, Barga District.

112271 and 112272. CIMICIFUGA DAHURICA (Turcz.) Huth. Ranunculaceae.

From Barim. A tall hardy perennial with large decomposed leaves and paniculate racemes of small white flowers. Native to central Asia.

112271. No. 11. IV. September 28, 1934.

112272. No. 12. IV. October 1, 1934.

112273. CLEMATIS GLAUCA ANGUSTIFOLIA Ledeb. Ranunculaceae.

No. 10. IV. Barim, September 28, 1934. A slender woody climber with the leaflets three-parted into narrowly linear-lanceolate segments. The nodding, bell-shaped yellow flowers, 1 to 2 inches across, are borne in few-flowered, axillary cymes. Native to Mongolia.

For previous introduction see 92773.

112274. CONVALLARIA MAJALIS L. Convallariaceae. Lily-of-the-valley.

No. 2. IV. From Barim, October 2, 1934.

112275. CORYLUS HETEROPHYLLA Fisch. Betulaceae. Hazelnut.

No. 9. IV. From Barim, September 30, 1934. A hardy shrubby hazel up to 12 feet high, with nuts about one-fourth of an inch long. Native to northeastern Asia.

For previous introduction see 69884.

112267 to 112292—Continued.

112276. *EPHEDRA* sp. Gnetaceae.

No. 1. IV. August 8, 1934. From sand dunes, vicinity of Khankai-nur, Barga District.

112277. *HYPERICUM ASCYRON* L. Hypericaceae. St. Johnswort.

No. 20. IV. October 1, 1934. From the shore of the Yal River near Barim.

112278. *IRIS DICHOTOMA* Pall. Iridaceae. Vesper iris.

No. 8. IV. Near Barim, October 28, 1934. An iris with flower stems up to 2 feet tall and fugitive flowers which vary from white to lavender, produced freely in late summer.

For previous introduction see 90154.

112279 and 112280. *LILIUM CONCOLOR* Salisb. Liliaceae. Morningstar lily.

Collected near Barim.

For previous introduction see 69020.

112279. No. 5. IV. October 2, 1934.

112280. No. 6. IV. September 30, 1934.

112281. *LINUM PERENNE* L. Linaceae. Perennial flax.

No. 18. IV. Near Barim, September 29, 1934.

112282. *PARNASSIA PALUSTRIS* L. Saxifragaceae. Grass-of-Parnassus.

No. 15. IV. October 1, 1934, in the vicinity of Harbin.

112283. *PEDICULARIS* sp. Scrophulariaceae.

No. 22. IV. Near Barim, October 2, 1934.

112284. *PRUNUS PADUS* L. Amygdalaceae. European bird-cherry.

No. 16. IV. September 13, 1934. From the valley of the Bain-gol River along the road from Hailar to Khandagai.

112285. *RHAMNUS DAVURICA* Pall. Rhamnaceae. Dahurian buckthorn.

No. 19. IV. From Khandagai, Barga District, September 10, 1934. A large spreading shrub or small tree up to 20 feet high, with oblong leaves 2 to 4 inches long, greenish flowers, and black berries less than half an inch in diameter. Native to northeastern Asia.

For previous introduction see 69889.

112286. *SWERTIA DILUTA* (Turcz.) Benth. and Hook. f. Gentianaceae.

No. 21. IV. Near Barium, September 29, 1934. A low herbaceous perennial about a foot high, with lanceolate leaves and small pale-blue flowers in a dense fastigiate umbel. Native to eastern Asia.

112287 and 112288. *TARAXACUM* spp. Cichoriaceae.

Collected September 28 and 29, 1934, near Barim.

112287. No. 24. IV.

112288. No. 25. IV.

112289 and 112290. *VERATRUM NIGRUM* L. Melanthiaceae. False-hellebore.

112267 to 112292—Continued.

A hardy herbaceous perennial up to 3 feet high, with broad leaves about 1 foot long and small blackish-purple flowers in terminal panicles. Native to Europe and Asia.

112289. No. 3. IV. September 28, 1934, near Barim.

112290. No. 4. IV. September 30, 1934, near Barim.

112291. *VIBURNUM SARGENTI* Koehne. Caprifoliaceae. Sargent cranberrybush.

No. 23. IV. September 29, 1934. In the vicinity of Barim. A strong-growing shrub 12 to 15 feet high, somewhat resembling *Viburnum opulus*, with broadly ovate, three-lobed leaves and heavy clusters of attractive bright-red fruits.

For previous introduction see 101909.

112292. (Undetermined.)

No. 26. IV. Near Barim, October 1, 1934.

112293. *NIEREMBERGIA GRACILIS* Hook. Solanaceae.

From Egypt. Seeds presented by the Horticultural Section, Giza, through F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, Cuba. Received September 7, 1935.

Introduced for Department specialists.

A tufted perennial with slender ascending stems about 6 inches high, small narrow linear leaves, and showy light-lavender flowers, darker near the center and yellow in the throat, about 1 inch across. Native to Argentina.

112294. *LITCHI CHINENSIS* Sonner. Sapindaceae. Lychee.

From China. Plants presented by Col. Clyde S. Ford, United States Postal Agency, Shanghai. Received July 24, 1923. Numbered in September 1935.

Introduced for Department specialists.

No. 10.

For previous introduction see 111949.

112295 to 112304.

From Colombia and Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received September 18, 1935.

Introduced for Department specialists.

112295 to 112297. *BOMAREA* spp. Amaryllidaceae.112295. *BOMAREA* sp.

No. 7551-A. Near the village of Toño, on the north flank of the Volcan de Chiles, Departamento Nariño, Colombia, July 29, 1935, at 11,000 feet altitude. A vine found growing in hedgerows; flowers not seen.

112296. *BOMAREA* sp.

No. 7637-A. *Peca*. Along the road from Pun to Tulcan, Canton Tulcan, Provincia Carchi, Ecuador, August 15, 1935, at 9,800 feet altitude. A twining plant with crimson flowers, the inner segments shading to orange with no becks.

112295 to 112304—Continued.

112297. BOMAREA sp.

No. 7553—A. *Peca*. From Santa Rosa, Canton Espejo, Provincia Carchi, Ecuador, July 29, 1935, at 6,000 feet altitude. A twining plant growing over shrubs. The flowers are orange to yellow on the outside and pale yellow inside.

112298. CHAMAEDOREA sp. Phoenicaceae.

No. 7556—A. *Moquillan*. Along the trail from Mayasquer to Santa Rosa beside the Rio Chilma Canton Espejo, Provincia Carchi, Ecuador, July 29, 1935, at 6,500 feet altitude. A small palm about 10 feet high found growing in the undergrowth of dense forest on the mountain-side.

112299. LADENBERGIA MACROCARPA (Vahl) Klotzsch. Rubiaceae.

No. 7575—A. *Cascarilla cimarruna*. Along the trail from Mayasquer to Cascarilla to Tambo, Distrito Nariño, Colombia, in a forest at 10,000 feet altitude, August 12, 1935.

For previous introduction and description see 112212.

112300. DATURA ROSEI Safford. Solanaceae.

No. 7438—A. South of Angel, Canton Angel, Provincia Carchi, Ecuador, July 6, 1935. *Guanto*. A small tree or shrub found in hedgerows between fields. The flowers are dark red with green veins; commonly cultivated as an ornamental by the Indians of the highlands of Ecuador.

For previous introduction see 58362.

112295 to 112304—Continued.

112301. FUCHSIA UMBROSA Benth. Onagraceae.

No. 7561—A. Collected July 31, 1935, at Santa Rosa, Provincia Carchi, Ecuador.

112302. LAPLACEA INTERMEDIA Benth. Theaceae.

No. 7460—A. *Cascarilla rosa*. From Los Olivos, Canton Tulcan, Provincia Carchi, Ecuador, July 11, 1935.

For previous introduction and description see 112214.

112303. PHASEOLUS LUNATUS L. Fabaceae. Lima bean.

No. 7425—A. *Frejol torta*. From Hacienda La Victoria, Canton Barya, Provincia Imbabura, Ecuador, July 3, 1935. A vine with white flowers and spotted seeds, collected at 7,000 feet altitude.

112304. URCEOLINA sp. Amaryllidaceae.

No. 7450—A. From Ecuador. (Received without further notes.)

112305 and 112306.

From Africa. Seeds presented by R. Anderson, Yapata Estate, Kitale, Kenya Colony. Received September 23, 1935.

Introduced for Department specialists.

112305. ASCLEPIAS sp. Asclepiadaceae.

112306. GALACTIA sp. Fabaceae.

A vine with yellow flowers.

INDEX OF COMMON AND SCIENTIFIC NAMES

- Aconitum kusnezoffii*, 112267, 112268.
Actinidia chinensis, 112053.
Aeria attenuata, 111878.
Agrostis tenuis, 111985, 111986.
 Alfalfa. See *Medicago sativa*.

Introductory statement-----	1
Inventory-----	3
Index of common and scientific names-----	33

INTRODUCTORY STATEMENT

This inventory, No. 125, is a record of plant material received by the Division of Plant Exploration and Introduction from October 1 to December 31, 1935 (Nos. 112307 to 113512).

Particular mention should be made of the introduction from Oceania of 143 lots of sugarcane cuttings (Nos. 112861 to 113003). These were collected by E. W. Brandes, Bureau of Plant Industry, and represent distinct native strains developed in New Caledonia, New Hebrides, and other Pacific islands. This introduction is a continuation of a worldwide search for mosaic-resistant varieties that already has made possible the development of superior commercial varieties for Louisiana and western Puerto Rico, and in the past few years it has increased sugar production for those areas from 46,000 tons to about 500,000 tons per year.

A closely related project is one concerned with the genetics of the sugar beet. Additional source material for this project is recorded in the introduction through G. H. Coons, of the Bureau of Plant Industry, of 193 lots of beet varieties (*Beta* spp.; Nos. 112398 to 112590) from Portugal, Germany, and other parts of continental Europe, and from the Canary and Madeira Islands.

Several lots of seeds of cultivated tobacco were received from Colombia, where Raymond Stadelman of the Bureau of Plant Industry was engaged in collecting as many as possible of the local strains grown in the more isolated parts of that country. At the same time W. A. Archer, mentioned in the preceding inventory, continued to send in seed of tobacco varieties from Mexico. These introductions are intended, as has already been pointed out in Inventory No. 124, for the use of Department pathologists seeking to develop disease-resistant tobacco varieties for the United States.

Rice growers will note with interest the recording of a special collection of Korean varieties (Nos. 113418 to 113435), presented by the Laboratory of Plant Pathology at Fukuoka, Japan.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,

Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., April 13, 1939.

INVENTORY¹

112307 to 112316. NICOTIANA TABACUM
L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received October 17, 1935.

Introduced for Department specialists.

112307, No. 2. *Garcia*. September 18, 1935. From a small farm at Boquerón, on the highway south of Piedecuesta, at about 5,000 feet altitude.

112308, No. 3. Mixed varieties from the Villamizar plantations, Chaparro.

112309, No. 4. *Chocoa*. From the Villamizar plantations near Bimanga.

112310, No. 5. From the Villamizar plantations near Bimanga. A variety with a lighter leaf.

112311, No. 6. Mixed varieties from the plantation La Joya de Gustavo Ordoñez C., near Bucaramanga.

112312, No. 7. September 25, 1935. Collected from a single plant on the plantation La Joya, near Bucaramanga.

112313, No. 8. September 28, 1935. From Girón, Departamento Santander. Variety *Garcia*, presented by Jose Maria Marques.

112314, No. 9. September 28, 1935. American seed, presented by Carlos Uribe, Llano Grande, near Girón.

112315, No. 10. *Cubano*. Presented by Nicolas Gonzales, Girón.

112316, No. 11. *Chocoa*. September 29, 1935. From Carlos Uribe, Girón.

112317. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From England. Seeds presented by Prof. F. L. Engledow, National Institute of Agricultural Botany, Cambridge. Received October 10, 1935.

Introduced for Department specialists.

Holdfast, a new wheat developed by Professor Engledow.

112318 and 112319. ARACHIS HYPOGAEA
L. Fabaceae. Peanut.

From Brazil. Seeds presented by Ministerio da Agricultura, Estação Experimental de Cana de Assucar, Campos, Rio de Janeiro. Received October 11, 1935.

Introduced for Department specialists.

112318. *Amendoim Commum*.

112319. *Amendoim Francez*.

112320 to 112331. NICOTIANA TABACUM
L. Solanaceae. Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 15, 1935.

Introduced for Department specialists.

112320, No. 3531. Collected September 20, 1935, at Xaltiangius, Guerrero.

112321, No. 3534. *Tobaco cimarrón*. A volunteer plant collected September 23, 1935, at Santa Maria, Moreles.

112322, No. 3542. Collected September 25, 1935, from a volunteer plant in the garden of the Colegio de las Vizcainas, Distrito Federal.

Nos. 112323 to 112326 were collected in the State of Guanajuato.

112323, No. 3543. Collected September 30, 1935, at León.

112324, No. 3544. *Lenguillo*. Collected September 20, 1935, at León.

112325, No. 3545. A mixed sample of *Chino*, *Negro*, *Virginia*, and *Lenguillo*. Collected September 30, 1935, at León.

112326, No. 3546. A mixed sample, collected October 1, 1935, at San Francisco de Rincon.

Nos. 112327 to 112330 were collected in the State of Jalisco.

112327, No. 3548. *Lenguillo*. Collected October 2, 1935, at San Juan de Los Lagos.

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identification, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

112320 to 112331—Continued.

112328. No. 3549. *Cuerna de cabra*. Collected October 3, 1935, at Encarnación.

112329. No. 3550. *Penia de maguey*. Collected October 2, 1935, at Encarnación.

112330. No. 3551. *Hoja ancha*. Collected October 3, 1935, at Encarnación.

112331. No. 3555. *Cuerna de borrego*. Collected October 5, 1935, at Fabellón. Aguascalientes.

112332 to 112335. *CHENOPODIUM* spp. Chenopodiaceae.

From Bolivia. Seeds presented by John J. Muccio, American consul, La Paz. Received October 9, 1935.

Introduced for Department specialists.

112332. *CHENOPODIUM HASTATUM* Phil.

A species grown only at very high altitudes. Both the plant and the seeds are much smaller than those of *Chenopodium quinoa*, and it is not grown as extensively.

For previous introduction see 41335.

112333 to 112335. *CHENOPODIUM QUINOA* Willd. Quinoa.

112333. *Quinoa dulce, blanca*.

112334. *Quinoa corriente*.

112335. *Quinoa real*.

112336. *TRIFOLIUM* sp. Fabaceae.

From England. Seeds presented by H. Gilbert-Carter, Director, Botanic Garden, Cambridge. Received October 1, 1935.

Introduced for Department specialists.

112337. *PENNISETUM OCCIDENTALE* Chase. Poaceae. Grass.

From Ecuador. Seeds presented by Ing. Nelson Márquez, Director, Milagro Model Farm, Guayaquil. Received October 9, 1935.

Introduced for Department specialists.

A tall perennial grass growing in large clumps in low ground. Native to Ecuador.

112338. *DERRIS PTEROCARPUS* (DC.) Kilip. Fabaceae.

From British Guiana. Root cuttings collected by W. A. Archer, Bureau of Plant Industry. Received November 11, 1934. Numbered in October 1935.

No. 2594. Collected in the Botanical Gardens, Georgetown, September 27, 1934. A climbing shrub, native to French Guiana, with trifoliolate leaves and racemes of rather large white flowers.

For previous introduction see 108577.

112339 to 112343. *SACCHARUM* spp. Poaceae.

From the Fiji Islands. Cuttings presented by the Nausori Mill, through Julius Matz, Bureau of Plant Industry. Received October 15, 1935.

112339 and 112340. *SACCHARUM* spp.

Received under the name "robustum," a name not properly published.

112339. *Nausori Native Cane* A.

112340. *Nausori Native Cane* B.

112339 to 112343—Continued.

112341 and 112342. *SACCHARUM OFFICINARUM* L. Sugarcane.

112341. 28 N. G. 11.

112342. 28 N. G. 223.

112343. *SACCHARUM SPONTANEUM* L.

Rarawai Native Cane C.

112344 and 112345. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From England. Seeds presented by Gartons Ltd., Warrington. Received October 7, 1935.

Introduced for Department specialists.

112344. *Little Tich*. A distinct new short-strawed wheat.

112345. *Redman* wheat.

112346. *TEPHROSIA VOGELII* Hook. f. Fabaceae.

From Africa. Seeds presented by the Lieutenant Governor, Ivory Coast, through the Division of Insecticide Investigations, Bureau of Entomology and Plant Quarantine. Received July 20, 1933. Numbered in October 1935.

Introduced for Department specialists.

I. D. (Insecticide Division) No. 1776. A shrubby legume native to tropical Africa.

For previous introduction see 111348.

112347 to 112349. *BESSERA ELEGANS* Schult. f. Liliaceae. Coraldrops.

From Mexico. Bulbs presented by Prof. Guillermo Gándara, Universidad Nacional de Mexico, Mexico City, through Dr. Jose Figueroa, El Director del Instituto Biotecnico, D. F. Received October 2, 1935.

A bulbous squill-like plant with two to three narrow linear leaves about 18 inches long and equally long scapes having umbels of 4 to 20 vermilion flowers 1 inch long. Native to Mexico.

112350 to 112353. *ZEPHYRANTHES* spp. Amaryllidaceae. Zephyrily.

From Bermuda. Bulbs presented by John Bushell, through T. A. Russell, Acting Director of Agriculture, Paget East. Received October 3, 1935.

Introduced for Department specialists.

112350. *ZEPHYRANTHES CANDIDA* (Lindl.) Herb. Autumn zephyrily.

A subtropical, white-flowered species with linear leaves a foot long, appearing with the flowers; the flowers, about 2 inches long, are often rose tinted on the outside. Native to Argentina.

For previous introduction see 109910.

112351. *ZEPHYRANTHES CARINATA* Herb.

A bulbous perennial with linear leaves and a scape about a foot high, bearing a single rosy flower 3 to 5 inches across and 3 inches long. It is said to be the largest and choicest of the rosy-flowered zephyrilies and blooms in the summer. Native to the West Indies.

For previous introduction see 107145.

112350 to 112353—Continued.

112352. ZEPHYRANTHES ROSEA Lindl.

A tender autumn-blooming species, native to Cuba, with linear, bright-green leaves and rose-colored flowers an inch long, on a peduncle 4 to 6 inches long.

For previous introduction see 109912.

112353. ZEPHYRANTHES TEXANA Herb.

Aurea. A variety with bright-yellow flowers.

112354 to 112359. NICOTIANA spp. Solanaceae. Tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 4, 1935.

Introduced for Department specialists.

112354. NICOTIANA GLAUCA R. Grah. Tree tobacco.

No. 3535. Collected near Taxco, Morelos, September 23, 1935. The plants are from 6 to 20 feet high, with yellow flowers; grows commonly throughout Mexico.

112355 to 112359. NICOTIANA TABACUM L. Common tobacco.

112355. No. 3530. *Virginia*. Puente de Ixtla, Morelos, September 19, 1935.

112356. No. 3532. From Los Organos, Guerrero, September 22, 1935.

112357. No. 3533. From Kilometro Cuarenta, Guerrero, September 23, 1935.

112358 and 112359. Seed grown by Captain McClellan at Hacienda de Ixtapa, Puerto Vallarta, Jalisco, and presented September 20, 1935, through G. H. Winters, American consul at Guadalajara.

112358. No. 3536. *Orejón palmeño*.112359. No. 3537. *Virginia*.

112360 and 112361. LITCHI CHINENSIS Sonner. Sapindaceae. Lychee.

From China. Plants presented by Col. Clyde S. Ford, United States Postal Agency, Shanghai. Received July 24, 1923. Numbered in October 1935.

Introduced for Department specialists.

112360. No. 7.

112361. No. 8.

112362. SACCHARUM OFFICINARUM L. Poaceae. Sugarcane.

From New York, N. Y. Cuttings received through the Bureau of Entomology and Plant Quarantine, October 5, 1935.

112363 to 112367. BETA spp. Chenopodiaceae.

From France. Roots collected by G. H. Coons, Division of Sugar Plants, Bureau of Plant Industry. Received October 7, 1935.

Introduced for Department specialists.

112363 to 112366. BETA VULGARIS L. Common beet.

112363. Variety *Atriplicifolia*. Originally from La Hoya, near Lorca, Spain, grown for 3 months in the Museum of Paris Botanical Garden, Paris.

112363 to 112367—Continued.

112364. From Vanville, Normandie.

112365. From Ciotat, near Cherbourg, Normandie.

112366. From Landmere, near Cherbourg, Normandie.

112367. BETA TRIGYNA Waldst. and Kit.

From the Museum of Paris Botanical Garden, Paris.

112368. SOLANUM TUBEROSUM L. Solanaceae. Potato.

From Australia. Tubers presented by Richard P. N. Short, Department of Agriculture and Stock, Brisbane, Queensland. Received October 8, 1935.

Snowflake potatoes, grown by Bull Bros., Musk Creek, Victoria; introduced for Department specialists.

112369. BESSERA ELEGANS Schult. f. Liliaceae. Coraldrops.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 4, 1935.

No. 3541. September 19, 1935. Collected in rocky soil on bluffs near Dos Caminos, Guerrero.

For previous introduction and description see 112349.

112370 and 112371.

From Mexico. Seeds presented by F. W. Smith, Guasave, Sinaloa. Received October 7, 1935.

Introduced for Department specialists.

112370. CITRUS GRANDIS (L.) Osbeck. Rutaceae. Grapefruit.

A grapefruit with pink flesh.

112371. IPOMOEA sp. Convolvulaceae.

A plant with satin-sheen white flowers and peculiar hairy pods; tubers form on the roots. Received under the name "Ilicifolia," for which a place of publication has not been found.

112372. JUBAEOPSIS CAFFRA Beccari. Phoenicaceae. Palm.

From the Union of South Africa. Seeds presented by E. Percy Phillips, Principal Botanist, Department of Agriculture, Pretoria. Received October 4, 1935.

Introduced for Department specialists.

A low pinnate-leaved palm 20 feet or less in height, with leaves 12 to 15 feet long and small edible nuts about the size of walnuts. Native to the coast of the Cape of Good Hope.

112373. CARICA PAPAYA L. Papayaceae. Papaya.

From the West Indies. Seeds collected by Mrs. Aileen Ricker, Bureau of Plant Industry. Received October 15, 1935.

Introduced for Department specialists.

Collected at Kingston, Jamaica. A papaya of fine flavor.

112374 and 112375.

From Surinam. Root cuttings collected by W. A. Archer, Bureau of Plant Industry. Received January 11, 1935. Numbered in October 1935.

Introduced for Department specialists.

112374. *LONCHOCARPUS* sp. Fabaceae.

No. 2850. *Basra nekoe*, *Haiariballi*. Collected near Scotelweg, December 1, 1934. A small plant, 6 feet high, found growing in shade on fine rich silt.

112375. *MACHAERIUM* sp. Fabaceae.

No. 2869. *Fai faia noroko*. Collected at Vredenburg Weg, December 7, 1934. A plant with yellow flowers and slender pods. The wood becomes yellow after cutting.

112376 and 112377.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received October 11, 1935.

Introduced for Department specialists.

112376. *ARECA TRIANDRA* Roxb. Phoenicaceae. Palm.

A graceful spineless palm, ultimately about 25 feet high, usually with several trunks which bear crowns of pinnate leaves 4 to 6 feet in length. The fruits, about the size of an olive, are orange scarlet. Native to India.

For previous introduction see 103156.

112377. *PASSIFLORA FOETIDA* L. Passifloraceae. Passionflower.

A rapid-growing, trailing, climbing vine with small purple flowers and delicately flavored yellow fruits less than 1 inch in diameter. It is used as a cover crop for coconuts and rubber in the Philippine Islands, and should make an interesting ornamental in the warmer parts of Florida and California.

For previous introduction see 90783.

112378 and 112379.

From Africa. Seeds collected by Dr. Thomas Barbour, Director of the Museum of Comparative Zoology, Harvard University, Cambridge, Mass. Received October 14 1935.

Introduced for Department specialists.

112378. *GOSSYPIUM* sp. Malvaceae.

Wild cotton, collected July 27, 1935, at New Gullel in the tropical lowlands of southern Swaziland, South Africa.

112379. *IPOMOEA* sp. CONVOLVULACEAE.

Collected at Lourenço Marques, Mozambique.

112380. *VIOLA PATRINII* Ging. Viola-ceae. Violet.

From Germany. Seeds presented by the Botanic Garden, Berlin-Dahlem. Received March 27, 1934. Numbered in October 1935.

Introduced for Department specialists.

For previous introduction see 104603.

112381 to 112384.

From Surinam. Root cuttings collected by W. A. Archer, Bureau of Plant Industry. Received January 14, 1935. Numbered October 17, 1935.

Introduced for Department specialists.

112381 to 112383. *LONCHOCARPUS* spp. Fabaceae.112381. *LONCHOCARPUS NICOU* (Aubl.) DC.

No. 2936. Collected at Carolina on the Surinam River, December 18, 1934. A strong growing vine with three to five pinnate papery leaves. Native to northern South America.

112382. *LONCHOCARPUS* sp.

No. 2888. *Wiriri nekuru*. From Carolina on the Surinam River, December 13, 1934. A shrub or small tree 4 to 15 feet high with a slender single stem. The single enlarged root is soft, but the stem is extremely hard.

112383. *LONCHOCARPUS NICOU* (Aubl.) DC.

No. 2920. *Nan nekoe* or *reddi nekoe*. From Marshall Creek, 20 miles above Carolina on the Surinam River, December 16, 1934.

For previous introduction and description see 112381.

112384. *SOLANUM LEUCOCARPON* Dun. Solanaceae.

No. 2917. *Ababepau*. From Marshall Creek, 20 miles above Carolina on the Surinam River. A bushy shrub 6 to 10 feet high.

112385 to 112393. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received September to December 1935.

Introduced for Department specialists.

112385. No. 12. *Palmira*. September 29, 1935. From Eliseo Rodriguez, Girón.112386. No. 13. *Chocoa*. October 14, 1935. From Compania Colombiana de Tabaco, Baranquilla.112387. No. 14. *Cubita*. October 14, 1935. From Ovejas, Department Bolivar.

112388 and 112389. October 26, 1935. From La Pintada, Antioquia.

112388. No. 15. *Tachuela*, mixed with other varieties.112389. No. 16. *Tachuela*.

112390 and 112391. November 15, 1935. From Eduardo Villa, Barrio, Antioquia. Medellin.

112390. No. 27. *Cordoncillo*.112391. No. 28. *Zapatoca*.112392 and 112393. *Tachuela*, mixed with other varieties. November 15, 1935, from Bello, Antioquia.

112392. No. 29. Presented by Lino Taboro.

112393. No. 30. Presented by Aureliano Muriel.

112394 to 112396.

From Honduras. Seeds presented by N. J. Volk, Lancetilla Experiment Station, Tela, at the request of Wilson Popenoe. Received October 22, 1935.

Introduced for Department specialists.

112394. *DURIO ZIBETHINUS* Murr. Bombacaceae. Durian.

A large handsome pyramidal tree, native to the Malay Archipelago, and cultivated for the fruits which vary from round to oval in shape and from 5 to 10 pounds in weight. These are armed with formidable prickles less than an inch long; when ripe they become slightly yellow and have a very offensive odor. The cream-colored pulp surrounding the seed is the edible portion. The large seeds may be roasted and eaten like chestnuts. The tree is readily propagated by seed if sown fresh.

For previous introduction see 67642.

112395. *GARCINIA BENTHAMII* Pierre. Clusiaceae.

A small rapidly growing evergreen tropical tree closely related to the mangosteen (*Garcinia mangostana*), native to high altitudes in the Philippine Islands. The edible fruits are very similar to those of the mangosteen except that they are slightly smaller, bright red, and have very acid flesh.

For previous introduction see 81052.

112396. *NEPHELIUM LAPPACEUM* L. Sapindaceae. Rambutan.

An erect tropical tree up to 40 feet high, native to the Malay Archipelago. The compound leaves are composed of five to seven pairs of elliptic, obovate or oblong leaflets about 4 inches long, shining dark green above, paler beneath. The crimson or yellowish fruits, in clusters of 10 to 12, are oval, about 2 inches long, and covered with soft fleshy spines less than 1 inch long. The white translucent juicy flesh (aril) which adheres to the oblong flattened seed is acidulous in flavor.

For previous introduction see 108990.

112397. *AGAVE PARRYI* Engelm. Amaryllidaceae.

From Arizona. Seeds presented by F. J. Crider, Boyce Thompson Arboretum, Superior. Received April 9, 1932. Numbered in September 1935.

Introduced for Department specialists.

An agave with a rosette of 20 to 30 oblong-spatulate leaves about 1 foot long and a scape up to 12 feet high, with a showy panicle of large greenish-yellow flowers. Native to the southwestern United States.

112398 to 112590. *BETA* spp. Chenopodiaceae.

From Europe. Seeds collected by G. H. Coons, Division of Sugar Plants, Bureau of Plant Industry. Received October 21, 1935.

Introduced for Department specialists.

112398 to 112410. *BETA VULGARIS* L. Common beet.

112398. No. 1. From Lisbon, Portugal.

Nos. 112399 to 112410. From Moite, Portugal.

112399. No. 2. 112400. No. 3.

112398 to 112590—Continued.

112401. No. 4. 112406. No. 9.

112402. No. 5. 112407. No. 10.

112403. No. 6. 112408. No. 11.

112404. No. 7. 112409. No. 12.

112405. No. 8. 112410. No. 13.

112411 to 112422. *BETA VULGARIS MACROCARPA* (Guss.) Moq.

From Lavradio, Portugal.

112411. No. 14. 112417. No. 21.

112412. No. 15. 112418. No. 22.

112413. No. 16. 112419. No. 23.

112414. No. 17. 112420. No. 24.

112415. No. 19. 112421. No. 25.

112416. No. 20. 112422. No. 26.

112423 to 112440. *BETA VULGARIS* L.

Common beet.

From Lisbon, Portugal.

112423. No. 27. 112432. No. 36.

112424. No. 28. 112433. No. 37.

112425. No. 29. 112434. No. 38.

112591 to 112595. NICOTIANA TABACUM
 L. Solanaceae. Common tobacco.

From Mexico. Seeds collected by W. A.
 Archer, Bureau of Plant Industry. Re-
 ceived October 22, 1935.

Introduced for Department specialists.

112591. No. 3547. *Lenguillo*. Collected
 October 1, 1935, at San Francisco de
 Rincon, Guanajuato.

166999—40—2

112591 to 112595—Continued.

112592. No. 3552. *Hoja ancha*. Collected
 October 2, 1935, at Encarnación de Díaz,
 Jalisco.

112593. No. 3554. *Negro*. Collected Octo-
 ber 5, 1935, at Pabellon, Aguascalientes.

112594. No. 3557. *Macuchi* (?). Collected
 October 10, 1935, at Torreón, Coahuila.

112595. No. 3558. Collected October 11,
 1935, at Torreón, Coahuila.

112596. NEOMAMMILLARIA KARWINSKI-
 ANA (Mart.) Britt. and Rose. Cacta-
 ceae.

From Mexico. Seeds collected by Paul Rus-
 sell and Max Souviron, Bureau of Plant
 Industry, in the Botanic Garden, Mexico
 City. Received September 20, 1930. Num-
 bered in November 1935.

Introduced for Department specialists.

A globular or cylindrical cactus about 3
 inches in diameter, with milky juice, spiral
 rows of terete tubercles, and solitary flowers
 half an inch across, the petals whitish with
 deep-pink central stripes. Native to south-
 ern Mexico.

112597. LILIUM POLYPHYLLUM D. Don.
 Liliaceae. Lily.

From India. Bulbs purchased from Mrs. P.
 Kohli, Baramula, Kashmir. Received No-
 vember 30, 1935.

Introduced for Department specialists.

For previous introduction see 110099.

112598 to 112600.

From Palestine. Bulbs purchased from Vester
 & Co., American Colony Stores, Jeru-
 salem. Received October 18, 1935.

Introduced for Department specialists.

112598. CYCLAMEN PERSICUM Mill. Primu-
 laceae.

For previous introduction see 26885.

112599. IRIS ANTILIBANOTICA Dinsm. Iri-
 daceae.

An *Oncocylus* iris with narrow, slightly
 falcate leaves 6 to 8 inches long and a
 leafy stem about 1 foot high. The flowers
 are purple with the standards lighter than
 the falls and veined with deeper purple.
 Native to Asia Minor at about 6,000 feet
 altitude.

112600. IRIS LORTEII Barbey. Iridaceae.
 Lebanon iris.

A hardy iris with stem less than a foot
 long, bearing two reduced leaves about the
 same length. The whitish outer segments
 of the flower are obovate, much reflexed,
 about 3 inches broad, and finely veined and
 spotted with red-brown, with a dark spot
 at the throat. The inner segments are pale
 gray with red-brown veins. Native to Leb-
 anon and Asiatic Turkey.

For previous introduction see 28452.

112601 and 112602. ACHRAS ZAPOTA L.
 Sapotaceae. Sapodilla.

From Costa Rica. Seeds presented by Alan
 Kelso, Chief of the Propagation Service,
 Department of Agriculture, Puntarenas.
 Received October 16, 1935.

Introduced for Department specialists.

112601 and 112602—Continued.

112601. A fruit with cedar-red colored flesh which weighs about 1 pound.

112602. A fruit with salmon-colored flesh which weighs about 1 pound.

112603. SACCHARUM OFFICINARUM L.
Poaceae. Sugarcane.

From New Guinea. Seeds presented by John L. Froggall, Director of Agriculture. Received October 22, 1935.

Introduced for Department specialists.

Collected from the Sepik River region.

112604 and 112605. (Undetermined.)

From Ecuador. Seeds and bulbs collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received October 18, 1935.

Introduced for Department specialists.

112604. No. 7673-A. Seeds of an undetermined amaryllid.

112605. No. 7673-A. Bulbs of an undetermined amaryllid. [Seeds of this plant introduced under P. I. 112604.]

112606. LYCOPERSICON ESCULENTUM Mill.
Solanaceae. Tomato.

From Manchuria. Seeds presented by L. Pritsin, Harbin. Received November 6, 1932. Numbered in October 1935.

A wild tomato; introduced for Department specialists.

112607 to 112609. PHLEUM PRATENSE L.
Poaceae. Timothy.

From Germany. Seeds presented by the Director, Kaiser Wilhelm Institut für Züchtungsforschung, Müncheberg. Received October 21, 1935.

Introduced for Department specialists.

112607. No. 1520. An early variety.

112608. No. 1522. A late variety.

112609. No. 1521. A late variety.

112610 to 112617.

From Ecuador and Colombia. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received October 18, 1935.

Introduced for Department specialists.

112610. BOMAREA sp. Amaryllidaceae.

No. 7670-A. September 13, 1935. Canton Quito, Provincia Pichincha, Ecuador; along the road from Nono to Guala. A vine with nodding flowers whose outer segments are scarlet and the inner ones red orange flecked with maroon.

112611. CHAMAESENNA VELUTINA Britt. and Killip. Caesalpinaceae.

No. 7686-A. Chalan. September 14, 1935. Canton Quito, Provincia Pichincha, Ecuador; collected near a stream along the trail from Nono to San Francisco at 8,800 feet altitude. A very handsome tree nearly 50 feet high, with pinnate leaves and large bright-yellow flowers in loose racemes.

112612. TEPHROSIA TOXICARIA (Sw.) Pers. Fabaceae.

No. 7714-A. *Barbasco chico*. September 24, 1935. Near Puyo, Provincia Napo-

112610 to 112617—Continued.

Pastau, Ecuador, at 1,100 feet altitude. A plant 4 feet high with whitish flowers.

For previous introduction see 111591.

112613. LUPINUS sp. Fabaceae.

No. 7709-A. *Chocho*. September 19, 1935. Canton Quito, Provincia Pichincha, Ecuador; collected on arid slopes at 10,000 feet altitude along the trail from Nono to Cotacallao. A spreading shrub about 4 feet high, with dark-blue flowers marked with white on the upper petal.

112614. PERNETTIA PROSTRATA PURPUREA (D. Don) Sleumer. Ericaceae.

No. 7642-A. *Moridera*. August 17, 1935. Collected on the road from Ipiales to Lojas, Departamento Narino, Colombia. A low bushy shrub with small lanceolate leaves, solitary white flowers, and purple fruits. Native to Peru.

112615. TROPAEOLUM DIGITATUM Karst. Tropaeolaceae.

No. 7691-A. September 14, 1935. Canton Quito, Provincia Pichincha, on the trail from Nono to San Francisco, Ecuador, at 9,000 feet altitude. A woody climber with peltate five- to seven-lobed leaves and yellow flowers an inch in diameter with a long red spur. Native to Venezuela.

112616. TROPAEOLUM TUBEROSUM Ruiz and Pav. Tropaeolaceae.

No. 7687-A. September 14, 1935. Canton Quito, Provincia Pichincha, Ecuador; collected along the trail from Nono to San Francisco at 8,800 feet altitude. A tuberous-rooted herbaceous climber with red and yellow flowers, native to the highlands of northern South America, where the tubers are boiled and eaten as a vegetable. The plant is said to be able to withstand a slight frost.

For previous introduction see 111428.

112617. (Undetermined.)

No. 7677-A. September 13, 1935. Canton Quito, Provincia Pichincha, Ecuador, along the road from Nono to Guala at 10,500 feet altitude. An ornamental vine with attractive crimson flowers.

112618. TRIPSACUM sp. Poaceae. Grass.

From Guatemala. Plants presented by the United Fruit Co., through J. H. Kempton, Bureau of Plant Industry. Received October 29, 1935.

Collected in the Lake Retanas region; introduced for Department specialists.

112619 to 112635. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 29, 1935.

Introduced for Department specialists.

112619. No. 3553. From Bóbedas, Aguascalientes.

112620. No. 3556. From Guerrero, Durango.

Nos. 112621 and 112622. Collected in the State of Nayarit, October 1, 1935.

112621. No. 3575. *Jamaica*.

112622. No. 3576. *Bonanza*.

112619 to 112635—Continued.

Nos. 112623 to 112625. Collected in the State of Durango, October 18, 1935.

112623. No. 3577. Turkish tobacco from Reymundo.

112624. No. 3578. *Virginia*, probably. From Aviles.

112625. No. 3579. *Lagunero*. From Aviles.

112626. No. 3580. *Cordoba* type. From Coscomatepec, Veracruz, September 29, 1935.

Nos. 112627 to 112635 were furnished through the courtesy of the Instituto Biotécnico, San Jacinto, Distrito Federal.

Nos. 112627 to 112631 were collected in the State of Guerrero in September 1935.

112627. No. 3581. From San Miguel Totolapan.

112628. No. 3582. From Pungarabato.

112629. No. 3583. From Pungarabato.

112630. No. 3584. From Tetipac.

112631. No. 3585. Place of collection not given.

Nos. 112632 to 112635 were collected in the State of Michoacan in September 1935.

112632. No. 3586. From Yurécara.

112633. No. 3587. From Huetamo de Nuñez.

112634. No. 3588. *Rustica* (cultivated). From La Piedad.

112635. No. 3589. From Tacambaro.

112636. *CHELONE OBLIQUA* L. Scrophulariaceae. Red turtlehead.

From the National Arboretum, Washington, D. C. Seeds collected by O. M. Freeman, Bureau of Plant Industry. Received October 31, 1935.

A herbaceous perennial up to 2 feet high, with showy rose-colored flowers in close terminal and axillary spikes. Native to damp shady localities in eastern North America.

112637 to 112640.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received October 26, 1935.

Introduced for Department specialists.

112637. *CELTIS RHAMNIFOLIA* Presl. Ulmaceae.

A tree about 20 feet high, with smooth gray bark, ovate, abruptly acuminate leathery leaves, and inconspicuous flowers. Native to southern Africa.

For previous introduction see 106078.

112638. *CHILIANTHUS ARBOREUS* (L. f.) Benth. Loganiaceae.

An erect evergreen shrub 6 to 10 feet high, with four-angled or crisply winged branchlets and lanceolate leathery leaves 3 to 4 inches long, smooth above and gray-scurfy beneath. The small creamy-white flowers are in small clusters formed into a large lax panicle 8 inches across. It is native to southern Africa.

For previous introduction see 99406.

112637 to 112640—Continued.

112639. *COMBRETUM ERYTHROPHYLLUM* (Burch.) Sond. Combretaceae.

A tree up to 40 feet high, with unarmed spreading branches and ovate-acute leaves which turn crimson in autumn. Native to tropical Africa.

112640. *TARCHONANTHUS MINOR* Less. Asteraceae.

A strongly resin-scented shrub, native to southern Africa, with oblong to obovate, entire leaves up to 2 inches long and short racemes of small woolly flower heads. It is said to be a good stock feed and to be drought resistant.

For previous introduction see 106380.

112641 to 112656. *NICOTIANA* spp. Solanaceae.

From the State of Hidalgo, Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 30, 1935.

Seeds from volunteer plants collected near Jacalo, October 15, 1935; introduced for Department specialists.

- 112657 to 112662. FESTUCA RUBRA COM-MUTATA** Gaud. Poaceae.
Chewings fescue.
From New Zealand. Seeds presented by the Director, Plant Research Station, Palmerston North. Received October 25, 1935.
Introduced for Department specialists.
- 112657.** Ref. 35/10010 (99-2/96).
112658. Ref. 35/10073.
112659. Ref. 35/10075.
112660. Ref. 35/10077.
112661. Ref. 35/10547.
112662. Ref. 35/10548.
- 112663 to 112665. ARACHIS HYPOGAEA L.** Fabaceae. **Peanut.**
From Brazil. Seeds presented by the Director, Estação Experimental do Trigo, Ponta Grossa, Parana. Received November 1, 1935.
Introduced for Department specialists.
- 112666 to 112669. PRUNUS spp.** Amygdalaceae.
From England. Cuttings presented by Collingwood Ingram, The Grange, Benenden, Kent. Received January 31, 1930. Numbered in December 1935.
Introduced for Department specialists.
- 112666.** *PRUNUS SIEBOLDII* (Carr.) Wittmack.
Takasago; best strain.
- 112667 to 112669.** *PRUNUS SERRULATA* Lindl. Oriental cherry
112667. *Okiku-zakura.*
112668. *Tai Haku.*
112669. *Ingram No. 2.*
- 112670. SASA VEITCHII** (Carr.) Rehd. Poaceae. **Bamboo.**
From New Jersey. Plants presented by W. A. Manda, Inc., South Orange. Received November 6, 1935.
Introduced for Department specialists.
- 112671 and 112672.**
From the Irish Free State. Plants presented by J. W. Besant, Keeper, Botanic Garden, Glasnevin, Dublin. Received November 6, 1935.
Introduced for Department specialists.
- 112671.** *SEMPERVIVUM ERYTHRAEUM* Vel. Crassulaceae.
A hardy sempervivum with tufted rosettes of many small grayish-purple leaves and small reddish flowers on a leafy stem 10 inches or less in height. Native to Bulgaria at altitudes of 3,000 to 8,000 feet.
- 112672.** *SEMPERVIVUM MACEDONICUM* Prager. Crassulaceae.
A succulent perennial forming a loose mat of rosettes of small fleshy leaves, reddish about the older leaf tips and small red-purple flowers on a leafy stem about 6 inches high. Native to Macedonia.
- 112673. HORDEUM SP.** Poaceae. **Barley.**
From England. Seeds presented by a Mr. Beaven, Warminster, Wiltshire, through Dorothy Marlatt, Washington, D. C. Received November 4, 1935.
Introduced for Department specialists.
- 112674. TRITICUM AESTIVUM L.** Poaceae. **Common wheat.**
From Canada. Seeds presented by the University of Saskatchewan, Saskatoon. Received November 8, 1935.
No. 1703. *Apev*; introduced for Department specialists.
- 112675 and 112676.**
From Brownsville, Tex. Seeds collected by Peter Heinz near Tamazunchale, Mexico. Received November 12, 1935.
Introduced for Department specialists.
- 112675.** *BELOPERONE COMOSA* Nees. Acanthaceae.
A herbaceous perennial with oval leaves and showy yellowish flowers in axillary spikes, subtended by dusky scarlet bracts. Native to Mexico.
- 112676.** *OCIMUM MICRANTHUM* Willd. Menthaceae. **Wild basil.**
- 112677. AMYGDALUS PERSICA L.** Amygdalaceae. **Peach.**
From India. Plants purchased from the Botanic Garden, Saharanpur. Received March 5, 1934. Numbered in November 1935.
Saharanpur No. 5; introduced for Department specialists.
- 112678. SACCHARUM SP.** Poaceae.
From the Fiji Islands. Cuttings presented by the Colonial Sugar Refining Co., Ltd., Rarawai. Received November 14, 1935.
Introduced for Department specialists.
Received under the name "robustum," a name not properly published.
- 112679. ALEURITES TRISPERMA** Blanco. Euphorbiaceae. **Banucalag.**
From Florida. Seeds presented by Mrs. L. L. Bow, Homestead, through T. B. McClelland, United States Plant Introduction Garden, Coconut Grove. Received September 11, 1935.
Introduced for Department specialists.
This Philippine relative of the tung-oil tree (*Aleurites fordii*) is a tree 30 to 50 feet high, with heart-shaped leaves and rounded three-angled fruits about 2 inches in diameter. It is a tropical tree and withstands only a few degrees of frost. The oil obtained from the seeds resembles tung oil, but has a somewhat lower drying power.
For previous introduction see 65297.
- 112680 to 112682. NICOTIANA TABACUM L.** Solanaceae. **Common tobacco.**
From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 14, 1935.
Introduced for Department specialists.

112680 to 112682—Continued.

Tabaco montés. From Tehuantepec, State of Oaxaca.

112680. No. 3607. Collected October 3, 1935.

112681. No. 3608. Collected November 4, 1935.

112682. No. 3609. Collected November 4, 1935.

112683 to 112687. SACCHARUM. Poaceae. Sugarcane.

From Australia. Cuttings presented by the Colonial Sugar Refining Co., Macknade Mill, North Queensland, at the request of E. W. Brandes, Bureau of Plant Industry. Received November 15, 1935.

Introduced for Department specialists.

112688 to 112692. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From the State of Oaxaca, Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 15, 1935.

Introduced for Department specialists.

Nos. 112688 to 112690 were collected at Valle Nacional, October 30, 1935.

112688. No. 3602. Cigar tobacco.

112689. No. 3603. A mixed sample; a fine grade of cigar tobacco.

112690. No. 3604. A mixed sample, including *Tlapacoya*.

Nos. 112691 and 112692 were collected at Tuxtepec, October 29, 1935.

112691. No. 3605. A mixed sample.

112692. No. 3606. Tobacco used for making cigarettes.

112693. DACRYDIUM FRANKLINII Hook. f. Taxaceae. Huon-pine.

From Tasmania. Seeds collected by Charles W. Fidler, along the Gordon River in February 1935 and presented through L. A. Evans, Sandy Bay, Hobart. Received November 8, 1935.

Introduced for Department specialists.

An evergreen tree of pyramidal form, up to 100 feet high, with dense spreading head, pendulous branchlets, and small scalelike leaves resembling those of cypress. Native to swampy places in Tasmania.

112694. HYMENOCALLIS TENUIFLORA Herb. Amaryllidaceae.

From the Philippine Islands. Bulbs presented by Dr. W. Dwight Pierce. Received July 23, 1930. Numbered November 1935.

Introduced for Department specialists.

A tender hymenocallis with an umbel of 10 to 12 sessile white flowers. The perianth tube is long and very slender, and the narrow segments are about 4 inches long. Native to Colombia.

112695. AMHERSTIA NOBILIS Wall. Caesalpiniaceae.

From the British West Indies. Plant presented by H. R. Britton-Jones, Imperial College of Tropical Agriculture, Trinidad. Received November 20, 1935.

Introduced for Department specialists.

For previous introduction see 105449.

112696 to 112699. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From the State of Guerrero, Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 1, 1935.

Introduced for Department specialists.

112696. No. 3591.

112697. No. 3592. *Papantle*. From Ajhuiztla.

112698. No. 3593. *Putleco*. From Copala.

112699. No. 3594. *Mije*. From Ajhuiztla.

112700 to 112715.

From Uruguay. Seeds presented by Dr. R. Salgueiro Silveira, Chief, Sección Información y Enseñanza, Montevideo. Received November 11, 1935.

Introduced for Department specialists.

112700 to 112702. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

112700. *Española*.

112701. *Nacional*.

112702. *Paraguaya*.

112703. GOSSYPIUM sp. Malvaceae.

112704. HELIANTHUS ANNUUS L. Asteraceae. Sunflower.

Girasol.

112705 and 112706. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

Nacional.

112707 and 112708. RICINUS COMMUNIS L. Euphorbiaceae. Castor-bean.

112707. The type.

112708. *Paraguayensis*.

112709. SOJA MAX (L.) Piper. Fabaceae. Soybean.

A forage variety.

112710 and 112711. SOLANUM TUBEROSUM L. Solanaceae. Potato.

112710. *Americana*. A disease-resistant type.

112711. *Chaqueña*. A disease-resistant type.

112700 to 112715—Continued.

- 112712 to 112715. *ZEA MAYS* L. Poaceae. Corn.
 112712. *Amargo*.
 112713. *Blanco forragero*.
 112714. *Oasilda*.
 112715. *Cuarenton*.

112716 to 112724.

From England. Bulbs and roots purchased from Hocker Edge Gardens, Cranbrook. Received November 15, 1935.

Introduced for Department specialists.

112716. *BEGONIA EVANSIANA* Andrews. Begoniaceae.

For previous introduction see 61904.

- 112717 to 112722. *IRIS* spp. Iridaceae.

112717. *IRIS BARNUMAE* Foster and Baker.

112718. *IRIS EWBANKIANA* Foster.

112719. *IRIS STOLONIFERA* Maxim.

112720. *IRIS PARADOXA* Stev. Velvet iris.

For previous introduction see 111945.

112721. *IRIS STOLONIFERA* Maxim.

For previous introduction see 112719.

112722. *IRIS URMIENSIS* Hoog.

112723. *LEUCOJUM VERNUM* L. Amaryllidaceae. Spring snowflake.

Carpaticum. A vigorous variety with yellow-tipped white flowers, usually two on a stem.

112724. *RHODOHYPOXIS BAURI PLATYPETALA* (Baker) Nel. Amaryllidaceae.

A charming little alpine with erect linear hairy leaves about 2 inches long and starry white flowers occasionally flushed pink, about 1 inch across on peduncles 2 to 3 inches long. Native to southern Africa at altitudes of 3,500 to 5,000 feet.

- 112725 and 112726. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From China. Seeds presented by T. F. Yu, Plant Pathologist, Nanking University, Nanking. Received November 8, 1935.

Chinese wheat which has been found to be resistant to flag smut in the Nanking region; introduced for Department specialists.

112725. *Nanking* No. 5.

112726. *Nanking* No. 16.

112727 to 112743.

From Brazil. Seeds collected by Dr. Doris Cochran, United States National Museum, Washington, D. C. Received November 7, 1935.

Introduced for Department specialists.

112727. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. Okra.

No. 29-B.

112728. *ANNONA SQUAMOSA* L. Annonaceae. Sugar-apple.

No. 3.

112729. *CASSIA* sp. Caesalpinaceae.

No. 7.

112727 to 112743—Continued.

- 112730 to 112732. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

Collected at Perapora, State of Minas Geraes.

112730. No. 4. A long melon with a hooked neck, pale-green rind, and dark pink, rather thin flesh.

112731. No. 2. A small round melon with dark-green rind and pink flesh.

112732. No. 28.

112733. *CLEOME SPINOSA* Jacq. Capparidaceae.

No. 14. From Ouro Preto, Minas Geraes, March 1935.

112734. *CROTALARIA* sp. Fabaceae.

No. 19. From Nova Friburgo, State of Rio de Janeiro.

112735. *CUCUMIS ANGUIRIA* L. Cucurbitaceae. West Indian gherkin.

No. 29-A. From the market, Rio de Janeiro.

112736. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 1. From Recreio dos Bandeirantes, Federal District, Rio de Janeiro, February 26, 1935.

112737. *IPOMOEA SETOSA* Ker. Convolvulaceae.

No. 9.

- 112738 to 112740. *MAURANDYA* spp. Scrophulariaceae.

112738. *MAURANDYA ERUBESCENS* (D. Don) Gray.

No. 10. From the State of Rio de Janeiro. A woody climber with triangular, serrate, alternate leaves with trumpet-shaped, rose-pink flowers. Native to Mexico.

For previous introduction see 106612.

112739. *MAURANDYA BARCLAIANA* Lindl. Barclay maurandia.

No. 22. From Lagoa Grande, near Bello Horizonte, Minas Geraes, March 19, 1935. A small vine 5 or 6 feet in height which forms a dense mat of foliage, with individual leaves about 1 inch in diameter. The funnel-shaped rich blue-purple flowers, about 1 inch in diameter, are produced in great profusion.

For previous introduction see 37883.

112740. *MAURANDYA* sp.

No. 27. From Nova Friburgo, State of Rio de Janeiro, May 13, 1935. A vine with lavender flowers.

112741. *QUAMOCLIT* sp. Convolvulaceae.

No. 26. From Lassance, Minas Geraes, March 21, 1935. A wild cypress vine with scarlet flowers.

112742. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

No. 29. May 1935. From the market at Rio de Janeiro.

112743. *ZEA MAYS* L. Poaceae. Corn.

No. 31. From Lassance, Minas Geraes, March 21, 1935.

112744. CHIMONOBAMBUSA QUADRANGULARIS (Fenzi) Makino. Poaceae.

Bamboo

From the Orient. Plants presented by Miss Genevieve Wimsatt, through the Bureau of Plant Quarantine. Received June 17, 1935. Numbered in November 1935.

A bamboo which produces angular culms, squarish in cross section. This character does not appear, however, in culms of very small diameter. The maximum height attained is uncertain, possibly 25 or 30 feet. The species has proved difficult to propagate.

For previous introduction see 93225.

112745 to 112751.

From England. Bulbs purchased from W. A. Constable Ltd., Tunbridge Wells. Received November 21, 1935.

Introduced for Department specialists.

112745. LEUCOJUM AESTIVUM L. Amaryllidaceae.

Gravetye Giant. A variety with large pendulous heads of white flowers with green tips, in late spring.

112746 to 112751. LILIUM spp. Liliaceae.

Lily.

112746. LILIUM DUCHARTREI Franch.

A lily of the Martagon section, native to alpine and subalpine regions of western China. The stems are 2 to 5 feet high, the scattered lanceolate leaves are 2 to 4 inches long, and the fragrant, nodding, marble-white flowers, 3 inches across, spotted and lined with vinous-purple, are borne in umbels of 1 to 12.

For previous introduction see 99891.

112747. LILIUM DUCHARTREI FARRERI (Turr.) Grove.

A slender graceful lily, 2 to 3 feet high, bearing on long pedicels up to 5 recurved white flowers which are slightly spotted with purple on the inside.

For previous introduction see 90526.

112748. LILIUM POLYPHYLLUM D. Don.

For previous introduction see 112597.

112749. LILIUM SUTCHUENENSE Franch.

A lily from Szechwan, western China, with a stem 3 to 5 feet high, the underground portion running horizontally. The thickly scattered leaves are linear and deep green, and the pendulous flowers, up to 20 in number, have reflexed orange-red segments spotted with purplish black, and red anthers.

For previous introduction see 95491.

112750. LILIUM WALLICHIANUM Schult. f.

Wallich lily.

A lily 4 to 6 feet high, with linear leaves 6 to 9 inches long and, usually, solitary waxy, creamy-white, fragrant flowers 9 inches long, which are golden yellow at the base inside and green outside. Native to the Himalayas from Nepal to northern Burma.

For previous introduction see 111062.

112751. LILIUM WARDII W. W. Smith.

A very fragrant Martagon lily with stems about 3 feet high, oblong to linear-lanceolate leaves, and 12 to 20 or more pink flowers with purple spots. Native to Tibet at altitudes between 8,000 and 10,000 feet.

112752. PASSIFLORA FOETIDA HASTATA (Bertol.) Mast. Passifloraceae.

Passionflower.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 14, 1935.

Introduced for Department specialists.

No. 3977. November 2, 1935. Papaloapan, Vera Cruz. A variety with hastate, hirsute leaves.

112753 to 112755.

From China. Seeds and cuttings collected by Peter Liu and forwarded by Fred J. Rositter, acting agricultural commissioner, American consulate, Shanghai. Received November 21, 1935.

Introduced for Department specialists.

112753. CASTANEA SEGUINII Dode. Fagaceae.

Small wild chestnuts from near Erh Shih Pa Tu, in Gi Wu district.

For previous introduction see 108555.

112754. TRIPTERYGIUM sp. Celastraceae.

Lei Kung Teng. Cuttings from near Erh Shih Pa Tu, in Gi Wu district.

112755. TRIPTERYGIUM sp. Celastraceae.

Cuttings secured near Shih Hsia K'ou in Chuki district.

112756 to 112759.

From Peru. Bulbs collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received November 21, 1935.

Introduced for Department specialists.

112756. AMARYLLIS sp. Amaryllidaceae.

No. 7752. October 18, 1935, Distrito Lima, on the road from Chosica to Matucana at 700 feet altitude. A plant about 2 feet high, found on an arid rocky bank. The flowers are reddish orange.

112757. HYMENOCALLIS AMANCAES (Ruiz and Pav.) Nichols. Amaryllidaceae.

Spiderlily.

No. 7755. October 18, 1935, near Lima, at 700 feet altitude. A tender bulbous plant about 2 feet high, with large bright yellow flowers. Native to Peru and Chile.

For previous introduction see 93769.

112758. ZEPHYRANTHES FLAMMEA (Ruiz and Pav.) Baker. Amaryllidaceae.

No. 7754. October 18, 1935, near Lima, at the Escuela Nacional de Agricultura, at 700 feet altitude. A Peruvian zephyranthes with about 5 linear leaves 1 foot long and erect flame-red flowers. Allied to *Zephyranthes aurea*.

112759. ZEPHYRANTHES sp. Amaryllidaceae.

No. 7753. October 20, 1935. On the road from Lima to Chosica, about 600 feet altitude. A plant with bright-orange flowers; found in a cultivated field. Received under the name "igneus" for which a place of publication has not been found.

112760 to 112765.

From the Union of South Africa. Seeds presented by Dr. J. D. J. Hofmeyr, Research Horticulturist, Subtropical Horticultural Research Station, Nelspruit. Received November 21, 1935.

112760 to 112765—Continued.

Introduced for Department specialists.

112760. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

Ihabha.

112761. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

Bucoge.

112762. *CUCUMIS MYRIOCARPUS* Naudin. Cucurbitaceae.

Joti. An annual vine native to southern Africa.

112763 and 112764. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cushaw.

112763. *Amatanga.* 112764. *Lipati.*

112765. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

Itanga.

112766. *PERSEA* SP. Lauraceae.

From Guatemala. Seeds collected by J. H. Kempton, Bureau of Plant Industry, and Wilson Popenoe, United Fruit Co. Received November 25, 1935.

Introduced for Department specialists.

Collected above Tecpan at 9,000 feet altitude.

112767 to 112775. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.

From Germany. Seeds presented by Dr. Karl Stapp, Biologischen Reichsanstalt für Land und Forstwirtschaft, Berlin-Dahlem. Received November 20, 1935.

Introduced for Department specialists.

112767. No. 12. 112772. No. 89.

112768. No. 16. 112773. No. 100.

112769. No. 27. 112774. No. 125.

112770. No. 38. 112775. No. 196.

112771. No. 82.

112776 to 112794. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From the State of Chiapas, Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 26, 1935.

Introduced for Department specialists.

112776. No. 3610. Collected in the market at Tuxtla Gutierrez, November 7, 1935. Grown by the Indians of this region.

Nos. 112777 to 112779 were collected November 8, 1935, at Simajovel.

112777. No. 3611. Probably *Arcial*, a strong tobacco used for cigars.

112778. No. 3612. *Bajero.*

112779. No. 3613. *Arcial.*

112780. No. 3614. *La Candón.* Collected. November 9, 1935, at Santa Catarina, near Simajovel.

Nos. 112781 to 112784 were collected November 9 and 10, 1935, at Simajovel.

112781. No. 3615. *El Colorado.*

112782. No. 3616. *Arcial chico.*

112783. No. 3617.

112784. No. 3618. *Habanero.*

112776 to 112794—Continued.

Nos. 112785 to 112789 were collected at Huitiupán, November 10, 1935.

112785. No. 3619. *Colorado fuerte.*

112786. No. 3620. *Huimanguillo.*

112787. No. 3621. *Tobaco blanco.*

112788. No. 3622. *La Candón.*

112789. No. 3623. *Chenelmo.*

Nos. 112790 to 112794 were collected at Villa Flores, November 11-12, 1935.

112790. No. 3624. Probably *Corjalero.*

112791. No. 3625. *Hoja blanca.*

112792. No. 3626. Mixed sample, *Hoja blanca* and *Hoja tupida.*

112793. No. 3627. *Hoja larga.*

112794. No. 3628. Mixed sample.

112795 to 112802. *IRIS* spp. Iridaceae.

From the Netherlands. Bulbs purchased from C. G. Van Tubergen Ltd., Zwanenburg Nurseries, Haarlem. Received November 27, 1935.

Introduced for Department specialists.

112795. *IRIS HOOGIANA* Dykes. Redbeard iris.

For previous introduction see 65057.

112796 to 112798. *IRIS KOROLKOWI* Regel. Redvein iris.

112796. The type.

112797. *Concolor.*

112798. *Violacea.*

112799. *IRIS LORTETHI* Barbey. Lebanon iris.

For previous introduction and description see 112600.

112800. *IRIS HELENÆ* Barbey.

For previous introduction see 106259.

112801 and 112802. *IRIS STOLONIFERA* Maxim.

112803 to 112812. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From the Departamento Antioquia, Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received November 29, 1935.

Introduced for Department specialists.

112803. No. 17. *Zapatoca.* Collected at Bolivar, October 31, 1935.

112804. No. 20. *Cubano.* From Pedro Antonio Restrepo, November 4, 1935.

112805. No. 21. *Zapatoca.* Collected near Remolino, November 6, 1935.

Nos. 112806 to 112810 were collected at Bolivar, November 7, 1935.

112806. No. 22. *Zapatoca.*

112807. No. 23. *Girón.*

112808. No. 24. *Zapatoca.*

112809. No. 25. *Tabaco de olor* from the hacienda "Tebaida."

112810. No. 26. *Cordoncillo.*

Nos. 112811 and 112812 were collected in the Andes, November 3, 1935.

112803 to 112812—Continued.

112811. No. 18. *Zapatoca*.
112812. No. 19. *Cordoncillo*.

112813 to 112817. *ARACHIS HYPOGAEA* L.
Fabaceae. Peanut.

From Brazil. Seeds presented by the Ministerio da Agricultura, Departamento Nacional da Producao Vegetal, Rio de Janeiro. Received November 23, 1935.

Introduced for Department specialists.

112818. *BALSAMOCITRUS DAWEI* Stapf.
Rutaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos. Received November 25, 1935.

Introduced for Department specialists.

Seeds originally from the Forest Department, Uganda, Africa.

112819. *CITRUS* sp. Rutaceae.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received November 22, 1935.

Introduced for Department specialists.

From Andes, Departamento de Antioquia, November 5, 1935.

112820 to 112831. *NICOTIANA TABACUM* L.
Solanaceae. Common tobacco.

From Mexico and Guatemala. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received December 3, 1935.

Introduced for Department specialists.

Nos. 112820 and 112821 were collected at Huixtla, Chiapas, Mexico.

112820. No. 3633. November-13, 1935.

112821. No. 3634. November 14, 1935.

Nos. 112822 to 112829 were collected November 15, 1935, at Retalhuleu, Guatemala.

112822. No. 3635. A mixed sample, said to be *Copán* and *Punta de tanza*.

112823. No. 3636. *Copán*, perhaps.

112824. No. 3637. *Copán*, perhaps.

112825. No. 3638. *Punta de tanza*.

112826. No. 3639. *Virginia*.

112827. No. 3640. *Cubano*.

112828. No. 3641.

112829. No. 3642. *Tabaco cimarrón*.

Nos. 112830 and 112831 were collected November 4, 1935, at Encarnación de Diaz, Jalisco.

112830. No. 3643. A mixed sample containing *Hoja ancha*, *Cuerna de cabra*, and others.

112831. No. 3644.

112832 to 112851.

From Guatemala and Mexico. Seeds collected by J. H. Kempton, Bureau of Plant Industry. Received November 26, 1935.

Introduced for Department specialists.

112832 to 112851—Continued.

- 112832 to 112834. *EUCHLAENA MEXICANA* Schrad. Poaceae. Teosinte.

For previous introduction see 107435.

112832. From Huehuetenango, Guatemala; presented by Rudolf Apel.

112833. Collected October 19, 1935, on Lake Retana, Guatemala, by J. H. Kempton and Wilson Popenoe.

112834. Collected near Jutiapa, Guatemala, October 21, 1935.

112835. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

From Huehuetenango, Guatemala, October 26, 1935. A wild tomato.

112836. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

Collected November 9, 1935, at San Cristobal, Chiapas, Mexico, at 7,000 feet altitude.

112837. *RUBUS* sp. Rosaceae.

Moro. From Los Escuentos, Quetzaltenango, Guatemala, October 26, 1935, at 9,500 feet altitude. Collected by Messrs. Kempton and Popenoe.

112838. *TRIPSACUM* sp. Poaceae.

From San Pedro, Chiapas, Mexico, at 5,600 feet altitude.

- 112839 to 112851. *ZEA MAYS* L. Poaceae. Corn.

Nos. 112839 to 112847 were collected in Guatemala.

112839. From San Sebastian, October 27, 1935.

112840. From Lake Retana, October 19, 1935.

112841. From near Jutiapa, October 18, 1935.

112842. From Nojoyá, November 1, 1935.

112843. From near Jutiapa, October 18, 1935. Said to be 60-day corn.

112844. From near Jutiapa, October 18, 1935.

112845. From Democracia, October 30, 1935.

112846. From Chanquejelve, November 3, 1935; 40-day corn.

112847. From Lake Retana, October 19, 1935.

Nos. 112848 and 112849 were collected in San Cristobal, Mexico, November 7, 1935.

112848. 112849.

112850. From San Antonio Huista, Guatemala, October 31, 1935.

112851. From San Cristobal, Mexico, November 7, 1935.

112852. *TEPHROSIA* sp. Fabaceae.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 26, 1935.

No. 3632. November 6, 1935. From Arriaga, Chiapas, Mexico; introduced for Department specialists.

112853 to 112856.

From the Union of Soviet Socialist Republics. Bulbs and roots presented by the Botanical Institute, Ashkhabad, Turkistan. Received December 2, 1935.

Introduced for Department specialists.

112853. ALLIUM CRISTOPHEI Trautv. Liliaceae.

An allium of the Molium section, with a large dense umbel of deep-lilac flowers. Native to Turkistan.

112854. EMINIUM LEHMANNI (Bunge) Kuntze. Araceae.

An herb resembling an arisaema, with fleshy, radical narrow-lanceolate leaves about 1 foot long and a solitary scape about as long, with a green spathe and a purple-black spadix. Native to central Asia.

112855. EREMURUS OLGAE Regel. Liliaceae.

A hardy herbaceous perennial with white flowers produced in a dense raceme. Native to Turkistan.

For previous introduction see 107527.

112856. LEONTICE EVERSMANNI Bunge. Berberidaceae.

A herbaceous perennial about 1 foot high, with pinnatisect leaves and terminal racemes of small yellow flowers. Native to Turkistan.

For previous introduction see 108931.

112857. LILIUM TSINGTAUENSE Gilg. Liliaceae.

From England. Bulbs purchased from W. A. Constable, Southborough, Tunbridge Wells. Received December 5, 1935.

Introduced for Department specialists.

A lily of the Pseudolirion group, up to 3 feet high, with scattered and whorled oblong-oblancheolate leaves, and one to six inodorous orange flowers, the segments about 2 inches long. Native to Shantung, China, and Chosen.

112858. SALVIA CAMPANULATA Wall. Menthaceae. Sage.

From Scotland. Seeds presented by Prof. W. Wright Smith, Regius Keeper, Royal Botanic Gardens, Edinburgh. Received February 8, 1933. Numbered in December 1935.

Introduced for Department specialists.

A stout perennial, 2 to 3 feet high, with ascending hirsute stems and ovate, cordate-crenate leaves on long petioles. The large flowers, yellow with purple dots, are in axillary or terminal racemes. Native to the Himalayas at altitudes between 9,000 and 13,000 feet.

For previous introduction see 42627.

112859. STYRAX OFFICINALIS L. Styracaceae. Snowbell.

From England. Seeds presented by Collingwood Ingram, The Grange, Benenden, Kent. Received November 20, 1935.

Introduced for Department specialists.

For previous introduction see 109578.

112860. ZEPHYRANTHES sp. Amaryllidaceae.

From Central America. Bulbs collected at Retalhuen, Guatemala, by W. A. Archer, Bureau of Plant Industry. Received December 3, 1935.

No. 3645. Introduced for Department specialists.

112861 to 113003.

From Oceania. Cuttings collected by E. W. Brandes, Bureau of Plant Industry. Received December 7, 1935.

Introduced for Department specialists.

112861 to 113000. SACCHARUM spp. Poaceae. Sugarcane.

112861 to 112998. SACCHARUM OFFICINARUM L.

From New Caledonia.

112861. N. C. No. 2. *Gaa*.

112862. N. C. No. 3. *Grivayio*.

112863. N. C. No. 4. *Quimoïn*.

112864. N. C. No. 5. *Necrapati*.

 112995. Tonga No. 4. *To M'Gata pule pule*.
 112996. Tonga No. 5. *To Toufau*.
 112997. Tonga No. 6. *To M'Gata hina*.

From Raiatea, Society Islands.

112998. Raiatea No. 2.

112999. SACCHARUM sp.

No. *N. H. 1. Nassa-u*. From Efate, New Hebrides. Received under the name "robustum," a name not properly published.

113000. SACCHARUM SPONTANEUM L.

No. 1. From New Caledonia. A wild cane.

113001 to 113003. ERIANTHUS MAXIMUS Brongn. Poaceae.

A perennial reedlike grass closely related to sugarcane and native to Polynesia.

113001. No. 100. From New Caledonia.

113002. No. 132. From New Caledonia.

113003. No. 1. From Raiatea, Society Islands.

113004. HABRANTHUS CARDINALIS (C. H. Wright) Sealy. Amaryllidaceae.

From the Bahama Islands. Bulbs purchased from Miss Violet Brace, Nassau, New Providence. Received December 10, 1935.

Introduced for Department specialists.

A low bulbous plant with shining green, strap-shaped leaves 6 inches long. The cardinal-red, funnel-shaped flowers, 2 to 3 inches long, are borne on cylindrical scapes which are red at the base and green above. Native to tropical America.

For previous introduction see 99642.

113005. BAUHINIA GALPINI N. E. Brown. Caesalpiniaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, through F. G. Walsingham, Soledad, Cienfuegos. Received December 4, 1935.

Introduced for Department specialists.

For previous introduction see 106915.

113006 to 113270.

From China. Seeds collected in Suiyuan Province by the Asiatic Expedition. Received November 13, 1935.

Introduced for Department specialists.

113006 to 113049. AGROPYRON spp. Poaceae. Wheatgrass.

113006 to 113025. AGROPYRON CRISTATUM (L.) Gaertn.

Nos. 113006 and 113007 were collected at Shiretu Obo, August 6, 1935.

113006. No. 1. 113007. No. 3.

Nos. 113008 to 113010 were collected at Khara Sair, August 7, 1935.

113008. No. 4. 113010. No. 6.

113009. No. 5.

113006 to 113270—Continued.

Nos. 113011 and 113012 were collected at Naran Obo, August 8, 1935.

113011. No. 7. 113012. No. 8-A.

Nos. 113013 and 113014 were collected at Bayin Obo, August 9, 1935.

113013. No. 10. 113014. No. 16.

113015. No. 19. From Bulugin Ama, August 10, 1935.

Nos. 113016 to 113021 were collected August 11, 1935.

113016. No. 21. From the steppe near Darkhan Wang Fu.

113017. No. 22. From Bulugin Ama.

113018. No. 25. From the steppe near Darkhan Wang Fu.

113019. No. 27. From Bulugin Ama.

113020. No. 30. From the steppe near Darkhan Wang Fu.

113021. No. 31. From the steppe near Darkhan Wang Fu.

113022. No. 32. From Shara Muren, August 15, 1935.

Nos. 113023 to 113025 were collected August 18, 1935; from the steppe near Darkhan Wang Fu.

113023. No. 35-A. 113025. No. 58.

113024. No. 57.

113026. AGROPYRON GMELINI (Griseb.) Scribn. and Smith.

No. 39-A. Collected August 22, 1935, from the mountains northeast of Batu Khalkha.

For previous introduction see 98527.

113027. AGROPYRON SEMICOSTATUM Nees. No. 60.

113028 to 113049. AGROPYRON SIBIRICUM (Willd.) Beauv.

Nos. 113028 to 113030 were collected August 9, 1935, at Bayin Obo.

113028. No. 9. 113030. No. 12.

113029. No. 11.

Nos. 113031 and 113032 were collected August 9, 1935, at Batu Khalkhin Gol.

113031. No. 13. 113032. No. 14.

Nos. 113033 to 113035 were collected August 9, 1935, at Bayin Obo.

113033. No. 15. 113035. No. 18.

113034. No. 17.

Nos. 113036 to 113040 were collected August 11, 1935, from the steppe near Darkhan Wang Fu.

113036. No. 20. 113039. No. 28.

113037. No. 23. 113040. No. 29.

113038. No. 24.

113041. No. 35-B. August 18, 1935, from Khara Sair.

113042. No. 36-A. August 19, 1935, from the steppe near Darkhan Wang Fu.

113006 to 113270—Continued.

- Nos. 113043 to 113046 were collected September 1, 1935, at Batu Khalkhin Gol.
113043. No. 48. 113045. No. 51.
113044. No. 50. 113046. No. 52.
113047. No. 54. From Mu Usu, September 2, 1935.
113048. No. 59.
113049. No. 254. From Peiyin Obo, August 9, 1935.
- 113050 to 113055. *ALLIUM* spp. Liliaceae.
113050. No. 214. Collected August 21, 1935, at Naran Obo.
113051. No. 215. Collected August 23, 1935, at Khara Sair.
113052. No. 216. Collected August 24, 1935, at Darkhan Wang Fu.
113053. No. 217. Collected August 25, 1935.
113054. No. 218. Collected August 25, 1935, at Batu Khalkha.
113055. No. 219. Collected August 27, 1935, at Khara Sair.
113056. *ALYSSUM* sp. Brassicaceae.
No. 251. Collected August 25, 1935, at Shara Muren.
- 113057 to 113061. *AMYGDALUS* spp. Amygdalaceae.
- Nos. 113057 and 113058 were collected in the vicinity of Batu Khalkha.
113057. No. 228. August 22, 1935.
113058. No. 229. August 24, 1935.
113059. No. 230. August 25, 1935, from Naran Obo.
113060. No. 231. August 28, 1935, from Chimiste Ula.
113061. No. 232.
113062. *ANEMARRHENA ASPHODELOIDES* Bunge. Liliaceae.
No. 260. August 7, 1935. From Temur Hada. A herbaceous perennial 2 to 3 feet high, with a short thick rhizome, numerous grasslike leaves, and small lilac flowers in a spike-like raceme on a scape about as long as the leaves. Native to northeastern China.
- 113063 to 113069. *ASPARAGUS* spp. Convallariaceae.
113063. No. 238. From Pai Ling Miao, August 5, 1935.
113064. No. 239. From Temur Hada, August 7, 1935.
113065. No. 240. From Naran Obo, August 8, 1935.
113066. No. 241. From Temur Hada, August 18, 1935.
113067. No. 242. From Naran Obo, August 20, 1935.
113068. No. 243. From Khara Sair, August 27, 1935.
113069. No. 244. From Temur Hada, August 27, 1935.

113006 to 113270—Continued.

- 113070 to 113084. *ASTRAGALUS MELILOTOIDES* Pall. Fabaceae.
- Nos. 113070 to 113072 were collected near Temur Hada.
113070. No. 151. August 7, 1935.
113071. No. 153. August 11, 1935.
113072. No. 154. August 13, 1935.
113073. No. 155. From Khara Sair, August 19, 1935.
113074. No. 158. From Naran Obo, August 20, 1935.
113075. No. 159. From Khara Sair, August 23, 1935.
113076. No. 160. From Batu Khalkha, August 24, 1935.
- Nos. 113077 to 113080 were collected at Temur Hada, August 25, 1935.
113077. No. 161. 113079. No. 163.
113078. No. 162. 113080. No. 164.
- Nos. 113081 to 113084 were collected at Naran Obo, August 31, 1935.
113081. No. 165. 113083. No. 167.
113082. No. 166. 113084. No. 167-A.
113085. *ASTRAGALUS* sp. Fabaceae.
No. 187.
113086. *BERBERIS* sp. Berberidaceae.
No. 261. From Batu Khalkha, August 22, 1935.
113087. *BERBERIS* sp. Berberidaceae.
No. 203. From Chimiste Ula, August 3, 1935.
113088. *CALAMAGROSTIS PSEUDOPHRAGMITES* (Hall. f.) Koel. Poaceae. Reedgrass.
No. 247. From Khara Sair, August 14, 1935.
- 113089 to 113091. *CARAGANA* spp. Fabaceae.
113089. No. 183. From Pai Ling Miao, August 5, 1935.
113090. No. 184. From the steppe near Shara Muren, August 7, 1935.
113091. No. 186. From Temur Hada, July 30, 1935.
113092. *CLEMATIS* sp. Ranunculaceae.
No. 248. From the vicinity of Temur Hada, August 21, 1935.
113093. *CLEMATIS* sp. Ranunculaceae.
No. 249. From Khara Sair, August 23, 1935.
- 113094 to 113101. *COTONEASTER* spp. Malvaceae.
113094. *COTONEASTER RACEMIFLORA* (Desf.) Koch.
No. 227.
- Nos. 113095 to 113100 were collected at Batu Khalkha.
113095. *COTONEASTER* sp.
No. 220. Collected August 22, 1935.

113006 to 113270—Continued.

113096. *COTONEASTER* sp.
No. 221. Collected August 22, 1935.
113097. *COTONEASTER* sp.
No. 222. Collected August 24, 1935.
113098. *COTONEASTER* sp.
No. 223. Collected August 25, 1935.
113099. *COTONEASTER* sp.
No. 224. Collected August 26, 1935.
113100. *COTONEASTER* sp.
No. 225. Collected August 26, 1935.
113101. *COTONEASTER* sp.
No. 226. From Chimiste Ula, August 29, 1935.
- 113102 to 113153. *ELYMUS* spp. Poaceae.
- 113102 to 113123. *ELYMUS* *ANGUSTUS* Trin.
113102. No. 61. From Temur Hada, September 4, 1935.
Nos. 113103 to 113106 were from Bulugin Ama, September 4, 1935.
113103. No. 63.
113104. No. 64.
113105. No. 65.
113106. No. 68.
Nos. 113107 to 113111 were collected August 9, 1935.
113107. No. 70. From Ulan Obo.
113108. No. 71. From Olon Sumu.
113109. No. 72. From Ulan Obo.
113110. No. 73. From Ulan Obo.
113111. No. 74. From Ulan Obo.
113112. No. 76. From Khara Sair, August 13, 1935.
113113. No. 78. From Temur Hada, August 13, 1935.
113114. No. 80. From Bulugin Ama, August 19, 1935.
- Nos. 113115 to 113117 were collected at Khara Sair.
113115. No. 87—A. August 31, 1935.
113116. No. 83. August 23, 1935.
113117. No. 84. August 23, 1935.
113118. No. 266. From Ulan Obo, August 9, 1935.
113119. No. 33. From Bulugin Ama, August 15, 1935.
113120. No. 37. From Naran Obo, August 20, 1935.
113121. No. 39. From Batu Khalkha, August 22, 1935.
113122. No. 41. From Darkhan Wang Fu, August 28, 1935.
113123. No. 45. From Naran Obo, August 29, 1935.
113124. *ELYMUS* *DAHURICUS* Turcz.
No. 86. From Bulugin Ama, August 29, 1935.

113006 to 113270—Continued.

113125. *ELYMUS* *DASYSTACHYS* Trin.
[Received without notes.]
- 113126 to 113153. *ELYMUS* *PSEUDO-AGROPYRON* Trin.
113126. No. 36. From Bulugin Ama, August 19, 1935.
113127. No. 61—A. From Naran Obo, July 24, 1935.
- Nos. 113128 to 113131 were from Bulugin Ama, August 4, 1935.
113128. No. 62. 113130. No. 67.
113129. No. 66. 113131. No. 69.
113132. No. 77. From Khara Sair, August 13, 1935.
113133. No. 79. From Temur Hada, August 13, 1935.
113134. No. 82. From Naran Obo, August 22, 1935.
113135. No. 88. From Batu Khalkhin Gol, September 1, 1935.
113136. No. 2. From Shiretu Obo, August 6, 1935.
113137. No. 8. From Naran Obo, August 8, 1935.
113138. No. 26. From Darkhan Wang Fu, August 11, 1935.
113139. No. 34. From Hai Pa Tzu, August 16, 1935.
113140. No. 35. From Khara Sair, August 17, 1935.
113141. No. 38. From Naran Obo, August 21, 1935.
113142. No. 40. From Naran Obo, August 22, 1935.
113143. No. 40—A. From Khara Sair, August 23, 1935.
113144. No. 42. From Darkhan Wang Fu, August 27, 1935.
- Nos. 113145 and 113146 were from Mu Usu, August 27, 1935.
113145. No. 43. 113146. No. 44.
- Nos. 113147 and 113148 were from the steppe near Darkhan Wang Fu, August 30, 1935.
113147. No. 46. 113148. No. 47.
113149. No. 49. From Batu Khalkha, September 1, 1935.
- Nos. 113150 to 113152 were from Mu Usu, September 2, 1935.
113150. No. 53. 113152. No. 56.
113151. No. 55.
113153. [No number.] From the steppe near Olon Sumu, September 2, 1935.
- 113154 to 113156. *EPHEDRA* spp. Gneta-ceae.
113154. No. 200. From Naran Obo, August 11 and 12, 1935.
113155. No. 201. From Temur Hada, August 12, 1935.
113156. No. 202. From Shara Muren, August 14, 1935.

113006 to 113270—Continued.

113157 to 113164. *ERAGROSTIS* spp. Poaceae.

Nos. 113157 to 113162 were from Temur Hada.

113157 to 113159. *ERAGROSTIS PILOSA* (L.) Beauv.

113157. No. 102. August 21, 1935.

113158. No. 103. August 22, 1935.

113159. No. 106. August 27, 1935.

113160 to 113164. *ERAGROSTIS POAEIODES* (L.) Beauv.

113160. No. 101. August 21, 1935.

113161. No. 104. August 22, 1935.

113162. No. 105. August 22, 1935.

113163. No. 107. From Darkhan Wang Fu, August 27, 1935.

113164. No. 108. From Temur Hada. August 28, 1935.

113165. *FESTUCA* sp. Poaceae.

No. 129. From the vicinity of Pai Ling Miao, August 8, 1935.

113166 to 113168. *HORDEUM BREVISUBULATUM* (Trin.) Link. Poaceae.

A perennial grass native to Siberia.

113166. No. 126. From Batu Khalkha, August 8, 1935.

113167. No. 127. From Olon Sumu, August 9, 1935.

113168. No. 128. From Ulan Obo, August 9, 1935.

113169 and 113170. *HYOSCYAMUS NIGER* L. Solanaceae. Henbane.

Collected August 27, 1935, at Khara Sair.

113169. No. 269. 113170. No. 270.

113171. *INDIGOFERA* sp. Fabaceae.

No. 185. From Ulan Obo, August 25, 1935.

113172 to 113187. *IRIS* spp. Iridaceae.

113172 to 113180. *IRIS VENTRICOSA* Pall.

An Apogon iris with thick linear leaves about 1 foot long and a stem with usually two pale blue flowers, the falls narrow, with an obovate blade and lanceolate standards. Native to central Asia.

113172. No. 190. From Temur Hada. August 4, 1935.

113173. No. 191. From Pai Ling Miao, August 5, 1935.

113174. No. 192. From Darkhan Wang Fu, August 6, 1935.

113175. No. 194. From Naran Obo. August 16, 1935.

113176. No. 195. From Batu Khalkha, August 15-17, 1935.

113177. No. 196. From Mu Usu, August 27, 1935.

113178. No. 197. From Mu Usu, August 27, 1935.

113179. No. 198. From Batu Khalkha, August 28, 1935.

113006 to 113270—Continued.

113180. No. 199. From Darkhan Wang Fu, August 6, 1935.

113181. *IRIS* sp.

No. 184-A. From Darkhan Wang Fu, August 1935. A broad-leaved species.

Nos. 113182 to 113186; broad-leaved species collected at Bulugin Ama.

113182. *IRIS* sp.

No. 185-A. August 4, 1935.

113183. *IRIS* sp.

No. 186-A. August 10, 1935.

113184. *IRIS* sp.

No. 187-A. August 10, 1935.

113185. *IRIS* sp.

No. 188-A. August 10, 1935.

113186. *IRIS* sp.

No. 189. August 11, 1935.

113187. *IRIS* sp.

No. 193. From Darkhan Wang Fu, August 11, 1935.

113188 to 113191. *KOELERIA GRACILIS* Pers. Poaceae.

Nos. 113188 to 113191 were collected in the mountains near Batu Khalkha, August 15, 1935.

113188. No. 119. 113190. No. 121.

113189. No. 120. 113191. No. 122.

113192. *LONICERA* sp. Caprifoliaceae.

No. 252. From Chimiste Ula, August 3, 1935.

113193 and 113194. *MELICA SCABROSA* Trin. Poaceae.

113193. No. 90. From Pai Ling Miao, August 5, 1935.

113194. No. 100. August 28, 1935.

113195 to 113203. *MELICA VIRGATA* Turcz. Poaceae.

A perennial grass native to Siberia.

113195. No. 91. From Naran Obo, August 23, 1935.

Nos. 113196 to 113198 were collected at Batu Khalkha, August 24, 1935.

113196. No. 92. 113198. No. 94.

113197. No. 93.

113199. No. 95. From Naran Obo, August 25, 1935.

113200. No. 96. From Temur Hada, August 25, 1935.

113201. No. 97. From Batu Khalkha, August 25, 1935.

113202. No. 98. From Khara Sair, August 27, 1935.

113203. No. 99. From Naran Obo, August 28, 1935.

113204 to 113207. *MELILOTUS* spp. Fabaceae.

113204. No. 152. From Temur Hada, August 7, 1935.

113205. No. 154-A. From Shara Muren, August 15, 1935.

113006 to 113270—Continued.

- Nos. 113206 and 113207; from Khara Sair, August 19, 1935.
113206. No. 156. 113207. No. 157.
113208. *ONOBRYCHIS* sp. Fabaceae.
- No. 255. From a sandy slope beside the river road, August 7, 1935.
- 113209 and 113210. *PLANTAGO* spp. Plantaginaceae.
113209. No. 245. From Batu Khalkha, August 24, 1935.
113210. No. 246. From Temur Hada, August 24, 1935.
- 113211 to 113224. *POA* spp. Poaceae.
Bluegrass.
- 113211 to 113215. *POA SPHONDYLODES* Trin.
113211. No. 130. From Khara Sair, July 23, 1935.
- Nos. 113212 and 113213; from Darkhan Wang Fu, August 13-14, 1935.
113212. No. 131. 113213. No. 132.
- Nos. 113214 and 113215; from Batu Khalkha, August 15, 1935.
113214. No. 133. 113215. No. 134.
113216. *POA COMPRESSA* L.
- No. 135. From Naran Obo, August 16, 1935.
- 113217 to 113221. *POA SPHONDYLODES* Trin.
113217. No. 136. From Temur Hada, August 20, 1935.
113218. No. 137. From Naran Obo, August 21, 1935.
113219. No. 138. From Temur Hada, August 22, 1935.
- Nos. 113220 and 113221; from Batu Khalkha, August 22, 1935.
113220. No. 139. 113221. No. 140.
113222. *POA COMPRESSA* L.
- No. 141. From Batu Khalkha, August 24, 1935.
113223. *POA SPHONDYLODES* Trin.
- No. 142. From Naran Obo, August 25, 1935.
113224. *POA SUBFASTIGIATA* Trin.
- No. 143. From Naran Obo, August 25, 1935. A creeping perennial grass with stems over a foot high. Native to Siberia and Mongolia.
- 113225 to 113231. *PUCCINELLIA DISTANS* (L.) Parl. Poaceae.
- Nos. 113225 to 113229 were collected at Batu Khalkha.
113225. No. 143-A. August 29, 1935.
113226. No. 144. August 29, 1935.
113227. No. 145. August 9, 1935.
113228. No. 146. August 12, 1935.
113229. No. 147. August 12, 1935.
113230. No. 148.
113231. No. 149.

113006 to 113270—Continued.

- 113232 to 113234. *RHAMNUS* spp. Rhamnaceae.
- From Temur Hada.
113232. No. 233. August 29, 1935.
113233. No. 234. August 29, 1935.
113234. No. 235. September 2, 1935.
- 113235 to 113237. *RIBES* spp. Grossulariaceae.
113235. *RIBES* sp.
- No. 267. From Batu Khalkha, August 25, 1935.
113236. *RIBES* sp.
- No. 236. From Batu Khalkha, August 28, 1935.
113237. *RIBES* sp.
- No. 237. From Chimiste Ula, August 29, 1935.
- 113238 to 113247. *ROSA* spp. Rosaceae.
Rose.
- From Chimiste Ula, September 29, 1935.
113238. *ROSA* sp. 113243. *ROSA* sp.
- No. 204. No. 209.
113239. *ROSA* sp. 113244. *ROSA* sp.
- No. 205. No. 210.
113240. *ROSA* sp. 113245. *ROSA* sp.
- No. 206. No. 211.
113241. *ROSA* sp. 113246. *ROSA* sp.
- No. 207. No. 212.
113242. *ROSA* sp. 113247. *ROSA* sp.
- No. 208. No. 213.
113248. *RUMEX* sp. Polygonaceae.
- No. 265. Collected along the Batu Khalkha River near Temur Hada, August 12, 1935.
113249. *SETARIA VIRIDIS* (L.) Beauv. Poaceae.
- No. 150. From Khara Sair, August 27, 1935.
- 113250 to 113252. *SILENE* spp. Silenaceae.
113250. *SILENE* sp.
- No. 253. From Temur Hada, August 7, 1935.
- 113251 and 113252. *SILENE APRICA* Turcz.
113251. No. 264. From Temur Hada, August 25, 1935.
113252. No. 268. From Khara Sair, August 27, 1935.
- 113253 to 113265. *STIPA* spp. Poaceae.
Feathergrass.
- 113253 and 113254. *STIPA SIBIRICA* Lam.
- From Naran Obo, August 28 and 29, 1935.
113253. No. 113. 113254. No. 116.
- 113255 to 113262. *STIPA SPLENDENS* Trin.
- Nos. 113255 and 113256; from Naran Obo, August 20, 1935.
113255. No. 109. 113256. No. 110.

113006 to 113270—Continued.

113257. No. 111. From Temur Hada, August 21, 1935.
113258. No. 112. From Darkhan Wang Fu, August 25, 1935.
113259. No. 114. From Darkhan Wang Fu, August 28, 1935.
113260. No. 115. From Naran Obo, August 29, 1935.
113261. No. 117. From Darkhan Wang Fu, September 2, 1935.
113262. No. 118. From Bulugin Ama, September 4, 1935.
- 113263 to 113265. *STIPA* spp.
From Naran Obo.
113263. No. 123, August 20, 1935.
113264. No. 124, August 19, 1935.
113265. No. 125, August 25, 1935.
113266. *TRIPOGON CHINENSIS* (Franchet) Hack. Poaceae.
No. 263. From Batu Khalkha, August 25, 1935. A perennial grass up to 2 feet high. Native to northern China.
113267. *VICIA* sp. Fabaceae.
No. 258. From Bulugin Ama, August 10, 1935.
113268. *XANTHOCERAS SORBIFOLIA* Bunge. Sapindaceae.
- No. 262. From Shara Muren, August 20, 1935.
113269. (Undetermined.)
No. 250. From Batu Khalkha, August 25, 1935.
113270. (Undetermined.)
No. 256. From Khara Sair, August 23, 1935.

113271 to 113273. *FESTUCA* spp. Poaceae. Fescue.

From the Netherlands. Seeds presented by Dr. W. C. de Leeuw, Conservator. Botanisch Laboratorium, Leiden. Received November 29, 1935.

Introduced for Department specialists.

113271. *FESTUCA MARITIMA* L.
113272. *FESTUCA OVINA* L. Sheep fescue.
113273. *FESTUCA VARIA* Haenke.

113274. *TERMINALIA MUELLERI* Benth. Combretaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received December 9, 1935.

A native Australian species which, under favorable conditions, becomes a large tree with leathery, obovate leaves usually about 4 inches long, loose spikes of small white flowers, and small, ovoid, black fruits.

For previous introduction see 88324.

113275 to 113280.

From Manchuria. Seeds collected by the Asiatic Expedition. Received November 27, 1935.

Introduced for Department specialists.

113275 to 113280—Continued.

Nos. 113275 to 113279 were collected in August 1935 from the valley of the Gad River, Barga District.

113275 and 113276. *ELYMUS PSEUDO-AGROPYRON* Trin. Poaceae.

113275. No. 1. IV. From Mankou.

113276. No. 2. IV.

113277. *HEMEROCALLIS* sp. Liliaceae.

No. 5. IV.

113278. *IRIS DICHOTOMA* Pall. Iridaceae.
Vesper iris.

No. 3. IV.

For previous introduction see 112278.

113279. *IRIS ORIENTALIS* Mill. Iridaceae.

No. 4. IV.

113280. *MELILOTUS SUAVEOLENS* Ledeb. Fabaceae.
Sweetclover.

No. 6. IV. September 10, 1935, from Harbin.

113281 to 113288.

From Africa. Seeds presented by R. Andersen, Yapata Estate, Kitale Kenya Colony. Received November 30, 1935.

Introduced for Department specialists.

113281 and 113282. *CROTALARIA* spp. Fabaceae.

Upright plants found growing in grass plains.

113281. *CROTALARIA* sp.

113282. *CROTALARIA* sp.

113283. *ERIOSEMA* sp. Fabaceae.

113284. *INDIGOFERA* sp. Fabaceae.

113285. *TERAMNUS LABIALIS* (L.) Spreng. Fabaceae.

A plant found climbing over high grass.

For previous introduction see 99006.

113286. *VIGNA* sp. Fabaceae.

A slender vine found in open grass plains.

113287. (Undetermined.)

A leguminous vine.

113288. (Undetermined.)

A leguminous vine found among rocks in high grass.

113289. *PINUS EDULIS* Engelm. Pinaceae. Nut pine.

From Mexico. Seeds presented by Victor Riverole, Mexico City. Received December 4, 1935.

Introduced for Department specialists.

For previous introduction see 104162.

113290 to 113299. *HELENIUM* spp. Asteraceae.

From Germany. Plants purchased from Karl Foerster, Bornim-Potsdam-Saessouci. Received December 11, 1935.

Introduced for Department specialists.

113290. *HELENIUM BIGELOVII* A. Gray.

Superbum, a large brown-flowered variety.

113290 to 113299—Continued.

113291. HELENIUM.
Chipperfeld orange. A tall hybrid with long-blooming orange flowers.
113292. HELENIUM.
Coccineum bruneum. A tall hybrid with deep reddish-brown flowers.
113293. HELENIUM.
Crimson Beauty. A short hybrid with bronze-carmine flowers.
113294. HELENIUM.
Goldene Jugend. A tall hybrid with yellow flowers.
113295. HELENIUM.
Baronin Linden. A tall hybrid with golden-brown flowers.
113296. HELENIUM.
Moerheim Beauty. A dwarf hybrid with bright red-brown flowers.
113297. HELENIUM.
Peregrina. A tall hybrid with dark-brown flowers.
113298. HELENIUM AUTUMNALE L.
Pumilum magnificum. A dwarf variety with golden-yellow flowers.
113299. HELENIUM.
Wyndley. A dwarf hybrid with brown flowers.

113300 to 113391.

From China. Seeds collected in Suiyuan Province by the Asiatic Expedition. Received November 15, 1935.

Introduced for Department specialists.

Nos. 113300 to 113391 were collected as cultivated plants in August and September 1935.

113300. ABRUS PRECATORIUS L. Fabaceae.
Rosary-pea.
No. 281 [62].
113301. ALLIUM FISTULOSUM L. Liliaceae.
Welsh onion.
No. 331.
113302. ALLIUM sp. Liliaceae.
No. 329.
113303. AMARANTHUS PANICULATUS L. Amaranthaceae.
Tassel amaranth.
No. 301. The seed is roasted or popped, ground into meal, and made into sweet cakes; the meal is also eaten with sugar and milk.
For previous introduction see 97713.
113304. APIUM GRAVEOLENS L. Apiaceae.
Celery.
No. 287 [41].
113305. AVENA NUDA Hoejer. Poaceae.
Naked oats.
No. 340 [5].
113306. BETA VULGARIS L. Chenopodiaceae.
Common beet.
No. 323 [59].
- 113307 to 113314. BRASSICA spp. Brassicaceae.
113307. BRASSICA CHINENSIS Jusl.
No. 312 [35]. A variety which does not form a head.
For previous introduction see 80580.

113300 to 113391—Continued.

113308. BRASSICA PEKINENSIS (Lour.) Rupr.
No. 303 [37].
- 113309 to 113314. BRASSICA spp.
113309. No. 309 [38].
113310. No. 311 [13].
113311. No. 314 [39].
113312. No. 327 [36].
113313. No. 335 [60].
113314. No. 342 [40].
113315. CANNABIS SATIVA L. Moraceae.
No. 337 [11].
113316. CAPSICUM ANNUM L. Solanaceae.
Common redpepper.
No. 325 [53].
- 113317 to 113324. CARAGANA spp. Fabaceae.
113317. No. 169.
Nos. 113318 to 113323; from Shara Murten, August 15, 1935.
113318. No. 174. 113321. No. 177.
113319. No. 175. 113322. No. 178.
113320. No. 176. 113323. No. 179.
113324. No. 182. From Batu Khalkha, August 31, 1935.
113325. CHRYSANTHEMUM CORONARIUM L. Asteraceae.
Crowndaisy.
No. 286 [63]. An edible chrysanthemum, the leaves of which are used as a garnish, as flavoring, and also cooked as spinach.
For previous introduction see 80651.
113326. CITRULLUS VULGARIS Schrad. Cucurbitaceae.
No. 289 [26].
113327. CORIANDRUM SATIVUM L. Apiaceae.
Coriander.
No. 295 [58].
For previous introduction see 109057.
- 113328 to 113333. CUCUMIS MELO L. Cucurbitaceae.
Muskmelon.
113328. No. 283 [30].
113329. No. 288 [25].
113330. No. 294 [33].
113331. No. 300-a [29].
113332. No. 320 [27].
113333. No. 334 [28].
113334. CUCUMIS SATIVUS L. Cucurbitaceae.
Cucumber.
No. 344 [34].
113335. CUCURBITA MOSCHATA Duchesne. Cucurbitaceae.
Cushaw.
No. 300 [31].
113336. CUCURBITA PEPO L. Cucurbitaceae.
Pumpkin.
No. 302 [32].
- 113337 and 113338. DAUCUS CAROTA L. Apiaceae.
Carrot.
113337. No. 304 [48].
113338. No. 336 [49].

113300 to 113391—Continued.

- 113339 to 113343. *ELYMUS* spp. Poaceae.
 113339 and 113340. *ELYMUS* *ANGUSTUS* Trin.
 113339. No. 27. From Darkhan Wang Fu, August 31, 1935.
 113340. No. 29. From Darkhan Wang Fu, September 1, 1935.
 113341. *ELYMUS* *DASYSTACHYS* Trin.
 No. 15. From Bulugin Ama, August 12, 1935.
 113342. *ELYMUS* *ANGUSTUS* Trin.
 No. 21. From Bulugin Ama, August 19, 1935.
 113343. *ELYMUS* *PSEUDO-AGROPYRON* Trin.
 No. 25. From Darkhan Wang Fu, August 24, 1935.
 113344 and 113345. *FAGOPYRON* *ESCULENTUM* Moench. Polygonaceae. Buckwheat.
 113344. No. 278. From the village of Hai Pa Tzu, August 15, 1935.
 113345. No. 297.
 113346. *FOENICULUM* *VULGARE* Hill. Apiaceae. Fennel.
 No. 292 [56].
 113347. *HELIANTHUS* *ANNUUS* L. Asteraceae. Sunflower.
 No. 280 [61].
 113348. *HORDEUM* *DISTICHON* *NUDUM* L. Poaceae. Two-rowed barley.
 No. 332 [2].
 113349 and 113350. *INDIGOFERA* spp. Fabaceae.
 From Ulan Obo, August 8, 1935.
 113349. No. 171 [739].
 113350. No. 172 [739].
 113351 to 113353. *LACTUCA* *SATIVA* L. Cichoriaceae. Garden lettuce.
 113351. No. 315.
 113352. No. 316.
 113353. No. 333 [45].
 113354 and 113355. *LENS* *ESCULENTA* Moench. Fabaceae. Lentil.
 113354. No. 276. From Hai Pa Tzu, August 15, 1935.
 113355. No. 339-A.
 113356. *LINUM* *USITATISSIMUM* L. Linaceae. Flax.
 No. 341.
 113357. *MEDICAGO* *SATIVA* L. Fabaceae. Alfalfa.
 No. 318 [64].
 113358. *NITRARIA* *SCHOBERI* L. Zygophyllaceae.
 No. 271 [803]. From Darkhan Wang Fu, August 22, 1935.
 113359. *ONOBRYCHIS* sp. Fabaceae.
 No. 173. From Shara Muren, August 15, 1935.
 113360. *ORYZA* *SATIVA* L. Poaceae. Rice.
 No. 310.

113300 to 113391—Continued.

- 113361 to 113364. *PANICUM* *MILIACEUM* L. Poaceae. Millet.
 113361. No. 275. From Hai Pa Tzu, August 15, 1935.
 113362. No. 285 [3].
 113363. No. 307.
 113364. No. 319 [4].
 113365 to 113368. *PHASEOLUS* spp. Fabaceae.
 113365. *PHASEOLUS* *ANGULARIS* (Willd.) W. F. Wight. Adzuki bean.
 No. 284 [23].
 113366. *PHASEOLUS* *AUREUS* Roxb. Mung bean.
 No. 321 [19].
 113367. *PHASEOLUS* *VULGARIS* L. Common bean.
 No. 305.
 113368. *PISUM* *SATIVUM* L. Fabaceae. Pea.
 No. 338 [22].
 113369 to 113371. *PSORALEA* spp. Fabaceae.
 From Shara Muren, August 1935.
 113369. No. 183. 113371. No. 170.
 113370. No. 168.
 113372 to 113376. *RAPHANUS* *SATIVUS* L. Brassicaceae. Radish.
 113372. No. 282 [46].
 113373. No. 293 [50].
 113374. No. 296 [47].
 113375. No. 298 [51].
 113376. No. 299 [52].
 113377 and 113378. *RHAMNUS* spp.
 113377. No. 272. 113378. No. 273.
 113379. *SECALE* *CEREALE* L. Poaceae. Rye.
 No. 274. From Hai Pa Tzu, August 15, 1935.
 113380. *SESAMUM* *ORIENTALE* L. Pedaliaceae. Sesame.
 No. 343 [14].
 113381 and 113382. *SOJA* *MAX* (L.) Piper. Fabaceae. Soybean.
 113381. No. 313 [17].
 113382. No. 317 [18].
 113383. *SOLANUM* *MELONGENA* L. Solanaceae. Eggplant.
 No. 326 [55].
 113384. *SORGHUM* *VULGARE* Pers. Poaceae. Sorghum.
 No. 291 [15].
 113385. *SPINACIA* *OLERACEA* L. Chenopodiaceae. Common spinach.
 No. 290 [42].
 113386 and 113387. *TRITICUM* *AESTIVUM* L. Poaceae. Common wheat.
 113386. No. 277.
 113387. No. 324 [1].

113300 to 113391—Continued.

113388. *VICIA FABA* L. Fabaceae. Broadbean.
No. 308 [16].
113389. *VICIA* sp. Fabaceae.
No. 181. From Naran Obo, August 28, 1935.
113390. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.
No. 322 [21].
113391. *ZEA MAYS* L. Poaceae. Corn.
No. 339 [8].
- 113392 to 113398. *TRITICUM* spp. Poaceae. Wheat.

From England. Seeds presented by Dr. John Percival, University College, Reading. Received December 4, 1935.

Introduced for Department specialists.

113392. *TRITICUM* sp.
No. 1N1. Received as *orientale insigne*, a homonym.
113393. *TRITICUM* sp.
No. 2N4. Received as *orientale notabile*, a homonym.
113394. *TRITICUM* sp.
No. 4P1. Received as *pyramidale capticum*, a homonym.
113395. *TRITICUM* sp.
No. 5P4. Received as *pyramidale pseudo-capticum*, a homonym.
113396. *TRITICUM* sp.
No. 7P1. Received as *pyramidale ptolomaeum*, a homonym.
113397. *TRITICUM* sp.
No. 1P1. "White Saidi." Received as *pyramidale recognitum*, a homonym.
113398. *TRITICUM* sp.
No. 1P2. Received as *pyramidale recognitum*, a homonym.

113399 and 113400. *CYNARA SCOLYMUS* L. Asteraceae. Artichoke.

From New York. Seeds presented by Carmelo Caporaso, Brooklyn, N. Y., through W. R. Beattie, Bureau of Plant Industry. Received December 9, 1935.

Introduced for Department specialists.

113399. No. 1. *Globe* artichoke.
113400. No. 2. *Villarosa* artichoke, a variety which is said to come true from seed.

113401 to 113403. *VITIS VINIFERA* L. Vitaceae. European grape.

From Italy. Cuttings presented by Prof. G. Delmaso, R. Stazione Sperimentale di Viticolo-Enologica, Conegliano. Received December 16, 1935.

Introduced for Department specialists.

113401. *Aglianico*. 113403. *Grillo*.
113402. *Grignolino*.

113404 to 113415. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

From Canada. Scions presented by Dr. W. H. Upshall, Vineland Station, Ontario. Received December 16, 1935.

Scions from crosses between trees of McIntosh and Spy and from open-pollinated trees of Spy; introduced for Department specialists.

| 113409. 3-35-7. | 113415. 3-31-11. |

113416. *VERNONIA JAVANICA* (Blume) DC. Asteraceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received December 12, 1935.

Introduced for Department specialists.

Seeds presented to the Atkins Institution by the Botanic Gardens, Singapore, Straits Settlements. A tropical tree with elliptic, long-petioled leaves and numerous small purple flower-heads in terminal corymbs. Native to Java.

113417. *ASPARAGUS PSEUDOSCARBER* Grecescu. Convallariaceae.

From Germany. Seeds purchased from Wilhelm Pfitzer, Stuttgart. Received December 10, 1935.

Introduced for Department specialists.

A hardy ornamental asparagus similar to *Asparagus plumosus nanus*. Native to Rumania.

113418 to 113435. *ORYZA SATIVA* L. Poaceae. Rice.

From Japan. Seeds presented by K. Nakata, Kyushu Imperial University, Department of Agriculture, Laboratory of Plant Pathology, Fukuoka. Received December 5, 1935.

Local strains from Chosen; introduced for Department specialists.

 113434. No. 554. *Butamochi-to*.
 113435. No. 557. *Nishikimochi*.

113436 to 113440.

From New Zealand. Seeds presented by A. S. Paterson & Co., Ltd., Dunedin. Received December 5, 1935.

Introduced for Department specialists.

113436 to 113439. *LOLIUM PERENNE* L. Poaceae. Perennial ryegrass.

113436. No. HB-356B; certified Mother Ryegrass.

Nos. 113437 to 113439; certified Permanent Pasture Ryegrass.

113437. No. CO-5-S1.

113438. No. 2833.

113439. No. 2874.

113440. *TRIFOLIUM REPENS* L. Fabaceae. White clover.

No. HB-690. Certified white clover.

113441 to 113448. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received December 18, 1935.

Collected in the Departamento de Antioquia; introduced for Department specialists.

113441. No. 31. *Medellin*. From Damascus. November 16, 1935.

113442. No. 32. *Tachuelo*. From Santa Barbara, November 17, 1935.

113443. No. 33. *Tachuelo* or *Caucano* (?) From Santa Barbara, November 18, 1935.

113444. No. 34. From Medellin, November 20, 1935.

113445. No. 36. *Zapatoca*. From Amagá, November 26, 1935.

113446. No. 37. *Zapatoca*. From Amagá, November 26, 1935.

113447. No. 38. *Boliviano*. From Amagá, November 26, 1935.

113448. No. 39. *Cordoncillo*. From Amagá, November 26, 1935.

113449 and 113450. *GOSSYPIUM* SPP. Malvaceae. Cotton.

From Colombia. Seeds presented by the American consul, Buenaventura. Received December 16, 1935.

Wild cotton from Colombia; introduced for Department specialists.

113449. *GOSSYPIUM EVERTUM* O. F. Cook and J. W. Hubbard.

113450. *GOSSYPIUM TRIDENS* O. F. Cook and J. W. Hubbard.

113451 to 113462.

From the Union of Soviet Socialist Republics. Plants presented by the Institute of Plant Industry, Leningrad. Received December 18, 1935.

113451 to 113462—Continued.

Introduced for Department specialists.

113451 to 113458. *AMYGDALUS* spp. Amygdalaceae.

113451. *AMYGDALUS DAVIDIANA* (Carr.) Zabel. Chinese wild peach.
 No. 02117.

113452 to 113456. *AMYGDALUS PERSICA* L. Peach.

113452. No. 453. *Rogani-gov*.

113453. No. 343. *Blindchatyi*, *Fiat peach*.

113454. No. 1355. *Ferganensis* 59.

113455. No. 02446. *Ferganensis*, white-fleshed.

113456. No. 808. *Ferganensis*, yellow-fleshed.

113457 and 113458. *AMYGDALUS PERSICA NECTARINA* Ait. Nectarine.

113457. No. 595. A red nectarine.

113458. No. 597.

113459. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

No. 838.

113460. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

No. 595. *Badam*.

113461. \times *PRUNUS DASYCARPA* Ehrh. Amygdalaceae. Plum-apricot.

113462. *AMYGDALUS COMMUNIS* \times *PERSICA*. Amygdalaceae.

No. 895. An almond \times peach hybrid.

113463. *HYACINTHUS ORIENTALIS* L. Liliaceae. Common hyacinth.

From India. Bulbs purchased from Mrs. P. Kohli, Baramula. Received December 24, 1935.

Introduced for Department specialists.

For previous introduction see 14790.

113464 to 113466. *TULIPA* SPP. Liliaceae. Tulip.

From India. Bulbs presented by Mrs. P. Kohli, Baramula. Received December 24, 1935.

Introduced for Department specialists.

113464. *TULIPA CHRYSANTHA* Boiss.

A dwarf tulip with strap-shaped leaves and a stem about 8 inches high, bearing a star-shaped flower, yellow within, flushed red without. Native to central Asia.

113465. *TULIPA LANATA* Regel.

For previous introduction see 107589.

113466. *TULIPA STELLATA* Hook.

This species from the temperate Himalayas is almost a counterpart of the common *Tulipa clusiana*, differing chiefly in the yellow basal star.

For previous introduction see 51113.

113467 to 113484. *MALUS* spp. Malaceae.

From Canada. Scions presented by N. B. Davis, Dominion Horticulturist, Central Experimental Farm, Ottawa. Received December 24, 1935.

113467 to 113484—Continued.

Introduced for Department specialists.

- 113467 to 113470. *MALUS BACCATA* (L.) Moench. Siberian crab apple.
 113467. C. E. F.
 113468. No. 28-53 (N. 7525).
 113469. No. 28-54 (N. 7526).
 113470. No. 10-11 (N. 2648).

113471. *MALUS* sp.
 No. 10-7 (2749).

113472 to 113481. *MALUS SYLVESTRIS* Mill. Apple.

113472. No. 41-1. *Anis*.
 113473. No. 44-4. *Antonovka*.
 113474. No. 37-13. *Hibernal*.

113482 to 113484. *MALUS* spp.

113482. No. 2-21. *Columbia*, a crab apple.
 113483. No. 35-30. *McPrince*, a crab apple.
 113484. No. 1-95. *Osman*, a crab apple.

113485 to 113494. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenzholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received December 10, 1935.

Introduced for Department specialists.

113485. *Baldwin*, No. C. 6398.
 113486. *Bencubbin*.
 113487. *Bordan*.
 113488. *Daphne*.

 113494. *Totadgin*.

113495 to 113501. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received December 26, 1935.

Introduced for Department specialists.

113495. No. 35. *Zapatoca*. From Amagá, Antioquia, November 25, 1935.
 113496. No. 40. *Girón*. Received December 9, 1935, from Garrucha, Manizales.

113495 to 113501—Continued.

113497. No. 41. *Puntelanza*. Received December 9, 1935, from Farraliso, Manizales.
 113498. No. 42. Piño. Received December 5, 1935, from Farraliso, Manizales.
 113499. No. 43. *Zapatoca*. Received December 9, 1935, from Cabaña, Manizales.
 113500. No. 44. *Punta da lanza*. Received December 9, 1935, from La Loma, Salamina, Caldas.
 113501. No. 45. A mixed sample of *Repollo* and *Brazo negro*. Received December 9, 1935, from Chamberí, Salamina, Caldas.

113502. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Mexico. Seeds presented by A. S. Sharpton, District of Ciudad del Maiz, San Luis Potosi, at the request of W. A. Archer, Bureau of Plant Industry, through Edmund B. Montgomery, American consul, San Luis Potosi. Received December 28, 1935.

Introduced for Department specialists.

113503 to 113505.

From Ibarra Province, Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received November 22, 1935.

Introduced for Department specialists.

113503 and 113504. *JUBAEA CHILENSIS* (Molina) Baill. Phoenicaceae. Sirup palm.

A slow-growing, ornamental Chilean palm, 40 feet high, with a very robust trunk 4 or 5 feet in diameter, thriving in open places and enduring long periods of drought. The pinnate leaves are 6 to 12 feet long, and the seeds, like small coconuts, an inch in diameter with an edible kernel, have become important in recent years as an article of export.

For previous introduction see 110612.

113503. No. 7383.

113504. No. 7395.

113505. *PARAJUBAEA COCIDES* Burret. Phoenicaceae. Palm.

No. 7385. A rather large handsome palm, first described in 1930, somewhat resembling *Jubaea*, but more slender and graceful, the trunk a foot or more in diameter at base, straight and erect, tapering slightly, the leaves closely and regularly pinnate, and the nuts, larger than those of *Jubaea*, have thicker, rougher shells, pointed at the end and contain oily edible kernels.

113506 and 113507.

From France. Seeds presented by A. Gerard, La Fosse par Montoire sur Loir, Loir-et-cher. Received December 24, 1935.

Introduced for Department specialists.

113506. *ABIES VENUSTA* (Douglas) K. Koch. Pinaceae. Fir.113507. *DAVIDIA INVOLUCRATA* VILMORINIAN, (Dode) Hemsl. Cornaceae. Dovetree.

For previous introduction see 95372.

113508. ANNONA RETICULATA L. Annonaceae.
Custard-apple.

From Siam. Seeds presented by Mrs. W. Harding Kneeder, Chieng Mai. Received December 17, 1935.

Introduced for Department specialists.

An excellent variety with a thin skin, which makes it a poor shipper.

For previous introduction see 102623.

113509. TRICHILIA HIRTA L. Meliaceae.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received December 23, 1935.

An evergreen tree up to 60 feet high, with pinnately compound leaves of 11 to 21 obliquely ovate, glabrous leaflets and panicles 9 inches long of small greenish-white flowers. It is native to Mexico and the West Indies.

For previous introduction see 104665.

113510 and 113511. MYRCIARIA CAULIFLORA (Mart.) Berg. Myrtaceae.

Jaboticaba.

From Brazil. Seeds purchased from Dierberger & Co., São Paulo. Received December 26, 1935.

Introduced for Department specialists.

113510. Variety *Paulista*.

113511. Variety *Sabará*.

113512. PROSOPIS CHILENSIS VELUTINA (Wooton) Standl. Mimosaceae.

Mesquite.

From Arizona. Seeds presented by C. J. King, United States Cooperative Testing Station, Sacaton. Received October 10, 1935.

Introduced for Department specialists.

A shrub or tree up to 18 feet high, usually distinguishable from the type by the small pubescent leaflets. Native to the southwestern United States and Mexico.

INTRODUCTORY STATEMENT

This inventory, No. 126, records the plant material received by the Division of Plant Exploration and Introduction during the period from January 1 to March 31, 1936 (Nos. 113513 to 114313).

The botanical determinations of seeds have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., June 24, 1939.

INVENTORY¹

NOTE.—This inventory is a historical record of plant material introduced for Department and other specialists. It is not to be considered as a list of plant material for distribution.

113513. PINNELLIA TERNATA (Thunb.) Brent. Araceae.

From China. Bulbs collected by Peter Liu, near Peiping. Received January 7, 1936.

A hardy bulbous perennial closely related to the arums, with three-parted leaves; the oblong-elliptic leaflets are about 3 inches long. Native to eastern China.

113514 to 113516.

From Egypt. Seeds presented by the Horticultural Section, Ministry of Agriculture, Giza. Received January 7, 1936.

Native Egyptian types.

113514. *APIUM GRAVEOLENS* L. Apiaceae.
Celery.

113515. *DAUCUS CAROTA* L. Apiaceae.
Carrot.

113516. *LYCOPERSICON ESCULENTUM* Mill.
Solanaceae. Tomato.

113517 to 113519.

From the Union of Soviet Socialist Republics. Seeds presented by the Department of New Cultures and Introduction, Institute of Plant Industry of the Lenin Academy of Agricultural Sciences, Leningrad. Received January 7, 1936.

113517. *AGROPYRON SIBIRICUM* (Willd.)
Beauv. Poaceae. Grass.

No. 1141. From Kazakstan, Turkistan.

113518. *CAREX PHYSODES* Bieb. Cyperaceae.

No. 141031. From Turkistan.

113517 to 113519—Continued.

113519. *IXIOLIRION TATARICUM* (Pall.) Herbert. Amaryllidaceae.

No. 141576. From Repetek, Turkistan. A bulbous perennial, native from the Caucasus through central Asia, with awl-shaped leaves and terminal umbels of deep-blue or violet lilylike flowers, which are borne in the spring.

For previous introduction see 107935.

113520 to 113523. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Hungary. Seeds presented by Dr. Bela Husz, Budapest. Received January 9, 1936.

A collection of winter wheats.

113520. No. B-1201. 113522. No. B-1205.

113521. No. B-1005. 113523. *Prolific*.

113524 to 113534.

From the Soviet Union. Plants presented by the Department of New Cultures and Introduction, Institute of Plant Industry of the Lenin Academy of Agricultural Science, Leningrad. Received January 10, 1936.

113524 to 113533. *PRUNUS ARMENIACA* L.
Amygdalaceae. Apricot.

113524. *Arzami*.

113525. *Badami*.

113526. *Badem-Erik*.

113527. *Baradjali*.

113528. *Geogdjanabad*.

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identifications, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

113524 to 113534—Continued.

113529. *Kandak*.113530. *Khurma*.113531. *Kisil-mirsandjali*.113532. *Mirsandjali*.113533. *Spitak*.113534. × *PRUNUS DASYCARPA* Ehrh.
Amygdalaceae. Plum-apricot.No. 2489. *Flor Tsiran*.113535. *CITRUS GRANDIS* (L.) Osbeck.
Rutaceae. Grapefruit.

From Mexico. Bud sticks presented by F. W. Smith, Guasave, Sinaloa. Received January 13, 1936.

A pink-fleshed variety.

113536. *GOSYPIUM*. Malvaceae.
Cotton.

From Puerto Rico. Seeds presented by a Mr. McCubbin, San Juan. Received January 3, 1936.

113537 and 113538. *PASSIFLORA* spp.
Passifloraceae.

From Australia. Seeds presented by J. Haseley, Punchbowl, New South Wales. Received January 10, 1936.

113537. *PASSIFLORA EDULIS* Sims.
Purple granadilla.

From Norfolk Island, New South Wales. This is the principal commercial passion fruit of the island, but it is killed back to the roots by temperatures of 24° to 17° F.

113538. *PASSIFLORA MOLLISSIMA* (H. B. K.)
Bailey. Softleaf passionflower.

A climbing plant that produces ovate, pointed, yellow acid fruits of excellent quality.

For previous introduction see 106448.

113539. *EUPHORBIA LOPHOGONA* Lam.
Euphorbiaceae.

From Madagascar. Plants presented by Miss Beryla Rafeaver. Received September 24, 1935. Numbered in January 1936.

A small erect spineless succulent with persistent stipules on the stem which is woody at the base, deep-green obovate leaves up to 8 inches long, and cymes with small white to pinkish bracts. Native to Madagascar.

113540 to 113542. *RIBES* spp. Grossu-
lariaceae.

From the Soviet Union. Plants presented by the Minchurinsk Experiment Station. Received January 6, 1936.

113540 and 113541. *RIBES PETRAEUM ATRO-
PURPUREUM* (C. A. Mey.) Jancz.

A variety with red or blackish purple fruit. Native to central Asia.

113540. No. 2. 113541. No. 3.

113542. *RIBES CYATHIFORME* Pojark.

No. 116-R. A wild black currant native to the mountains of central Asia.

113543 and 113544. *TRIPTYERYGIUM* spp.
Celastraceae.

From China. Cuttings collected by Peter Liu, in Chekiang Province. Received January 2, 1936.

Lei Kung T'eng. A handsome shrub conspicuous chiefly for its large bright-green foliage, contrasting well with the reddish brown stems terminated in July and August by conspicuous panicles of small, whitish, fragrant flowers.

113543. From near Erh Shih Pa Tu in Yi Wu District.

113544. From near Shih Hsia K'ou in Chuki District.

113545. *PINANGA* sp. Phoenicaceae.

From the Philippine Islands. Seeds presented by David Barry & Co., Los Angeles, Calif. Received January 6, 1936.

113546 to 113549. *FRAGARIA VESCA* L.
Rosaceae. Alpine strawberry.

From England. Plants purchased from George Bunyard & Co., Ltd., the Royal Nurseries, Maidstone. Received January 2, 1936.

113546. *Alpine Improved Red*.113547. *Belle De Meaux*.113548. *Bush White*.113549. *Common White*.113550 and 113551. *SOLANUM* spp. Sol-
anaceae.

From the Union of South Africa. Seeds presented by Dr. A. P. D. McLean, Natal Herbarium, Durban. Received January 10, 1936.

113550. *SOLANUM DUPLO-SINUATUM* Klotzsch.

A spiny shrub 3 to 6 feet high, with large sinuate leaves and few-flowered cymes of bell-shaped blue flowers about 1½ inches across. Native to tropical Africa.

113551. *SOLANUM INCANUM* L.

A tender evergreen shrub up to 5 feet high, with ovate to ovate-elliptic leaves and showy, nodding purple flowers, solitary or few-clustered. Native to eastern Africa and southern Asia.

113552. *TRIFOLIUM REPENS* L. Fabaceae.
White clover.

From England. Seeds presented by Gartons Ltd. Warrington. Received January 11, 1936.

Kent Wild white clover.113553 and 113554. *PHALARIS* spp. Po-
aceae.

From South Australia. Seeds presented by the Waite Agricultural Research Institute, Glen Osmond. Received January 2, 1936.

113553. *PHALARIS COERULESCENS* Desf.
Canary grass.113554. *PHALARIS TUBEROSA* L.
Toowoomba canary grass.

113555 to 113558.

From Hungary. Seeds presented by Dr. Bela Husz, Budapest. Received January 8, 1936.

113555 and 113556. *LINUM USITATISSIMUM* L. Linaceae. Flax.

113555. Oil flax.

113556. Fiber flax.

113557 and 113558. *TRITICUM AESTIVUM* L. Poaceae. Wheat.

113557. No. 5512. Winter wheat.

113558. No. 5542. Winter wheat.

113559 to 113563. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received January 21, 1936.

Collected in the Departamento Tolima, January 11, 1936.

113559. No. 59. A sample containing *Costillo negro*, *Costillo blanco*, and *Pina*, from Armero.

113560. No. 60. A sample containing *Costillo negro*, *Costillo blanco*, *Pina*, and others, from Rastrojos.

113561. No. 61. A field sample containing *Costillo negro*, *Costillo blanco*, *Pina*, and others from Rastrojos.

113562. No. 62. *Ambalema*. From Estación Agrícola de Armero.

113563. No. 63. *Ambalema*. From Estación Agrícola de Armero.

113564. *XYLOSMA FLEXUOSA* (H. B. K.) Hemsl. Flacourtiaceae.

From Texas. Seeds presented by Peter Heinz, Brownsville. Received January 17, 1936.

Hutchichitelmel. A shrub or small tree up to 20 feet high, with glabrous leaves and numerous fragrant flowers followed by small dark-red fruits, about one-fourth inch in diameter. The fruits are very conspicuous and numerous, covering the entire plant, making a more attractive appearance than holly. This plant is cultivated as an ornamental in San Luis Potosi, Mexico.

113565 to 113578.

From the Union of South Africa. Seeds purchased from the Winton Nurseries, Bonnie Vale, Cape Province. Received January 13, 1936.

113565. *ANTHERICUM FALCATUM* L. f. Liliaceae.

A herbaceous perennial with linear radical leaves about 1 foot long and many small white vanilla-scented flowers in lax racemes. Native to South Africa.

113566. *FERRARIA OBTUSIFOLIA* Sweet. Iridaceae.

A densely bunched bulbous plant about 1 foot high, with short, sword-shaped leaves and a corymb of showy brownish-purple, fringed flowers. Native to South Africa.

113567. *GLADIOLUS BLANDUS* Ait. Iridaceae.

A South African gladiolus with sword-shaped leaves somewhat shorter than the stem, which is from 6 to 24 inches in

113565 to 113578—Continued.

height and which bears 3 to 10 white or reddish tinted scentless flowers, each over an inch long.

For previous introduction see 106737.

113568. *GLADIOLUS CALLISTUS* Bolus f. Iridaceae.

A plant 30 to 40 inches high, with 4 to 7 narrow sword-shaped leaves 1 to 2 feet long and 2 stem leaves. The flowers, white suffused with pink and 9 to 12 in number, are produced on 1 to 3 branches.

For previous introduction see 105286.

113569. *IXIA PANICULATA TENUIFLORA* (Vahl) Baker. Iridaceae.

A South African ixia with several linear basal leaves up to 18 inches long and many creamy-white flowers, the segments about 1 inch long. The lax erect spikes on stems 1 to 3 feet high are sometimes branched.

113570 to 113574. *GLADIOLUS* spp. Iridaceae.

113570. *GLADIOLUS GRACILIS* Jacq.

A plant with about three rigid, subterete leaves a foot or less long and very slender stems up to 2 feet high, bearing two to six pale-lilac, scentless flowers in a lax second spike. Native to South Africa.

For previous introduction see 105288.

113571. *GLADIOLUS GRANDIS* Thunb.

Closely related to *Gladiolus tristis*, this has three strongly terete leaves 12 to 18 inches long and a slender stem up to 2 feet high. The purplish, brown-tinted flowers are 2 to 3 inches long, in a lax second spike. Native to the Cape of Good Hope.

For previous introduction see 105289.

113572. *GLADIOLUS PERMEABILIS* Delar.

A South African gladiolus of the Hebea group, with firm narrow-linear or subterete leaves up to a foot long, and a slender flexuose stem about as long bearing 6 to 12 pale-pink or lilac flowers in lax simple or branched spikes.

113573. *GLADIOLUS PULCHELLUS* Klatt.

A South African gladiolus with a simple or branched stem about 1 foot high and 4 to 8 pinkish-purple, highly scented flowers in a lax spike, the upper segments long clawed.

113574. *GLADIOLUS UNDULATUS* Jacq.

A bulbous plant with a stem a foot high, including the spike and several sword-shaped leaves about a foot long. The four to six flowers are milk white marked with red and are produced in a very lax spike. Native to South Africa.

For previous introduction see 44728.

113575. *HESPERANTHA* sp. Iridaceae.

A species with white, star-shaped flowers.

113576. *HOMERIA ELEGANS* (Jacq.) Sweet. Iridaceae.

A bulbous plant with a single linear leaf about 1 foot long and a stem about as long, with one to four clusters of showy bright-yellow flowers, the outer segments heavily blotched with a maroon or greenish mark in the center. Native to South Africa.

113565 to 113578—Continued.

113577. *LAPEYROUSIA FISSIFOLIA* (Jacq.) Ker-Gawl. Iridaceae.

A summer-flowering bulbous plant with a short stem, flat linear leaves, and showy dark-violet to whitish flowers on a leafy spike. Native to South Africa.

113578. *TULBAGHIA CEPACEA* L. f. Liliaceae.

A herbaceous perennial with 4 to 6 narrow-linear radical garlic-scented leaves and a scape a foot high, bearing an umbel of 6 to 12 small lilac flowers. Native to South Africa.

113579 to 113590. *NICOTIANA TABACUM* L. Solanaceae.

From Guatemala. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 22, 1936.

113579. No. 3646. Volunteer plants collected November 23, 1935, at Patzún, Departamento Chimaltenango.

113580 to 113583. Collected November 24, 1935, at Santa Cruz Quiche, Departamento Quiche.

113580. No. 3647. *Criollo*.

113581. No. 3648. *Criollo*.

113582. No. 3649. *Bobo*.

113583. No. 3650. *Virginia*.

113584. No. 3651. Collected November 25, 1935, at Tecpan, Departamento Chimaltenango.

113585. No. 3652. Cultivated tobacco; collected November 25, 1935, near Patzicia, Departamento Chimaltenango.

113586 to 113588. Cultivated tobacco; collected November 26, 1935, at Guatemala City.

113586. No. 3653. *Olopo*.

113587. No. 3654. *Punta de Lanzo*.

113588. No. 3655. *Cubano*.

113589. No. 3656. A mixed sample of cultivated tobacco collected January 5, 1936, at Zacapa.

113590. No. 3658. *Punta de Lanza*. Cultivated tobacco collected January 6, 1936, at Zacapa.

113591 and 113592. *MALUS* spp. Malaceae.

From Canada. Scions presented by R. M. Wilson, Department of Agriculture, Dominion Experimental Farm, Indian Head, Saskatchewan. Received January 23, 1936.

Locally grown crab apple varieties.

113591. *MALUS* sp.

Pioneer.

113592. *MALUS* sp.

Robin.

113593. *GOSSYPIUM* sp. Malvaceae.

From Mexico. Seeds collected by F. W. Smith, Guasave, Sinaloa. Received January 13, 1936, via Nogales, Arizona.

A semiwild, perennial cotton, which is only slightly affected by the diseases and insects that work much damage to cultivated cotton.

113594 and 113595. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received January 9, 1936.

113594. *Calare*; from the Senora Experiment Farm.

113595. *Felia*; from the Senora Experiment Farm.

113596 to 113604. *ZEA MAYS* L. Poaceae. Corn.

From Australia. Seeds presented by the Department of Agriculture and Stock, Brisbane, Queensland. Received January 15, 1936.

113596. *Line 2*. 113601. *Line 36*.

113597. *Line 12*. 113602. *Line 39*.

113598. *Line 20*. 113603. *Line 50*.

113599. *Line 26*. 113604. *Line 61*.

113600. *Line 29*.

113605 to 113619. *ORYZA SATIVA* L. Poaceae. Rice.

From Japan. Seeds presented by the South Korean branch station, Agricultural Experiment Station, Government-General of Chosen. Received January 15, 1936.

Grown at the Rice Experiment Station, Rici, Chosen.

113605. No. 39. From Nansen Station No. 10.

113606. No. 42. From Nansen Station No. 13.

113607. No. 43. Station No. 14.

113608. No. 46. Station No. 17.

113609. No. 50. Station No. 21.

113610. No. 38. *Aikoku*.

113611. No. 327. *Taikyuso*.

113612. No. 329. *Odashiro*.

113613. No. 334. *Kamenco*.

113614. No. 337. *Ninode*.

113615. No. 348. *Nishiki No. 72*.

113616. No. 351. *Kokuryo-Miyako*.

113617. No. 352. *Sekizaruso*.

113618. No. 353. *Tamanishiki*.

113619. No. 355. *Yinboyu*.

113620 to 113622.

From India. Seeds presented by I. D. Mahendru, Divisional Forest Officer, Silva Research Forest Division, Lahore, Punjab. Received January 20, 1936.

Nos. 113620 and 113621 were collected near the Tibetan border at 9,000 feet altitude at Chini, Bashafr State.

113620. *EPHEDRA GERARDIANA* Wall. Gnetaceae.

A stiff erect leafless shrub 2 to 4 feet high, native to India, with green branches, inconspicuous flowers, and bright-red fruits.

For previous introduction see 107620.

113620 to 113622—Continued.

113621. *EPHEDRA INTERMEDIA* Schrenk and Mey. Gnetaeace.

A shrubby leafless plant with a creeping rootstalk and a short woody stem 3 to 4 inches high, simple or with a few branches. It is native to Sungaria.

For previous introduction see 101454.

113622. *PHOENIX OUSELEYANA* Griffith. Phoenicaceae. Dwarf date palm.

From the bank of the Beas River, Kangra Valley, Mandi State, at 2,600 feet altitude. A spiny palm with a short stem up to 12 feet in height and 9 inches in diameter, densely covered with the stumps of leafstalks. The edible fruits are orange colored until fully ripe when they become black. The pinnate leaves are 4 to 8 feet long, with pliable clustered leaflets more or less four ranked. Native to the southern slopes of the Himalayas and to the East Indies.

For previous introduction see 54767.

113623. *DERRIS* sp. Fabaceae.

From Guatemala. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 22, 1936.

No. 3657. *Palo de Zope*. Presented by the Director of Agriculture.

113624 to 113636. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received January 27, 1936.

Nos. 113624 to 113630 were collected in the vicinity of Espinal Tolima, December 31, 1935.

113624. No. 46. *Costillo negro*.

113625. No. 47. *Costillo negro*.

113626. No. 48. *Costillo Habana*.

113627. No. 49. *Pina*.

113628. No. 50.

113629. No. 51. *Colon*.

113630. No. 52. *Costillo Habana*.

113631. No. 53. *Palmira*. From the vicinity of Espinal, Tolima, January 1, 1936.

Nos. 113632 to 113636 were collected in the vicinity of Guamo, Tolima, January 4, 1936.

113632. No. 54. *Habana* and *Palmira*, a mixed sample.

113633. No. 55. *Costillo negro*.

113634. No. 56. *Costillo negro*.

113635. No. 57. *Habana* and *Palmira*, a mixed sample.

113636. No. 58. *Habana*, *Costillo negro*, *Carolino*, a mixed sample.

113637 to 113645. *VITIS VINIFERA* L. Vitaceae. European grape.

From France. Plants purchased from the Richters Nurseries, Montpellier. Received January 17, 1936.

113637. *Aramon novi* × 3309.

113638. *Caralicante* × R-57.

113639. *Carignane* × 3309.

113637 to 113645—Continued.

113640. *Chasselas doré* × 3309.

113641. *Mourastel Bouschet* × 3309.

113642. *Muscat de Frontignan* × 3309.

113643. *Syrah (Petite Syrah)* × 3309.

113644. *Sauvignon Blanc* × 3309.

113645. *Saint Emilion* × 3309.

113646. *TRIFOLIUM PRATENSE* L. Fabaceae. Red clover.

From the Soviet Union. Seeds presented by Dr. N. I. Vavilov, Director, Institute of Plant Industry, Leningrad. Received January 21, 1936.

From Riisk District, Transcaspian Republic.

113647 and 113648. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

From Argentina. Tubers presented by the Ministry of Agriculture, Buenos Aires. Received January 28, 1936.

113647. *Blanca*. 113648. *Chayuenta*.

113649. *ZEPHYRANTHES* sp. Amaryllidaceae.

From El Salvador. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received January 28, 1936.

No. 3659. January 10, 1936, from San Salvador.

113650 and 113651.

From Italy. Plants and cuttings presented by Dr. Mario Calvino, Stazione Sperimentale di Floricoltura, San Remo. Received January 28, 1936.

113650. *AMYGDALUS PERSICA* L. Amygdalaceae. Peach.

Plants of *Pollardi*.

113651. *FICUS CARICA* L. Moraceae.

Cuttings of the *Pissalutto* fig.

113652 to 113657. *CASTANEA MOLLIS-SIMA* Blume. Fagaceae. Hairy chestnut.

From China. Scions collected by Peter Liu, in Chekiang Province. Received January 30, 1936.

Nos. 113652 to 113654 were collected near the village of Chuan Tzu in the district of Hsiao Shan.

113652. No. 1. *Hung Pan Lee*, red-skin chestnut. A grafted chestnut, one of the best varieties.

113653. No. 2. *Hei Pan Lee*, black-skin chestnut. A very sweet, grafted chestnut.

113654. No. 3. *Tsao Lee*, grass chestnut. A seedling chestnut that produces very small nuts, but the tree is used as a stock on which to graft the better varieties.

113655. No. 4. *Kuei Hua Lee Tzu*, cassia chestnut. Collected near Chi Lung Shan, Kok Nest Mountains, near Hang Chow. This variety is abundantly planted in this region. The fruits ripen in the latter part of September. When they first begin to ripen the cassia is in bloom; hence the name.

113652 to 113657—Continued.

113656. No. 5. *Kuei Hua Lee Tzu*, cassia chestnut; collected in the vicinity of Fa Yun Hung near Hang Chow. The same as No. 4 (P. I. 113655).

113657. No. 7. *Ta Tzu Lee*, large purple chestnut, from near An Men, Tung Yang District. A grafted chestnut that produces very large nuts.

113658. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Mexico. Seeds forwarded by the American embassy, Mexico City, at the request of W. A. Archer, Bureau of Plant Industry. Received January 31, 1936.

Seed grown in the Autlán District, State of Jalisco, southwest coast of Mexico.

113659. CYCLAMEN sp. Primulaceae.

From the Soviet Union. Bulb presented by E. Stepanov, Soviet Union Plant Quarantine Board, Sukhum, Abkhasia, Transcaucasus. Received May 20, 1935. Numbered in January 1936.

113660. CASTANEA CRENATA Sieb. and Zucc. Fagaceae. Japanese chestnut.

From Japan. Scions purchased from the Yokohama Nursery Co., Yokohama. Received January 30, 1936.

Boji chestnut.

113661 to 113669. CASTANEA spp. Fagaceae. Chestnut.

From China. Seeds collected by Peter Liu, in Chekiang Province. Received January 30, 1936.

113661 and 113662. *CASTANEA HENRYI* (Skan) Rehd. and Wils.

Chen Lee, pearl chestnut.

113661. From Hsiao Feng.

113662. From near Feng Chiao, Chuchi District.

113663 to 113669. *CASTANEA MOLLISSIMA* Blume. Hairy chestnut.

113663. *Fen shui*, large chestnut; a seedling variety common in Chekiang.

113664. *Hei Pan Lee*, black-skin chestnut; collected at Chian Tzu, Hsiao Shan District. A decidedly sweet grafted chestnut; one of the best varieties.

113665. *Hung Pan Lee*, red-skin chestnut; obtained at Chian Tzu Hsiao Shan District. Considered one of the best varieties in Chekiang.

113666. *Tsao Lee*, grass chestnut. From the village of Chian Tzu, Hsiao Shan District. A variety used as a stock.

113667. North China chestnuts; bought in Chin Chi Chan, Tientsin, but shipped in from Po Cheng, southeast of San Tun Ying, Chien An District.

113668. *Ta Hung Lee*, large bright chestnut. Bought in a fruit and nut store in Taian, Sbantung.

113669. *Ta Tzu Lee*, the large purple chestnut of An Mei, Tung Yang District. This grafted chestnut is the largest in south China.

113670 to 113673. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Colombia. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received January 31, 1936.

113670. No. 64. *Pina*. January 6, 1936. From Miranda, Cauca. Received through the courtesy of the Colombian Tobacco Co., Espinal.

Nos. 113671 to 113673 were presented January 17, 1936, by Rafael Gonzales, Director, Estación Agrícola de Palmira, Valle del Cauca.

113671. No. 65. *Pina*.

113672. No. 66. *Nacional No. 2*.

113673. No. 67. *Nacional No. 12*.

113674 to 113679. CASTANEA CRENATA Sieb. and Zucc. Fagaceae. Japanese chestnut.

From Japan. Seeds purchased from the Yokohama Nursery Co., Yokohama. Received January 31, 1936.

113674. *Sandoguri*. From Izutayama.

113675. *Sasaguri*. Medium-sized seeds from Fukuoka-ken.

113676. *Sasaguri*. Small seeds from Fukuoka-ken.

113677. *Sasaguri*. From Ohita-ken.

113678. From the Koyasan Temple "Forest."

113679. From Iwate-ken.

113680 to 113687.

From Germany. Plants presented by D. W. Mohrenweiser, Baumschule Mohrenweiser, Altenweddingen, Bezirk, Magdeburg. Received February 3, 1936.

113680 to 113685. *CORYLUS* spp. Betulaceae. Filbert.

113680. *Bollwoeller Riesen*.

113681. *Braunschweiger Riesen*.

113682. *Fertille*.

113683. *Friihe Frauendorfer*.

113684. *Friihe lange Zellernuss*.

113685. *Minnas Zellernuss*.

113686. *RUBUS* sp. Rosaceae. *Deutschland* raspberry.

113687. *RUBUS* sp. Rosaceae. *Preussen* raspberry.

113688 to 113690.

From Africa. Seeds presented by R. Andersen, Yapata Estate, Kitale, Kenya Colony. Received January 27, 1936.

Seeds from plants grown on the slopes of Mount Elgon, where the average rainfall is 40 inches.

113688. *TEPHROSIA* sp. Fabaceae.

A leguminous plant which becomes a small tree.

113689. *VIGNA* sp. Fabaceae.

113690. *VIGNA* sp. Fabaceae.

113691. HAPLOPHYTON CIMEIDUM DC.
Apocynaceae.

From Mexico. Seeds presented by Dr. C. Conzatti, Oaxaca de Juarez, Oaxaca. Received January 28, 1936.

Hierba de la cucaracha. A dense woody perennial with small opposite, narrowly ovate leaves and terminal, pale-yellow flowers nearly 1 inch across. Native to the mountains of south-central Mexico.

113692 to 113694. CITRULLUS VULGARIS
Schrad. Cucurbitaceae. **Watermelon.**

From Japan. Seeds presented by the Japan Seed & Plant Co., Tokyo. Received January 31, 1936.

113692. Daisen. A late melon that keeps well. The dark-green fruits have sweet red flesh and sometimes weigh 25 pounds.

113693. Early Sugar. A globular melon that weighs up to 11 pounds and is about 20 percent sweeter than ordinary melons.

113694. Miyako. Resembles Sweet Japanese, but the flesh is lighter in color and firmer.

113695 to 113698.

From Manchuria. Seeds purchased from L. Pitsin, Harbin. Received January 30, 1936.

113695. RUBUS CRATAEGIFOLIUS Bunge.
Rosaceae. **Hawthorn raspberry.**
No. 75. A wild form.

113696. RUBUS IDAEUS L. Rosaceae.
Raspberry.
No. 73. A cultivated Manchurian raspberry.

113697. RUBUS sp. Rosaceae.

No. 74. A cultivated Manchurian raspberry which ripens early.

113698. VITIS AMURENSIS Rupr. Vitaceae.
Amur grape.

A wild grape.

113699 to 113702. ORYZA SATIVA L. Poaceae.
Rice.

From Japan. Seeds presented by K. Nakata, Kyushu Imperial University, Department of Agriculture, Fukuoka. Received January 27, 1936.

113699. Aikoku-shinjô, No. 7. II.

113700. Kameji. II.

113701. Mubô-aikoku. II.

113702. Sensho. I.

113703 to 113706.

From England. Scions presented by W. H. M. Roberson, Cheltenham, Gloucestershire. Received February 10, 1936.

113703. MALUS SYLVESTRIS Mill. Malaceae.
Apple.

Crimson Bramley. A large attractive apple, crimson on the sunny side; described as an excellent cooking and storage apple.

113703 to 113706—Continued.

113704. MALUS SYLVESTRIS Mill. Malaceae.
Apple.

Nine-Square. A medium-sized cooking apple of delicious flavor; color crimson mingled with green.

113705. PYRUS COMMUNIS L. Malaceae.
Pear.

Chissel. A dessert pear about the size of a medium-sized plum; color, yellowish green when ripe.

113706. PYRUS COMMUNIS L. Malaceae.
Pear.

True Chissel. A little larger than the ordinary *Chissel* and much sweeter; color, yellowish green when ripe.

113707. PINUS CANARIENSIS C. Smith.
Pinaceae. **Canary pine.**

From the Canary Islands. Seeds presented by Antonio Gonzalez, Director, Estación Experimental de Horticultura y Jardinería de Santa Cruz de Tenerife y Orotava. Received February 8, 1936.

A pine, native to the Canary Islands, which thrives in warm temperate climates. It is suited to nearly all soils and has a straight trunk and a broad, round-topped head. The wood of this pine, known in the Canary Islands as "tea," is very hard, very difficult to work, but unequaled for duration and building purposes.

For previous introduction see 68300.

113708 to 113710. SACCHARUM SPONTANEUM L. Poaceae.

From the Soviet Union. Seeds presented by the Director, Institute of Dry Sub-tropics, Tashkent. Received February 5, 1936.

Wild sugarcane.

113708. No. 59. From the vicinity of Parhar village, Upper Painj (Amu-Darya).

113709. No. 60. From the vicinity of Parhar village, Upper Painj (Amu-Darya).

113710. No. 61. From the vicinity of Chinas on the Syr-Darya River.

113711. CASTANOPSIS sp. Fagaceae.

From China. Seeds presented by Peter Liu, Peiping. Received February 11, 1936.

Hsi Lee, slender chestnut, from Hang Chow. A sweet chestnut.

113712 to 113722. NICOTIANA TABACUM L.
Solanaceae. **Common tobacco.**

From Honduras. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 14, 1936.

Nos. 113712 to 113717 were collected at Danli, Departamento El Paraiso, January 22, 1936, from a grower.

113712. No. 3660. Deli. A pure strain, originally from Sumatra.

113713. No. 3661. Java. A pure strain, originally from Sumatra.

113714. No. 3662. Copan. A pure strain.

113715. No. 3663. Habana. A pure strain.

113716. No. 3664. Salvador.

113712 to 113722—Continued.

113717. No. 3665. *Santa Rosa de Copan*. A pure strain.

113718. No. 3666. *Deli*. A pure strain, originally from Sumatra, but different from No. 3660 [P. I. 113712]. The plant is also much larger.

113719. No. 3667. January 24, 1936. A volunteer tobacco collected at El Rodeo, 40 km. west of Tegucigalpa.

Nos. 113720 to 113722 were collected January 24, 1936, at Siguatepeque, Departamento Comayagua.

113720. No. 3668. Cultivated tobacco.

113721. No. 3669. *Pina*.

113722. No. 3670. A mixed sample of *Pina*, *Cubano*, and other varieties.

113723 to 113733.

From South America. Material collected by W. A. Archer, Bureau of Plant Industry. Received in 1934 and 1935. Numbered for convenience in distribution, February 1936.

113723. *ARISTOLOCHIA* sp. Aristolochiaceae.

No. 2889. *Loangoe tetei*. Cuttings collected December 13, 1934, at Carolina, Surinam River, Surinam.

113724. *ARISTOLOCHIA* sp. Aristolochiaceae.

No. 3412. *Tigre guasca*. Cuttings collected May 21, 1935, at Mocoa, Comisario del Puntumayo, Colombia.

113725. *BANISTERIOPSIS QUIZENSIS* (Ndzu.) Morton. Malpighiaceae.

No. 3361-A. *Yaje*. Roots collected May 2, 1935, at Leticia, Colombia. A woody climber with ovate-lanceolate leaves 2 to 4 inches long and small yellow flowers in terminal clusters. Native to Ecuador.

For previous introduction see 107821.

113726. *DIOSCOREA* sp. Dioscoreaceae.

No. 2460. *Urucab*. Roots of a vine with hooked bulbils on the stems, collected August 8, 1934, near Mazaruni Station, British Guiana.

113727. *ERIOSEMA CRINITUM* (H. B. K.) G. Don. Fabaceae.

No. 2824. Root cuttings collected November 11, 1934, near Sandrij I, Surinam. A low herbaceous perennial with an enlarged storage root, trifoliate leaves, and racemes of small pale-yellow flowers. Native to tropical America.

113728. *ESCOBEDIA SCABRIFOLIA* Ruiz and Pav. Scrophulariaceae.

No. 3383. *Roiz de color*. Cuttings collected May 9, 1935, at Gelina, near Popayan, Colombia. An erect herbaceous perennial with oblong leaves about 4 inches long and large white solitary flowers. Native to western South America, where the roots are used for dyeing.

113729. *CARYOPHYLLUS MALACCENSIS* (L.) Stokes. Myrtaceae.

No. 2856. *Pommarac*. Seeds collected December 5, 1934, at Vredenburg Weg, Surinam. A tree with large, handsome, glossy leaves and masses of flowers an inch or more across, filled with hundreds of beautiful deep-rose or pink stamens; the edible fruit, 2 to 3 inches long, has bright

113723 to 113733—Continued.

red skin and dry white flesh like a cranberry. Introduced from the Malay Archipelago by the Javanese.

113730. *LONCHOCARPUS SERICEUS* (Poir.) H. B. K. Fabaceae.

No. 3354. *Garrapato*. April 28, 1935. Root cuttings of a large tree collected at Tocsimis, Finca Chucunday, Departamento Cundinamarca, Colombia. The name refers to the peculiar galls always present on the leaves.

113731. *LONCHOCARPUS NICOU* (Aubl.) DC. Fabaceae.

No. 3408. *Bavbasco trueno*. Cuttings collected May 21, 1935, at Mocoa, Comisario del Putumayo, Colombia.

113732. *PHYLANTHUS PISCATORUM* H. B. K. Euphorbiaceae.

No. 3416. *Tinta bavbasco*. Cuttings of a shrub 10 feet high, collected at Mocoa, Comisario del Putumayo, May 22, 1935.

113733. *SERJANIA PAUCIDENTATA* DC. Sapindaceae.

No. 2887. Root cuttings collected December 13, 1934, at Carolina, Surinam River, Surinam.

For previous introduction see 106495.

113734. *AMYGDALUS BUCCHARICA* Korsh. Amygdalaceae.

From the Soviet Union. Seeds presented by Dr. Boris Fedtschenko, Botanic Institute of the Academy of Sciences, Leningrad. Received February 10, 1936.

A wild almond, native to the hot dry regions of Turkistan, with fruits about 1 inch long.

For previous introduction see 106838.

113735 to 113738.

From the Soviet Union. Seeds presented by the Institute of Plant Industry, Leningrad. Received February 10, 1936.

Seeds collected by a Mr. Dessiatkin in the Altai Mountain region, Turkistan.

113735. *ALLIUM FISTULOSUM* L. Liliaceae. Welsh onion.

A very hardy wild strain; the bulbs and young leaves are edible.

For previous introduction see 113301.

113736. *HIPPOPHAE RHAMNOIDES* L. Elaeagnaceae. Common sea-buckthorn.

A large-fruited variety with high sugar content.

For previous introduction see 109295.

113737. *RIBES HISPIDULUM* (Jancz.) Pojarkova. Grossulariaceae.

A wild red currant, native to Turkistan.

113738. *RIBES PETRAEUM* Wulf. Grossulariaceae.

A large-fruited, frost-resistant red currant.

113739 to 113748. *ZEA MAYS* L. Poaceae. Corn.

From Australia. Seeds presented by the Department of Agriculture and Stock, Brisbane, Queensland. Received February 14, 1936.

113739 to 113748—Continued.

113739. Line No. 2. 113744. Line No. 46.
 113740. Line No. 12. 113745. Line No. 61.
 113741. Line No. 16. 113746. Line No. 64.
 113742. Line No. 21. 113747. Line No. 66.
 113743. Line No. 30. 113748. Line No. 68.

113749. *ERLANGEA MARGINATA* (O. and H.) S. Moore. Asteraceae.

From Africa. Seeds presented by J. B. H. Lejeune, Director, Government Experimental Station, Kisozi, Ruanda-Urundi Territory, Belgian Congo. Received January 10, 1934. Numbered in January 1936.

An erect perennial, native to tropical Africa, with dark-green, narrow-ovate leaves, up to 3 inches long, silky white beneath. The small heads of pink flowers in dense terminal clusters and on short pedicels in the axils of the leaves, have a long blooming season.

113750. *BOUSSINGAULTIA* sp. Basella-ceae.

From Venezuela. Bublils collected by W. A. Archer, Bureau of Plant Industry. Received February 16, 1935. Numbered in February 1936.

No. 2988. Collected near Caracas, January 27, 1935. A vine whose aerial tubers contain a soapy substance used by the natives to wash clothing.

113751 to 113756.

From Honduras. Seeds presented by the Research Department of the Tela Railroad Co., Tela. Received February 8, 1936.

113751. *ARECA ALICAE* F. Muell. Phoenicaceae. Palm.

An Australian cluster palm with graceful shining-green pinnate leaves 3 to 6 feet long. The handsome oblong scarlet fruits, three-fourths of an inch long, make this one of the most attractive of all door-yard palms.

For previous introduction see 104680.

113752. *GUILIELMA UTILIS* Oerst. Phoenicaceae. Pejibaye.

A pinnate-leaved palm, native to tropical regions of the Western Hemisphere. Its straight, slender stem, about 6 inches in diameter and 60 feet high, is armed from the ground upward with stiff, very sharp black spines about 2 inches long. The racemes, 18 to 24 inches long, of small sessile, yellow-white flowers, are produced from the trunk of the palm immediately below or among the lower leaves and are protected by erect spathe. The raceme of mature fruit weighs over 25 pounds, and there are often five or six such racemes produced in a single crop. The individual fruits are conical or ovoid, vary from 1 to 2 inches in length, and have dry mealy flesh of a pale-orange or yellow color. It is one of the important food plants of the Tropics.

For previous introduction see 103739.

113753. *LICUALA* sp. Phoenicaceae. Palm.

Received as *Licuala peltata*, but the seeds do not agree with that species. The licualas are showy, dwarf, fan-leaved palms.

113751 to 113756—Continued.

113754. *OENOCARPUS* sp. Phoenicaceae. Palm.

A tall, very handsome ornamental palm with a terminal crown of pinnatisect leaves.

113755. *THRINAX* sp. Phoenicaceae. Palm. An ornamental fan-leaved palm.113756. *TILMIA CARYOTAEOFOLIA* (H. B. K.) O. F. Cook (*Martinezia caryotaefolia* H. B. K.).

A slender, spiny-trunked, pinnate-leaved palm with bright orange-red fruits borne in drooping racemes. Native to Colombia.

For previous introduction see 103172.

113757 and 113758. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

From Uruguay. Seeds presented by the Facultad de Agronomia Universidad de la Republica. Montevideo. Received February 15, 1936.

113757. A small white Spanish type with short cylindrical pods; a promising variety.

113758. A Valencia type with the usual red kernels.

113759 to 113778.

From Australia. Seeds presented by F. J. Rae, Director, Melbourne Botanic Gardens and National Herbarium, South Yarra, Victoria. Received February 15, 1936.

A collection of native Australian plants.

113759. *CALLISTEMON RIGIDUS* R. Br. Myrtaceae.

A tall shrub, sometimes 30 feet high, native to New South Wales. The narrowly linear leaves are 2 to 5 inches long, and the scarlet flowers, with dark-red stamens an inch long, are borne in large dense spikes.

For previous introduction see 101349.

113760. *CASSIA EREMOPHILA* A. Cunn. Caesalpiniaceae.

A handsome shrub 5 feet high, with leaves made up of two pairs of narrow leaflets and yellow flowers. The leaves and pods are said to be eaten by stock.

For previous introduction see 90851.

113761. *CHORIZEMA DIVERSIFOLIUM* A. DC. Fabaceae.

A tender shrub about 3 feet high, with weak, slender, often twining branches, ovate to narrow lanceolate leaves about 2 inches long, and many showy orange flowers in loose racemes.

113762. *DCDONAEA TRIQUETRA* Wendl. Sapindaceae.

A tall erect glabrous shrub with oval-elliptic leaves 2 to 4 inches long and very smooth shining brown seeds in medium-sized capsules.

For previous introduction see 50400.

113763. *DRACOPHYLLUM SECUNDUM* R. Br. Eupacridaceae.

A shrub resembling a monocot with the branching stems covered by the sheathing bases of the linear-striated leaves 2 to 4

113759 to 113778—Continued.

inches long. The branches are terminated by long compound, one-sided racemes of pure white tubular flowers.

For previous introduction see 76937.

113764. ENTELEA ARBORESCENS R. Br. Tiliaceae.

A shrub or small tree up to 20 feet high, with the growing parts covered with soft stellate hairs. The alternate cordate leaves, nearly a foot across, are on petioles 8 inches long; the white flowers, an inch in diameter, are in erect cymes, and the globose pods are covered with long rigid bristles.

For previous introduction see 103006.

113765. EUCALYPTUS MICROTHECA F. Muell. Myrtaceae.

A tree up to 80 feet high, found in arid as well as tropical regions of Australia. It is said to be resistant to extreme heat and drought and to also endure a temperature as low as 18° F.

For previous introduction see 75638.

113766. GELJERA PARVIFLORA Lindl. Rutaceae.

Wilga. A tall evergreen shrub or small tree, native to the interior of New South Wales, where it reaches a height of about 30 feet. It has slender pendulous branches, narrow leaves 3 to 6 inches long, and, when well developed, has a highly ornamental appearance with something of the aspect of a weeping willow. It has remarkable drought-enduring qualities, and the leaves are often fed to sheep, which are very fond of them.

For previous introduction see 90853.

113767. HAKEA VITTATA R. Br. Proteaceae.

An evergreen shrub or small tree up to 20 feet high, with needlelike leaves up to 3 inches long. Native to South Australia.

113768. KENNEDIA COMPTONIANA (Andr.) Link. Fabaceae.

A vine with single lanceolate leaflets and terminal and axillary racemes of pea-shaped flowers, ranging from white through rose to purple.

For previous introduction see 98164.

113769. KENNEDIA NIGRICANS Lindl. Fabaceae.

A large twining vine from Western Australia. The broad ovate leaflets, 2 to 3 inches long, are often only one to each leaf. The deep violet-purple flowers are about 1 inch in length and are borne in racemes shorter than the leaves.

For previous introduction see 45791.

113770. KUNZEA PEDUNCULARIS F. Muell. Myrtaceae.

A heathlike evergreen shrub 8 to 15 feet high, allied to the callistemons. The small white flowers, with conspicuous stamens, are borne in the upper axils as short corymbs or long leafy racemes. Native to southeastern Australia.

113771. LASIOPETALUM DASYPHYLLUM Sieber. Sterculiaceae.

A tall shrub with rusty tomentose branches, coriaceous cordate to lanceolate leaves 4 inches long, and dense axillary clusters of small brownish flowers.

For previous introduction see 76939.

113759 to 113778—Continued.

113772. LEPTOSPERMUM SCOPARIUM Forst. Myrtaceae.

Variety *grandiflorum roseum*. A form with large pink flowers.

113773. LIBERTIA IXIOIDES (Forst. f.) Spreng. Iridaceae.

A herbaceous perennial, native to New Zealand, with a short creeping rhizome, which forms a compact clump like a beardless iris. It has rigid coriaceous linear leaves a foot long and large panicles of small white flowers on a stem 2 feet high.

For previous introduction see 81490.

113774. OLEARIA PANNOSA Hook. Asteraceae.

An evergreen shrub up to 4 feet high, with broadly ovate-cordate to oblong leaves about 3 inches long and large white terminal or axillary flower heads. Native to South Australia.

113775. ORTHOSANTHUS MULTIFLORUS Sweet. Iridaceae.

An irislike plant with a short perennial rhizome and flat, grasslike radical leaves up to 2 feet in length. The blue flowers are in a several-flowered oblong spike borne on a stem 1 to 2 feet high.

For previous introduction see 67087.

113776. PULTENAEA DAPHNOIDES Wendl. Fabaceae.

An erect evergreen shrub about 6 feet high, with cuneate-oblong leaves less than 2 inches long and small yellow flowers in large dense terminal heads. Native to southern Australia.

113777. SIDEROXYLON AUSTRALE (R. Br.) Benth. and Hook. Sapotaceae.

An evergreen tree, eventually about 80 feet high, with elliptic-oblong leaves 3 to 4 inches long. The globose purplish fruits, about 2 inches in diameter, are edible, although of coarse texture and insipid flavor. The dark-colored timber is used for cabinet work.

113778. TEMPLETONIA RETUSA (Vent.) R. Br. Fabaceae. Melbourne coralbush.

A tall evergreen shrub 4 to 8 feet high, with angular sulcate glaucous branchlets, simple leathery broadly ovate leaves about 1 inch in length, and axillary red or white flowers 1 inch long, solitary or in clusters of two or three.

113779 and 113780.

From the Netherlands. Plants presented by F. J. Grootendorst & Sons, Boskoop, through the Skylands Nursery, Sterlington, N. Y. Received February 15, 1936.

113779. ABIES LASIOCARPA ARIZONICA (Merriam) Lemm. Pinaceae.

A variety with yellowish-white, corky bark and smaller cones. Native to Arizona and New Mexico.

113780. ABIES BALSAMEA (L.) Mill. Pinaceae.

Hudsonia. A dwarf form.

113781. PHOENIX RECLINATA Jacq. Phoenicaceae. Senegal date palm.

From Sierra Leone, Africa. Seeds presented by W. T. Swingle, Bureau of Plant Industry. Received February 18, 1936.

113782 to 113789.

From India. Seeds presented by the forest botanist, Forest Research Institute, Dehra Dun, through F. J. Crider, Soil Conservation Service, United States Department of Agriculture. Received February 14, 1936.

113782. *ACER STERCULIACEUM* Wall. Aceraceae. Maple.

A handsome tree with gray bark, native to the northwestern parts of the Himalayas at altitudes of 7,000 to 9,000 feet. It sometimes reaches a height of 80 feet. The thin shining-green leaves are occasionally used for fodder, and the white, closely grained wood is beautifully mottled.

For previous introduction see 56399.

113783. *BERBERIS CHITRIA* Lindl. Berberidaceae. Barberry.

A spiny half-evergreen shrub, 6 feet or less high, with oblong leaves 1 to 3 inches long, deep yellow or reddish flowers in long stemmed panicles, and ovoid purple berries. Native to the Himalayas.

For previous introduction see 92491.

113784. *BERBERIS LYCIUM* Royle. Berberidaceae. Barberry.

A half-evergreen shrub 10 feet high, with narrow bright-green leaves and pale-yellow flowers followed by ovoid violet berries. Native to northern India.

For previous introduction see 81147.

113785. *CARPINUS VIMINEA* Lindl. Betulaceae.

A rather small tree with slender pendulous branches and ovate, caudate, doubly serrate leaves 3 to 4 inches long. Native to the temperate Himalayas at altitudes of 5,000 to 7,000 feet.

113786. *ERIANTHUS RUFIPILUS* (Steud.) Griseb. Poaceae. Plumegrass.

A perennial grass from the temperate Himalayas, where it grows at altitudes of 5,000 to 7,000 feet.

For previous introduction see 93210.

113787. *LILIUM GIGANTEUM* Wall. Liliaceae. Giant lily.

113788. *VIBURNUM COTINIFOLIUM* D. Don. Caprifoliaceae.

A shrub 6 to 12 feet high, closely allied to *Viburnum lantana*, and native to the Himalayas from Bhutan to Baluchistan. The young branchlets, the under surface of the leaves, and the flower stalks are clothed with a dense gray down. The white, pink-tinged, broadly funnel-shaped flowers are produced in rounded cymes, 2 to 3 inches across. The red, ultimately black, fruits are up to one-half inch long.

For previous introduction, see 53744.

113789. *VITIS TRIFOLIA* L. Vitaceae.

A slender herbaceous tuberous-rooted vine, covered throughout when young with a short dense pubescence. The long-stalked, trifoliolate leaves are 2 to 6 inches long, and the small black fruits are two to four seeded. Native to the tropical Himalayas and the hotter parts of India.

113790. *TRIPTYERYGIUM* sp. Celastraceae.

From China. Cuttings collected by Peter Liu, Peiping. Received February 25, 1936.

Lei Kung Teng. From Erh Shih Pa Tu, Yi Wu District, Chekiang Province.

113791 to 113795. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

From Palestine. Trees presented by A. Grosovsky, Chief Horticultural Officer, Department of Agriculture and Forests, Jerusalem. Received February 26, 1936.

113791. *Alawi*.

113792. *Baladi*.

113793. *Hamawi*.

113794. *Karassia*.

113795. *Klabi*, seedling.

113796 to 113810.

From the Soviet Union. Plants presented by the Nikita Botanic Garden, Yalta, Crimea, through the Institute of Plant Industry, Leningrad. Received February 25, 1936.

113796 to 113808. *AMYGDALUS COMMUNIS* L. Amygdalaceae. Almond.

113796. Crimée No. 337.

113797. Crimée No. 1590.

113798. Crimée No. 341.

113799. Crimée No. 2678.

113800. Crimée No. 2661.

113801. Crimée No. 335.

113802. Crimée No. 2669.

113803. Crimée No. 339.

113804. Crimée No. 396.

113805. Crimée No. 2674.

113806. Crimée No. 2664.

113807. Crimée No. 348.

113808. Crimée No. 2678.

113809 and 113810. *PRUNUS DOMESTICA* L. Amygdalaceae. Plum.

113809. Crimée No. 2669-A. From Alma Hara.

113810. Crimée No. 2669-B. From Alma Hara.

113811 to 113821. *RUBUS* spp. Rosaceae.

From China. Seeds presented by the Director, Botanic Garden, Dr. Sun Yat-Sen's Memorial Park, Nanking. Received February 21, 1936.

113811. *RUBUS AMPELINUS* Focke.

A prostrate shrub similar to *Rubus lambertianus*, with slender stems about 3 feet long, broad-ovate leaves about 2 inches long, and terminal clusters of few small flowers. Native to central China.

113812. *RUBUS BUERGERI* Miq.

A creeping rubus, common in the region of Nagasaki, Japan. The red fruits are of good flavor but not large.

For previous introduction see 48739.

113813. *RUBUS CHROOSEPALUS* Focke.

A Chinese bramble with glabrous cordate leaves, white tomentose beneath, and small purplish flowers followed by black fruits. Native to Hupeh Province.

For previous introduction see 53536.

113814. *RUBUS COREANUS* Miq.

Korean raspberry.

A deciduous shrub 8 to 10 feet high, native to China and Chosen, with erect

113811 to 113821—Continued.

or arching, stout biennial stems. The pinnae leaves, 6 to 10 inches long, are usually composed of seven ovate, dark lustrous-green, coarsely toothed leaflets. The fruit, varying in color from red to nearly black, is edible but small and of poor flavor.

For previous introduction see 104649.

113815. *RUBUS ICHANGENSIS* Hemsl. and Kuntze.

A straggling plant with white flowers, found in thickets between 2,000 and 4,000 feet altitude in central and western China. The small red fruits are of good flavor.

For previous introduction see 26272.

113816. *RUBUS LAMBERTIANUS* Seringe.

A bramble with long slender square evergreen stems, simple or three-lobed to five-lobed leaves, bright green above and lighter beneath, terminal clusters of small white flowers, and red or yellow fruits. Native to China.

For previous introduction see 91831.

113817. *RUBUS MESOGAEUS* Focke.

A bramble native to central China, with slender climbing stems 12 to 15 feet long, rather small flowers, and small globose berries.

For previous introduction see 50299.

113818. *RUBUS OCCIDENTALIS* L.
Common blackcap.

For previous introduction see 92795.

113819. *RUBUS PARVIFOLIUS* L.

A hardy raspberry with edible red fruits, which are somewhat acid, not particularly juicy, but of good flavor. Native to China and Japan.

For previous introduction see 93977.

113820. *RUBUS SETCHUENENSIS* Bureau and Franch.

A deciduous straggling shrub about 2 feet high, with deeply-lobed, mallowlike leaves, and many small purple flowers in dense panicles followed by black fruits of good flavor. Native to western China.

113821. *RUBUS TEPHRODES* Hance.

A straggling shrub with branches about 15 feet long, terminal clusters of small pink flowers, and rather large black fruits. Closely related to *Rubus chroosepalus*. Native to Kiangsi Province, China.

113822 to 113835. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

From Canada. Scions presented by W. R. Leslie, Superintendent, Morden, Manitoba, Experimental Farm. Received February 27, 1936.

113822. *Angus*.113823. *Elkhorn*.113824. *Godfrey*.113825. *Gretna*.113826. *Manitoba* (Duchess seedling.)113827. *Manitoba Spy* (Duchess seedling).113828. *Manitof* (Tetofsky seedling).113829. *Mantet* (Tetofsky seedling).113830. *Manton*.

113822 to 113835—Continued.

113831. *Ostem* (M-316).113832. *Osman*.113833. *Patricia*.113834. *Rosilda*.113835. *Trail*.113836. *EUCHLAENA MEXICANA* Schrad. Poaceae. Teosinte.

From Guatemala. Seeds presented by Manuel Velasquez, Departamento de Huehuetenango. Received February 21, 1936.

113837 to 113844.

From Africa. Seeds purchased from the Mount Elgon Nurseries, Kitale, Kenya Colony. Received January 31, 1936.

Seeds of plants indigenous to eastern Africa.

113837. *BAUHINIA FASSOGLENSIS* Kotschy. Caesalpinaceae.

A scandent shrub with large suborbicular, leathery leaves, the leaflets connate, and numerous large yellow flowers in rather lax racemes.

113838. *CLEMATIS INCISO-DENTATA* A. Rich. Ranunculaceae.

A woody climber, with pinnatisect leaves and many large white flowers in long axillary panicles.

113839. *CROTALARIA LACHNOCARPOIDES* Engl. Fabaceae.

A shrubby plant up to 4 feet high, with lanceolate or linear-oblong leaflets 1 to 2 inches long and small, compact racemes of orange-colored flowers. It is similar to *Crotalaria lachnocarpa*, but has smaller flowers.

113840 to 113842. *DELPHINIUM* spp. Ranunculaceae. Larkspur.113840. *DELPHINIUM CANDIDUM* Hemsl.

A dwarf perennial delphinium, with palmately five-lobed leaves up to 5 inches across and large white, sweet-scented flowers.

113841. *DELPHINIUM MACROCENTRUM* Oliver.

A perennial delphinium up to 6 feet high bearing numerous blue-green to deep-blue flowers.

113842. *DELPHINIUM* sp.

From Ethiopia.

113843. *GLORIOSA VIRESCENS* Lindl. Melanthiaceae. Glorylily.

A vinelike perennial which supports itself by the tendril-bearing tips of the oblong-lanceolate leaves 3 to 6 inches long. The yellow and red flowers, 1 to 3 inches across and borne in a lax terminal corymb, are reflexed and slightly undulate.

For previous introduction see 102790.

113844. *PENTAS LANCEOLATA* (Forsk.) Schum. Rubiaceae.

An erect evergreen shrub 2 to 3 feet high, with linear-lanceolate, acuminate leaves 2 to 4 inches long and pink flowers over 1 inch long in dense terminal cymes. Native to Mount Kilimanjaro, Kenya, at 5,000 feet altitude.

113845. PASSIFLORA LIGULARIS JUSS.
 Passifloraceae. Sweet granadilla.

From Honduras. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 26, 1936.

For previous introduction see 110602.

113846. TRIFOLIUM PRATENSE L. Faba-
 ceae. Red clover.

From the Soviet Union. Seeds purchased from the Kungur Interregional Control Station, Ural Province, through the Institute of Plant Industry, Leningrad. Received February 26, 1936.

113847. NEOMAMMILLARIA ELONGATA
 (DC.) Britt. and Rose. Cactaceae.

From Mexico. Seeds collected by Paul Russell and Max Souviron, Bureau of Plant Industry. Received September 20, 1930. Numbered in February 1936.

No. 13. From the Botanic Garden, Mexico City, September 11, 1930; originally from Hidalgo. An erect cactus 6 to 7 inches high and 1 to 2 inches in diameter, with short tubercles having 16 to 18 yellow radial spines. The small flowers are white or yellowish. Native to central Mexico.

For previous introduction see 81178.

113848 to 113854. TRITICUM AESTIVUM
 L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received February 14, 1936.

A collection of rust-resistant varieties of wheat.

113848. Argentine H-31. (C-8681.) Originally from Argentina.

113849. Minor. (C-9142.)

113850. Portugal. (C-9895.) Originally from Portugal.

113851. Preparateur Etienne. (C-6141.) Originally from France.

113852. Puror. (C-9141.)

113853. Saisette. (C-6149.) Originally from France.

113854. Varonne. (C-6146.) Originally from France.

113855 to 113865. RUBUS spp. Rosa-
 ceae.

From the Soviet Union. Seeds presented by N. I. Sharapov, Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received February 26, 1936.

A collection of Rubus from the Maikop section.

113855. RUBUS SANCTUS Schreb.

No. 104. A very variable species related to *Rubus rhannifolius* and *R. gratus*, with strong arched shoots, leaves composed of five leaflets, and elongate racemes of white or pale-rose colored flowers.

For previous introduction see 42787.

113856 to 113859. RUBUS CAESIUS L.
 Dewberry.

A deciduous shrub with slender, creeping, prickly stems. The white flowers are

113855 to 113865—Continued.

in small clusters, and the fruit, composed of a few large carpels, is covered with a blue-white bloom when ripe. Common throughout Europe and northern Asia.

For previous introduction see 92293.

113856. No. 135. 113858. No. 192.

113857. No. 155. 113859. No. 1068.

113860. RUBUS CAESIUS TURKESTANICUS
 Regel.

No. 191. A variety with narrow-petaled flowers and shining black fruits. Native to Turkistan.

113861. RUBUS CAUSICUS Focke.

No. 1067. An evergreen bramble with small white flowers and small black fruits. It is closely related to *Rubus platyphyllus*. Native to the Caucasus region.

113862. RUBUS TOMENTOSUS Borckh.

No. 1069. A low shrub with thick leaves and small black fruits. Native to central Europe.

For previous introduction see 30185.

113863. RUBUS sp.

No. 134.

113864. RUBUS sp.

No. 100.

113865. RUBUS LINKIANUS Ser.

No. 102. A cultivated species of unknown origin, with more or less double white flowers 1 inch across.

113866 to 113868. CITRUS spp. Rutaceae.

From Costa Rica. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 27, 1936.

113866. CITRUS AURANTIFOLIA (Christm.)
 Swingle. Lime.

No. 3692. February 22, 1936. From the market at San José. An extremely good variety.

113867. CITRUS GRANDIS (L.) Osbeck.
 Grapefruit.

No. 3691. *Toranja*. From San José, February 22, 1936. The thick peel of this fruit is used for crystallizing; the seedlings are used as stock for other types of citrus.

113868. CITRUS LIMONIA Osbeck. Lemon.

No. 3693. From San José, February 22, 1936. A sweet variety, used in Costa Rica for beverages.

113869 to 113876.

From the Soviet Union. Seeds presented by G. N. Shlykov, head of the Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received February 28, 1936.

From the Botanic Garden, University of Middle Asia, Tashkent.

113869. ALLIUM AFLATUNENSE B. Fedtsch.
 Liliaceae.

A large allium with broad-oblong leaves and umbels of purple flowers on a scape up to 4 feet high. Native to Turkistan.

For previous introduction see 110686.

113869 to 113876—Continued.

113870. *INCARVILLEA OLGAB* Regel. *Bigoniaceae*.

An erect biennial 3 to 4 feet high, with opposite pinnate leaves, the leaflets linear, oblong and acute. The bell-shaped purple flowers are about an inch long. Native to Turkistan.

For previous introduction see 107550.

113871 to 113873. *IRIS* spp. *Iridaceae*.

113871. *IRIS KOLPAKOWSKIANA* Regel.

An iris of the Xiphium group with 4 to 6 narrow linear-subterete leaves and a short, one-flowered scape. The outer perianth segments are deep violet purple with a beardless, bright-yellow keel, and the inner ones are pale lilac. Native to the mountains of Turkistan.

113872. *IRIS NARBUTI* O. Fedtsch.

A dwarf iris of the Juno section with lanceolate curved leaves and one to three showy flowers with yellow falls and violet standards. Native to Turkistan.

113873. *IRIS SONGARICA* Schrenk.

A densely tufted Apogon iris about a foot high, with narrow-linear, strongly ribbed leaves up to a foot in length and two to three lilac-colored flowers over an inch long. Native to central Asia.

For previous introduction see 110982.

113874. *IXIOLIRION TATARICUM* (Pall.) Herbert. *Amaryllidaceae*.

For previous introduction and description see 113519.

113875. *TULIPA KOROLKOVII* Regel. *Liliaceae*.

A low crimson-flowered tulip from Turkistan, 4 to 6 inches high, with narrowly lanceolate leaves exceeding the flowers.

For previous introduction see 109799.

113876. *TULIPA TURKESTANICA* Regel. *Liliaceae*.

A tulip with two or rarely three linear-lanceolate leaves and yellow flowers, violet within, on a scape 3 to 12 inches high. Native to Turkistan.

For previous introduction see 107592.

113877. *DIANTHUS* sp. *Silenaceae*.

From Costa Rica. Plants collected by W. A. Archer, Bureau of Plant Industry. Received March 4, 1936.

No. 3708. *Clavel lila*. From San Isidro de Coronado, February 26, 1936. A plant with lavender-colored flowers; common in the State of Puebla, where it has been cultivated for generations.

113878 to 113888.

From Poland. Seeds presented by the Kórnik Gardens and Arboretum, Kórnik. Received February 24, 1936.

113878 to 113881. *ALLIUM* spp. *Liliaceae*.

113878. *ALLIUM CANADENSE* L.

Meadow garlic.

For previous introduction see 110766.

113878 to 113888—Continued.

113879. *ALLIUM KARATAVIENSE* Regel. **Onion.**

An onion native to Turkistan, with very ornamental broad leaves of a striking blue-green color and dense umbels of dull-pink flowers.

For previous introduction see 82013.

113880. *ALLIUM MONTANUM* F. W. Schmidt.

A rather variable species distributed from eastern Europe through Siberia in dry rocky places. It is usually a low plant with narrow leaves and a hemispherical head of blue-purple flowers.

For previous introduction see 58876.

113881. *ALLIUM SATIVUM* L. **Garlic.**

113882 to 113888. *FESTUCA* spp. **Poaceae.**

113882 and 113883. *FESTUCA OVINA* L. **Sheep fescue.**

113884. *FESTUCA OVINA ALPINA* (Sut.) Wimm. and Grab.

A variety with stems about 4 inches high. Native to Europe.

113885. *FESTUCA OVINA GLAUCA* (Lam.) Koch.

For previous introduction see 111974.

113886. *FESTUCA OVINA VALLESIAICA* (Schleich.) Link.

For previous introduction see 111976.

113887. *FESTUCA RUBRA* L. **Red fescue.**

113888. *FESTUCA RUBRA HETEROPHYLLA* (Lam.) Mutel.

113889 to 113892. *SOLANUM TUBEROSUM* L. **Potato.**

From Scotland. Tubers presented by Dr. George Cockerhan, Scottish Society for Research in Plant Breeding, Craigs House, Corstorphine. Received February 26, 1936.

113889. *Cardinal*.

113890. *Chance*.

113891. *Kepplestone Kidney*.

113892. *Shamrock*.

113893 to 113895. *COIX LACRYMA-JOBI* L. **Jobs-tears.**

From the Philippine Islands. Seeds presented by the Economic Garden, Los Baños, Laguna. Received February 27, 1936.

113893. *Lukfao*.

113894. A glutinous variety of adlay.

113895. A native variety of adlay.

113896. *ARISTOLOCHIA RINGENS* Vahl. **Aristolochiaceae.**

From Florida. Seeds presented by W. Paul Phillips, Orlando. Received February 29, 1936.

A tall slender twining glabrous plant with broadly orbicular-reniform leaves, dull green above and glaucous below. The flowers are 7 to 10 inches long, pale green, marbled and reticulated with black purple. Native to tropical America.

For previous introduction see 97533.

113897. PHELEUM PRATENSE L. Poaceae.
Timothy.

From Scotland. Seeds presented by William Robb, Director of Research, Scottish Society for Research in Plant Breeding, Craigs House, Corstorphine. Received March 3, 1936.

Diploid timothy.

113898 to 113901. MALUS SYLVESTRIS Mill. Malaceae. Apple.

From the Union of South Africa. Plants purchased from H. E. V. Pickstone & Son, Groot Drakenstein, Cape of Good Hope. Received July 30, 1934. Numbered in March 1936.

113898. *Ohinemuri*.

113899. *Rokewood*.

113900. *Wemmer's Hoek*.

113901. *William Anderson*.

113902. VITIS VINIFERA L. Vitaceae.
European grape.

From Japan. Cuttings presented by Rev. A. P. Hassell, the Japan Mission of the Presbyterian Church of the United States, Tokushima. Received March 7, 1936.

Okayama grape (Campbell Early).

113903. BRUNFELSIA AMERICANA L. Solanaceae. Franciscan nightshade.

From Trinidad, British West Indies. Seeds presented by the curator, Royal Botanic Gardens, Port-of-Spain. Received February 28, 1936.

A tropical American plant of dwarf habit, with slender branches and elliptic-ovate, glabrous leaves. The pure white, solitary flowers, shading to pure-yellow with age, are in axillary or terminal panicles and are very fragrant.

For previous introduction see 97903.

113904. CROTALARIA sp. Fabaceae.

From Africa. Seeds presented by R. Anderson, Yapata Estate, Kitale, Kenya Colony. Received February 29, 1936.

113905 to 113910.

From Norway. Seeds presented by the Director, Botanic Garden, Oslo. Received March 3, 1936.

113905. ALLIUM MULTIBULBOSUM Jacq. Liliaceae. Onion.

An onion closely resembling *Allium nitrum*, but differing in the numerous spherical bulblets, its broader and shorter leaves, and in certain floral characters. The flowers, entirely white or with a reddish central stripe in the petals, are in a dense globular cluster. Native to meadows in central Europe.

For previous introduction see 95357.

113906 to 113908. FESTUCA spd. Poaceae. Fescue.

113906. *FESTUCA OVINA L.* Sheep fescue.

113907. *FESTUCA PANCICIANA (Hack.) Richt.*

A perennial grass, native to Europe.

113905 to 113910—Continued.

113908. FESTUCA SPECTABILIS Jan.

A grass native to the mountainous regions of central Europe.

For previous introduction see 25211.

113909. IRIS POLAKII Stapf. Iridaceae.

An Iranian iris of the *Pumila* group with narrow linear leaves and a one-flowered stem up to 4 inches high, with a large violet-veined lilac flower.

113910. IRIS TRIDENTATA Pursh. Iridaceae.

A slender Apogon iris with rather firm, narrow-linear leaves over a foot long and a one- to three-flowered stalk about 2 feet high. The fragrant flowers are bright lilac. Native to the southeastern United States.

113911 and 113912.

From the Soviet Union. Seeds presented by the Director, Government Botanical Garden, Nikita, Yalta, Crimea. Received March 4, 1936.

113911. IRIS ENSATA Thunb. Iridaceae. Russian-iris.

For previous introduction see 110131.

113912. LALLEMANTIA IBERICA (Bieb.) Fisch. and Mey. Menthaceae.

A blue-flowered herbaceous perennial, native to semiarid regions in Asia Minor and Syria, whose seeds yield an oil said to be a high-grade drying oil.

For previous introduction see 99344.

113913 to 113941. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by the plant breeder at the Cowra Experiment Farm, through H. Wenzholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received March 3, 1936.

113913. *Apollo*. C. 4661.

113914. *Carrabin*. C. 4991.

113915. *Caliph*. C. 2708.

113916. *Currawa*. C. 9220.

113917. *Dart's Imperial*. C. 339.

113918. *Flora*. C. 3995.

113919. *Florence*. C. 8808.

113920. *Florida*. C. 3998.

113921. *Florida* × *Warren*. C. 8977.

113922. *Ghurka*. C. 9234.

113923. *Heine's Kolben*. C. 5137.

113924. *Jindera*. C. 3994.

113925. *Kenya* × *Baringa*. 668-5-E₁-2-C₄.

113926. *Kenya* × *Florence*. G₁-1-E₁-1-C₃.

113927. *Kenya* × *Gular*. G-22-1-N₂-C₄.

113928. *Kenya* × *Gular*. G₂₂-2-N₁-C₃.

113929. *Kenya* × *Gular*. C-34-2-E₂-1-C₄.

113930. *Kenya* × *Gular*. G-22-2-N₃-C₄.

113931. *Kenya* × *Gular*. G-41-4-E₁-2-C₃.

113932. *Kenya* × *Gular*. G-6-2-E₁-2-C₄.

113933. *Klein 38 M. A.* C. 9656.

113913 to 113941—Continued.

113934. *Mallan*. C. 4889.
 113935. *Mortey*. C. 5211.
 113936. (*Nabawa* × *Federation* × *Martin* × *Sonora* × *Sonora*)^e.
 113937. *Penny Selection*. C. 2728.
 113938. *Tueta*. C. 4199.
 113939. *Warden*. C. 3230.
 113940. *Warden* × *Forge*. C. 5556.
 113941. *Wardfir* × *Major*. C. 6182.

113942 to 113967. TRITICUM spp. Poaceae. Wheat.

From the Soviet Union. Seeds presented by Dr. N. I. Vavilov, Director, Institute of Plant Industry, Leningrad. Received February 25, 1936.

113942 to 113960. TRITICUM AESTIVUM L. Common wheat.

113942. No. 8547. *Ukrainka 0246* (original). From the Mironovsk Experiment Station.
 113943. No. 23667. *Ersp. 2411*. From the Moscow Experiment Station.
 113944. No. 21680. *Hostianum 237*. From Alexandr. Experiment Station.
 113945. No. 28116. *Saruba*. From Saratov Experiment Station.
 113946. No. 22233. *Caesium 0111*. From the Omsk Experiment Station.
 113947. No. 21859. *Lut. 0329*. From the Saratov Experiment Station.
 113948. No. 11389. *Kooperatorke*. From the Odessa Experiment Station.
 113949. No. 21841. *Stepniatschka*. From the Odessa Experiment Station.

Nos. 113950 to 113960 were from Transjordan.

113950. No. 17403. 113956. No. 17418.
 113951. No. 17404. 113957. No. 17421.
 113952. No. 17405. 113958. No. 17422.
 113953. No. 17407. 113959. No. 17428.
 113954. No. 17413. 113960. No. 17429.
 113955. No. 17417.

113961 to 113963. TRITICUM MACHA Dekapr. and Men.

113961. No. 28170. From Georgia.
 113962. No. 28175. From Georgia.
 113963. No. 28177. From Georgia.

113964. TRITICUM sp.

No. 17425. From Transjordan.

113965 to 113967. TRITICUM THAOU DAR Reut.

113965. No. 29533. From Armenia.
 113966. No. 15901. From Palestine.
 113967. No. 27134. From Asia Minor.

113968 to 113970. SOJA MAX (L.) Piper. Fabaceae. Soybean.

From India. Seeds presented by the agricultural inspector, Khasi and Jaintia Hills, at the request of the economic botanist, Department of Agriculture, Jorhat, Assam. Received March 5, 1936.

113968 to 113970—Continued.

A collection of late-maturing Indian varieties of soybeans.

113968. *Nepali*; a large variety.
 113969. *Spotted Khasi*.
 113970. *White Khasi*.

113971. CHRYSANTHEMUM ERUBESCENS Stapf. Asteraceae.

From England. Plants presented by Sir Arthur W. Hill, Director, Royal Botanic Gardens, Kew, Surrey. Received March 14, 1936.

113972. SOLANUM TUBEROSUM L. Solanaceae. Potato.

From Uruguay. Tubers presented by the Instituto Fitotecnico y Semillero Nacional, La Estanzuela, Montevideo. Received March 12, 1936.

Chaquena.

113973. PYRUS COMMUNIS L. Malaceae. Pear.

From Portugal. Scions presented by Silveira da Cunha, Direcção Geral dos Serviços Agrícolas, Ministério de Agricultura, Lisbon, at the request of Parker W. Buhman, American consul general, Lisbon. Received March 23, 1936.

Pera Rocha, a red pear.

113974. HYPTIS SUAVEOLENS (L.) Poit. Menthaceae.

From Costa Rica. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 6, 1936.

Chan. (No. 3695?) From San José. A rigid annual of the mint family, which grows to a height of 2 or 3 feet, has a hairy stem, exceedingly variable leaves, and second flower heads. The seeds are used in Costa Rica to make an agreeable beverage. Native to tropical America.

113975 to 113980. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Guatemala. Seeds obtained through the American consul, Guatemala City, at the request of W. A. Archer, Bureau of Plant Industry. Received March 11, 1936.

From the Departamento Quiché.

113975. From Canton La Estancia, Jurisdicción Joyabaj.

113976. From Chiché.

113977. From Chichicastenango.

113978. From Canton Lencua, Jurisdicción Joyabaj.

113979. From Cunen.

113980. From Zacualpa.

113981 to 113983. PHLEUM PRATENSE L. Poaceae. Timothy.

From Sweden. Seeds presented by Algot Holmberg & Sons, Norrköping. Received March 10, 1936.

A collection of strains developed by Algot Holmberg & Sons.

113981. No. 1. A strain with moderately tall stems, very leafy, dark green.

113981 to 113983—Continued.

113982. No. 3. A strain with moderately tall stems, very leafy, medium green.

113983. *Ostgota*.

113984 and 113985. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Ceylon. Seeds presented by the economic botanist, Department of Agriculture, Colombo, through Robert L. Buell, American consul, Colombo. Received March 11, 1936.

113984. *Dumbara*. 113985. *Jaffna*.

113986 to 113988. PRUNUS ARMENIACA L. Amygdalaceae. Apricot.

From Syria. Trees and scions purchased from Selim Challah, Damascus. Received March 12, 1936.

113986. *Ajami*. A sweet, firm-fleshed white apricot.

113987. *Baladi*. A red apricot, rich in flavor.

113988. *Hamwi*. A white, soft-fleshed apricot.

113989. GOSSYPIUM BARBADENSE L. Malvaceae. Sea-island cotton.

From Puerto Rico. Seeds presented by F. A. Lopez Dominguez, Director, Experiment Station, Rio Piedras. Received March 16, 1936.

113990. JUBAEA CHILENSIS (Molina) Baill. Phoenicaceae. Sirup palm.

From Chile. Seeds collected by Mrs. Ynes Mexia, collaborator, Bureau of Plant Industry. Received March 12, 1936.

For previous introduction see 113504.

113991 to 114027. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Costa Rica and Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 18, 1936.

Collected in February and March 1936, and, unless otherwise stated, the material was collected in Costa Rica.

113991. No. 3673. From San José. Volunteer plants.

113992. No. 3674. From San Pedro. Cultivated plants.

113993. No. 3700. From San Josecito de Alajuela. Volunteer plants.

113994. No. 3701. From San Pedro de Barba. Volunteer plants with narrow leaves and cerise-red flowers.

113995. No. 3702. From San Pedro de Barba. Volunteer plants with white flowers.

113996. No. 3703. From Barrio Jesús de Santa Barbara. Volunteer plants.

113997. No. 3705. *Colorado*. From Turrialba. Cultivated.

113998. No. 3706. *Chiricano*. From Turrialba. Cultivated.

113999. No. 3709. From Cachi. Cultivated.

Nos. 114000 to 114005 were from El Paraiso. Cultivated.

113991 to 114027—Continued.

114000. No. 3711.

114001. No. 3712. *Chiricano*.

114002. No. 3713.

114003. No. 3714.

114004. No. 3715. *Cacho Chivo*.

114005. No. 3716.

114006. No. 3718. From Ujarrás. A cultivated strain with large leaves, found in an old field.

114007. No. 3719. From Cachi. A volunteer plant with small leaves and pink flowers.

114008. No. 3721. From El Paraiso. Cultivated plants.

Nos. 114009 to 114014 were from Palmares, near El General. Cultivated tobacco.

114009. No. 3724. *Virginia*.

114010. No. 3725. *Largo*.

114011. No. 3726. *Criollo* (probably).

114012. No. 3727. *Kentucky negro*.

114013. No. 3728. *Largo*.

114014. No. 3729. *Criollo*.

114015. No. 3730. *Palmira*. Cultivated plants from Alajuela.

114016. No. 3731. *Kentucky*. Cultivated plants from Alajuela.

114017. No. 3732. From Turrialba. Cultivated tobacco.

114018. No. 3733. From Encarnación, Jalisco, Mexico.

114019. No. 3734. *Tabaco blanco*. From Turrialba. Cultivated plants.

114020. No. 3735. *Itzetepeque*. From Paso Ancho de San Sebastian. Cultivated tobacco.

Nos. 114021 and 114022. *Itzetepeque*. From Palmares, Province Alajuela.

114021. No. 3749.

114022. No. 3750. Selected seed, probably a pure strain.

114023. No. 3751. *Criollo*. From San Joaquin de Heredia. Cultivated plants with pale-pink flowers.

114024. No. 3696. *Copan*. From Escazu. Cultivated plants.

114025. No. 3697. From Santa Rosa. Volunteer plants with pale-pink flowers.

114026. No. 3698. A mixed sample from San Josecito de Alajuela.

114027. No. 3699. *Itzetepeque* (hybrid). Volunteer plants from Santa Rosa.

114028 and 114029.

From the Soviet Union. Seeds presented through N. I. Sharapov, Head, Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received March 12, 1936.

114028. PRUNUS JAPONICUS Thunb. Amygdalaceae. Chinese bush cherry.

114029. PRUNUS TOMENTOSA Thunb. Amygdalaceae. Manchou cherry.

For previous introduction see 92057.

114030 to 114035.

From Iraq. Seeds presented by M. S. Radi, Director of Agriculture, Baghdad. Received March 14, 1936.

114030. *ALLIUM CEPA* L. Liliaceae. Onion.
A round white onion.

114031. *ALLIUM PORRUM* L. Liliaceae. Leek.
Egyptian leek.

114032. *BRASSICA RAPA* L. Brassicaceae. Turnip.

114033. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.

114034. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

114035. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

114036 to 114055.

From Costa Rica and Honduras. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 10, 1936.

114036. *CUPRESSUS BENTHAMII* Endl. Pinaceae. Bentham cypress.

No. 3677. From San Pedro, Costa Rica, February 20, 1936. A cypress of elegant habit often up to 90 feet high, with regularly pinnate flattened branchlets. Native to southern Mexico and Central America at altitudes of 4,000 to 10,000 feet.

114037. *HYPTIS SUAVEOLENS* (L.) Poit. Menthaceae.

No. 3695. *Chan.* From the market at Alajuela, Costa Rica, February 22, 1936.

For previous introduction and description see 113974.

114038. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 3671. From Santa Rosa de Copan, Honduras, February 1, 1936.

114039. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

No. 3672. From Veracruz, Departamento Copan, Honduras, February 1, 1936. Cultivated tobacco.

114040. *POLAKOWSKIA TACACO* Pittier. Cucurbitaceae.

No. 3690. *Tacaco.* From San José, Costa Rica, February 21, 1936. A perennial climber, related to the chayote, *Sesquium edule*, native to Costa Rica. The fleshy fruits, about 2 inches long, are cooked and eaten as a vegetable.

114041 to 114054. *PHASEOLUS* spp. Fabaceae.

A collection of cultivated beans from Costa Rica.

114041. *PHASEOLUS CALCARATUS* Roxb. Rice bean.

No. 3689. *Frijoles de arroz.* From the market at San José, February 21, 1936.

114042. *PHASEOLUS COCCINEUS* L. Scarlet runner bean.

No. 3676. Cuba. From San José, February 16, 1936.

114043 to 114054. *PHASEOLUS VULGARIS* L. Common bean.

114043. No. 3680. *Bayos.* From San Pedro, February 20, 1936.

114036 to 114055—Continued.

114044. No. 3694. *Bayos.* From Alajuela, February 22, 1936.

Nos. 114045 to 114047 were collected at San Pedro, February 20, 1936.

114045. No. 3681. *Blanco.*

114046. No. 3686. *Carnes.*

114047. No. 3687. *Chilenos.*

114048. No. 3688. *Chimbolos.* From the market at San José, February 21, 1936.

Nos. 114049 to 114054 were collected in San Pedro, February 20, 1936.

114049. No. 3678. *Guarías.*

114050. No. 3682. *Jamíaqueños.*

114051. No. 3679. *Morados.*

114052. No. 3683. *Múñeco.*

114053. No. 3685. *Pisques.*

114054. No. 3684. *Porotos.*

114055. *SORGHUM VULGARE* Pers. Poaceae. Sorghum.

No. 3675. *Millo.* From San José, Costa Rica, February 16, 1936. Grains popped like popcorn for candy; also used for poultry feed.

114056. *QUERCUS* sp. Fagaceae. Oak.

From France. Plants purchased from Leopold Level, Martel (Lot). Received March 18, 1936.

Truffle oak.

114057 to 114065.

From Costa Rica. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received March 17, 1936.

Nos. 114057 and 114058 were collected at San Rafael de Coronado, February 26, 1936.

114057. (Undetermined.)

No. 3744. *Nardo.*

114058. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 3742. *Nardo.*

114059. (Undetermined.)

No. 3704. *Resurrección.* Collected at San Rafael de Coronado, February 23, 1936. A cultivated ornamental.

114060. *GLADIOLUS* sp. Iridaceae.

No. 3741. *Lluvia de oro.* From San José, March 2, 1936.

114061. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 3743. *Nardo.* From San Rafael de Coronado, February 28, 1936. A variety with white flowers marked with pink.

114062. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 3745. *Nardo.* From Cartago, February 21, 1936.

Nos. 114063 to 114065 were collected at San José, February 28, 1936.

114063. *ZEPHYRANTHES* sp. Amaryllidaceae.

No. 3738. *Lagrimas de María.* A strain with white flowers.

114057 to 114065—Continued.

114064. ZEPHYRANTHES sp. Amaryllidaceae.

No. 3739. *Lagrimas de Maria*. Flowers pink.

114065. ZEPHYRANTHES sp. Amaryllidaceae.

No. 3740. *Lagrimas de Maria*. Flowers pink; said to be native.

114066. RUBUS MACROCARPUS Benth. Rosaceae. Colombian blackberry.

From Colombia. Seeds presented by Alexander M. Allen, Ibaguè. Received March 16, 1936.

The Colombian berry or Mora.

For previous introduction see 112017.

114067 to 114073. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Colombia and Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received March 19, 1936.

Nos. 114067 and 114068. *Ambalema*, were collected at Rozo, Palmira, Valle, Colombia.

114067. No. 68. 114068. No. 69.

114069. No. 70. *Pina*. Collected Janu- collected at Rozo, Palmira, Valle, Colombia.

Nos. 114070 to 114073 were collected in Ecuador.

114070. No. 71. *Shairi*. Collected February 24, 1936, at Ibarra, Imbabura. Petiolated tobacco.

114071. No. 72. From Quito.

114072. No. 73. "Tallo-Blanco-500." Argentina. From Quito.

114073. No. 74. *Tobacco común*. From San Pedro, Imbabura, February 23, 1936.

114074. PRUNUS SIBIRICA L. Amygdalaceae. Siberian apricot.

From Manchuria. Seeds purchased from L. Pittsin, Harbin. Received March 18, 1936.

A wild Siberian apricot collected on the western shore of Lake Delai Nor, Barga District.

114075 to 114080. ASTER spp. Astera- ceae.

From the Netherlands. Plants purchased from B. Ruys Ltd., Royal Moerheim Nurseries, Dedemsvaart. Received March 24, 1936.

114075. ASTER ACRIS L.

A showy slender-branched perennial aster up to 3 feet high, with large blue- flower heads. Native to southern Europe.

114076. ASTER.

Lady Henry Maddocks, a hybrid with pale-pink flowers.

114077. ASTER.

Ronald. A hybrid 12 inches high with bright lilac-pink flowers.

114078. ASTER AMELLUS L.

Rud Goethe. A form with lavender- blue flowers.

114075 to 114080—Continued.

114079. ASTER AMELLUS L.

Sonia. A late-blooming form with bright rose-pink flowers.

114080. ASTER NOVI-BELGI L.

Col. F. R. Durham. A form over 3 feet high, with dark-green feathery foliage and many double purple-blue flowers.

114081. TEPHROSIA TOXICARIA (Sw.) Pers. Fabaceae.

From Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received March 19, 1936.

Collected near Guayaque (Carolina), Province of Imbabura, February 24, 1936.

114082 to 114088. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Costa Rica. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 24, 1936.

114082. No. 3710. Volunteer tobacco from Los Angeles.

114083. No. 3720. Volunteer tobacco from Los Angeles.

114084. No. 3753. *Itzetepeque*. From San José.

114085. No. 3759. *Itzetepeque*. From San Miguel de Naranjo.

114086. No. 3760. From San Miguel de Naranjo.

114087. No. 3762. *Chiricano*. From Gerardo.

114088. No. 3765. From Santiago de Purisael.

114089 and 114090.

From Africa. Seeds purchased from the Mount Elgon Nurseries, Kitale, Kenya Colony. Received March 30, 1936.

114089. GLORIOSA ROTHSCILDIANA O'Brien. Melanthiaceae.

Lutea. A branching gloriosa with bright-green, oblong-acuminate leaves and large yellow flowers with brown markings. Native to tropical Africa.

114090. PENTAS LANCEOLATA (Forsk.) Schum. Rubiaceae.

A soft-wooded shrub 2 feet high, native to tropical Africa. The ovate-lanceolate leaves are 3 to 6 inches long, and the brilliant carmine flowers are in terminal heads. The plant must have partial shade.

For previous introduction see 99615.

114091 to 114107. ASTER spp. Astera- ceae.

From the Netherlands. Plants purchased from B. Ruys Ltd., Royal Moerheim Nurseries, Dedemsvaart. Received March 25, 1936.

114091. ASTER ACRIS L.

For previous introduction and description see 114075.

114092 to 114095. ASTER.

114092. *Countess of Dudley*, a hybrid with clear pink flowers.

114093. *Marjorie*, a hybrid with bright rose-pink flowers.

114091 to 114107—Continued.

114094. *Nancy*, a hybrid with pale flesh-pink flowers.

114095. *Victor*, a hybrid 6 inches high with clear pale-lavender flowers.

114096 to 114106. *ASTER AMELLUS* L.

A collection of dwarf varieties about 24 inches high, which bloom in August and September.

114096. *Blaustern*, flowers very early, violet.

114097. *Elisabeth Liemann*, deep-pink flowers.

114098. *Friquet*, delicate pale-pink flowers.

114099. *Heinrich Seibert*, extra large pink flowers.

114100. *King George*, bluish-violet flowers.

114101. *Madame Besnard*, compact, large pink flowers.

114102. *Mignon*, dark-blue flowers with narrow petals.

114103. *Moerheim Gem*, very large, brilliant, deep dark-purple flowers.

114104. *Rosa von Ronsdorf*, pure-pink flowers.

114105. *Rotfeuer*, deep-red flowers.

114106. *Schönste von Eisenach*, deep-pink, very large, well-formed flowers; an excellent pink novelty.

114107. *ASTER NOVI-BELGII* L.

Charles Wilson, a lovely cerise pink of a quite new rare shade; a great improvement of the variety *Red Rover*.

114108. *AMMIOCHARIS COCCINEA* Pax. Amaryllidaceae.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received March 21, 1936.

A bulbous amaryllid, with many strap-shaped leaves and a dense umbel, over 6 inches in diameter, of large bright-crimson flowers. Native to southern Africa.

114109. *GOSSYPIUM*. Malvaceae.

Cotton.

From Argentina. Seeds presented by the Estación Experimental Agrícola, Tucuman. Received November 27, 1935. Numbered in March 1936.

Chaco cotton.

114110. *GOSSYPIUM HIRSUTUM* L. Malvaceae. Upland cotton.

From Mexico. Seeds collected in Chiapas by J. H. Kempton, Bureau of Plant Industry. Received November 26, 1935. Numbered in March 1936.

Acala cotton.

114111. *SACCHARUM*. Poaceae.

Sugar cane.

From Egypt. Cuttings presented by A. H. Rosenfield, Sugar Technologist, Department of Agriculture, Giza. Received March 26, 1935. Numbered in March 1936.

E No. 12.

114112 to 114121. *VITIS VINIFERA* L. Vitaceae. European grape.

From the Soviet Union. Cuttings presented by A. Popov, head of Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received March 26, 1936.

114112. *Black Kishmish*.

114113. *Hassaine*.

114114. *Houssaine*.

114115. *Katia Kurgan*.

114116. *Nimrang*.

114117. *Saidi-Gulami*.

114118. *Sultana*.

114119. *Tcharas*.

114120. *Toif*.

114121. *Tshilaci*.

114122 to 114140.

From Costa Rica and Honduras. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received in March 1936.

114122 to 114136. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

Nos. 114122 to 114128 were collected in Costa Rica.

114122. No. 3717. From Crosi. Volunteer tobacco.

114123. No. 3722. From San Isidro del General.

114124. No. 3723. From San Isidro del General.

114125. No. 3754. From San Isidro de San Ramon.

114126. No. 3755. From San Isidro de San Ramon.

114127. No. 3757. *Goludo*. From San Miguel de Naranjo.

114128. No. 3761. *Cacho de Chivo*. From Gerardo.

Nos. 114129 to 114136 were collected in Honduras.

114129. No. 3766. From Trinidad de Copan.

114130. No. 3767. From Dolores de Copan.

114131. No. 3768. From Veracruz de Copan.

114132. No. 3769. From Florida de Copan.

114133. No. 3770. From Concepcion de Copan.

114134. No. 3771. *Sumatra Dehli prima*. From El Paraiso.

114135. No. 3772. *Sumatra Dehli segunda*. From El Paraiso.

114136. No. 3773. *Sumatra Java prima*. From El Paraiso.

114137. *HIPPEASTRUM* SP. Amaryllidaceae. No. 3764. Bulbs collected at San José, Costa Rica, March 8, 1936.

114138. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. Okra.

No. 3736. *Cajé de Mocha*. From San José, Costa Rica, February 28, 1936. The green fruits are used as a vegetable; the seeds are dried and used as coffee.

114122 to 114140—Continued.

114139. *IPOMOEAE* sp. Convolvulaceae.

No. 3737. *Campanula*. From San José, Costa Rica, February 29, 1936. A native ornamental with large sky-blue flowers.

114140. *SENECIO* sp. Asteraceae.

No. 3747. Collected near El Paraiso, Costa Rica, February 27, 1936. An ornamental composite with dark red-orange flowers.

114141 and 114142. *GOSSYPIUM*. Malvaceae. Cotton.

From Haiti. Seeds collected by H. D. Barker, Bureau of Plant Industry, at the Agricultural Experiment Station, Port-au-Prince. Received March 27, 1936.

114141. Selection of Forbes-Barker cotton, 36-8-34-5.

114142. Selection of Forbes-Barker cotton, R-6-8-29.

114143 to 114149.

From Rumania. Seeds presented by Prof. M. Vladescu, Director, Botanic Garden of the University of Bucharest, Bucharest. Received March 20, 1936.

114143 to 114146. *DELPHINIUM* spp. Ranunculaceae. Larkspur.

114143. *DELPHINIUM CONSOLIDA* L. Field larkspur.

An erect hairy annual over a foot high, with blue or white flowers in loose panicles. Native to Europe.

For previous introduction see 104951.

114144. *DELPHINIUM LAXIFLORUM* DC.

A hardy herbaceous perennial about 3 feet high, with three- to seven-lobed leaves and blue flowers in lax racemes. Native to Siberia.

114145. *DELPHINIUM SULPHUREUM* Boiss. and Haussk.

A tuberous-rooted delphinium up to 2 feet high. The dark-green leaves have several narrow linear lobes, and the large light-yellow flowers are in long racemes. Native to Iran (Persia).

114146. *DELPHINIUM ILIENSE* Huth.

An erect perennial about 3 feet high, with much-divided leaves and many pale-blue flowers in long racemes. Native to Turkistan.

114147. *DIANTHUS GLACIALIS* Haenke. Sileneaceae.

A tufted perennial up to 4 inches high, similar to *Dianthus alpinus*. The small odorless red-purple flowers are borne singly or up to three in a cluster. Native to the mountains of southern Europe.

114148. *RUBUS CAESIUS* L. Rosaceae. Dewberry.

For previous introduction and description see 113859.

114149. *RUBUS ROSAEFOLIUS* J. E. Smith. Rosaceae. Roseleaf raspberry.

A raspberry native to southeastern Asia and evergreen in the Tropics. The hairy stems are 3 to 6 feet high, the pinnately compound leaves are made up of two to seven pairs of ovate sharply serrate leaflets, and the white flowers, 1 to 2 inches across, are in small clusters and are fol-

114143 to 114149—Continued.

lowed by erect, bright-red, thimble-shaped fruits nearly 2 inches long, edible but insipid.

For previous introduction see 99706.

114150 to 114188.

From the Netherlands. Seeds presented by the Director, Botanic Garden, Leyden. Received March 25, 1936.

114150 to 114159. *CUCURBITA* spp. Cucurbitaceae.

114150. *CUCURBITA FICIFOLIA* Bouche. Alcollota.

A melon, native to Ecuador, where it is cultivated extensively and used as food for man as well as for stock feed. The melons weigh 20 to 30 pounds each; when completely ripe the shell is very hard, the flesh white and the seeds black. There are two varieties—the white-shelled and the green and white striped.

For previous introduction see 76092.

114151 and 114152. *CUCURBITA MAXIMA* Duchesne. Squash.

114153 to 114159. *CUCURBITA PEPO* L. Pumpkin.

114153. The common type.

114154. Variety *Aurantiaca*.

114155. Variety *Citriformis*.

114156. Variety *Maliformis*.

114157. Variety *Ovifera*.

114158. Variety *Pyriformis*.

114159. Variety *Verrucosa*.

114160 to 114166. *DELPHINIUM* spp. Ranunculaceae. Larkspur.

114160. *DELPHINIUM ELATUM* L. Bee larkspur.

A European species 2 to 6 feet high, bearing blue flowers with dark-violet petals.

For previous introduction see 53143.

114161. *DELPHINIUM CONSOLIDA* L. Field larkspur.

For previous introduction and description see 114143.

114162. *DELPHINIUM GEYERI* Greene.

A perennial delphinium up to about 2 feet high, with rather large, deep-blue flowers in a compact raceme. Native to the high plains of Wyoming and Colorado.

114163. *DELPHINIUM MAACKIANUM* Regel.

An erect, perennial delphinium up to 3 feet high, with three- to five-parted leaves and many blue flowers in racemes. It is closely related to *Delphinium elatum*.

114164. *DELPHINIUM TATSIIENSE* Franch.

A larkspur from western China with slender stems and hairy leaves divided into three to five deep sections. The deep-blue flowers are in a large loose raceme.

For previous introduction see 104851.

114150 to 114188—Continued.

114165. DELPHINIUM TRISTE Fisch.

A perennial larkspur with three- to five-parted leaves and lax racemes of dark reddish-tan flowers. Native to Siberia.

For previous introduction see 104953.

114166. DELPHINIUM sp.

114167. PHASEOLUS COCCINEUS L. Fabaceae.
Scarlet runner bean.114168 and 114169. PISUM SATIVUM L. Fabaceae.
Pea.114170 to 114177. RHEUM spp. Polygonaceae.
Rhubarb.

114170. RHEUM AUSTRALE Don.

For previous introduction see 110582.

114171. RHEUM FRANZENBACHII Muenster.

A rapidly growing species, native to temperate Asia. It is a striking ornamental, suitable for borders and possibly useful for breeding purposes.

For previous introduction see 110625.

114172. RHEUM MACROPERUM Mart.

A plant with handsome foliage and striking clusters of flowers and seeds, valuable perhaps for borders or breeding purposes. Country of origin unknown.

For previous introduction see 110626.

114173. RHEUM MOORCROFTIANUM Royle.

A stout stemless plant with large, thick, orbicular leaves, all radical. Native to the western Himalayas.

For previous introduction see 31042.

114174. RHEUM OFFICIANALE Baill.

A stout perennial with a short branching stem and very large round-oval leaves 1 to 3 feet across. The flower stems, 3 to 10 feet high, bear the numerous greenish flowers in a large feathery panicle. This is the medicinal rhubarb found throughout western China.

For previous introduction see 110627.

114175. RHEUM RHAPONTICUM L.
Common rhubarb.

114176. RHEUM RIBES L.

A herbaceous perennial up to 5 feet high, with large cordate to reniform leaves and panicles of small blood-red, narrow-winged fruits. Native to the mountains of southwestern Asia.

114177. RUBUS CAESIUS L. Rosaceae.
Dewberry.

For previous introduction and description see 113859.

114178 to 114188. SOLANUM spp. Solanaceae.

114178. SOLANUM ARGENTEUM Dun.

A shrub about 6 feet high, with ovate-oblong leaves about 4 inches long and small white flowers. Native to Brazil.

114179. SOLANUM AVICULARE Forst. f.
Nightshade.

A bushy shrub 6 to 8 feet high, with lacinate leaves 10 inches long, small cymes of large dark-purple flowers, and

114150 to 114188—Continued.

yellowish fruits an inch in diameter, which are used for making marmalade.

For previous introduction see 110658.

114180. SOLANUM CAPSICASTRUM Link.
False Jerusalem-cherry.

For previous introduction see 110762.

114181 and 114182. SOLANUM DULCAMARA L.
Bitter nightshade.

For previous introduction see 110812.

114183 and 114184. SOLANUM MELONGENA L.
Eggplant.

For previous introduction see 114035.

114185 and 114186. SOLANUM NIGRUM L.
Bitter nightshade.

For previous introduction see 110590.

114187. + SOLANUM PROTEUS Winkl.

A graft hybrid (*Lycopersicon esculentum* × *Solanum nigrum*).

114188. SOLANUM TUBEROSUM L. Potato.

114189 and 114190. ZEPHYRANTHES spp.
Amaryllidaceae.

From Mexico. Bulbs collected at Tapachulo, Chiapas, by W. A. Archer, Bureau of Plant Industry. Received March 26, 1936.

114189. ZEPHYRANTHES sp.

No. 3774. Collected March 14, 1936. A species with white flowers.

114190. ZEPHYRANTHES ROSEA Lindl.
Pink zephyrilly.

No. 3775. Collected March 14, 1936. A tender autumn-blooming species, native to Cuba, with linear, bright-green leaves and rose-colored flowers an inch long on a peduncle 4 to 6 inches long.

For previous introduction see 112352.

114191. SACCHARUM SPONTANEUM L.
Poaceae.

From Japan. Cuttings presented by Dr. T. Miyake, Department of Agriculture, Government Research Institute, Taihoku, Formosa.

114192 to 114203. TRICYRTIS spp. Melanthiaceae.

From Japan. Plants purchased from K. Wada, Hakoneya Nurseries, Numazu-shi. Received March 31, 1936.

114192. TRICYRTIS FLAVA Maxim.

A dwarf tricyrtis with oblong-lanceolate leaves and large yellow campanulate flowers in racemes. Native to Japan.

114193. TRICYRTIS FORMOSANA Baker.

A herbaceous perennial with flexuous stems up to 10 inches high, sessile lanceolate leaves 4 to 5 inches long, and showy blended spotted, red- and blue-purple flowers in lax few-flowered corymbs. Native to Taiwan.

114194. TRICYRTIS HIRTA Hook.

Variety *Albida*. A form with pure-white flowers.

114195. TRICYRTIS LATIFOLIA Maxim.

A tricyrtis with zigzag stems up to 3 feet high, broadly oblong or ovate leaves, and a terminal corymb of whitish flowers with small purple spots. Native to Japan.

114192 to 114203—Continued.

114196. *TRICYRTIS MACRANTHA* Maxim.

A *tricyrtis* with large, pendent, campanulate, sulfur-yellow flowers. Native to Japan.

114197. *TRICYRTIS OHSUMIENSIS* Masamune.

A *tricyrtis* over a foot high with pubescent, oblong leaves up to 5 inches long, and large yellow axillary flowers. Closely allied to *Tricyrtis flava*. Native to Japan.

114198. *TRICYRTIS STOLONIFERA* Matsum.

A herbaceous perennial with a stoloniferous base and stems about 1 foot high, which are hairy when young and later become glabrous. The elliptic-lanceolate leaves 2 to 4 inches long, narrowed to a sheathing base, have dark blotches and sunken nerves, and the pale-purple flowers are indistinctly blotched with deeper purple. Native to Japan.

114199. *TRICYRTIS YATABEANA* Masamune.

A herbaceous perennial with leafy stems about a foot high, oblong-lanceolate leaves, and showy, yellow, bell-shaped flowers with dark purple spots. Native to Japan.

114200. *TRICYRTIS* sp.

114201. *TRICYRTIS FORMOSANA* × *HIRTA*.

Hekium, a hybrid with large panicles of bluish-pink flowers.

114202. *TRICYRTIS FORMOSANA* × *HIRTA*.

Toun, a hybrid similar in habit to *hirta*. The flowers, borne on a terminal open panicle, are variable in color; some thickly speckled and blotched with rich red purple on a ground of pale pink; others similarly marked with blue purple on a light-blue base.

114203. *TRICYRTIS* sp.

Received under the name "ohsimanense," for which a place of publication has not been found.

114204 to 114291.

From India. Seeds collected in the Spiti District, Punjab, by the Asiatic Expedition. Received March 2, 1936.

114204 to 114208. *AGROPYRON* spp. Poaceae. Grass.

114204. *AGROPYRON DENTATUM* Hook. f.

No. 7. From Wangtoo, Bashahr. A perennial grass allied to *Agropyron repens*. Native to Kashmir and western Tibet at altitudes of 9,000 to 14,000 feet.

114205. *AGROPYRON INTERMEDIUM* (Host) Beauv.

No. 15. From Kyibar, September 28, 1935.

For previous introduction see 111251.

114206. *AGROPYRON LONGEARISTATUM* Boiss.

No. 4. From Losar, September 22, 1935. A perennial grass with ascending stems up to 3 feet high. Native to Iran (Persia).

114207. *AGROPYRON LONGEARISTATUM* Boiss.

No. 34. From Losar, September 24, 1935.

114204 to 114291—Continued.

114208. *AGROPYRON SEMICOSTATUM* Nees.

No. 16. From Kyibar, September 27, 1935. A perennial fibrous rooted grass with erect stems and narrowly linear leaves; native to Asia from Afghanistan to Manchuria.

For previous introduction see 109808.

114209 and 114210. *AGROSTIS ALBA* L. Poaceae. Redtop.

114209. No. 14. From the Kaza Pin Valley, September 29, 1935.

114210. No. 14-A. From the Kaza Pin Valley, October 1, 1935.

114211. *ALLIUM* sp. Liliaceae.

No. 61. From Kyibar, September 28, 1935.

114212. *ARABIS TIBETICA* Hook. f. and Thoms. Brassicaceae.

No. 48. From Kioto, September 25, 1935. A perennial herb with numerous leafy stems about 6 inches high; obovate to lanceolate or spatulate leaves and numerous small white or pink flowers in racemes. Native to the Himalayas at altitudes of 9,000 to 16,000 feet.

114213. *ARNEBIA* sp. Boraginaceae.

No. 57. From Kyibar, September 27, 1935. A good fodder plant.

114214. *ARTEMISIA PARVIFLORA* Buch.-Ham. Asteraceae.

No. 52. From Kyuling, October 2, 1935. A perennial herb with ascending stems. Native to the temperate Himalayas at altitudes of 5,000 to 9,000 feet.

114215 to 114218. *ASTRAGALUS* spp. Fabaceae. Milkvetch.

114215. *ASTRAGALUS PEDUNCULARIS* Royle.

No. 40. From Chikkim, September 28, 1935, at 13,000 feet altitude. A tall herbaceous perennial, native to north-eastern India; common on dry slopes.

114216. *ASTRAGALUS* sp.

From Dahl, Kulu, at 10,000 feet altitude, September 1935.

114217. *ASTRAGALUS* sp.

No. 41. From Kyibar, September 27, 1935. An herb with woolly pods.

114218. *ASTRAGALUS* sp.

No. 42. From Pin Valley, October 2, 1935.

114219. *AVENA ASPERA* Munro. Poaceae. Grass.

No. 8. From Losar, Bashahr, September 21, 1935. A tall slender perennial grass. Native to Ceylon.

114220 to 114223. *BROMUS* spp. Poaceae. Grass.

114220. *BROMUS GRACILLIMUS* Bunge.

No. 26. From Losar, September 25, 1935. An annual grass with erect stems about 1 foot high. Native to southeastern Asia.

114221. *BROMUS MACROSTACHYS* Desf.

No. 19. From Kyuling, Pin Valley, October 2, 1935. An erect annual grass up to 2 feet high. The narrow compact panicle consists of a few large

114204 to 114291—Continued.

spikelets. It is native to the Mediterranean region and is sometimes cultivated as an ornamental.

For previous introduction see 107503.

114222. *BROMUS RAMOSUS* Huds.

No. 10. From Kyuling, Pin Valley, October 4, 1935, at 13,000 feet altitude. A perennial grass with erect stems, sometimes 6 feet high. Native to Europe.

114223. *BROMUS SQUARROSUS* L.

No. 9. From Wangtoo, Bashahr, October 8, 1935.

For previous introduction see 111164.

114224 to 114228. *CALAMAGROSTIS* spp. Poaceae.114224. *CALAMAGROSTIS COMPACTA* (Munro) Hack.

No. 25. From Losar, September 24, 1935. A densely tufted perennial alpine grass with stems 6 to 18 inches high. Native to the Himalayan region.

114225 to 114227. *CALAMAGROSTIS NEPALENSIS* Nees.

A perennial grass, native to the Himalayan region.

114225. No. 9. From Kyibar, September 27, 1935, at 13,400 feet altitude.

114226. No. 9-A. From Kioto, September 28, 1935.

114227. No. 9-B. From Pin Valley, October 8, 1935.

114228. *CALAMAGROSTIS* sp. No. 30-A.114229. *CARDUUS* sp. Asteraceae.

No. 51. From Kioto, September 25, 1935.

114230 to 114233. *CAREX* spp. Cyperaceae. Sedge.114230. *CAREX REMOTA* L.

No. 4. From Kara, Bashahr, October 5, 1935. A sedge with slender clustered stems sometimes over 2 feet high. Native to north temperate regions.

114231. *CAREX* sp.

No. 12. From Kyibar, September 27, 1935.

114232. *CAREX* sp.

No. 31. From Losar, September 23, 1935.

114233. *CAREX* sp.

No. 8. From Losar, October 5, 1935.

114234. *CHENOPODIUM FOLIOSUM* (Moench) Aschers. Chenopodiaceae.

No. 60. From Kyibar, September 2, 1935.

114235. *CHRISTOLEA CRASSIFOLIA* Cambess. Brassicaceae.

No. 49. From Kyibar, September 28, 1935. A bushy perennial about 1 foot high, with obovate-cuneate leaves deeply notched at the tip and loose racemes of very small yellow flowers. Native to northeastern India.

114204 to 114291—Continued.

114236. *CICER SONGARICUM* Steph. Fabaceae.

No. 37. From Losar, September 24, 1935. A widespreading annual with wiry stems and thick leaves about 4 inches long, the 10 to 12 pairs of ovate leaflets gradually growing smaller upwards. Native to central Asia.

114237. *CYNODON DACTYLON* (L.) Pers. Poaceae. Bermuda grass.

No. 1. From Wangtoo, Bashahr, October 8, 1935, at 9,000 feet altitude.

114238. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.

No. 2. From Kara, Bashahr, October 5, 1935, at 12,500 feet altitude.

114239. *DANTHONIA CACHEMYRIANA* Jaub. and Spach. Poaceae. Grass.

No. 28. From Kaze, September 29, 1935. A perennial grass with stems up to 2 feet high, ascending from a stout woody stock, densely tufted or creeping below. Native to the temperate and alpine Himalayas and western Tibet at altitudes of 10,000 to 14,000 feet.

For previous introduction see 49629.

114240. *DIGITARIA SANGUINALIS* (L.) Scop. Poaceae.

No. 3. From Bashahr, September 22, 1935.

114241 to 114243. *ELYMUS* spp. Poaceae.114241. *ELYMUS DASYSTACHYS* Trin.

No. 3. From Losar, October 8, 1935.

For previous introduction see 113125.

114242. *ELYMUS SIBIRICUS* L.

No. 11. From Kyibar, September 27, 1935.

114243. *ELYMUS SIBIRICUS* L.

No. 13. From Losar, September 23, 1935.

114244. *EPHEDRA GERARDIANA* Wall. Gnetaeae.

No. 59. From Pin Valley, October 2, 1935.

For previous introduction and description see 113620.

114245. *FERULA* sp. Apiaceae.

No. 55. From Siling, Pin Valley, October 2, 1935.

114246 to 114253. *FESTUCA* spp. Poaceae. Fescue.114246 to 114249. *FESTUCA CUMMINII* Stapf.

A perennial grass with tufted stems up to about 1 foot high. Native to the Himalayan region at altitudes of about 11,000 feet.

114246. No. 2. From Losar, September 22, 1935.

114247. No. 2-A. From Pin Valley, September 2, 1935.

114248. No. 2-B. From Pin Valley, October 4, 1935.

114249. No. 29. From Pin Valley, October 4, 1935.

114204 to 114291—Continued.

114250. *FESTUCA LUCIDA* Stapf.
No. 6. From Losar, October 5, 1935. A perennial grass with tall rather stout stems. Native to the Himalayan region.
114251. *FESTUCA RUBRA LANUGINOSA* Mert. and Koch.
No. 7. From Losar, September 24, 1935.
114252. *FESTUCA* sp.
From Kulu, August 10, 1935, at 10,000 feet altitude.
114253. *FESTUCA* sp.
From Kulu, August 28, 1935, at over 10,000 feet altitude.
114254. *HYSSOPUS OFFICINALIS* L. Mentha-
ceae. Hyssop.
No. 43. From Kyuling, October 2, 1935. An aromatic herbaceous perennial with blue flowers rich in nectar.
For previous introduction, see 32238.
114255. *JUNCUS* sp. Juncaceae.
No. 23. From Losar, September 24, 1935.
114256. *LACTUCA ORIENTALIS* Boiss. Cl-
choriaceae.
No. 50. From Pin Valley, October 1, 1935. A shrubby perennial about 1 foot high, with small heads of yellow flowers. Native to eastern Asia.
114257. *LEPIDIUM LATIFOLIUM* L. Brassi-
caceae.
No. 47. From Pin Valley, October 2, 1935.
- 114258 and 114259. *LINUM PERENNE* L. Lin-
aceae. Perennial flax.
114258. No. 56. From Kyibar, October 3, 1935.
114259. No. 56-A. From Kyibar, Sep-
tember 28, 1935.
114260. *ASTRAGALUS* sp. Fabaceae.
From Ryelang, Lahul.
114261. *MEDICAGO* sp. Fabaceae.
No. 38. From Kyuling, October 2, 1935.
114262. *MELICA CUPANI* Guss. Poaceae.
No. 17. From Kioto, September 25, 1935.
114263. *MENTHA LONGIFOLIA* (L.) Huds. Men-
thaceae.
No. 44. From Kyuling, October 2, 1935.
114264. *NEPETA DISCOLOR* Royle. Mentha-
ceae.
No. 45. From Kyibar, September 28, 1935. A procumbent herb with small broad-ovate leaves and spikes of many small white or pale-blue flowers. Native to the Himalayas at altitudes of 10,000 to 15,000 feet.
114265. *ORYZOPSIS AEQUIGLUMIS* Duthie. Po-
aceae.
No. 18. From Losar, September 2, 1935. A tall stout perennial grass, native to the temperate Himalayas.

114204 to 114291—Continued.

114266. *ORYZOPSIS LATERALIS* Stapf. Poa-
ceae. Grass.
No. 22. From Losar, September 21, 1935. A densely tufted perennial grass, native to the Himalayas at altitudes of 12,000 to 14,000 feet.
- 114267 to 114269. *PENNISETUM* spp. Poa-
ceae.
114267. *PENNISETUM FLACCIDUM* Griseb.
No. 20. From Kyuling, October 2, 1935.
114268. *PENNISETUM FLACCIDUM* Griseb.
No. 20-A. From Kyibar, September 28, 1935.
114269. *PENNISETUM ORIENTALE* L. Rich.
No. 17-A. From Kioto, September 25, 1935.
114270. *PHRAGMITES COMMUNIS* Trin.
No. 33. From Kyuling, October 3, 1935.
- 114271 to 114274. *POA* spp. Poaceae. Bluegrass.
114271. *POA PERSICA* Trin.
No. 35. From Losar, September 25, 1935.
114272. *POA PRATENSIS* L. Kentucky bluegrass.
No. 32. From Pin Valley, October 4, 1935.
114273. *POA STERILIS* Bieb.
No. 5. From Losar, September 23, 1935. A tufted perennial grass, native to the Caucasus region.
114274. *POA* sp.
No. 6. From Bashahr, September 22, 1935.
114275. *PODOPHYLLUM EMODI* Wall. Ber-
beridaceae. Himalayan mayapple.
From Emodi.
For previous introduction see 105902.
114276. *POLYGONUM* sp. Polygonaceae.
From Lahul, August 1935.
114277. *RUMEX* sp. Polygonaceae.
No. 62. From Kyuling, October 2, 1935.
114278. *SAUSSUREA JACEA* (Klotzsch) C. B. Clarke. Asteraceae.
No. 53. From Pin Valley, October 1, 1935. An erect leafy perennial up to 4 feet high, with ovate to oblong-obtuse leaves about 3 inches long and purple flower heads, solitary or in terminal corymbs. Native to the Himalayan region.
114279. *SCROPHULARIA LUCIDA* L. Scrophu-
lariaceae.
No. 58. From Kyibar, September 28, 1935. A herbaceous perennial up to 3 feet high, with pinnatisect leaves and few-flowered cymes of small dark-purple flowers. Native to southern Europe and Asia.
114280. *SISYMBRIUM* sp. Brassicaceae.
No. 46. From Kioto, September 25, 1935.
- 114281 to 114284. *STIPA* spp. Poaceae. Feathergrass.

114204 to 114291—Continued.

114281. *STIPA JACQUEMONTII* Jaub. and Spach.

No. 21. From Kyibar, September 28, 1935. A very slender, densely tufted perennial grass about 1 foot high; native to the Himalayan region.

114282 and 114283. *STIPA ORIENTALIS* Trin.

A densely tufted perennial grass with stems up to a foot high; native to Asia.

114282. No. 27—A. From Kyibar, September 27, 1935.

114283. No. 27—B. From Losar, September 23, 1935.

114284. *STIPA PENNATA* L.

No. 1. From Losar, September 21, 1935, at 13,395 feet altitude.

114285. *THEMEDA ANATHERA* (Nees) Hack. Poaceae. Grass.

No. 5. From Wangtoo, Basbahr, October 8, 1935. A tall perennial grass native to India.

114286 and 114287. *TRIGONELLA EMOIDI* Benth. Fabaceae.

A diffuse, much-branched, herbaceous annual, native to the Himalayas at altitudes of 4,000 to 10,000 feet.

114286. No. 39. From Kyuling, October 2, 1935.

114287. No. 39—A. From Kyibar, September 27, 1935.

114288 to 114290. *TRISETUM SPICATUM* (L.) Richter. Poaceae. Grass.

An erect tufted grass.

For previous introduction see 52889.

114288. No. 24. From Kyuling, October 3, 1935.

114289. No. 36. From Pin Valley, October 1, 1935.

114290. No. 30. From Kyibar, September 27, 1935.

114291. (Undetermined.)

No. 54. From Kioto, September 27, 1935.

114292 to 114294.

From Costa Rica. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 24, 1936.

114292. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

No. 3748. From San Ramon.

114293. *TEPHROSIA* sp. Fabaceae.

No. 3746. From El Paraiso, February 27, 1936.

114294. *PASSIFLORA EDULIS* Sims. Passifloraceae. Purple granadilla.

No. 3763. *Granadillo morado*. From San José, March 7, 1936.

114295 to 114302.

From Chile. Seeds presented by Emanuel Elgueta, Estación Experimental de la Sociedad Nacional de Agricultura, Santiago. Received March 25, 1936.

114295 to 114302—Continued.

114295. *HORDEUM DISTICHON* L. Poaceae. Barley.

Plumarcher.

114296. *HORDEUM VULGARE* L. Poaceae. Barley.

Oruzat.

114297 to 114302. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

114297. *Florence*.

114298. *Oregon*.

114299. *Richelle*.

114300. *No. 1053*.

114301. *No. 1069*.

114302. *Australiano*.

114303. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.

From Costa Rica. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received March 30, 1936.

Turtle soup beans.

114304 to 114307.

From Honduras. Seeds presented by the research department, at Tela, of the United Fruit Co. Received March 9, 1936.

114304. *ASTEROGYNE* sp. Phoenicaceae.

114305. *ASTROCARYUM MEXICANUM* Liebm. Phoenicaceae.

A Mexican palm with a cylindrical spiny stem up to 6 feet high and large pinnate leaves with straight black spines on both sides.

114306. *LICUALA* sp. Phoenicaceae.

No. 381.

114307. *THRINAX* sp. Phoenicaceae.

Spineless fan palms of medium height, with terminal orbicular leaves.

114308. *CHLOROPHYTUM* sp. Liliaceae.

From Madagascar. Plant presented by Miss Barygia Rateaver, Fort Dauphin. Received September 18, 1935. Numbered in March 1936.

114309 and 114310.

From Canada. Seeds presented by Prof. John Davidson, Department of Botany, University of British Columbia, Vancouver. Received March 30, 1936.

114309. *DELPHINIUM MENZIESII* DC. Ranunculaceae.

A hardy perennial with simple, slender stems over a foot high, small three- to five-parted leaves, and blue flowers in conical racemes. Native to the northwestern United States and British Columbia.

114310. *RUBUS PARVIFLORUS* Nutt. Rosaceae. White flowering raspberry.

An upright shrub 6 to 8 feet high, with reniform three- to five-lobed leaves 4 to 8 inches across, dense corymbs of small white flowers one-fourth inch in diameter, and red fruits more than half an inch in diameter. Native to western North America.

For previous introduction see 92298.

114311. *MEDICAGO SATIVA* L. Fabaceae.

Alfalfa.

From Germany. Seeds secured by Charles J. Brand, through Albert Eisenhauer, Tauberbischofsheim, Baden. Received March 27, 1936.

Old German Franconian alfalfa.

114312 and 114313.

From South America. Seeds collected by Mrs. Ynes Mexia, collaborator, Bureau of Plant Industry. Received March 31, 1936.

114312 to 114313—Continued.

114312. *CINCHONA* sp. Rubiaceae.

No. 7804. From La Paz, Bolivia, December 7, 1935.

114313. *ERAGROSTIS PERUVIANA* (Jacq.) Trin. Poaceae. Grass.

No. 7774-A. From Peru, Distrito Arequipa, Provincia Islay, south of Mollendo, November 17, 1935. A spreading annual grass with decumbent stems to about 1 foot high. Native to Peru.

Introductory statement.....	1
Inventory.....	3
Index of common and scientific names.....	87

INTRODUCTORY STATEMENT

This inventory, No. 127, records the plant material (Nos. 114314-116965) received by the Division of Plant Exploration and Introduction during the period from April 1 to June 30, 1936.

More than 2,600 introductions mark this second quarter of 1936; a large percentage of these are the result of the activities of three agricultural explorers who were in the field at that time.

Walter Koelz was traveling in India from Ceylon north through the Bombay Presidency and the United Provinces to the Punjab and the North West Frontier Province, with the definite object of collecting material for the fruit- and vegetable-breeding projects of the Bureau. He visited many villages and small towns, collecting from native markets and local garden plots seeds of all available types of fruits and vegetables, with notes of their special characteristics and local uses.

In Mexico, W. A. Archer covered the territory from the southeastern State of Tabasco through Veracruz and northward to the State of Durango, collecting seeds of local strains of tobacco. At the same time Raymond Stadelman was carrying on a similar type of exploration in Peru and Ecuador, where he collected not only common tobacco but also closely related species of *Nicotiana* which have since proved of unusual interest to our plant breeders working for disease-resistant tobacco strains.

Through the courtesy of the Royal Botanic Gardens at Kew, England, 111 lots of cowpeas (*Vigna sinensis*, Nos. 115666 to 115776), representing native strains from Ceylon, Mauritius, and Africa, were received. These have proved of interest chiefly from the genetical standpoint. The African forms came originally from the Anglo-

Egyptian Sudan, Kenya Colony, Egypt, Rhodesia, Nigeria, and other parts of tropical Africa.

Two large shipments from central and southwestern China, presented by the Botanic Garden Division of the Sun Yat-Sen Tomb and Memorial Park Commission, Nanking (Nos. 114700-114823; 116115-116157), were recorded during this period. These represent seeds of 166 species, largely trees and shrubs, many of which are being introduced for the first time. In climatic requirements these range from subtropical to north temperate, coming as they do from widely differing regions, and for that reason will be tested in various parts of the South and the Southwest.

Rice breeders will benefit from the introduction of 121 lots of seeds (*Oryza sativa*, Nos. 116332-116452) presented by the Rice Research Station, Department of Agriculture, Yanco, New South Wales. These represent recent promising crosses made at that station.

The Department is indebted to the Union of Soviet Socialist Republics for several shipments of plant material, among which three deserve special mention. The Zhitomir Plant Breeding Station presented roots of 22 special types of hops (*Humulus lupulus*, Nos. 115107-115128); these are to be tested in the Northwestern States for disease-resistance and for comparison with commonly grown types. The Director of the Botanic Garden at Samara sent in seeds of 149 Russian varieties of vegetables, including beets, peppers, cucumbers, watermelons, tomatoes, beans, and peas (Nos. 115141-115289). These have been developed in regions of low winter temperatures, so will be particularly useful to our government plant breeders. The third shipment, presented by the Institute of Plant Industry at Leningrad (Nos. 115320-115416), consists of local selections of forage plants, including both leguminous plants and grasses, obtained originally from all parts of the Soviet Union.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,

Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., March 7, 1940.

INVENTORY¹

NOTE.—This inventory is a historical record of plant material introduced for Department and other specialists. It is not to be considered as a list of plant material for distribution.

114314 to 114316. NICOTIANA TABACUM L. Solanaceae.

Common tobacco.

From Nicaragua. Seeds presented by Cia Tabacalera de Nicaragua, Managua. Received April 17, 1936.

114314. Seeds from plants that were originally grown from imported Virginia seed.

114315. *Jalapa* variety.

114316. *Chilcagre*. A native strain.

114317 to 114320. MALUS SYLVESTRIS Mill. Malaceae. Apple.

From Denmark. Scions presented by Neils Esbjerg, Director, Statens forsogsstation Blangsted, Odense. Received April 10, 1936.

114317. *Ildrod Pigeon*.

114318. *Ingers*.

114319. *Marieable Era Njorthholm*.

114320. *Speiltsby Pigeon*.

114321 and 114322. NICOTIANA TABACUM L. Solanaceae.

Common tobacco.

From El Salvador. Seeds presented by C. S. Whitehead, Cigarrerfa Morazan, through William P. Cochran, Jr., American vice consul, San Salvador. Received April 9, 1936.

114321. Type *Ilopango*; from Ilopango.

114322. Type *Ilopango*; from Tonacatepeque.

114323 to 114325. ALLIUM spp. Liliaceae.

From Ceylon. Bulbs collected by Walter Koelz, Bureau of Plant Industry. Received April 6, 1936.

114323. ALLIUM CEPA L. Onion.

No. 93. From the Kandy market, February 25, 1936. A red onion up to 2½ inches in diameter. Said to have come from Bombay.

114324. ALLIUM ASCALONICUM L. Shallot.

No. 33. *Rata-lumu*. A small onion collected in the Colombo market, February 20, 1936.

114325. ALLIUM SATIVUM L. Garlic.

No. 15. *Sudu lunu; vella vengayam*. From the Colombo market, February 20, 1936; said to have been imported from India. Commonly used in native cookery.

114326 to 114331.

From Sweden. Seeds presented by the Director, Botanic Garden, Upsala. Received April 2, 1936.

114326. ALLIUM HYMENORRHIZUM Ledeb. Liliaceae.

A moisture-loving species with linear leaves and purplish-violet flowers. Native to the Soviet Union.

For previous introduction see 78982.

114327 to 114329. DELPHINIUM spp. Ranunculaceae. Larkspur.

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identifications, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

114326 to 114331—Continued.

114327. *DELPHINIUM CHEILANTHUM* Fisch.

A hardy perennial delphinium with simple or branching stems up to 3 feet high and racemes of dark-blue or sometimes yellowish flowers. Native to Siberia.

114328. *DELPHINIUM OCHROLEUCUM* Stev.

A perennial delphinium about 2 feet high, with simple dense elongate racemes of yellow flowers. Native to the Caucasus region.

114329. *DELPHINIUM TRISTE* Fisch.

A perennial delphinium with simple or branching stems up to 2 feet high, three- to five-parted leaves, and lax racemes of large dark-purple flowers. Native to southern Siberia.

114330. *SOLANUM DULCAMARA* L. Solanaceae. Bitter nightshade.

For previous introduction see 114182.

114331. *SOLANUM NIGRUM* L. Solanaceae. Black nightshade.

114332 to 114337.

From Mexico. Bulbs and seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 3, 1936.

114332. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 3777. Collected March 18, 1936, at Huimanguillo, Tabasco. A bulbous plant with double, salmon-colored flowers.

114333 to 114337. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

114333. No. 3788. From Oluta, Veracruz.

114334. No. 3789. From San Juan Evangelista, Veracruz.

114335. No. 3781. From Ocuapan, near Huimanguillo, Tabasco.

114336. No. 3786. From Oluta, Veracruz.

114337. No. 3787. From Oluta, Veracruz.

114338 and 114339.

From Japan. Seeds presented by the Japan Seed & Plant Co., Tokyo. Received April 1, 1936.

114338. *ALLIUM CEPA* L. Liliaceae. Onion.

Marutane mammoth. A bunching onion which does not form a bulb but a pencil-like shaft like a leek. The flavor is mild, and the silver-white stem, about 2 feet long, remains tender a long time.

114339. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.

Manchuko wonder. A new drought-resistant cucumber. The fruits are long, straight, and of dark-green color, measuring about 7 inches in length and over an inch in diameter. The flesh is snow white, very crisp, and has a delicious flavor.

114340 to 114343.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 3, 1936.

114340 to 114343—Continued.

114340. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

No. 3776. From Villahermosa, Tabasco, March 17, 1936. Cultivated peanuts.

114341. *CARICA CAULIFLORA* Jacq. Papayaceae.

No. 3780. Collected near Huimanguillo, Tabasco, March 19, 1936. A wild papaya; fruits from 1½ to 2½ inches in diameter.

For previous introduction see 102878.

114342. *CARICA PAPAYA* L. Papayaceae. Papaya.

No. 3779. Collected near Huimanguillo, Tabasco, March 19, 1936. A cultivated papaya with fruits 8 by 12 inches; often larger.

114343. *PASSIFLORA LIGULARIS* Juss. Passifloraceae. Sweet granadilla.

No. 3784. *Jujo*. Collected at Cardenas, Tabasco, March 20, 1936.

114344 and 114345.

From China. Scions presented by R. C. Ching, Lushan Arboretum and Botanic Garden, Kuling, Kiangsing. Received April 7, 1936.

114344. *CASTANEA HENRYI* (Skan.) Rehd. and Wils. Fagaceae. Chestnut.

For previous introduction see 113662.

114345. *CASTANEA SEGUINII* Dode. Fagaceae.

Small wild chestnuts.

For previous introduction see 112753.

114346 to 114348. *VITIS VINIFERA* L. Vitaceae. European grape.

From Germany. Scions presented by Dr. H. Moog, Lehr- und Forschungsanstalt für Wein-Obst- und Gartenbau, Gartenbau, Geisenheim am Rhein. Received April 6, 1936.

114346. *Blauer Spätburgunder*.

114347. *Gewürz Traminer*.

114348. *Müller-Thurgau*.

114349. *BAMBUSA BEECHYANA* Munro. Poaceae. Bamboo.

From California. Culms presented by William Hertrich, Huntington Botanic Garden, San Marino. Received November 13, 1935. Numbered in April 1936.

This bamboo, identified by Dr. F. A. McClure, of Lingnan University, Canton, China, is stated by him to be the commonest and most valuable edible bamboo of southern China. It grows to a height of about 35 feet, but the culms are of greater diameter in the lower part, in proportion to the height, than are those of most other bamboos. Culms up to 3¼ inches in diameter near the base have been produced at San Marino.

114350 to 114369. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received April 3, 1936.

114350. No. 75. *Esmeraldas*. From Guayas Province, March 12, 1936.

114350 to 114369—Continued.

Nos. 114351 to 114354 were collected at the Hacienda Angel Maria, Guayas Province, March 12, 1936.

114351. No. 76.

114352. No. 77.

114353. No. 78. *Esmeraldas negro*.

114354. No. 79.

Nos. 114355 to 114357 were collected at Puca, Guayas Province, March 12, 1936.

114355. No. 80.

114356. No. 81.

114357. No. 82.

114358. No. 83. Collected at Jordan, Guayas Province, March 13, 1936.

Nos. 114359 to 114361 were collected at Santa Lucia, Guayas Province, March 13, 1936.

114359. No. 84. *Barbasco*.

114360. No. 85. *Barbasco*.

114361. No. 86. *Criollo*.

Nos. 114362 to 114369 were collected in Guayas Province, March 12-14, 1936.

114362. No. 87. From Fortuna.

114363. No. 88. From Bermejo.

114364. No. 89. From La Isla.

114365. No. 90. *Esmeraldas blanco*. From San Juan.

114366. No. 91. *Brasil*. From San Vincente.

114367. No. 92. *Esmeraldas blanco*. From the Hacienda Antonieta.

114368. No. 93. *Ropon*. From San Antonia.

114369. No. 94. Collected along the Daule River.

114370 to 114372. NICOTIANA TABACUM L. Solanaceae.

Common tobacco.

From Costa Rica and Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 3, 1936.

114370. No. 3756. From San Ramon, Costa Rica, March 4, 1936. *Istepeque*. A variety with pink and white flowers.

114371. No. 3758. From San Ramon, Costa Rica. A bitter variety with white flowers, March 4, 1936.

114372. No. 3783. *Criollo*. From Cardenas, Tabasco, Mexico, March 20, 1936.

114373 to 114376. SACCHARUM. Poaceae. Sugarcane.

From India. Cuttings presented by the Sugarcane Expert, Sugarcane Experiment Station, Lawley Road via Coimbatore. Received April 10, 1936.

114373. Co. 421. 114375. Co. 356.

114374. Co. 313. 114376. Co. 270.

114377 and 114378.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 8, 1936.

114377 and 114378—Continued.

114377. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

No. 3791. March 27, 1936. A cultivated peanut from San Andres, Tuxtla, Veracruz.

114378. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

No. 3785. March 24, 1936. A cultivated muskmelon from Minatitlán, Veracruz.

114379 to 114381. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

From Morocco. Seeds presented by the Station Centrale de Recherches Agronomique, Rabat; through W. A. Carver, Agricultural Experiment Station, Gainesville, Fla. Received April 6, 1936.

114379. From China.

114380. From Bombay.

114381. From Sakamia.

114382 to 114390.

From Rumania. Seeds presented by the Director, Botanic Garden, Cluj. Received April 4, 1936.

114382 to 114387. DELPHINIUM spp. Ranunculaceae. Larkspur.

114382. DELPHINIUM CAUCASICUM C. A. Mey.

A perennial delphinium with stems about a foot high, five-parted leaves, and blue flowers in few-flowered sub-terminal clusters. Native to the Caucasus region.

114383. DELPHINIUM CORYMBOSUM Regel.

A hardy bushy perennial up to 18 inches high, with the upper leaves palmate, three- to five-lobed, and clusters of about six pale-violet flowers. Native to Turkistan.

114384. DELPHINIUM ELATUM L. Bee larkspur.

A European species 2 to 6 feet high, bearing blue flowers with dark-violet petals.

For previous introduction see 114160.

114385. DELPHINIUM SPECIOSUM Bieb.

A hardy handsome perennial delphinium, with simple stems up to 2 feet high and many showy dark-blue flowers in elongated panicles. Native to the Caucasus region.

114386. DELPHINIUM SPUREUM Boiss. and Haussk.

114387. DELPHINIUM TATSIIENENSE Franch.

A larkspur from western China, with slender stems and hairy leaves divided into three to five sections. The deep-blue flowers are in a large loose raceme.

For previous introduction see 114164.

114388. HYACINTHUS LEUCOPHAEUS (C. Koch) Stev. Liliaceae.

A hyacinth about a foot high, usually with 2 linear dark-green fleshy leaves and many small crowded bell-shaped blue or whitish flowers in a raceme. Native to the southern part of the Soviet Union.

114382 to 114390—Continued.

114389. *LALLEMANTIA IBERICA* (Bieb.)
Fisch. and Mey. *Menthaeaceae*.

114390. *TULIPA HUNGARICA* Borb. *Lilia-
ceae*.

A tulip from southern Europe and the Transcaucasus region, with a slender stem up to 18 inches high, three to four broad leaves, and a bright-yellow or greenish-yellow bell shaped flower. Related to *Tulipa vilhetiana*.

114391 to 114398. *NICOTIANA TABACUM* L. *Solanaceae*.

Common tobacco.

From Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received April 15, 1936.

Nos. 114391 to 114397 were collected at San Mateo, Province of Esmeraldas, March 23, 1936.

114391. No. 95. 114395. No. 99.

114392. No. 96. 114396. No. 100.

114393. No. 97. 114397. No. 101.

114394. No. 98.

114398. No. 102. From Esmeraldas, Province of Esmeraldas, March 23, 1936.

114399 to 114406. *NICOTIANA TABACUM* L. *Solanaceae*.

Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 17, 1936.

114399. No. 3782. Verde. From Ocuapan, near Huimanguillo, Tabasco, March 16, 1936. Cultivated tobacco.

Nos. 114400 to 114403 were collected at San Andres Tuxtla, Veracruz, March 28 and 29, 1936.

114400. No. 3792. *Tabasqueño prieto*, an impure strain.

114401. No. 3793. *Tabasqueño prieto*, a pure strain.

114402. No. 3794. *Tabasqueño colorado*.

114403. No. 3795. *Tabasqueño colorado*.

114404. No. 3799. From Tesechoacan, Veracruz, April 1, 1936. Mixed sample, probably *Blanco*, *Colorado*, and *Habanero*.

114405. No. 3800. From Tesechoacan, Veracruz, April 1, 1936. A mixed sample, probably *Blanco* and *Colorado*.

114406. No. 3802. From Curazao, Veracruz, April 1, 1936.

114407 to 114412. *CITRUS* spp. *Ruta-
ceae*.

From Spain. Budwood presented by Manuel Herrero, Estación Naranjera de Levante, Burjasot, Valencia. Received April 17, 1936.

114407 to 114411. *CITRUS SINENSIS* (L.)
Osbeck. **Orange.**

114407. *Cadenera fina*.

114408. *Berna*, a typical Spanish variety.

114409. *Torregrosa*, a very acid fruit.

114410. *Sangre doble fina*.

114407 to 114412—Continued.

114411. *Washington-Sangre*, a selection made at the station.

114412. *CITRUS NOBILIS DELICIOSA* (Ten.)
Swingle. **Mandarin orange.**

Mandarina comun.

114413 to 114415.

From England. Plants presented by Sir Arthur W. Hill, Director, Royal Botanic Gardens, Kew. Received April 13, 1936.

114413. *THAMNOCALAMUS FALCONERI* Hook.
f. *Poaceae*. **Bamboo.**

A bamboo with a cylindrical culm, which, when young, has 8 to 12 branches at each node; these branches vary in length, are exceedingly slender, often purplish in color, and have four to seven leaves gathered near the tips. The leaves are lanceolate, $1\frac{1}{2}$ to 4 inches long by three-sixteenths to about three-eighths of an inch wide. The slenderness of the branches gives this bamboo a distinctive beauty.

For previous introduction see 92507.

114414. *ARUNDINARIA RACEMOSA* Munro.
Poaceae. **Bamboo.**

An erect bamboo up to 15 feet high, with linear-lanceolate leaves 4 to 7 inches long. Native to the Himalayan region at altitudes of 6,000 to 12,000 feet.

114415. *THAMNOCALAMUS SPATHIFLORUS*
(Trin.) Munro. **Bamboo.**

A rare bamboo, said to grow in clumps, with slender culms up to 35 feet high and with branches tufted at the nodes; the narrow leaves, up to 5 inches long, are gathered two to four at the ends of the branchlets.

114416 to 114459.

From Ceylon. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received April 4, 1936.

114416. *ABELMOSCHUS ESCULENTUS* (L.)
Moench. *Malvaceae*. **Okra.**

No. 45. *Bandakka*. From the market at Kandy, February 23, 1936.

114417. *AMARANTHUS GANGETICUS* L. *Amaranthaceae*. **Ganges amaranth.**

No. 65. *Loka-tampala*. From the market at Kandy, February 23, 1936. Leaves said to be eaten as greens.

114418. *ANETHUM GRAVEOLENS* L. *Apiaceae*. **Dill.**

No. 44. *Sadukufa*. From the market at Colombo, February 21, 1936.

114419. *ANNONA MURICATA* L. *Annonaceae*. **Soursop.**

No. 8. *Altha*. From the Colombo market, February 20, 1936. The green reniform bristly fruit weighed 4 pounds. The colorless juice suggests the flavor of pineapple and mint.

114420. *ARACHIS HYPOGAEA* L. *Fabaceae*. **Peanut.**

No. 20. *Rata-Kaju*, *Nela-Kadala*. From the market at Colombo, February 20, 1936.

114421. *AEGLE MARMELOS* (L.) Correa.
Rutaceae. **Bel.**

No. 23. *Baeli*. From the market at Colombo, February 20, 1936. A hard-

114416 to 114459—Continued.

shelled, yellow-green, globular fruit 4 inches in diameter; used medicinally.

114422. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 74. *Alupubul, ash-pumpkin*. From the market at Kandy, February 23, 1936. A beautiful green fruit with an ashy bloom, weight up to 15 pounds.

For previous introduction see 110896.

114423. *BRASSICA JUNCEA* (L.) Coss. Brassicaceae. Chinese mustard.

No. 28. *Abut, Kadu*. From the market at Colombo, February 20, 1936. Seeds used as a condiment.

114424. *CAPSICUM FRUTESCENS* L. Solanaceae. Bush redpepper.

No. 62. *Miris*. From the market at Kandy, February 23, 1936.

114425. *CARUM COPTICUM* (L.) Benth. and Hook. Apiaceae.

No. 43. *Asumodigan*. From the market at Colombo, February 21, 1936. Used in medicine.

114426. *CICER ARIETINUM* L. Fabaceae. Chickpea.

No. 18. *Konda, Kasdala*. From the market at Colombo, February 20, 1936. A winter crop in India in dry season. The pods are eaten raw and the ripe fruit is roasted or boiled.

114427. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

No. 64. *Peni-puhul*. From the market at Kandy, February 23, 1936.

114428 to 114437. *CITRUS* spp. Rutaceae.

114428. *CITRUS AURANTIFOLIA* (Christm.) Swingle. Lime.

No. 11. *Dehi*. From the market at Colombo, February 20, 1936. Lemon-shaped, yellow fruits up to 3 inches long, pleasantly acid, very juicy, of superior quality.

114429. *CITRUS AURANTIFOLIA* (Christm.) Swingle. Lime.

No. 41. *Dehi*. From the market at Colombo, February 20, 1936. Yellow fruits, 1¾ inches long; very pleasantly acid.

114430. *CITRUS AURANTIUM* L. Seville orange.

No. 80. *Dodang*. From the market at Kandy, February 23, 1936. A subacid fruit of fair quality with green rind; rare.

114431. *CITRUS AURANTIUM* L. Seville orange.

No. 79. *Ambuldusan, Pulidodan*. From the market at Kandy, February 23, 1936. A fruit 2½ inches in diameter, with thick green bitter skin and acid juice, used in chutneys and marmalade.

114432. *CITRUS GRANDIS* (L.) Osbeck. Grapefruit.

No. 81. *Jambulato*. From the market at Kandy, February 23, 1936. A yellow fruit, 4½ inches in diameter, with rather bitter, subacid juice and thick peel.

114416 to 114459—Continued.

114433. *CITRUS LIMONIA* Osbeck. Lemon.

No. 78. *Natran*. From the market at Kandy, February 23, 1936. Fruits yellow, elongate, 4 inches long, pleasantly acid.

114434 to 114437. *CITRUS NOBILIS* Lour. King orange.

114434. No. 9. *Jambu-naran*. From the market at Colombo, February 20, 1936. A golden yellow fruit 3 inches in diameter, with clinging peel and rough-skinned divisions and pleasant subacid juice.

114435. No. 76. *Hinarang*. From the market at Kandy, February 23, 1936. A flattened orange about 1½ inches across, with rather acid juice and fragrant peel.

114436. No. 10. *Nas-naran*. From the market at Colombo, February 20, 1936. A small fruit with highly aromatic peel, very acid juice, and about 30 percent by volume of seeds.

114437. No. 77. *Nas-naran*. From the market at Kandy, February 23, 1936. A small, very acid orange, much like No. 10 (P. I. 114436).

114438. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

No. 53. *Pitti kekri*. From the market at Kandy, February 23, 1936. Rare.

114439. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.

No. 60. *Pepinga*. From the market at Kandy, February 23, 1936. Fruits up to 18 inches long. Said to be eaten both raw and cooked; usually sold ripe.

114440. *CUMINUM CYMINUM* L. Apiaceae. Cumin.

No. 21. *Suduru, Siragum*. From the market at Colombo, February 20, 1936.

114441. *CYPHOMANDRA BETACEA* (Cav.) Sendt. Solanaceae. Tree-tomato.

No. 2. *Takkalk*. From the market at Colombo, February 20, 1936. Fruit egg-shaped, thick-skinned, and yellow.

For previous introduction see 99778.

114442. *DIOSPYROS DISCOLOR* Willd. Diospyraceae. Mabelo.

No. 73. *Velvet apple*. From the market at Kandy, February 23, 1936. Fruit velvety, orange pink, very attractive in appearance; flavor insipid.

114443. *DOLICHOS BIFLORUS* L. Fabaceae. Twinflower dolichos.

No. 19. *Kollu*. From the market at Colombo, February 20, 1936.

For previous introduction see 101580.

114444 and 114445. *DOLICHOS LABELAB* L. Fabaceae. Hyacinth-bean.

From the market at Kandy, February 23 and 24, 1936.

114444. No. 82. *Awara*.

114445. No. 48. *Nila awara*.

114446. *FERONIA LIMONIA* (L.) Swingle. Rutaceae. Wood-apple.

No. 12. *Dumbul*. From the market at Colombo, February 20, 1936. Fruit size

114416 to 114459—Continued.

of a baseball, ashy outside, with brownish, mealy, pleasantly acid flesh. Said to be used in medicine and for preserves.

For previous introduction see 95594.

114447. *GUILANDINA BONDUC* L. *Caesalpinaceae*.

No. 25. *Kumbura, Kallichikota*. From the market at Colombo, February 20, 1936. Used medicinally.

For previous introduction see 42521.

114448. *MOMORDICA CHARANTIA* L. *Cucurbitaceae*. **Balsam-pear.**

No. 56. *Karawila*. From the market at Kandy, February 23, 1936. Green fruits 8 inches long. The flesh is bitter, but is eaten cooked.

For previous introduction see 110186.

114449. *MORINGA OLEIFERA* Lam. *Moringaceae*. **Horseradish-tree.**

No. 59. *Murunga*. From the market at Kandy, February 23, 1936. Best used as a condiment; leaves said to be excellent fried; fruit used as a vegetable.

For previous introduction see 52293.

114450. *PASSIFLORA QUALRANGULARIS* L. *Passifloraceae*. **Giant granadilla.**

No. 42. *Rata-puhul*. From the market at Colombo, February 21, 1936. A green subglobose fruit, 4 inches long, filled with purplish, sweet-acid pulp. Used as a vegetable, also made into jam.

For previous introduction see 108313.

114451. *PHASEOLUS AUREUS* Roxb. *Fabaceae*. **Mung bean.**

No. 17. *Muneta, Pias-pias*. From the market at Colombo, February 20, 1936. Used as food, also as forage.

114452. *PHASEOLUS VULGARIS* L. *Fabaceae*. **Common bean.**

No. 46. *Boncietta, Meribonci*. From the market at Kandy, February 23, 1936. Used as string beans, also eaten as dry beans.

114453. *PHYLLANTHUS EMBLICA* L. *Euphorbiaceae*. **Nelli.**

No. 31. *Kyu-ru*. From the market at Colombo, February 20, 1936. A very acid fruit; said to be used in medicine, for tanning, preserves, etc.

For previous introduction see 99749.

114454. *PISUM SATIVUM* L. *Fabaceae*. **Pea.**

No. 30. *Bola, Kadala*. From the market at Colombo, February 20, 1936.

114455. *SPONDIAS CYTHEREA* Sonner. *Anacardiaceae*. **Vi-apple.**

No. 14. *Ambarella, Hogplum*. From the market at Colombo, February 20, 1936. Acid, yellow fruits 3 inches long; used for preserves and chutneys.

For previous introduction see 35884.

114456. *TERMINALIA CHEBULA* Retz. *Combretaceae*.

No. 24. *Aralu, Kaduka*. From the market at Colombo, February 20, 1936. A medicinal plant.

114457. *TRIGONELLA FOENUM-GRÆCUM* L. *Fabaceae*. **Fenugreek.**

114416 to 114459—Continued.

No. 27. *Uluarst, Ulwahl*. From the market at Colombo, February 29, 1936. Used as a condiment.

For previous introduction see 85398.

114458. *VIGNA SINENSIS* (Torner) Savi. *Fabaceae*. **Cowpea.**

No. 16. *Mekaral*. From the market at Colombo, February 20, 1936. Used as green beans; also the dry seeds are cooked and eaten as food.

114459. *ZEA MAYS* L. *Poaceae*. **Corn.**

No. 66. *Iringu*. From the market at Kandy, February 18, 1936.

114460. *IRIS* sp. *Iridaceae*.

From Germany. Plants purchased from Karl Foerster, Bornim-Potsdam-Sanssouci. Received April 18, 1936.

Variety *Patula Kola*.

114461. *SOLANUM TUBEROSUM* L. *Solanaceae*. **Potato.**

From Germany. Tubers imported by the Bailer Manufacturing Co., Atchison, Kans. Received April 20, 1936.

Variety *Parnissia*.

114462. *IRIS* sp. *Iridaceae*.

From China. Seeds collected by Dr. J. F. Rock, Yunnanfu, Yunnan Province. Received April 10, 1936.

Collected in alpine meadows west of the Yangtze on Mount Labako, northwest of Likang, at 10,000 feet altitude.

114463. *DELPHINIUM PRZEWALSKII* Huth. *Ranunculaceae*.

From Austria. Seeds presented by the Director, Botanic Gardens, Graz. Received April 17, 1936.

A Mongolian larkspur about 8 feet high, with three- to five-parted leaves, the divisions deeply lacinate, and sky-blue flowers that appear from July to September. Closely related to *Delphinium henryi*, which, however, blooms in March.

For previous introduction see 105179.

114464 to 114476.

From Sweden. Seeds presented by the Director, Botanic Garden, Stockholm. Received April 4, 1936.

114464. *BETA PALELLARIS* Moq. *Chenopodiaceae*.

For previous introduction see 112522.

114465. *LACTUCA AUGUSTANA* All. *Cichoriaceae*. **Lettuce.**

An annual lettuce allied to *Lactuca scariola*. Native to Europe.

114466. *LACTUCA VIROSA* L. *Cichoriaceae*. **Lettuce.**

A biennial with a long fusiform root and a tall leafy stem often branched at the base. Native to rocky places in central and southern Europe.

For previous introduction see 91532.

114467 to 114471. *RHEUM* spp. *Polygonaceae*. **Rhubarb.**

114464 to 114476—Continued.

114467. RHEUM FRANZENBACHII Muentzer.

A rapidly growing species, native to temperate Asia. It is a striking ornamental, suitable for borders and possibly useful for breeding purposes.

For previous introduction see 114171.

114468. RHEUM PALMATUM TANGUTICUM Maxim.

A tall perennial, up to 6 feet high, with large rounded cordate leaves. Native to northeastern Asia.

For previous introduction see 110759.

114469. RHEUM PUMILUM Maxim.

A wild rhubarb with a leafy stem about a foot high and somewhat fleshy leaves. It is related to *Rheum delavayi*. Native to northwestern China.

114470. RHEUM RHAPONTICUM L.
Common rhubarb.

114471. RHEUM WITTRICKII Lundstroem.

114472 to 114476. SOLANUM spp. Solanaceae.

114472. SOLANUM GILO Raddi.

For previous introduction see 93095.

114473. SOLANUM HETERODOXUM Dun.

For previous introduction see 110814.

114474. SOLANUM MACROCARPON L.
Nightshade.

A low shrub native to Peru, with ovate-sinuate leaves 8 inches long, small blue-purple flowers in cymes 2 inches across, and globose yellow fruits the size of an apple.

For previous introduction see 91549.

114475. SOLANUM sp.

An annual received under the name "Roberti-Eliae," for which a place of publication has not been found.

114476. SOLANUM SISYMBRIFOLIUM Lam.

For previous introduction see 110815.

114477 to 114493.

From England. Seeds presented by Sir Arthur W. Hill, Director, Royal Botanic Gardens, Kew. Received April 8, 1936.

114477. APIUM GRAVEOLENS L. Apiaceae.
Celery.114478. BETA TRIGYNA Waldst. and Kit.
Chenopodiaceae.

For previous introduction see 112561.

114479. BETA VULGARIS L. Chenopodiaceae.
Common beet.

Variety *Maritima*.

114480. BETA VULGARIS L. Chenopodiaceae.
Common beet.

Variety *Saccharifera*.

114481 to 114486. DELPHINIUM spp. Ranunculaceae.

114481. DELPHINIUM CAUCASICUM C. A. Mey.

For previous introduction and description see 114382.

114482. DELPHINIUM DECORUM Fisch. and Mey.

For previous introduction see 104890.

114477 to 114493—Continued.

114483. DELPHINIUM DUHMBERGII Huth.

For previous introduction see 104847.

114484. DELPHINIUM DYCTIOCARPUM Steud.

For previous introduction see 104892.

114485. DELPHINIUM GAYANUM Wilmott.

For previous introduction see 104850.

114486. DELPHINIUM TATSJENENSE Franch.

For previous introduction and description see 114387.

114487 to 114489. LACTUCA spp. Cichoriaceae.
Lettuce.

114487. LACTUCA BOURGAEI (Boiss.) Irish and Taylor.

A thick-stemmed bristly leaved herbaceous perennial often 6 feet high, with small lilac-colored flower heads. Native to the Mediterranean region.

114488. LACTUCA PERENNIS L.

A perennial lettuce about 2 feet high with pale-blue flower heads. Native to Europe.

114489. LACTUCA VIROSA L.

A biennial with a long fusiform root and a tall leafy stem often branched at the base. Native to rocky places in central and southern Europe.

For previous introduction see 114466.

114490 to 114492. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

114490. Variety *Cerasiforme*.114491. Variety *Pyriforme*.114492. Variety *Racemigerum*.114493. PHASEOLUS COCCINEUS L. Fabaceae.
Scarlet runner bean.

114494. MEDICAGO FALCATA × SATIVA. Fabaceae.

From New Zealand. Seeds presented by W. C. Robinson, Director-General, Department of Agriculture, Wellington. Received April 15, 1936.

Tivacata. A hybrid alfalfa.

114495. RHUS VIMINALIS Ait. Anacardiaceae.
Sumac.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received April 9, 1936.

Karree boom. An evergreen tree up to 30 feet high, native to South Africa in semi-arid regions at over 4,000 feet altitude. Sheep and goats browse on the foliage.

For previous introduction see 95067.

114496 and 114497.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 17, 1936.

114496. TEPHROSIA sp. Fabaceae.

No. 3803. From Azueta, Veracruz, April 1, 1936.

114497. DATURA STRAMONIUM L. Solanaceae.

No. 3778. From Huimanguillo, Tabasco, March 18, 1936. A form with purple double flowers.

114498 to 114524.

From Sweden. Seeds presented by Dr. C. Skottsberg, Director, Botanic Garden, Göteborg. Received April 11, 1936.

114498. *CROCUS ETRUSCUS* Parl. Iridaceae.

114499. *CROCUS BIFLORUS PESTALOZZAE* (Boiss.) Maw. Iridaceae.

A variety with small whitish flowers.

114500 to 114507. *DELPHINIUM* spp. Ranunculaceae. Larkspur.

114500. *DELPHINIUM BULLEYANUM* Forst.

An alpine larkspur 2 to 4 feet high, native to Yunnan, China, between 11,000 and 12,000 feet altitude. The long-stemmed leaves are palmately divided and incised serrate, and the deep rich-blue flowers are in a paniculate raceme.

For previous introduction see 104939.

114501. *DELPHINIUM NUTTALLII* Gray.

114502. *DELPHINIUM GEYERI* Greene.

A perennial delphinium up to about 2 feet high, with rather large, deep-blue flowers in a compact raceme. Native to the high plains of Wyoming and Colorado.

For previous introduction see 114162.

114503. *DELPHINIUM MAACKIANUM* Regel.

An erect perennial delphinium up to 3 feet high, with three- to five-parted leaves and many blue flowers in racemes. It is closely related to *Delphinium elatum*.

For previous introduction see 114163.

114504. *DELPHINIUM PUNICEUM* Pall.

A perennial delphinium with erect branching stems over 2 feet high and deep-violet flowers in dense elongated racemes. Native to the Soviet Union.

114505. *DELPHINIUM PYLZOWI* Maxim.

A larkspur, native to China, with a leafy stem, five-parted leaves, and attractive flowers with violet sepals and blackish petals.

For previous introduction see 81886.

114506. *DELPHINIUM TATSIENENSIS* Franch.

For previous introduction and description see 114486.

114507. *DELPHINIUM YUNNANENSIS* Franch.

A perennial alpine with a simple or branched stem and pale-green, finely pubescent leaves that are divided at the middle into five obovate incised segments. The calyx is intensely blue while the petals are bluish violet, the entire flower being four-fifths of an inch long.

For previous introduction see 104369.

114508 to 114510. *IRIS* spp. Iridaceae.

114508. *IRIS HUMILIS* Bieb.

An iris of the Apogon section with about 12 tufted linear leaves up to a foot long and bright-lilac flowers, the limbs about 2 inches long. Native to southern Europe and the Caucasus region.

114509. *IRIS LAEVIGATA* Fisch.

For previous introduction see 28448.

114498 to 114524—Continued.

114510. *IRIS MELLITA* Janka.

For previous introduction see 53706.

114511. *LACTUCA MURALIS* (L.) Fresen. Cichoriaceae.

An erect annual or biennial about 2 feet high with toothed or lobed triangular or narrow leaves and small yellow flower heads on terminal panicles. Native to Europe and western Asia.

114512. *LACTUCA SERRIOLA* L. Cichoriaceae. Prickly lettuce.

For previous introduction see 104854.

114513. *PASSIFLORA GRACILIS* Jacq. Passifloraceae. Crinkled passionflower.

For previous introduction see 110807.

114514 to 114518. *RHODODENDRON* spp. Ericaceae.

114514. *RHODODENDRON FERRUGINEUM* L. Rock rhododendron.

A dwarf evergreen shrub up to 4 feet high and wide, with narrow oblong leaves over an inch long and pink or carmine flowers about three-fourths of an inch across in small terminal clusters. Native to the mountains of central Europe.

114515. *RHODODENDRON IMPEDITUM* Balf. and Smith.

A low shrub native to the Likiang Snow Range, Yunnan, China, between 15,000 and 16,000 feet altitude. The short branchlets are covered with small black scales, and the broadly elliptic leaves, less than an inch long, are densely scaly on both surfaces. The openly funnel-shaped flowers, mauve or light purple blue, are solitary or in twos.

For previous introduction see 98467.

114516. *RHODODENDRON LUTEUM* Sweet. Pontic azalea.

For previous introduction see 78875.

114517. *RHODODENDRON PONTICUM* L. Pontic rhododendron.

For previous introduction see 66476.

114518. *RHODODENDRON SMIRNOWII* Trautv. Smirnow rhododendron.

For previous introduction see 101962.

114519 to 114522. *SOLANUM* spp. Solanaceae.

114519. *SOLANUM AVICULARE* Forst. f. Nightshade.

A bushy shrub 6 to 8 feet high, with lacinate leaves 10 inches long, small cymes of large dark-purple flowers, and yellowish fruits an inch in diameter, which are used for making marmalade.

For previous introduction see 114179.

114520. *SOLANUM GRACILE* Otto.

For previous introduction see 110813.

114521. *SOLANUM HETERODOXUM* Dun.

For previous introduction see 114473.

114522. *SOLANUM HUMILE* Lam.

A dwarf shrubby perennial with ovate leaves and violet-colored flowers; known only in cultivation.

For previous introduction see 110661.

114498 to 114524—Continued.

114523. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

Variety *Cerasiforme*.

114524. *VITIS DAVIDII* (Carr.) Föëx. Vitaceae. Brier grape.

A very late grape with bunches which weigh over 2 pounds.

For previous introduction see 78817.

114525 and 114526.

From Pennsylvania. Seeds presented by Edgar T. Wherry, University of Pennsylvania, Philadelphia. Received April 23, 1936.

114525. *ELLIOTTEIA RACEMOSA* Muhl. Ericaceae.

114526. *TRIPETALEIA PANICULATA* Sieb. and Zucc. Ericaceae.

A shrub 4 to 6 feet high, with red-brown branchlets, native to Japan. The rhomboid-ovate leaves are 1 to 3 inches long, and the small pink-tinged white flowers, with three distinct petals, are in terminal panicles 2 to 4 inches long.

For previous introduction see 102309.

114527 to 114545.

From England. Seeds presented by the Director, University Botanic Garden, Cambridge. Received April 9, 1936.

114527 to 114529. *BETA* spp. Chenopodiaceae. Beet.

114527. *BETA VULGARIS* L. Common beet.

114528. *BETA PATELLARIS* Moq.

For previous introduction see 114464.

114529. *BETA TRIGYNA* Waldst. and Kit.

114530 to 114533. *DELPHINIUM* spp. Ranunculaceae. Larkspur.

114530. *DELPHINIUM CAUCASICUM* C. A. Mey.

For previous introduction and description see 114382.

114531. *DELPHINIUM GAYANUM* Wilmott.

For previous introduction see 114485.

114532. *DELPHINIUM REQUIENI* DC.

A biennial larkspur about 4 feet high, with three- or five-parted leaves and sky-blue flowers in lax racemes. Native to the islands of Corsica and Majorca.

For previous introduction see 105090.

114533. *DELPHINIUM YUNNANENSE* Franch.

For previous introduction and description see 114507.

114534 to 114536. *LACTUCA* spp. Cichoriaceae. Lettuce.

114534. *LACTUCA PERENNIS* L.

For previous introduction and description see 114488.

114535. *LACTUCA SERRIOLA* L.

Prickly lettuce.

For previous introduction see 114512.

114536. *LACTUCA VIROSA* L.

For previous introduction and description see 114489.

114527 to 114545—Continued.

114537 to 114539. *PASSIFLORA* spp. Passifloraceae.

114537. *PASSIFLORA BRYONIOIDES* H. B. K.

A herbaceous vine with broad deeply three-lobed leaves 2 to 3 inches long and solitary white flowers about 1 inch across. Native to Mexico.

114538. *PASSIFLORA GRACILIS* Jacq.

For previous introduction see 114513.

114539. *PASSIFLORA QUADRANGULARIS* L. Giant granadilla.

114540 and 114541. *PISUM SATIVUM* L. Fabaceae. Pea.

114542 to 114545. *SOLANUM* spp. Solanaceae.

114542. *SOLANUM ATROPURPUREUM* Schrank.

For previous introduction see 110608.

114543. *SOLANUM CAPSICASTRUM* Link. False Jerusalem-cherry.

For previous introduction see 114180.

114544. *SOLANUM MELONGENA* L. Eggplant.

114545. *SOLANUM NODIFLORUM* Jacq.

A woody perennial about 2 feet high, with ovate entire leaves 2 to 5 inches long and very small white flowers in small umbels, followed by small black globose berries. Native to tropical America.

For previous introduction see 104864.

114546 to 114548.

From Peru. Seeds presented by Dr. Cesar Vargas. University of Cuzco, Cuzco. Received April 13, 1936.

114546. *FRAGARIA CHILOENSIS* (L.) Duchesne. Rosaceae. Chiloe strawberry.

Fruits collected at Urubamba, February 29, 1936, at 3,100 meters altitude.

114547. *RUBUS ROSEUS* Poir. Rosaceae.

Native names *cjari-cjari*, *zarzamora*. A large-fruited wild red raspberry collected at Ollantaytambo, February 29, 1936, at 3,100 meters altitude.

For previous introduction see 53218.

114548. *RUBUS URTICAEFOLIUS* Poir. Rosaceae.

Native name *cjari-cjari*. Collected at Ollantaytambo, February 29, 1936, at 3,000 meters altitude. A Peruvian species with strong-growing canes 12 feet high and rather thorny. Flowers and fruits in all stages occur on the same plant. The ripe fruits are slightly acid, but with no characteristic flavor.

For previous introduction see 101221.

114549 to 114586. *NICOTIANA TABACUM* L. Solanaceae.

Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received April 23, 1936.

114549. No. 3595. Cultivated tobacco collected October 27, 1935, at Papaloapam, Veracruz.

114549 to 114586—Continued.

Nos. 114550 to 114555 were collected October 28, 1935, at Tuxtepec, Oaxaca. Cultivated tobacco.

114550. No. 3596. *Huimangillo*.

114551. No. 3597. *Habanero prieto*.

114552. No. 3598.

114553. No. 3599. *Habanero*.

114554. No. 3600. *Habanero*.

114555. No. 3601. *Mulato*.

Nos. 114556 to 114558 were collected March 31, 1936, at La Esperanza, Veracruz. Cultivated tobacco.

114556. No. 3796. *Punta de Lanza*.

114557. No. 3797. *Punta de Lanza*.

114558. No. 3798. *Colorado* (?)

114559. No. 3801. April 1, 1936. Volunteer tobacco from Tesechoacan, Veracruz.

114560. No. 3804. April 1, 1936. Volunteer tobacco from Cosamaloapam, Veracruz.

114561. No. 3805. *Tlapacoyan*. Cultivated tobacco from Tlapacoyan, Veracruz, April 9, 1936.

Nos. 114562 to 114566 were collected in the State of Nuevo Leon, November 4, 1935. Cultivated tobacco.

114562. No. 3806. From Casillas.

114563. No. 3807. From El Barrial.

114564. No. 3808. From Rayones.

114565. No. 3809. From Rayones.

114566. No. 3810. From Las Troncas.

114567. No. 3812. Cultivated tobacco from Tlalchapa, Guerrero, October 3, 1935.

Nos. 114568 to 114574 were collected at Encarnacion, Jalisco, December 10, 1935. Cultivated tobacco.

114568. No. 3813. *Lengua de Vaca*.

114569. No. 3814. *Hoja China*.

114570. No. 3815. *Villalobos*.

114571. No. 3816. *Villalobos*.

114572. No. 3817. *Mano de oso*.

114573. No. 3818. A mixed sample.

114574. No. 3819. *Mostrenco*.

Nos. 114575 to 114586 were collected December 10, 1935, at Leon, Guanajuato. Cultivated tobacco.

114575. No. 3820. *Turco*.

114576. No. 3821. *Lengua de vaca*.

114577. No. 3822. *Virginia, Chino, and Negro* (mixed).

114578. No. 3823. *Chino negro*.

114579. No. 3824. *Burley*.

114580. No. 3825. *Lenguillo grande*.

114581. No. 3826. *Oja de Vástago*.

114582. No. 3827. *Negro combinado*.

114583. No. 3828. *Negro and Lenguillo grande* (mixed).

114584. No. 3829. *Maguey*.

114549 to 114586—Continued.

114585. No. 3830. *Lenguillo chica*.

114586. No. 3831. *Castaño*.

114587 to 114603.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Laboratory of Botany, Timirjasev Academie, Moscow. Received April 15, 1936.

114587. DELPHINIUM CASHMERIANUM Royle. Ranunculaceae. Cashmere larkspur.

A Himalayan plant 10 to 18 inches high, with deep azure-blue flowers 2 inches long.

For previous introduction see 53142.

114588. DELPHINIUM FLEXUOSUM Bieb. Ranunculaceae. Larkspur.

A hardy herbaceous perennial with violet flowers. Native to the mountains of Armenia.

For previous introduction see 108786.

114589. DELPHINIUM sp. Ranunculaceae. Larkspur.

Received under the name "rossicum," which does not appear to have been properly published.

114590 and 114591. PISUM SATIVUM L. Fabaceae. Pea.

114592. PISUM sp. Fabaceae.

Nos. 114593 to 114602. RHEUM spp. Polygonaceae. Rhubarb.

114593. RHEUM COLLINIANUM Baill.

A Chinese rhubarb, possibly of the *Rheum hybridum* series, with incised lobed leaves and red flowers.

114594. RHEUM AUSTRALE Don.

For previous introduction see 114170.

114595. RHEUM FRANZENBACHII Muentzer.

For previous introduction and description see 114467.

114596. RHEUM OFFICINALE Baill.

For previous introduction see 114174.

114597. RHEUM PALMATUM L. Sorrel rhubarb.

A leafy perennial about 5 feet high, with subcylindrical stems and broad roundish leaves deeply palmately lobed. Native to northwestern Asia.

For previous introduction see 110758.

114598. RHEUM PALMATUM TANGUTICUM Maxim.

A variety with leaves more elongated and not so deeply lobed.

114599. RHEUM RHAPONTICUM L. Common rhubarb.

114600. RHEUM TATARICUM L. f.

114601. RHEUM UNDULATUM L.

114602. RHEUM WITTROCKII Lundstroem.

114603. SOLANUM DULCAMARA L. Solanaceae. Bitter nightshade.

For previous introduction see 114330.

114604 to 114631.

From Czechoslovakia. Seeds presented by Prof. Adolf Kutin, Director, Botanic Garden, Tabor. Received April 13, 1936.

114604 to 114631—Continued.

114604. *APIUM GRAVEOLENS* L. Apiaceae.
Celery.
114605. *BETA* SP. Chenopodiaceae.
Received under the name "scutellaris,"
for which a place of publication has not
been found.
114606. *BETA TRIGYNA* Waldst. and Kit.
Chenopodiaceae.
For previous introduction see 114529.
114607. *DELPHINIUM DISCOLOR* Fisch. Ra-
nunculaceae.
- 114608 and 114609. *LACTUCA SATIVA* L.
Cichoriaceae. Garden lettuce.
114610. *LALLEMANTIA IBERICA* (Bieb.)
Fisch. and Mey. Menthaceae.
For previous introduction see 114389.
114611. *LYCOPERSICON ESCULENTUM* Mill.
Solanaceae. Tomato.
- 114612 to 114622. *PHASEOLUS* spp. Faba-
ceae.
114612. *PHASEOLUS COCCINEUS* L.
Scarlet runner bean.
114613. *PHASEOLUS LUNATUS* L.
Lima bean.
- 114614 to 114622. *PHASEOLUS VULGARIS*
L. Common bean.
114614. Oval, gray-brown beans.
114615. Long brown beans.
114616. Oval-rounded tan beans mot-
tled with darker brown.
114617. Tan-colored beans.
114618. White beans.
114619. Deep-red, oval-rounded beans.
114620. Black, oval beans.
114621. Long black beans.
114622. Long, tan-colored, mottled
beans.
- 114623 to 114627. *PISUM SATIVUM* L.
Fabaceae. Pea.
114623. Variety *Hibernum*.
114624. Grayish black, mottled.
114625. Cream colored.
114626. Brownish.
114627. Pale greenish yellow.
114628. *RHEUM RHAPONTICUM* L. Poly-
gonaceae. Common rhubarb.
114629. *RHEUM UNDULATUM* L. Polygona-
ceae. Rhubarb.
For previous introduction see 114601.
114630. *SOLANUM DULCAMARA* L. Solana-
ceae. Bitter nightshade.
114631. *SOLANUM NIGRUM* L. Solanaceae.
Black nightshade.
114632. *ACER HERSII* Rehder. Acera-
ceae. Maple.
- From England. Plants purchased from Hil-
lier & Sons, West Hill Nurseries, Winches-
ter. Received April 24, 1936.
- A medium-sized tree native to northern
China, with cordate, broadly-ovate, long-
pointed, three-lobed leaves and samaras about
an inch long.
- For previous introduction see 76049.

114633 to 114636. *NICOTIANA TABA-
CUM* L. Solanaceae.

Common tobacco.

From Mexico. Seeds collected by W. A.
Archer, Bureau of Plant Industry. Re-
ceived April 24, 1936.

114633. No. 3832. From Cordoba, Vera-
cruz, November 18, 1935.

Nos. 114634 to 114636 were collected
in December 1935 at Almolonga, Veracruz.

114634. No. 3833. *Granja*.

114635. No. 3834. *Longa*.

114636. No. 3835. *San Andres*.

114637 to 114639. *TRITICUM AESTIVUM* L.
Poaceae. Common wheat.

From Australia. Seeds presented by H.
Wenholz, Director of Plant Breeding, De-
partment of Agriculture, Sydney, New
South Wales. Received April 1, 1936.

114637. *Free Gallipoli*.

114638. *Glucub*.

114639. *White Lammas*.

114640 to 114656.

From Scotland. Seeds presented by Sir Wil-
liam Wright Smith, Regius Keeper, Royal
Botanic Gardens, Edinburgh. Received
April 17, 1936.

114640 to 114644. *DELPHINIUM* spp. Ra-
nunculaceae. Larkspur.

114640. *DELPHINIUM DELAVAYI* Franch.

For previous introduction see 104940.

114641. *DELPHINIUM DICTYOCARPUM*
Steud.

A perennial delphinium with flexuose
stems, five-parted leaves, and blue flow-
ers in simple racemes. Native to the
Caucasus region.

114642. *DELPHINIUM DUHMBERGII* Huth.

For previous introduction see 114483.

114643. *DELPHINIUM MAACKIANUM* Regel.

For previous introduction see 114503.

114644. *DELPHINIUM PRZEWALSKII* Huth.

For previous introduction see 104894.

114645 to 114648. *LACTUCA* spp. Cicho-
riaceae. Lettuce.

114645. *LACTUCA BOURGAEI* (Boiss.)
Irish and Taylor.

For previous introduction and descrip-
tion see 114487.

114646. *LACTUCA BRACTEATA* Hook. f.
and Thoms.

A tall perennial lettuce with loose
panicles of large blue flower heads. Na-
tive to the Himalayan region.

114647. *LACTUCA HASTATA* DC.

A robust perennial up to 7 feet high,
with pinnatifid leaves about a foot long
and small heads of blue, purple, or
dark-red flowers. Native to the Hima-
layas between 4,000 and 12,000 feet
altitude.

For previous introduction see 111058.

114640 to 114656—Continued.

114648. *LACTUCA PLUMIERI* (L.) Gren. and Godr.

A perennial lettuce with stout stems about 6 feet high and purple flower heads in terminal cymes. Native to Europe.

114649. *MUSCARI* sp. Liliaceae.
Grape-hyacinth.

Received under the name "argaei," which has not been properly published. This is a grape-hyacinth similar to *Muscari neglectum*.

114650. *MUSCARI AUCHERI* (Boiss.) Baker. Liliaceae.
Grape-hyacinth.

A grape-hyacinth with usually three fleshy linear leaves 2 or 3 inches long and a slender purple scape about as long, with 6 to 10 blue flowers in a dense spikelike cluster. Native to Asia Minor.

114651. *PISUM JOMARDI* Schrank. Fabaceae.
Pea.

A hardy white-flowered annual pea about 3 feet high, native to Egypt.

For previous introduction see 110605.

114652 to 114656. *RHEUM* spp. Polygonaceae.
Rhubarb.

114652. *RHEUM ACUMINATUM* Hook. f. and Thoms.

114653. *RHEUM OFFICINALE* Baill.

For previous introduction see 114596.

114654. *RHEUM PALMATUM* L.
Sorrel rhubarb.

For previous introduction and description see 114597.

114655. *RHEUM RHAPONTICUM* L.
Common rhubarb.

For previous introduction see 114628.

114656. *SOLANUM DULCAMARA* L. Solanaceae.
Bitter nightshade.

For previous introduction see 114630.

114657. *ZEPHYRANTHES* sp. Amaryllidaceae.

From Mexico. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received April 21, 1936.

No. 3790. *San Juan*. Collected March 26, 1936, at San Juan Evangelisto, Veracruz.

114658 to 114661.

From the Netherlands. Seeds presented by the Director, Botanic Garden, Groningen. Received April 18, 1936.

114658. *DELPHINIUM PYZOWI* Maxim. Ranunculaceae.
Larkspur.

For previous introduction and description see 114505.

114659. *DELPHINIUM REQUIENI* DC. Ranunculaceae.
Larkspur.

For previous introduction and description see 114532.

114660. *KITAIBELIA VITIFOLIA* Willd. Malvaceae.

For previous introduction see 98360.

114661. *OPHIROSTRYX VOLUBILIS* (Harv.) Skeels. Liliaceae.

An asparaguslike perennial with a globose bulb 4 to 6 inches in diameter, small

114658 to 114661—Continued.

erect linear leaves, and a slender twining stem 6 to 8 feet long. The numerous small greenish flowers are less than one-half inch long. Native to southern Africa.

For previous introduction see 31853.

114662 to 114664. *SOLANUM TUBEROSUM* L. Solanaceae.
Potato.

From Ireland. Tubers presented by Dr. W. J. Megraw, through C. F. Clark, Bureau of Plant Industry. Received April 25, 1936.

114662. *Arran Victory*; blight-resistant.

114663. *Ballydoon*; strong grower, second early.

114664. *Kerr's Pink*; of good quality.

114665. *CARICA PAPAYA* L. Papayaceae.
Papaya.

From Hawaii. Seeds presented by W. T. Pope, Agricultural Experiment Station, Honolulu. Received April 23, 1936.

Solo variety.

114666. *ENTEROLOBIUM CYCLOCARPUM* (Jacq.) Griseb. Mimosaceae.
Guanacaste tree.

From Costa Rica. Seeds presented by the Chief, Botanical Section of the National Agricultural Bureau, San José, through Harold M. Collins, American consul, San José. Received April 22, 1936.

A large spreading tree, native to the Pacific region of tropical America, where it grows at an altitude of about 2,700 feet. The trunk sometimes becomes 3 feet in diameter. The compound leaves close during the night, and the pods are twisted into a sort of spiral. The leaves and pods are much relished by cattle.

For previous introduction see 93577.

114667 to 114669.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received April 22, 1936.

114667. *FORTUNELLA HINDSII* (Champ.) Swingle. Rutaceae.
Hong Kong kumquat.

From the Botanical and Forestry Department, Hong Kong. A small shrub with oval-elliptic, leathery leaves and small attractive orange fruits. Native to southeastern China.

For previous introduction see 109765.

114668. *TECOMARIA CAPENSIS* (Thunb.) Spach. Bignoniaceae.

From the Botanical and Forestry Department, Kenya, British East Africa. Native to South Africa. A rambling shrub about 6 feet high, with pinnate leaves 2 to 5 inches long and cymes of many orange-red to scarlet flowers about 2 inches long.

114669. (Undetermined.)

From Sun Yat-Sen University, Canton, China. Received as "*Zenia insignis*," for which a place of publication has not been found.

114670. PRUNUS SIBIRICA L. Amygdalaceae. **Siberian apricot.**

From South Dakota. Plants presented by Prof. N. E. Hansen, South Dakota State College, Brookings. Received April 28, 1936.

A wild Siberian apricot collected from a stony hillside at Shivando, in the vicinity of Shilka at the north fork of the Siberian Railway.

For previous introduction see 114074.

114671 to 114678.

From England. Plants purchased from Hillier & Sons, Winchester. Received April 29, 1936.

114671 to 114675. RHODODENDRON spp. Ericaceae.**114671. RHODODENDRON ALBRECHTII** Maxim.

A shrub 3 to 5 feet high, with obovate to oblanceolate membranous leaves which turn yellow in autumn. The rotate-campanulate, red-purple flowers, 2 inches across, in clusters of three to five, appear with the leaves. It is somewhat like *Rhododendron schlippenbachii* and is native to Japan.

For previous introduction see 86749.

114672. RHODODENDRON INDICUM (L.) Sweet.

Variety *Kokinshita*. A compact low-growing bush with narrow leaves and single scarlet flowers of the general type of the plant known in trade as *Azalea macrantha*. It is very free flowering.

For previous introduction see 78379.

114673. RHODODENDRON INDICUM (L.) Sweet.

Variety *Misomogiri*.

114674. RHODODENDRON QUINQUEFOLIUM Biss. and Moore. **Cork azalea.**

A deciduous shrub or small tree up to 25 feet high, with broad-elliptic to ovate leaves about 2 inches long and white, green-spotted campanulate flowers about 2 inches across. Native to Japan.

114675. RHODODENDRON TSCHONOSKII Maxim.

A forest shrub, native to Japan, with flaky bark, elliptic leaves one-third of an inch long, and heads of one to four small white flowers.

For previous introduction see 85859.

114676. X BERBERIS LOLOGENSIS Sandw. Berberidaceae.

An evergreen shrub related to *Berberis darwinii*. It is described as a hybrid of *Berberis darwinii* and *Berberis linearifolia*.

114677. CHIONANTHUS RETUSA Lindl. Oleaceae. **Chinese fringetree.**

A handsome deciduous hardy ornamental tree bearing, during the spring, a multitude of small delicately fragrant flowers, with very narrow petals, followed in the fall by masses of blue berries resembling wild grapes. This species is considered by some to be superior to the Virginia fringetree (*Chionanthus virginica*), because of the whiteness and fragrance of its flowers and its more graceful habits.

For previous introduction see 103120.

114671 to 114678—Continued.**114678. JASMINUM HUMILE L.** Oleaceae. **Italian jasmine.**

A shrub, usually evergreen, with upright and spreading branches, angled branchlets, and compound leaves made up of three to seven ovate, entire leaflets about 1 inch long. The bright-yellow flowers, nearly 1 inch long, are borne in several-flowered open cymes. It is native to southern Asia.

For previous introduction see 93904.

114679. ACHRAS ZAPOTA L. Sapotaceae. **Sapodilla.**

From Costa Rica. Seeds presented by Alan Kelso, Chief of the Propagation Service, Department of Agriculture, Puntarenas. Received April 27, 1936.

White-fleshed giant.

For previous introduction see 112602.

114680 to 114687. MYRCIARIA CAULIFLORA (Mart.) Berg. Myrtaceae. **Jaboticaba.**

From Brazil. Plants purchased from Dierberger & Companhia, São Paulo. Received May 2, 1936.

For previous introduction see 113511.

114680. Blanco.**114681. Bronzcada.****114682. Grumichama.**

114683. Sabará seedlings. The leading commercial variety in Brazil. The fruit is medium sized, very thin-skinned, with small seeds and sweet flesh of good quality. The seedlings are said to resemble closely the parent.

114684. Murta.

114685. Paulista. A late-ripening variety, with large rather thick-skinned fruits containing large seeds; not equal in quality to Sabará.

114686. Pintada.**114687. Rajada.****114688 and 114689. NICOTIANA TABACUM L.** Solanaceae. **Common tobacco.**

From Honduras. Seeds obtained through the American consulate, Tegucigalpa, at the request of W. A. Archer, Bureau of Plant Industry. Received May 2, 1936.

114688. Chapeolito. From Dani.

114689. A mixed sample from Santa Rosa de Copan.

114690. MYRCIARIA CAULIFLORA (Mart.) Berg. Myrtaceae. **Jaboticaba.**

From Brazil. Seeds presented by B. H. Hunnicutt, Lavras, Minas Geraes. Received December 29, 1921. Numbered in April 1936.

For previous introduction see 114687.

114691 to 114693. SOLANUM TUBEROSUM L. Solanaceae. **Potato.**

From Germany. Tubers presented by Dr. Karl Stapp, Biologische Reichsanstalt für Land und Forstwirtschaft, Berlin-Dahlem. Received May 5, 1936.

114691 to 114693—Continued.

114691. *Daber*.114692. *Eierkartoffel*.114693. *Flava*.114694. OCHROMA CONCOLOR Rowlee.
Bombacaceae.

From Mexico. Seeds collected by Prof. M. Martínez at Villa Azueta, Veracruz, and presented by W. R. Maxon, United States National Museum. Received May 2, 1936.

A large tropical tree, native to Guatemala; one of several species which yield the balsam wood of commerce.

114695 to 114697.

From Scotland. Seeds presented by the Scottish Society for Research in Plant Breeding, Craigs House, Corstorphine, Edinburgh. Received May 29, 1936.

114695. AGROSTIS PALUSTRIS Huds. Poaceae.
Creeping bent.114696. PHLEUM PRATENSE L. Poaceae.
Timothy.

CB. 191. Pasture timothy.

114697. PHLEUM PRATENSE L. Poaceae.
Timothy.

CB. 213. Rust resistant hay timothy.

114698 and 114699. SOLANUM TUBEROSUM L. Solanaceae. Potato.

From Uruguay. Tubers presented by the Instituto Fitotecnico y Semillero Nacional "La Estanzuela," Montevideo. Received April 25, 1936.

114698. *Americana blanca*.114699. *Yaguau*.

114700 to 114823.

From China. Seeds collected in Szechwan Province and presented by the Botanic Garden Division of the Sun Yat-Sen Tomb and Memorial Park Commission, Nanking. Received April 3, 1936.

114700. ACANTHOPANAX SEPTEMLOBUM (Thunb.) Koidz. Araliaceae.

No. 1. A tree up to 90 feet high, native to eastern Asia. The large round leaves, sometimes a foot across, are divided into seven triangular serrate lobes, and the small white flowers, in large terminal clusters, are followed by small black fruits.

For previous introduction see 99141.

114701. ACANTHOPANAX SETCHUENENSIS Harms. Araliaceae.

No. 2. A bush up to 10 feet high, native to western China, where it is found in thickets at altitudes of 5,500 to 6,500 feet. The small white flowers, in short-peduncled umbels, are followed by black fruits. This species is closely related to *Acanthopanax leucorrhizus*.

For previous introduction see 52928.

114702. ACANTHOPANAX TRIFOLIATUM (L.) C. Schneid. Araliaceae.

No. 3. A hardy spiny climbing shrub, native to western China, with slender-stemmed, three-parted, light-green leaves and compound terminal umbels of small greenish flowers followed by small black berries.

For previous introduction see 110285.

114700 to 114823—Continued.

114703. ACER BRIANTHUM Schwerin. Aceraceae. Maple.

No. 5. A small tree, related to *Acer caudatum*, with five-lobed to seven-lobed leaves about 4 inches long and broad. Native to central and western China.

114704. ACER LAEVIGATUM Wall. Aceraceae. Maple.

No. 6. A large tree, up to 40 feet high and 3 to 4 feet in diameter, native to the temperate slopes of the Himalayas and western China. The oblong-ovate, nearly entire leaves are 2 to 6 inches long, reticulate beneath, and the paniced cymes of small white flowers appear with the leaves.

For previous introduction see 99711.

114705. ACER TETRAMERUM Pax. Aceraceae. Maple.

No. 7. A tree native to central and western China, 20 to 30 feet high, with oval or oblong, coarsely toothed leaves from 2 to 3½ inches long. The keys are slender stalked, and the nutlets are thick and strongly veined.

For previous introduction see 43813.

114706. ACHYRANTHES BIDENTATA Blume. Amaranthaceae.

No. 8. A slender perennial 4 to 6 feet in height, with broadly elliptic leaves 3 to 10 inches long and slender spikes of small white flowers. Native to eastern Asia.

114707. ACTINIDIA CALLOSA Lindl. Dilleniaceae.

No. 9. A climbing shrub, becoming 20 feet or more long, with conspicuous lenticels on the branchlets. The oval to oblong, serrulate, acuminate leaves are 3 to 5 inches long, and the small white flowers, one-half inch across, are followed by ovoid spotted fruits 1 inch long. Native to the Himalayas and southwestern China.

114708. ACTINIDIA CORIACEA (Fin. and Gagn.) Dunn. Dilleniaceae.

No. 10. A climbing shrub about 25 feet high, with persistent, coriaceous, lanceolate, finely dentate leaves nearly 6 inches long. These are bronze red, passing into metallic green; in autumn they take on a beautiful reddish color. The fragrant white flowers are followed by small greenish ovoid or elongated fruits. Native to western China.

For previous introduction see 42683.

114709. ACTINODAPHNE CONFERTIFOLIA (Hemsl.) Gamble. Lauraceae.

No. 11. An evergreen shrub or tree of medium size, with lanceolate leaves about 4 inches long, clustered at the tops and forks of the branches, and inconspicuous flowers, followed by small black berries. Native to western China.

114710. ACTINODAPHNE RETICULATA Meissn. Lauraceae.

No. 12. A small evergreen tree with whorled linear or elliptic lanceolate leaves about 6 inches long and clusters of small greenish flowers. Native to northeastern India.

114711. ADENOSTEMMA LAVENIA (L.) Kuntze. Asteraceae.

No. 13.

114700 to 114823—Continued.

114712. *AKEBIA LOBATA AUSTRALIS* Diels. Lardizabalaceae.

No. 14. A glabrous twining monoecious shrub up to 20 feet long with compound leaves, the leaflets ovate to ovate-oblong, and 1 to 3 inches long. The pistillate flowers are maroon and nearly an inch across, whereas the staminate, light-purple flowers are smaller. The edible fleshy pods are about 3 inches long. Native to central and western China.

For previous introduction see 54353.

114713. *AMPELOPSIS DELAVAYANA* Planch. Vitaceae.

No. 16. A stout vine with the young growth hairy and reddish, and cordate, broadly ovate, more or less three-lobed leaves 2 to 5 inches long. The small blue fruits are borne in small cymes. Native to central China.

For previous introduction see 35115.

114714. *ANEMONE VITIFOLIA* Buch-Ham. Ranunculaceae. Grapeleaf anemone.

No. 18. A stout bushy perennial, 1 to 3 feet in height, with large deeply divided leaves 3 to 6 inches across and open corymbs of beautiful white flowers an inch or more across. Native to the Himalayas at altitudes of 5,000 to 10,000 feet.

For previous introduction see 88511.

114715. *ANISOMELES INDICA* (L.) Kuntze. Menthaceae.

No. 19. A densely woolly herb 3 to 6 feet high, with ovate-acuminate leaves and dense whorls of small purplish flowers. Native to tropical and subtropical India.

For previous introduction see 41618.

114716. *ARDISIA HENRYI* Hemsl. Myrsinaceae.

No. 20. An evergreen shrub about 3 feet high, with narrow lanceolate leaves about 7 inches long and small white flowers followed by red berries. Native to central and western China.

114717. *AUCUBA CHINENSIS* Benth. Cornaceae.

No. 24. An evergreen shrub similar to *Aucuba japonica*, with lanceolate to ovate leaves up to 8 inches long and small purplish flowers in terminal panicles. Native to southern China.

114718. *BAUHINIA HUPEHANA* Carib. Caesalpiniaceae.

No. 25. A climbing shrub up to 20 feet or more, with broad bilobed leaves and racemes about 4 inches long of small white or pink fragrant flowers. Native to western China.

114719. *BERCHEMIA POLYPHYLLA LEOCLADA* Hand-Mazz. Rhamnaceae.

No. 27. An ornamental woody climber 5 to 15 feet high, with elliptic to ovate leaves about 2 inches long and few small greenish-white flowers in terminal clusters. Native to China.

114720. *BOENNINGHAUSENIA ALBIFLORA* (Hook.) Reichenb. Rutaceae.

No. 30. A slender erect perennial herb 1 to 2 feet high, native to northern India between 4,000 and 8,000 feet altitude. The bipinnate leaves have membranous orbicordate entire leaflets about 1 inch long, and the slightly nodding, pure-white flow-

114700 to 114823—Continued.

ers, less than an inch across, are borne in compound terminal leafy cymes.

For previous introduction see 102311.

114721. *BUDDLEIA LINDLEYANA SINUATODENTATA* Hemsl. Loganiaceae.

No. 34. A tall bush 3 to 6 feet high, with pale-green leaves nearly 4 inches long and 2 inches wide and purplish-violet flowers in dense erect racemes 3 to 5 inches long. Found in thickets in western Szechwan between 2,000 and 4,000 feet altitude.

For previous introduction see 35177.

114722. *CALICARPA RUBELLA HEMSLEYANA* Diels. Verbenaceae.

No. 36. A somewhat coarse large deciduous shrub or small tree up to 20 feet high, with large cordate-oblong leaves and many small lilac to purple flowers in axillary clusters, followed by small showy purple berries. Native to western China.

114723. *BOTRYOPLEURON AXILLARE* (Sieb. and Zucc.) Hemsl. Scrophulariaceae.

No. 37. An erect herbaceous perennial, with very small alternate ovate acuminate serrate leaves and small pink flowers in dense spikes scarcely 1 inch long. Native to eastern Asia.

114724. *CAMPANUMBOEA JAVANICA* Blume. Campanulaceae.

No. 38. A perennial twining vine, with opposite leaves and yellowish, brown-veined, broadly bell-shaped flowers over an inch across. Native to Java.

114725. *CASSIA MIMOSOIDES* L. Caesalpiniaceae.

No. 39. An herb about 2 feet high with yellow flowers. Native to tropical Asia.

For previous introduction see 103608.

114726. *CELASTRUS LOESENERI* Rehd. and Wils. Celastraceae. Bitter-sweet.

No. 42. A climbing shrub up to 18 feet high, with broadly elliptic to elliptic-lanceolate leaves about 5 inches long and yellow fruits in terminal clusters. Native to central China.

For previous introduction see 50406.

114727. *CELASTRUS SPICIFORMIS* Rehd. and Wils. Celastraceae.

No. 43. A climbing shrub, up to 18 feet high, with membranous elliptic-ovate leaves about 4 inches long and small whitish flowers in terminal clusters, followed by small yellow fruits. It is related to *Celastrus hypoleuca*. Native to Hupeh and Szechwan Provinces, China.

114728. *CIPADESSA CINERASCENS* (Pelleg.) Hand-Mazz. Meliaceae.

No. 46. A shrub or small tree up to about 20 feet high, sometimes scandent, with large compound leaves and panicles of inconspicuous white flowers. Native to Indo-China.

114729. *CLEMATIS GRATA GRANDIDENTATA* Rehd. and Wils. Ranunculaceae.

No. 49. An ornamental vine about 20 feet high, with silky hairy rounded leaves and solitary or paired pinkish flowers 3 to 4 inches across. Native to central and western China.

For previous introduction see 72793.

114700 to 114823—Continued.

114730. *CLERODENDRUM FRAGRANS* Willd. Verbenaceae.

No. 47. An erect half-shrubby clerodendrum 3 to 5 feet high, with broadly ovate leaves and fragrant white or bluish flowers, usually double, in compact terminal corymbs. Native to Japan.

114731. *CORNUS CHINENSIS* Wangerin. Cornaceae.

No. 51. A tree, sometimes 40 feet high, with glaucous, ovate leaves 2 to 5 inches long and stalked umbels of small yellow flowers followed by black fruits. It is allied to *Cornus officinalis*. Native to central and western China.

114732. *CUCUBALUS BACCIFER* L. Silenaceae.

No. 56. A herbaceous perennial with prostrate or climbing stems about 4 feet long and small greenish or yellowish-white flowers in cymes. Native to Europe.

114733. *CYNOGLOSSUM TRISTE* Diels. Boraginaceae.

No. 57. A stout-stemmed biennial up to 18 inches high, with lax racemes of small deep-purple flowers. Native to southwestern China at altitudes of 10,000 to 11,000 feet.

114734. *DALBERGIA DYERIANA* Prain. Fabaceae.

No. 58. A large shrubby climber with the branchlets sometimes hooked, pinnate leaves, and small whitish flowers in axillary panicles. Native to central and western China.

For previous introduction see 111395.

114735. *DAPHNIPHYLLUM MACROPODUM* Miqel. Euphorbiaceae.

No. 59. An evergreen shrub with handsome elliptic-oblong, dark-green leathery leaves 5 to 8 inches long, inconspicuous flowers, and small ellipsoidal fruits in axillary racemes 3 inches long. Native to eastern Asia.

For previous introduction see 111394.

114736. *DEBREGEASIA EOUULIS* (Sieb. and Zucc.) Wedd. Urticaceae.

No. 60. A shrub up to 6 feet high, with shining dark-green, oblong-lanceolate to elliptic leaves 3 to 5 inches long and small orange-red fruits. Native to Japan.

114737. *DECAISNEA FARGESII* Franch. Lardizabalaceae.

No. 61. A handsome deciduous shrub up to 15 feet high, with large drooping pinnate leaves 3 feet long, greenish flowers in pendulous racemes a foot or more long, and deep-blue, oblong-cylindrical fruits 3 to 4 inches long. Native to western China.

For previous introduction see 103125.

114738. *DEUTZIA PILOSA* Rehd. Hydrangeaceae.

No. 64. A shrub about 3 feet high, with ovate membranous leaves up to 3 inches long and cymes of few small flowers. Native to western China.

114739. *DIOSPYROS GLAUCIFOLIA* Metcalf. Diospyraceae.

No. 67. A tree up to 50 feet high, with ovate or broad-elliptic, dull-green leaves about 5 inches long and small globose

114700 to 114823—Continued.

smooth fruits. Native to southeastern China.

For previous introduction see 104870.

114740. *DISPORUM CANTONIENSE* Merr. Convallariaceae.

No. 70. A disporum with stems up to 4 feet high, ovate-oblong or lanceolate leaves 2 to 6 inches long, and whitish or dull-purple flowers nearly an inch long. Native to southern China.

114741. *DUMASIA VILLOSA* DC. Fabaceae.

No. 71. A twining herb with broad-ovate leaflets and axillary racemes of small yellow or purplish flowers. Native to India.

114742. *ELAEBAGNUS GLABRA* Thunb. Elaeagnaceae.

No. 73. An evergreen creeping or climbing shrub up to about 20 feet long, usually unarmed, with shiny elliptic leaves about 3 inches long and small white flowers, solitary or three in a cluster. Native to Japan.

114743. *EURYA ACUMINATA* DC. Theaceae.

No. 79. A shrub 10 to 12 feet high, with oblong leathery leaves and small white flowers which are either solitary or in fascicles. The wood is reddish white, soft, and close grained.

For previous introduction see 47681.

114744. *EUONYMUS DIELSIANUS* Loes. Celastraceae.

No. 77. An evergreen shrub about 6 feet high, with lanceolate leaves about 4 inches long and clusters of small white flowers. Native to China.

114745. *FICUS CLAVATA* Wall. Moraceae.

No. 81. An erect shrub about 6 feet high, with membranous oblong-lanceolate leaves about 5 inches long. Native to India and the Federated Malay States.

114746. *FICUS HETEROMORPHA* Hemsl. Moraceae.

No. 82. A small shrub of the *Scydium* section, with exceedingly variable leaves. Native to central China.

114747. *FLEMINGIA MACROPHYLLA* (Willd.) Kuntze. Fabaceae.

No. 83. An erect woody shrub up to 6 feet high. Native to southeastern Asia.

114748. *FORDIOPHYTON FABERI* Stapf. Melastomaceae.

No. 84. A much-branched shrub up to 2 feet high, similar to the *osbeckias* in appearance. The opposite leaves are 2 to 4 inches long, narrowly ovate, dark green above, reddish beneath, and the flowers, nearly an inch across, are dark rose with conspicuous yellow stamens. Native to Szechwan, China.

114749. *FORDIOPHYTON TUBERCULATUM* Guill. Melastomaceae.

No. 85. An erect purplish herb about 1 foot high, with dentate, acuminate leaves, green above and purplish violet beneath, and small red flowers in terminal and axillary clusters. Native to southwestern China.

114750. *HELWINGIA CHINENSIS* Batal. Cornaceae.

No. 91. A deciduous shrub 3 to 5 feet high, with small green-white flowers borne

114700 to 114823—Continued.

on the midrib of the leaves and followed by black fruits.

For previous introduction see 99175.

114751. *HOLBOELLIA FARGESI* Réaub. Lar-dizabalaceae.

No. 92. An evergreen twining shrub up to about 20 feet high, with five to nine leaflets, usually oblong-lanceolate, and small flowers, the pistillate purplish, the staminate greenish white. Native to central and western China.

114752. *HOSIEA SINENSIS* (Oliver) Hemsl. and E. H. Wils. Icacinaceae.

No. 93. A woody climber about 8 feet high, with cordate leaves 2 to 4 inches long and small whitish flowers followed by orange fruits about one-half inch long. Native to western China.

114753. *HYDRANGEA ANOMALA* D. Don. Hydrangeaceae.

No. 95. A climbing shrub up to 15 feet, with ovate leaves 3 to 6 inches long and large corymbs of white flowers. Native to Nepal at 4,000 to 10,000 feet altitude.

114754. *HYDRANGEA STRIGOSA* Rehd. Hydrangeaceae.

No. 96. A shrub 8 feet high, with strigose branchlets. The leaves, oblong-ovate to elliptic-lanceolate, acuminate serrulate or serrate, are sparingly strigose or nearly glabrous above, but densely strigose below and from 3 to 7 inches long. The sterile flowers, white or sometimes purple and over an inch across, are in cymes 4 to 6 inches wide. Native to central China.

For previous introduction see 99176.

114755. *IDESIA POLYCARPA* Maxim. Flacourtiaceae.

No. 98. A deciduous tree up to 45 feet high, with large ovate to oblong-ovate leaves and small, greenish-yellow fragrant flowers in pendulous panicles up to a foot long. Native to Japan.

114756. *IDESIA POLYCARPA VESTITA* Diels. Flacourtiaceae.

No. 99. A variety with the leaves densely pubescent below. Native to western China.

114757. *ILEX CORALLINA* Franch. Aquifoliaceae. Coral holly.

No. 100. A graceful bushy evergreen shrub up to 10 feet high, which does not have the rigid appearance of most other hollies. The ovate-lanceolate leaves are thin but tough, spiny-serrate and from 4 to 6 inches long, brilliant green on top and pale green underneath. The small coral-red fruits are in dense clusters. Native to western China.

For previous introduction see 103427.

114758. *ILEX LATIFOLIA* FANGH Rehd. Aquifoliaceae.

No. 101. A variety with smaller, narrower, and thinner leaves. Native to Szechwan, China.

114759. *ILEX PERNYI* Franch. Aquifoliaceae.

No. 102. A dense-growing evergreen holly of a very dwarf and compact habit, with small dark-green spiny leaves squarish at the base, and red berries. Probably

114700 to 114823—Continued.

allied to *Ilex cornuta*, and first discovered by Père Paul Pery in western China.

For previous introduction see 103221.

114760. *JASMINUM UROPHYLLUM* Hemsl. Oleaceae.

No. 105. A climbing shrub 6 feet long, similar to *Jasminum dispernum*, but with fewer yellow flowers. Native to western China.

114761. *LANGUAS JAPONICA* (Thunb.) Sasaki. Zinziberaceae.

No. 107. A subtropical gingerlike perennial with leafy stems about 1 foot high, the leaves rather large and lanceolate. The small reddish flowers are in terminal panicles. Native to the warmer areas of Japan.

114762. *LASIANTHUS FORDII* Hance. Rubiaceae.

No. 108. A small shrub with elliptic-lanceolate leaves about 4 inches long which are deep lustrous green above, and small white flowers in sessile cymes. Native to China.

114763. *LIGUSTRUM COMPACTUM* Hook. f. and Thoms. Oleaceae.

No. 110. A shrub or small tree sometimes 30 feet high native to the mountains of southwestern China. The persistent leaves are 3 to 6 inches long and the small white flowers, in large panicles, are followed by blue-black fruits.

For previous introduction see 111361.

114764. *LINDERA COMMUNIS* Hemsl. Lauraceae.

No. 111. An evergreen shrub or small tree up to 15 feet high, with somewhat lanceolate leaves about 3 inches long and umbels of small yellow flowers, followed by dark-red fruits. Native to central and western China.

114765. *LINDERA MEGAPHYLLA* Hemsl. Lauraceae.

No. 112. An evergreen shrub or tree up to 60 feet high, with large oblong or oblanceolate, lustrous leaves and umbels of numerous small yellow flowers appearing in March and April. Native to central China.

For previous introduction see 111364.

114766. *LINDERA STRYCHNIFOLIA HEMSLEYANA* Diels. Lauraceae.

No. 113. A deciduous bush 6 to 9 feet high, with lanceolate to ovate leaves, clusters of small yellow flowers, and black fruits. Native to western China at altitudes of 3,000 to 5,000 feet.

114767. *LITSEA POPULIFOLIA* (Hemsl.) Gamble. Lauraceae.

No. 114. A shrub or small tree native to western China, with obovate leathery leaves about 4 inches long and small black berries.

114768. *LONICERA FUCHSIODES* Hemsl. Caprifoliaceae.

No. 115. An erect shrub with stiff, oblong or ovate-oblong leaves up to 6 inches long and orange or reddish flowers about an inch long in pairs and in many-flowered terminal racemes. Native to western China.

114700 to 114823—Continued.

114769. MAESA HENRYI Hu. Myrsinaceae.

No. 118. An evergreen shrub 5 feet high, with elliptic or lanceolate leaves up to 6 inches long and numerous white flowers in diffuse panicles. Native to southwestern China.

114770. MALLOTUS REPANDUS (Willd.) Muell. Arg. Euphorbiaceae.

No. 119. A large scandent evergreen shrub or tree, native to tropical Asia, with broadly rhombic-ovate leaves about 3 inches long and clusters of small yellow flowers.

114771. MILLETTIA DIELSIANA Harms. Fabaceae.

No. 123. A handsome shrubby climber up to 20 feet in length, with oblong-lanceolate leaflets 2 to 4 inches long and terminal panicles of small dark-red flowers. Native to western China.

For previous introduction see 55663.

114772. MUSSAENDA DIVARICATA Hutch. Rubiaceae.

No. 124. An erect or climbing evergreen shrub 3 feet or more in height, with elliptic-ovate, abruptly acuminate, papery leaves 3 to 5 inches long and lax cymes of yellow flowers. Native to western China.

114773. MYRSINE SEMISERRATA Wall. Myrsinaceae.

No. 125. A small handsome evergreen shrub with round glossy-green leaves about half an inch across and small dark-red fruits. Native to northeastern India and western China.

For previous introduction see 67774.

114774. PATRINIA SCABIOSAEFOLIA Fisch. Valerianaceae.

No. 128. An erect perennial 1 foot high, with the lower leaves auriculate, ovate, and 2 inches long. The upper leaves are ovate, dentate, and smaller. The small yellow flowers are in terminal cymes. Native to Japan.

114775. PHOTINIA DAVIDSONIAE Rehd. and Wils. Malaceae.

No. 129. A handsome evergreen tree 20 to 30 feet high, with dense foliage, native to Hupeh, western China. The leathery oblong or lanceolate leaves are up to 6 inches long, and the white flowers, nearly half an inch across, are in many-flowered terminal corymbs. The globose orange-red berries are about one-third of an inch in diameter.

For previous introduction see 102258.

114776 to 114778. PITTOSPORUM spp. Pittosporaceae.

114776. PITTOSPORUM DAPHNIPHYLLOIDES Hay.

No. 132. A small evergreen tree up to 15 feet high, with green fruits containing scarlet seeds. Native to Taiwan.

For previous introduction see 99195.

114777. PITTOSPORUM GLABRATUM Lindl.

No. 133. An evergreen shrub or small tree, native to northeastern India and central China, with oblong-lanceolate leaves. The small fragrant yellow flow-

114700 to 114823—Continued.

ers, produced in corymbs, are succeeded by orange fruits.

For previous introduction see 111371.

114778. PITTOSPORUM GLABRATUM NERIIFOLIUM Rehd. and Wils.

No. 134. A variety with long, oblong-lanceolate leaves. Native to western China.

114779 to 114781. PRUNUS spp. Amygdalaceae.

114779. PRUNUS PUBIGERA (C. Schneid.) Koehne.

No. 139. A tree up to 60 feet high, with obovate-oblong leaves about 4 inches long and many small white flowers in racemes. Allied to *Prunus padus*. Native to western China.

114780. PRUNUS RUFOMICANS Koehne.

No. 140. A deciduous tree up to about 90 feet high, with oblong-serrulate leaves, densely tomentose beneath, and racemes of small white flowers. Native to western China.

114781. PRUNUS WILSONII (Diels) Koehne.

No. 142. A large tree up to 60 feet high, with oblong leaves, silky tomentose beneath, and racemes of small white flowers. Native to central China.

114782. QUISQUALIS INDICA L. Combretaceae. Rangoon-creeper.

No. 209. A rambling subscentent shrub, native to India, with opposite obovate leaves 4 inches long and short axillary and terminal spikes of tubular pink or red flowers. The obovoid fruits are 1 to 2 inches long and are sharply five-angled.

For previous introduction see 108992.

114783. RANDIA HENRYI E. Pritz. Rubiaceae.

No. 146. An evergreen shrub or small tree, with small leathery lanceolate leaves dark green above and few white flowers about an inch across in nearly sessile cymes. Native to central China.

114784. RHODODENDRON CALOPHYTUM Franch. Ericaceae.

No. 149. A shrub or tree from 15 to 50 feet high, native to western Szechwan, China. The bright-green leathery leaves are 8 to 12 inches long, and the rosy-white to red flowers, 2 to 3 inches long, are borne in loose racemose clusters of up to 30.

For previous introduction see 97659.

114785. RHUS PUNJABENSIS SINICA (Diels) Rehd. and Wils. Anacardiaceae. Sumac.

No. 150. A small tree 15 to 20 feet high, with a short relatively thick trunk covered with dark-gray, moderately smooth bark. The numerous spreading branches form a round flattened head, and in the autumn the dark-red or crimson panicles make the tree very attractive. It is abundant in thickets in western Hupeh and Szechwan.

For previous introduction see 38158.

114786. RIBES MOUPINENSE Franch. Grossulariaceae. Currant.

No. 153. A shrub from 3 to 15 feet high, with somewhat twisted branches,

114700 to 114823—Continued.

variable leaves, and glabrous, sessile, turbinate flowers, greenish red or washed with red. Native to the high mountainous country of eastern Tibet and western China.

For previous introduction see 40465.

114787. ROSA CORYMBULOSA Rolfe. Rosaceae. White-eye rose.

No. 154. An unarmed or sparsely prickly rose from central China. The numerous small flowers, which are deep rose above and white at the base, are up to an inch wide. Native to thickets in western Hupeh at 1,300 to 3,600 feet altitude.

For previous introduction see 43885.

114788. ROSA DAVIDI Crepin. Rosaceae. David rose.

No. 155. A pink-flowered, orange-fruited rose 3 to 18 feet high, native to western Szechwan, China, at altitudes of 4,000 to 9,000 feet. It is the nearest Chinese relative of *Rosa acrophylla* of the western Himalayas.

For previous introduction see 73447.

114789 to 114793. RUBUS spp. Rosaceae.

114789. RUBUS AMPELINUS Focke.

No. 158. A prostrate shrub similar to *Rubus lambertianus*, with slender stems about 3 feet long, broad-ovate leaves about 2 inches long, and terminal clusters of few small flowers. Native to central China.

For previous introduction see 113811.

114790. RUBUS CHROOSEPALUS Focke.

No. 159. A Chinese bramble with glabrous cordate leaves, white tomentose beneath, and small purplish flowers followed by black fruits. Native to Hupeh Province.

For previous introduction see 113813.

114791. RUBUS ICHANGENSIS Hemsl. and Kuntze.

No. 161. A straggling plant with white flowers, found in thickets between 2,000 and 4,000 feet altitude in central and western China. The small fruits are of good flavor.

For previous introduction see 113815.

114792. RUBUS MESOGAEUS Focke.

No. 162. A bramble, native to central China, with slender climbing stems 12 to 15 feet long, rather small flowers, and small globose berries.

For previous introduction see 113817.

114793. RUBUS SETCHUENENSIS Bureau and Franch.

No. 163. A deciduous straggling shrub about 2 feet high, with deeply-lobed, mallowlike leaves and many small purple flowers in dense panicles, followed by black fruits of good flavor. Native to western China.

For previous introduction see 113820.

114794. SALIX LONGIFLORA Anderss. Salicaceae.

No. 164. A small willow up to 30 feet high, with elliptic variable leaves, the larger ones up to 6 inches long. Native to the Himalayas at about 9,000 feet altitude.

114700 to 114823—Continued.

114795. SALIX LUCTUOSA Lévl. Salicaceae.

No. 165. A shrubby willow of the Denticulata group, with small narrow elliptic-lanceolate leaves. Native to Yunnan Province, China.

114796. SAMBUCUS JAVANICA Reinw. Caprifoliaceae. Elder.

No. 166. A straggling shrub about 6 feet high, with acuminate leaflets and flat clusters of ovoid red berries. Native to eastern Asia, ascending to 6,000 feet in the Himalayas.

114797. SAUSSUREA GLOMERATA CHINENSIS Chen. Asteraceae.

No. 167. A stout herbaceous perennial, with pinnatifid leaves and numerous red flower heads in paniced corymbs. Native to China.

114798. SCHIZANDRA PROPINQUA (Wall.) Hook. f. and Thoms. Magnoliaceae.

No. 168. An evergreen twining shrub with ovate-lanceolate leaves about 4 inches long and small yellow or orange flowers. Native to the Himalayan region at altitudes of 4,000 to 8,000 feet.

114799. SCHIZANDRA RUBRIFLORA (Franch.) Rehd. and Wils. Magnoliaceae.

No. 169. An evergreen climbing shrub with ovate denticulate leathery leaves 3 to 5 inches long, axillary clusters of dark-red flowers, and persistent clusters of bright-red berries. Native to western China.

For previous introduction see 76597.

114800. SCHIZOPHRAGMA INTEGRIFOLIA Oliver. Hydrangeaceae.

Chinese hydrangea-vine.

No. 170. A trailing shrub about 18 feet long, with ovate or broadly-ovate thickish bright-green leaves, usually pubescent on the veins beneath, and cymes 10 inches across of white flowers. Native to western China.

For previous introduction see 99179.

114801. SIEGESBECKIA ORIENTALIS L. Asteraceae.

No. 171. An erect yellow-flowered annual up to 3 feet high. Native to the Tropics of both hemispheres.

114802. SINOMENIUM ACUTUM (Thunb.) Rehd. and Wils. Memispermaceae.

No. 172. A twining shrub up to 20 feet high, with large ovate entire or three-to seven-lobed leaves and long panicles of small bluish berries. Native to Japan.

114803. SPIRAEA JAPONICA ACUMINATA Franch. Rosaceae. Spirea.

No. 181. A handsome hardy deciduous Chinese shrub 3 to 6 feet in height, native to western Szechwan and Hupeh at altitudes of 3,500 to 4,500 feet. The brilliant rose-colored or red flowers make a very fine contrast with the dark-green foliage.

For previous introduction see 49685.

114804. STACHYURUS sp. Stachyuraceae.

No. 182. Received as "latifolia," a name for which a place of publication has not been found.

114805. STACHYURUS YUNNANENSIS Franch. Stachyuraceae.

No. 183. A procumbent evergreen shrub, with lax racemes of small pale-

114700 to 114823—Continued.

yellow flowers. Native to western and southwestern China.

114806. *SWERTIA BIMACULATA* (Sieb. and Zucc.) Hook. f. and Thoms. Gentiana-ceae.

No. 184. An erect annual 2 to 6 feet high, with numerous white or yellowish-green flowers in panicles. The plant is native to the eastern Himalayas at altitudes of 5,000 to 8,000 feet.

For previous introduction see 111093.

114807. *SYMPLOCOS LAURINA* (Retz) Wall. Symplocaceae.

No. 185. An evergreen shrub or small tree, with broad-lanceolate leaves about 5 inches long and fragrant small white flowers in spikes about 4 inches long. Native to India.

114808. *THLADIANTHA CALCARATA* C. B. Clarke. Cucurbitaceae.

No. 188. A large herbaceous climber, with cordate leaves about 4 inches long and golden yellow flowers, over an inch across, in racemes. Native to India.

114809. *TREMA VIRGATA* (Planch.) Blume. Ulmaceae.

No. 192. A small tree, allied to *Celtis*.

114810. *TRICALYMA VIRIDIFLORA* (DC.) Matsum. Rubiaceae.

No. 193. An evergreen shrub or small tree of the habit of *Canthium* with oblong-lanceolate shiny leaves 2 to 4 inches long and small pale-yellow flowers in short dense axillary cymes. Native to China.

114811. *TURPINIA POMIFERA* (Roxb.) DC. Staphyleaceae.

No. 195. A small tree with odd-pinnate leaves 1 to 2 feet long, made up of three to nine crenate-serrate ovate leaflets 3 to 8 inches long. The small yellowish flowers are in terminal panicles 6 to 10 inches long and are followed by fleshy green, yellow or red subglobose fruits 2 inches in diameter. It is native to the subtropical slopes of the Himalayas in India.

For previous introduction see 94084.

114812. *URENA LOBATA* L. Malvaceae.

No. 196. An erect undershrub with cordate entire or lobed leaves 2 to 3 inches long, flowers an inch across, rose red at the base, and small fruits armed with hooked bristles. The stems furnish fiber, used for bags and twine. Native to tropical Asia.

For previous introduction see 77937.

114813. *CUDRANIA TRICUSPIDATA* (Carr.) Bureau. Moraceae.

No. 197. A thorny shrub or small tree, native to eastern Asia. The fruits, resembling clusters of red raspberries, are edible, and the plant has been recommended as a good hedge plant for the Southern States. The extremely hard wood is used for tools, and the ovate, usually entire leaves are used in some sections to feed silkworms.

For previous introduction see 79547.

114814. *VERNONIA BOCKIANA* Diels. Astera-ceae.

No. 198. A tree about 20 feet high, with membranous, oblong-lanceolate leaves

114700 to 114823—Continued.

up to about 6 inches long and many small lavender flower heads. Native to western China.

114815 to 114821. *VIBURNUM* spp. Capri-foliaceae.

114815. *VIBURNUM BRACHYBOTRYUM* Hemsl.

No. 199. A shrub about 10 feet high, with leathery obovate to oblong leaves up to 3 inches long and many small white flowers in large terminal panicles. Native to central China.

114816. *VIBURNUM CORDIFOLIUM* Wall.

No. 200. A large subtropical shrub, with heart-shaped sharply toothed leaves and small dense corymbs of white flowers. Native to the temperate Himalayas.

For previous introduction see 94049.

114817. *VIBURNUM DILATATUM* Thunb. Linden viburnum.

No. 201. A profusely flowering shrub up to 10 feet high, native to China and Japan. The pure-white flowers, in cymes 3 to 5 inches across, are produced at the top of the branch and also from short twigs down the sides. The bright-red fruits are less than an inch long.

For previous introduction see 53745.

114818. *VIBURNUM FOETIDUM* Wall.

No. 203. An upright, half-evergreen shrub up to 10 feet high, with elliptic to oblong-obovate leaves about 2 inches long. The small white flowers, in corymbs 2 inches across, are followed by small scarlet fruits. Native to the Himalayas and southwestern China.

114819. *VIBURNUM ICHANGENSE* (Hemsl.) Rehd.

No. 204. A white-flowered, red-fruited shrub, with yellowish-green leaves, native to China.

For previous introduction see 53747.

114820. *VIBURNUM OLIGANTHUM* Batalin.

No. 206. A deciduous shrub with elliptic-lanceolate leaves and paniculate cymes of small white flowers. Native to western China.

114821. *VIBURNUM* sp.

No. 205. Received as *Viburnum lobophyllum*, but the seeds do not agree with those of that species.

114822. *FAGARA STENOPHYLLA* (Hemsl.) Engl. Rutaceae.

No. 208. A scandent shrub up to 6 feet high, often with slender hooked prickles on the leafstalks. The ovate-oblong to lanceolate leaflets are glabrous and 1 to 3 inches long. The small reddish beaked flowers, in loose terminal cymes 2 to 3 inches across, have long exerted stamens. Native to southwestern China.

For previous introduction see 34588.

114823. (Undetermined.)

No. 65.

114824 to 114843. *NICOTIANA* spp. Solanaceae. Tobacco.

From California. Seeds collected by the University of California Botanical Garden

114824 to 114843—Continued.

Expedition to the Andes, 1935-36, and presented by T. H. Goodspeed, Department of Botany, University of California, Berkeley. Received May 1, 1936.

114824. *NICOTIANA CORYMBOSA* Remy.

No. 4995. A semiprostrate tobacco, native to Chile at about 8,000 feet altitude.

114825. *NICOTIANA GLAUCA* R. Grah.
Tree tobacco.

No. 4510. A plant from 6 to 20 feet high, with yellow flowers; grows commonly throughout Mexico.

For previous introduction see 112354.

114826. *NICOTIANA PANICULATA* L.

No. 4010. A viscid-pubescent annual having a simple stem 2 to 3 feet tall and yellowish-green flowers in terminal panicles. Native to Peru.

For previous introduction see 42339.

114827. *NICOTIANA RUSTICA* L.
Aztec tobacco.

Mrs. Ynes Mexia's No. 7381. From the Hacienda Curipipoyo, Ibarra, Provincia Imbabura, Ecuador. A common perennial with greenish-yellow flowers. Collected at about 7,000 feet altitude.

For previous introduction see 110328.

114828. *NICOTIANA RUSTICA* L.
Aztec tobacco.

No. 4111.

114829 to 114836. *NICOTIANA TABACUM* L.
Common tobacco.

114829. No. 3931. 114833. No. 4160.

114830. No. 4098. 114834. No. 4265.

114831. No. 4159. 114835. No. 4283.

114832. No. 4109. 114836. No. 7364.

114837 to 114841. *NICOTIANA TOMENTOSA*
Ruiz and Pav. Giant tobacco.

For previous introduction see 23914.

114837. No. 3736. 114840. No. 4505.

114838. No. 3762. 114841. No. 4507.

114839. No. 4110.

114842. *NICOTIANA* sp.

No. 4161.

114843. *NICOTIANA* sp.

No. 3797.

114844. *CROTALARIA* sp. Fabaceae.

From Bolivia. Seeds collected by H. C. Stuntz, the American Institute, La Paz. Received April 30, 1936.

Collected in the Yungas region at 6,500 feet altitude, where the plant grows into a large bush and is browsed by cattle.

114845 to 115046.

From India. Seeds and bulbs collected by Walter Koelz, Bureau of Plant Industry. Received April 21, 1936.

Unless otherwise mentioned, the material was collected as seeds.

114845. *ABELMOSCHUS ESCULENTUS* (L.)
Moench. Malvaceae. Okra.

No. 88. *Bandakka*. From near Kandy, Ceylon, February 25, 1936.

114845 to 115046—Continued.

114846. *ACACIA* sp. Mimosaceae.

No. 190. From Coimbatore, southern India, March 4, 1936. A tree 60 feet high and 18 inches in diameter.

114847 to 114850. *ALLIUM* spp. Liliaceae.114847. *ALLIUM ASCALONICUM* L.
Shallot.

No. 189. Bulbs from Coimbatore, southern India, March 11, 1936. Said to be grown locally.

For previous introduction see 114824.

114848. *ALLIUM CEPA* L. Onion.

No. 221. *Yeragadda*. From Bangalore, Mysore, March 5, 1936. A native red onion.

114849. *ALLIUM SATIVUM* L. Garlic.

No. 232. Bulbs from Bombay, March 8, 1936. Said to have come from the Calcutta area.

114850. *ALLIUM SATIVUM* L. Garlic.

No. 194. Bulbs from Bangalore, Mysore, March 5, 1936.

114851 to 114856. *AMARANTHUS* spp. Amaranthaceae.114851. *AMARANTHUS GANGETICUS* L.
Ganges amaranth.

No. 210. *Kaikura*. From Bangalore, Mysore, March 5, 1936. Used as greens.

For previous introduction see 114417.

114852. *AMARANTHUS MANGOSTANUS* Jusl.

No. 212. *Chirakura*. From Bangalore, Mysore, March 5, 1936. A vegetable used as greens.

For previous introduction see 34455.

Nos. 114853 to 114855 were collected at Teldeniya, near Kandy, Ceylon, February 25, 1936.

114853. *AMARANTHUS* sp.

No. 99. *Rata tampala*.

114854. *AMARANTHUS* sp.

No. 100. *Tampala*.

114855. *AMARANTHUS* sp.

No. 102. *Lansi tampala*.

114856. *AMARANTHUS* sp.

No. 219. *Dankukura*. From Bangalore, Mysore, March 5, 1936.

114857. *AMYGDALUS COMMUNIS* L. Amygdalaceae. Almond.

No. 248. Bombay, March 10, 1936. Sold as Persian almonds from Isfahan. Flavor very good; hard shelled.

114858. *ANETHUM GRAVEOLENS* L. Apiaceae. Dill.

No. 218. *Subakshi Kura*. Bangalore, Mysore, March 5, 1936. Said to be used as a green vegetable; also for flavoring.

114859. *ANNONA RETICULATA* L. Annonaceae. Custard-apple.

No. 123. *Anada*. From Kandy, Ceylon, February 26, 1936. The fruit is the size of an ostrich egg, with agreeably sweet white flesh.

114845 to 115046—Continued.

114860. *ARISTEA HCKLONI* Baker. Iridaceae.

No. 139. From Nuwara Eliya, Ceylon, February 28, 1936. A perennial herb with a rosette of linear leaves 6 to 18 inches long and flattened flower stems 2 feet long. The bright-blue flowers, one-third of an inch long, are borne in clusters arranged in a lax corymbose panicle with ascending branches. It is native to southern Africa and has been naturalized in Ceylon where it is growing in large clumps.

For previous introduction see 94174.

114861. *ARISTOLOCHIA ELEGANS* Masters. Aristolochiaceae. Caliciflower.

No. 172—P. *Dove creeper*. From Kandy, Ceylon. A perennial vine with long-stalked, broadly ovate leaves 2 to 3 inches across; the solitary flowers, without unpleasant odor, are borne on the pendulous young wood. The flowers have a yellow-green tube 2 to 3 inches long and a purple and white blotched cordate-circular limb 3 inches across. It is native to Brazil.

For previous introduction see 98798.

114862. *ATRIPLEX HASTATA* L. Chenopodiaceae.

No. 225. *Chakranti Kura*. From Bangalore, Mysore, March 5, 1936.

114863. *AVERRHOA BILIMBI* L. Oxalidaceae. Bilimbi.

No. 7. *Biling*. From Colombo, Ceylon, February 20, 1936. Fruit of a tropical tree 20 to 60 feet high, cultivated for the sake of its greenish-yellow, cucumber-shaped acid fruits, 3 to 4 inches long, which are pickled or used as a relish with meat.

For previous introduction see 110684.

114864. *BASELLA RUBRA* L. Basellaceae.

No. 72. From the market at Kandy, Ceylon, February 23, 1936. A succulent, herbaceous, freely branched climber, native to Bengal and cultivated throughout India. The leaves and stems are used as a potherb as we use spinach. The black fruit has magenta-colored juice.

For previous introduction see 96388.

114865. *BAUHINIA VARIEGATA* L. Caesalpinaceae. Buddhist bauhinia.

No. 216. From Bangalore, Mysore, March 5, 1936. An Indian tree up to 20 feet high, with broadly ovate leaves two-lobed at the top and small clusters of large white flowers beautifully variegated with red and yellow.

For previous introduction see 99691.

114866. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 4. *Puhul-geddia* or *ash-pumpkin*. From the market at Colombo, Ceylon, February 20, 1936. The greenish rounded elliptical fruits are up to 2 feet long and covered with waxy bloom.

For previous introduction see 114422.

114867. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 155. *Jeta-puhul*. From Kandy, Ceylon, February 28, 1936.

114868. *BRASSICA OLERACEA BOTRYTIS* L. Brassicaceae. Cauliflower.

No. 120. Originally obtained in Marseilles, France, January 31, 1936.

114845 to 115046—Continued.

114869. *CAESALPINIA PULCHERRIMA* (L.) Swartz. Caesalpinaceae. Flowerfence.

No. 172—A. A handsome tropical evergreen shrub about 7 feet high, with mimosalike foliage and yellow flowers, which appear on the new growth.

For previous introduction see 109207.

114870. *CALONYCTION ACULEATUM* (L.) House. Convolvulaceae.

No. 83. *Alanga*. From Teldeniya, near Kandy, Ceylon, February 25, 1936. A woody climber with large white flowers that are said to open in the evening.

For previous introduction see 4882.

114871 and 114872. *CANAVALIA GLADIATA* (Jacq.) DC. Fabaceae. Swordbean.

Ali-Awara, awara. Collected at Teldeniya near Kandy, Ceylon, February 25, 1936. A woody climber whose pods and dried beans are used as food.

114871. No. 101. 114872. No. 102—A.

114873 and 114874. *CANAVALIA ENSIFORMIS* (L.) DC. Fabaceae. Jackbean.

Pods and dried beans eaten as food.

114873. No. 92. *Gas-awara, gas-boncl*. From Teldeniya, near Kandy, Ceylon, February 25, 1936.

114874. No. 217. *Tamatakan*. From Bangalore, Mysore, March 5, 1936.

114875. *CANNA GLAUCA* L. Cannaceae.

No. 172—K. A mixed sample of double varieties.

114876 to 114884. *CAPSICUM ANNUM* L. Solanaceae. Common redpepper.

114876. No. 170. *Miris*. From Keke-riwa, Ceylon, March 2, 1936. A rather mild pepper with short blunt pods three-fourths of an inch long.

114877. No. 188. From Coimbatore, southern India, March 4, 1936. A mild redpepper, 1 inch long and acorn shaped, which is slightly acid.

114878. No. 205. *Mirapa kaya*. From Bangalore, Mysore, March 5, 1936. Said to have been grown at Chikbalapur. A short stout variety, 2 inches long.

114879. No. 206. *Mirapa kaya*. From Bangalore, Mysore, March 5, 1936. Said to have been grown at Tiptur. A slender pepper, 4 inches long.

Nos. 114880 to 114884 were collected in Bombay, March 8, 1936, in the market.

114880. No. 239. Said to have been grown at Surat District.

114881. No. 238. From Kathiwan District.

114882. No. 240. From Poona, a very hot pepper.

114883. No. 241. From Belgaum District. A sweet, mildly sharp pepper.

114884. No. 244. A very hot pepper 1 inch long.

114885. *CAPSICUM FRUTESCENS* L. Solanaceae. Bush redpepper.

No. 32. *Velichi Miris*. From the Colombo, Ceylon, market, February 20, 1936. A pepper 4 inches long.

For previous introduction see 114424.

114845 to 115046—Continued.

114886. *CAPSICUM ANNUUM* L. Solanaceae.
Common redpepper.

No. 119. *Nai-Miris*. From Katu Kasbabu, near Kandy, Ceylon, February 26, 1936.

114887. *CAPSICUM FRUTESCENS* L. Solanaceae.
Bush redpepper.

No. 63. *Guinea* pepper, *Kochi-Miris*, *Irkoehika*. From the Kandy, Ceylon, market, February 23, 1936.

114888. *CARYOPHYLLUS JAMBOS* (L.) Stokes. Myrtaceae.
Rose-apple.

No. 288. *Panirupandu*. From Bangalore, Mysore, March 5, 1936. A medium-sized, handsome tree, native to India and the Malay Peninsula, but cultivated in many tropical countries for the edible, fragrant, pinkish fruits about the size of a hen's egg, of a sweetish acid taste, and used as preserves.

For previous introduction see 100722.

114889 to 114895. *CASSIA* spp. Caesalpiniaceae.

114889. *CASSIA FISTULA* L.
Golden-shower.

No. 172-E. From Kandy, Ceylon. An ornamental tree with handsome pinnate foliage and long pendulous racemes of golden-yellow flowers. Native to India.

For previous introduction see 93775.

114890. *CASSIA GRANDIS* L. f.
Pink-shower.

No. 172-I. From Kandy, Ceylon. A handsome tree 40 to 50 feet high that produces masses of pale-pink flowers in the early spring before the pinnate leaves appear. Native to Panama.

For previous introduction see 110825.

114891. *CASSIA HIRSUTA* L.

No. 171. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A shrub up to 2 feet high, covered throughout with long hairs, with the compound leaves made up of three to five pairs of ovate leaflets 2 to 3 inches long and small yellow flowers in axillary racemes. Native to Brazil.

For previous introduction see 111211.

114892. *CASSIA LAEVIGATA* Willd.
Smooth senna.

No. 171-A. From the Botanic Gardens, Hakgala, Ceylon. A handsome yellow-flowered shrub or small tree, with dark-green, glossy, evergreen foliage.

For previous introduction see 70898.

114893. *CASSIA OCCIDENTALIS* L.

No. 107. *Rata-tora*. From the market at Kandy, February 25, 1936. A shrub 2 feet high with yellow flowers.

For previous introduction see 109976.

114894. *CASSIA TOMENTOSA* L. f.
Woolly senna.

No. 172. From the Botanic Gardens, Hakgala, Ceylon. The *Ranavara* of the Singalese is a rapid-growing shrub with large yellow flowers. It is found wild in the dry portions of Ceylon.

For previous introduction see 67682.

114845 to 115046—Continued.

114895. *CASSIA TORA* L.

No. 106. From Peradeniya, near Kandy, Ceylon, February 25, 1936. Pods and leaves are used as a vegetable.

114896. *CASUARINA DISTYLA* Vent. Casuarinaceae.

No. 171-B. From the Botanic Gardens, Hakgala, Ceylon. A small shrub 2 to 3 feet high.

For previous introduction see 90680.

114897. *CEIBA PENTANDRA* (L.) Gaertn. Bombacaceae.

No. 161. *Putung*. Near Kandy, Ceylon.

For previous introduction see 87477.

114898. *COCCINIA CORDIFOLIA* (L.) Cogn. Cucurbitaceae.

No. 157. *Koway*. From Dumballa, Ceylon, March 1, 1936, at 1,000 feet altitude. A perennial tropical vine with small broadly ovate-cordate, deep-green leaves, white flowers, and red fruits about 2 inches long which taste like cucumbers. Native to eastern India.

For previous introduction see 106952.

114899. *CESTRUM ELEGANS* (Brongn.) Schlecht. Solanaceae.

No. 127. February 27, 1936. From Nuwara-Eliya, Ceylon, at 6,500 feet altitude. A slender graceful shrub with attractive dark-green, ovate-lanceolate leaves about 4 inches long and clusters of showy carmine flowers and berries. It is native to Mexico, but has become naturalized in the high regions of Ceylon.

114900 to 114906. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

114900. No. 3. *Peni-Komardu*. From the market at Colombo, Ceylon, February 20, 1936. Fruits dark green with darker stripes. Flesh red-pink, rather insipid.

114901. No. 40. *Peni-Komardu*. From the market at Colombo, Ceylon, February 21, 1936. Fruits pale green, unmarked, up to 5 pounds in weight. The red-pink flesh is of fair quality.

114902. No. 97. *Peni-puhul*. From Teldeniya, near Kandy, Ceylon, February 25, 1936. Used boiled as a vegetable.

114903. No. 98. *Getupuhul*. From near Colombo, Ceylon, February 25, 1936. Said to be a good vegetable.

114904. No. 176. From Coimbatore, southern India, March 4, 1936. A dark-green melon 14 inches long, with rather insipid flesh.

114905. No. 192. From Bangalore, Mysore, India, March 5, 1936. An unmarked dark-green melon of fair flavor.

114906. No. 193. From Bangalore, Mysore, March 5, 1936. An elongated, light-green melon with heavy black-green striping; weight about 5 pounds and the flavor is fair.

114907. *CITRUS LIMONIA* Osbeck. Rutaceae.
Lemon.

No. 200. From Bangalore, Mysore, March 5, 1936. Presented by the Superintendent of the Government Horticultural Garden. A fine-flavored lemon.

114845 to 115046—Continued.

114908. *CITRUS* sp. Rutaceae.

No. 204. *Maduwalla, Kadharangai, Dabbagahi*. From Bangalore, Mysore, March 5, 1936. Presented by the Superintendent, Government Horticultural Garden. A shrub or small tree which produces large warty fruits a foot long, weighing 3 pounds, with sweetish rind 1 inch thick and insipid flesh. It is preserved for medicinal purposes.

114909. *CLEOME* sp. Capparidaceae.

No. 172—F. From Kandy, Ceylon. An ornamental herb with clusters of pink and white flowers.

114910. *TEPHROSIA VOGELII* Hook. f. Fabaceae.

No. 132. From a tea field on the Nuwara-Eliya Road, Ceylon, February 27, 1936, at 5,000 feet altitude.

For previous introduction see 111348.

114911 to 114923. *CUCUMIS* spp. Cucurbitaceae.114911 to 114918. *CUCUMIS MELO* L. Muskmelon.

Nos. 114911 to 114915 were collected at Coimbatore, southern India, March 4, 1936.

114911. No. 180. *Artani palam*. A fruit 18 inches long, elongate, netted, greenish yellow, with salmon flesh of fair flavor.

114912. No. 181. *Welakosa*. A round smooth, creamy-white melon 1 foot in diameter, with pale salmon-colored, fragrant flesh of poor flavor.

114913. No. 184. *Shakan palam*. A small sparsely netted flattened brown melon with firm but not tough, pale salmon-colored flesh of fair flavor, which will shrivel but not rot. An excellent keeper.

114914. No. 186. *Molampalam*. A slightly netted, brown-yellow, cylindrical fruit 8 inches long, with fragrant salmon-colored flesh, which is rather insipid.

114915. No. 187. A fruit the size, shape, and color of a grapefruit with pale salmon-colored flesh, which is mealy and insipid.

Nos. 114916 to 114918 were collected at Bangalore, Mysore, March 5, 1936.

114916. No. 195. A fruit the size, shape, and color of a smooth-skinned large grapefruit. The white flesh is of good flavor.

114917. No. 196. Fruit ellipsoid, 1 foot long, well-netted with white insipid flesh.

114918. No. 197. A rounded, well-netted yellow fruit 8 inches in diameter, with white insipid flesh that is not mealy.

114919 to 114923. *CUCUMIS SATIVUS* L. Cucumber.

Nos. 114919 and 114920 were collected in the market at Colombo, Ceylon, February 20, 1936.

114919. No. 34. *Pipinga*. A yellow-brown, thick-fleshed fruit 15 inches long, which is cooked or eaten raw.

114845 to 115046—Continued.

114920. No. 36. *Keriri*. A golden-brown, roundish fruit.

Nos. 114921 to 114923 were collected at Coimbatore, March 4, 1936.

114921. No. 174. *Waterika*. A banana-shaped cucumber 18 inches long when ripe, commonly sold while immature (6 inches long); excellent as a salad vegetable.

114922. No. 185. *Waterika*. Very similar to No. 174 [P. I. 114921].

114923. No. 227. *Malabar waterika*. A golden-brown fruit, streaked with lighter brown, about 8 inches long. Said to keep in edible condition for a year. Peculiar to the Malabar coast where it has been grown since ancient times.

114924 to 114931. *CUCURBITA* spp. Cucurbitaceae.114924. *CUCURBITA MAXIMA* Duchesne. Squash.

No. 162. *Rata Wataka*. A Siamese squash received from Dumballa, Ceylon, March 1, 1936. Said to be better than the local variety; rather rare.

114925. *CUCURBITA MAXIMA* Duchesne. Squash.

No. 175. *Rata Wataka*. From Keke-riwa, Ceylon, March 2, 1936. Introduced from Siam and said to be superior to the local varieties. The gray elongated fruit is pointed at both ends, has thick yellow flesh, and weighs up to 10 pounds.

114926 to 114930. *CUCURBITA MOSCHATA* Duchesne. Cushaw.

114926. No. 5. *Wataka*. From the market at Colombo, Ceylon, February 20, 1936. A brownish-yellow, faintly ribbed, elongated fruit with yellow flesh, which commonly weighs about 40 pounds. Said to keep for several months in a dry place.

114927. No. 6. From the market at Colombo, Ceylon, February 20, 1936. Like No. 5 [P. I. 114926], but smaller and more like a pumpkin in appearance.

114928. No. 211. *Gummachi Kayi*. From Bangalore, Mysore, March 5, 1936. A red-brown pumpkin type, common, and said to keep well.

114929. No. 154. *Palong-Wataka*. From the market at Kandy, Ceylon, February 28, 1936.

114930. No. 201. From Bangalore, Mysore, March 5, 1936. An attractive looking, smooth creamy white fruit about 1 foot long, with thick yellow flesh.

114931. *CUCURBITA PEPO* L. Pumpkin.

No. 38. *Meru*. From the market at Colombo, Ceylon, February 20, 1936. An oblong orange fruit, 18 inches long, striped and mottled with green. Probably introduced from Europe.

114932. *CYAMOPSIS TETRAGONOLOBA* (L.) Taub. Fabaceae. Guar.

No. 86. *Kataranga*, cluster bean. From Teldeniya, near Kandy, Ceylon, February 25, 1936. Pods used as food.

114845 to 115046—Continued.

114933. CYAMOPSIS TETRAGONOLOBA (L.) Taub. Fabaceae. Guar.

No. 224. *Gorichikadi*. From Bangalore, Mysore, March 5, 1936. Used both green and dried.

114934. CYPHOMANDRA BETACEA (Cav.) Sendt. Solanaceae. Tree-tomato.

No. 1. *Takkali*. From the market at Kandy, Ceylon, February 19, 1936.

For previous introduction and description see 114441.

114935. ×CYRTANTHUS INTERMEDIUS Mast. Amaryllidaceae.

No. 150. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. Bulbs of an artificial hybrid, *Cyrtanthus-mackenii* × *angustifolius*, about 18 inches high, with strap-shaped leaves and 8 to 10 orange-pink, tubular flowers 2 inches long in an umbel.

114936. CYRTANTHUS MACKENII Hook. f. Amaryllidaceae.

No. 149. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. Bulbs of a species with two to six linear leaves 1 foot long, appearing with the flower stem, which is a foot high, red-brown at the base, and bears an umbel of 4 to 10 ivory-white tubular flowers 2 inches long. It is native to southern Africa.

For previous introduction see 89645.

114937. DATURA SUAVEOLENS Humb. and Bonpl. Solanaceae. Angel-trumpet.

No. 135. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A handsome plant 15 to 20 feet high, with smooth elliptic leaves, downy beneath; sometimes 300 of the very large, pure-white, sweet-scented pendent flowers are open at once.

For previous introduction see 53919.

114938. DELONIX REGIA (Boj.) Raf. Caesalpiniaceae. Royal poinciana.

No. 172-B. From Kandy, Ceylon.

For previous introduction see 109208.

114939 to 114948. DOLICHOS LABLAB L. Fabaceae. Hyacinth-bean.

114939. No. 69. *Avara kai*, *Avara*. From the market at Kandy, Ceylon, February 23, 1936.

114940. No. 126. *Sudu dambala*. From Katukastota, near Kandy, Ceylon, February 26, 1936.

114941. No. 168. *Kiri dhambala*. From Kekerawa, Ceylon, March 2, 1936. A vine with purple flowers and pods 30 inches long. Said to be eaten green and as dry beans.

Nos. 114942 to 114946 are bush varieties obtained at the Imperial Agricultural Station, Coimbatore, March 4, 1936.

114942. No. 191. Khaki-colored seeds.

114943. No. 191-A. Black seeds.

114944. No. 191-B. White seeds.

114945. No. 191-C. White seeds.

114946. No. 191-D. Buff seeds.

114845 to 115046—Continued.

114947. No. 215. *Peda chikad kaya*. From Bangalore, Mysore, March 5, 1936. Said to be a climbing sort. Pods and beans both used as food.

114948. No. 245. From Bombay, March 8, 1936, but said to have come from Rangoon. The dry seeds are used as food.

114949. EXACUM ZEYLANICUM Roxb. Gentianaceae.

No. 146. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. An erect East Indian annual 1 foot high, with basal leaves elliptic oblong and a terminal cluster of large, deep-purple flowers with bright-orange stamens.

For previous introduction see 77484.

114950. FICUS MYSORENSIS Heyne. Moraceae. Fig.

No. 198. From Bangalore, Mysore, March 5, 1936. A large broadly spreading tree native to the forests of the sub-tropical Himalayas from Sikkim eastward. The aerial roots are few, embracing the trunk, and the oval leathery leaves, which are prominently veined, are up to 8 inches in length.

For previous introduction see 92952.

114951. DUCHESNEA INDICA (Andrews) Focke. Rosaceae. Mock-strawberry.

No. 128. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936.

For previous introduction see 58891.

114952. FUCHSIA ARBORESCENS Sims. Onagraceae.

No. 171-D. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A shrub or small tree, with large opposite or ternate, oblanceolate or oblanceolate-oblong leaves and dense terminal panicles of pink or purplish flowers about one-half inch long. Native to Mexico.

114953. FUCHSIA RADICANS Miers. Onagraceae.

No. 136. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A tropical shrub, sometimes climbing, with whorled, elliptic, entire leaves about 2 inches long and few showy scarlet flowers nearly 2 inches long in axillary clusters. Native to Brazil.

114954. GERBERA sp. Asteraceae.

No. 160. From the Peradeniya Gardens, Ceylon, March 1, 1936.

114955. GOSSYPIUM ARBOREUM L. Malvaceae. Cotton.

No. 167. *Kabupulun*. From Kalawewa, Ceylon, March 2, 1936. Altitude 600 feet. Collected from a plant 10 feet high. The flowers were yellowish and the yield was abundant. Not much cultivated.

For previous introduction see 102894.

114956. COSMOS CAUDATUS H. B. K. Asteraceae.

No. 172-G. From Kandy, Ceylon. A perennial herb 1½ to 6 feet high, with bipinnate leaves, the segments linear-lanceolate, and rose-colored flower heads. Native to the West Indies.

114845 to 115046—Continued.

114957. *HIBISCUS SABDARIFFA* L. Malvaceae. Roselle.

No. 52. From the market at Kandy, Ceylon, February 23, 1936. A plant with red calyxes which are made into preserves; the leaves are used as a green vegetable.

For previous introduction see 87463.

114958. *INDIGOFERA* sp. Fabaceae.

No. 172. From Kandy, Ceylon. A plant with very beautiful rose-colored flowers.

114959. *IPOMOEA* sp. Convolvulaceae.

No. 177. From Coimbatore, southern India, March 4, 1936. Said to be a free-flowering morning-glory with large blue flowers which remain open in the hot sun most of the day.

114960. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. 51. *Dunya tabu; sorakai*. From the market at Kandy, Ceylon, February 23, 1936. Fruit light green, bottle shaped, and 2 inches long.

114961. *LANTANA CAMARA* L. Verbenaceae. Common lantana.

No. 131. Collected February 27, 1936, along the Nuwara-Eliya Road, Ceylon, at 4,000 feet altitude. The small heads of orange-red flowers are very attractive.

114962. *LANTANA CAMARA* L. Verbenaceae. Common lantana.

No. 138. From Nuwara-Eliya, Ceylon, February 28, 1936. A form with heads of lovely pink flowers that has become naturalized in Ceylon.

For previous introduction see 103512.

114963. *LUFFA ACUTANGULA* (L.) Roxb. Cucurbitaceae. Singkwa towelgourd.

No. 55. *Vetakala, Pikunga*. From the market at Kandy, Ceylon, February 23, 1936. Fruit ridged, green, 10 inches long.

For previous introduction see 103706.

114964. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae. Suakwa towelgourd.

No. 87. *Sponge gourd; Niyavetakola*. From Teldeniya, near Kandy, Ceylon, February 25, 1936. The fruit is eaten fresh as a vegetable and, when ripe, the hard fibrous seed pod is used for scouring pots, etc.

For previous introduction see 103916.

114965 to 114969. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

114965. No. 75. *Takkali*. From the market at Kandy, Ceylon, February 23, 1936. The irregular fruits are less than 2 inches across.

114966. No. 121. From the market at Suez, Egypt, February 6, 1936. A red fruit $3\frac{1}{2}$ inches long, common in the market.

114967. No. 173. From Coimbatore, March 4, 1936. Round fruits 1 inch in diameter; the plant is said to be very hardy.

114968. No. 207. From a seed store in Bangalore, Mysore, March 5, 1936. A red fruit, 1 inch in diameter, said to be wilt resistant.

114969. No. 237. From Bombay, March 8, 1936. Fruit red, globose, up to $1\frac{1}{2}$ inches in diameter.

114845 to 115046—Continued.

114970 to 114973. *MOMORDICA* spp. Cucurbitaceae.

114970. *MOMORDICA CHARANTIA* L. Balsam-pear.

No. 90. *Karawila*. From Teldeniya, near Kandy, Ceylon, February 25, 1936.

For previous introduction and description see 114448.

114971 and 114972. *MOMORDICA DIOICA* Roxb.

Tumba karawila. From the market at Kandy, Ceylon, February 23, 1936. A tropical climber with an edible tuberous root and small rough yellow fruits 2 to 3 inches long which are eaten as a vegetable. Native to India.

114971. No. 57. 114972. No. 61.

114973. *MOMORDICA CHARANTIA* L. Balsam-pear.

No. 158. *Tita karawila*. From Dumballa, Ceylon, March 1, 1936, at 1,000 feet altitude.

For previous introduction and description see 114970.

114974. *MORAEA IRIDIOIDES* L. Iridaceae. Iris moraea.

No. 140. From the Hakgala Gardens, Ceylon, February 28, 1936. A south African relative of the iris, which forms large clumps with irislike leaves and flower stalks 3 feet high. The very attractive flowers, like the Japanese iris in form, have blue-purple standards and white falls marked with yellow.

For previous introduction see 67369.

114975. *MORINGA OLEIFERA* Lam. Moringaceae. Horseradish-tree.

No. 226. *Murunga Kaya*. From Bangalore, Mysore, March 5, 1936.

For previous introduction and description see 114449.

114976. *STIZOLOBIUM ATERRIMUM* Piper and Tracy. Fabaceae. Velvetbean.

No. 111. *Wanduru-me* (monkey bean). From Katu Kastota, near Kandy, Ceylon, February 26, 1936. A climber from 20 to 30 feet high; both pods and seeds are used as food.

114977. *DRACAENA* sp. Liliaceae.

No. 172-N. From Kandy, Ceylon. A tropical shrub with ornamental foliage and pinkish-white flowers.

114978. *CASTALIA PUBESCENS* (Willd.) Woody. and Wood. Nymphaeaceae.

No. 230. *Olu*. From Kekirawa, Ceylon, March 2, 1936. A waterlily with reniform leaves 8 to 10 inches across, scabrous above, and white flowers, similar to those of *Nymphaea alba*, borne 6 inches above the water. Native to eastern India.

114979. *OCIMUM GRATISSIMUM* L. Mentha-ceae.

No. 112. *Madurutala*. From Katu Kastota, near Kandy, Ceylon, February 26, 1936. A tropical evergreen shrub up to 8 feet high, with ovate leaves about 3 inches long and racemes of small pale-yellow flowers.

Nos. 114980 to 114982 were collected in the Botanic Gardens, Hakgala, Ceylon, February 28, 1936.

114845 to 115046—Continued.

114980. *OSBECKIA BUXIFOLIA* Arn. Melastomaceae.

No. 147. A small rufous-woolly shrub, with leathery ovate leaves about one-half inch long and royal purple flowers about 1 inch across. Native to Ceylon.

114981. *OSBECKIA RUBICUNDA* Arnott. Melastomaceae.

No. 148. A bushy shrub 4 to 6 feet high, with hairy elliptic leaves about 2 inches long and small clusters of brilliant purplish-crimson flowers.

For previous introduction see 57261.

114982. *OSBECKIA WIGHTIANA* Benth. Melastomaceae.

No. 171-E. A woody perennial about 2 feet high, with elliptic or oblong leaves up to 3½ inches long and small clusters of showy purple flowers. Native to southern India and Ceylon at altitudes up to 5,000 feet.

114983. *PANICUM MILIACEUM* L. Poaceae. Broomcorn millet.

No. 96. *Meneri*. From Teldeniya, near Kandy, Ceylon, February 25, 1936.

For previous introduction see 113364.

114984 to 114986. *PASSIFLORA* spp. Passifloraceae.

114984. *PASSIFLORA FOETIDA HISPIDA* (DC.) Killip.

No. 166. *Oibattu*. From Kalawewa, Sind, March 2, 1936. A trailing vine, hispid throughout, with cordate-trilobate, membranous leaves, small purple flowers, and small edible yellow fruits. Native to northwestern South America.

114985. *PASSIFLORA EDULIS* Sims. Purple granadilla.

No. 110. *Passion fruit*. From Kandy, Ceylon, February 25, 1936.

For previous introduction see 114294.

114986. *PASSIFLORA MIXTA* L. f.

No. 171-F. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A vine with thick orbicular-ovate broad leaves about 3 inches long, three-lobed to the middle, and rose-pink flowers about 3 inches across. Native to the Andes.

For previous introduction see 82628.

114987 to 114996. *PHASEOLUS* spp. Fabaceae.

114987 to 114992. *PHASEOLUS LUNATUS* L. Lima bean.

114987. No. 103. *Patura-bonci*, *Potudambala*. From Teldeniya, near Kandy, Ceylon, February 25, 1936.

114988. No. 113. *Ratamurunga* or *Kiridambala*. From Teldeniya, near Kandy, Ceylon, February 26, 1936.

114989. No. 114. *Potudambala*. From Katu Kastota, near Kandy, Ceylon, February 26, 1936.

114990. No. 152. *Potudambala*. From the market at Kandy, Ceylon, February 28, 1936.

114991. No. 220. *Doublebeans*. From Bangalore, Mysore, March 5, 1936.

114845 to 115046—Continued.

114992. No. 242. From the Coimbatore bazar, March 4, 1936.

114993 to 114996. *PHASEOLUS VULGARIS* L. Common bean.

Nos. 114993 to 114995 were from the market in Kandy, Ceylon, February 23, 1936.

114993. No. 68. *Butter bonci*; probably imported.

114994. No. 70. *Murung bonci*.

114995. No. 104. *Bonci*; scarlet beans.

114996. No. 115. *El-dambala*. From Teldeniya, near Kandy, Ceylon, February 26, 1936.

114997. *PHYSALIS PERUVIANA* L. Solanaceae. Peruvian groundcherry.

No. 171-G. *Cape gooseberry*. From the Botanic Gardens, Hakgala, Ceylon, February 23, 1936.

For previous introduction see 103722.

114998. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 214. *Battani*. From Bangalore, Mysore, March 5, 1936. Small compact pods 1½ inches long.

114999. *TIBOUCHINA SEMIDECDANDRA* Cogn. Melastomaceae.

No. 137. From Nuwara-Eliya, Ceylon, February 28, 1936. A slender graceful shrub, native to Brazil, 4 to 7 feet high, with rigid ovate-oblong leaves and royal purple flowers borne at the tips of the branches.

115000. *PRUNUS CERASUS* L. Amygdalaceae. Sour cherry.

No. 249. From Bombay, March 10, 1936. Sold as "Persian cherry."

115001. *PRUNUS DOMESTICA* L. Amygdalaceae. Common plum.

No. 250. From Bombay, March 10, 1936. Sold as "Persian plum" and said to be imported from Iran.

115002. *PSOPHOCARPUS TETRAGONOLOBA* (L.) DC. Fabaceae.

No. 49. *Daluk-dambala*. From the market at Kandy, Ceylon, February 23, 1936. Large winged pods, 8 inches long, used as a vegetable.

115003. *PSOPHOCARPUS TETRAGONOLOBA* (L.) DC. Fabaceae.

No. 163. *Daluk-dambala*. From Dumballa, Ceylon, March 1, 1936. Seeds taken from a dry pod.

115004. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 67-A. *Rabu*; *mulingi*. From the market at Kandy, Ceylon, February 23, 1936. A large white radish, 18 inches long and 2 inches in diameter; both roots and tops are used as food.

115005. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 213. *Mulangi gaddi*. From Bangalore, Mysore, March 5, 1936. A white radish a foot long, of mild flavor; said to grow the year around. Tops not used for food.

114845 to 115046—Continued.

115006 to 115012. RUBUS spp. Rosaceae.

115006. RUBUS LINEATUS Reinw.

No. 142. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936, at 6,200 feet altitude; grown from wild Ceylon stock for experiment. The fruits are sour and yellow.

115007. RUBUS NIVEUS Thunb.

Raspberry.

No. 144. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A semierect plant 10 feet high, from wild stock. The small purple-rose fruits are woolly and sour. Of possible use to breeders.

115008. RUBUS NIVEUS Thunb.

Raspberry.

No. 202. From Bangalore, Mysore, March 5, 1936. Fruits of good appearance and flavor; said to fruit freely throughout the year.

115009. RUBUS PEDUNCULOSUS Don.

Blackberry.

No. 143. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A creeping vine, 10 feet long, cultivated from wild stock. The berry is pleasant and of fair size.

115010. RUBUS MOLUCCANUS L.

Blackberry.

No. 145. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A tall growing bramble with attractive foliage and an abundance of sour, purplish fruits; cultivated from wild stock. Probably of no use except for breeding.

115011. RUBUS ELLIPTICUS J. E. Smith.
Yellow Himalayan raspberry.

No. 129. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. Fruit very small, pea size, and yellow.

115012. RUBUS PEDUNCULOSUS Don.

No. 130. Collected in the Botanic Gardens, Hakgala, Ceylon, at 6,500 feet altitude, February 28, 1936.

115013. SAPINDUS sp. Sapindaceae.

No. 26. *Penela*; *bundikota*. From the market at Colombo, Ceylon, February 20, 1936. Used for washing; especially good for woollens.

115014. SEMECARPUS ANACARDIUM L. f.
Anacardiaceae.

No. 22. *Sen gutta*. From the market at Colombo, Ceylon, February 20, 1936. The juice of this nut, mixed with lime, forms an indelible ink, used for marking clothes.

115015. SESAMUM ORIENTALE L. Pedalia-
Sesameae.

No. 29. *Tallu*; *ellu*. From the market at Colombo, Ceylon, February 20, 1936. Seeds said to yield a high-grade oil.

115016. SESBANIA GRANDIFLORA (L.) Poir.
Fabaceae.

No. 153. *Agati*. From the market at Kandy, Ceylon, February 23, 1936. A small tree 20 feet high whose flowers and pinnate leaves are eaten.

114845 to 115046—Continued.

115017 to 115024. SOLANUM MELONGENA L.
Solanaceae. Eggplant.115017. No. 47. *Wambatu*; *katerikai*.
From the market at Kandy, Ceylon,
February 23, 1936. Fruit purple, 6
inches long.115018. No. 95. *Wambatu*. Collected
near Colombo, Ceylon, February 25,
1936.115019. No. 164. *Wambatu*. From
Dumballa, Ceylon, March 1, 1936.
Fruit purple white, the size of a
large orange. Said to be the best
variety grown in Ceylon.115020. No. 165. *Wambatu*. From
Dumballa, Ceylon, March 1, 1936.
Fruit purple white, about a foot long
and 2 inches in diameter. Said to
be inferior to the round variety (No.
164, P. I. 115019).115021. No. 178. *Udapi*; *Katerikai*.
From Colmbatore, March 11, 1936.
Fruit round, 3½ inches in diameter,
with a green mantle over the yellow-
green body. There are few seeds in
the red flesh, and it is not acid; said
to be one of the best varieties and to
be peculiar to Udapi where it has
been grown for centuries.115022. No. 183. *Katerikai*. From
Coimbatore, March 4, 1936. Fruit
many seeded, acid, round, yellow, 2
inches in diameter. Adapted to dry
alkaline soil.115023. No. 209. *Vankaya*. From
Bangalore, Mysore, March 5, 1936.
Fruit said to be large, round, purple.115024. No. 222. *Erangere*. From
Bangalore, Mysore, March 5, 1936.
Fruit said to be green and of super-
ior quality.

115025. SOLANUM sp. Solanaceae.

No. 172-O. From Kandy, Ceylon.
Ferot. Blue and white flowers.115026 and 115027. SOLANUM XANTHOCAR-
PUM Schrad. and Wendl. Solanaceae.

Elabattu. A prickly annual, native to
the Tropics of the Old World. Small
fruits and leaves eaten as vegetables.

115026. No. 54. 115027. No. 94.

115028 and 115029. SORGHUM VULGARE
Pers. Poaceae. Sorghum.

Collected at Teldeniya, near Kandy, Cey-
lon, February 25, 1936. Said to be used
as grain.

115028. No. 91. *Teringu*.115029. No. 105. *Kara-iringu*.115030. STIZOLOBIUM ATERRIMUM Piper and
Tracy. Fabaceae. Velvetbean.

No. 89. From Teldeniya, near Kandy,
Ceylon, February 25, 1936. Plant grown
for fodder; said to have been introduced
from the United States.

115031. STIZOLOBIUM DEERINGIANUM Bort.
Fabaceae. Deering velvetbean.No. 109. *Endura*. From Kandy, Cey-
lon, February 23, 1936.

114845 to 115046—Continued.

115032. *TAMARINDUS INDICA* L. Caesalpinaceae. Tamarind.

No. 124. *Sujambala*. From the market at Kandy, Ceylon, February 27, 1936. Fruit sold dried; used throughout India for chutney.

For previous introduction see 98884.

115033. *ALTERNANTHERA SESSILIS* (L.) R. Br. Amaranthaceae.

No. 50. *Mukunucena*; *Polkurupula*. From Teldeniya, near Kandy, Ceylon, February 25, 1936. An annual native to Australia; naturalized in tropical Asia where it grows as a weed and is used as greens.

115034. *TITHONIA DIVERSIFOLIA* (Hemsl.) A. Gray. Asteraceae.

No. 156. *Natasuria*. From Kandy, Ceylon, March 1, 1936. A stout herb 10 feet high, with large yellow flowers, commonly used as a hedge plant.

115035. *TRICHOSANTHES ANGUINA* L. Cucurbitaceae. Snakegourd.

No. 58. *Patola*; *patalunga*. From the market at Kandy, February 23, 1936. Fruit green, 4 feet long. Used as a vegetable.

For previous introduction see 103714.

115036. *TRICHOSANTHES HIMALENSIS* C. B. Clarke. Cucurbitaceae.

No. 159. *Gong Kekri*. From Sigiyira, Ceylon, at 500 feet altitude, March 1, 1936. A wild vine, becoming about 10 feet long; with oblong fruits 1 inch long.

115037. *X TRITONIA CROCOSMIFLORA* Nicholson. Iridaceae.

No. 141. From the Botanic Gardens, Hakgala, Ceylon, February 28, 1936. A plant which resembles a gladiolus, with orange-colored flowers about 2 inches across.

For previous introduction see 103482.

115038 to 115044. *VIGNA* spp. Fabaceae.

115038. *VIGNA SESQUIPEDALIS* (L.) Fr. Asparagus-bean.

No. 108. *Polon-me* or *diya-mekoral*. From Teldeniya, near Kandy, Ceylon, February 25, 1936. Pods said to be up to 4 feet long and one-half inch wide. Used as a vegetable.

115039 to 115044. *VIGNA SINENSIS* (Turner) Savi. Cowpea.

Nos. 115039 to 115042 were collected in the market at Kandy, Ceylon, February 23, 1936.

115039. No. 71. *Mekoral*.

115040. No. 117. *Me*. Pods used as a vegetable.

115041. No. 116. *Li-me*. Pods used as a vegetable.

115042. No. 118. *Nilmorunga*. Pods used as a vegetable.

115043. No. 125. *Diya-Mekoral*. From a village near Kandy, Ceylon, February 27, 1936. Seeds and pods eaten.

115044. No. 208. *Alasandi*. From Bangalore, Mysore, March 5, 1936.

114845 to 115046—Continued.

Both green pods and dried beans used as food.

115045. *VITIS VINIFERA* L. Vitaceae. European grape.

No. 199. From Bangalore, Mysore, March 5, 1936. The sweet blue-black fruits are the size of marbles and much like the Concord in flavor. Said to have been introduced into Mysore over 100 years ago; it grows well, producing two crops yearly. The vine does not stand pruning.

115046. *EUPATORIUM LIGUSTRINUM* DC. Asteraceae.

No. 171—C. From the Botanic Gardens, Hakgala, Ceylon, February 23, 1936. An attractive shrub up to 15 feet high, with small oblong leaves and many heads of small white flowers. Native to eastern and southern Mexico.

115047 to 115059.

From the Union of Soviet Socialist Republics. Seeds presented by N. I. Sharapov, at the request of Doctor Sinskaya, Institute of Plant Industry, Leningrad. Received April 23, 1936.

115047 to 115050. *ELEUSINE COBACANA* (L.) Gaertn. Poaceae. African millet.

115047. No. 6912. From Ethiopia.

115048. No. 8334. Originally from California.

115049. No. 5863. From Ceylon.

115050. No. 5847. Originally from Eritrea.

115051 to 115053. *ERAGROSTIS ABYSSINICA* (Jacq.) Schrad. Poaceae. Teff.

For previous introduction see 60485.

115051. No. 5778. From Addis Ababa, Ethiopia.

115052. No. 5797. From Ethiopia.

115053. No. 5801. From Ethiopia.

115054. *ERAGROSTIS POAEIODES* (L.) Beauv. Poaceae.

No. 1642.

For previous introduction see 113164.

115055 to 115059. *PENNISSETUM GLAUCUM* (L.) R. Br. Poaceae. Pearl millet.

115055. No. 8354. Originally from Tunisia.

115056. No. 9437. Originally from Eritrea.

115057. No. 8299. Originally from Arabia.

115058. No. 5880. Originally from Massaua.

115059. No. 7672. Originally from India.

115060 to 115095.

From the Union of Soviet Socialist Republics. Bulbs and seeds presented by Dr. V. P. Alekseev, Chief, Section of Introduction, All-Union Research Institute of Dry Subtropics, Tashkent. Received April 24, 1936.

Unless otherwise stated, the material was received as seeds.

115060 to 115095—Continued.

115060. *ALLIUM CAESIUM* Schrenk. Liliaceae.

No. 1. Bulbs of a lavender-flowered onion, native to Turkistan.

For previous introduction see 73597.

115061. *ALLIUM SUWOROWI* Regel. Liliaceae.

No. 2. A hardy bulbous plant, with very narrow flat leaves up to 16 inches long and hemispherical umbels of fragrant violet-rose flowers. Native to Kirghis Desert, Turkistan.

115062. *ALLIUM TATARICUM* L. f. Liliaceae.

No. 3. An allium with about 6 linear-lorate leaves, a stem up to 2 feet high, and a head of many rose or bright purple flowers. Native to southern Russia.

115063 to 115068. *AMYGDALUS* spp. Amygdalaceae.

115063 to 115067. *AMYGDALUS COMMUNIS* L. Almond.

115063. No. 67.

115064. No. 71.

115065. No. 72.

115066. No. 67-A.

115067. No. 68.

115068. *AMYGDALUS SPINOSISSIMA* Bunge.

No. 5. A wild almond, native to Turkistan.

For previous introduction see 108855.

115069. *BERBERIS HETEROPODA* Schrenk. Berberidaceae. Turkistan barberry.

No. 11. A handsome spreading shrub up to 5 feet high, with spines, when present, often 2 inches long and broadly oval, pale blue-green entire leaves an inch or two in length. The fragrant orange flowers are in five- to seven-flowered racemes, and the dark-blue berries are covered with a glaucous bloom. Native to Turkistan.

For previous introduction see 107896.

115070. *CICER FLEXUOSUM* Lipsky. Fabaceae.

No. 13. A decumbent or prostrate legume closely related to *Cicer songaricum*. Native to Turkistan.

115071. *CLEMATIS ORIENTALIS* L. Ranunculaceae. Oriental clematis.

No. 14. An ornamental vine with finely cut leaves and yellow and white flowers. The seeds are borne in terminal clusters, each seed having a fluffy or featherlike appendage. Native to Iran [Persia].

For previous introduction see 89733.

115072. *EREMURUS OLGAE* Regel. Liliaceae.

No. 22. A hardy herbaceous perennial with white flowers, produced in dense racemes. Native to Turkistan.

For previous introduction see 112855.

115073. *EUONYMUS SEMENOVII* Regel and Herd. Celastraceae.

No. 89. A low shrub with lanceolate leaves about 2 inches long and clusters of small yellowish flowers. Allied to *Euonymus europaeus*. Native to Turkistan.

115060 to 115095—Continued.

115074. *FRITILLARIA SEWERZOWI* Regel. Liliaceae.

No. 25. A bulbous plant with numerous ovate to lanceolate leaves up to 4 inches long and a terminal raceme of 5 to 12 purplish-green flowers. Native to Turkistan.

For previous introduction see 107543.

115075. *HERACLEUM* sp. Apiaceae.

No. 26.

115076. *HIPPOPHAE RHAMNOIDES* L. Elaeagnaceae. Common sea-buckthorn.

No. 91. A large-fruited variety with a high sugar content.

For previous introduction see 112736.

115077. *IRIS ORCHIOIDES* Carr. Iridaceae.

No. 28. A Juno iris from the mountains of Turkistan, with about six lanceolate leaves up to 9 inches long and a three- to six-headed stem often a foot high. The bright-yellow falls have purple blotches on each side of the crest.

115078. *IRIS HALOPHILA SOGDIANA* (Bunge) Skeels. Iridaceae.

No. 29. Leaves pale green, 1 to 1½ feet long; the stout terete stem, up to 2 feet high, often bears one or two spicate clusters of pale gray-lilac flowers below the end one. Native to Asia from Asia Minor eastward to Kashmir and Mongolia.

For previous introduction see 28868.

115079 and 115080. *JUGLANS FALLAX* Dode. Juglandaceae.

A walnut, closely related to *Juglans regia*, with very thick-shelled nuts. Native to southern Asia.

115079. No. 70.

115080. No. 70-A.

115081. *MALUS PUMILA* Mill. Malaceae. Paradise apple.

No. 78.

For previous introduction see 107634.

115082. *PAEONIA ANOMALA* L. Ranunculaceae. Peony.

No. 93.

115083. *PAEONIA INTERMEDIA* C. A. Mey. Ranunculaceae. Peony.

No. 38. A peony related to *Paeonia anomala*, with biternate leaves of many pinnatifid segments and large rosy-crimson flowers. Native to Turkistan.

115084 to 115087. *PISTACIA VERA* L. Anacardiaceae. Pistachio.

115084. No. 73.

115086. No. 94-A.

115085. No. 94.

115087. No. 94-B.

115088 and 115089. *PRUNUS CERASIFERA DIVARICATA* (Ledeb.) C. Schneid. Amygdalaceae. Cherry plum.

115088. No. 78.

115089. No. 55.

115090. *PRUNUS PROSTRATA* Labill. Amygdalaceae. Mountain cherry.

No. 56. A low, spreading, drought-resistant, deciduous shrub up to 3 feet high, with sharply serrate, broadly ovate leaves, pubescent beneath, and over an inch long. The rose-colored flowers, over an inch across, are followed by small red,

115060 to 115095—Continued.

nearly sessile fruits. Native to south-western Asia.

For previous introduction see 106803.

115091. AMYGDALUS TRILOBA (Lindl.) Ricker. Amygdalaceae. Flowering almond.

No. 76.

For previous introduction see 45728.

115092. PRUNUS sp. Amygdalaceae.

No. 74.

115093. PYRUS HETEROPHYLLA Regel and Schmalh. Malaceae.

No. 57.

115094. SPIRAEA HYPERICIFOLIA L. Rosaceae. Spirea.

No. 64. A deciduous shrub 5 feet high, with slender arching branches; the cuneate-obovate to obovate-lanceolate leaves, almost sessile, are over an inch long, and the small white flowers are in sessile umbels. Native from eastern Europe to Turkistan.

For previous introduction see 30569.

115095. VICIA TENUIFOLIA Roth. Fabaceae. Vetch.

No. 65.

115096 to 115106. NICOTIANA spp. Solanaceae. Tobacco.

From Peru and Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received May 7, 1936.

115096. NICOTIANA GLUTINOSA L.

No. 103. *Tabaquillo*. From Olivo, Santulalia, near Lima, Peru, April 10, 1936.

115097. NICOTIANA GLUTINOSA L.

No. 106. From Yicán, near Matucana, 84 kilometers from Lima, Peru, April 10, 1936, at 2,340 meters altitude.

115098 to 115104. NICOTIANA TABACUM L. Common tobacco.

115098. No. 107. From San Mateo, Peru, at 3,100 meters altitude, April 10, 1936. Plants came originally from Chanchamayo, Peru.

115099. No. 108. Uncultivated tobacco collected near the suburbs of Lima, Peru, April 11, 1936.

115100 to 115104. From the Estanco de Tabaco, Provincia del Guayas, Guayaquil, Ecuador, April 4, 1936.

115100. No. 109. *Balzar*.

115101. No. 109—A. *Colimes*.

115102. No. 109—B. *Dawle*.

115103. No. 109—C. *Salitre*.

115104. No. 109—D. *Santa Lucia*.

115105. NICOTIANA sp.

No. 104. From Cocachacra, near Lima, Peru, at 1,400 meters altitude, April 10, 1936. A strain with white flowers.

115106. NICOTIANA sp.

No. 105. From Matucana, Peru, at 2,340 meters altitude, April 10, 1936. A strain with white flowers.

115107 to 115128. HUMULUS LUPULUS L. Moraceae. Common hop.

From the Union of Soviet Socialist Republics. Roots presented by the Zhitomir Plant Breeding Station, at the request of H. I. Sharapov, former Head of Department of New Cultures and Introduction, Leningrad. Received April 8, 1936.

115107. Serebrianka. No. 3-10.

115108. Serebrianka. No. 3-13.

115109. Skorospelka. Nos. 4177, 9-18.

115110. Zemshevii. Nos. 4176, 28-6.

115111. Skorospelka. Nos. 4183, 9-19.

115112. Zemshevii. Nos. 4168, 27-23.

115113. Zemshevii. Nos. 4169, 27-18.

115114. Zaatzkii. Nos. 4159, 21-16.

115115. Serebrianka. Nos. 4151, 3-21.

115116. Zaatzkii. Nos. 4164, 22-8.

115117. Zemshevii. Nos. 4170, 28-7.

115118. Zemshevii. Nos. 4175, 27-11.

115119. Skorospelka. Nos. 4180, 8-20.

 Sorrel rhubarb.
 No. 976.
 For previous introduction see 114654.
 115275. RHEUM RHAPONTICUM L.
 Common rhubarb.
 No. 947.
 115276. RHEUM RIBES L.
 No. 948. A herbaceous perennial up to 5 feet high, with large cordate to reniform leaves and panicles of small blood-red, narrow-winged fruits. Native to the mountains of southwestern Asia.
 For previous introduction see 114176.

115141 to 115289—Continued.

115277. *RHEUM WEBBIANUM* Royle.

No. 696. A stout perennial up to 6 feet high, native to the Himalayas at altitudes between 10,000 and 14,000 feet.

For previous introduction see 110629.

115278. *RHEUM* sp.

No. 949. *Victoria*, a horticultural variety.

115279. *RHEUM* sp.

No. 695.

115280. to 115289. *SOLANUM* spp. Solanaceae.115280 and 115281. *SOLANUM DULCAMARA* L. Bitter nightshade.

115280. No. 1047.

115281. No. 1048.

115282. *SOLANUM GRACILE* Otto.

No. 1049.

For previous introduction see 110813.

115283. *SOLANUM LUTEUM* Mill.

No. 1051. A hairy herb with branching stems over 2 feet high, woolly ovate leaves, and umbels of white flowers followed by small yellow berries. Native to temperate South America.

For previous introduction see 110662.

115284. *SOLANUM MELONGENA* L. Eggplant.

No. 1052.

115285. *SOLANUM MINIATUM* Bernh.

No. 1057. An annual, native to southern Europe, with unarmed stems over a foot high, ovate glabrous leaves, and racemes of small white flowers.

For previous introduction see 110663.

115286 and 115287. *SOLANUM NIGRUM* L. Black nightshade.

115286. No. 1053.

115287. No. 1054.

115288. *SOLANUM PYRACANTHUM* Jacq. Nightshade.

No. 1055. A prickly evergreen bush about 3 feet high, with blue flowers in racemes sometimes 6 inches long. The bright-red round fruits are edible. Probably native to tropical Africa.

For previous introduction see 91552.

115289. *SOLANUM QUITOENSE* Lam. Naranjilla.

No. 1050. An ornamental shrub about 3 feet high; the oblong-ovate, deep-green leaves are soft-hairy and the large white flowers are in short axillary clusters. The aromatic orange-colored juicy fruits are nearly spherical and about 2 inches in diameter; they are used in the preparation of refreshing drinks. The plant is native to the mountains of Peru.

For previous introduction see 89548.

115290 to 115298. *AGROPYRON* spp. Poaceae.

From Canada. Seeds presented by J. R. Fryer, University of Alberta, Edmonton. Received April 29, 1936.

115290 to 115298—Continued.

115290. *AGROPYRON ALBICANS* Scribn. and Smith.115291. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.115292. *AGROPYRON DASYSTACHYUM* (Hook.) Scribn. Thickspike wheatgrass.

A perennial grass up to about 2 feet high, with creeping rhizomes. Native to Canada.

115293. *AGROPYRON ELONGATUM* (Host) Beauv.

A drought-resistant grass.

For previous introduction see 98526.

115294. *AGROPYRON INTERMEDIUM* (Host) Beauv.

For previous introduction see 114205.

115295 and 115296. *AGROPYRON SMITHII* Rydb.

For previous introduction see 21866.

115297 and 115298. *AGROPYRON SUBSECUNDUM* (Link) Hitchc. Bearded wheatgrass.

115299 to 115315.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad. Received April 27, 1936.

115299 to 115312. *ONOBRYCHIS* spp. Fabaceae.115299. *ONOBRYCHIS ARENARIA* DC.

No. 14377. From the Veselyi Podol Breeding Station, Ukraine.

Nos. 115300 to 115308 were received under the name "antasiatica," for which a place of publication has not been found.

115300. *ONOBRYCHIS* sp.

No. 19516. From the Plant Breeding Station, Azerbaijan.

115301. *ONOBRYCHIS* sp.

No. 16898. From the Plant Breeding Station, Azerbaijan.

115302. *ONOBRYCHIS* sp.

No. 17552. From the Plant Breeding Station Azerbaijan.

115303. *ONOBRYCHIS* sp.

No. 18253. From the Dasian District, Armenia.

115304. *ONOBRYCHIS* sp.

No. 19515. From the Azerbaijan Plant-Breeding Station.

115305. *ONOBRYCHIS* sp.

No. 19517. Sta. Var. No. 2. From the Plant-Breeding Station, Azerbaijan; originally from Akhalkalikian, Sainfain, Georgia.

115306. *ONOBRYCHIS* sp.

No. 19518. From the Plant-Breeding Station, Azerbaijan.

115307. *ONOBRYCHIS* sp.

No. 19123. From the District of Sisian, Armenia.

115299 to 115315—Continued.

115308. *ONOBRYCHIS* sp.

No. 19522. From the Plant-Breeding Station, Azerbaijan.

115309. *ONOBRYCHIS OXYTROIPOIDES* Bunge.

No. 15150. From Armenia. A stemless herbaceous perennial with a woody spreading rhizome and compound leaves 2 to 3 inches long. Native to Asia Minor.

For previous introduction see 108662.

115310. *ONOBRYCHIS PETRAEA* Desv.

No. 13406. From Azerbaijan, Shera-dil. An erect perennial with pinnate leaves, the leaflets oblong-lanceolate. Native to the Caucasus region.

For previous introduction see 108663.

115311 and 115312. *ONOBRYCHIS VULGARIS* Hill. Sanfoin.

From the Uladovo-Lulenez Plant Breeding Station. Variety 4/5.

115311. No. 19571.

115312. No. 19571-A.

115313. *PHLEUM PHLEOIDES* (L.) Karst. Poaceae. Timothy.

No. K-15098.

For previous introduction see 111706.

115314. *POA PRATENSIS* L. Poaceae. Kentucky bluegrass.

No. K-15772.

115315. *POA TIBETICA* Munro. Poaceae. Bluegrass.

No. K-14661. From the Altai region. A tall stout grass 1 to 2 feet high, with firm, linear, acute leaves about 8 inches long. Native to northwestern India at altitudes of 9,000 to 16,000 feet.

For previous introduction see 108534.

115316. *VIOLA* sp. Myristicaceae.

From the Canal Zone. Seeds presented by J. E. Higgins, Director, Canal Zone Experiment Gardens, Summit. Received May 20, 1936.

115317 to 115319.

From the Union of South Africa. Seeds purchased from the Winton Nurseries, Bonnie Vale. Received May 6, 1936.

115317. *BRUNSVIGIA GIGANTEA* Heist. Amariyllidaceae.

A brunsvigia with about four tongue-shaped leaves 3 to 5 inches broad and about 1 foot long. The 20 to 30 bright-red flowers, about 2 inches long, are in an umbel on a scape a foot or more high. Native to South Africa.

115318. *BRUNSVIGIA JOSEPHINAE* (Red.) Ker. Amariyllidaceae.

A South African bulbous plant 2 to 3 feet high, with 8 or 10 thick closely ribbed, strap-shaped leaves and large bright-red flowers.

For previous introduction see 61245.

115319. *BUPHANE DISTICHA* (L. f.) Herbert. Amariyllidaceae.

A South African plant with a very large bulb up to a foot in diameter, which

115317 to 115319—Continued.

grows half out of the ground, protected by a multitude of papery coats. The stout scape, 6 inches to 1 foot high, bears a dense umbel of red flowers, and the thick distichous leaves, which appear late, are strap-shaped and 1 to 2 feet long.

For previous introduction see 108292.

115320 to 115416.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Lenin Academy of Agricultural Sciences, Leningrad. Received May 25, 1936.

115320 to 115322. *AGROPYRON ELONGATUM* (Host) Beauv. Poaceae.

A drought-resistant grass.

For previous introduction see 115293.

115320. No. 815. From Kazakstan.

115321. No. 575. K-15102.

115322. No. 810. From Saratov.

115323. *AGROPYRON JUNCEUM* (L.) Beauv. Poaceae.

No. 709. From Pamir, Turkistan.

For previous introduction see 88715.

115324. *AGROPYRON* sp. Poaceae.

No. 900. From Turkmenistan.

115325. *AGROSTIS ALBA* L. Poaceae.

No. K-15067. From eastern Kazakstan.

115326. *AGROSTIS ALBA* L. Poaceae.

No. K-16086.

From the Mamont region.

115327. *ALOPECURUS PRATENSIS* L. Poaceae. Meadow foxtail.

No. K-15095. From Gorki Province.

For previous introduction see 111514.

115328. *POA PALUSTRIS* L. Poaceae. Bluegrass.

No. K-15094. From Gorki Province.

115329 to 115344. *BROMUS* spp. Poaceae. Bromegrass.115329 to 115338. *BROMUS INERMIS* Leyss.

115329. No. K-9792.

115330. No. K-11854.

115331. No. K-14590.

115332. No. K-14591.

115333. No. K-14593.

115334. No. K-15016.

115335. No. K-15786.

115336. No. K-15899.

115337. No. K-16081.

115338. No. K-17252.

115339. *BROMUS TECTORUM GLABRATUS* Spenner.

No. K-14925.

For previous introduction see 106427.

115340 to 115342. *BROMUS VARIEGATUS* Bieb.

115340. No. K-14958.

115320 to 115416—Continued.

115341. No. K-16080. From Armenia.
115342. No. K-15204. From Armenia.
115343. *BROMUS* sp.
No. K-15029. From the Ukraine.
115344. *BROMUS* sp.
No. K-9760.
- 115345 to 115349. *DACTYLIS GLOMERATA* L.
Poaceae. Orchard grass.
115345. No. K-11837. From northern Caucasus.
115346. No. K-11859. From northern Kazakhstan.
115347. No. K-11971. From Armenia.
115348. No. K-15270. From eastern Kazakhstan.
115349. No. K-15756. From west Siberia.
- 115350 to 115358. *FESTUCA* spp. Poaceae.
Fescue.
- 115350 to 115355. *FESTUCA ELIATOR* L.
Meadow fescue.
115350. No. K-14964. From Armenia.
115351. No. K-14966. From Armenia.
115352. No. K-14967. From Armenia.
115353. No. K-15079.
115354. No. K-15819. From eastern Kayakota.
115355. No. K-17726. From western Siberia.
- 115356 to 115358. *FESTUCA OVINA* SULCATA Hack.
For previous introduction see 111975.
115356. No. K-12257. From south Kayakota.
115357. No. K-14274. From the Middle Volga region.
115358. No. K-16221.
115359. *FESTUCA RUBRA* L. Red fescue.
No. K-12900.
- 115360 to 115391. *MEDICAGO* spp. Fabaceae.
Medick.
- 115360 to 115367. *MEDICAGO FALCATA* L.
Yellow-flowered alfalfa.
115360. No. K-195.
115361. No. K-143.
115362. No. K-201.
115363. No. K-210.
115364. No. K-216.
115365. No. K-261.
115366. No. K-329.
115367. No. K-431.
- 115368 to 115386. *MEDICAGO SATIVA* L.
Alfalfa.
115368. No. K-1244.
115369. No. K-1453.
115370. No. K-1484.

115320 to 115416—Continued.

115371. No. K-1646.
115372. No. K-1961.
115373. No. K-1836.
115374. No. K-1282.
115375. No. K-2116.
115376. No. K-1489.
115377. No. K-1530.
115378. No. K-1830.
115379. No. K-1812.
115380. No. K-1450.
115381. No. K-1460.
115382. No. K-1887.
115383. No. K-2113.
115384. No. K-2114.
115385. No. K-1458.
115386. No. K-1404.
115387. *MEDICAGO*.
No. K-205. A hybrid alfalfa.
- 115388 to 115391. *MEDICAGO SATIVA* L.
Alfalfa.
115388. No. K-1851.
115389. No. K-1839.
115390. No. K-1627.
115391. No. K-1545.
- 115392 to 115396. *MELILOTUS* spp. Fabaceae.
Sweetclover.
- 115392 to 115394. *MELILOTUS ALBA* Desr.
White sweetclover.
115392. No. K-9654/94.
115393. No. K-10354.
115394. No. K-10178.
115395. *MELILOTUS DENTATA* (Waldst. and Kit.) Pers.
No. K-456. From west Siberia.
115396. *MELILOTUS OFFICINALIS* (L.) Lam.
No. K-2207. From the Amur region.
- 115397 to 115399. *ONOBRYCHIS* spp. Fabaceae.
115397. *ONOBRYCHIS ARENARIA* DC.
No. 14377. From the Vesely Podol Plant Breeding Station.
For previous introduction see 111695.
115398. *ONOBRYCHIS VULGARIS* Hill.
Sanfoin.
No. 17154. Originally from Armenia.
115399. *ONOBRYCHIS* sp.
No. 19515. From Azerbaijan. Received under the name "antasiatica," for which a place of publication has not been found.
- 115400 to 115405. *PHLEUM* spp. Poaceae.
Timothy.
- 115400 and 115401. *PHLEUM PHLEOIDES* (L.) Karst.
115400. No. K-14930.
115401. No. K-15098. From west Siberia.

115320 to 115416—Continued.

- 115402 to 115405. *PHLEUM PRATENSE* L.
 115402. No. K-15309. From Armenia.
 115403. No. K-15776. Originally from the Altai region.
 115404. No. K-9747.
 115405. No. K-15772. From west Siberia.
- 115406 to 115416. *TRIFOLIUM* spp. Fabaceae. Clover.
 115406. *TRIFOLIUM HYBRIDUM* L. Alsike clover.
 No. R-17749. From the Ural region.
- 115407 to 115414. *TRIFOLIUM PRATENSE* L. Red clover.
 115407. No. R-2724. From the Tambor region.
 115408. No. R-9726. From the Ural region.
 115409. No. R-9992. From the Cheronepety region.
 115410. No. K-16186. From Transven.
 115411. No. K-18969. From west Siberia.
 115412. No. K-1914. From west Siberia.
 115413. No. K-18970. From west Siberia.
 115414. No. R-19556. From Leningrad Province.
- 115415 and 115416. *TRIFOLIUM REPENS* L. White clover.
 115415. No. K-19554.
 115416. No. R-15670. From Kazakhstan.

115417 to 115427.

- From Belgium. Seeds presented by the Director, Botanic Garden, Brussels. Received April 29, 1936.
115417. *ASTRAGALUS CICER* L. Fabaceae.
 A European perennial with prostrate or ascending stems.
 For previous introduction see 66515.
- 115418 to 115424. *DELPHINIUM* spp. Ranunculaceae. Larkspur.
 115418. *DELPHINIUM BICORNUTUM* Hemsl.
 A branching delphinium about 3 feet high, with five-parted leaves and blue flowers with spurs sometimes two-horned. Native to Mexico.
115419. *DELPHINIUM BRUNONIANUM* Royle.
 A perennial larkspur a foot or less high, with five-parted leaves, the lobes sharply cut or toothed. Native to western Tibet at 14,000 feet altitude.
 For previous introduction see 104950.
115420. *DELPHINIUM CARDIOPETALUM* DC.
 An annual, blue-flowered larkspur closely related to *Delphinium hatteratum*. Native to the Mediterranean region.

115417 to 115427—Continued.

115421. *DELPHINIUM MAACKIANUM* Regel.
 For previous introduction and description see 114643.
115422. *DELPHINIUM PENARDI* Huth.
 115423. *DELPHINIUM TATSIIENENSE* Franch.
 For previous introduction and description see 114506.
115424. *DELPHINIUM VILLOSUM* Stev.
 A perennial delphinium with stems about 3 feet high and lax racemes of blue flowers. It is allied to *Delphinium elatum*. Native to southeastern Europe and western Asia.
115425. *RHEUM TETRAGONOPUS* Mart. Polygonaceae.
 115426. *RHEUM UNDULATUM* L. Polygonaceae.
 115427. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.
- 115428 to 115525.
 From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received April 29, 1936.
- 115428 to 115430. *ALLIUM CEPA* L. Liliaceae. Onion.
 115428. No. 297. *Piaz.* From Poona, March 16, 1936. A flat red onion, 3 inches in diameter. Presented by the principal of the Poona Agricultural College.
 115429. No. 298. *Piaz.* From Poona, March 16, 1936. A flat white onion 3 inches in diameter. Presented by the principal of the Poona Agricultural College.
 115430. No. 299. *Piaz.* From Poona, March 16, 1936. A red onion, presented by a farmer.
115431. *BETA VULGARIS* L. Chenopodiaceae. Common beet.
 No. 308. *Palak.* A potherb, said to be native. Presented by the principal of the Poona Agricultural College.
115432. *BETA VULGARIS* L. Chenopodiaceae. Common beet.
 No. 325. *Palak.* March 16, 1936. A potherb, native variety.
- 115433 to 115436. *CAJANUS INDICUS* Spreng. Fabaceae. Figeon-pea.
 Nos. 115433 to 115435 were collected at Poona, March 16, 1936. *Tur.* An important dry-soil crop; used as split peas.
115433. No. 290.
 115434. No. 300.
 115435. No. 301.
 115436. No. 118—A. *Raba fora.* From near Kandy, Ceylon. February 26, 1936. The leaves are eaten.
- 115437 to 115443. *CAPSICUM ANNUM L.* Solanaceae. Common redpepper.
 From Poona, March 16, 1936. Presented by Dr. G. S. Cheema, Chief Horticulturist, Bombay Government. Strains of redpeppers that have been bred from the local forms.

115428 to 115525—Continued.

115437. No. 322. A long, thin-skinned variety.
115438. No. 322-A. A thick-skinned variety.
115439. No. 322-B. *Hungarian yellow*; a vegetable type.
115440. No. 322-C. *Ruby King*; a vegetable type.
115441. No. 322-D. *Donna kai* of Dlarwar; a vegetable type.
115442. No. 322-E. Local *Deccan*.
115443. No. 322-F. Short, thick, and very pungent.
115444. CARTHAMUS TINCTORIUS L. Asteraceae. Safflower.
No. 293. *Kardi*. Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. Used for oil and dye.

For previous introduction see 99340.

115445. CHENOPODIUM ALBUM L. Chenopodiaceae.
No. 307. *Chandenbatwa*. Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. The leaves are used as a potherb throughout the year.

For previous introduction see 97718.

115446. CHENOPODIUM ALBUM L. Chenopodiaceae.
No. 279. *Chakvat*. From Poona, March 15, 1936. Much esteemed as a potherb.
- 115447 to 115450. CICER ARIETINUM L. Fabaceae. Chickpea.
Nos. 115447 to 115449 were collected at Poona, March 16, 1936. *Chama*. Presented by the principal of the Poona Agricultural College. An important dry ground crop. The beans are used in a variety of ways, even sold roasted as peanuts.

115447. No. 303. 115449. No. 305.

115448. No. 304.

115450. No. 252. *Kabula challa*. From Bombay, March 10, 1936. Said to be imported from Iran [Persia].

115451. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.
No. 271. *Tindo* or *delpasand*. From Poona, March 15, 1936. Variety *Fistulosus*. A form with thicker stems, sparingly lobed leaves, and long, somewhat hispid hairs. The smooth globose fruits, 3 inches in diameter, are sold green and are much esteemed as a vegetable, especially in the Punjab.

115452 to 115459. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

115452. No. 182. *Weleri polam*. From Coimbatore, March 4, 1936. An elongate, cylindrical melon about 18 inches long with rounded ends, yellowish rind slightly netted, and fragrant, mealy, pale salmon flesh of little flavor.

115453. No. 231. From the Tunghabdra River district, Mysore, March 6, 1936, at 1,200 feet altitude. A compressed fruit 6 inches long by 8 inches in diameter, netted, creamy white outside with firm, salmon-col-

115428 to 115525—Continued.

ored insipid flesh which will not rot, but will shrivel instead.

115454. No. 233. From Bombay, March 8, 1936. A well-netted, golden, elongated fruit 12 inches long, somewhat pointed at the ends. The thick, white, firm flesh has a honeydew flavor and keeps remarkably well with no tendency to rot.
115455. No. 234. Bombay, March 8, 1936. A rare type. The fruits are subglobose, 6 inches long, pale cream throughout, with a trace of netting on the outside, and insipid flesh.
115456. No. 235. From Bombay, March 8, 1936. A rare type with compressed fruit, 6 inches long by 8 inches in diameter, smooth, marbled green and yellow. The fragrant green flesh changes to salmon color around the seed cavity and has a distinctive flavor.
115457. No. 236. From Bombay, March 8, 1936. From the market. A nearly smooth yellow fruit with a few green marks, about the size and shape of a large grapefruit. The pale-yellow flesh is firm, fragrant, and sometimes very good. It keeps well.
115458. No. 342. *Pineapple*. From Poona, March 16, 1936. A melon with green, fragrant flesh which has been selected from local strains.
115459. No. 343. *Japanese mixed*. From Poona, March 16, 1936. A trade name used by the local seedsmen. The fruit is said to be of good quality.
115460. CUCUMIS SATIVUS L. Cucurbitaceae. Cucumber.
No. 326. *Kira*. From Poona, March 16, 1936. Fruit said to be 6 inches long, with white flesh; eaten fresh.
115461. CUCUMIS SATIVUS L. Cucurbitaceae. Cucumber.
No. 327. *Kakri*. From Poona, March 16, 1936. When ripe, the golden-brown fruit is 1 foot long.
- 115462 to 115464. CYAMOPSIS TETRAGONOLOBA (L.) Taub. Fabaceae. Guar.
From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College.
- For previous introduction see 114932.
115462. No. 314. 115464. No. 336.
115463. No. 315.
115465. DAUCUS CAROTA L. Apiaceae. Carrot.
No. 332. *Gajas*. March 16, 1936. From Poona. A pink carrot 6 inches long and over 2 inches across the top, said to grow the year round. Winter-grown specimens are tender and sweet.
- 115466 and 115467. DOLICHOS BIFLORUS L. Fabaceae. Twinflower dolichos.
From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. The green pods are used as food and the dry beans as fodder.
115466. No. 312. *Kutti*.
115467. No. 313. *Kutti*; a different strain.

115428 to 115525—Continued.

115468 to 115471. *DOLICHOS LABLAB* L. Fabaceae. Hyacinth-bean.

115468. No. 276. *Paota* or *surati wal.* From Poona, March 15, 1936. The green pods and split dry seeds are eaten. Also used as a fodder plant.

115469. No. 277. *Karwal.* From Poona, March 15, 1936. The dry beans are used as food. The plant is used as fodder and green manure.

115470. No. 311. *Kadow wal.* From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College.

115471. No. 338. *Walwor.* From Poona, March 16, 1936. The pods are esteemed.

115472. *ELAEAGNUS* sp. Elaeagnaceae.

No. 345. From Poona, March 16, 1936. A wild shrub about 6 feet high; the sour-sweet, orange-pink fruits are sold in the market.

115473. *GOSSYPIUM ARBOREUM* L. Malvaceae. Cotton.

No. 335. Poona, March 16, 1936. Seeds from young plants 3 feet high, flowers mahogany colored; not widely cultivated.

115474. *GUIZOTIA ABYSSINICA* (L. f.) Cass. Asteraceae.

No. 310. *Karala.* March 16, 1936. The seeds contain from 40 to 43 percent of oil which is used for various household uses. Presented by the principal of the Poona Agricultural College.

115475. *SESBANIA AEGYPTIACA* Poir. Fabaceae.

No. 281. Poona, March 15, 1936. An attractive small tree with pods 6 inches long. Found in dry situations.

115476. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.

No. 306. From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. Said to be naturalized from imported seed.

115477. *LATHYRUS SATIVUS* L. Fabaceae. Bitter vetch.

No. 302. *Lakh.* From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. The dry beans are used as food.

115478. *LENS ESCULENTA* Moench. Fabaceae. Lentil.

No. 291. *Masur.* Poona, March 16, 1936. Used as cattle feed and for green manure.

115479. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 309. From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. Said to be naturalized.

115480. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 333. *Desi ghas.* "Native grass" from Kathiawar. From Poona, March 16, 1936. Grown as an annual for fodder.

115428 to 115525—Continued.

115481. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 334. *Desi ghas.* From Poona, March 16, 1936. A local alfalfa which lasts 3 years and can be cut 10 or 12 times a year; yields 15 tons of hay per acre.

115482. *MIMOSA* sp. Mimosaceae.

No. 280. *Shing.* From Poona, March 15, 1936. An attractive shrub 10 feet high, found in dry situations. The seeds are said to be used for ink.

115483. *MORINGA OLEIFERA* Lam. Moringaceae. Horseradish-tree.

For previous introduction and description see 114975.

115484 to 115492. *PHASEOLUS* spp. Fabaceae. Bean.

115484. *PHASEOLUS ACONITIFOLIUS* Jacq. Moth bean.

No. 273. *Matki.* From Poona, March 15, 1936. A dry-soil plant whose pods are eaten green and the dry seeds used as "split peas."

115485 and 115486. *PHASEOLUS AUREUS* Roxb. Mung bean.

From Poona, March 16, 1936. One of the best varieties. Both the green pods and the dry beans are used as food, and the plant is used as fodder.

115485. No. 289. 115486. No. 272.

115487 to 115489. *PHASEOLUS LUNATUS* L. Lima bean.

From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College.

115487. No. 294.

115488. No. 295. *Doublebeans.*

115489. No. 296. *Rangoon-bean.*

115490. *PHASEOLUS MUNGO* L. Urd.

No. 275. *Udi.* From Poona, March 15, 1936. The green pods and dry beans are used as food; the plant is used as fodder. From the flour a favorite wafer is made.

For previous introduction see 101581.

115491 and 115492. *PHASEOLUS VULGARIS* L. Common bean.

From Poona, March 15, 1936.

115491. No. 269. *Giaora.* Beans eaten stewed.

115492. No. 274. *Sharaun guara.* Both green pods and dry beans are eaten as food.

115493. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 346. *Watana.* From Bombay, March 17, 1936. Seeds used as food and as fodder.

115494. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 292. *Watana.* From Poona, March 16, 1936. Both green and dried beans are eaten as food, and the plant is used as fodder.

115428 to 115525—Continued.

115495 to 115497. *RAPHANUS SATIVUS* L.
Brassicaceae. Radish.

From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College.

115495. No. 328. *Magri*. The seed pods, up to 2 feet long, are used as a vegetable.

115496. No. 329. *Magri*. The seed pods, up to 2 feet long, are used as a vegetable.

115947. No. 331. *Sufed muli*. The leaves and the white root, up to a foot long, are eaten. The flavor is mild and pleasant, and the plant is said to grow the year round.

115498. *SOJA MAX* (L.) Piper. Fabaceae.
Soybean.

No. 337. From Poona, March 16, 1936. Origin unknown; the beans are used both as food and as fodder.

115499. *CAJANUS INDICUS* Spreng. Fabaceae.
Pigeonpea.

No. 203. *Tuarka balli*. From Bangalore, Mysore, March 5, 1936. Much esteemed as food.

115500. *VOANDZEBIA SUBTERRANEA* (L.) Thours. Fabaceae.

No. 246. *Musambi charma*. From Bombay, March 8, 1936. Eaten dry and said to be imported from Africa.

115501 to 115512. *SOLANUM MELONGENA* L.
Solanaceae. Eggplant.

115501. No. 278. *Kathe vanjalk*. From Poona, March 15, 1936. A very seedy, much-esteemed fruit, globose, greenish, marked white or purple, and about 2 inches in diameter with a spiny calyx.

115502. No. 323. *Gote vangi*. From Poona, March 16, 1936. A popular variety, said to be subglobose, of medium size, pale purple lined abundantly with white.

115503. No. 324. *Kalevangi*. From Poona, March 16, 1936. A black-purple fruit 8 inches long.

115504. No. 339. *Muktakeshi*. From Poona, March 16, 1936. A variety weighing up to 2 pounds and free from seeds.

115505. No. 340. *Giant of Benares*. A strain selected by a local seedsman from a northerly variety. Said to grow to 3 pounds.

115506 to 115512. From Poona, March 16, 1936. Presented by Dr. G. S. Chacema, Chief Horticulturist, Bombay Government. A collection of strains bred from the local forms, represented in his collection.

115506. No. 321. *Black Beauty*.

115507. No. 321—A. *Gote Vangi*.

115508. No. 321—B. *Long Green*.

115509. No. 321—C. *Long Purple*.

115510. No. 321—D. *New York Improved Purple*.

115511. No. 321—E. *Round Purple*.

115512. No. 321—F. *Round Purple*.

115428 to 115525—Continued.

115513 to 115517. *TRITICUM AESTIVUM* L.
Poaceae. Common wheat.

From Poona, March 16, 1936.

115513. No. 283. *Punjabi Sarvati*. Said to have come originally from the Punjab.

115514. No. 284. *Kaligawaran*.

115515. No. 285. *Gawaran*.

115516. No. 286. *Sarpatti Gawaran*.

115517. No. 282. *Bakshi goo*. Said to be locally grown and to be a very good winter crop.

115518. *VIGNA SESQUIPEDALIS* (L.) Frurth. Fabaceae. Asparagus-bean.

No. 344. From Poona, March 16, 1936. Pods and seeds used as food, but the plant is not widely grown, although the pods appear to be very good.

115519 to 115524. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.

115519. No. 243. *Choti chau*. From Bombay, March 8, 1936. Said to be eaten dry and to be from Gujerat.

115520. No. 247. *Chaula*. From Bombay, March 8, 1936. Said to come from Abusar. Eaten dry.

115521 to 115524. From Poona, March 16, 1936. Presented by the principal of the Poona Agricultural College. *Chauli*. The seeds are eaten dry and used as fodder.

115521. No. 316. 115523. No. 318,

115522. No. 317. 115524. No. 319.

115525. *ZIZIPHUS MAURITIANA* Lam. Rhamnaceae. Indian jujube.

No. 253. *Bhor*. From Bombay, March 11, 1936. An uncultivated tree whose leaves are used for fodder and the small fruits, three-fourths of an inch in diameter, are more or less astringent, but edible.

115526 to 115537.

From the Netherlands. Seeds presented by Dr. Th. J. Stomps, Director, Botanic Garden of the University of Amsterdam, Amsterdam. Received April 22, 1936.

115526. *CUCURBITA MAXIMA* Duchesne. Cucurbitaceae. Squash.

115527. *LACTUCA PLUMIERI* (L.) Gren. and Godr. Cichoriaceae.

For previous introduction see 114648.

115528. *LACTUCA VIROSA* L. Cichoriaceae.

For previous introduction see 114536.

115529. *RHEUM PALMATUM* L. Polygonaceae. Sorrel rhubarb.

For previous introduction see 115274.

115530. *RHEUM PALMATUM TANGUTICUM* Maxim. Polygonaceae. Rhubarb.

For previous introduction see 114468.

115531 to 115537. *SOLANUM* spp. Solanaceae.

115531. *SOLANUM AVICULARE* Forst. f. Nightshade.

115526 to 115537—Continued.

115532. SOLANUM BONARIENSE L.

Grandillo. A tender evergreen shrub up to 10 feet high, with ovate-oblong, sinuate-repand leaves, long lateral racemes of large white flowers and globose yellow berries. Native to Argentina; said to have medicinal properties.

For previous introduction see 41312.

115533. SOLANUM CAPSICASTRUM Link.
False Jerusalem-cherry.

For previous introduction see 114543.

115534 and 115535. SOLANUM DULCAMARA L.
Bitter nightshade.115536. SOLANUM MELONGENA L.
Eggplant.

115537. SOLANUM ROSTRATUM Dun.

115538 to 115547.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. A. M. Popov, Institute of Plant Industry, Leningrad. Received May 6, 1936.

Seeds grown at the Aral Research Station.

115538 to 115542. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

115538. No. 2474. *Azhinovskii*.115539. No. 2634. *Azovskii Pudovik*.115540. No. A-523. *Lubimetz khutora*.115541. No. A-2482. *Murashka Bogavetskii*.115542. No. A-1822. *Tsgeoecemurzko*.

115543 to 115547. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

115543. *Bukharka*.115544. *Itch-Kysyl*.115545. *Koi-bash*.115546. *Krasavitsa Vostoka*.115547. *Tsaritsa Dynl*.

115548 and 115549. ORYZA SATIVA L. Poaceae. Rice.

From Portuguese Guinea, Africa. Seeds presented by the Resident Agriculturist of Bafata, through Dr. Leon Croizat, New York City, N. Y. Received April 23, 1936.

115548. Variety *Jambarum*.115549. Variety *Jaka*.

115550 to 115632.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received May 4, 1936.

Collected in the bazar at Istanbul, Turkey, March 31 and April 4, 1936, unless otherwise stated.

115550 and 115551. ABELMOSCHUS ESCULENTUS (L.) Moench. Malvaceae. Okra.

115550. No. 68. *Bümia*.115551. No. 63. *Bümia*.

115552 to 115554. ALLIUM CEPA L. Liliaceae. Onion.

115552. No. 25. A brown onion.

115553. No. 72. A long type of onion.

115554. No. 75. A large flat sweet onion.

115550 to 115632—Continued.

115555. ALLIUM PORRUM L. Liliaceae. Leek.

No. 31. *Prassa*.

115556. ANETHUM GRAVEOLENS L. Apiaceae. Dill.

No. 66. *Tercotou*.

115557 and 115558. APIUM GRAVEOLENS L. Apiaceae. Celery.

115557. No. 23. *Rus Selino Kerewiz*.115558. No. 43. *Kerewiz Yaprok*.

115559 to 115561. BETA VULGARIS L. Chenopodiaceae. Common beet.

115559. No. 61. *Pazi* (red).115560. No. 7. *Pandjar*.115561. No. 4. *Rundjar*.

115562 to 115566. BRASSICA SP. Brassicaceae.

115562. BRASSICA OLERACEA BOTRYTIS L. Cauliflower.

No. 62. *Carmochitia*.

115563 and 115564. BRASSICA OLERACEA CAPITATA L. Cabbage.

115563. No. 40. *Lahana*, a green cabbage.115564. No. 15. *Kirmizi lahana*, a red cabbage.

115565. BRASSICA OLERACEA GEMMIFERA Zenker. Brussels sprouts.

No. 41. *Bruselle Chou*.

115566. BRASSICA RAPA L. Turnip.

No. 50. *Sielgarm*.

115567. CALENDULA ARVENSIS L. Asteraceae.

No. 84. April 4, 1936. From near Istanbul, Turkey. An annual plant about 2 feet high, with spatulate, radical leaves and yellow flower heads. Native to southern Europe.

115568 to 115570. CAPSICUM ANNUM L. Solanaceae. Common redpepper.

115568. No. 73. A large round type.

115569. No. 34. *Biber uzuu*.115570. No. 52. *Patlidjan Kerner*.

115571. CICER ARIETINUM L. Fabaceae. Chickpea.

No. 36. *Nohut*.

115572. CICHORIUM ENDIVIA L. Cichoriaceae. Endive.

No. 17. *Kuzu kulagi*.

115573 to 115576. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

115573. No. 78.

115574. No. 83. Mixed seed.

115575. No. 56. *Karpuz*.115576. No. 8. *Karpuz*.

115577. CORCHORUS OLITORIUS L. Tiliaceae. Jute.

No. 65. *Muhlie*. A type used as greens.

For previous introduction see 61225.

115550 to 115632—Continued.

- 115578 to 115580. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.
115578. No. 81. *Izmir* or *Smyrna* type.
115579. No. 19. *Topatan Kavunu*. A long sugar melon.
115580. No. 33. Sugar melon (round).
- 115581 to 115583. CUCUMIS SATIVUS L. Cucurbitaceae. Cucumber.
115581. No. 37. A long type.
115582. No. 42. *Angurükia*, a short type (Russian).
115583. No. 71. A Russian type.
- 115584 and 115585. CUCURBITA MAXIMA Duchesne. Cucurbitaceae. Squash.
115584. No. 82. A long white squash.
115585. No. 14. *Helvacci Kabak*.
115586. CUCURBITA MOSCHATA Duchesne. Cucurbitaceae. Cushman.
- No. 45. *Bal Kabak*.
115587. CUCURBITA PEPO L. Cucurbitaceae. Pumpkin.
- No. 60. *Takiz Kabak*.
- 115588 and 115589. DAUCUS CAROTA L. Apiaceae. Carrot.
115588. No. 3. *Havuç Büyük*. A large carrot.
115589. No. 64. *Carota ufak*.
115590. ERUCA SATIVA Hill. Brassicaceae. Roquette.
- No. 1. *Roka salata*. Garden cress.
- For previous introduction see 58414.
- 115591 and 115592. LACTUCA SATIVA L. Cichoriaceae. Garden lettuce.
115591. No. 13. *Top salata*, head lettuce.
115592. No. 54. *Marulha*.
- 115593 and 115594. LAGENARIA LEUCANTHA (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.
115593. No. 32. *Su Kobak*.
115594. No. 30. *Armia Kobak*.
115595. LENS ESCULENTA Moench. Fabaceae. Lentil.
- No. 35.
- 115596 and 115597. LEPIDIUM SATIVUM L. Brassicaceae. Garden cress.
115596. No. 58. *Ceré*.
115597. No. 76.
115598. LOLIUM PERENNE L. Poaceae. Perennial ryegrass.
- No. 20. *Chim*.
- 115599 to 11601. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.
115599. No. 5.
11600. No. 79. A tall-growing type for irrigated gardens.
11601. No. 80. A small variety for dry soils.
11602. MALVA sp. Malvaceae.
- No. 9. *Ebe gumeçi*, mallow (greens).

115550 to 115632—Continued.

- 115603 and 115604. MEDICAGO SATIVA L. Fabaceae. Alfalfa.
115603. No. 6. *Junca*.
115604. No. 22.
- 115605 to 115607. PETROSELINUM CRISPUM (Mill.) Nym. Apiaceae. Parsley.
115605. No. 59. *Maidanoz*.
115606. No. 67. A curled type.
115607. No. 74. *Persil*.
115608. PHALARIS CANARIENSIS L. Poaceae. Canary grass.
- No. 26.
- 115609 to 115617. PHASEOLUS VULGARIS L. Fabaceae. Common bean.
115609. No. 10. *Cale*. A short pole bean with very thin tender pods.
115610. No. 12. Late beans.
115611. No. 28. *Gher tzali fasulio*.
115612. No. 29. *Barbunia*.
115613. No. 38. *Yeni dünya*. A late variety.
115614. No. 46. *Aiche Kadın*. An early variety.
115615. No. 47. *Aiche alldjüll*.
115616. No. 69. *Ayse Kadın fasulyasi*. A late type.
115617. No. 77.
- 115618 to 115620. PISUM SATIVUM L. Fabaceae. Pea.
115618. No. 27. *Bezelia Turk*.
115619. No. 39. *Freng bezelia*. A sweet pea.
115620. No. 53.
- 115621 to 115623. RAPHANUS SATIVUS L. Brassicaceae. Radish.
115621. No. 51. *Crup bievöz*. A white type.
115622. No. 11. *Bayir turku*.
115623. No. 2. *Kirmizi Turp*. A red radish.
115624. SESAMUM ORIENTALE L. Pedaliaceae. Sesame.
- No. 21.
115625. SOLANUM MELONGENA L. Solanaceae. Eggplant.
- No. 18. *Boston Patlicani*. A round eggplant.
- 115626 and 115627. SPINACIA OLERACEA L. Chenopodiaceae. Common spinach.
115626. No. 70.
115627. No. 55. *Ispamak*.
115628. VICIA FABA L. Fabaceae. Broadbean.
- No. 57. *Bakla Fevci*.
115629. VIGNA SESQUIPEDALIS (L.) Fruwirth. Fabaceae. Asparagus-bean.
- No. 48. *Antaze firsuka*.
- 115630 and 115631. VIGNA SINENSIS (Torrer) Savi. Fabaceae. Cowpea.

115550 to 115632—Continued.

115630. No. 44. *Boređe fasulio*. A black-eyed bean.

115631. No. 49.

115632. ZEA MAYS L. Poaceae. Corn. No. 24.

115633. VITIS sp. Vitaceae.

From Ecuador. Plants and cuttings presented by Luis Gattoni, Departamento de Agricultura de Ecuador, Quito. Received May 20, 1936.

A wild grape, native to Ecuador, used as a grafting stock for varieties of *Vitis vinifera*.

115634 to 115637. ZEA MAYS L. Poaceae.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received May 6, 1936.

From Agra, United Provinces, March 28, 1936. Both yellow and white types are planted in the rainy season. The white corn is said to be very tender.

115634. No. 433. 115636. No. 433-B.

115635. No. 433-A. 115637. No. 433-C.

115638 to 115662. HEDERA spp. Araliaceae.

From England. Plants purchased from L. R. Russell, Ltd., Richmond Nurseries, Richmond, Surrey. Received May 20, 1936.

115638 and 115639. HEDERA CANARIENSIS Willd. Algerian ivy.

A high-climbing tender ivy with large bright-green roundish-ovate leaves. Native to the Canary Islands.

115638. *Gloire de Maringo*.

115639. *Azorica variegata*.

115640. HEDERA NEPALENSIS K. Koch.

A high-climbing ivy with triangular-ovate to triangular-oblong, pinnate-lobed leaves 2 to 5 inches long. Native to India.

115641 to 115644. HEDERA COLCHICA Koch. Colchis ivy.

A high-climbing vine with the young growth covered by golden-yellow scales, broadly cordate, almost entire, very large bright-green leaves of firm texture, and small umbels of greenish-yellow flowers in paniculate clusters, followed by black fruits. Native to the Caucasus region.

For previous introduction see 108792.

115641. The type.

115642. Variety *Amurensis*.

115643. Variety *Dentata*.

115644. Variety *Dentata Variegata*.

115645 to 115662. HEDERA HELIX L. English Ivy.

115645. Variety *Alba Marginata*; small greenish leaves with white margins.

115646. Variety *Angularis Aurea*; young leaves soft yellowish green.

115638 to 115662—Continued.

115647. Variety *Atropurpurea*; leaves dark purple in winter.

115648. Variety *Caenwoodiana*; leaves small, finely cut with whitish veins.

115649. Variety *Contracta*; plants dwarf, freely branched, leaves small, close set, much waved at margins.

115650. Variety *Donerailensis*; leaves larger than those of variety *Caenwoodiana*, usually three-lobed.

115651. Variety *Elegantissima*; leaves small with white margins.

115652. Variety *Emerald Gem*; leaves small, bright glossy green.

115653. Variety *Howardii*; leaves mottled, sometimes silver at edge.

115654. Variety *Rhomboidea Variegata*; leaves rhomboid ovate, silver margined.

115655. Variety *Sublee*; leaves small, silver variegated and margined.

115656. Variety *Comglomerata*; plants dwarf with erect stems and close-set leaves.

115657. Variety *Mrs. Pollock*; leaves small, golden.

115658. Variety *Russell's Gold*; leaves small, new growths golden.

115659. Variety *Shcen Silver*; leaves small, silver edged and variegated.

115660. Variety *Hibernica*.

115661. Variety *Hibernica Aurcomaculata*; leaves blotched pale, creamy yellow.

115662. Variety *Rhomboidea*; leaves thick, rhomboid-ovate; stems thick with short internodes.

115663. CARYA OVATA (Mill.) K. Koch. Juglandaceae. Hickory nut.

From Canada. Scions presented by G. H. Corsan, Echo Valley Nut Plantation, Islington, Ontario. Received May 21, 1936.

Neilson. A true shagbark hickory; the nuts are very large and have a thin shell which cracks easily. The tree is 70 feet tall, with a spread of 35 feet, and withstands a temperature of -40° F.

115664. AMORPHOPHALLUS KONJAC KOCH. Araceae.

From Japan. Tubers purchased from the Yokohama Nursery Co., Yokohama. Received May 21, 1936.

An aroid grown in Japan for the edible starchy tubers.

For previous introduction see 47226.

115665. PROSOPIS CHILENSIS (Molina) Stuntz. Mimosaceae.

From Hawaii. Seeds presented by E. L. Caum, Experiment Station of the Hawaiian Sugar Planters Association. Received May 5, 1936.

The sweetish pods of this tree are eaten by cattle.

For previous introduction see 96516.

115666 to 115776. VIGNA SINENSIS (Torrer) Savi. Fabaceae. **Cowpea.**

From England. Seeds presented by the Royal Botanic Gardens, Kew, Surrey. Received May 22, 1936.

Nos. 115666 to 115671 were originally from the Anglo-Egyptian Sudan, Africa.

115666. *Lubia hillu.* From Donga Province.

115667. *Lubia hillu.* From Dongola Province.

115668. *Lubia hinaitu.* From Medani District.

115669. *Lubia Abiad.* From Medani District.

115670. *Lubia hillu.* From Shendi District.

115671. *Lubia hillu.* From White Nile Province.

Nos. 115672 to 115689 were originally from Ceylon.

115672. *Usl Leema.* No. 35. From Ambalantota.

115673. *Gal-li-me.* No. 86. From Badulla District.

115674. *Hen-me.* No. 87. From Badulla District.

Nos. 115675 to 115680 were from Bata District.

115675. *Kallu Leema.* No. 39.

115676. *Masmora.* No. 54.

115677. *Ematiya.* No. 56.

115678. *Bala.* No. 58.

115679. *Hodi.* No. 59.

115680. *Polon.* No. 68.

115681. *Polon.* No. 35. From Galle District.

115682. *Palukena.* No. 70. From Matava District.

Fruits hang in clusters.

115683. *Polon Leema.* No. 71. From Matava District.

115684. *Wapurana.* No. 72. From Matava District.

115685. *Kalu.* No. 64. From Midyemaya District.

115686. *Kotu me.* No. 18. From Nikamaratiya District.

115687. *Kotu me.* No. 2. From Rattota District.

115688. *Swappu Pathangai.* No. 91. From Sengapaddai District.

115689. *Ametiya Leema.* No. 51. From Weeraketiya District.

115690. *Azmerli.* From Egypt.

115691. *Beladi.* From Egypt.

115692. Family 4/34. No. 6. From Egypt. Claimed to be resistant to root knot and immune from rust.

Nos. 115693 to 115706 were originally from Kenya Colony, Africa.

Nos. 115693 to 115695 were from Embu District, Central Province.

115693. Brown. **115695. White.**

115694. Purple.

115666 to 115776—Continued.

115696. *Kimakoko.* From Killifi, Coast Province.

Nos. 115697 to 115701 were from Machakos District.

115697. No. 1. **115700. No. 5.**

115698. No. 3. **115701. No. 6.**

115699. No. 4.

Nos. 115702 to 115706 were from Nyanza Province.

115702. *Nyamamu.*

115703. *Dagala.* buff.

115704. *Nyalienga.*

115705. *Dagala.* No. 6.

115706. *Dagala.* No. 7.

115707. White. From Mauritius.

115708. Pink. From Mauritius.

Nos. 115709 to 115715 were originally from Northern Rhodesia, Africa.

115709. No. 5. From Barotseland.

Introduced by natives from Angola.

115710. No. 18. From Barotseland.

115711. No. 9. From Broken Hill District.

115712. No. 15. From Isoka Imporokosi(?).

115713. Purple pod.

115714. *Chipinyi.*

115715. *White Poddio.*

Nos. 115716 to 115745 were originally from Nigeria, Africa.

Nos. 115716 to 115723 were from Benue Province.

115716. Y 1.

115717. Y 2.

115718. Y 7.

115719. Y 14-A.

115722. Y 17-D. *Segha.*

115723. Y 20. *Segha.*

115724. No. 2. *Ere me me* (?). From Hovia Emivate.

Nos. 115725 to 115729 were from Kano Emivate.

115725. 1-B. *Sa dabba Sata.*

115726. 3-A. *Hannum Marini.*

115727. No. 4. *Kanmanado.*

115728. No. 5. *Kyampos.*

115729. *Dan arbain.*

Nos. 115730 to 115735 were from Katsina Emivate.

115730. No. 1. **115732. No. 5.**

115731. No. 2. **115733. No. 7.**

115734. No. 8. *Kashin Kaji.*

115735. *Tesririya.*

115736. No. 1. From Lake Chad.

115666 to 115776—Continued.

115737. No. 2. From Lake Chad.

Nos. 115738 to 115744 were from Sokoto Emirate.

115738. *Sokoto*. No. 1.115739. *Sokoto*. No. 2.115740. *Sokoto*. No. 3.115741. *Sokoto*. No. 4.115742. *Sokoto*. No. 5.115743. *Sokoto*. No. 6.115744. *Sokoto*. No. 8.115745. *Jan Tserriya*. From Zaria District.

Nos. 115746 to 115751 were originally from Tanganyika, Africa.

115746. *Cowpea*. From Morogore District.115747. *Kunde Tambaazi*. From Morogore District.115748. *Kiliyamgombera*.115749. *Kati*.115750. *Kunde loima*.115751. *Muskeneka*.

Nos. 115752 to 115776 were originally from Uganda, Africa.

115752. No. 1. From Bunyoro District.

115753. No. 2. From Bunyoro District.

Nos. 115754 to 115757 were from Imball District.

115754. *Namugero* (c).115755. *Kagumba*.115756. *Kisyanka*.115757. *Namudamu* (b).

Nos. 115758 to 115762 were from Kampala District.

115758. *Bimogeti*. 115761. *Inpindi*.115759. *Kantinti*. 115762. *Inpindi*.115760. *Kigomoti*.

Nos. 115763 to 115771 were from Lango District.

115763. *Acuta-akol*.115764. *Akuto-atar*.115765. *Acungo*.115766. *Alegi*.115767. *Apee*.115768. *Kakobe-mogoto*.115769. *Magoti* (2).115770. *Magoti* (3).115771. *Obungula* or *Gswagwa*.

Nos. 115772 to 115775 were from Toro District.

115772. *Binara*. 115774. *Musango*.115773. *Muko*. 115775. *Rubani*.115776. *Ngor* (Alur), *Osuru* (Lugevava). From White River Province.

115777 to 115783. GOSSYPIUM spp. Malvaceae.

From Puerto Rico. Seeds collected by L. C. Fife, Bureau of Entomology and Plant Quarantine. Received April 28, 1936.

The C. and F. numbers are those of the Division of Cotton and Other Fiber Crops and Diseases.

Wild cotton.

Nos. 115777 and 115778 have locks 2½ to 3 inches long.

115777. GOSSYPIUM sp.

C. and F. No. 1089.

115778. GOSSYPIUM sp.

C. and F. No. 1090.

115779. GOSSYPIUM sp.

C. and F. No. 1091.

115780. GOSSYPIUM sp.

C. and F. No. 1092.

115781. GOSSYPIUM sp.

C. and F. No. 1093.

Seed fuzzy; leaves entire, resembling upland cotton.

115782. GOSSYPIUM sp.

C. and F. No. 1094.

115783. GOSSYPIUM sp.

C. and F. No. 1095.

115784. VITIS VINIFERA L. Vitaceae. European grape.

From Greece. Cuttings presented by the Ecole Supérieure Agronomique, Athens, at the request of N. Lely, Greek Legation, Washington, D. C. Received May 22, 1936.

Rhazaki de Crete.

115785 to 115790. TRITICUM spp. Poaceae.

From England. Seeds presented by Prof. John Percival, University College, Reading. Received May 1, 1936.

115785. TRITICUM COMPACTUM ATRUM Körn.

115786. TRITICUM PYRAMIDALE PSEUDOCOMPRESSUM Percival.

115787. TRITICUM PYRAMIDALE PSEUDOCOCTICUM Percival.

115788. TRITICUM SPHAEROCOCCUM GLOBOSUM Percival.

115789. TRITICUM SPHAEROCOCCUM RUBIGINOSUM Percival.

115790. TRITICUM TIMOPHEEVI Zhuk.

115791. ROYSTONEA sp. Phoenicaceae. Royal palm.

From California. Seeds presented by David Barry, Jr., Los Angeles. Received May 22, 1936.

The roystoneas are tall, pinnate-leaved palms, native to the West Indies.

115792 to 115809. CAPSICUM ANNUUM L.
Solanaceae. **Common redpepper.**

From India. Seeds presented by R. B. Deshpande, Special Research Assistant to the Imperial Economic Botanist, Pusa. Received May 11, 1936.

Chilli.

115792. Type 4.	115801. Type 25.
115793. Type 5.	115802. Type 26.
115794. Type 6.	115803. Type 28.
115795. Type 8.	115804. Type 30.
115796. Type 12.	115805. Type 31.
115797. Type 15.	115806. Type 34.
115798. Type 18.	115807. Type 41.
115799. Type 19.	115808. Type 46.
115800. Type 21.	115809. Type 51.

115810 and 115811.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received May 6, 1936.

115810. OLEA VERRUCOSA (Roem. and Schult.) Link. Oleaceae. **Olive.**

A tree up to 30 feet high, native to southern Africa, with linear-lanceolate leaves 3 inches long, covered with small yellow scales beneath, and short axillary panicles of inconspicuous flowers followed by small dry globose fruits. The fruit is of no value in itself, but the tree is very drought- and frost-resistant.

For previous introduction see 111232.

115811. RHUS LANCEA L. f. Anacardiaceae. **Sumac.**

Kavree-boom. A small bushy tree with gray bark and long-stemmed leaves with linear-lanceolate leaflets 4 to 6 inches long. It is a valuable hardwood tree for regions of limited rainfall. Native to the Cape of Good Hope.

For previous introduction see 111233.

115812 to 115821. TRITICUM spp. Poaceae.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. N. I. Vavilov, Institute of Plant Industry, Leningrad. Received May 11, 1936.

115812. TRITICUM HORDEIFORME Host.

No. 16419.

115813. TRITICUM MACHA Dekapr. and Men.

No. 28170.

For previous introduction see 113963.

115814. TRITICUM ORIENTALE INSIGNE Percival.

No. 23896. From Daghestan.

115815. TRITICUM ORIENTALE INSIGNE Percival.

No. 15992. From Turkey.

115816. TRITICUM PERSICUM FULIGINOSUM Zhuk.

No. 7106. From the republic of Georgia.

115812 to 115821—Continued.

115817. TRITICUM PERSICUM RUBIGINOSUM Zhuk.

No. 11891. From the republic of Georgia.

115818. TRITICUM SPHAEROCOCCUM GLOBOSUM Percival.

No. 23824. From the Punjab, India.

115819. TRITICUM THAOUAR Reut.

No. 27134. From Turkey.

115820. TRITICUM VAVILOVI Jakub.

No. 33770. From Van, Turkey.

115821. TRITICUM VAVILOVI Jakub.

No. 29533. From Van, Turkey.

115822 to 115824.

From Kenya Colony, Africa. Seeds purchased from the Mount Elgon Nurseries, Elgon, Kitale. Received May 16, 1936.

115822 and 115823. TEPHROSIA VOGELII Hook. f. Fabaceae.

115822. A form with white flowers.

115823. A form with pink flowers.

115824. OLEA CHRYSOPHYLLA Lam. Oleaceae.

A small evergreen tree closely related to the cultivated olive. Its chief ornamental value lies in the golden color of the under surface of the leaves. Native to eastern Africa.

For previous introduction see 99445.

115825 to 115829. ORNITHOGALUM spp. Liliaceae.

From the Union of South Africa. Bulbs presented by Miss K. C. Stanford, Stellenbosch, through the W. Atlee Burpee Co., Philadelphia, Pa. Received May 25, 1936.

115825. ORNITHOGALUM LACTEUM Jacq. **Star-of-Bethlehem.**

A bulbous plant from the Cape of Good Hope, with about 10 fleshy basal leaves and white flowers in a large dense raceme on a stout stem 1 or 2 feet high.

For previous introduction see 80575.

115826. ORNITHOGALUM MACULATUM Jacq.

An ornithogalum native to southern Africa, with four or five linear leaves about 4 inches long and several small yellow flowers with brown spots at the tips of the three outer segments.

115827. ORNITHOGALUM SAUNDERSIAE Baker.

A South African bulbous plant with lanceolate leaves up to 1 foot long, and white or yellow flowers borne in a dense raceme on a scape 1 foot or more high.

For previous introduction see 66473.

115828. ORNITHOGALUM sp.

Received under the name "splendens," for which a place of publication has not been found.

A rare species with large orange-red flowers on stems about 2 feet high.

115829. ORNITHOGALUM sp.

A form with double flowers.

115830. NICOTIANA TABACUM L. Solanaceae. **Common tobacco.**

From Guatemala. Seeds collected by C. H. Logan at Antigua. Received May 26, 1936.

Volunteer tobacco, collected on the ruins of old houses in Antigua, January 1936.

115831 to 115833. TRIFOLIUM spp. Fabaceae. **Clover.**

From the Union of Soviet Socialist Republics. Seeds presented by Dr. N. I. Vavilov, Director, Institute of Plant Industry, Leningrad. Received May 13, 1936.

115831. TRIFOLIUM CANESCENS Willd.

No. 11756. From Azerbaijan. A perennial clover about 6 inches high, with obovate villous leaflets and grayish-white flower heads. Native to Asia Minor.

For previous introduction see 108700.

115832 and 115833. TRIFOLIUM OCHROLEUCON Huds.

From the Maisop region, northern Caucasus.

115832. No. K-16255.

115833. No. K-16257.

115834 to 115842.

From Germany. Seeds presented by Dr. Rosmer, Director, Pflanzenzuchtstation der Universität, Halle Saale. Received May 18, 1936.

115834 to 115840. TRITICUM AESTIVUM L. Poaceae. **Common wheat.**

115834. No. 1020/31.

115835. No. 4172/30.

115836. No. 1456/32.

115837. No. 3330/32.

115838. No. 4453/31.

115839. No. 1381/32.

115840. No. 4065/32.

115841 and 115842. HORDEUM VULGARE L. Poaceae. **Barley.**

115841. *Nacktgerste.*

115842. *Morgenrot.*

115843 to 115853. SOJA MAX (L.) Piper. Fabaceae. **Soybean.**

From India. Seeds presented by I. S. S. Kumar, Economic Botanist of the Government of Bombay. Received May 19, 1936.

Late-maturing Indian varieties.

115843. No. 1. Yellow; from Lucknow.

115844. No. 2. Black; from Lucknow.

115845. No. 3. White; from Darjeeling.

115846. No. 4. Green; from Darjeeling.

115847. No. 5. Small, brown; from Darjeeling.

115848. No. 6. Large, brown, from Darjeeling.

115849. No. 7. *Baramali*; from Darjeeling.

115850. No. 8. *Napali*; from Assam.

115851. No. 9. *Spotted Khasi*; from Assam.

115843 to 115853—Continued.

115852. No. 10. *White Khasi*; from Assam.

115853. No. 11. From the Unao District.

115854 to 115864. TRITICUM spp. Poaceae.

From the Union of Soviet Socialist Republics. Seeds presented by N. I. Sharapov, Head of the Department of New Cultures, Institute of Plant Industry, Leningrad. Received May 7, 1936.

115854. TRITICUM DICOCOIDES SPONTANEOGRUM (Flaks.) Percival.

No. 17157. From Syria.

115855. TRITICUM DURUM FERE-ALEXANDRINUM Jacob. and Nikol.

No. 17195. From Syria.

115856 to 115858. TRITICUM DURUM Desf. **Durum wheat.**

115856. No. 17889. From Cyprus.

115857. No. 17784. From Cyprus.

115858. No. 17787. From Cyprus.

115859. TRITICUM MONOCOCCUM HORNEMANNI Clem.

No. 23653. From Armenia.

115860. TRITICUM DURUM Desf. **Durum wheat.**

No. 23032. From Yugoslavia.

115861. TRITICUM sp.

No. 28247. From Nakhechevan. Received as "spontaneum," a name for which a place of publication has not been found.

115862. TRITICUM DURUM Desf. **Durum wheat.**

No. 14384. From Turkey (Asia Minor).

115863 and 115864. TRITICUM THAOU DAR Reut.

From Turkey (Asia Minor).

115863. No. 27141. 115864. No. 27134.

115865 to 115867.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanic Garden, Tiflis, Georgia. Received May 8, 1936.

115865. BELLEVALIA LONGISTYLA (Misch.) Grossh. Liliaceae.

A bulbous plant with lanceolate leaves about a foot high and one-half inch wide and a panicle of 15 to 25 small, rusty-purple, campanulate flowers. Native to the Caucasus region.

For previous introduction see 108783.

115866. FESTUCA ELATIOR L. Poaceae. **Meadow fescue.****115867. FESTUCA OVINA** SULCATA Hack. Poaceae. **Fescue.**

For previous introduction see 115258.

115868 to 115872.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. A. M. Popov, Institute of Plant Industry, Leningrad. Received May 21, 1936.

115868 and 115869. BRASSICA OLERACEA CAPITATA L. Brassicaceae. **Cabbage.**

115868 to 115872—Continued.

115868. No. 179. From Nomer Pervy, Moscow.

115869. No. 184. From Belorusskaya, Moscow.

115870. BRASSICA OLERACEA L. Brassica-
caea. Wild cabbage.

No. 1425. From northern Caucasus. Received under the varietal name "orientalis," for which a place of publication has not been found.

115871 and 115872. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

115871. No. K-1561. *Budionovka*.

115872. No. 163/co. *Chudo Rinka*. From the Ukraine.

115873 to 115973.

From India. Seeds collected by Walter Koelz. Bureau of Plant Industry. Received May 6, 1936.

115873. ABELMOSCHUS ESCULENTUS (L.) Moench. Malvaceae. Okra.

No. 401. *Bhindi*. From the market at Agra, United Provinces, March 28, 1936. Fruits up to 3 inches long.

115874 to 115876. ALLIUM CEPA L. Liliaceae. Onion.

Piyaz. From Agra, United Provinces, March 29, 1936.

115874. No. 407. Said to be a red flat strong onion, 4 inches in diameter, which keeps from May to January in good condition.

115875. No. 417. Said to be a flat red onion, 4 inches in diameter.

115876. No. 437. Said to be a flat white onion, 4 inches in diameter.

115877. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

No. 257. *Aurapalli*. From Poona, March 15, 1936.

115878 to 115886. BRASSICA spp. Brassicaceae.

115878 to 115883. BRASSICA OLERACEA BOTRYTIS L. Cauliflower.

From Agra, United Provinces, March 27 to March 29, 1936.

115878. No. 394. *Agra phulgobi*. The largest heads of the five varieties grown here.

115879. No. 397. *Agra phulgobi*. The heads are 10 inches in diameter.

115880. No. 399. *Agra phulgobi*.

115881. No. 409. *Patna phulgobi*. A form said to be self-bleaching.

115882. No. 410. *Saharanpur phulgobi*. Said to be 15 days later than 409 [115881] and to have larger heads.

115883. No. 435. Said to mature in 3 months.

115884. BRASSICA OLERACEA CAPITATA L. Cabbage.

No. 428. *Gobi*. March 29, 1936. Probably naturalized from Europe. Heads seen on the market were firm, rounded, and 8 inches in diameter.

115873 to 115973—Continued.

115885 and 115886. BRASSICA RAPA L. Turnip.

Shelgam. From Agra, United Provinces, March 28, 1936.

115885. No. 398. Said to be red-skinned, rounded, and to grow the year round.

115886. Probably the common red-skinned form.

115887. CARTHAMUS TINCTORIUS L. Asteraceae. Safflower.

No. 418. *Kasni*. From Agra, United Provinces, March 29, 1936. Flowers and seeds used medicinally.

For previous introduction see 115444.

115888. MURRAYA PANICULATA (L.) Jack. Rutaceae.

No. 420. From Agra, United Provinces, March 29, 1936. An attractive shrub with fragrant white flowers like orange blossoms and dark shiny leaves.

For previous introduction see 32317.

115889. CHENOPODIUM ALBUM L. Chenopodiaceae.

No. 414. *Batwa*. A potherb from Agra, United Provinces, March 29, 1936.

115890 to 115902. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

Nos. 115890 to 115895 were collected at Poona, March 15, 1936.

115890. No. 256. An elongate, light-green melon with darker irregular stripes, 18 inches long; fairly sweet flesh of good quality and thin rind.

115891. No. 258. A dark-green melon 19 inches long, with thick rind; flesh fairly sweet and of fair quality.

115892. No. 262. A somewhat elongate melon 1 foot in diameter with medium-green rind with broken nets of darker green; rind thick; flesh coarse but fairly sweet.

115893. No. 265. Fruit globose, dark green, feebly blotched with lighter green, 14 inches in diameter; rind hard and thick; flesh melting, insipid.

115894. No. 267. Fruit 18 inches long, elongate, rind pale green, striped darker. Flesh granular, not particularly good.

115895. No. 287. A dark-green globose fruit 1 foot in diameter; flesh of fair quality, but not very sweet.

Nos. 115896 and 115897 were collected in Bombay, March 18, 1936.

115896. No. 351. A whitish green, unmarked, subglobose fruit, 1 foot in diameter; flesh pink, coarse and insipid.

115897. No. 352. A light-green fruit finely netted with darker green, subglobose and 1 foot in diameter; flesh of fair quality but insipid.

Nos. 115898 to 115900 were collected at Jalgaon, Khandesh, Bombay Presidency, March 21, 1936.

115898. No. 374. A medium-green, finely netted fruit, heavily blotched with darker green, 18 inches by 12 inches; rind thick; flesh of fair quality and flavor.

115873 to 115973—Continued.

115899. No. 367. A dark-green, unmarked, somewhat elongate fruit 8 inches in diameter; rind thin and firm; flesh fine-grained and of fair flavor.
115900. No. 368. A light-green fruit, finely ribbed and netted with darker green, 14 inches in diameter; flesh of fair texture and flavor.
- Nos. 115901 and 115902 were collected at Agra, United Provinces, March 29, 1936.
115901. No. 439. *Tarbuzia*. Form grown in the rainy season.
115902. No. 429. *Tinda*. Round fruits 6 inches in diameter, much esteemed as a vegetable.
- 115903 to 115935. *CUCUMIS* spp. Cucurbitaceae.
- 115993 to 115926. *CUCUMIS* MELO L. Muskmelon.
- Nos. 115903 to 115909 were collected at Poona, March 14 and 15, 1936.
115903. No. 254. Said to come from near Shalapur. Fruits 8 inches long, pointed at both ends, creamy white, moderately netted, fragrant, with white, sometimes very sweet flesh. Seed cavity small; seeds firmly attached.
115904. No. 255. Fruit fragrant, golden brown, often with green ribs and heavily netted, subglobose, about 8 inches in diameter, with a pronounced navel in the blossom end; flesh bright salmon, somewhat acid.
115905. No. 260. Fruit much flattened, 5 inches by 2½ inches, creamy white, smooth, with strange fragrance; flesh bright salmon of fair flavor.
115906. No. 261. Fruit top-shaped, 12 inches long, with a pronounced navel at the blossom end; green yellow with broken bands of yellow brown; flesh green, melting, fragrant; fruit firm and keeps well.
115907. No. 263. Fruit subglobose, somewhat flattened, very firm, cream-colored, heavily and strongly netted, with a strong strange fragrance; flesh thick, bright salmon, of odd flavor.
105908. No. 264. Fruit much elongated, 15 inches by 8 inches, yellow, more or less netted, more or less conspicuous navel; flesh salmon, firm but juicy, not much flavor.
115909. No. 268. Fruit subglobose, 10 inches long, orange and heavily netted; flesh salmon, somewhat acid.
- Nos. 115910 and 115911 were collected March 18, 1936, in Bombay.
115910. No. 350. Fruit compressed, 6 inches by 4 inches, yellow to gold and nearly smooth; flesh white, sweet, with a pleasant distinctive flavor.
115911. No. 353. Fruit football shaped, 1 foot long, yellow, feebly netted; flesh white, rather flavorless.

115873 to 115973—Continued.

- Nos. 115912 to 115915 were collected March 21, 1936, at Jalgaon, Khandesh, Bombay Presidency.
115912. No. 362. A smooth yellow fruit 18 inches long; flesh salmon, somewhat insipid; seed cavity large, and flesh rather thin.
115913. No. 371. A round fragrant fruit, 6 inches in diameter, pale green, heavily and coarsely ribbed; flesh white, insipid. Navel at blossom end.
115914. No. 372. Fruit green-brown, ribbed with pale green and somewhat netted, 6 inches in diameter; flesh salmon, insipid.
115915. No. 373. Fruit pear-shaped, smooth, cream-colored, 4 to 5 inches long; flesh greenish white; rind rather thin; seed cavity compact with seeds.
- Nos. 115916 and 115917 were collected at Jalgaon, East Khandesh, Bombay Presidency, March 21, 1936.
115916. No. 375. Fruit strongly netted, yellow-brown, 6 by 4 inches; flesh green, melting, good flavor.
115917. No. 376. Fruit round, somewhat elongate, 6 inches in diameter, pale yellow and strongly netted; flesh salmon, thick and melting, often of good flavor.
- Nos. 115918 to 115922 were collected at Itarsi, Central Provinces, March 23, 1936.
115918. No. 378. Fruit round or slightly elongate, with conspicuous navel at blossom end, yellow-brown, strongly netted; flesh thick, pale salmon, acid, otherwise flavorless.
115919. No. 379. Fruit flattened, 6 by 4 inches; segments of yellow-brown, heavily netted, alternate with nearly smooth ones of dark green; flesh salmon, insipid.
115920. No. 380. Fruit elongate, 14 by 4 inches, yellow, heavily netted with broad, darker, unnetted ribs; flesh pale salmon, acid.
115921. No. 381. Fruit elongate, flask-shaped, up to 1 foot long, pale yellow; flesh paler, insipid. Skin may be smooth or slightly netted.
115922. No. 382. Fruit rounded oblong, 8 inches long, golden brown with unbroken ribs of yellow; smooth skinned; flesh salmon, good flavor.
- Nos. 115923 to 115926 were collected at Agra, United Provinces, March 25, 1936.
115923. No. 384. Fruits much flattened, usually with a huge protruding navel over blossom end, up to 3½ inches in diameter, smooth, yellow, more or less ribbed or mottled green. Rind very thin; flesh one-fourth inch thick, white. The whole seed cavity is tightly packed with seeds.
115924. No. 411. *Kharbuza*. Probably a mixture of races or subspecies.
115925. No. 432. *Kharbuza*. Planted in the rainy season. Most of the

115873 to 115973—Continued.

southern sorts are grown in winter or during light monsoons. This may represent a mixture.

115926. No. 440. *Kakri*. Supposed to be seeds of an elongate "snake cucumber" now on the market. Fruits 2 feet long, light green with fine elongate ridges. When young, they make an excellent salad vegetable, later stewed.

115927 to 115935. CUCUMIS SATIVUS L. Cucurbitaceae. Cucumber.

115927. No. 266. *Kakri*. From Poona, March 15, 1936. Fruit 2 feet long by 8 inches in diameter, yellow, smooth. Seed cavity like a muskmelon with seeds and placenta free from the flesh. Flesh thick, white, firm, mealy, cucumberlike. Seeds in orange acid envelope.

115928. No. 360. *Kakri*. From Bombay, March 20, 1936. Fruits 6 inches long, white when ripe; eaten as a salad.

115929. No. 363. *Danga Kakri*. From Jalgaon, Khandesh, Bombay Presidency, March 21, 1936. Fruits over 2 feet long and 5 or 6 inches in diameter, tapering to the neck, which is somewhat curved. Rather irregularly ribbed lengthwise, ribs 1 inch apart. Color pale yellow; flesh mealy also creamy, turning salmon color at the cavity. Whole fruit when ripe, fragile and perishable; fragrant, but no taste except slight fresh acidity. The immature fruits are used for salad.

115930. No. 377. *Kakri*. From Harsi, Central Provinces, March 23, 1936. A tapering fruit, 18 inches long and 6 to 8 inches in diameter; light green with elongated broken blotches of blackish green; fruit thin; seed cavity large; fruit frail.

115931. No. 390. *Khira*. Said to be a foot long and yellow when ripe; stewed or eaten fresh.

Nos. 115932 to 115935 were collected in Agra, United Provinces, March 27, 1936.

115932. No. 391. *Kakri*.

115933. No. 402. *Samo Khira*. A quick-growing, alkali-resistant fruit 10 inches long, dark green when ripe.

115934. No. 404. *Khira*. Said to be a foot long and yellow when ripe; eaten raw.

115935. No. 403. *Kakri*. Said to be 18 inches long and white when ripe; eaten both raw and cooked.

115936 to 115939. CUCURBITA spp. Cucurbitaceae.

Nos. 115936 and 115937 were collected at Jalgaon, Khandesh, Bombay Presidency, March 21, 1936.

115936. CUCURBITA MAXIMA Duchesne. Squash.

No. 369. Fruit much flattened, 18 inches by 12 inches, strongly ribbed,

115873 to 115973—Continued.

white to salmon pink. This or a kindred race is said to grow to 70 pounds.

- 115937 to 115939. CUCURBITA MOSCHATA Duchesne. CUSHAW.

115937. No. 365. *Gangafal*. Fruit 30 inches long by 14 inches in diameter, green, sparingly spotted with yellow and with very faint ribs. Leaves and flowers are eaten as greens. Keeps very well.

Nos. 115938 to 115940 were collected at Agra, United Provinces, March 25 to 29, 1936.

115938. No. 386. *Kasipul* or *Kola*. Fruit buckskin pink, up to 18 inches long, tapering to the blossom end, smooth except for the rather conspicuous ribs.

115939. No. 431. *Kaddu*. A mixture of probably three local forms, obtained from a farmer.

115940. DAUCUS CAROTA L. Apiaceae. Carrot.

No. 389. *Lal gadjas*. A red carrot that grows all the year.

115941. DURANTA REPENS L. Verbenaceae. Skyflower.

No. 288. From Poona, March 16, 1936. A very handsome shrub used for hedges; the racemes of purple flowers are followed by orange fruits about one-half inch in diameter.

For previous introduction see 112087.

115942. HIBISCUS SABDARIFFA L. Malvaceae. Roselle.

No. 408. *Patwa*. From Agra, United Provinces, March 28, 1936. A stout annual 5 to 7 feet high; the fruiting calyxes are used for jellies.

For previous introduction see 114957.

115943. LACTUCA SATIVA L. Cichoriaceae. Garden lettuce.

No. 400. *Salat*. From Agra, United Provinces, March 28, 1936. Probably naturalized. Used fresh and cooked.

115944 to 115946. LAGENARIA LEUCANTHA (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

115944. No. 356. *Dudhya*. From Bombay, March 20, 1936. Fruits rounded oblong, not so prominently necked as the bottle gourd. Used as a vegetable.

115945. No. 392. *Ghahiya* or *Loki*. From Agra, United Provinces, May 27, 1936. Fruit bottle-shaped, sold immature on the market, about 2 inches long and pale green. Used for curries.

115946. No. 427. From Agra, United Provinces, March 29, 1936. Said to be a rounded form, used for food while immature.

115947. LUFFA ACUTANGULA (L.) Roxb. Cucurbitaceae. Singkwa towelgourd.

No. 436. *Turi*. From Agra, United Provinces, March 29, 1936. Young fruits eaten.

For previous introduction see 114963.

115873 to 115973—Continued.

115948 to 115950. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae.
Suakwa towelgourd.

Young fruits eaten cooked; mature fruit fibers used as sponges.

For previous introduction see 114964.

115948. No. 425. *Turai*. From Agra, United Provinces, March 29, 1936.

115949. No. 357. *Ghi turai* or *Gosara*. From Bombay, March 20, 1936.

115950. No. 426. *Turai*. From Agra, United Provinces, March 29, 1936.

115951. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 383. From Agra, United Provinces, March 24, 1936. Fruits red, round to laterally elongate, up to 3 inches in diameter. Probably naturalized.

115952. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 430. *Karela*. From Agra, United Provinces, March 29, 1936. Fruits bitter, eaten fried; considered medicinal and used in various ways.

115953. *MORUS* sp. Moraceae.

No. 388. From Agra, United Provinces, March 27, 1936. Tree up to 35 feet high, well-formed, with large shiny dark-green leaves. Fruits red-purple, acid, up to 2 inches long and one-fourth of an inch in diameter.

115954. *PHASEOLUS AUREUS* Roxb. Fabaceae. Mung bean.

No. 366. From Jalgaon, Khandesh, Bombay Presidency, March 21, 1936. Dry beans popular as "split peas," also used as fodder.

115955 to 115958. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

From Agra, United Provinces, March 27 to 29, 1936.

115955. No. 393. *Feziabad Muli*. Leaves said to be small, root about 13 inches long, the upper fourth green and the rest white. Said to grow all year.

115956. No. 396. *Muli*. A form with large leaves; root white, 18 inches long; said to grow the year round. Both leaves and roots are eaten.

115957. No. 413. *Muli*.

115958. No. 438. *Sengar*. Used as vegetable in all of its parts, especially the elongated seed pods.

115959. *RUMEX VESICARIUS* L. Polygonaceae.

No. 355. *Chuka bhaji*. From Bombay, March 20, 1936. Leaves used as a potherb.

115960. *SOJA MAX* (L.) Piper. Fabaceae. Soybean.

No. 358. From Bombay, March 20, 1936. Dry beans used as food; the plant and pods used as fodder.

115961 to 115964. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

115961. No. 370. From Jalgaon, Khandesh, Bombay Presidency, March 21, 1936. Fruits yellow, faintly marked with purple, very seedy, 1½ inches in diameter, somewhat elongated.

115873 to 115973—Continued.

115962. No. 434. *Sufed Brinjal*. From Agra, United Provinces, March 29, 1936. Fruit white, rounded, about 4 inches long; considered very good.

115963. No. 442. *Bhattya bengal*. From Agra, United Provinces, March 29, 1936. Fruit said to be purple-black, rounded, and 3 inches in diameter.

115964. No. 364. *Wanga*. From Jalgaon, Khandesh, Bombay Presidency, March 21, 1936. Fruit yellow to gold, rounded, and 4 inches in diameter.

115965. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.

No. 415. *Palag*. From Agra, United Provinces, March 29, 1936. A potherb.

115966 and 115967. *TRICHOSANTHES ANGUINA* L. Cucurbitaceae. Snakegourd.

From Agra, United Provinces, March 28 and 29, 1936.

For previous introduction see 115035.

115966. No. 406. *Chachera*. Said to grow to 10 feet and to be a strain from the Bombay region.

115967. No. 443. *Chachinda*.

115968. *VICIA FABA* L. Fabaceae. Broadbean.

No. 412. *Bagala*. From Agra, United Provinces, March 28, 1936. A forage crop.

115969 to 115972. *VIGNA* spp. Fabaceae.

115969. *VIGNA SESQUIPEDALIS* (L.) Fr-wirth. Asparagus-bean.

No. 395. *Lobia*. From Agra, United Provinces, March 27, 1936. A strong-growing vine; the green pods and seeds are used as food.

115970. *VIGNA SINENSIS* (Torner) Savi. Cowpea.

No. 405. *Lamas*. From Agra, United Provinces, March 28, 1936. Pods 6 inches long, much esteemed as a green vegetable.

115971. *VIGNA SINENSIS* (Torner) Savi. Cowpea.

No. 359. *Chawl*. From Bombay, March 20, 1936. Pods and dry beans eaten.

115972. *VIGNA* sp.

No. 441. *Lobia*. From Agra, United Provinces, March 29, 1936. A mixture of varieties of which the green pods are eaten.

115973. *WRIGHTIA TINCTORIA* R. Br. Apocynaceae.

No. 354. From Kaligan, Bombay Presidency, March 18, 1936. A small bushy tree about 8 feet high, with opposite elliptic lanceolate leaves 3 to 5 inches long and large cymes of small white flowers. Native to central and eastern India.

115974. *BETULA CORYLIFOLIA* Regel and Maxim. Betulaceae. Birch.

From Japan. Seeds presented by Dr. T. Nakai, Director, Botanical Garden of the Imperial University, Tokyo. Received May 22, 1936.

This is allied to the river birch (*Betula nigra*) of the eastern United States. The

115974—Continued.

coarsely dentate leaves are broadly elliptic or obovate $1\frac{3}{4}$ to $2\frac{1}{2}$ inches long, and silky hairy on the veins beneath. Native to Japan.

115975. DELPHINIUM CASHMEREANUM
Royle. Ranunculaceae.

Cashmere larkspur.

From the Netherlands. Seeds presented by Dr. V. J. Koningsberger, Director, Botanic Garden, Utrecht. Received May 23, 1936.

For previous introduction and description see 114587.

115976 to 115992.

From India. Seeds presented by G. Ghose & Co., Darjeeling. Received May 18, 1936.

115976. CORTIA HOOKERI C. B. Clarke.
Apiaceae.

A stemless herbaceous perennial with a rosette of three to four pinnate leaves, the ultimate segments linear and about one-fourth inch long. The white or purplish flowers are borne in sessile umbels which are up to 8 inches long and form a dense mass over the crown of the plant. It is native to the Sikkim region in India.

For previous introduction see 99729.

115977. CREPIS GLOMERATA (Decaisne)
Benth. and Hook. Cichoriaceae.

A herbaceous perennial up to 6 inches high, with variable foliage and many densely crowded heads of yellow flowers. Native to the Himalayas between 13,000 and 17,000 feet altitude.

For previous introduction see 111042.

115978. CYANANTHUS sp. Campanulaceae.

115979. GAULTHERIA TRICHOPHYLLA Royle.
Ericaceae.

A low evergreen shrub of densely tufted habit, 3 to 6 inches high, spreading by means of underground shoots; the slender wiry bristly stems are densely covered with small leaves. The narrow oblong, stalkless leaves, one-fourth inch long and about one-eighth inch wide, are smooth on both surfaces but bristly on the margins, glossy dark green above and pale beneath. The solitary bell-shaped pink flowers are borne in the leaf axils and are followed by blue-black fruits. Native to the Himalayas up to 13,000 feet altitude.

For previous introduction see 100551.

115980. GENTIANA ORNATA (G. Don) Wall.
Gentianaceae.

A perennial gentian with many short decumbent stems and solitary, terminal whitish or turquoise-blue flowers over an inch long. Native to the Himalayas at altitudes of 11,000 to 15,000 feet.

115981. GERANIUM NEPALENSE Sweet.
Geraniaceae.

A procumbent perennial about 6 inches high, with cordate deeply five-lobed leaves and bright-pink or red flowers. Native to Nepal.

115982. LILIUM NEPALENSE D. Don. Lilia-
ceae. Lily.

A showy lily, native to the central Himalayas, with a slender erect stem 2 to 3 feet long, leafy to the inflorescence. The glossy bright-green leaves, 4 to 6 inches long, are oblong-lanceolate and

115976 to 115992—Continued.

five-ribbed. The flowers, 4 to 5 inches long, are greenish yellow outside and yellow within, and flushed except in the upper third, with purplish black. The oblanceolate segments are reflexed only in the upper half. The purplish-black filaments bear yellow anthers nearly an inch long.

For previous introduction see 92408.

115983. LILIUM WALLICHIANUM Schult. f.
Liliaceae. Wallich lily.

A lily 4 to 6 feet high, with linear leaves 6 to 9 inches long and usually solitary, creamy, waxy-white, fragrant flowers 9 inches long which are golden yellow at the base inside and green outside.

For previous introduction see 112750.

115984. PRIMULA STUARTII Wall. Primula-
ceae. Primrose.

A mealy or quite glabrous perennial herb, native throughout the alpine and subalpine Himalayas of India and Tibet at altitudes between 12,000 and 16,000 feet. The coriaceous oblanceolate leaves with entire or crenulate margins are 4 to 10 inches long and the scapes, 12 to 18 inches high, bear loose umbels of light-yellow, drooping flowers.

For previous introduction see 102325.

115985. RHEUM NOBILE Hook. f. and
Thoms. Polygonaceae. Rhubarb.

A handsome herbaceous plant, with a stem 3 to 4 feet high and as thick as the wrist at the base. It is found in the inner ranges of the Sikkim Himalayas at altitudes between 13,000 and 15,000 feet. The root resembles that of the common rhubarb, but is spongy and inert. The acid stems are eaten both boiled and raw, and the dried leaves afford a substitute for tobacco.

For previous introduction see 39050.

115986. ROSA MACROPHYLLA Lindl. Rosa-
ceae. Bigleaf rose.

A large, nearly thornless shrub, native to the temperate Himalayas up to 10,000 feet altitude. The compound leaves have 9 to 11 oblong to ovate leaflets, 1 to 2 inches long, pubescent beneath, and the red flowers, 2 inches across, in clusters of one to three, are followed by oblong-ovoid red fruits which are sometimes 2 inches long.

For previous introduction see 102781.

115987. RUBUS ELLIPTICUS J. E. Smith.
Rosaceae. Yellow Himalayan raspberry.

For previous introduction and description see 115011.

115988. SAUSSUREA GOSSIPIPHORA D. Don.
Asteraceae.

A curious perennial over a foot high, found in the Himalayas in poor soil among limestone rocks between 14,000 and 15,000 feet altitude. The plant grows as a white woolly mass with linear-lanceolate basal leaves. The oblong, densely cottony, bluish flower heads are buried among cottony scales.

For previous introduction see 111081.

115989. SAXIFRAGA sp. Saxifragaceae.

Received under the name "latifolia," a name of uncertain status.

115976 to 115992—Continued.

115990. *SEDUM HIMALENSE* D. DON. Cras-sulaceae.

A Himalayan sedum with stems 4 to 14 inches high, loosely intricate, narrow obovate or lanceolate leaves, and leafy cymes of dark-purple flowers.

115991. *SENECIO RETUSUS* (DC.) Wall. Asteraceae. Groundsel.

A perennial herb 12 to 18 inches high and 8 inches across, native to the slopes of the Himalayas at Nepal and Sikkim at altitudes of 12,000 to 15,000 feet. The toothed leaves vary from reniform at the base to oblong-lanceolate at the top of the plant. The yellow flower heads, 1 to 2 inches across, are solitary or two to eight in a simple terminal raceme.

For previous introduction see 102329.

115992. *SPIRAEA BELLA* Sims. Rosaceae. Himalayan spirea.

A beautiful hardy shrub, native to Nepal, continuing in flower from May until the end of the summer. It may be increased by layers or seeds; it flourishes in fresh loamy soil. The lanceolate blue-green leaves and the full terminal clusters of rose-colored flowers make this a striking ornamental.

For previous introduction see 49658.

115993 to 116012. *NICOTIANA TABACUM* L. Solanaceae.

Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Numbered in May 1936.

Cultivated tobacco.

115993. No. 3429. *Numero 3*. Mexico City, August 13, 1935. Purchased in a seed store.

115994. No. 3430. *Virginia*. Mexico City, August 13, 1935. Purchased in a seed store, said to be locally grown from United States seed. May be mixed with other types.

115995. No. 3431. *Maryland*. Mexico City, August 13, 1935. Purchased in a seed store, said to be locally grown. May be mixed with other types.

115996. No. 3553. From Bobedas, half way between Aguascalientes and Pabellon, Aguascalientes, October 5, 1935. Collected from three plants in a field of apparently mixed types.

115997. No. 3558. Probably *Macuchi*. Torreon, Coahuila, October 11, 1935. Sample of seed left over from field planted near the edge of town; the common tobacco of this region.

115998 and 115999. October 1, 1935. From Tepic, Nayarit. Original seed said to have been obtained long ago and cultivated continuously, but not probably mixed with other types.

115998. No. 3575. *Jamaica*.

115999. No. 3576. *Bonanza*.

116000. No. 3577. From Raymundo, Durango, October 18, 1935. Seed from the first year's seed of a Turkish variety obtained in Syria.

116001. No. 3578. Said to be *Virginia*. From Aviles, Durango, October 18, 1936.

116002. No. 3579. *Lagunero*. From Aviles, Durango, October 18, 1935.

115993 to 116012—Continued.

116003. No. 3580. *Cordoba* type. From Coscomatepec, Veracruz, September 29, 1935. Received through the courtesy of the Aguila Cigarette Co.

Nos. 116004 to 116008 were collected in the State of Guerrero in September 1935.

116004. No. 3581. From San Miguel Totolapan.

116005. No. 3582. From Pungarabato.

116006. No. 3583. From Pungarabato.

116007. No. 3584. From Tepipac.

116008. No. 3585. From Tepipac.

116009. No. 3586. From Yurécara, September 2, 1935.

Nos. 116010 to 116012 were collected in the State of Michoacan in September 1935.

116010. No. 3587. From Huetamo de Nunez.

116011. No. 3588. From La Pied.

116012. No. 3589. From Tacambaro.

116013 to 116015.

From Argentina. Seeds presented by Silvio Spangenberg, Director Tecnico, Semillero El Milagro, Carreras, through Murray L. Brawner, Buenos Aires. Received May 26, 1936.

116013 and 116014. *LINUM USITATISSIMUM* L. Linaceae. Flax.

116013. No. 11 "*Capa*."

116014. 330 M. A.

116015. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

38 M. A. B. 04. 27.

116016 to 116087.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received May 18, 1936.

Unless otherwise stated all of this material was collected at Jaipur City from April 2 to 7, 1936.

116016. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. Okra.

No. 477. *Bendi*. Fruits 3 inches long.

116017. *BAUHINIA* sp. Caesalpiniaceae.

No. 496. Said to be a small tree with white flowers.

116018. *BAUHINIA* sp. Caesalpiniaceae.

No. 499. A tree said to have white flowers.

116019. *BAUHINIA* sp. Caesalpiniaceae.

No. 422. *Kachinas*. From Agra, United Provinces, March 29, 1936. A tree about 40 feet high, with fragrant purple flowers. The buds are eaten in Punjab and are somewhat like mushrooms in flavor.

116020. *BRASSICA OLERACEA BOTRYTIS* L. Brassicaceae. Cauliflower.

No. 460. *Phulgobi*. Said to be a very early variety which matures in 60 days. May be an imported variety.

116021. *BRASSICA RAPA* L. Brassicaceae. Turnip.

No. 469. *Lal Shalgum*. Said to be the common turnip of this area.

116016 to 116067—Continued.

116022. *CAESALPINIA* sp. *Caesalpinia*ceae.

No. 480. *Khair*. An attractive, medium-sized tree whose wood is used in dyeing and tanning. The gum also is used.

116023 to 116028. *CAPSICUM ANNUUM* L. *Solanaceae*. Common redpepper.

116023. No. 457. *Mirch*. Said to be 6 inches long and 1 inch in diameter, of medium pungency.

116024. No. 491. *Mirch*. A mild pepper, 3 inches long by three-fourths of an inch in diameter.

116025. No. 453. *Mirch*. Fruits to 3 inches long with indented nose, 1½ inches in diameter; mild but not without pungency.

116026. No. 494. *Patna mirch*. Said to be a hot pepper from Patna.

116027. No. 492. *Mirch*. A mild pepper with pods like No. 491 (P. I. 116024) but broader.

116028. No. 495. *Mirch*. Apparently the local pepper, but larger than any seen before. Blunt-nosed type, mild, 4 inches long by 2 inches across.

116029. *CASSIA FISTULA* L. *Caesalpinia*ceae. Golden-shower.

No. 500. For previous introduction see 114889.

116030. *CASSIA SIAMEA* Lam. *Caesalpinia*ceae. Siamese senna.

No. 485. A large tropical tree with bluish, pinnate leaves up to a foot long. In the late summer and early autumn this tree bears axillary and terminal panicles of attractive bright-yellow flowers. It is native to southern India and Malaysia.

For previous introduction see 61481.

116031. *CITRULLUS VULGARIS* Schrad. *Cucurbitaceae*. Watermelon.

No. 471. *Terbuza*. A mixture of red-fleshed variety and a yellow-fleshed variety.

116032. *CUCUMIS SATIVUS* L. *Cucurbitaceae*. Cucumber.

No. 458. *Kakri*. Fruits said to be 2 feet long and 4 inches in diameter; yellow when ripe and used both fresh and stewed.

116033. *CUCURBITA MOSCHATA* Duchesne. *Cucurbitaceae*. Cushaw.

No. 446. *Kaddu*. From Agra, United Provinces, March 31, 1936. Fruit faintly ribbed, orange-pink, flattened, 14 inches across and 9 inches long; flesh salmon colored.

116034. *CYAMOPSIS TETRAGONOLOB* (L.) Taub. *Fabaceae*. Guar.

No. 459. *Gouvar*. Green pods edible, dry pods not eaten.

116035. *DAUCUS CAROTA* L. *Apiaceae*. Carrot.

No. 463. *Kala gadjar*. Roots purple black outside with white or yellow flesh.

116036. *DOLICHOS LABLAB* L. *Fabaceae*. Hyacinth-bean.

No. 421. *Sem*. From Agra, United Provinces, March 29, 1936. A form with green pods which are used for food while young and tender.

116016 to 116067—Continued.

116037. *DOLICHOS LABLAB* L. *Fabaceae*. Hyacinth-bean.

No. 466. *Ballal*. A climbing bean. The pods are eaten green, but are much stronger in flavor than our string beans.

116038. *ERYTHRINA VARIEGATA* Stickm. *Fabaceae*. Coraltree.

No. 481. *Dhaldak*. A tree 20 to 30 feet high, native throughout India, with clusters of large bright-red flowers which appear before the leaves. The pods are 4 to 8 inches long and contain dark carmine seeds.

For previous introduction see 106924.

116039. *HOLOPTELEA INTEGRIFOLIA* (Roxb.) Planch. *Ulmaceae*.

No. 483. A large spreading tree, closely related to the elms, which grows in dry sandy soils at low altitudes in northern and central India. Its chief use appears to be as a timber tree; the wood is yellowish gray and moderately hard and is used for general construction.

For previous introduction see 59680.

116040 and 116041. *HORDEUM VULGARE* L. *Poaceae*. Barley.

Jav. From Agra, United Provinces, March 29, 1936. Collected near the southern limit of the crop.

116040. No. 444. 116041. No. 449.

116042. *IPOMOEA CAIRICA* (L.) Sweet. *Convolvulaceae*. Morning-glory.

No. 461. Flowers large, dark-blue, produced abundantly.

For previous introduction see 60552.

116043. *JACARANDA MIMOSIFOLIA* Don. *Bignoniaceae*. Green-ebony.

No. 451. A tree up to 50 feet high, with very attractive blue-purple flowers, borne in large racemes before the leaves.

For previous introduction see 30387.

116044 and 116045. *LAGENARIA LEUCANTHA* (Duchesne) Kusby. *Cucurbitaceae*. Calabash gourd.

116044. No. 473. *Ghiya*. Fruits said to be larger than No. 464 (P. I. 116045), and the vine does well only when allowed to climb.

116045. No. 464. *Ghiya*. Said to grow 3 feet, bottle-shaped. Adapted to terrestrial training.

116046. *LUFFA ACUTANGULA* (L.) Roxb. *Cucurbitaceae*. Singkwa towelgourd.

No. 470. *Tori*. Fruits ridged and winged; eaten green.

For previous introduction and description see 115497.

116047. *LYCOPERSICON ESCULENTUM* Mill. *Solanaceae*. Tomato.

No. 467. *Termattes*. Small elliptical flattened fruits, not like the ordinary "wild fruits." Said to bear all summer.

116048. *MALVA SYLVESTRIS* L. *Malvaceae*. No. 501.

116049. *MILLETTIA OVALIFOLIA* Kurz. *Fabaceae*.

No. 419. From Agra, United Provinces, March 29, 1936. A medium-sized tree

116016 to 116067—Continued.

with odd-pinnate leaves 4 to 18 inches long and slender axillary racemes of small fragrant blue flowers.

116050 and 116051. *MIMUSOPS ELENGI* L. Sapotaceae.

A small handsome evergreen tree, native to India, with dark-green shining leaves and an abundance of long acorn-shaped fruits that turn red when ripe.

For previous introduction see 67580.

116050. No. 497. *Maulsari*.

116051. No. 452. *Bontseli*.

116052. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 456. *Karela*.

For previous introduction and description see 115952.

116053. *MORINGA OLEIFERA* Lam. Moringaceae. Horseradish-tree.

No. 479.

For previous introduction and description see 115483.

116054. *MORUS* sp. Moraceae.

No. 503. *Safed shahtut*. Fruits yellow, to 2 inches long, peach scented, very sweet, and of good flavor.

116055. *MORUS* sp. Moraceae.

No. 502. *Kala Shahtut*. Fruit purple red to 1½ inches long, of a pleasant acid flavor.

116056. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 475. *Matar*. A mixture of two native forms (red and white flowers).

116057. *PROSOPIS CHILENSIS* (Molina) Stuntz. Mimosaceae. Algaroba.

No. 546. *Babul*. From Bikaner, Bikaner State, April 13, 1936. A large tree of attractive habit and foliage.

116058. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 465. *Arak mali*. Seed pods and leaves used as a potherb. Roots of no use.

116059. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 476. *Muli*. Root solid, long, white, usually stewed; plants are vigorous.

116060. *SANTALUM ALBUM* L. Santalaceae. Sandalwood.

No. 490. A small evergreen semiparasitic tree, native to the drier regions of southern India, and cultivated in northern India for the sake of the white or citron-colored wood which, when dried, is sweet scented and esteemed as a perfume. The acacia is a frequent host of this tree.

For previous introduction see 66153.

116061 to 116064. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

116061. No. 424. From Agra, United Provinces, March 29, 1936. Fruits ovoid, 5 inches long and deep purple. The plants are strong and very prolific.

116062. No. 462. *Gol bengani*. Fruit said to be globose, black-purple, up to 5 inches in diameter.

116016 to 116067—Continued.

116063. No. 472. *Rutlami bengani*. Fruit said to be globose, purple-black, up to 6 inches in diameter.

116064. No. 474. *Bengani*. Fruits black-purple, elongate, and said to grow 12 inches long.

116065. *TERMINALIA ARJUNA* (Roxb.) Wight and Arn. Combretaceae.

No. 487. *Ayum*. An attractive evergreen with the habit of the American elm.

116066. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

No. 445. *Gehun*. From Agra, United Provinces, March 31, 1936. From the market; said to have come from the Punjab.

116067. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.

No. 468. *Chaonli*. Pods said to be about 4 inches long. Both green pods and the dry seeds are eaten.

116068. *RICINUS COMMUNIS* L. Euphorbiaceae. Castor-bean.

From Cuba. Seeds presented by A. Martinez, Havana. Received May 1, 1936.

116069. *DIGITALIS FERRUGINEA* L. Scrophulariaceae.

From the Union of Soviet Socialist Republics. Seeds presented by the Introduction Garden, Sukhum, Transcaucasus, through the Institution of Plant Industry, Leningrad. Received May 11, 1936.

A biennial or perennial, 5 to 6 feet high, densely leafy, with long dense racemes of rusty-red flowers. Native to southern Europe.

For previous introduction see 109284.

116070 to 116077. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Costa Rica. Seeds presented by C. H. Ballou, at the request of W. A. Archer, Bureau of Plant Industry. Received June 3, 1936.

116070. *Cien hojas*.

116071. *Copan*.

116072. *Desconocido*.

116073. *Desgajador*.

116074. *Palmira blanco*.

116075. *Palmira negro*.

116076. *Palmiron*.

116077. *Vuelta abajo*.

116078 to 116085. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Honduras. Seeds presented by Antonio Fernandez, Santa Rose de Copan, through the American consul at Tegucigalpa, at the request of W. A. Archer, Bureau of Plant Industry. Received June 6, 1936.

116078. *Chichicaste*, a pure strain.

116079. *Copanico flor blanco*, a pure strain.

116080. *Copanico flor roja*, a pure strain.

116081. *Gigante*, a pure strain.

116078 to 116085—Continued.

116082. *Negro*, a pure strain.
 116083. *Pina*, a pure strain.
 116084. Collected at Santa Rita.
 116085. Collected at San Nicolas.

116086. *SACCHARUM* sp. Poaceae.

From Papete, New Hebrides Islands. Rooted cuttings. Received June 8, 1936.

Received under the name "robustum," a name not properly published.

116087. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Honduras. Seeds presented by Ricardo Aparicio, Tuxtepec, Oaxaca, Mexico, through the American consul at Tegucigalpa, at the request of W. A. Archer, Bureau of Plant Industry. Received June 9, 1936.

Chichicaste (Honduras); *Burro* (Cuba).

116088. *MANGIFERA INDICA* L. Anacardiaceae. Mango.

From the Canal Zone. Plants presented by J. E. Higgins, Canal Zone Experiment Gardens, Balboa Heights. Received June 10, 1936.

Fairchild mango.

116089. *CHIMONOBAMBUSA MARMOREA* (Mitf.) Makino. (*Arundinaria marmorata* (Mitf.) Makino). Poaceae. Bamboo.

From England. Plant presented by the Royal Botanic Gardens, Kew, Surrey. Received June 9, 1936.

A small bamboo growing 3 feet or more high. The internodes of the culms are very short with three branches at each node, two short and one long. The bright-green, nearly sessile leaves are up to 4½ inches long by three-eighths to five-eighths of an inch wide, rough on both edges, and with tessellated venations. The degree of hardness of the plant is not definitely known, though it is reported to have withstood a temperature of about 8° F. without injury in England.

For previous introduction see 90301.

116090 to 116098. *BETA* spp. Chenopodiaceae.

From the Union of Soviet Socialist Republics. Seeds presented by the Institute of Plant Industry, Leningrad. Received June 17, 1936.

116090 and 116091. *BETA LOMATOGONA* Fisch. and Mey.

116090. No. 1. From Armenia.

116091. No. 2. From Azerbaijan.

116092 and 116093. *BETA MACRORHIZA* Stev.

A perennial, native to the Caucasus region.

116092. No. 6. Near Yak, Azerbaijan.

116093. No. 7. Near Kriz, Azerbaijan.

116094 to 116096. *BETA TRIGYNA* Waldst. and Kit.

For previous introduction see 114606.

116094. No. 4. From District Ketaulu, Arger, Armenia.

116090 to 116098—Continued.

116095. No. 3. From District Elenoone, Armenia.

116096. No. 5. From Crimea.

116097 and 116098. *BETA VULGARIS* L. Common beet.

116097. No. 9. From Azerbaijan.

116098. No. 8. From Azerbaijan.

116099 to 116114.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 19, 1936.

Unless otherwise stated, all of this material was collected April 11 and 12, 1936, at Bikaner, Bikaner State.

116099. *TERMINALIA BELLERICA* (Gaertn.) Roxb. Combretaceae.

No. 486. From Jaipur City, April 7, 1936. The small round fruits of this tropical Indian tree are exported for tanning purposes under the name *myrobalans*. The yellowish-gray wood is used for general construction, and the tree also has merit as a shade tree for avenues, with its huge buttressed trunk and low horizontal branches.

For previous introduction see 97985.

116100. *ALLIUM CEPA* L. Liliaceae. Onion.

No. 516. *Peyaz*. Said to be a round red onion.

116101. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

No. 513.

116102. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

No. 514. Fruit is dried; later the seeds are crushed and cooked with vegetables.

116103. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.

No. 515. *Kakri*. A mixed sample.

116104. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cuslaw.

No. 447. *Kaddu*. From Jaipur City, Jaipur State, April 1, 1936. Fruit prominently ribbed, 2 feet long, pointed at the blossom end, mottled pink, brown, and dark green; flesh salmon.

116105. *CYAMOPSIS TETRAGONOLOBA* (L.) Taub. Fabaceae. Guar.

No. 521. *Gowas*. Used as food while green, but the ripe seeds are used as cattle feed.

116106. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 517. *Lal gajar*. Said to be a red-fleshed form.

116107. *HORDEUM VULGARE* L. Poaceae. Barley.

No. 450. *Jau*. From Jaipur City, April 2, 1936.

116108. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae. Suakwa towelgourd.

No. 530. Fruit 18 inches long, smooth, with no trace of ribs.

116109. *Pennisetum glaucum* (L.) R. Br. Poaceae. Pearl millet.

No. 523. *Bajei*. Used for bread; also cooked to a paste and squeezed through

116099 to 116114—Continued.

a strainer; the fine vermicellilike strings are cooked in oil.

116110. *PHASEOLUS ACONITIFOLIUS* Jacq. Fabaceae. Moth bean.

No. 518. A dry-land crop.

116111. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 519. *Muli*. A long white root, grown under irrigation.

116112. *RUMEX VESICARIUS* L. Polygonaceae.

No. 510. *Chuka*. From Jaipur City, Jaipur State, April 10, 1936. A potherb, widely cultivated in India.

116113. *SESAMUM ORIENTALE* L. Pedaliaceae. Sesame.

No. 522. *Til*. An oil crop, valued as butter, also used for the making of sweets.

116114. *ZIZIPHUS MAURITIANA* Lam. Rhamnaceae. Indian jujube.

No. 524. *Bhor*. Dried fruits sold in the bazar.

For previous introduction see 115525.

116115 to 116157.

From China. Seeds and bulbs presented by the Botanic Garden Division of the Sun Yat-Sen Tomb and Memorial Park Commission, Nanking. Received May 12, 1936.

Unless otherwise stated, the material presented was seeds.

116115. *ALLIUM MACROSTEMON* Bunge. Liliaceae.

No. 24. Bulbets of an allium with linear leaves and lax umbels of three to many small rose-colored flowers. Native to northern China.

116116. *ACTINIDIA CORIACEA* (Fin. and Gagn.) Dunn. Dilleniaceae.

No. 12.

116117. *BETA VULGARIS* L. Chenopodiaceae. Common beet.

No. 85.

116118. *BRASSICA OLERACEA* L. Brassicaceae. Wild cabbage.

No. 93. For previous introduction see 65590.

116119. *CARPINUS LAXIFLORA* Blume. Betulaceae. Hornbeam.

No. 136. A tree native to Japan, 40 to 50 feet high. The obliquely elliptic to cordate, long-pointed leaves are 2 to 3 inches long and have serrate margins. The inconspicuous flowers are borne in loose catkins 2 to 3 inches long.

For previous introduction see 98310.

116120. *CARPINUS TURCZANINOVII* Hance. Betulaceae. Hornbeam.

No. 137. A hardy shrubby tree with oval, sharp-pointed leaves 1 to 2 inches long. It is said to resemble *Carpinus polynœura*, also a Chinese species. Native to Hopei Province, China.

For previous introduction see 93113.

116121 to 116123. *CASTANOPSIS* spp. Fagaceae.

116121. *CASTANOPSIS CUSPIDATA* (Thunb.) Schottky.

No. 150.

116115 to 116157—Continued.

116122. *CASTANOPSIS EYREI* (Champ.) Tutch.

No. 151. An evergreen tree about 30 feet high. Native to southern China.

116123. *CASTANOPSIS SCLEROPHYLLA* (Lindl.) Schottky.

No. 152.

116124. *CELASTRUS GEMMATA* Loes. Celastraceae.

No. 158. A woody climber up to 18 feet long, with ovate-elliptic leaves 2 to 4 inches long and cymes of large golden-yellow fruits. Native to central and western China.

116125. *CELTIS BIONDII* Pampan. Ulmaceae. Hackberry.

No. 161. A stout-branched hackberry from western China, with rather stiff, broadly ovate, long-acuminate leaves 2 to 3 inches long and small black fruits.

For previous introduction see 105313.

116126. *CELTIS BUNGEANA* Blume. Ulmaceae. Hackberry.

No. 162.

116127. *COIX LACRYMA-JOBI* L. Poaceae. Jobs-tears.

No. 203.

116128. *CORNUS WALTERI* Wangerin. Cornaceae. Dogwood.

No. 220. A tree 40 feet high, with white flowers and blue-black fruits, growing in woodlands at 900 to 2,000 feet altitude in western Hupeh, China.

For previous introduction see 65767.

116129. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 246.

116130 to 116133. *LACTUCA* spp. Cichoriaceae. Lettuce.

116130. *LACTUCA CHINENSIS* (Thunb.) Makino.

No. 389. An ornamental lettuce with entire to pinnatisect, linear or sublinear leaves and lax corymbs of yellow or white flower heads. Native to Japan.

116131. *LACTUCA INDICA* L.

No. 390. A tall erect annual native to Japan.

116132. *LACTUCA SATIVA* L. Garden lettuce.

No. 391.

116133. *LACTUCA CHINENSIS* (Thunb.) Makino.

No. 392. For previous introduction and description see 116130.

116134 to 116139. *LESPEDEZA* spp. Fabaceae. Bushlover.

116134. *LESPEDEZA BUERGERI* Miquel.

No. 397. A low, bushy, hardy perennial with elliptic-ovate leaflets and white or purple flowers about one-third inch long. It is of ornamental value and is also used as fodder.

For previous introduction see 9230.

116135. *LESPEDEZA DAVIDI* Franch.

No. 398. A shrub about 6 feet high, with ovate or obovate leathery leaflets

116115 to 116157—Continued.

and many reddish-purple flowers in axillary or terminal racemes. Native to Kiangsi Province, China.

116136. *LESPEDEZA FLORIBUNDA* Bunge.

No. 399.

116137. *LESPEDEZA FORMOSA* (Vogel) Koehne. Purple bushclover.

No. 400. An erect, semishrubby plant 6 to 12 feet high, with trifoliolate leaves of oblong leaflets and racemes of rose-purple flowers. Native to Chosen.

For previous introduction see 111205.

116138. *LESPEDEZA STRIATA* (Thunb.) Hook. and Arn.

No. 402.

116139. *LESPEDEZA TOMENTOSA* (Thunb.) Sieb.

No. 403.

116140. *LITHOCARPUS GLABRA* (Thunb.) Rehd. Fagaceae.

No. 424. An evergreen tree with oblong, entire leaves 3 to 6 inches long and small nuts in spikes. Native to Japan.

116141 to 116146. *NICOTIANA* spp. Solanaceae. Tobacco.116141. *NICOTIANA ACUTIFLORA* A. St. Hil.

No. 490. A herbaceous perennial tobacco related to *Nicotiana longiflora*. Native to southern South America.

116142. *NICOTIANA ALATA GRANDIFLORA* Comes.

No. 491.

116143. *NICOTIANA RUSTICA* L. Aztec tobacco.

No. 493.

116144. *NICOTIANA TABACUM* L. Common tobacco.

No. 494.

116145. *NICOTIANA TABACUM MACROPHYLLA* Dunal.

No. 492.

116146. *NICOTIANA TABACUM MACROPHYLLA* Dunal.

No. 495.

116147. *POA ACROLEUCA* Steud. Poaceae.

No. 560. An annual grass, native to Japan.

116148. *QUERCUS FABRI* Hance. Fagaceae.

No. 603. A small evergreen oak of the *Prinus* section, up to 45 feet high, with obovate to oblong leaves to 7 inches long, sinuate and shallow lobed. Native to China.

116149 to 116151. *RUBUS* spp. Rosaceae.16149. *RUBUS BUERGERI* Miquel.

No. 633.

116150. *RUBUS LAMBERTIANUS* Seringe.

No. 634.

116151. *RUBUS TEPHRODES* Hance.

No. 637. A straggling shrub with branches about 15 feet long, terminal clusters of small pink flowers, and

116115 to 116157—Continued.

rather large black fruits. Closely related to *Rubus chroosepalus*. Native to Kiangsi Province, China.

For previous introduction see 113821.

116152 to 116155. *SOLANUM* spp. Solanaceae.116152. *SOLANUM ACULEATISSIMUM* Jacq.

No. 691. A spiny undershrub, 1 to 2 feet high, widely distributed in the Tropics. The few-flowered axillary cymes of snow-white flowers 1 inch across are followed by globose orange or yellow fruits often 2 inches in diameter.

For previous introduction see 46028.

116153. *SOLANUM AETHIOPICUM* L.

No. 692. A vigorous ornamental plant with white flowers and small fruits which resemble tomatoes in shape.

For previous introduction see 91546.

116154. *SOLANUM DULCAMARA* L.

No. 693.

116155. *SOLANUM NIGRUM* L. Black nightshade.

No. 694.

116156. *STYRAX FABERI* Perkins. Styracaceae.

No. 721. A shrub or tree with membranous, obovate to oblong leaves about 2 to 3 inches long and numerous showy yellowish flowers in axillary or terminal clusters. Native to eastern China.

116157. *STYRAX PHILADELPHOIDES* Perkins.

No. 722. A large shrub 5 to 6 feet high, with thin narrowly oblong, hairy leaves 1 to 3 inches long and white flowers half an inch long, in small axillary and terminal racemes. Native to eastern China.

For previous introduction see 105329.

116158 to 116180. *NICOTIANA* spp. Solanaceae. Tobacco.

From Peru and Ecuador. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received June 4, 1936.

Unless otherwise stated, all of this material was collected in Peru.

116158. *NICOTIANA GLAUCA* R. Grab. Tree tobacco.

No. 112. *Supai-cearcco*. Collected at San Sebastian, 5 kilometers south of Cuzco, 3,300 meters altitude, April 20, 1936.

116159 to 116164. *NICOTIANA TABACUM* L. Common tobacco.

116159. No. 114. April 21, 1936. A white-flowered form from Macchu-Picchu at 2,100 meters altitude.

116160. No. 115. April 21, 1936. A red-flowered form from Macchu-Picchu at 2,100 meters altitude.

116161. No. 116. April 23, 1936. A red-flowered form from Santa Rosa, Cuzco, at 1,150 meters altitude.

116162. No. 117. April 23, 1936. A white-flowered form from Santa Rosa, Cuzco, at 1,150 meters altitude.

116163. No. 119. April 24, 1936. A red-flowered form from Hacienda Santa Ana, Quillabamba, at 1,025 meters altitude.

116158 to 116180—Continued.

116164. No. 121. April 23, 1936. *Tabaco*, a red-flowered form from Santa Rosa, Cuzco, at 1,150 meters altitude.

116165. *NICOTIANA PANICULATA* L.

No. 122. *Ccamato*. April 25, 1936. From Ollantaytambo, Cuzco, at 2,800 meters altitude. A form with long yellowish flowers.

116166. *NICOTIANA PANICULATA* L.

No. 124. *Ccamato*. April 27, 1936. Collected in the Urubamba Valley between Ollantaytambo and Urubamba at 2,700 meters altitude.

116167 to 116174. *NICOTIANA TABACUM* L.
Common tobacco.

116167. No. 126. April 27, 1936. A pink-flowered form from Urubamba, Yucay Province, at 2,800 meters altitude.

116168. No. 127. April 27, 1936. A pink-flowered form from Coyo, Urubamba, at 2,900 meters altitude.

116169. No. 128. May 1, 1936. From Juliaca, Departamento Puno, at 3,825 meters altitude.

116170. No. 129. May 5, 1936. From Hacienda La Mascota, Provincia Pastaza, Ecuador, at 1,150 meters altitude.

116171. No. 130. May 8, 1936. From the Estanco de Tabaco, Lima.

116172. No. 131. May 8, 1936. From the Estanco de Tabaco, Lima. A white-flowered form.

116173. No. 132. *Ccamato*. April 23, 1936. From Santa Rosa, Cuzco, at 1,150 meters altitude.

116174. No. 133. May 9, 1936. From the Bravo Natural History Museum, Lima.

116175 and 116176. *NICOTIANA LEGUIANA* Macbr.

A tobacco closely related to *Nicotiana tomentosa*; native to Peru and Bolivia.

116175. No. 118. *Ccamato*. From Macchu-Picchu, Cuzco, April 22, 1936, at 2,100 meters altitude.

116176. No. 120. *Ccamato*. From Santa Rosa, Cuzco, April 23, 1936, at 1,150 meters altitude.

116177. *NICOTIANA UNDULATA* Ruiz and Pav.

No. 123. April 25, 1936. From Ollantaytambo, Cuzco, at 2,800 meters altitude.

116178. *NICOTIANA UNDULATA* Ruiz and Pav.

No. 125. April 27, 1936. From Coyo, Urubamba, at 2,900 meters altitude.

116179. *NICOTIANA* sp.

No. 113. *Ccama-sayri*. From San Sebastian, 5 kilometers south of Cuzco, at 3,300 meters altitude, April 20, 1936.

116180. *NICOTIANA PANICULATA* L.

No. 111. *Tabaquillo*. From Huasacache, near Arequipa, at 2,300 meters altitude, April 16, 1936.

116181 to 116183. *NICOTIANA TABACUM* L. Solanaceae.

Common tobacco.

From Mexico. Seeds presented through E. W. Eaton, American consul, Durango. Received June 12, 1936.

116181. From San Juan del Rio.

116182. From Santiago Papasquiaro. A tobacco which produces well at 5,600 feet altitude.

116183. From Yerbanis, Durango.

116184 to 116207.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanic Garden, Alma-Ata. Received May 27, 1936.

116184 to 116190. *AGROPYRON* spp. Poaceae.

116184. *AGROPYRON CANINUM* (L.) Beauv. Awned wheatgrass.

For previous introduction see 107869.

116185. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.

116186. *AGROPYRON DESERTORUM* (Fisch.) Schult.

For previous introduction see 111481.

116187. *AGROPYRON PAUCIFLORUM* (Schwein.) Hitchc.

116188. *AGROPYRON RAMOSUM* (Trin.) Richt.

For previous introduction see 108425.

116189. *AGROPYRON REPENS* (L.) Beauv. Quackgrass.

116190. *AGROPYRON SIBIRICUM* (Willd.) Beauv.

116191. *BERBERIS ILIENSIS* M. Pop. Berberidaceae.

A deciduous shrub with oblong or lanceolate leaves. It is closely related to *Berberis nummularia*. Native to Turkistan.

116192. *BETULA TIANSHANICA* Rupr. Betulaceae.

A small tree with ovate or narrow-ovate leaves about 2 inches long. It is allied to *Betula alba*. Native to Turkistan.

116193. *BETULA PENDULA* Roth. Betulaceae.

A form with purple leaves.

For previous introduction see 91460.

116194. *DELPHINIUM DASYANTHUM* Kar. and Kir. Ranunculaceae. Larkspur.

A perennial delphinium with simple stems 1 to 2 feet high and terminal clusters of deep-violet flowers. Native to Turkistan.

116195 to 116197. *EREMURUS* spp. Liliaceae.

116195. *EREMURUS ALTAICUS* (Pall.) Stev.

An ornamental desert plant with long linear leaves forming a rosette from which rises a columnar spike of star-shaped, rosy-purple flowers.

For previous introduction see 107913.

116184 to 116207—Continued.

116196. EREMURUS INDERIENSIS Regel.

A hardy herbaceous perennial with a rosette of narrow-linear leaves and a raceme of purplish flowers on a scape up to 18 inches high. Native to Turkistan.

For previous introduction see 107526.

116197. EREMURUS OLGÆ Regel.

For previous introduction and description see 115072.

116198. PISUM SATIVUM L. Fabaceae. Pea.

Variety *Asiaticum*.

116199 to 116202. RHEUM spp. Polygonaceae. Rhubarb.

116199. RHEUM RIBES L.

116200. RHEUM SONGARICUM Schrenk.

116201. RHEUM WITTRICKII Lunstroem.

116202. RHEUM sp.

116203 to 116206. ROSA spp. Rosaceae. Rose.

116203. ROSA PERSICA Michx. Persian rose.

A low straggling shrub 1 to 3 feet high, with simple oval to oblong, glaucous leaves and small yellow flowers. It is native to dry clayey ridges and alkaline loess plains from northern Iran [Persia] to Siberia.

For previous introduction see 31695.

116204. ROSA SPINOSISSIMA L. Scotch rose.

116205. ROSA BEGGERIANA Schrenk.

A dense prickly shrub 4 to 8 feet high, with oval or elliptic, bluish or grayish-green leaflets. The flowers in small or large corymbs are white or rarely pink and about 1 inch across, and the fruits are very dark red. Native to northern Iran and Turkistan.

For previous introduction see 91997.

116206. ROSA sp.

116207. STIPA KIRGHISORUM P. Smirn. Poaceae. Grass.

A perennial grass up to 2 feet high. Native to Turkistan.

116208. ARCHONTOPHOENIX ALEXANDRAE (F. Muell.) Wendl. and Drude. Phoenicaceae. Palm.

From the United States Plant Introduction Garden, Coconut Grove, Fla. Plants growing at the garden from seeds collected on the southwest coast of Florida in 1932 by O. F. Cook, Bureau of Plant Industry. Numbered in 1936.

A pinnate-leaved palm 70 to 80 feet high, with leaves several feet long, and lanceolate, usually entire leaflets up to 2 feet in length and whitish beneath. The yellow-green flowers are borne in a cluster about a foot long and are followed by small dry round fruits. It is native to Queensland, Australia.

For previous introduction see 111941.

116209 and 116210. COCOS NUCIFERA L. Phoenicaceae. Coconut.

From the Canal Zone. Seeds presented by J. E. Higgins, Superintendent, Canal Zone Experiment Gardens, Summit. Received June 10, 1926.

116209. Variety *King*.116210. Variety *Nawasi*.

116211. ERYTHRINA ACANTHOCARPA, E. Mey. Fabaceae.

From South Australia. Seeds presented by J. Howard Johnson, St. Peters. Received June 12, 1936.

A rigid, wide-spreading shrub, native to South Africa, 4 to 6 feet high and armed with sharp awl-shaped reflexed prickles. The leaves are made up of three elliptical leaflets an inch long. The scarlet flowers, 1 to 2 inches long, are in lateral and terminal racemes and last from 2 to 3 weeks, before the leaves have fully developed. The flowers are followed by twisted prickly pods up to 7 inches long.

For previous introduction see 80251.

116212. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received May 22, 1936.

Variety *Wannon*.

116213 to 116215. SOJA MAX (L.) Piper. Fabaceae. Soybean.

From India. Seeds presented by the Economic Botanist, Department of Agriculture, Jorhat, Assam. Received May 22, 1936.

116213. *Khasi Rymbailieh*.116214. *Khasi Rymbai Thohriaw*.116215. *Nepali*, a large variety.

116216 to 116220.

From Morocco. Seeds presented by the Director, Station Centrale de Recherches Agronomiques, Rabat. Received May 26, 1936.

116216. ABELMOSCHUS ESCULENTUS (L.) Moench. Malvaceae. Okra.

116217. BRASSICA RAPA L. Brassicaceae. Turnip.

116218. DAUCUS CAROTA L. Apiaceae. Carrot.

116219. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

116220. RAPHANUS SATIVUS L. Brassicaceae. Radish.

116221 to 116236. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received May 23, 1936.

116221. *Argentine*. C. 8681.116222. *Argentine* K 33. C. 9655.

 116235. *Uruguay*. C. 10834.
 116236. *Varonne*. C. 6146.

116237 to 116241.

From Mexico. Bulbs and plants purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Veracruz. Received June 13, 1936.

116237. *CHAMAEDOREA SARTORII* Liebm.
 Phoenicaceae.

A palm, native to southern Mexico, with a trunk 8 to 15 feet high, covered with the bases of the leaf petioles. The pinnately compound leaves, 3 to 4 feet long, are made up of alternate falcate pinnae 12 inches long, and the ovoid black fruits are less than an inch long.

For previous introduction see 101700.

- 116238 to 116241. *ZEPHYRANTHES* spp.
 Amaryllidaceae.

Bulbs collected on the higher sierras and from the lower plains near Zacuapam.

116238. *ZEPHYRANTHES* sp.
 116239. *ZEPHYRANTHES* sp.
 116240. *ZEPHYRANTHES* sp.
 116241. *ZEPHYRANTHES* sp.

116242 and 116243.

From Ecuador. Seeds presented by the Dirección de Agricultura del Litoral, Guayaquil, through the American consulate general, Guayaquil, at the request of Raymond Stadelman, Bureau of Plant Industry. Received June 6, 1936.

116242. *DUCHESNEA INDICA* (Andrews)
 Focke. Rosaceae.

For previous introduction see 58891.

116243. *RUBUS* sp. Rosaceae.

116244 to 116247.

From Peru and Ecuador. Seeds collected by Raymond Stadelman. Bureau of Plant Industry. Received June 4, 1936.

116244. *CARICA CANDICANS* A. Gray. Papayaceae.

From Matucana, Lima, Peru, at 4,700 feet altitude. A wild relative of the papaya (*Carica papaya*), which is native to the mountainous region of Peru between Lima and Obrajilla, at about 7,000 feet altitude. It is a small tree 6 to 10 feet high, with a few stout branches and a fruit said to be shaped like a cacao pod.

For previous introduction see 58627.

116244 to 116247—Continued.

116245. *TEPHROSIA TOXICARIA* (Sw.) Pers.
 Fabaceae.

Collected April 23, 1936, at Santa Rosa, Cuzco, Peru, at 3,800 feet altitude.

For previous introduction see 114081.

116246. *DATURA STRAMONIUM* L. Solanaceae.

Adormidera. From Santa Rosa, Cuzco, Peru, April 23, 1936, at 3,800 feet altitude.

116247. *LANTANA CAMARA* L. Verbenaceae.
 Common *lantana*.

From San Mateo, Province Esmeraldas, Ecuador, March 24, 1936. Fruit used medicinally.

For previous introduction and description see 114962.

116248 to 116254. *AGROPYRON* spp.
 Poaceae. Grass.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. N. I. Vavilov, Director, Institute of Plant Industry, Leningrad. Received June 6, 1936.

- 116248 to 116250. *AGROPYRON DESERTORUM* (Fisch.) Schult.

 116284. No. K. 2852.
 116285. No. K. 3001.

116286. PIPTADENIA sp. Mimosaceae.

From Nigeria. Seeds presented by the Conservator of Forests, through the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, Cuba. Received June 2, 1936.

Received as *Piptadenia africana*, but the seeds do not agree with that species.

116287 to 116296. AEGILOPS spp. Poaceae.

From Germany. Seeds presented by Dr. Elizabeth Schieman through the Kaiser Wilhelm Institut, Möncheberg. Received June 8, 1936.

116287. AEGILOPS BIUNCIALIS Visiani.

An annual grass, native to the Mediterranean region.

116288. AEGILOPS CAUDATA L.

An annual grass, native to Crete.

116289. AEGILOPS COLUMNARIS Zhuk.

An annual grass, native to Asia Minor.

116290. AEGILOPS COMOSA Sibth. and Smith.

An annual grass, native to Greece and Asia Minor.

116291. AEGILOPS LIGUSTICA (Bertol.) Coss.

An annual grass, native to Europe.

116292. AEGILOPS SHARONENSIS Eig.

An annual grass, native to Palestine.

116293. AEGILOPS SPELTOIDES Tausch.

An annual grass of garden origin.

116294. AEGILOPS UMBELLULATA Zhuk.

An annual grass, native to Asia Minor.

116295. AEGILOPS UNIARISTATA Visiani.

An annual grass, native to the Mediterranean region.

116296. AEGILOPS VARIABILIS Eig.

A bushy annual grass, native to the eastern Mediterranean region.

116297 to 116331. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received June 5, 1936.

116453 to 116554.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 2, 1936.

Unless otherwise stated, all of this material was collected at Saharanpur, United Provinces, April 16 to 19, 1936.

- 116453 and 116454. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. **Okra.**
Bhendi.
 116453. No. 628. A native, long green variety.
 116454. No. 639. A native, dwarf white variety.
 116455. *ACACIA MODESTA* Wall. Mimosaceae.
 No. 583. Presented by the Saharanpur Gardens.
 116456. *ALBIZZIA PROCERA* (Roxb.) Benth. Mimosaceae.
 No. 560. From the Saharanpur Gardens. A tall handsome tree with large compound leaves and terminal panicles of yellow-white flowers. Native to eastern and southern India.
 For previous introduction see 99690.
 116457 and 116458. *ALLIUM CEPA* L. Liliaceae. **Onion.**
 116457. No. 611. *Safed pujaz*. A white onion.
 116458. No. 612. *Lal pujaz*. A red onion.

116453 to 116554—Continued.

116459. *ALSTONIA SCHOLARIS* (L.) R. Br. Apocynaceae.

No. 592. Presented by the Saharanpur Gardens. A tropical Indian tree 40 to 90 feet high with whorls of four to seven obovate evergreen leaves 8 inches long and cymes of greenish-white flowers. The bitter milky sap yields an inferior quality of gutta-percha, and an extract of the bark is used like quinine.

For previous introduction see 77642.

116460 to 116465. *BRASSICA OLERACEA* BORYTIS L. Brassicaceae. **Cauliflower.**

Phulgobi A collection of native varieties of cauliflower.

116460. No. 636. A large winter-growing form.

116461. No. 637. A good winter-grown form.

116462. No. 638. A good winter-grown form that originated here as *L. R. Brothers Selected*.

116463. No. 639. A good winter-grown sort, supposed to be different from 636 [116460].

116464. No. 640. An early Patna form, sown here in June.

116465. No. 641. A quick-growing form, sown here in May.

116466 to 116468. *BRASSICA RAPA* L. Brassicaceae. **Turnip.**

Sheigam. Native varieties of turnip, sown in winter.

116466. No. 633. A variety with purple top.

116467. No. 634. An early, large white turnip.

116468. No. 635. An early white variety.

116469. *CANAVALIA ENSIFORMIS* (L.) DC. Fabaceae. **Jackbean.**

No. 618. *Sem.* A strong perennial climber; the green beans are said to be of good quality.

116470 to 116473. *CAPSICUM ANNUUM* L. Solanaceae. **Common redpepper.**

Mirch. From the market.

116470. No. 604. Said to be from Lahore. A medium-strong pepper 1 foot long, tapering gradually to a blunt tip three-eighths of an inch wide.

116471. No. 605. A medium-strong yellow pepper 4 inches long and one-fourth of an inch wide when dry; locally grown.

116472. No. 642. Supposed to be the Khalsi Mirch, an extremely pungent variety, much more expensive than any locally grown sorts. Khalsi is a nearby hill town.

116473. No. 643. A locally grown, long, yellow pepper.

116474 to 116477. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. **Watermelon.**

116474. No. 535. *Tendi.* From Bikaner, Bikaner State, April 13, 1936. A

116453 to 116554—Continued.

- popular vegetable, but not widely grown in this region, probably on account of the short season.
116475. No. 620. *Safed tenda*. A small round white melon much esteemed as a vegetable and prepared like summer squash.
116476. No. 621. A small round green vegetable, like No. 620 [116475] except in color.
116477. No. 542. Presented by the Bikaner State Garden, April 13, 1936. A mixed sample said to represent six sorts, one of which bears fruits weighing up to 80 pounds; said to be sweet and to keep several months.
116478. *COMBRETUM ROXBURGHII* Spreng. Combretaceae.
No. 588. Presented by the Saharanpur Gardens, April 18, 1936. A large shrub with many slender and subsucculent branches, oblong leaves about 4 inches long, and large terminal panicles of conspicuous cream-white floral bracts. Native to India.
- 116479 to 116491. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.
116479. No. 606. *Kakri*. Fruit said to be white, long, and thin, with longitudinal furrows 18 by 4 inches. Very good as salad when young.
116480. No. 607. Fruit said to be long, thin, and green, with longitudinal furrows 18 by 4 inches. Very good as salad when young.
116481. No. 671. Fruit slender, 3 feet long, bent and twisted, with a muskmelon odor when ripe.
116482. No. 448. From Jaipur City, April 1, 1936. Fruit elongate rounded, 1 foot by 7 inches, lemon yellow, greenish ribbed, heavily netted. Flesh whitish, rather insipid.
116483. No. 505. From Delhi, April 9, 1936. Fruit ovoid, about 6 inches long, with pronounced navel at blossom end, yellow, strongly and abundantly netted. Flesh salmon, thick, sweet. Said to have come from Itarsi, Central Provinces.
116484. No. 526. From Bikaner, Bikaner State, April 12, 1936. Fruit ellipsoid, yellow, heavily netted, 14 inches long, with very thick sweet fragrant salmon flesh. Said to have come from Ahmedabad.
116485. No. 531. From Bikaner, Bikaner State, April 13, 1936. Said to have come from Tonk. Fruit ellipsoid, 8 inches long, deep green with yellowish clouding and abundant longitudinal netting. Flesh white, flavorless, and apt to be bitter near the rind.
116486. No. 532. From Bikaner, Bikaner State, April 13, 1936. Said to have come from Tonk. Fruit compressed, 5 inches long and 7 inches in diameter, dark green and gold mottled, netted. Flesh pale salmon, rather insipid.
116487. No. 533. From Bikaner, Bikaner State, April 13, 1936. Said to have come from Tonk. Fruit elongate, often three-sided, pointed, with pronounced ribs, golden yellow. Flesh pale salmon, mealy, insipid.

116453 to 116554—Continued.

116488. No. 534. From Bikaner, Bikaner State, April 13, 1936. Said to have come from Tonk. Fruit subglobose, 6 inches in diameter, white, feebly ribbed, traces of netting. Flesh white, insipid.
116489. No. 547. Said to have come from Shabjehaupur. Fruit much compressed, over 3 inches long and 6 inches in diameter, yellow, heavily netted with green rib lines. Flesh pale salmon, rather fragrant, thin; rind firm.
116490. *Sard*. No. 601. Fruit subglobose, 8 inches long, bright yellow, finely netted, fragrant. Flesh pale salmon, melting. Not locally grown.
116491. No. 647. A mixed sample, probably native local varieties.
- 116492 to 116497. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.
116492. No. 543. *Kakri*. Presented by the Bikaner State Gardens, April 13, 1936. Said to represent a mixture of several kinds of local cucumbers.
116493. No. 569. *Balam Khira*. Fruit elongate, 2 inches by 1 inch, green with elongate white stripes or russet, of delicious flavor, tender and refreshing; the best cucumber observed.
116494. No. 609. *Balam Khira*. Said to be a local bushy variety. Fruit elongate rounded, 3 inches long and 2 inches in diameter, russet with age, very tender and pleasant; superior salad vegetable.
116495. No. 610. Fruit long, green.
116496. No. 613. *Safed Kakri*. A long white fruit.
116497. No. 672. A quick-growing variety which matures in less than 90 days; fruit short, yellow, egglike. Said to be of Russian origin.
- 116498 to 116501. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cushaw. *Sitaphul*.
116498. No. 648. Fruit large, red-fleshed, firm, grows in the hot season.
116499. No. 648. Fruit firm, large, round, yellow-fleshed. Grows in the hottest weather.
116500. No. 650. Fruit large, red, grows in the rains.
116501. No. 674. Said to be a very large sort, not common here, never seen here by me before.
- 116502 to 116506. *DAUCUS CAROTA* L. Apiaceae. Carrot.
116502. No. 608. *Gadjas*. Said to be a mixture of native carrots used for horse fodder.
116503. No. 614. *Banapha gadjas, kala gadjas*. A long purple carrot of very good flavor, but apt to have a woody center.
116504. No. 615. *Pila gadjas*. A long yellow carrot.
116505. No. 616. *Safed gadjas*. A long red carrot.
116506. No. 617. *Lal gadjas*. A long red carrot.

116453 to 116554—Continued.

- 116507 to 116510. *DOLICHOS LABLAB* L. Fabaceae. **Hyacinth-bean.**
116507. No. 652. *Makhan sem.* "butter bean." Said to have broad tender pods.
116508. No. 653. *Hara sem.* Pods eaten fresh.
116509. No. 654. *Uda sem.* A variety with purple pods.
116510. No. 666. Said to have stringless pods.
116511. *FICUS BENGHALENSIS* L. Moraceae. **Fig.**
- No. 455. *Bor.* From Jaipur City, April 3, 1936.
- For previous introduction see 101311.
116512. *GOURLIEA DECORTICANS* Gillies. Fabaceae. **Chañar.**
- No. 574. Presented by the Saharanpur Garden. A large shrub or small tree native to northern Argentina. The small yellow flowers are followed by edible fleshy pods.
- For previous introduction see 33970.
116513. *HIPTAGE* sp. Malpigiaceae.
- No. 582. Presented by the Saharanpur Garden. A strong woody climber with abundant fragrant white flowers.
116514. *HORDEUM VULGARE* L. Poaceae. **Barley.**
- No. 545. *Manga jau.* "naked barley," from the Kulu Valley, Punjab, April 14, 1936, at 6,000 feet altitude.
116515. *IPOMOEA CAIRICA* (L.) Sweet. Convolvulaceae. **Morning-glory.**
- No. 507. From Jaipur City, April 10, 1936.
- For previous introduction and description see 116042.
116516. *IPOMOEA* sp. Convolvulaceae.
- No. 600. A vine found covering a tree 20 feet high.
116517. *LACTUCA SATIVA* L. Cichoriaceae. **Garden lettuce.**
- No. 619. *Salat.* Said to be a mixture of acclimatized varieties.
- 116518 and 116519. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. **Calabash gourd.**
116518. No. 624. *Lanki.* The common bottle-shaped form.
116519. No. 625. *Lanki.* A round form.
- 116520 to 116522. *LUFFA ACUTANGULA* (L.) Roxb. Cucurbitaceae. **Singkwa towelgourd.**
116520. No. 626. A hot-weather form; the young fruits are very good cooked, and the fiber of the ripe fruit is used as a sponge.
116521. No. 541. *Tori.* Presented by the Bikaner Government Gardens, April 13, 1936. A form with yellow striped fruits. The luffas are all good vegetables when immature.
116522. No. 627. *Kali Tori.* A rain form with yellow-striped fruits.

116453 to 116554—Continued.

- 116523 and 116524. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae. **Suakwa towelgourd.**
- Presented by the Bikaner Government Garden, April 12, 1936.
- For previous introduction and description see 116108.
116523. No. 536. A light-colored form.
116524. No. 539. A green form.
- 116525 and 116526. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. **Tomato.**
- For previous introduction see 116219.
116525. No. 538. Presented by the Bikaner Government Garden, April 13, 1936. A large red tomato; probably a recent introduction.
116526. No. 623. *Termatter.*
116527. *MORINGA OLEIFERA* Lam. Moringaceae. **Horseradish tree.**
- No. 596. Presented by the Saharanpur Gardens, April 18, 1936.
- For previous introduction see 116053.
116528. *MORUS NIGRA* L. Moraceae. **Black mulberry.**
- No. 570. *Lal Shahbut.* An attractive tree with shiny green foliage and purple-red fruits, 2 inches long by one-fourth inch in diameter, pleasantly acid.
- For previous introduction see 64956.
- 116529 and 116530. *PHOENIX* spp. Phoenicaceae. **Palm.**
- Presented by the Saharanpur Gardens, April 18, 1936.
116529. *PHOENIX DACTYLIFERA* L. **Date palm.**
- No. 576.
116530. *PHOENIX RUPICOLA* T. Anders. **Cliff date palm.**
- No. 597. A Himalayan palm with a solitary slender naked stem 15 to 20 feet high, bright-green leaves 10 feet long, and shining yellow, oblong fruits.
- For previous introduction see 100984.
116531. *PHYLLANTHUS EMBLICA* L. Euphorbiaceae. **Nelli.**
- No. 584. Presented by the Saharanpur Gardens.
- For previous introduction and description see 114453.
116532. *PTEROSPERMUM ACERIFOLIUM* (L.) Willd. Sterculiaceae.
- No. 580. *Maakkan.* Presented by the Saharanpur Gardens. A large, attractive tree with large white sweet-scented flowers.
- For previous introduction see 67533.
- 116533 to 116535. *RAPHANUS SATIVUS* L. Brassicaceae. **Radish.**
- Nuli.* A collection of white radishes which are sown at different seasons in India.
116533. No. 630. An all-season variety; may be sown in the rains or in hot weather.
116534. No. 631. A white radish with a purple top; sown in the winter.

116453 to 116554—Continued.

116535. No. 632. Sown in the winter.
- 116536 to 116544. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.
Bengan. Nos. 116536 and 116537 were presented by the Bikaner Government Garden, Bikaner State, April 13, 1936.
116536. No. 537. A large, round, black-purple form.
116537. No. 540. An elongate, purple-black fruit 1 foot long and alkali-tolerant.
116538. No. 656. A large purple, native variety.
116539. No. 657. A large violet, native variety.
116540. No. 658. A large, long, black-purple native variety.
116541. No. 660. A very long, native variety, grown in summer.
116542. No. 661. A native sort, very long, for winter planting.
116543. No. 664. *Safed Bengan*. A round white variety.
116544. No. 665. *Safed Bengan*. A long white fruit.
- 116545 and 116546. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.
116545. No. 644. *Palag*. Said to be grown the year round.
116546. No. 645. *Palag*. A variety sown in the fall.
116547. *TECTONA GRANDIS* L. f. Verbenaceae. Teak.
No. 565. From the Saharanpur Gardens, April 17, 1936. An attractive tall timber tree.
116548. *TRICHOSANTHES ANGUINA* L. Cucurbitaceae. Snakegourd.
No. 622. *Chachinda*. Said to be a mixture of races.
For previous introduction and description see 115967.
- 116549 and 116550. *VICIA FABA* L. Fabaceae. Broadbean.
116549. No. 673. *Bakla Kalan*. Pods and green beans used as food.
116550. No. 655. *Seo Chand*. Said to be grown for the green pods.
- 116551 to 116554. *VIGNA SINENSIS* (Turner) Savi. Fabaceae. Cowpea.
Lobra. Grown for the edible green pods.
116551. No. 651. 116553. No. 668.
116552. No. 667. 116554. No. 669.
- 116555 and 116556.**
- From Italy. Bulbs presented by Miss Adela de Lines, San José, Costa Rica. Received June 23, 1936.
116555. *AMARYLLIS BELLADONNA* L. Amaryllidaceae. Belladonna-lily.
An amaryllis with pale rose-colored flowers.
For previous introduction see 109895.
116556. *ZEPHYRANTHES* sp. Amaryllidaceae.
A variety with pale-lilac flowers.

116557. CITRUS SINENSIS (L.) Osbeck.
Rutaceae. Orange.

From Australia. Budsticks presented by L. P. Rosen & Son, Fernhill Nurseries, Carlisle, New South Wales. Received June 23, 1936.

Berry Valencia orange.

116558 to 116565.

From Turkey. Seeds and bulbs collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received June 12, 1936.

116558. ALLIUM sp. Liliaceae.

No. 554. Bulblets collected north of the Agricultural Institute, Ankara, May 25, 1936.

Nos. 116559 to 116565 were collected May 20, 1936, on the hills around Ankara.

116559. ALLIUM AMPELOPRASM L. Liliaceae.

No. 555. Bulblets.

116560. ALLIUM AMPELOPRASM L. Liliaceae.

No. 556. Bulbs and bulblets collected at Gazi's farm.

116561. CROCUS sp. Iridaceae.

No. 558. Bulbs.

116562. CROCUS sp. Iridaceae.

No. 558-A.

116563. CROCUS sp. Iridaceae.

No. 560. Bulbs.

116564. GLADIOLUS sp. Iridaceae.

No. 557. Bulbs.

116565. MUSCARI sp. Liliaceae.

No. 559. Bulbs.

116566. TRITHRINAX ACANTHOCOMA
Drude. Phoenicaceae.

From California. Seeds presented by David Barry, Jr., Los Angeles. Received June 17, 1936.

A dwarf fan palm with a stout stem and netted leaf sheaths bearing many strong reflexed spines. The large fanlike leaf blades are deeply cut into about 40 narrow bifid segments. Native to Brazil.

116567. CITRUS NOBILIS DELICIOSA (Ten.)
Swingle. Rutaceae.

Mandarin orange.

From Brazil. Seeds presented by Agésilau Bitancourt, through Anna Jenkins, Bureau of Plant Industry. Received June 23, 1936.

Laranja cravo. A well-known citrus fruit of southern Brazil, somewhat like a tangerine. Fruit deep reddish-orange with a loose rough thick skin. The stem end protrudes, and there is a small navel at the distal end.

116568 and 116569. NICOTIANA TARACUM L. Solanaceae.

Common tobacco.

From Costa Rica. Seeds presented by J. M. Orozco, Jefe de la Sección de Botánica, Departamento de Agricultura, San Pedro Montes. Received June 24, 1936.

116568. *Chiracagre*. From Chiracagre, an Indian village at the foot of the Irazú volcano. Interesting for its resistance

116568 and 116569—Continued.

to adverse conditions and its ease of cultivation.

116569. *Criollo de flor blanco*. A variety extensively cultivated for more than 60 years and very disease resistant.

116570 to 116578.

From India. Bulbs and seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 4, 1936.

116570 to 116573. *ALLIUM SATIVUM* L. Liliaceae. Garlic.

116570. No. 387. *Lassan*. From Agra, United Provinces, March 25, 1936. Bulbs commonly used as a condiment.

116571. No. 454. *Lassan*. Bulbs collected at Jaipur City, April 2, 1936.

116572. No. 685. *Lassan*. Bulbs collected at Saharanpur, United Provinces, April 21, 1936.

116573. No. 713. *Lassan*. Bulbs collected at Amritsar, Punjab, April 23, 1936.

Nos. 116574 to 116578 were collected at the Saharanpur Gardens, United Provinces, April 17 to 21, 1936.

116574. *GYMNOSPORIA ROTHIANA* (Walp.) Wight and Arn. Celastraceae.

No. 554. An evergreen shrub or small tree with thick, coarse branches, sometimes spiny, and elliptic leaves about 3 to 4 inches long. The crimson fruits split open when ripe and cast their seeds.

116575. *CITRUS* sp. Rutaceae.

No. 714. A fruit, grapefruitlike in form, color, and size, except that the surface is uneven with a small elevation at the stem end; strongly and not too agreeably acid.

116576. *EUGENIA* sp. Myrtaceae.

No. 688. A large attractive evergreen tree with small pleasantly acid fruits.

116577. *GLYCOSMIS PENTAPHYLLA* (Retz.) Correa. Rutaceae.

No. 686. An unarmed shrub with evergreen leaves and panicles of small white fragrant flowers and white berries. Said to be very hardy in dry places.

For previous introduction see 109792.

116578. *PUTRANJIVA ROXBURGHII* Wall. Euphorbiaceae.

No. 557. *Japata*. A spreading evergreen of attractive form with small whitish bitter fruits the size of a cherry. From the seeds is obtained an olive-brown oil used by the natives of India for burning. The hard gray wood is used for making tools.

For previous introduction see 59683.

116579 to 116623.

From India. Seeds presented by the Lloyd Botanic Gardens, Darjeeling, through Dr. R. A. Fenton, Portland, Oreg. Received June 4, 1936.

116579. *ALNUS NEPALENSIS* D. Don. Betulaceae.

116580. *ASPARAGUS RACEMOSUS* Willd. Convallariaceae.

116579 to 116623—Continued.

116581. *ASTILBE RIVULARIS* Buch-Ham. Saxifragaceae.

A perennial herb, native to Nepal and western China, with stems 3 to 5 feet high, covered with tawny hairs. The biternate leaves have dentate ovate leaflets 1 to 3 inches long, and the creamy-white flowers, with pure-white stamens, are borne in large paniced spikes at the top of the stems.

For previous introduction see 103114.

116582. *BERBERIS CONCINNA* Hook. f. Berberidaceae. Barberry.

For previous introduction see 65754.

116583. *BERBERIS WALLICHIANA* DC. Berberidaceae. Barberry.

116584. *CLEMATIS SMILACIFOLIA* Wall. Ranunculaceae.

A tall woody climber with large leathery, usually simple, ovate or cordate leaves and panicles of deep purple flowers. Native to India.

116585. *EDGEWORTHIA GARDNERI* (Wall.) Meisn. Thymelaeaceae. India papertree.

A handsome shrub, native to the Himalayas, whose branches are covered with dense clusters of yellow, sweet-scented flowers before the leaves appear. The strong tough fiber which is obtained from the long, straight twigs is sometimes used as paper-making material.

For previous introduction see 65250.

116586. *ERANTHEMUM INDICUM* (Nees) C. B. Clarke. Acanthaceae.

A bushy shrub up to 4 feet high, with lanceolate or narrowly ovate leaves about 7 inches long and dense racemes of white, purple-veined flowers over an inch long. Native to the Himalayas at altitudes of 1,000 to 5,000 feet.

116587. *EUPHORBIA SIKKIMENSIS* Boiss. Euphorbiaceae.

A stout perennial 3 to 4 feet high, native to the Sikkim Himalayas at altitudes of 8,000 to 10,000 feet. The linear-lanceolate, glabrous leaves are 2 to 4 inches long, and the small inconspicuous flowers are surrounded by broad, ovate, yellow bracts.

For previous introduction see 111047.

116588. *FRAGARIA DALTONIANA* J. Gay. Rosaceae. Himalayan strawberry.

A wild relative of the cultivated strawberry, which comes from alpine pastures of the Sikkim Himalayas at altitudes of 10,000 to 15,000 feet. It is a stoloniferous perennial with solitary white flowers and bright-scarlet, insipid fruits an inch long and half as broad.

For previous introduction see 58489.

116589. *GERANIUM POLYANTHES* Edgew. and Hook. f. Geraniaceae.

A perennial herb with simple or branching stems up to 10 inches high, divided orbicular-reniform leaves about 2 inches in diameter, and umbels of 3 to 10 dark-purple flowers less than an inch across. Native to the Sikkim Himalayas at altitudes of 9,000 to 12,000 feet.

116579 to 116623—Continued.

116590. *HYPERICUM HOOKERIANUM* Wight and Arn. Hypericaceae.

116591. *HYPERICUM JAPONICUM* Thunb. Hypericaceae.

A decumbent herbaceous perennial with ovate or oval leaves and terminal cymes of small yellow flowers. Native to eastern Asia.

116592. *LACTUCA DUBYAEA* C. B. Clarke. Cichoriaceae.

A low herbaceous perennial 6 to 18 inches high, native to the slopes of the central Himalayas in northern India. The ovate-hastate, hispid leaves, 3 to 6 inches long, vary from simple to pinnatifid, and the nodding yellow flower heads, 1 inch across, are clothed with black glandular hairs.

For previous introduction see 99667.

116593. *LACTUCA MACRANTHA* Clarke. Cichoriaceae.

A stout perennial lettuce up to 2 feet high, with large pinnatifid leaves and loosely paniced heads of blue flowers. Native to the Sikkim Himalayas at altitudes of 10,000 to 14,000 feet.

116594. *LIGUSTRUM CONFUSUM* Decaisne. Oleaceae. Privet.

A small tree up to 40 feet in height, which is one of the tropical relatives of the California privet (*Ligustrum ovalifolium*). The leathery obtuse leaves are about 9 inches long, and the small white flowers are in panicles 1 to 5 inches long.

For previous introduction see 66295.

116595 and 116596. *LOBELIA PYRAMIDALIS* Wall. Campanulaceae.

A perennial herb 2 to 7 feet high, found between 3,000 and 9,000 feet altitude in the Himalayan mountains. The linear leaves are glabrous, and the purple-rose or whitish flowers are produced in many-flowered racemes.

For previous introduction see 93906.

116597. *MAESA INDICA* (Roxb.) Wall. Myrsinaceae.

An evergreen shrub or small tree common throughout India at altitudes of 6,000 feet or less. The small white berries are used as food in Nepal, and the leaves are used in Kanara to poison fish.

For previous introduction see 47712.

116598. *DESMODIUM FLORIBUNDUM* (D. Don) G. Don. Fabaceae.

A woody, thickly pubescent Himalayan plant with very copious axillary and terminal racemes of pale-pink or lavender flowers.

For previous introduction see 94077.

116599. *DESMODIUM GYROIDES* DC. Fabaceae.

A shrubby leguminous plant 8 to 10 feet high, native to the warmer parts of the central and eastern Himalayas. It has pubescent leaves and terminal racemes of red-purple flowers. It is found growing in valleys, at times even on the borders of swamps.

For previous introduction see 105242.

116579 to 116623—Continued.

116600. *DESMODIUM TILIAEFOLIUM* (D. Don) G. Don. Fabaceae.

An attractive deciduous shrub with slender terete branches, thick green trifoliolate leaves about 4 inches long, and red flowers in lax racemes often a foot long. The bark yields an excellent fiber which is used in rope making, the leaves are good fodder, and the roots are used medicinally as a tonic and diuretic. It is native to the Himalayas from 3,000 to 6,000 feet altitude.

For previous introduction see 99743.

116601. *MELIA* sp. Meliaceae.

116602. *MICHELIA EXCELSA* Blume. Magnoliaceae.

A tall tree, native to the temperate Himalayas of northeastern India at altitudes of about 5,000 feet. The large narrow leaves are silky brown beneath, and the handsome white flowers are 4 or 5 inches across.

For previous introduction see 58909.

116603. *MICHELIA LANUGINOSA* Wall. Magnoliaceae.

This species is characterized by the white, woolly, lower surface of its long narrow magnoliolike leaves. The white solitary flowers are 3 to 4 inches across. Although this species is a spring-flowering tree in northern India, where it is native, in Sikkim it is said to form an autumn-flowering bush.

For previous introduction see 62814.

116604. *MUSSAENDA ROXBURGHII* Hook. f. Rubiaceae.

An erect undershrub with hairy stems and oblong-lanceolate leaves, native to the tropical slopes of the Himalayas in India. The yellowish flowers are borne in dense hairy cymes, and each flower is subtended by a prominent white calyx lobe. The fleshy berries are crowned by the persistent calyx.

For previous introduction see 93217.

116605. *PICEA SMITHIANA* (Wall.) Boiss. Pinaceae. Spruce.

A lofty tree, native to the mountains of northwestern India at altitudes of 7,000 to 11,000 feet; the terminal, drooping, pale-green cones are 4 to 6 inches long. The stiff, sharp, spirally arranged green leaves are crowded on pendulous falllike twigs.

For previous introduction see 55694.

116606. *POLYGONUM CAPITATUM* Buch.-Ham. Polygonaceae.

A prostrate perennial 6 to 10 inches long, with small elliptic-acute leaves and numerous heads of small pink flowers. Native to the Himalayas at altitudes of 3,000 to 6,000 feet.

116607. *POLYGONUM CHINENSE* L. Polygonaceae. Fleecflower.

116608. *POLYGONUM MOLLE* D. Don. Polygonaceae.

A shrubby perennial 2 to 3 feet high, with white flowers in large thyrse-like terminal panicles. Allied to *Polygonum polystachyum*. Native to Nepal.

116579 to 116623—Continued.

116609. *Polygonum* sp. Polygonaceae.

116610. *PORANA RACEMOSA* Roxb. Convolvulaceae.
Snow-creeper.

An evergreen vine, native to the subtropical Himalayas. It occurs in dense masses, climbing over other plants in the jungle. The small, dazzling-white flowers, in dense racemes, resemble patches of snow when seen from a distance.

For previous introduction see 105029.

116611. *SALVIA CAMPANULATA* Wall. Menthaceae.

A stout perennial 2 to 3 feet high, with ascending hirsute stems and ovate, cordate-crenate leaves on long petioles. The large flowers, yellow with purple dots, are in axillary or terminal racemes. Native to the Himalayas at altitudes of 9,000 to 13,000 feet.

For previous introduction see 112858.

116612. *SAUROPIUS ALBICANS* Blume. Euphorbiaceae.

An erect, somewhat shrubby plant with terete green branches, small greenish-red flowers, and small fleshy fruits. It is native to the hot valleys of the Sikkim Himalayas and is distributed southward to Ceylon and eastward to the Philippines.

For previous introduction see 47785.

116613. *SWERTIA BIMACULATA* (Sieb. and Zucc.) Hook. f. and Thoms. Gentianaceae.

For previous introduction and description see 114806.

116614. *SWERTIA DILATATA* C. B. Clarke. Gentianaceae.

An herb 1 to 3 feet high, with lanceolate leaves over an inch long and paniculate cymes of greenish-yellow flowers. Native to the Himalayas between 4,000 and 12,000 feet altitude.

For previous introduction see 111094.

116615. *SYMPLOCOS GLOMERATA* King. Symplocaceae.

A shrub or small tree becoming 10 feet high, with narrow leathery leaves 6 inches long and axillary clusters of small white flowers. This shrub is rather common in the hills of Sikkim and Bhutan, India, at altitudes of 1,000 to 8,000 feet.

For previous introduction see 111096.

116616. *SYMPLOCOS RAMOSISSIMA* Wall. Symplocaceae.

A shrub or tree up to 40 feet high, native to India. The oblong-lanceolate membranous leaves are 4 inches long, and the small white flowers are in axillary one- to six-flowered racemes.

For previous introduction see 102911.

116617. *SYMPLOCOS THEAEFOLIA* D. Don. Symplocaceae. Sweetleaf.

An erect tree of the eastern Himalayas from Nepal to Bhutan, between 4,000 to 6,000 feet altitude. The leaves of this species are used as an auxiliary with *Morinda tinctoria* and lac in dyeing.

For previous introduction see 46108.

116618. *THOMSONIA NAPAENSIS* Wall. Araceae.

A perennial herb allied to *Amorphophallus*, with leaves over 18 inches across and ovate or oblong leaflets about 4 inches

116579 to 116623—Continued.

long; a cylindrical, purple variegated scape to 2 feet high and a large green spathe. Native to India.

116619. *DESMOS CHINENSIS* Lour. Annonaceae.

A shrub 3 to 7 feet high, native to southern China, growing wild in shady places in clay soil. The very fragrant greenish-yellow flowers are followed by curious clusters of attractive fruits which turn from yellow to red and are composed of many moniliform pods radiating from a short peduncle.

For previous introduction see 63624.

116620. *VIBURNUM STELLULATUM* Wall. Caprifoliaceae.

A large evergreen shrub with elliptic-lanceolate leaves about 3 inches long and small red berries. Native to the temperate Himalayas and said to be hardy in England.

For previous introduction see 111102.

116621. *TETRASTIGMA SERRULATUM* (Roxb.) Planch. Vitaceae.

A glabrous woody vine with slender wiry stems, native to the temperate Himalayas. The palmately compound leaves have three to five lanceolate to obovate, bristly serrate leaflets 1 to 3 inches long, and the axillary or terminal cymes of small green flowers are followed by globose black fruits about one-fourth of an inch in diameter.

For previous introduction see 102782.

116622. *TETRASTIGMA LANCEOLARIUM* (Wall.) Planch. Vitaceae.

A woody evergreen climber with large, usually five-foliolate, fleshy to leathery leaves and small greenish flowers in cymes. Native to eastern India.

116623. *ZIZIPHUS RUGOSA* Lam. Rhamnaceae.

A large evergreen shrub or small tree, sometimes of climbing habit, with elliptic leaves, 2 to 6 inches long and fleshy fruits one-third of an inch in diameter. Native to the tropical Himalayas.

116624 to 116629. *NICOTIANA TABACUM* L. Solanaceae.

Common tobacco.

From Mexico. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received in June 1936.

116624. *Punta de Lanza*. From San Miguel, Veracruz.

116625. *Punta de Lanza*. From Uñas de la Candelaria, Veracruz.

116626. *Colorado*. From Uñas de la Candelaria, Veracruz.

116627. *Colorado*. From La Trinidad, Yaveo, Oaxaca.

116628. *Colorado*. From Jaltepec. Yaveo, Oaxaca.

116629. *Colorado*. From Santa Maria, Choapan, Oaxaca.

116630. *ZEPHYRANTHES* sp. Amaryllidaceae.

From Mexico. Bulbs purchased from Maximino Martínez, Professor of Botany, Mexico City, Distrito Federal. Received June 25, 1936.

116631 to 116634. NERINE spp. Amaryllidaceae.

From England. Bulbs purchased from Hocker Edge Gardens, Cranbrook, Kent. Received June 26, 1936.

116631. NERINE FILIFOLIA Baker.

116632. NERINE CURVIFOLIA FOTHERGILLII (Andr.) Baker.

A nerine with about six strap-shaped leaves a foot long, appearing after the flowers, and many crimson to scarlet flowers in an umbel about 4 inches across. Native to South Africa.

116633. NERINE MASONORUM L. Bolus.

A tender bulbous plant with narrow, channeled leaves about 1 foot long appearing with the rose-colored flowers. There are four to six flowers in an umbel, the segments being recurved, undulate, and about one-half inch long. Native to southern Africa.

116634. NERINE UNULATA (L.) Herb.

A tender bulbous perennial with four to six linear leaves 1 foot or more in length and 8 to 12 pale-pink flowers about three-fourths of an inch long in centrifugal umbels. Native to South Africa.

116635 to 116681.

From India. Seeds collected by Waiter Koelz, Bureau of Plant Industry. Received in June 1936.

Unless otherwise stated, all of this material was collected from April 20 to May 1, 1936, at Lahore, Punjab.

116635. ACACIA NILOTICA (L.) Willd. Mimosaecae.

No. 753. *Kikas*. A large attractive tree, native to tropical Africa, with bipinnate foliage and heads of small white flowers. Common in the hot dry parts of India.

For previous introduction see 97861.

116636 and 116637. ALLIUM CEPA L. Liliaceae.

116636. No. 744. *Lal pujaz*. A locally grown onion, red, flattened, 4 inches in diameter and keeps well.

116637. No. 757. *Safed pujaz*. A flat white onion 4 inches across.

116638. AMYGDALUS PERSICA L. Amygdalaceae.

No. 743. *Aru*. Said to have come from Peshawar.

116639 to 116643. BRASSICA OLERACEA BOTRYTIS L. Brassicaceae. Cauliflower.

116639. No. 775. Said to be a long-leaved variety.

116640. No. 776. Said to be from Peshawar and to be long leaved and the largest kind grown.

116641. No. 777. A small-leaved variety said to be from Sialkot.

116642. No. 778. *Agetri*. Said to be the Patna sort.

116643. No. 779. Said to be a Teroze-pur sort.

116644. CANAVALIA ENSIFORMIS (L.) DC. Fabaceae. Jackbean.

No. 752. *Makan Sem*. Green pods used as food.

116635 to 116681—Continued.

116645 to 116647. CAPSICUM ANNUUM L. Solanaceae. Common redpepper.

Mirch. A collection of locally grown varieties.

116645. No. 746. Fruit said to be 1 inch long and broadly triangular.

116646. No. 748. Said to be a long-podded sort.

116647. No. 747. Said to be 5 inches long.

116648. CASSIA FISTULA L. Caesalpinaceae. Golden-shower.

No. 711. From the Saharanpur Gardens, United Provinces, April 21, 1936. A tree 40 feet high and a foot in diameter with pods 20 inches long, longer than other trees of this species.

116649 to 116656. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

116649. No. 739. Fruit subglobose, dark green with fine netting visible on close inspection; rind thin; flesh melting and sweet; weight 12 pounds.

116650. No. 769. *Peshawar Tarbuza*. A form grown at Peshawar.

116651. No. 770. *Gujuran Tarbuza*. A form grown at Gujuran.

116652. No. 772. *Jhang Tarbuza*. A form grown at Jhang.

116653. No. 773. Said to be different from Nos. 769, 770, 772 (P. I. 116650-116652).

116654. No. 774. *Quetta Tarbuza*. Said to be a first-class melon.

116655. No. 771. *Rasal Naggar Tarbuza*. A variety grown at Rasal Naggar; said to have a very thin rind.

116656. No. 742. *Chata tinda*. Fruit the size and shape of a tangerine; very good melon.

116657 to 116667. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

116657. No. 717. *Lucknow Kharbuza*. April 24, 1936, at Amritsar, Punjab. A melon said to have come from Lucknow. Fruit up to 6 inches long, flattened, smooth, lemon yellow with white to pale-salmon flesh, fragrant, but of rather poor taste.

116658. No. 756. *Kabuli Sarda*. Said to be a superior type of Iranian [Persian] melon.

116659. No. 760. *Kasuri Kharbuza*.

116660. No. 761. *Amritsari Kharbuza*. A locally grown melon.

116661. No. 762. *Jhang Kharbuza*. A Punjabi variety.

116662. No. 763. *Lucknow Kharbuza*. Considered very fine.

116663. No. 764. *Quetta Kharbuza*. A large melon grown at Quetta and famous in India as *Masteng*.

116664. No. 765. *Quetta Kharbuza*. A Quetta variety.

116665. No. 766. *Lahore Kharbuza*. A melon grown at Lahore.

116666 and 116667. *Poot Kharbuza*. A muskmelon that is said to ripen in the rains. There are two types, one

116635 to 116681—Continued.

round, one elongated. The quality is not so good, but they ripen when other melons are past.

116666. No. 767. 116667. No. 768.

116668. CUCURBITA PEPO L. Cucurbitaceae. Pumpkin.

No. 754. *Chini Kaddu*. A small roundish summer squash somewhat scalloped but not flattened. A very good vegetable.

116669 to 116671. DAUCUS CAROTA L. Apiaceae. Carrot.

116669. No. 749. *Pila gadjas*. Said to have a yellow root.

116670. No. 750. *Kala gadjas*. Said to have a dark-purple root.

116671. No. 755. *Safed gadjas*. Said to have a white root.

116672. DOLICHOS LABLAB L. Fabaceae. Hyacinth-bean.

No. 738. From Amritsar, Punjab, April 27, 1936. Grown for the green pods.

116673. LAGENARIA LEUCANTHA (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. 741. *Ghuja*. Fruits 2½ inches long and about 5 inches through.

116674. MORUS ALBA L. Moraceae. White mulberry.

No. 737. *Shahbut*. From Amritsar, Punjab, April 27, 1936. Fruit 1 inch long by three-eighths of an inch in diameter, white, more or less clouded with dull purple; quality fair.

For previous introduction see 104323.

116675 and 116676. PISUM SATIVUM L. Fabaceae. Pea.

116675. No. 758. *Matar*. Said to be the local Amritsar sort.

116676. No. 759. *Simla Matar*. A form said to have originated in Simla or from the neighboring mountains.

116677 to 116680. SOLANUM MELONGENA L. Solanaceae. Eggplant.

Nos. 780 to 783 are considered distinct forms.

116677. No. 780. Fruit round, black.

116678. No. 781. A dwarf plant with fruits 9 inches long.

116679. No. 782. Fruit purple black.

116680. No. 783. *Banarsi Sihai*. Said to be the well-known *Black Giant* of Benares.

116681. SPINACIA OLERACEA L. Chenopodiaceae. Common spinach.

No. 751. *Palag*. Locally grown as a potherb.

116682 to 116695.

From Egypt. Seeds presented by Alfred Bircher, The Middle Egypt Botanic Station, El Saff. Received June 15, 1936.

Seeds grown in the higher parts of El Saff and the Protectorate of Kenya.

116682. ACACIA ABYSSINICA Hochst. Mimosaceae.

A tree, native to Ethiopia, with bipinnate leaves, spinescent stipules, and very small flowers in capitulate clusters.

116682 to 116695—Continued.

116683. ACANTHUS EMINENS C. B. Clarke. Acanthaceae.

A shrub about 7 feet high, with large pinnatifid spinous leaves about 10 inches long and purple flowers 2 inches long in short spikes. Native to eastern tropical Africa.

116684. AMOMUM SP. Zinziberaceae.

A gingerlike herb.

116685. DOMBEYA BURGESSIAE Gerrard. Sterculiaceae.

A handsome low mound-shaped evergreen shrub with nearly white, bell-shaped flowers in graceful clusters. Native to southern Africa.

For previous introduction see 51248.

116686. HAGENIA ABYSSINICA (Bruce) J. F. Gmel. Rosaceae.

A small ornamental tree with large tufted, compound leaves and much-branched terminal panicles of small pinkish flowers. Native to Ethiopia.

116687. CRAIBIA ELLIOTI Dunn. Fabaceae.

A tropical evergreen shrub with three- to five-foliolate leaves about 5 inches long and terminal racemes of small flowers. Native to eastern tropical Africa.

116688. EKEBERGIA RUEPELLIANA (Fresen) A. Rich. Meliaceae.

A tree with leathery pinnate leaves a foot or more long and erect panicles of many small white flowers, followed by small inedible, globose berries. Native to tropical Africa.

116689. JUNIPERUS PROCERA Hochst. Pinaceae. East African juniper.

A tall handsome tree with a maximum height of about 100 feet. It is native to the high mountains of eastern tropical Africa and is closely related to *Juniperus excelsa*.

For previous introduction see 62395.

116690. LEPTOSPERMUM CITRATUM (Bailey and White) Challinor, Cheel, and Penfold. Myrtaceae.

An evergreen shrub or small tree 4 to 20 feet high, with linear to obtuse leaves about 1½ inches long and solitary white flowers. Native to Queensland, Australia.

116691. MARKHAMIA HILDEBRANDTII (Baker) Sprague. Bignoniaceae.

A shrub or small tree with pinnate leaves 6 to 10 inches long and showy yellow flowers over an inch long, in terminal and axillary panicles. Native to eastern tropical Africa.

116692. CALODENDRUM CAPENSE Salberg. Rutaceae.

A large handsome tree with branches spreading in pairs or in threes. The ovate evergreen opposite leaves are 3 to 4 inches long. The white flowers, with linear-oblong reflexed petals 1 to 2 inches long, are in terminal panicles, and the shining blue seeds, the size of hazelnuts, are borne in thick hard capsules. It is native to southern Africa.

For previous introduction see 98228.

116693. POLYSCIAS KIKUYUENSIS Summerhayes. Araliaceae.

A tree up to about 50 feet high, with large pinnate leaves. The wood is soft and white. Native to Kenya, Africa.

116682 to 116695—Continued.

116694. *PYGEUM AFRICANUM* Hook. f.
Amygdalaceae.

A small tree with elliptic-oblong leaves about 4 inches long and small flowers in racemose clusters. Native to tropical Africa at altitudes of 2,400 feet.

116695. *VITEX KENIENSIS* Turrill. Verbenaceae.

A tall tree sometimes 90 feet high, with large five-foliolate leaves. The wood has a grain resembling that of teak. Native to eastern tropical Africa.

116696 to 116703.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. V. P. Alekseev, Chief, Section of Introduction, All Union Research Institute of Dry Subtropics, Tashkent, Middle Asia. Received June 17, 1936.

116696. *ASTRAGALUS PEDUNCULARIS* Royle.
Fabaceae.

No. 8.

116697. *ASTRAGALUS SEWERTZOWII* Bunge.
Fabaceae.

No. 9. A stemless perennial, native to Turkistan.

116698. *ASTRAGALUS SIEVERSII* Pall.
Fabaceae.

No. 10. An erect or ascending perennial with oblong hairy leaflets and axillary clusters of pale-yellow flowers. Native to central Asia.

For previous introduction see 111160.

116699. *CICER FLEXUOSUM* Lipsky. Fabaceae.

No. 13.

For previous introduction and description see 115070.

116700. *OXYTROPIS* sp. Fabaceae.

No. 35.

116701. *OXYTROPIS* sp. Fabaceae.

No. 36.

116702. *OXYTROPIS* sp. Fabaceae.

No. 37.

116703. *VICIA TENUIFOLIA* Roth. Fabaceae.

No. 65.

For previous introduction see 115095.

116704. *ULMUS PUMILA* L. Ulmaceae.
Chinese elm.

From Nebraska. Seeds presented by H. A. McComb, University of Nebraska Experiment Station, North Platte. Received June 24, 1936.

Tree No. 3, selection made at North Platte from plants received as *Ulmus pumila arborea* under P. I. No. 32830. This tree is of *Ulmus pumila* type and has escaped winter injury when most other trees of the species were injured. Seedlings from it are reported to be uniform in appearance and to have a good branching system.

For previous introduction see 108558.

116705. *EUCHLAENA MEXICANA* Schrad.
Poaceae. Teosinte.

From Guatemala. Seeds presented by Dr. Wilson Popenoe, United Fruit Co. Received June 30, 1936.

116706. *GOSYPIUM* sp. Malvaceae.
Cotton.

From Cuba. Seeds presented by Dr. Gonzalo M. Fortun, Director, Estación Experimental Agronomica, Santiago de las Vegas. Received June 17, 1936.

Marcucci cotton. Originally from Guatemala, the seed has developed satisfactorily in Cuba, but requires a long time to mature the very large bolls.

116707. *ALEURITES CORDATA* (Thunb.)
Muell. Arg. Euphorbiaceae.
Japan tung-oil tree.

From Japan. Seeds purchased from the Yokohama Nursery Co., Yokohama. Received January 1, 1936. Numbered in June 1936.

A small or medium-sized tree, native to southern Japan. It is closely related to the tung tree of China, *Aleurites fordii*, but is more tropical in character. The seeds are considerably smaller than tung seeds and run nearly 400 to the pound. They yield a valuable drying oil, apparently but little inferior to tung oil. The seeds seem to require a somewhat longer time than tung seeds for germination.

116708 to 116710. *MELILOTUS* spp. Fabaceae.
Sweetclover.

From the Union of Soviet Socialist Republics. Seeds presented by N. I. Sharapov, former Head of Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received June 23, 1936.

116708. *MELILOTUS DENTATA* (Waldst. and Kit.) Pers.

No. 456/6, originally from western Siberia.

116709. *MELILOTUS TAURICA* (Bieb.) Seringe.

No. 9095, originally from the Crimea.

For previous introduction see 67854.

116710. *MELILOTUS WOLGICA* Poir.

No. 11620, originally from Kuybishev Province.

For previous introduction see 27292.

116711 and 116712.

Plants growing at the Barbour Lathrop Plant Introduction Garden, Savannah, Ga. Originally received from China, June 24, 1927; collected by F. A. McClure, Bureau of Plant Industry. Renumbered in June, 1936.

116711. *PHYLLOSTACHYS* sp. Poaceae.
Bamboo.

No. 725. November 3, 1926. *Shat sam chuk, mah chuk*. From Chiuwashaan, Anhwei Province. A medium-sized, wild bamboo 4 to 4.5 meters high and 1.5 to 2 centimeters in diameter, with edible shoots. The culms are nearly solid with very small central chambers; they are used for walking sticks, whipsticks, etc., but not for weaving. The nodes are prominent; the branches, two at each node, are unequal, and the leaves are small to medium sized.

116712. *ARUNDINARIA* sp. Poaceae.
Bamboo.

No. 726. November 3, 1926. *Liu kin chuk*. Obtained at Chiuwashaan, An-

116711 and 116712—Continued.

hwei Province. A small monopodial bamboo, found wild in this region. It is characterized by large drooping leaves, few branches, nearly equal, rising at a sharp angle with the stiff cylindrical culm. Nodes not prominent, buds very flat, and indentation slight. Culms thick-walled, with small central cavity containing very little pith. Culm sheaths thin, tips ephemeral, but the bases cling rather tenaciously. Rhizomes hard, brittle, shiny, light brown when mature. Roots few and very stiff. There are many nodes of the rhizomes without buds.

116713 to 116767.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 5, 1936.

Nos. 116713 to 116718 were collected at Saharanpur, United Provinces, April 19 and 20, 1936.

116713. *ACACIA MODESTA* Wall. Mimosaceae.

No. 693. From the Saharanpur Gardens, April 21, 1936.

For previous introduction and description see 116455.

116714. *AGERATUM HOUSTONIANUM* Mill. Asteraceae.

No. 599.

116715. *ALLIUM ASCALONICUM* L. Liliaceae. Shallot.

No. 678.

116716. *APIUM GRAVEOLENS* L. Apiaceae. Celery.

No. 682. *Ajwain*. Grown commercially for the seed.

116717. *BARRINGTONIA ACUTANGULA* (L.) Gaertn. Lecythidaceae.

No. 703. From the Saharanpur Gardens. A medium-sized evergreen tree with obovate leaves about 5 inches long and long pendulous racemes of small pink flowers. The wood is soft and white with a pretty silver grain and is used for furniture. Native to India.

116718. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 681. *Pethi*. Fruit light green with ashy bloom; flesh white, solid, often candied, also used as curry vegetable; keeps well.

116719 to 116722. *BRASSICA OLERACEA BOTRYTIS* L. Brassicaceae. Cauliflower.

Phulgobi. From Amritsar, Punjab, April 24, 1935.

116719. No. 715. A small-leaved variety.

116720. No. 716. Said to reach a diameter over a foot.

116721. No. 718. A small-leaved variety.

116722. No. 719. Said to be one of the largest varieties. Cauliflowers are dried here for summer use.

116723. *BUDDLEIA MADAGASCARIENSIS* Lam. Loganiaceae.

No. 697. From the Saharanpur Gardens, April 21, 1936. An attractive shrub 6 feet high, with drooping branches and silvery leaves.

116713 to 116767—Continued.

Nos. 116724 to 116726 were collected at Amritsar, Punjab, April 20 to 26, 1936.

116724. *CANAVALIA ENSIFORMIS* (L.) DC. Fabaceae. Jackbean.

No. 732. *Tras bin*. A bush form which grows 5 feet high without support. It is grown for the edible green pods.

116725 to 116735. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

Nos. 116725 and 116726 were received as *Citrullus fistulosus*.

116725. No. 722. *Safed Tinda*. Fruits said to come from Benares, are about the size of a tangerine, greenish white with a pronounced concavity on the blossom end. They are delicious when cooked.

116726. No. 723. *Hara Tinda*. A favorite Punjab vegetable. Some specimens are nearly 6 inches in diameter, but those now on sale are like small tangerines.

Nos. 116727 to 116730 were collected at Saharanpur from April 16 to 20, 1936.

116727. No. 548. *Tarbuza*. Fruit globose, 8 inches in diameter, with widely spaced ribs of darker green; flesh red, insipid.

116728. No. 646. Fruit subglobose, 14 inches in diameter, dark green, obscurely and finely veined and ribbed with darker green; flesh red, good quality, fairly sweet, but very seedy; rind thick.

116729. No. 659. Fruit subglobose, 15 inches long, dark green with indistinct darker markings; rind thick; flesh red, sweet.

116730. No. 675. A mixed sample of local varieties.

Nos. 116731 to 116741 were collected April 24 to 26, 1936, at Amritsar, Punjab.

116731 and 116732. *Tarbuza*. Said to be a form grown locally that reaches a weight of 20 pounds.

116731. No. 728. 116732. No. 729.

116733. No. 730. *Tarbuza*. Said to be the largest local form, which reaches a weight of 40 pounds.

116734. No. 731. Said to be one of the smaller local sorts, weighing 10 to 15 pounds.

116735. No. 734. *Tarbuza*. Reported as the smallest of local sorts, not over 10 pounds in weight.

116736 to 116738. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

From Amritsar, Punjab, April 25 and 26, 1936.

116736. No. 726. *Maddar Karbuza*. A pale round smooth-skinned form grown at Maddar, near Kasur.

116737. No. 727. *Tinfutia*. A form said to be large, green, and netted; grown near Amritsar at Chamiari. Considered very good.

116738. No. 733. *Tarsini*. A melon 12 inches long, brownish yellow, netted, green-fleshed, and weighing up to 10 pounds. Considered one of the best local varieties.

116713 to 116767—Continued.

116739 to 116741. *CUCUMIS SATIVUS* L.
Cucurbitaceae. **Cucumber.**

Collected at Amritsar, Punjab, April 24 and 25, 1936.

116739. No. 721. Said to be a banana-like, furrowed fruit up to 18 inches long, greenish white to white. Used as a salad vegetable.

116740. No. 724. Fruit white, over 2 feet long.

116741. No. 725. Fruit yellow, thick, 8 by 3 to 3½ inches.

116742. *CUCURBITA MOSCHATA* Duchesne.
Cucurbitaceae. **Cushaw.**

No. 564. From Saharanpur, United Provinces, April 17, 1936. Fruit smooth, conspicuously ribbed, 1 foot long by 14 inches across, green, blotched and spotted with yellow brown; flesh yellow; will keep for 6 months.

116743. *CUCURBITA PEPO* L. Cucurbitaceae.
Pumpkin.

No. 729. *Chini Kaddu*. From Amritsar, Punjab, April 24, 1936. A smooth white globose summer squash, the size of a grapefruit.

Nos. 116744 to 116751 were collected at the Saharanpur Gardens, United Provinces, April 17 to 21, 1936.

116744. *DERRIS SCANDENS* (Roxb.) Benth.
Fabaceae.

No. 702. A woody climber with compound leaves 3 to 6 inches long, composed of 9 to 19 leaflets, leathery oblong, and 1 to 2 inches in length. The pale rose flowers are in dense axillary racemes. Native to the East Indies.

For previous introduction see 104663.

116745 and 116746. *DURANTA REPENS* L.
Verbenaceae. **Skyflower.**

An attractive hedge shrub with long racemes of flowers.

116745. No. 704. A purple form.

116746. No. 705. A white form.

116747. *FICUS BENJAMINA COMOSA* (Roxb.)
Kurz. Moraceae.

No. 555. A large tree with a dense spreading top and yellow fruits.

For previous introduction see 99569.

116748. *FRAGARIA VESCA* L. Rosaceae.
Alpine strawberry.

No. 677. A mixed sample, said to have come from Europe.

For previous introduction see 113549.

116749. *HIBISCUS COLLINUS* Roxb. Malvaceae.

No. 699. An arborescent hibiscus with cordate three-lobed leaves about 4 inches long and pink, dark-centered flowers 2 to 3 inches across. Native to the western peninsula of India.

116750. *LAGERSTROEMIA PARVIFLORA* Roxb.
Lythraceae. **Crapemyrtle.**

No. 552. An evergreen timber tree native to the East Indies and closely related to the well-known crapemyrtle (*Lagerstroemia indica*). The white, fragrant flowers, less than an inch across, are in

116713 to 116767—Continued.

terminal or axillary panicles, and the wood is tough, elastic, and durable.

For previous introduction see 61608.

116751. *MACADAMIA TERNIFOLIA* F. Muell.
Proteaceae. **Queensland-nut.**

No. 695. An evergreen tree up to 50 feet high, native to eastern Australia. It is cultivated for its edible nuts which have sweet white flesh with the flavor of chestnuts, incased in a shell which is typically very hard.

For previous introduction see 111419.

116752. *MOMORDICA CHARANTIA* L. Cucurbitaceae. **Balsam-pear.**

No. 676. *Karela*. From Saharanpur, United Provinces, April 20, 1936.

For previous introduction see 116052.

116753. *MORINGA OLEIFERA* Lam. Moringaceae. **Horseradish-tree.**

No. 735. *Shwaniya*. From Amritsar, Punjab, April 26, 1936.

For previous introduction see 116527.

116754. *MORUS NIGRA* L. Moraceae. **Black mulberry.**

No. 712. From Amritsar, Punjab, April 23, 1936.

For previous introduction and description see 116528.

Nos. 116755 to 116760 were collected in the Saharanpur Gardens, April 21, 1936.

116755. *PHLOGACANTHUS THYRSIFLORUS* (Roxb.) Nees. Acanthaceae.

No. 698. A shrub up to 6 feet high, with few shoots from the roots and few branches, but attractive shiny leaves and mahogany flowers. This plant likes shade.

For previous introduction see 103487.

116756. *RIVINA HUMILIS* L. Phytolaccaceae. **Rouge-plant.**

No. 690. A small shrub about 3 feet high, with small pink or nearly white flowers and attractive red berries. Native to the West Indies.

For previous introduction see 34010.

116757. *BRACHYCHITON BIDWILLI* Hook.
Sterculiaceae.

No. 694. An evergreen shrub or small tree native to Queensland, Australia. The alternate leaves are usually deeply three-lobed. The red or pink axillary flowers are tubular and about an inch long.

116758. *TERMINALIA ARJUNA* (Roxb.) Wight and Arn. Combretaceae.

No. 706.

For previous introduction and description see 116065.

116759. *TERMINALIA BELLERICA* (Gaertn.)
Roxb. Combretaceae.

No. 707.

For previous introduction and description see 116099.

116760. *JACQUINIA AURANTIACA* Ait. Theophrastaceae.

No. 691. A dense shrub, 10 feet high, spreading and covered with flowers in

116713 to 116767—Continued.

May. In Hawaii, where this plant is native, it becomes a tree with obovate-lanceolate leaves over an inch long and terminal racemes of small yellow flowers.

116761. TRICHOSANTHES ANGUINA L. Cucurbitaceae. **Snakegourd.**

No. 736. *Chachinda*. From Amritsar, Punjab, April 26, 1936.

For previous introduction and description see 116548.

Nos. 116762 to 116767 were collected at Saharanpur, United Provinces, April 20 and 21, 1936.

116762. VENTILAGO MADRASPATANA Gaertn. Rhamnaceae.

No. 687. From the Saharanpur Gardens. A tropical climbing shrub with alternate leathery, feather-veined leaves and simple paniculate spikes of small greenish flowers. Native to the East Indies.

116763. VERBESINA LINDENII (Schultz Bip.) Blake. Asteraceae.

No. 696. From the Saharanpur Gardens. A tropical herbaceous perennial 8 to 10 feet high, with rough hastate leaves 4 inches long and deep-yellow flower heads. Native to tropical America.

116764 and 116765. VICIA FABA L. Fabaceae. **Broadbean.**

Cultivated for the green beans and possibly a recent European introduction.

116764. No. 679. **116765.** No. 680.

116766. VIGUIERA DENTATA HELIANTHOIDES (H. B. K.) Blake. Asteraceae.

No. 700. From the Saharanpur Gardens. An erect herbaceous perennial up to 6 feet high, with large, ovate-lanceolate or subcordate pubescent leaves and yellow flower heads about 1½ inches across. Native to Cuba.

116767. WOODFORDIA FRUTICOSA (L.) Kurz. Lythraceae.

No. 689. From the Saharanpur Gardens. An attractive spreading bush covered with red flowers.

For previous introduction see 103509.

116768. PHYLLOSTACHYS sp. Poaceae. **Bamboo.**

Plants growing at the Plant Introduction Gardens at Savannah, Ga., and Chico, Calif. Originally collected in China by Frank N. Meyer. Received in June 1908. Renumbered in June 1936.

A hardy running bamboo about 18 feet high, in general habit strongly resembling *Phyllostachys aurea*. The more noticeable differences are in (1) the entire absence in the present species of the shortened internodes in the lower part of the culm, common in *P. aurea*, and (2) the more conspicuous spotting of the culm sheaths. Less apparent but even more important differences are the somewhat more prominent ligules of the leaf sheaths and culm sheaths and the shorter marginal cilia of the culm-sheath ligules.

This bamboo, which cannot be identified with the original introduction number or its Chinese name, has been grown under P. I. No. 23234, the description for which does not fit it.

116769 to 116796.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 2, 1936.

Unless otherwise stated, all this material was collected in the Saharanpur Gardens, Saharanpur, United Provinces, April 17 to 19, 1936.

116769. ADINA CORDIFOLIA (Roxb.) Benth. and Hook. Rubiaceae.

No. 558. A large handsome deciduous tree found in the foothills of the Himalayas from Jumna eastward up to 3,000 feet altitude. The leaves are cordate and the yellow flowers are borne in small heads.

For previous introduction see 52282.

116770. ALTHAEA ROSEA (L.) Cav. Malvaceae. **Hollyhock.**

No. 529. From Bikaner, Bikaner State, April 12, 1936.

116771. DALBERGIA SISSOO Roxb. Fabaceae.

No. 602. *Shesham*. A quick-growing, drought-resistant tree, used both as a shade tree and for timber. Common in this region.

For previous introduction see 94180.

116772. ARAUCARIA CUNNINGHAMII Ait. Pinaceae.

No. 556

An evergreen tree up to 200 feet high, with whorled spreading branches and leaves of two kinds; on young trees and lateral branches the leaves are usually lanceolate or triangular, about one-half inch long; on old trees and cone-bearing branches the leaves are shorter, crowded, and overlapping. Native to eastern Australia.

116773 and 116774. BASELLA RUBRA L. Basellaceae.

Pai Sag.

For previous introduction and description see 114864.

116773. No. 662. The common type.

116774. No. 663. A form said to have larger leaves.

116775. BAUHINIA sp. Caesalpinaceae.

No. 573. A huge climber with large leaves.

116776. BOMBAX MALABARICUM DC. Bombacaceae. **Cotton tree.**

No. 575. *Simul*. A very large deciduous tree with branches in whorls, spreading horizontally, and the trunk with large thorny buttresses covered with large corky prickles. The inner bark yields a good fiber, suitable for cordage; the seeds yield the so-called silk-cotton, too short and too soft to be spun, but largely used for stuffing pillows and for gun-cotton. The flower buds are eaten as a potherb. It is native to the hotter forests of India and Burma.

For previous introduction see 50716.

116777. BURSERA SERRATA Wall. Balsameaceae.

No. 577. A large balsamiferous tree with pinnate leaves and very small flow-

116769 to 116796—Continued.

ers in lax axillary panicles. Native to India.

116778. *CASSIA NODOSA* Buch.-Ham. Caesalpinaceae.

No. 562. A moderate-sized, deciduous tree with long drooping branches and glossy bipinnate leaves. In the spring it bears a profusion of beautiful pink, rose-scented flowers in dense, long-stalked racemes. The leaves and flowers appear at the same time. Native to northeastern India.

For previous introduction see 110864.

116779. *CASSIA SURATTENSIS* Burm. f. Caesalpinaceae.

No. 593. A tropical leguminous shrub or small tree up to 15 feet high, with pale-green compound glaucous leaves and clusters of pale-yellow flowers. Native to the East Indies.

For previous introduction see 112082.

116780. *CASUARINA GLAUCA* Sieber. Casuarinaceae. Beefwood.

No. 585. *Pulak*. A small bushy tree.

116781. *EHRETIA LAEVIS* Roxb. Boraginaceae.

No. 553. A subtropical shrub or small tree 12 feet high with white flowers followed by small orange fruits. Native to southern Asia.

For previous introduction see 74697.

116782. *GUAZUMA ULMIFOLIA* Lam. Sterculiaceae.

No. 504. *Ludraksh*. From Jaipur City, April 9, 1936. An evergreen tree 10 to 50 feet high, with ovate to lanceolate leaves 2 to 8 inches long and panicles of very small yellow flowers. Native to tropical America.

116783. *KIGELIA PINNATA* (Jacq.) DC. Bigoniaceae.

No. 567.

For previous introduction see 106507.

116784. *LIVISTONA CHINENSIS* (Jacq.) R. Br. Phoeniceae. Chinese fan palm.

No. 572.

For previous introduction see 105729.

116785. *MIMUSOPS* sp. Sapotaceae.

No. 520. *Kirni*. From Bikaner, Bikaner State, April 11, 1936. An attractive evergreen tree; fruit yellow, elongate, 1½ inches long, sweet, slightly acid, like a persimmon.

116786. *PHASEOLUS COCCINEUS* L. Fabaceae. Scarlet runner bean.

No. 670. From Saharanpur, United Provinces, April 19, 1936. Grown for the pods and green beans. Said to have come from Africa.

116787. *PINUS* sp. Pinaceae.

No. 595. *Chil*. A pine that thrives here, becoming about 60 feet tall.

116788. *PROSOPIS CHILENSIS* (Molina) Stuntz. Mimosaceae. Algaroba.

No. 581.

For previous introduction and description see 116057.

116769 to 116796—Continued.

116789. *PTERYGOTA ALATA* (Roxb.) R. Br. Sterculiaceae.

No. 549. A large tree, native to India, with ash-colored bark and yellow-tomentose branchlets. The large heart-shaped leaves, 10 inches long by 7 inches wide, are clustered at the ends of the branches. The panicles of tomentose flowers, without petals, are shorter than the leaves.

For previous introduction see 97578.

116790. *PRUNUS* sp. Amygdalaceae.

No. 914. From Baijnath, Kangra Valley, Punjab, at 3,000 feet altitude, May 22, 1936. A large attractive well-formed tree 40 feet high with a trunk 2 feet in diameter. Flowers large, pale pink, semi-double. Fruit thin fleshed, bitter. The tree grows to 6,000 feet altitude and in winter is covered with snow.

116791. *SABAL* sp. Phoeniceae.

No. 586. The thatch palm of Bermuda.

116792. *SALVADORA OLEOIDES* Decne. Salvadoraceae.

No. 527. *Jal*. From Bikaner, Bikaner State, April 12, 1936. A large evergreen shrub or small tree found growing in very dry situations, with thick oval leaves about 2 inches long and small greenish-white flowers in erect clustered spikes, followed by translucent drupes. Native to India.

116793. *SCHOTIA BRACHYPETALA* Sond. Caesalpinaceae.

No. 550. A large shrub or small tree with large leathery leaves and showy crimson flowers in dense panicles. Native to southern Africa.

116794. *ERYTHROPSIS PALLENS* Ridl. Sterculiaceae.

No. 591. A tree with oval or rounded, densely hairy leaves, three- to five-lobed, about 8 inches long and axillary panicles of bright-yellow flowers. Native to northwestern India.

116795. *TOONA CILIATA* Roemer. Meliaceae. Toon tree.

No. 590. *Tun*. A large tropical tree 50 to 80 feet high, with nearly evergreen foliage and white, honey-scented flowers. The fine red wood, which is used for furniture, carvings, and for making cigar boxes, is very durable and is not attacked by termites. Native to India.

For previous introduction see 81205.

116796. *ANOGEISSUS PENDULA* Edgeworth. Combretaceae.

No. 563. A bush or small tree with pendulous branches, elliptic leaves about 1 inch long, and small leathery two-winged fruits packed horizontally in dense heads. Native to northwestern India.

116797 to **116801.** *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From Australia. Seeds presented by the American consulate, Melbourne, Victoria, through the Secretary of State, Washington, D. C. Received June 30, 1936.

Fair average quality Victorian wheat.

116802 to 116853.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 16, 1936.

Unless otherwise stated, all of this shipment was collected at Peshawar, North West Frontier Province, May 2 to 4, 1936.

116802 and 116803. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. **Okra.**

116802. No. 793. *Bhendi*. A short, white, spiny form.

116803. No. 794. *Bhendi*. Smooth, green with long pods.

116804 and 116805. *ALLIUM CEPA* L. Liliaceae. **Onion.**

116804. No. 789. *Lal pujaz*. A red onion harvested in May, keeps until October.

116805. No. 804. *Safed pujaz*. A white onion.

116806. *AMYGDALUS PERSICA* L. Amygdalaceae. **Peach.**

No. 819. *Aru*. A native yellow peach, smaller than American peaches.

116807. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. **Waxgourd.**

No. 795. *Pethi*. An elongate form used for candying in spiced sugar.

For previous introduction see 114866.

116808 to 116810. *BETA VULGARIS* L. Chenopodiaceae. **Common beet.**

116808. No. 797. *Palag*. A large-leaved form that is used as a vegetable all summer.

116809. No. 827. *Khatkan palag*. From Lahore, May 1, 1936. A large-leaved variety, cultivated as a potherb.

116810. No. 835. *Palag*. From Parachinar, Kurran Agency, North West Frontier Province; presented by the Government Gardens. Used as a potherb.

116811 to 116813. *BRASSICA OLERACEA BOTRYTIS* L. Brassicaceae. **Cauliflower.**

116811. No. 805. *Phulgobi*. Said to mature in 3 months.

116812. No. 806. *Phulgobi*. Said to be sown in June and to mature in 4 months in the hottest season.

116813. No. 807. *Phulgobi*. A very large form with heads over 12 inches across.

116814. *CAJANUS INDICUS* Spreng. Fabaceae. **Pigeonpea.**

No. 822. *Harrar*. A shrub, the seeds of which are used for food.

116815. *CANAVALIA ENSIFORMIS* (L.) DC. Fabaceae. **Jackbean.**

No. 786.

116816 and 116817. *CAPSICUM ANNUUM* L. Solanaceae. **Common redpepper.**

116816. No. 823. *Mirch*. Fruits 3 to 4 inches long.

116817. No. 824. *Mirch*. Fruits rounded, 1 inch in diameter.

116818 to 116823. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. **Watermelon.**

116802 to 116853—Continued.

116818. No. 745. From Lahore, Punjab, April 20, 1936. Fruit elongate, up to 20 pounds weight, medium green, finely netted with darker green. Rind thin; flesh red of good texture, sweet.

116819. No. 808. *Tarbuza*. Fruit elongated, sweet, weight up to 20 pounds.

116820. No. 809. A round melon, said to be good.

116821. No. 810. A good round form.

116822. No. 811. From Lahore, Punjab, May 1, 1936. Fruit round, medium green, faintly netted with darker green, weight about 20 pounds.

116823. No. 812. From Lahore, Punjab, May 1, 1936. Fruit rounded, weight up to 20 pounds, medium green, faintly netted with darker green; rind thin; flesh red, sweet, and of good texture.

116824 to 116828. *CUCUMIS MELO* L. Cucurbitaceae. **Muskmelon.**

116824. No. 740. From Lahore, Punjab, April 28, 1936. Fruits somewhat flattened, about 6 inches long by 4 inches thick, pale yellow, coarsely and strongly netted; flesh pale salmon, of good flavor and a good keeper.

116825. No. 796. *Kharbuza* or *kakri*, though the name *kakri* is used elsewhere only for cucumbers. Fruit ellipsoid, about 1 foot long.

116826. No. 803. *Kharbuza*. A round muskmelon.

116827. No. 845. Said to have been imported from somewhere in southern India. Fruits rounded, somewhat flattened, 5 inches through, lemon yellow, more or less blotched with dark green, smooth. Flesh thin, white, usually insipid, but a good shipper.

116828. No. 802. *Sarda*. Described as the "best" of melons, about 1 foot long, green.

116829 and 116830. *CUCUMIS SATIVUS* L. Cucurbitaceae. **Cucumber.**

116829. No. 791. *Khira*. A short thick cucumber, 6 by 2½ by 3 inches.

116830. No. 834. *Khira*. Presented by the Government Gardens at Parachinar, North West Frontier Province. A large round cucumber.

116831. *CUCURBITA MAXIMA* Duchesne. Cucurbitaceae. **Squash.**

No. 799. *Pethi*. A large rounded early form used as a vegetable.

116832 to 116834. *CUCURBITA PEPO* L. Cucurbitaceae. **Pumpkin.**

116832. No. 801. *Kaddu*. A large red-brown form that keeps well.

116833 and 116834. From Parachinar, Kurram Agency, North West Frontier Province, May 8, 1936. Gift of the Government Gardens.

116833. No. 832. **116834.** No. 833.

116835. *DAUCUS CAROTA* L. Apiaceae. **Carrot.**

No. 820. *Pila gadjas*. A yellow carrot.

116802 to 116853—Continued.

116836. DIOSPYROS sp. Diospyraceae.

No. 815. An attractive tree 18 inches or more in diameter, growing in the mountainous districts; fruit about 1 inch in diameter, red, turning black when ripe; sold dried in the market.

116837. DOLICHOS LABLAB L. Fabaceae.
Hyacinth-bean.

No. 790. *Hara sem.* The green pods are used as food, but the flavor is stronger than that of string beans.

116838. FICUS sp. Moraceae.

No. 701. From the Saharanpur Gardens, United Provinces, April 21, 1936. A large spreading evergreen tree up to 50 feet high and 4 feet in diameter.

116839 and 116840. MEDICAGO SATIVA L. Fabaceae.
Alfalfa.

From Lahore, Punjab, May 1, 1936. Native alfalfa, widely used as fodder in the Punjab.

116839. No. 829. 116840. No. 828.

116841. GREWIA ASIATICA L. Tiliaceae.

No. 785. *Phalsi.* From Lahore, Punjab, May 2, 1936. A small hazellike tree about 10 feet high, native to the East Indies and cultivated throughout India. The small dark-purple berry is pleasantly acid and is used in sherbet and for making beverages.

For previous introduction see 51006.

116842. MORUS ALBA L. Moraceae.
White mulberry.

No. 830. *Shahnut.* From Kobat, North West Frontier Province, May 7, 1936. Fruit whitish, 2½ inches long by three-eighths of an inch in diameter, sweet, with a peachlike odor.

116843 and 116844. PISUM SATIVUM L. Fabaceae.
Pea.116843. No. 787. *Mattar.* A short-podded form.116844. No. 788. *Mattar.* A long-podded form with white flowers; considered superior to No. 787 (P. I. 116843).116845. PRUNUS ARMENIACA L. Amygdalaceae.
Apricot.

No. 825. *Kumarie.* A tree up to 30 feet high; fruit said to be inferior to the Afghan sorts.

116846. RHAMNUS sp. Rhamnaceae.

No. 844. *Mamurie.* A dense and leafy attractive shrub up to 5 feet high; the fruits are sold in the market.

116847. SALIX sp. Salicaceae. Willow.

No. 843. From Parachinar, Kurram Agency, North West Frontier Province, May 8, 1936. Presented by the Government Gardens. A well-formed, quick-growing tree.

116848 to 116850. SOLANUM MELONGENA L. Solanaceae.
Eggplant.116848. No. 798. *Bengan.* A long dark-purple form.116849. No. 800. *Bengan.* A round, dark-purple form.

116850. No. 813. From Lahore, Punjab, May 1, 1936. A long black form.

116802 to 116853—Continued.

116851. SPINACIA OLERACEA L. Chenopodiaceae.
Common spinach.

No. 792. *Patag.* Said to be a small-leaved form.

116852. VIGNA SINENSIS (Torner) Savi. Fabaceae.
Cowpea.

No. 821. *Lobia.* Cultivated for the green pods.

116853. ZEA MAYS L. Poaceae. Corn.

No. 814. *Makki.* From the Government Gardens seed stock; the type of corn grown in this region.

116854. AGASTACHE CANA (Hook.) Wootton and Standl. Menthaceae.

From Texas. Seeds presented by Miss Ruth Yeates, El Paso. Received December 1, 1934. Numbered in May 1936.

116855. STRELTIZIA REGINAE BANKS. Musaceae.
Bird-of-paradise-flower.

From Australia. Seeds presented by J. Howard Johnson, St. Peters, South Australia. Received June 30, 1936.

For previous introduction see 78232.

116856 to 116896.

From China. Seeds obtained from Albert N. Steward, Department of Botany, College of Agriculture and Forestry, University of Nanking, Nanking. Received June 30, 1936.

Collected in Hunan Province in October 1935, and, unless otherwise stated, they were collected at Ma-Ling-Tung, Sinning Hsien.

116856. ACTINIDIA sp. Dilleniaceae.

No. 516. A tree 30 feet high, growing in the shade on a slope at 2,000 feet altitude. Fruits edible, greenish, turning dark purple when ripe.

116857. ARISAEMA sp. Araceae.

No. 477. An herb 3 feet high collected in a shady moist valley at 1,875 feet altitude. Fruits greenish.

116858. LINDERA GLAUCA (Sieb. and Zucc.) Blume. Lauraceae.

No. 642. Collected at 1,875 feet altitude. A deciduous shrub up to 12 feet high, with oblong-elliptic leaves, pubescent beneath, 1 to 2 inches long, and small yellow flowers followed by black drupes.

116859. LINDERA REFLEXA Hemsl. Lauraceae.

No. 156. From I-Chia-Ao, Changning Hsien, at 937 feet altitude, on a brushy slope. A shrub about 8 feet high, with membranous rotund-ovate leaves about 3 inches long and red fruits. Native to southern China.

116860. CALLICARPA DICHOTOMA (LOUR.) K. Koch. Verbenaceae.

No. 487. A shrub 5 feet high, with purplish stems and red fruits; collected at 937 feet altitude in a forest.

116861. CALLICARPA GIRALDIANA Hesse. Verbenaceae.

No. 488. From an exposed slope at 937 feet altitude. A deciduous Chinese shrub up to 10 feet high, with membranous light-green leaves, cymes of pink flowers, and dense clusters of round berrylike light-

116856 to 116896—Continued.

purple fruits which hang on after the leaves have fallen.

For previous introduction see 93879.

116862. CASTANEA HENRYI (Skan.) Rehd. and Wils. Fagaceae. Chestnut.

No. 517. A tree 50 feet high found on a slope in the forest at 1,875 feet altitude.

For previous introduction see 114344.

116863. CASTANEA SEGUINII Dode. Fagaceae.

No. 666. A shrub 4 feet high found on a brushy slope at 1,875 feet altitude.

For previous introduction and description see 114345.

116864. CLERODENDRUM CYRTOPHYLLUM Turcz. Verbenaceae.

No. 457. Collected at 1,875 feet altitude. A vigorous spreading shrub from 2 to 3 feet high, sending up many stalks. The leaves are glabrous, light green, and of somewhat fetid odor. The small white flowers with large rosy bracts are followed by blue berries.

For previous introduction see 43021.

116865. CUCUBALUS BACCIFER L. Silenaceae.

No. 543. A pubescent herb with white flowers and green fruits which become black when ripe; collected at 2,000 feet altitude. Native to Europe and northern Asia.

116866. DAPHNIPHYLLUM sp. Euphorbiaceae.

No. 616. A tree 15 feet high, with glabrous leaves and black fruits, found beside a stream in a valley at 1,875 feet altitude.

116867. DICHROA sp. Hydrangeaceae.

No. 473. A shrub 7 feet high, with greenish flowers, found in a forest on a slope at 1,875 feet altitude.

116868. EUONYMUS ACANTHOCARPUS Franch. Celastraceae.

No. 655. Collected on a slope at 1,875 feet altitude. A shrub up to about 12 feet high, with leathery lanceolate or ovate-lanceolate leaves and small greenish flowers. Native to south-central China.

116869. EURYA JAPONICA Thunb. Theaceae.

No. 493. A shrub 5 feet high, with purplish-black fruits, found on a shady slope at 1,875 feet altitude.

For previous introduction see 91249.

116870. EUSCAPHIS JAPONICA (Thunb.) Dipp. Staphyleaceae.

No. 95. From I-Chia-Ao, Changning Hsien, on a bushy slope at 687 feet altitude. A shrub or small tree with compound leaves composed of 7 to 11 ovate-lanceolate serrate leaflets 1 to 3 inches long. The small white flowers, in upright panicles, are followed by brown-red pods which open, exposing the steel-blue fruits.

For previous introduction see 105600.

116871. EVODIA OFFICINALIS Dode. Rutaceae.

No. 180. From Yang-Shan, Changning Hsien, at 2,125 feet altitude. A shrub or small tree up to about 15 feet high, with pinnate leaves having 7 to 15 ovate or

116856 to 116896—Continued.

elliptic ovate leaflets and corymbs of small greenish-yellow or greenish-white flowers followed by small red pods containing black seeds. Native to central and western China.

116872. GLEDITSIA SINENSIS Lam. Caesalpiaceae. Chinese honeylocust.

No. 635. A large tree with pinnate leaves, greenish flowers, and purple-black pods over 10 inches long. Growing along a stream at 1,875 feet altitude.

For previous introduction see 105609.

116873. ILEX sp. Aquifoliaceae.

No. 439. A shrub about 5 feet high, with black fruits, growing on a shady slope at 1,875 feet altitude.

116874. LONICERA MACRANTHA (D. Don) Spreng. Caprifoliaceae. Honeysuckle.

No. 632. A shrubby honeysuckle with rather large white flowers which fade to yellow, and purple black fruits. Found growing along a stream at 1,875 feet altitude.

For previous introduction see 47708.

116875. MELASTOMA DODECANDRUM Lour. Melastomaceae.

No. 2. From I-Chia-Ao, Changning Hsien, on an open grassy slope at 625 feet altitude. A prostrate perennial shrub which bears beautiful pink roselike flowers all summer long. The flowers last only one day, but because of their great number, the shrub is always well covered. The fruits are said to be eaten, but have the lack of flavor so common in Chinese fruits.

For previous introduction see 55443.

116876. MELIOSMA sp. Sabiaceae.

No. 584. A tree about 35 feet high, with deep-red flowers; found on a brushy slope at 2,000 feet altitude.

116877. PAEDERIA FOETIDA L. Rubiaceae.

No. 436. A slender attractive vine with glabrous, ovate or lanceolate leaves, grayish beneath, on long petioles. The small pink flowers are in branching cymes. Any part of the plant, when bruised, emits a most offensive odor. Native to south-eastern Asia.

For previous introduction see 99746.

116878. POLYGONATUM sp. Convallariaceae.

No. 474. An herb with leaves circinate at apex, growing in shade in forests at 1,875 feet altitude.

116879. PYRACANTHA sp. Malaceae.

No. 698. A shrub 3 feet high with red fruits; found on rocky slopes at 1,875 feet altitude.

116880. RHAMNUS CRENATA Sieb. and Zucc. Rhamnaceae. Japanese buckthorn.

No. 440. A shrub 8 feet high with black fruits, growing on an exposed slope at 1,875 feet altitude.

For previous introduction see 99239.

116881. RHAMNUS sp. Rhamnaceae.

No. 676. A shrub 3 feet high with glabrous leaves and deep-red flowers, found on shady slopes at 1,875 feet altitude.

116856 to 116896—Continued.

116882. RHAMNUS sp. Rhamnaceae.

No. 700. A shrub 8 feet high with black fruits; found on rocky slopes in forests at 1,875 feet altitude.

116883. RHUS SYLVESTRIS Sieb. and Zucc. Anacardiaceae.

No. 468. A tree 12 feet high with 7 to 12 ovate-oblong leaflets and loose axillary panicles of small brownish-yellow fruits, more or less flattened. The handsome foliage turns dark-red or scarlet in the autumn. Found on an exposed slope at 1,875 feet altitude.

For previous introduction see 111377.

116884. SMILAX CHINA L. Smilacaceae. Greenbrier.

No. 495. A shrubby species with bright-red fruits, found on an open slope at 1,875 feet altitude. The tuberous rhizome has been used for centuries in medicine and is still recognized as having medicinal value.

For previous introduction see 48743.

116885. SMILAX sp. Smilacaceae.

No. 560. A shrub 3 feet high with deep-blue fruits crowned with the reddish calyx. Found on an exposed slope at 2,030 feet altitude.

116886. SOLANUM DULCAMARA L. Solanaceae. Bitter nightshade.

No. 523. A hairy herb with purplish-red flowers and red fruits, found in shade on a slope at 2,030 feet altitude.

For previous introduction see 116154.

116887. SORBUS sp. Malaceae.

No. 701. A shrub 5 feet high with edible orange fruits, found on a rocky slope at 1,875 feet altitude.

116888. SORBUS sp. Malaceae.

No. 697. A shrub 5 feet high with edible orange fruits; found on a rocky slope at 1,875 feet altitude.

116889. SYMLOCOS LAURINA (Retz.) Wall. Symplocaceae.

No. 472. A shrub 5 feet high with leathery leaves and white flowers; found on an exposed slope at 1,875 feet altitude.

116890. SYMLOCOS sp. Symplocaceae.

No. 687. A shrub 8 feet high with blackish fruits; found near a stream at 1,875 feet altitude.

116891. TAXUS CHINENSIS (Pilger) Rehder. Taxaceae.

No. 644. A tree 30 feet high with edible yellowish fruits, the aril becoming red; found on a slope at 1,875 feet altitude.

For previous introduction see 99228.

116892. VIBURNUM EROSUM Thunb. Caprifoliaceae.

No. 168. From Yang-Shan, Changning Hsien. An upright shrub to 6 feet high, with elliptic-ovate to oblong-obovate leaves about 4 inches long and small white flowers in terminal and lateral cymes up to 2 inches in diameter, followed by small red drupelike fruits; found on a brushy slope at 2,125 feet altitude.

116856 to 116896—Continued.

116893. VIBURNUM sp. Caprifoliaceae.

No. 570. A shrub 5 feet high with red fruits; found on an exposed slope at 1,875 feet altitude.

116894. VIBURNUM sp. Caprifoliaceae.

No. 451. A shrub 8 feet high with leaves tomentose beneath and reddish fruits; found on a brushy slope at 1,875 feet altitude.

116895. VIGNA VEXILLATA (L.) Rich. Fabaceae.

No. 460. A vine with trifoliolate leaves of ovate-oblong pointed leaflets and usually two-flowered peduncles bearing light-purple flowers. Found on a grassy slope at 1,875 feet altitude.

For previous introduction see 89079.

116896. ZANTHOXYLUM ALATUM Roxb. Rutaceae. Prickly-ash.

No. 481. A shrub or small tree 7 feet high, native to the subtropical Himalayas, ascending to 6,000 feet. The compound leaves are made up of 5 to 11 lanceolate to ovate, finely serrate leaflets 1 to 5 inches long on a winged prickly rachis, and the yellow-green flowers in small panicles are followed by fragrant warty red fruits which open and show the lustrous black seeds. Collected in a forest at 1,875 feet altitude.

For previous introduction see 102787.

116897 to 116964.

From India and Afghanistan. Seeds and bulbs collected by Walter Koelz, Bureau of Plant Industry. Received June 26, 1936.

Unless otherwise stated, the material was collected at Kabul, Afghanistan, May 12 to 16, 1936, and was introduced as seeds. Collected at 6,000 feet altitude.

116897 to 116899. ALLIUM CEPA L. Liliaceae. Onion.

116897. No. 840. Bulblets from Parachinar, North West Frontier Province, May 8, 1936.

116898. No. 869. *Safed pujaz*. A flat white onion, 3 inches across.

116899. No. 860. *Surkh pujaz*. A handsome black-red onion, flattened, 3 inches in diameter.

116900. ALLIUM PORRUM L. Liliaceae. Leek.

No. 896. *Gandana*. Widely cultivated; the cut-off tops are sold in the market.

116901. WISTARIA sp. Fabaceae.

No. 912. From Baijnath, Kangra Valley, Punjab, May 22, 1936, at 3,000 feet altitude. A woody climber up to 20 feet, with pinnate leaves a foot long, and flat velvety pods 5 inches long.

116902. WOODFORDIA FRUTICOSA (L.) Kurz. Lythraceae.

No. 919. From Baijnath, Kangra Valley, Punjab, May 23, 1936.

For previous introduction and description see 116767.

116903. (Undetermined.)

No. 904. From Oot, Mandi State, India, May 30, 1936. A medium-sized, well-

116897 to 116964—Continued.

formed tree bearing flowers and later ripening fruit before the leaves appear. The red fruits are often in a radiate cluster of five on a stem. The huge leaves appear as the fruits ripen.

116904. (Undetermined.)

No. 922. From Drang, Mandi State, India, May 24, 1936. A well-formed shrub 6 feet high, with small pecanlike fruits 1 inch long, which, on ripening, split to expose the attractive red seeds; these are soon eaten by birds.

116905. (Undetermined.)

No. 926. From Oot, Mandi State, India, May 30, 1936. A vigorous attractive vine bearing dense clusters of purple and white flowers before the leaves appear. The pods are covered with bristly deciduous hairs.

116906. *BETA VULGARIS* L. Chenopodiaceae. Common beet.

No. 897. *Lablabu*. A red beet, said to be native.

116907. *BRASSICA OLERACEA CAPITATA* L. Brassicaceae. Cabbage.

No. 873. *Karam*. A large flat green cabbage 1 foot across. Said to be indigenous.

116908. *BRASSICA RAPA* L. Brassicaceae. Turnip.

No. 859. *Surkh shelgam*. A sweet turnip.

116909. *CAPSICUM ANNUUM* L. Solanaceae. Common redpepper.

No. 889. *Miris*. A mild red bullnose pepper, 3 by 1½ inches.

116910 to 116914. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

Tarbutz. These are said to represent the types of melons grown at Kabul; most of them are of great size. The quality is said to be better than the melons grown in Peshawar, India.

116910. No. 872.

116911. No. 876.

116912. No. 877.

116913. No. 878.

116914. No. 879.

116915 to 116919. *CUCUMIS* spp. Cucurbitaceae.

116915 to 116917. *CUCUMIS MELO* L. Muskmelon.

116915. No. 851. *Safed sarda*. A large white melon of excellent quality.

116916. No. 854. *Garma*. A large melon of excellent quality.

116917. No. 855. *Kharbuza sarda*. A large greenish melon of excellent quality.

116918. *CUCUMIS MELO FLEXUOSUS* (L.) Naud.

No. 852. *Taran*. An elongate, ridged, crook-necked melon. Native to the East Indies.

116919. *CUCUMIS SATIVUS* L. Cucumber.

No. 853. *Badrang*. A very good smooth cucumber, 6 by 3½ inches, with soft seeds.

116897 to 116964—Continued.

116920 to 116923. *CUCURBITA* spp. Cucurbitaceae.

116920. *CUCURBITA MAXIMA* Duchesne. Squash.

No. 893. *Turkestan ka ddu*. Fruit ellipsoid, 16 inches long, salmon colored with faint ribs 5 inches apart; flesh rather thick, salmon colored, insipid.

116921. *CUCURBITA MOSCHATA* Duchesne. Cushaw.

No. 866. *Kaddu-i-Turkistan*. Fruit globose, salmon to red, up to 90 pounds in weight; flesh sweet. Said to have been introduced from Turkey.

116922 and 116923. *CUCURBITA PEPO* L. Pumpkin.

116922. No. 831. From Parachinar, Kurram Agency, North West Frontier Province, May 8, 1936. Gift from the Government Gardens; said to represent the locally grown cucurbita.

116923. No. 858. *Kadu-i-Kabal*. A small green globose pumpkin.

116924. *CUPRESSUS FUNEBRIS* Endl. Pinaceae. Mourning cypress.

No. 850. From Jalalabad, Afghanistan, May 11, 1936. An ornamental shrub 20 feet high, with drooping branches.

For previous introduction see 99158.

116925. *CUPRESSUS* sp.

No. 849. *Sabr*. From Mimbla, Afghanistan, May 11, 1936. Very old trees, 50 to 60 feet high, some over 15 feet in circumference. Said to have been planted by the Great Mogul, Babur, in the sixteenth century.

116926. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 856. *Sujahi zardak*. An insipid purple-black carrot, probably imported from a warmer region.

116927. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 867. *Surkh zardak*. A red carrot.

116928. *ELAEAGNUS* sp. Elaeagnaceae.

No. 880. *Singjhet*. Fruit small, mealy, rather acid, sold dried. Probably from Jalalabad.

116929 and 116930. *IRIS* spp. Iridaceae.

From Parachinar, Kurram Agency, North West Frontier Province, India, May 8, 1936. A dainty and attractive iris with blue-purple flowers. Grows on dry plains or in fields.

116929. No. 836-A. Bulbs.

116930. No. 836-B. Seeds.

116931 and 116932. *JUGLANS REGIA* L. Juglandaceae. Persian walnut.

Girdu. Trees withstand zero temperatures without injury. The nuts are of good flavor, but the shell is hard.

116931. No. 863.

116932. No. 864.

116933. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.

No. 862. *Ka-u*. A head lettuce said to be indigenous. The leaves are tender, but the head is not firm.

116997 to 116964—Continued.

116934 and 116935. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae.
Calabash gourd.

Small gourds are used as containers for small dry objects and liquids.

116934. No. 857. *Kadusrai*.

116935. No. 894. *Kadu nasair*.

116936. *LUFFA ACUTANGULA* (L.) Roxb. Cucurbitaceae. Singkwa towelgourd.

No. 861. *Turi*. Probably like the Indian races. Used as a vegetable.

116937. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 875. *Banjan rawi*.

116938. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 882. *Rishka*. One of the common fodder plants of this region.

116939. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 868. *Karela*.

116940. *MORUS ALBA* L. Moraceae. White mulberry.

No. 817. *Shahbut*. From Peshawar, North West Frontier Province, India, May 5, 1936. Fruit whitish, 1½ inches long by one-fourth of an inch in diameter, sweet and with an odor of peaches.

116941. *MORUS* sp. Moraceae.

No. 818. From Peshawar, North West Frontier Province, May 5, 1936. Sold in the bazar dried; said to have come from Afghanistan. The dried fruits are sweet and are a good substitute for raisins.

116942. *NARCISSUS* sp. Amaryllidaceae.

No. 846. From Peshawar, North West Frontier Province, May 9, 1936. Bulbs presented by the Government Gardens.

116943. *PAPAYER* sp. Papaveraceae.

No. 838. From Parachinar, Kurram Agency, North West Frontier Province, India. An herb 18 inches high with attractive red flowers; found in fields and on dry plains.

116944. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 847. *Mashang*.

116945 and 116946. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

116945. No. 883. *Zardalu*. A large-beaked apricot, very sweet when dried, usually halved for drying. Withstands zero temperature without injury.

116946. No. 884. *Shakkarpara*. This is a commonly exported apricot, found in all the Indian cities. It is very sweet when dried, and the kernel is edible.

116947 to 116949. *PRUNUS* spp. Amygdalaceae.

116947. *PRUNUS CERASIFERA* Ehrh. Myrobalan plum.

No. 891. A small attractive tree; fruits small, rather sour when dried.

116897 to 116964—Continued.

116948. *PRUNUS CERASUS* L. Sour cherry.

No. 885. *Atubalu*. A small tree covered with large attractive white flowers in spring; fruits dark red, acid when fresh. Sold in the market dried.

For previous introduction see 115000.

116949. *PRUNUS DOMESTICA* L. Common plum.

No. 886. A very sweet plum said to have come from Ghazni. The dried fruit is rather acid.

116950 and 116951. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

116950. No. 870. *Muli-i-Kabul*. A long white-rooted radish. In the spring the leaves are used as greens.

116951. No. 892. *Herati Muli*. A top-shaped radish with the upper part red-purple.

116952. *SALVIA* sp. Menthaceae.

No. 841. From Parachinar, North West Frontier Province, India, May 8, 1936. An attractive annual that grows on dry slopes and plains. Leaves large, tomentose; flowers pale, blue-purple.

116953 and 116954. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

116953. No. 874. *Banjan siyahi*. A long black fruit which is alkali tolerant.

116954. No. 895. *Badanjan*. A round red eggplant.

116955. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.

No. 865. *Palag*. A very thrifty broad-leaved spinach.

116956. *SYRINGA* sp. Oleaceae.

No. 890. An attractive plant with slender panicles of rose-purple, very fragrant flowers; grown for hedges.

116957. *TRIFOLIUM* sp. Fabaceae.

No. 881. *Shafbal*. An annual or biennial clover that yields several cuttings a year. The flowers are small, pink, and very fragrant.

116958. *TULIPA* sp. Liliaceae.

No. 839. From Parachinar, North West Frontier Province, India, May 8, 1936. Found on dry slopes and open fields. Bulbs are sold in the bazar, roasted.

116959. *VICIA FABA* L. Fabaceae. Broadbean.

No. 848. *Bakie*. Said to be ground with wheat for bread.

116960 to 116962. *VITIS VINIFERA* L. Vitaceae. European grape.

116960. No. 887. *Munaka*. The famous table raisin throughout the Near East and India.

116961. No. 888. *Abjosh*. Said to have come from Kanduhar. Fruits white, large, of honey sweetness when dried.

116897 to 116964—Continued.

116962. No. 903. "Seedless" raisins said to grow where the winter temperatures are zero. They have been seen as flourishing grapevines with trunks a foot in diameter. The raisins are of fine flavor and high sugar content.

116963. (Undetermined.)

No. 837. From Parachinar, Kurram Agency, North West Frontier Province. Bulbs having blue-purple flowers.

116964. (Undetermined.)

No. 837-B. From Parachinar, Kurram Agency, North West Frontier Province. Seeds of No. 837 [P. I. 116963].

116965. *PHYLLOSTACHYS FLEXUOSA* A and C. Rivière. Poaceae. **Bamboo.**

Plants growing at the Barbour Lathrop Plant Introduction Garden, Savannah, Ga. Numbered in June 1936.

A bamboo about 10 feet high with two or three leaves on a branchlet. The leaves are 2 to 4 inches long by about one-half inch wide. The culm sheaths are a dull green, often suffused with dull brown, and spotted with deeper brown.

These plants have been carried under P. I. No. 38912, but this bamboo is not the species there listed. The original source of the plants is uncertain.

See also P. I. No. 89715.

Introductory statement	1
Inventory	2
Index of common and scientific names	42

INTRODUCTORY STATEMENT

Inventory No. 128 is a record of the plant material (Nos. 116966 to 118410) received by the Division of Plant Exploration and Introduction during the period from July 1 to September 30, 1936.

It records the first shipments of seeds and bulbs from H. L. Westover and F. L. Wellman, who left in the spring of 1936 for Turkey and Iran. The colder mountainous regions of these two countries, where agriculture has been the chief occupation for countless generations, offer a promising field for the collection of native strains of vegetables and fruits, especially in the markets and gardens of the more isolated villages and towns. Also included in these shipments were a number of grasses and forage plants from the semiarid parts of these countries.

The three agricultural explorers whose activities were discussed in the introductory statement of the preceding inventory (No. 127), Walter Koelz, W. A. Archer, and Raymond Stadelman, continued to send in material, during this period, from India, Brazil, and western South America, respectively. As before, the nature of the plant material received from them reflects the special needs of plant breeders and geneticists working with important crop plants.

The Department is again indebted to H. R. Wright, Auckland, New Zealand, who, during the past two decades, has presented material of new and little-known fruit varieties from his Avondale nursery. This shipment consists of plants of 25 different varieties of fruits (Nos. 117462 to 117486), including peaches, apples, plums, and several forms of citrus fruits, most of which have not been introduced before into this country.

Those concerned with ornamentals will be served by a rather small but unusual collection of seeds (Nos. 116983 to 116995) presented by Cheverton Buller, Stellenbosch, Union of South Africa. These represent native South African plants, mostly belonging to the Iridaceae and Proteaceae.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., June 14, 1940.

I N V E N T O R Y ¹

NOTE.—This inventory is a historical record of plant material introduced for Department and other specialists. It is not to be considered as a list of plant material for distribution.

116966 to 116978.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received July 6, 1936.

116966 and 116967. *ALTHAEA ROSEA* (L.) Cav. Malvaceae. Hollyhock.

116966. No. 205. From the Konya bazar, April 18, 1936.

116967. No. 123. From the Ankara bazar, April 15, 1936.

116968. *ANTIRRHINUM* sp. Scrophulariaceae. Snapdragon.

No. 200. From the Konya bazar, April 18, 1936.

116969. *CISTUS* sp. Cistaceae.

No. 460. Collected 25 km. northwest of Mersin, April 23, 1936.

116970. *CLEMATIS* sp. Ranunculaceae.

No. 324. From 70 km. northwest of Adana, April 24, 1936. A wild plant.

116971. *DELPHINIUM* sp. Ranunculaceae. Larkspur.

No. 206. From the Konya bazar, April 18, 1936.

116972 to 116978. *HELIANTHUS ANNUUS* L. Asteraceae. Common sunflower.

Nos. 116972 to 116974 were from the Ankara bazar, April 15, 1936.

116972. No. 119. *Katmerli*.

116973. No. 130. *Katmersiz*.

116974. No. 126.

116966 to 116978—Continued.

116975. No. 170. From Konya, April 18, 1936.

116976. No. 150. From Afyon, April 17, 1936.

116977. No. 237. From Tarsus, April 26, 1936.

116978. No. 458. From Kayseri, May 7, 1936.

116979. *NERINE FLEXUOSA* (Jacq.) Herb. Amaryllidaceae.

From the Union of South Africa. Seeds purchased from the Winton Nurseries, Bonnie Vale, Cape Province. Received July 31, 1936.

A South African bulbous perennial with four to six bright-green linear leaves a foot long and a scape 2 to 3 feet high, bearing an umbel of 10 to 20 pale-pink flowers an inch long.

116980. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

From Chile. Seeds purchased from Raymond Du Belloy, Santiago. Received July 29, 1936.

Native-grown Chilean alfalfa.

116981. *DUCHESNEA INDICA* (Andrews) Focke. Rosaceae.

From Peru. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received July 14, 1936.

Collected May 21, 1936, at Huarás, Ancash, at 3,000 m. altitude.

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identification, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

116982. VACCINIUM ARCTOSTAPHYLOS L.
Vacciniaceae.**Caucasian whortleberry.**

From the Union of Soviet Socialist Republics, Institute of Agriculture, Moscow, through Dr. G. L. Slate, New York Experiment Station, Geneva, N. Y. Received August 8, 1936.

A deciduous shrub up to 10 feet high, native to the Caucasus region. The oblong-ovate, finely toothed leaves are 2 to 4 inches long and turn purple red in the autumn. The small bell-shaped flowers are borne in racemes 2 inches long and are white with a purple tinge. The globose purple edible berries are neatly one-half inch in diameter.

For previous introduction see 101920.

116983 to 116995.

From the Union of South Africa. Seeds presented by Cheverton Buller, Stellenbosch, Cape Province. Received July 15, 1936.

A collection of plants native to southern Africa.

116983 to 116985. GLADIOLUS spp. Iridaceae.**116983. GLADIOLUS ALATUS L.**

A gladiolus with flowers of a delightful fragrance not unlike that of the sweet briar. The three upper petals are bright orange scarlet and the three lower ones are yellowish tipped with orange scarlet. The bulbs are not larger than ordinary peas and cannot survive long out of the ground.

For previous introduction see 106736.

116984. GLADIOLUS BLANDUS Ait.

A species with sword-shaped leaves somewhat shorter than the stem, which is from 6 inches to 24 inches and bears 3 to 10 white or reddish-tinted scentless flowers, each over an inch long.

For previous introduction see 113567.

116985. GLADIOLUS PSITTACINUS Hook.
Parrot gladiolus.

A gladiolus with a stout stem 3 feet or more in length and usually 4 rigid swordlike leaves up to 2 feet long. The many-flowered spike reaches a foot or more in length. The flowers are a rich yellow, grained and overlain with red, particularly about the margins of the segments.

For previous introduction see 110831.

116986. MIMETES HIRTA (L.) Knight. Proteaceae.

A very striking shrub 3 to 4 feet high, with leathery ovate-elliptic to oblanceolate leaves about 1 inch long and showy, bright-carmine bracts.

116987. ORNITHOGALUM SAUNDERSIAE Baker.
Liliaceae. Star-of-Bethlehem.

A bulbous plant with lanceolate leaves up to a foot long and white or yellow flowers in a dense raceme on a scape a foot or more high.

For previous introduction see 115827.

116988 to 116994. PROTEA spp. Proteaceae.**116983 to 116995—Continued.****116988. PROTEA BARBIGERA Meisn.**

An evergreen shrub up to 9 feet high with oblong-lanceolate leaves 3 to 7 inches long, sessile flower heads about 6 inches across, with conspicuously bearded involucre bracts, the whitish hairs about 2 inches long.

116989. PROTEA COMPACTA R. Br.

A shrub with strongly imbricated, ovate-lanceolate, coriaceous leaves 3 to 5 inches long and sessile flower heads 4 inches long and 2 inches broad. The outer bracts have a dense fringe of woolly hairs, the inner are flesh-colored to carmine, and the flowers are tawny to purplish tomentose with the stamens densely covered with long light-golden hairs.

For previous introduction see 102799.

116990. PROTEA CYNAROIDES L.

This is, perhaps, the finest of all the proteas and becomes 6 feet tall. The leaves vary from nearly orbicular to ovate, are 2 to 6 inches long, and have petioles from 2 to 5 inches long. The glabrous surfaces are prominently and reticulately veined on both sides. The sessile flower heads are 5 to 8 inches long and broad, and the ovate-lanceolate bracts in this form are clear pink and dove gray.

For previous introduction see 102800.

116991. PROTEA GRANDIFLORA Thunb.

A shrub or small tree 3 to 10 feet high, with oblong sessile shining leaves and large white flower heads which resemble a globe artichoke in appearance.

For previous introduction see 25847.

116992 and 116993. PROTEA MELLIFERA Thunb.
Sugarbush.

A glabrous shrub or small tree with narrowly lanceolate and rather blunt leaves. The whitish flower head is cup-shaped, 4 inches long and 3 inches wide. The inner bracts are rather longer than the pistils and the outer ones are short and wide, all very viscid and usually rosy pink. During the time of flowering the involucre is filled with sweet watery liquor which is an allurement to bees and to a host of other insects.

For previous introduction see 26207.

116992. A form with white bracts.

116993. A form with rose-pink bracts.

116994. PROTEA sp.

A form with rose-pink, black-hairy bracts.

116995. WATSONIA DENSIFLORA Baker.
Iridaceae. Buglelily.

Variety *alba*. A watsonia with stiff ensiform leaves up to 3 feet high and simple dense spikes about as tall with many pure-white flowers.

116996 and 116997. ZEPHYRANTHES spp.
Amaryllidaceae.

From Mexico. Bulbs purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Veracruz. Received August 11, 1936.

116996. Collected at 900 m. altitude near Zacuapam.

116996 and 116997—Continued.

116997. Collected at 2,000 m. altitude, Salto de Agua.

116998. *CHAMAELAUCIUM UNCINATUM* Schauer. Myrtaceae.

From California. Plant presented by Eric Walther, Golden Gate Park, San Francisco. Received July 29, 1936.

An erect bushy heathlike shrub with opposite hook-shaped linear leaves less than an inch long and small terminal corymbs of cream-colored flowers. Native to Western Australia.

For previous introduction see 86710.

116999. *ARISTOLOCHIA PAULISTANA* Hoehne. Aristolochiaceae.

From Brazil. Seeds presented by the Biological Institute of São Paulo, through F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, Cuba. Received July 23, 1936.

A high-climbing tropical vine with triangular-cordate leaves, obtuse at the apex, 3 to 6 inches long. The flower, yellowish purple spotted with blackish purple, has an ovate lip that is narrowed into a linear limb up to 8 inches in length. Native to São Paulo, Brazil.

117000. *SACCHARUM*. Poaceae.

Sugarcane.

From Trinidad, British West Indies. Cuttings presented by the Imperial College of Tropical Agriculture. Received July 3, 1936.

No. B. 2935.

117001 to 117004. *ELAEAGNUS* spp. Elaeagnaceae.

From the Union of Soviet Socialist Republics. Cuttings presented through Dr. I. M. Vavilov, Chief, Institute of Plant Industry, Leningrad. Received July 6, 1936.

117001. No. 24.

117002. No. 92. *Bepa*.

117003. No. 93. *Abahfapa*.

117004. No. 94.

117005 to 117012. *IPOMOEA BATATAS* (L.) Lam. Convolvulaceae. Sweetpotato.

From Australia. Tubers presented by Dr. H. Wenzholz, Director of Plant Breeding, New South Wales Department of Agriculture, Sydney. Received July 9, 1936.

A collection of locally grown varieties from Hawkesbury Agricultural College.

117005. *Ashburn*.

117006. *Early Butter*.

117007. *Farmer's Special*.

117008. *H. H. C. Pink*.

117009. *Quaker*.

117010. *Rosella*.

117011. *White Maltese*.

117012. *Wannop*.

117013 to 117015. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

From Turkey. Plants collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received July 11, 1936.

117013. No. 891-A. Wild alfalfa collected in the hills near Gemlik, June 20, 1936.

117014. No. 892. Wild alfalfa collected 25 km. north of Bursa, June 20, 1936.

117015. No. 893. Wild alfalfa collected 10 km. south of Bursa on the slopes of Mount Olympus, June 19, 1936.

117016. *PUCCINELLIA KENGIANA* Ohwi. (*Puccinellia stricta* Keng). Poaceae. Grass.

From China. Seeds presented by Y. L. Keng, Academia Sinica, National Research Institute of Biology, Nanking. Received July 1, 1936.

From Luho Ku, Kiangsu Province, May 23, 1936. Seeds collected in wheatfields by Charles E. DeVol. A loosely tufted, erect or decumbent annual grass about 18 inches tall. Native to Kiangsu Province, China.

117017 and 117018. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From Australia. Seeds presented by the American consulate, Melbourne, Victoria, through the Secretary of State, Washington, D. C. Received July 13, 1936.

Fair average quality Victorian wheat.

117019. *OCHROMA BICOLOR* Rowlee. Bombacaceae.

From Mexico. Seeds presented by Prof. M. Martinez, Mexico, D. F. Received July 1, 1936.

A tall tree, native to Costa Rica; one of the sources of the balsa wood of commerce.

117020 to 117040. *NICOTIANA* spp. Solanaceae. Tobacco.

From Peru. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received July 14, 1936.

Nos. 117020 to 117028 were collected in the Departamento Ancash.

117020 and 117021. *NICOTIANA GLUTINOSA* L.

117020. No. 142. May 25, 1936. From the Cañon del Pato, Rio Santa, between 1,500 and 1,800 m. altitude.

117021. No. 143. From Mayucayan at 1,400 m. altitude May 25, 1936.

117022 to 117039. *NICOTIANA TABACUM* L. Common tobacco.

Nos. 117022 and 117023 were collected at Huarás, May 21, 1936, at 3,025 m. altitude.

117022. No. 135. 117023. No. 136.

117024. No. 137. From Sacsacpampa, near Huarás, May 22, 1936, at 3,000 m. altitude.

117025. No. 138. From Huarás, May 22, 1936, at 3,025 m. altitude.

117026. No. 139. From Paria Huanca, May 24, 1936, at 2,800 m. altitude.

117020 to 117040—Continued.

117027. No. 140. From Macasca, May 23, 1936, at 3,300 m. altitude.

117028. No. 141. From Carhuaz, May 25, 1936, at 2,300 m. altitude.

Nos. 117029 to 117032 were collected in the Departamento Lambayeque, May 29 and 30, 1936.

117029. No. 144. From Motupe, at 150 m. altitude.

117030. No. 145. Syrian tobacco from Hacienda Cayalti, Saña, at 50 m. altitude.

117031. No. 146. *Monte Libano*. From the Hacienda Cayalti, Saña, at 50 m. altitude.

117032. No. 147. From Chiclayo, June 1, 1936. Seed of the 1932 Tumbes harvest.

Nos. 117033 and 117034 were collected in Bellavista, Provincia Jaen, Departamento Cajamarca, June 2, 1936, at 400 m. altitude.

117033. No. 148. 117034. No. 149.

117035. No. 150. From the Hacienda Pátapo, Chiclayo, Departamento Lambayeque, June 3, 1936, at 25 m. altitude.

Nos. 117036 to 117038 were collected in Tumbes, Departamento Piura, June 8, 1936, at 50 m. altitude.

117036. No. 151. From the Hacienda La Noria.

117037. No. 152. *Amarilla*. From the Estanco del Tabaco.

117038. No. 153. From the Sarumilla River.

117039. No. 154. From Colegio Seminario, Huarás, Departamento Ancash, May 23, 1936, at 3,025 m. altitude.

117040. *NICOTIANA UNDULATA* Ruiz and Pav.

No. 134. From Huarás, Departamento Ancash, May 21, 1936, at 3,025 m. altitude.

117041. *CRINUM* sp. Amaryllidaceae.

From Florida. Seeds presented by Wyndham Hayward, Winter Park. Received July 13, 1936.

Originally from Burma. A low-growing plant; the white flowers have linear petals very attractive and dainty; may be used as a pot plant.

117042. *ARISTEA* sp. Iridaceae.

From Florida. Seeds presented by Hamilton P. Traub, American Amaryllis Society, Orlando. Received July 8, 1936.

Originally from near St. Lucia Bay, Zululand. A variety with beautiful small blue flowers produced in wide sprays; an excellent bedding plant.

117043 to 117045.

From the Union of Soviet Socialist Republics. Seeds presented by Dr. A. Sementchenko, Director, North Caucasian Institute of Special and Technical Cultures, Krasnodar. Received July 13, 1936.

117043 and 117044. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

117043. No. 3952. 117044. No. 3951.

117043 to 117045—Continued.

117045. *LALLEMANTIA IBERICA* (Bieb.) Fisch. and Mey. Menthaceae.

No. 3958. A blue-flowered, herbaceous perennial, native to semi-arid regions in Asia Minor and Syria, whose seeds yield what is said to be a high-grade drying oil.

For previous introduction see 115193.

117046 to 117049.

From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received July 13, 1936.

117046. *ALBIZZIA SASSA* (Willd.) Macbride. Mimosaceae.

Presented by the Agricultural Research Station, Tanganyika Territory, Africa. A large handsome tree with attractive bipinnate foliage and numerous fasciated heads of white flowers with crimson-tipped stamens. Native to tropical Africa.

117047. *ALBIZZIA* sp. Mimosaceae.

Presented by the Agricultural Research Station, Tanganyika Territory, Africa.

117048. *CORDIA HOLSTII* Gurke. Boraginaceae.

Presented by A. Bircher, El Saff, Egypt. A catalpa-like tree with broad leaves and very delicate lacelike white flowers. The tree is used for planting along avenues.

For previous introduction see 51551.

117049. *MARKHAMIA HILDEBRANDTII* (Baker) Sprague. Bignoniaceae.

Presented by A. Bircher, El Saff, Egypt. A shrub or small tree with pinnate leaves 6 to 10 inches long and showy yellow flowers about 1½ inches long, in terminal and axillary panicles. Native to eastern tropical Africa.

117050 to 117081.

From Japan. Seeds presented by Dr. T. Nakai, Director, Botanic Garden of the University of Tokyo. Received July 1, 1936.

117050 to 117054. *BETULA* spp. Betulaceae. Birch.

117050. *BETULA ERMANI COMMUNIS* Koidz.

A variety differing from the type by its broad ovate leaves. Native to Japan.

117051. *BETULA ERMANI GANJUENSIS* (Koidz.) Nakai.

A variety differing from the type by its longer cones. Native to Japan.

117052. *BETULA SCHMIDTII* Regel.

A Japanese tree 65 feet high, with a trunk 3 to 7 feet in diameter, and black bark which falls off in thick, rather small plates. The finely-serrate leaves are short-stemmed, and the catkins are narrow, stiff, and erect.

For previous introduction see 76052.

117053. *BETULA MANDSHURICA JAPONICA* (Miq.) Rehd.

A hardy ornamental birch native to Japan, up to 75 feet high with broadly oval leaves.

For previous introduction see 82066.

117050 to 117081—Continued.

117054. *BETULA ULMIFOLIA* Sieb. and Zucc.

A large handsome tree up to 50 feet high, with yellowish-brown bark, ovate, irregularly doubly serrate, long-acuminate leaves 2 to 3½ inches long. Native to Japan and Manchuria.

For previous introduction see 104908.

117055. *HOMIOCELTIS ASPERA* (Thunb.) Blume. Ulmaceae.

An ornamental deciduous tree up to 60 feet high, with slender branches forming a dense head. The leaves are serrate ovate to ovate-oblong, broadly wedge-shaped at the base, long acuminate, and 3 to 3½ inches long. This tree is easily distinguished from *Celtis sinensis*, with which it is often confused, by the leaves with straight veins ending in the teeth. The small black drupes are inconspicuous. Native to Japan.

For previous introduction see 41391.

117056 to 117058. *HOSTA* spp. Liliaceae.

117056. *HOSTA GLAUCA* (Miq.) Stearn.

A perennial herb, native to Japan, with very glaucous cordate leaves 10 to 15 inches long. The slender pale-lilac, drooping flowers are borne on short stalks usually shorter than the leaves.

For previous introduction see 98325.

117057. *HOSTA JAPONICA TARDIFLORA* (Leichtlin) Bailey.

A form of the narrow-leaved plantainily with dark-green, long-pointed leaves on short, margined petioles and light-purple flowers appearing in autumn in branched racemes sometimes bearing as many as 50 flowers.

For previous introduction see 101781.

117058. *HOSTA VENTRICOSA* (Salisb.) Stearn.

A plantainily with broad cordate-ovate leaf blades about 10 inches long and lavender-purple flowers about 2 inches long in elongated racemes on scapes up to 3 feet tall. Native to China.

117059. *CELTIS SINENSIS* Pers. Ulmaceae.
Chinese hackberry.

A tree, native to China and Japan, which grows to a height of 60 feet. The broadly ovate leaves, 2 to 4 inches long, are cordate at the base and acuminate at the apex, with serrate-dentate margins. The solitary dull orange-red fruits are borne on stalks about as long as the petioles.

For previous introduction see 92047.

117060. *ILEX GENICULATA* Maxim. Aquifoliaceae.
Holly.

A slender-branched ornamental Japanese shrub, with deciduous ovate leaves which turn yellow in autumn, and bright red berries on slender pendulous stalks.

For previous introduction see 77165.

117061 to 117065. *IRIS* spp. Iridaceae.

117061 and 117062. *IRIS KAEMPFERI* Sieb. Japanese iris.

For previous introduction see 81669.

117050 to 117081—Continued.

117063. *IRIS LAEVIGATA* Fisch. Rabbit-ear iris.

For previous introduction see 114509.

117064. *IRIS SIBIRICA SANGUINEA* (Donn) Ker.

Received as *Iris nertchinskia*.

117065. *IRIS SETOSA* Pall. Arctic iris.

For previous introduction see 106559.

117066 to 117076. *RHODODENDRON* spp. Ericaceae.

117066. *RHODODENDRON ALBRECHTII* Maxim.

A shrub 3 to 5 feet high with obovate to oblanceolate membranous leaves which turn yellow in autumn. The rotate-campanulate, red-purple flowers, 2 inches across, in clusters of three to five, appear with the leaves. It is somewhat like *Rhododendron schlippenbachii* and is native to Japan.

For previous introduction see 114671.

117067. *RHODODENDRON DEGRONIANUM* Carr.

A native Japanese species, differing from *Rhododendron metternichii* in having a five-lobed corolla. *R. metternichii* is an evergreen shrub up to 4 feet high with oblong leaves 3 to 6 inches long, covered with rusty tomentum beneath. The campanulate, rose-colored, usually seven-lobed flowers are 1 to 2 inches across, spotted with purple and borne in clusters of 8 to 15.

For previous introduction see 98136.

117068. *RHODODENDRON FAURIAE* Franch.

A shrub 5 to 10 feet high, native to Japan, the branchlets clothed with thin loose white floccose tomentum. The oblong-elliptic to obovate leaves are 3 to 6 inches long, and the funnel-campanulate flowers, 1 inch long, borne in racemes of 12 to 15, are white or cream with a pink flush on the median lines of the petals and spotted inside with numerous green spots.

For previous introduction see 101228.

117069. *RHODODENDRON PENTAPHYLLUM* Maxim. Fiveleaf azalea.

A deciduous shrub up to 25 feet high, with, usually, five elliptic-lanceolate leaves at the ends of the branches. The rose-pink flowers, 1 to 2 inches across, are solitary or in twos, appearing before or with the leaves, which turn orange or crimson in the autumn. Native to Japan.

For previous introduction see 101961.

117070. *RHODODENDRON PULCHRUM* Sweet.

A handsome shrub with spreading hairy branches, elliptic leaves densely hairy beneath, and two or three terminal rosy-purple flowers 2 inches or more across. A hybrid between *Rhododendron ledifolium* and *R. indicum*.

For previous introduction see 78541.

117071. *RHODODENDRON QUINQUEFOLIUM* Biss. and Moore. Cork azalea.

A deciduous shrub or small tree up to 25 feet high, with broad-elliptic to

117050 to 117081—Continued.

ovate leaves about 2 inches long and white, green-spotted campanulate flowers about 2 inches across. Native to Japan.

For previous introduction see 114674.

117072. RHODODENDRON SEMIBARBATUM Maxim.

A deciduous shrub 2 to 10 feet high, with oval to ovate lanceolate leaves up to 2 inches long and solitary red-spotted white flowers about 1 inch across. It is related to *Rhododendron albiflorum* and is native to Japan.

117073. RHODODENDRON WEYRICHII Maxim.

A deciduous shrub up to 15 feet high, native to Japan and China. The broadly ovate to rhombic leaves, 1 to 3 inches long, are in clusters of 2 or 3 at the tips of the branchlets and turn vinous purple in autumn. The rotate-funneliform red flowers, 1 to 3 inches across, appear before or with the leaves.

For previous introduction see 102741.

117074. RHODODENDRON SUBLANCEOLATUM Miq.

An azalea, allied to *Rhododendron poukhanense*, with narrow elliptic to oblanceolate leaves up to 2 inches long and funneliform, rosy-red to crimson flowers about 3 inches across. Native to Japan.

117075. RHODODENDRON TSCHONOSKII Maxim.

A forest shrub, native to Japan, with flaky bark, elliptic leaves one-third of an inch long, and heads of one to four small white flowers.

For previous introduction see 114675.

117076. RHODODENDRON RETICULATUM D. Don.

A much-branched deciduous Japanese shrub up to 25 feet high, with yellow-brown branchlets and reticulate, broadly ovate leaves 2 to 3 inches long, in clusters of two to three. The slightly two-lipped rotate campanulate flowers are rosy purple to magenta and appear before the leaves. There are two forms, the ordinary form with 10 stamens, the so-called *Rhododendron rhombicum*, and a form with 5 stamens, the so-called *R. dilatatum*.

For previous introduction see 97401.

117077. ROMULEA PARLATORII Todaro. Iridaceae.

A crocuslike plant with narrow leaves and few small bright-lilac flowers. Allied to *Romulea ramiflora*. Native to the Mediterranean region.

117078. ROSA UCHIYAMANA Makino. Rosaceae. Rose.

A densely branched shrub about 6 feet high, with four to six leaflets and short few-flowered corymbose clusters of pink flowers about 2 inches across. It is related to *Rosa multiflora*. Native to Japan.

117079. STEWARTIA PSEUDO-CAMELLIA Maxim. Theaceae. Japanese stewartia.

A handsome tree, native to Japan, 50 feet high, with erect branches and red

117050 to 117081—Continued.

bark. The thickish obovate-lanceolate leaves are bright green, and the large white flowers are borne in summer.

For previous introduction see 102262.

117080. STYRAX SHIRAIANA Makino. Sty-racaceae.

A small tree with coarsely dentate, orbicular-ovate to rhombic-ovate leaves 2 to 3 inches long and showy white tubular flowers about two-thirds of an inch long in small crowded racemes. Native to Japan.

117081. ULMUS PARVIFOLIA Jacq. Ulma-ceae. Leatherleaf elm.

Received as *Ulmus sieboldii*, which is now referred to *U. parvifolia*.

117082 to 117084.

From Australia. Plants presented by George W. Althofer, "Nindethana," Dripstone, New South Wales. Received July 20, 1936.

117082. AMYGDALUS PERSICA L. Amygda-laceae. Peach.

Glen Ora.

117083 and 117084. MALUS SYLVESTRIS Mill. Malaceae. Apple.

117083. *Statesman.* **117084.** *Warrior.*

117085 to 117094. PRISTACIA VERA L. Anacardiaceae. Pistachio.

From the Union of Soviet Socialist Republics. Seeds presented by Miss Vera Gorbunova, Institute of Plant Industry, Leningrad. Received July 17, 1936.

Seeds collected in gardens of the Apshe-ron Peninsula, Caucasus region, by Miss Vera Gorbunova.

117085. No. 24. **117090.** No. 167.

117086. No. 132. **117091.** No. 171.

117087. No. 133. **117092.** No. 177.

117088. No. 146. **117093.** No. 186.

117089. No. 165. **117094.** No. 188.

117095 to 117297.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received July 2, 1936.

117095 to 117097. ABELMOSCHUS ESCULEN-TUS (L.) Moench. Malvaceae. Okra.

117095. No. 551. *Bamyas*. From the Eskisehir bazar, April 16, 1936.

117096. No. 120. *Bamyas*. From the Ankara bazar, April 15, 1936.

117097. No. 210. From Adana, April 20, 1936.

117098 to 117108. ALLIUM spp. Liliaceae.

117098 to 117103. ALLIUM CEPA L. Onion.

117098. No. 163. *Sogans*. From Afyon, April 17, 1936.

117099. No. 274. From Gaziantep, April 30, 1936. A red onion.

117100. No. 272. From Gaziantep, April 30, 1936. A white onion.

117095 to 117297—Continued.

117101. No. 293. From Kayseri, May 6, 1936.
117102. No. 96. From the Ankara bazar, April 15, 1936.
117103. No. 181. From Konya, April 18, 1936.
- 117104 and 117105. *ALLIUM PORRUM* L. **Leek.**
117104. No. 540. *Pirasa*. From the Eskisehir bazar, April 16, 1936.
117105. No. 111. *Pirasa*. From the Ankara bazar, April 15, 1936.
- Nos. 117106 to 117108 were collected near Gaziantep, May 2, 1936.
117106. *ALLIUM* sp.
No. 465-A.
117107. *ALLIUM* sp.
No. 480-A.
117108. *ALLIUM* sp.
No. 487-A.
- 117109 to 117112. *APIUM GRAVEOLENS* L. **Celery.**
Apiaceae.
- Nos. 117109 and 117110 were from the Ankara bazar, April 15, 1936.
117109. No. 87. 117110. No. 131.
117111. No. 239. From Tarsus, April 26, 1936.
117112. No. 267. From Gaziantep, April 20, 1936.
- 117113 to 117117. *BETA VULGARIS* L. **Common beet.**
Chenopodiaceae.
117113. No. 189. From Konya, April 18, 1936. Red beets.
117114. No. 247. From Tarsus, April 26, 1936.
117115. No. 281. From Gaziantep bazar, April 30, 1936.
- 117116 and 117117. From Kayseri bazar, May 6, 1936.
117116. No. 296. 117117. No. 299.
- 117118 to 117126. *BRASSICA* spp. **Brassicaceae.**
- 117118 and 117119. *BRASSICA OLERACEA CAPITATA* L. **Cabbage.**
117118. No. 255. From Gaziantep, April 30, 1936.
117119. No. 98. *Lahma*. From the Ankara bazar, May 15, 1936.
- 117120 to 117126. *BRASSICA RAPA* L. **Turnip.**
117120. No. 164. From Afyon, April 17, 1936. A red turnip.
- 117121 to 117123. From Konya, April 18, 1936.
117121. No. 166.
117122. No. 173.
117123. No. 182. A red turnip.
117124. No. 208. From the Adana bazar, April 20, 1936.

117095 to 117297—Continued.

117125. No. 292. From Kayseri, May 6, 1936.
117126. No. 148. From Afyon, April 17, 1936.
- 117127 to 117142. *CAPSICUM ANNUM* L. **Common redpepper.**
Solanaceae.
- 117127 and 117128. From the Ankara bazar, April 15, 1936.
117127. No. 97. A large pepper.
117128. No. 121. A long pepper.
- 117129 and 117130. From Afyon, April 17, 1936.
117129. No. 146. A long green pepper.
117130. No. 149. A large pepper.
- 117131 and 117132. From Konya, April 18, 1936.
117131. No. 178. A large pepper.
117132. No. 187. A long pepper.
- 117133 and 117134. From the Adana bazar, April 20, 1936.
117133. No. 211. A white pepper.
117134. No. 218. Mixed sample.
117135. No. 240. From the Tarsus bazar, April 26, 1936.
- 117136 and 117137. From Gaziantep, April 30, 1936.
117136. No. 275.
117137. No. 290. A large pepper.
- 117138 and 117139. From Kayseri, May 6, 1936.
117138. No. 294. A large red pepper.
117139. No. 310. A small pencil pepper.
117140. No. 392. From Afyon, April 17, 1936.
- 117141 and 117142. From the Eskisehir bazar, April 16, 1936.
117141. No. 526. *Tursuluk biber*.
117142. No. 536. *Dolmalik biber*.
117143. *CICER ARIETINUM* L. **Chickpea.**
Fabaceae.
- No. 550. From the Eskisehir bazar, April 16, 1936.
- 117144 to 117156. *CITRULLUS VULGARIS* Schrad. **Watermelon.**
Cucurbitaceae.
- 117144 to 117146. From the Ankara bazar, April 15, 1936.
117144. No. 102. A melon with black seeds.
117145. No. 105. A melon with white seeds.
117146. No. 135. *Kayuz*.
- 117147 to 117149. From Afyon, April 17, 1936.
117147. No. 143. A white watermelon.
117148. No. 151. A melon stored for winter use.
117149. No. 152. A melon with black seeds.

117095 to 117297—Continued.

- 117150 and 117151. From Konya, April 18, 1936.
 117150. No. 183.
 117151. No. 193. A melon with white seeds.
 117152. No. 2223. From the Adana bazar, April 20, 1936.
 117153. No. 246. From Tarsus, April 26, 1936.
 117154. No. 271. From Gaziantep, April 30, 1936.
 117155. No. 188. From Konya, April 18, 1936.
 117156. No. 527. *Karpus*. From the Eskisehir bazar, April 16, 1936.
 117157 to 117185. *CUCUMIS* spp. Cucurbitaceae.
 117157 to 117168. *CUCUMIS* MELO L. Muskmelon.
 117157. No. 547. From the Eskisehir bazar, May 16, 1936.
 117158. No. 124. From Ankara bazar, May 15, 1936.
 117159 and 117160. From Afyon, April 17, 1936.
 117159. No. 147. *Kirkagaç* or *kaoun*.
 117160. No. 154. *Siyah kabuklu hasan bey kaoun*.
 117161. No. 172. *Karun*. From Konya, April 18, 1936.
 117162. No. 209. A sweet melon from Adana, April 20, 1936.
 117163 and 117164. From Tarsus, April 26, 1936.
 117163. No. 243. 117164. No. 249.
 117165 to 117167. From Gaziantep, April 30, 1936.
 117165. No. 254. *Kilis*.
 117166. No. 259. *Aci kaoun*.
 117167. No. 279. *Bal kaoun*.
 117168. No. 517. From the Eskisehir bazar, April 16, 1936.
 117169 to 117185. *CUCUMIS* SATIVUS L. Cucumber.
 117169. No. 85. From the Ankara bazar, April 15, 1936.
 117170. No. 171. From Konya, April 18, 1936. A long cucumber.
 117171. No. 144. *Hiyar*. From Afyon, April 17, 1936.
 117172 and 117173. From Konya, April 18, 1936.
 117172. No. 177. A long cucumber.
 117173. No. 195. A short cucumber.
 117174 to 117176. From the Adana bazar, April 20, 1936.
 117174. No. 212.
 117175. No. 220. A long cucumber.
 117176. No. 224.
 247648—41—2

117095 to 117297—Continued.

- 117177 to 117179. From Tarsus, April 26, 1936.
 117177. No. 230.
 117178. No. 231. Seed imported from Arabia.
 117179. No. 233. Seed imported from Arabia.

No. 456. *Ali* or *dag*. From near Kayseri, May 6, 1936.
117392. *POA BULBOSA* L. Poaceae. **Grass.**
No. 337. Collected 10 km. northwest of Adana, April 23, 1936.
- 117393 to 117395. *RAPHANUS RAPHANISTRUM* L. Brassicaceae. **Radish.**
117393. No. 397. Collected 4 km. east of Selifke, April 26, 1936. A cultivated radish.
117394. No. 377. From Geyhan, April 22, 1936.
117395. No. 361. Collected 15 km. south of Adana, April 28, 1936. A yellow-flowered form.
117396. *SESAMUM ORIENTALE* L. Pedalia-Sesameae.
No. 282. From Gaziantep, April 30, 1936.
- 117397 to 117399. *SORGHUM VULGARE* Pers. Poaceae. **Sorghum.**
117397. No. 264-A. From Gaziantep, April 30, 1936. A white-seeded variety.
117398. No. 136. From the Ankara bazar, April 15, 1936.
117399. No. 232. From Tarsus, April 26, 1936.
- 117400 to 117417. *TRIFOLIUM* spp. Fabaceae. **Clover.**
117400. *TRIFOLIUM INCARNATUM* L. **Crimson clover.**
No. 441. Collected 20 km. south of Narle, May 4, 1936. A wild red clover.
- 117401 to 117403. *TRIFOLIUM PILULARE* Boiss.
Collected 20 km. south of Narle, May 4, 1936.
For previous introduction see 30100.
117401. No. 431.
117402. No. 437.
117403. No. 439.
- Nos. 117404 to 117407 were collected at Adana, April 20, 1936.
117404. *TRIFOLIUM* sp.
No. 334.
117405. *TRIFOLIUM* sp.
No. 335.
117406. *TRIFOLIUM* sp.
No. 336.
117407. *TRIFOLIUM* sp.
No. 355.
- Nos. 117408 to 117410 were collected between 25 km. and 40 km. west of Mersin, April 26, 1936.
117408. *TRIFOLIUM* sp.
No. 404.
117409. *TRIFOLIUM* sp.
No. 409.

117319 to 117438—Continued.

117410. *TRIFOLIUM* sp.
No. 411.
Nos. 117411 to 117413 were collected 20 km. south of Narle, May 4, 1936.
117411. *TRIFOLIUM* sp.
No. 432.
117412. *TRIFOLIUM* sp.
No. 436.
117413. *TRIFOLIUM* sp.
No. 442.
117414. *TRIFOLIUM* sp.
No. 462. From Adana, April 20, 1936.
117415. *TRIFOLIUM* sp.
No. 419. From Gaziantep, May 1, 1936.
117416. *TRIFOLIUM* sp.
No. 328. *Hop clover*. Collected 40 km. northwest of Adana, April 23, 1936.
117417. *TRIFOLIUM* sp.
No. 443. From 20 km. south of Narle, May 4, 1936.
117418. *TRIGONELLA FOENUM-GRÆCUM* L. Fabaceae. **Fenugreek.**
No. 298. *Chaman*. From Kayseri, May 6, 1936.
For previous introduction see 114457.
- 117419 to 117423. *TRITICUM AESTIVUM* L. Poaceae. **Common wheat.**
117419. No. 159. From Afyon, April 17, 1936.
A mixed sample.
Nos. 117420 to 117423 were collected at Gaziantep, April 30, 1936.
117420. No. 269. *White Harran* wheat.
117421. No. 263. Summer wheat.
117422. No. 288. *Red Urfa* wheat.
117423. No. 252. *Red Harran* wheat.
- 117424 to 117432. *VICIA* spp. Fabaceae. **Vetch.**
117424. *VICIA ANGUSTIFOLIA* Grufberg.
No. 318. From Adana, April 22, 1936.
- 117425 to 117430. *VICIA SATIVA* L. **Common vetch.**
117425. No. 420. Collected 40 km. east of Gaziantep, May 3, 1936.
Nos. 117426 to 117430 were collected at the Cotton Experiment Station, Adana, April 28, 1936.
117426. No. 383.
117427. No. 381. *Bulgarian* No. 3.
117428. No. 380. *Bulgarian* No. 5.
117429. No. 387. *Bulgarian* No. 1.
117430. No. 388. *Bulgarian* No. 4.
117431. *VICIA ERVILIA* (L.) Willd.
No. 168. Konya, April 18, 1936. Used as stock feed.

117319 to 117438—Continued.

117432. *VICIA PEREGRINA* L.

No. 340. From Adana, April 20, 1936.

117433. *LATHYRUS GORGONI* Parl. Fabaceae.

No. 353. From Adana, April 20, 1936.

117434 to 117438. *ZEA MAYS* L. Poaceae. Corn.117434. No. 520. *Cin misiri*. From the Eskisehir bazar, April 16, 1936.

117435. No. 109. From the Ankara bazar, April 15, 1936.

117436. No. 153. *Misir*. From Afyon, April 17, 1936.117437. No. 530. *Misir*. From the Eskisehir bazar, April 16, 1936.

117438. No. 250. From Gaziantep, April 30, 1936.

117439 to 117459.

From India and Afghanistan. Seeds and bulbs collected by Walter Koelz, Bureau of Plant Industry. Received July 18, 1936.

Unless otherwise stated, this material was received as seeds from India.

117439. *BAUHINIA VARIEGATA* L. Caesalpiniaceae.

No. 927. From Oot, Mandi State, May 30, 1936 at 3,500 feet altitude. A tree which becomes 30 feet high, with leaves 3 to 4 inches wide and five-petaled flowers 4 inches across in short racemes, the lowest petal of each strongly marked with crimson. The rose-colored veins are variegated with red and yellow. The pod is 1 to 2 feet long. Native to India.

117440. *BOMBAX* sp. Bombacaceae.

No. 917. *Shirmi*. From Baijnath, Kangra Valley, Punjab, May 22, 1936. A large handsome tree which becomes 75 feet high and 2½ feet in diameter, with branches at the top. The flowers are larger and more attractive than those of *Bombax malabaricum*, and the tree will tolerate a light frost.

117441. *CENTAUREA* sp. Asteraceae.

No. 906. *Gundung ghul*. From Kabul, Afghanistan, at 600 feet altitude, May 17, 1936. A plant with very large, bright-cobalt blue flower heads; said to be wild.

117442 to 117444. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

Collected at Lahore, Punjab, May 20, 1936.

117442. No. 909. *Lucknow kharbuza*. Said to have come from Lucknow. Fruits golden yellow, smooth, half compressed, 6 inches in diameter, no conspicuous ribs; strong musky odor, not unpleasant. Flesh 1 inch thick, white to salmon, sweet, edible to the papery skin. A splendid keeper.

117443. No. 910. Said to have come from Montgomery, Punjab. Fruit smooth, rounded, 6 by 4 inches, yellow with or without broad green rib lines; ribs more or less conspicuous; flesh 1½ inches thick, usually salmon, sweet and fragrant. A good keeper.

117439 to 117459—Continued.

117444. No. 911. Variety *Pathankat*.

Said to have come from Montgomery, Punjab. Fruit smooth, not ribbed, 7 by 4 inches, yellow, fragrant; flesh three-fourths of an inch thick; salmon, rather acid but agreeable.

117445. *ERYTHRINA* sp. Fabaceae.

No. 923. From Oot, Mandi State, May 30, 1936. A tree up to 40 feet with thorny branches. The attractive scarlet flowers appear in the spring before the leaves.

117446. *FICUS* sp. Moraceae.

No. 918. *Jangli anjir*. From Baijnath, Kangra Valley, Punjab, at 3,000 feet altitude, May 22, 1936. An ornamental tree with large soft leaves; fruit large, 2 inches long, rose purple, insipid, and borne on the trunk.

117447. *DUCHESNEA INDICA* (Andrews) Focke. Rosaceae.

No. 930. From Bandrole, Kulu, Punjab.

117448. *GREWIA ASIATICA* L. Tiliaceae.

No. 928. *Kopal*. From Mandi, Mandi State, May 30, 1936. Fruit deep rose-purple, elongate, three-fourths of an inch long, pleasantly acid. Sold in the market in large quantities.

117449. *HOLARRHENA ANTIDYSENTERICA* (Roth) Wall. Apocynaceae.

No. 921. From Baijnath, Kangra Valley, Punjab, at 3,000 feet altitude May 23, 1936. A small ornamental tree whose leaves are fed to cattle. Flowers white to cream-colored, very fragrant. Native throughout India.

For previous introduction see 61607.

117450. *MORUS ALBA* L. Moraceae. White mulberry.

No. 904. *Tut*. From Nimle, Afghanistan, May 17, 1936. Tree 2½ feet in diameter, attractive form and foliage; fruit nearly an inch long, white, some carpels tinted pink purple, exceedingly sweet.

117451. *NARCISSUS* sp. Amaryllidaceae.

No. 932. *Bhote phul*. From Kulu, Kulu, Punjab, June 1, 1936. Bulbs of a plant with attractive heads of yellow-cupped, fragrant white flowers, borne abundantly in November in the lower limits of the range, in March in the upper range; will not stand freezing.

117452. *OUGEINIA DALBERGIOIDES* Benth. Fabaceae.

No. 925. From Oot, Mandi State, May 30, 1936. A small tree, covered in early spring with large pink flowers. The leaves are pinnately three-foliolate, with rigid, leathery rounded leaflets. Native to northern India up to 4,000 feet altitude.

117453. *PAPAVER* sp. Papaveraceae.

No. 908. From Nimle, Afghanistan, May 17, 1936. A plant 5 feet high, with pink, very double flowers 4 inches in diameter; collected in a garden.

117439 to 117459—Continued.

117454. *PRUNUS ARMENIACA* L. Amygdalaceae.
Apricot.

No. 929. *Sharra*. From Kulu, Kulu, Punjab, at 4,000 feet altitude, May 31, 1936. Tree up to 30 feet high, vigorous and productive; fruit usually about 1 inch in diameter.

117455 to 117457. *RUBUS* spp. Rosaceae.

From Baijnath, Kangra Valley, Punjab, at 3,000 feet altitude. May 22 and 23, 1936.

117455. *RUBUS ELLIPTICUS* J. E. Smith.
Yellow Himalayan raspberry.

No. 913. A compact scandent shrub 10 feet high, which bears large numbers of golden-yellow fruits about three-eighths of an inch in diameter; these are small-seeded, subacid, not strongly fragrant, but very pleasant. The plant tolerates light frost and is found in the Himalayas from about 3,000 to 5,000 feet altitude.

For previous introduction see 115987.

117456. *RUBUS RUGOSUS* J. E. Smith.

No. 915. A scandent shrub sometimes 30 feet tall, with very small, blackish fruits rather insipid in flavor. Native to the temperate Himalayas from 3,000 to 7,000 feet altitude.

For previous introduction see 32450.

117457. *RUBUS* sp.

No. 920. Fruits very small, black-purple, of good flavor but not freely borne.

117458. *SAPINDUS EMARGINATA* Vahl. Sapindaceae.
Soapberry.

No. 931. *Ritha*. From Bandrole, Kulu, Punjab, May 31, 1936. A large attractive deciduous tree with small fruits which, when dried and pulverized, are used as a substitute for soap.

117459. *SOLANUM* sp. Solanaceae.

No. 916. From Baijnath, Kangra Valley, Punjab, at 3,000 feet altitude, May 22, 1936. A shrub 4 feet high with bright-orange fruits about one-fourth of an inch in diameter.

117460 and 117461.

From Cuba. Seeds presented by Robert M. Grey. Superintendent. Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received August 11, 1936.

117460. *CEPHALOCEREUS BROOKSIANUS* Britt. and Rose. Cactaceae.

A stout columnar cactus up to about 18 feet high, much branched at the base, with 8 or 9 obtuse ribs, yellow acicular spines, and small white night-blooming flowers. Native to Cuba.

117461. *HARRISIA FERNOWI* Britton. Cactaceae.

A night-flowering cactus with slender upright cylindrical stems to about 9 feet high and large white funnel-form flowers borne singly near the ends of the branches. Native to Cuba.

117462 to 117486.

From New Zealand. Plants presented by H. R. Wright, Avondale, Auckland. Received August 19, 1936.

117462 to 117464. *AMYGDALUS PERSICA* L. Amygdalaceae.
Peach.

117462. *Early Elberta Cling*. A clingstone, color and quality very fine and nearly as large as *J. H. Hale*.

117463. *Purple Gem*. A cross between *Amygdalus persica* var. *Rubra*, an ornamental red-foliaged peach, and a yellow-fleshed commercial variety. Although not large, this fruit has a particularly fine flavor and is a very juicy freestone with cream-colored flesh. The tree is an immense cropper and ornamental, with its red foliage and bark in the spring.

117464. *Quality Queen*. A superb canning or bottling peach; color and texture excellent.

117465 to 117473. *CITRUS* spp. Rutaceae.

117465. *CITRUS GRANDIS* (L.) Osbeck.
Grapefruit.

Merthyr. Originally from Australia.

117466. *CITRUS SINENSIS* (L.) Osbeck.
Orange.

Chaffey's Late. Originally from Australia.

117467. *CITRUS NOBILIS DELICIOSA* (Ten.) Swingle.
Mandarin orange.

Sovereign. Originally from Australia.

117468 and 117469. *CITRUS SINENSIS* (L.) Osbeck.
Orange.

117468. *Wright's Navel*. A new Zealand variety.

117469. *Harvard's Late*. A new Zealand variety.

117470. *CITRUS* sp.

Yuzu. Originally from Japan.

117471. *CITRUS* sp.

Daidai. Originally from Japan.

117472. *CITRUS* sp.

Yankan. Originally from Taiwan.

117473. *CITRUS* sp.

Mediterranean Blood. Originally from India.

117474. *CITRUS* sp.

Dehra Dun. Originally from India.

117475. *CITRUS* sp.

Excelsior. Originally from India.

117476. *CITRUS* sp.

Butwal. Originally from India.

117477. *CITRUS* sp.

Chinese Everbearing. Originally from India.

117478. *CITRUS* sp.

Colombia. Originally from India.

117479 to 117484. *MALUS SYLVESTRIS* Mill. Malaceae.
Apple.

117479. No. 1. Three-blooded *Delicious* seedling from New Zealand, first *Spy* × *Ribstone Pip*, then back on *Delicious*.

117462 to 117486—Continued.

117480. *Paradise* on aphid-proof stock from Australia.
 117481. *Glengyle Red* on *English Paradise* Malling No. 2.
 117482. *Glengyle Red* on aphid-proof stock, *Spy* × *Ribstone Pip*.
 117483. *Glengyle Red* on aphid-proof stock, *Inn's Seedling*.
 117484. *Irish* apple. Originally from Ireland.
 117485. *PRUNUS* sp. Amygdalaceae. *Allobokhara*. An Indian plum.
 117486. *PRUNUS* sp. Amygdalaceae. *Latest of All*. A New Zealand variety.

117487. *MANGIFERA INDICA* L. Anacardiaceae. **Mango.**

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received August 14, 1936.
 From Bombay.

117488. *AMYGDALUS PERSICA* L. Amygdalaceae. **Peach.**

From Canada. Budsticks presented by Howard Fisher, Dulverton Fruit Farm, Queenston, Ontario. Received August 22, 1936.

Howard Fisher. A sport of the *Valiant* peach.

117489 to 117506. *TRITICUM AESTIVUM* L. Poaceae. **Common wheat.**

From Australia. Seeds grown at the Glen Innes Experiment Farm and presented through Dr. H. Wenzholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received August 26, 1936.

A collection of wheats which have proved resistant to leaf rust at the Glen Innes Experiment Farm.

117489. *Argentine* C 8681.
 117490. *Argentine* C 9556.
 117491. *Argentine* K 33, C 9655.
 117492. *Argentine* K 40, C 9658.

 117502. *Uruguay* C 10836.
 117503. *Uruguay* 386, C 10838.
 117504. *Uruguay* 392, C 10837.
 117505. *Varonne* C 6146.
 117506. *Vencedor* C 9654.

117507 to 117510. *MANGIFERA INDICA* L. Anacardiaceae. **Mango.**

From Jamaica. Budsticks presented by Miss Zora Neale Hurston, Kingston. Received August 28, 1936.

117507. *Calcutta*.
 117508. *Governor*.
 117509. *Paw Paw*.

117510. *St. Julian*. A very sweet, highly flavored variety which begins to bear at an early age.

117511. *RUBUS PHOENICOLASIVS* Maxim. Rosaceae. **Wineberry.**

From China. Seeds presented by H. K. Fu, Director, Botanic Garden, the Sun Yat-Sen Tomb and Memorial Park Commission. Received August 22, 1936.

A tall subscented Japanese bramble with slender branches, trifoliolate leaves 5 to 7 inches long, and small pink flowers. The ovoid-oblong fruits are scarlet, three-fourths of an inch long, and edible but without much flavor.

For previous introduction see 92300.

117512 to 117529. *TRITICUM AESTIVUM* L. Poaceae. **Common wheat.**

From Australia. Seeds grown at the Glen Innes Experiment Farm and presented through Dr. H. Wenzholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received August 28, 1936.

117530 to 117532.

From Burma. Seeds from the Tavoy District, presented by C. E. Parkinson, Forest Botanist, Forest Research Institute, Dehra Dun. Received August 6, 1936.

117530. *BAMBUSA LONGISPICULATA* Gamble. Poaceae. **Bamboo.**

Tabindaing bamboo.

117531. *CEPHALOSTACHYUM BURMANICUM* Parker and Parkinson. Poaceae. **Bamboo.**

Kyatwa bamboo. A clump bamboo similar to *Cephalostachyum pergracile*, but larger. The deep rich green, erect culms are more than 40 feet tall. Native to Burma.

117532. *DENDROCHLOA DISTANS* Parkinson. Poaceae. **Bamboo.**

Tamyin. A bamboo forming loose clumps with stems reaching a maximum height of 60 feet, very long internodes, and linear-lanceolate leaves about 2 feet long. Native to Burma.

117533 to 117573.

From Brazil. Seeds collected at Rio de Janeiro by W. A. Archer, Bureau of Plant Industry. Received August 17, 1936.

117533 and 117534. *ABELMOSCHUS ESCULENTUS* (L.) Moench. Malvaceae. **Okra.**

Cultivated okra collected July 23, 1936.

117533. No. 3486. *Quiabo chifre veado*.

117534. No. 3470. *Quiabo*.

117535. *ALLIUM CEPA* L. Liliaceae. **Onion.**

No. 3478. *Cebolla Rio Grande*. An onion with golden yellow skin; the only onion sold in the market; July 23, 1936.

117536 and 117537. *ALLIUM SATIVUM* L. Liliaceae. **Garlic.**

Purchased in the market, July 25, 1936.

117536. No. 3497. 117537. No. 3498.

117538. *ALLIUM SCHOENOPRASUM* L. Liliaceae. **Chives.**

No. 3479. *Cebolinho*. From the market, July 23, 1936.

117539 to 117543. *ARACHIS HYPOGAEA* L. Fabaceae. **Peanut.**

Purchased from wholesale houses at Rio de Janeiro, Brazil, July 25 and 28, 1936.

117539. No. 3499. A cultivated peanut grown in the State of Minas Geraes.

117540. No. 3500. *Tatú*. From the State of São Paulo; considered to be the best quality.

117541. No. 3501. *Tatú*. Common grade of peanut, from Santa Catharina.

117542. No. 3502. *Paraguay* type. Considered better than *Tatú*. From Rio Grande do Sul.

117543. No. 3503. A cultivated peanut said to have come from the State of São Paulo.

117544. *ASPARAGUS OFFICINALIS* L. Convallariaceae. **Garden asparagus.**

No. 3492. *Esparagos*. From the general market at Rio de Janeiro, July 23, 1936.

117533 to 117573—Continued.

117545. *AVENA SATIVA* L. Poaceae. **Oats.**

No. 3477. *Aveia*. From a seed store in Rio de Janeiro, July 23, 1936, but said to have come originally from Peru.

117546 to 117549. *BRASSICA* spp. Brassicaceae.

From a seed store in Rio de Janeiro, July 23, 1936.

117546. *BRASSICA CAMPESTRIS* L. **Rutabaga.**

No. 3496. *Nabiça*. A cultivated turnip.

117547. *BRASSICA RAPA* L. **Turnip.**

No. 3495. *Couve nabica*. A cultivated turnip.

117553. *CANAVALLIA ENSIFORMIS* (L.) DC. Fabaceae. **Jackbean.**

No. 3475. *Feijão mucuna branco*. Used as a forage plant. From a seed store in Rio de Janeiro, July 23, 1936; originally from Peru.

117554 and 117555. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. **Watermelon.**

From a seed store in Rio de Janeiro, July 23, 1936.

117554. No. 3480. *Melancia Santa Barbara*.

117555. No. 3474. *Melancia do Rio Grande*.

117556 and 117557. *CUCUMIS ANGURIA* L. Cucurbitaceae. **West Indian gherkin.**

Mexico. From a seed store in Rio de Janeiro, July 23, 1936. A small fruit like a round spiny cucumber, used boiled as a vegetable.

117556. No. 3469. 117557. No. 3494.

117558 and 117559. *CUCUMIS MELO* L. Cucurbitaceae. **Muskmelon.**

From a seed store in Rio de Janeiro, July 23, 1936.

117558. No. 3468. *Melão*.

117559. No. 3487. *Melão cavillon*.

117533 to 117573—Continued.

117560 and 117561. *CUCUMIS SATIVUS* L. Cucurbitaceae. **Cucumber.**

From the general market at Rio de Janeiro, July 23, 1936.

117560. No. 3485. *Pepino para conserva*. A form used for pickling.

117561. No. 3471. *Pepinos*.

117562. *CUCURBITA PEPO* L. Cucurbitaceae. **Pumpkin.**

No. 3488. *Abobora Brasileira Assucarada*. From the market at Rio de Janeiro, July 23, 1936.

117563 to 117567. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. **Tomato.**

From the general market, Rio de Janeiro, July 23, 1936.

117563. No. 3464. *São Paulo*. A common and popular red variety resembling a plum, irregularly globose and bilocular.

117564. No. 3472. *Tomate grande*.

117565. No. 3490. *Tomate Rio Grande de Fosso*.

117566. No. 3489. *Tomate garrafinha*.

117567. No. 3491. *Tomate Paulista Japonês*.

117568 and 117569. *NICOTIANA TABACUM* L. Solanaceae. **Tobacco.**

117568. No. 3484. *Fumo*. From the general market at Rio de Janeiro, July 23, 1936. Said to be mixed varieties of cultivated tobacco grown in the Federal District.

117569. No. 3506. *São Gonçalo*. Presented by the Brazilian Department of Agriculture in Rio de Janeiro, July 29, 1936. Seed originally from the State of Bahia where the best grades of tobacco are grown.

117570 and 117571. *PISUM SATIVUM* L. Fabaceae. **Pea.**

Ervilha. From the general market, Rio de Janeiro, July 23, 1936. Pods flat, twice as large as ordinary green peas; when half mature the pods are cooked as a vegetable.

117570. No. 3466. 117571. No. 3467.

117572. *SOLANUM MELONGENA* L. Solanaceae. **Eggplant.**

No. 3481. *Gilo*. From the general market Rio de Janeiro, July 23, 1936.

117573. *STIZOLOBIUM ATERRIMUM* Piper and Tracy. Fabaceae. **Velvetbean.**

No. 3476. *Mucuna preta*. From the general market, Rio de Janeiro, July 23, 1936. Cultivated as a forage plant; seed originally from Peru.

117574 to 117585.

From South America. Seeds and bulbs collected by Mrs. Ynez Mexia, Bureau of Plant Industry. Received August 27, 1936.

Unless otherwise stated, the material collected was seeds.

117574 to 117585—Continued.

117574. *AGROSTIS PALUSTRIS* Huds. Poaceae. **Creeping bent.**

No. 7940-A. From Tierra del Fuego, eastern coast of Argentina. Found in open places in *Nothofagus* woods.

117575. *ARAUCARIA* sp. Pinaceae.

No. 8024-A. From Arequipa, Peru, April 29, 1936, at 2,400 m. altitude. A tree about 18 m. high found on a rocky hill in the garden of the old observatory.

117576. *CYPELLA HERRERAE* Diels. Iridaceae.

No. 8025-A. *Michi-Michi*. *Supay-Ttica*. May 1936. From the fortress Sacsahuaman, Departamento Cuzco, Peru, between 3,000 and 3,600 m. altitude. A *Cypella* with stiff stems up to 1 m. high, long linear leaves, and violet-blue flowers. Native to Peru.

117577. *CYPELLA* sp. Iridaceae.

No. 8079-A. May 16, 1936. From Cerro Macchu-Picchu, Provincia Urubamba, Peru, at 3,200 m. altitude. A perennial herb 4 to 6 dm. high. Flowers not seen.

117578. *DESCHAMPSIA PULCHRA* Nees and Mey. Poaceae. **Grass.**

No. 7984-A. April 9, 1936. From the Last Hope Inlet, Terretoria Magallanes, Chile, on a marshy flat at the foot of Mount Dorothy. A tall tufted grass native to Chile.

117579. *ELYMUS ANTARCTICUS* Hook. f. Poaceae. **Grass.**

No. 7946-A. From Tierra del Fuego, eastern coast of Argentina. An erect grass about 6 dm. high with leathery leaves. Native to southern South America.

117580. *HYMENOCALLIS AMANCAES* (Ruiz and Pav.) Nichols. Amaryllidaceae. **Spiderlily.**

No. 8099. Bulbs collected June 21, 1936, in Provincia Pachacamac, Departamento Lima, Peru, in dry washes of arid coastal foot hills. Flowers large, canary yellow with green ribs.

117581. *MIKANIA* sp. Asteraceae.

No. 7857-A. February 15, 1936. Departamento Curico, Chile, on the road to Argentina, at 1,200 m. altitude. A scandent shrub with pink, slightly fragrant flowers.

117582. *MUCUNA* sp. Fabaceae.

No. 8037-A. *Aguacengua*. From Heda, on the Rio Sembra, La Selva Valley, Provincia La Convencion, Peru, at 1,500 m. altitude. A vine with huge clusters of gorgeous scarlet flowers.

117583. *URCEOLINA* sp. Amaryllidaceae.

No. 7871-A. February 13, 1936. Bulbs collected on the road from Curico to Argentina beyond Los Queñes, Departamento Curico, Chile, at 1,200 m. altitude. A common plant with crimson flowers fading to green at the base.

117584. (Undetermined.)

No. 7994-A. April 9, 1936. From the Last Hope Inlet, Terretoria Magallanes, Chile, at the base of Mount Dorothy. A perennial herb said to have pink, very fragrant flowers.

117574 to 117585—Continued.

117585. (Undetermined.)

No. 7945-A. March 18, 1936. From Viamonte, south of Cabo Penas, east coast of Tierra del Fuego, Argentina. A perennial herb with yellow flowers found in a meadow near a pond at 20 m. altitude.

117586. CITRUS sp. Rutaceae.

From Egypt. Budwood presented by Thomas W. Brown, Horticultural Section, Ministry of Agriculture, Giza. Received September 10, 1936.

Persian seedless lime.

117587. GOSSYPIUM BARBADENSE L. Malvaceae. Sea-island cotton.

From the British West Indies. Seeds presented by S. H. Evelyn, Cotton Research Officer, Cotton Experiment Station, Empire Cotton Growing Corporation, St. Vincent. Received August 24, 1936.

Strain A N. (Selfed seed.)

117588 and 117589.

From Argentina. Seeds presented by the Director of Agriculture, Buenos Aires, through Samuel J. Record, Yale University, New Haven Conn. Received September 5, 1936.

117588. ARAUCARIA RAUCANA (Molina) Koch. (*A. imbricata* Pav.). Pinaceae.

117589. MAYTENUS BOARIA Molina. Celastraceae. **Mayten.**

For previous introduction see 52591.

117590. LALLEMANTIA IBERICA (Bieb.) Fisch. and Mey. Menthaceae.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanic Garden, Kiev, Ukraine. Received September 9, 1936.

For previous introduction and description see 117045.

117591. ARTOCARPUS COMMUNIS Forst. Moraceae. Breadfruit.

From Puerto Rico. Cuttings presented by Atherton Lee, Puerto Rico Agricultural Experiment Station, Mayaguez. Received September 16, 1936.

A tree, native to the East Indies, 30 to 40 feet high, with viscid milky juice and leathery ovate leaves 3 feet long, entire at the base but divided above into three to nine lobes. The large fruits, 4 to 6 inches in diameter, are often seedless, but when seeds are present they are much the size, shape, and flavor of chestnuts.

For previous introduction see 105735.

117592 to 117595.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received September 4, 1936.

117592. FRITILLARIA sp. Liliaceae.

No. 903-A. From Birtüjek, July 22, 1936.

117593. GAGEA sp. Liliaceae.

No. 908-A. From 10 km. southeast of Gaziantep.

117592 to 117595—Continued.

117594. MUSCARI sp. Liliaceae.

No. 928-A. From 44 km. northeast of Malatya, July 17, 1936.

117595. (Undetermined.)

No. 905-A. From Birtüjek, July 22, 1936.

117596. VITIS VINIFERA L. Vitaceae. European grape.

From the Union of South Africa. Cuttings presented by J. C. van Jaansveld, Government Viticultural Station, Paarl, Cape Province, through Prof. A. I. Perold, Stellenbosch University, Cape Colony. Received September 19, 1936.

Bonnet De Retord.

117597. HIPPEASTRUM PSITTACINUM (Ker.) Herb. Amaryllidaceae.

From Brazil. Bulbs collected by W. A. Archer, Bureau of Plant Industry. Received September 19, 1936.

No. 3690. Collected August 14, 1936, at Rio de Janeiro. A hippeastrum with six to eight leaves over 1 foot long and a stout scape 2 to 3 feet long, bearing an umbel of two to four flowers with oblong undulate perianth segments 4 to 5 inches long, green with crimson stripes and edges. Native to Brazil.

117598. CURIMA COLOPHYLLA O. F. Cook. Phoenicaceae. Palm.

From Puerto Rico. Seeds presented by Atherton Lee, Superintendent, Puerto Rico Agricultural Experiment Station, Mayaguez. Received September 16, 1936.

A spiny palm, endemic to the limestone hills of northern Puerto Rico, a region of about 70 inches rainfall. The trunk grows 20 to 30 feet tall with a diameter of 5 or 6 inches. The pinnae of the leaves are broad and truncate as in *Tillia*, but are evenly set along the rachis instead of being clustered. The fruits, borne in large clusters, are round and red like cherries, with a red acid pulp surrounding the hard black seeds.

117599. COMBRETUM sp. Combretaceae.

From China. Seeds presented by A. N. Steward, Department of Botany, College of Agriculture and Forestry, University of Nanking, Nanking. Received April 30, 1934. Numbered in September 1936.

F. 59. Collected at Chang An, Yung Hsien.

117600 to 117653. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by Dr. H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received August 28, 1936.

117654 to 117677. NICOTIANA TABACUM
L. Solanaceae. Common tobacco.
 From Brazil. Seeds collected by W. A.
 Archer, Bureau of Plant Industry. Re-
 ceived August 28, 1936.
 Nos. 117654 to 117674 were collected in
 the State of Minas Geraes in August 1936.
 117654. No. 3617. From Lagoa Santa.
 Volunteer tobacco 8 feet tall; leaves
 slightly viscid; corolla margins dark
 red.
 117655. No. 3618. From Venda Nova.
 Volunteer tobacco 8 feet tall, leaves
 slightly viscid; corolla greenish below,
 dirty white above.
 117656. No. 3619. From Venda Nova.
 Volunteer tobacco, 8 feet high, leaves
 slightly viscid; corolla greenish at first
 and then pink-lipped.
117657 to 117671. From Bello Horizonte,
August 3, and 8, 1936. Cultivated to-
bacco presented by Abelardo de Albu-
querque Sarmaneto, Chief of the Ser-
viço de Fomento do Fumo, Secretaria
de Agricultura do Estado de Minas
Geraes.

117654 to 117677—Continued.

117672. No. 3663. *Chinese*. Introduced from China; the cured leaf is bright yellow.

117673. No. 3664. *Amarelinho*. Leaves bright yellow when cured.

117674. No. 3665. *Samsun*. Turkish tobacco. The cured leaf is bright yellow.

117675. No. 3671. *Mata garrapata*. From Cajeo do Sol, Serra de Cipó, August 5, 1936. A plant 5 feet tall with narrow lanceolate leaves; corolla whitish below, cerise above; leaves slightly viscid, young fruits and stems very viscid. This volunteer tobacco is used for smoking by the country people.

117676. No. 3672. *Mata garrapata*. From Cajeo do Sol, Serra do Cipó, August 5, 1936. A volunteer tobacco 5 to 7 feet tall with leaves broader than No. 3671 [P. I. 117675]; young fruits and stems very viscid, leaves only slightly so; corolla green above, pink below.

117677. No. 3507. Volunteer tobacco from a dooryard in Quintino Bocaiuva, a station on the interurban railway between Rio de Janeiro and Belém, July 29, 1936.

117678. × PRUNUS DASYCARPA Ehrh. Amygdalaceae. Plum-apricot.

From the Union of Soviet Socialist Republics. Cuttings presented by N. I. Sharapov, Department of New Cultures and Introduction, Institute of Plant Industry, Leningrad. Received February 13, 1936. Numbered in September 1936.

For previous introduction see 113534.

117679 to 117682.

From the Union of Soviet Socialist Republics. Scions presented by N. I. Sharapov, Department of New Cultures, Institute of Plant Industry. Received March 15, 1932. Numbered in September 1936.

117679. AMYGDALUS PERSICA L. Amygdalaceae. Peach.

117703. TEPHROSIA VOGELII Hook. f. Fabaceae.

From Kenya Colony, Africa. Seeds purchased from the Mount Elgon Nurseries, Kama Kola, Mount Elgon, Kitale. Received September 26, 1936.

A variety with purple flowers.

117704 to 117711.

From Egypt. Seeds presented by Thomas W. Brown, Director, Horticultural Section, Ministry of Agriculture, Giza. Received September 28, 1936.

117704. ANTIGONON LEPTOPUS Hook. and Arn. Polygonaceae. *Rosa-de-montana*.

A handsome summer-blooming climber, native to Mexico, and adapted for greenhouse culture or for growing out-of-doors in the far south. The flowers, with rose-pink sepals, are in many-flowered racemes.

For previous introduction see 111207.

117705. CARICA PAPAYA L. Papayaceae. Papaya.

117706. OLEA EUROPAEA L. Oleaceae. Olive.

117707 to 117711. SOLANUM spp. Solanaceae.

117707. SOLANUM INDICUM L.

A much-branched, prickly undershrub up to 8 feet high, with sinuate or lobed, ovate leaves 3 to 6 inches long and lateral racemes of many blue flowers with corollas about 1 inch across. Native to tropical India.

117704 to 117711—Continued.

117708. SOLANUM MACRANTHUM Dunal.
Nightshade.

A very rapid-growing tree with large dark-green spiny leaves and a great profusion of large blue-violet flowers which change color from day to day, becoming a pale blue and later fading to white.

For previous introduction see 101294.

117709. SOLANUM PYRACANTHUM Jacq.
Nightshade.

A prickly evergreen bush about 3 feet high, with blue flowers in racemes sometimes 6 inches long. The bright-red, round fruits are edible. Probably native to tropical Africa.

For previous introduction see 115288.

117710. SOLANUM TORVUM Swartz.
Nightshade.

117711. SOLANUM WARSCEWICZII Lambert.
Nightshade.

An erect spiny shrubby nightshade about 6 feet high, with large soft green leaves and racemes of many large white flowers followed by shining pale-yellow fruits. Probably native to South America.

117712 to 117739. TRITICUM AESTIVUM L.
Poaceae. Common wheat.

From Australia. Seeds presented by Dr. H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received September 2, 1936.

- 117885 to 117889. CUCURBITA PEPO L. Cucurbitaceae. Pumpkin.
117885. No. 3517. *Abobora Italiana*, Italian pumpkin.
117886. No. 3518. *Abobora amarella*, A yellow pumpkin.
117887. No. 3551. *Abobora balcia*, Giant pumpkin.

117838 to 117967—Continued.

117888. No. 3572. *Abobora não lastra*.
117889. No. 3573. *Courge d'Italie ou Coucourzelle*.
- 117890 and 117891. DAUCUS CAROTA L. Apiaceae. Carrot.
117890. No. 3530. *Cenoura meia longa*. A medium long carrot.
117891. No. 3575. *Cenoura vermelha comprico*. A medium long carrot.
- 117892 to 117895. LACTUCA SATIVA L. Cichoriaceae. Garden lettuce.
117892. No. 3536. *Alface repolhuda*, a head lettuce.
117893. No. 3527. *Alface sem rival*.
117894. No. 3602. *Alface romana*.
117895. No. 3576. *Alface São Francisco*.
117896. LEPIDIUM SATIVUM L. Brassicaceae. Garden cress.
- No. 3523. *Agrião da terra*. Cultivated as a garnish.
- 117897 to 117900. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.
117897. No. 3543. *Tomate péra*.
117898. No. 3544. *Tomate grande liso*.
117899. No. 3552. *Tomate Rei Umberto*.
117900. No. 3580. *Tomate liso vermelho*. A smooth crimson tomato.
- 117901 to 117906. PHASEOLUS spp. Fabaceae. Bean.
117901. PHASEOLUS LUNATUS L. Lima bean.
- No. 3646. Cultivated for forage.
- 117902 to 117905. PHASEOLUS VULGARIS L. Common bean.
117902. No. 3548. *Feijão de vagem*. A green bean.
117903. No. 3539. *Feijão anão*. A dwarf bean.
117904. No. 3598. *Feijão carioca*. Grown locally.
117905. No. 3599. *Feijão enoifre*. Grown locally.
117906. PHASEOLUS sp.
- No. 3662. *Oró*. Soil-binding drought-resistant plant, cultivated for forage.
- 117907 to 117910. PISUM SATIVUM L. Fabaceae. Pea.
117907. No. 3600. *Ervilha*. Grown locally.
117908. No. 3558. *Ervilha torta de flor rôxa*. A pea with red flowers.
117909. No. 3562. *Ervilha torta*. A red-flowered pea.
117910. No. 3541. *Ervilha anã*. A dwarf pea.
117911. NASTURTIUM OFFICINALE R. Br. Brassicaceae. Watercress.
- No. 3522. *Agrião d'agua*.

117838 to 117967—Continued.

- 117912 to 117914. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.
117912. No. 3553. *Rabinete longo*. A long radish.
117913. No. 3566. *Rabinete Isaías*.
117914. No. 3510. *Rabinete comprido*. A long radish.
117915. *RUMEX ACETOSA* L. Polygonaceae. No. 3537. *Azedinha*. Cultivated as greens in Brazil. For previous introduction see 55605.
- 117916 to 117918. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.
117916. No. 3519. *Giló branco*. A white eggplant.
117917. No. 3542. *Beringela róxa redonda*. A round red eggplant.
117918. No. 3570. *Beringela róxa comprida*. A long red eggplant.
- 117919 and 117920. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.
117919. No. 3521. *Espinafre*.
117920. No. 3545. *Espinafre perpetual*. A perennial spinach.
117921. *VICIA FABA* L. Fabaceae. Broadbean. No. 3583. *Fabas*. Grown at Capella Nova.
117922. *VICIA ANGUSTIFOLIA* Grufberg. Fabaceae. Vetch. No. 3658. Grown for forage.
117923. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea. No. 3597. *Feijão miúdo*. Grown locally.
117924. *ACROCOMIA SCLEROCARPA* Mart. Phoenicaceae. Macauba palm. No. 3669. *Coco macahuba*. A beautiful palm 40 feet high, with a very spiny trunk, particularly when young. The finely pinnate leaves are graceful and drooping, and the large bunches of fruit, green with brown scurfy hairs at the basal portion, are valued for the oil they produce. For previous introduction see 98483.
117925. *ARAUCARIA BRASILIANA* A. Rich. Pinaceae. Brazilian araucaria. No. 3585. *Pinhão de Barbacena*. Native to Minas Geraes. The edible nuts are sold in the markets. For previous introduction see 43383.
117926. *CENTROSEMA PUBESCENS* Benth. Fabaceae. No. 3640. For previous introduction see 110898.
- 117927 and 117928. *PACHYRHIZUS EROSUS* (L.) Urban. Fabaceae. No. 3638. A red-seeded variety native to Brazil.
117928. No. 3639. *Jacatupé*, a black-seeded variety.

117838 to 117967—Continued.

117929. *CALOPOGONIUM BRACHYCARPUM* Benth. Fabaceae. No. 3641. *Oró falso*. Presented by the State Experiment Station "Fazenda de Gamelleira," Bello Horizonte, State of Minas Geraes, August 8, 1936. A small often prostrate twining vine with trifoliate leaves and small violet or purple flowers. Native to tropical America.
117930. *CLITORIA TERNATEA* L. Fabaceae. No. 3661. A cultivated forage plant. For previous introduction see 110178.
117931. *TEPHROSIA ADUNCA* Benth. Fabaceae. No. 3635. A prostrate perennial with compound leaves; cultivated as a cover crop. For previous introduction see 64033.
117932. *TEPHROSIA PURPUREA* (L.) Pers. Fabaceae. No. 3613. From Lagoa Santa, August 3, 1936. A prostrate perennial with compound leaves; cultivated as a cover crop. For previous introduction see 103629.
- 117933 to 117938. *CROTALARIA* spp. Fabaceae.
117933. *CROTALARIA ANAGYROIDES* H. B. K. No. 3655. Cultivated as forage.
117934. *CROTALARIA JUNCEA* L. Sunn-hemp. No. 3645. Cultivated as forage and for its fiber. For previous introduction see 98841.
117935. *CROTALARIA RETUSA* L. No. 3653. Cultivated as forage and for its fiber. For previous introduction see 107463.
117936. *CROTALARIA STRIATA* DC. No. 3652. Cultivated for forage.
117937. *CROTALARIA USARAMOENSIS* Baker f. No. 3656. Cultivated for forage.
117938. *CROTALARIA* sp. No. 3637. Forage crop, native to Brazil.
117939. *DAHLIA*. Asteraceae. No. 3561. A hybrid dahlia of unknown parentage, with single flower heads of various color combinations.
- 117940 and 117941. *DIANTHUS CARYOPHYLLUS* L. Silenaceae. Carnation. No. 3559. *Cravos extra*.
117941. No. 3560. *Cravos dobrados variados*. (Mixed colors.)
117942. *ERIOSEMA BENTHAMIANUM* Mart. Fabaceae. No. 3610. A shrubby legume 2 to 3 feet high, native to Brazil.
117943. *EUCHLAENA MEXICANA* Schrad. Poaceae. Teosinte. No. 3644. Cultivated as forage.

117838 to 117967—Continued.

- 117944 and 117945. *HELIANTHUS ANNUUS* L. Asteraceae. Common sunflower.
117944. No. 3651. *Girasol branco*; a selected strain cultivated for the oil of the seed.
117945. No. 3647. *Girasol preto*. Cultivated for the oil of the seed, but considered not so good as No. 3651. [P. I. 117944.]
117946. *LUPINUS MUTABILIS* Sweet. Fabaceae. South American lupine. No. 3584. *Tremoço*. From Argentina.
117947. *MAURITIA FLEXUOSA* L. f. Phoenicaceae. Palm. No. 3670. *Coco Burity*. A palm, native to tropical Brazil, which grows to a height of 150 feet with a trunk 30 inches in diameter. The leaves are from 9 to 16 feet long. This is one of the so-called ivory-nut palms. The fruit is spherical, about the size of a small apple, and covered with smooth reticulated scales. The spadix, loaded with fruit, is of immense weight, often more than two men can carry. For previous introduction see 98522.
117948. *DESMODIUM BARBATUM* (L.) Benth. Fabaceae. No. 3643. *Barbadinho*. A tropical American legume up to 2 feet high, used as forage.
117949. *ORBIGNYA MACROCARPA* Barb.-Rodr. Phoenicaceae. Palm. No. 3668. *Côco babassú*. One of the large forest palms of Brazil, with oil-bearing seeds which are collected and exported in large quantities to Europe and the United States. The oil is used in the same manner as coconut oil.
- 117950 *ORBIGNYA* sp. Phoenicaceae. Palm. No. 3667. *Côco tudeyá*.
- 117951 and 117952. *ORYZA SATIVA* L. Poaceae. Rice. Grown in the State of Minas Geraes.
117951. No. 3592. *Triangulo*.
117952. No. 3591. *Minera*.
- 117953 and 117954. *PANICUM MAXIMUM* Jacq. Poaceae. Guinea grass. Cultivated as forage.
117953. No. 3649. *Capim murumbú* or *capim colônião*. Native to the northern part of the State of Minas Geraes.
117954. No. 3642. *Capim sempre verde*.
117955. *PASPALUM MANDIOCANUM* Trin. Poaceae. No. 3657. *Capim gengibre*. Cultivated as forage. A slender-stemmed grass about 2 feet high. Native to Brazil.
117956. *PENNISETUM SETOSUM* (Swartz) L. Rich. Poaceae. Grass. No. 3648. *Capim elefante brasileiro*. Cultivated as forage.
117957. *PHASEOLUS CALCARATUS* Roxb. Fabaceae. Rice bean. No. 3659. *Feijão chinéz*.

117838 to 117967—Continued.

117958. *SESBANIA* sp. Fabaceae. No. 3650. *Cabralia*. Cultivated as forage.
- 117959 and 117960. *TRIMEZA JUNCIFOLIA* (Klatt) Benth. and Hook. Iridaceae. From Serra de Cipó, State of Minas Geraes. An iris-like plant with one to three rigid cylindrical leaves 1 to 2 feet high and a shorter leafless stem with a single cluster of bright-yellow fugitive flowers about an inch long. Native to Brazil, where it grows in sandy rocky soil.
117959. No. 3676.
117960. No. 3675. (Bulbs.)
- 117961 to 117967. *ZEA MAYS* L. Poaceae. Corn.
117961. No. 3593. *Milho alho*. Locally grown.
117962. No. 3594. *Milho pipoco*. Cultivated popcorn.
117963. No. 3595. *Milho pipoco*. Cultivated popcorn.
117964. No. 3596. *Milho alho*. Locally grown.
117965. No. 3601. *Milho pipoco*. Grown at Serra Mines.
117966. No. 3654. *Milho indigeno* (*Milho alho*).
117967. No. 3666. *Milho crystal*. This strain bears four full-sized ears on each stalk.
- 117968 to 117987. From Turkey. Seeds and bulbs collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received September 4, 1936. Nos. 117968 to 117978 were received as bulbs.
- 117968 to 117986. *ALLIUM* spp. Liliaceae.
117968. *ALLIUM* sp. No. 911. From 25 km. southeast of the Elaziz Mountains, July 13, 1936.
117969. *ALLIUM* sp. No. 912. From 25 km. southeast of the Elaziz Mountains, July 13, 1936.
117970. *ALLIUM* sp. No. 913. From 30 km. southeast of the Elaziz Mountains, July 13, 1936.
117971. *ALLIUM* sp. No. 914. From 52 km. southwest of Elaziz, July 14, 1936.
117972. *ALLIUM* sp. No. 916. From 50 km. north of Malatya, July 17, 1936.
117973. *ALLIUM* sp. No. 921. From Buruyek, July 22, 1936.
117974. *ALLIUM* sp. No. 922. From 45 km. north of Nigde, July 26, 1936.
117975. *ALLIUM* sp. No. 923-A. From 10 km. northwest of Buruyek, July 23, 1936.

117968 to 117987—Continued.

117976. *ALLIUM* sp.

No. 924-B. From 10 km. northwest of Buruyck, July 23, 1936.

117977. *ALLIUM* sp.

No. 925-C. From 10 km. northwest of Buruyck, July 23, 1936.

117978. *ALLIUM* sp.

No. 926-D. From 10 km. northwest of Buruyck, July 23, 1936.

Nos. 117979 to 117987 were received as seeds.

117979. *ALLIUM* sp.

No. 911-A. From southeast of Elaziz, July 13, 1936.

117980. *ALLIUM* sp.

No. 912-A. From 25 km. southeast of Elaziz, July 13, 1936.

117981. *ALLIUM* sp.

No. 913-A. From 30 km. southeast of Elaziz, July 13, 1936.

117982. *ALLIUM* sp.

No. 914-A. From 52 km. southwest of Elaziz, July 14, 1936.

117983. *ALLIUM* sp.

No. 916-A. From 50 km. north of Malatya, July 17, 1936.

117984. *ALLIUM* sp.

No. 921-A. From Buruyck, July 22, 1936.

117985. *ALLIUM* sp.

No. 922-A. From 45 km. north of Nigde, July 26, 1936.

117986. *ALLIUM* sp.

No. 923-A. From 10 km. northwest of Buruyck, July 23, 1936.

117987. *AMYGDALUS* sp. Amygdalaceae.

No. 910. From 5 km. east of Buruyck, July 6, 1936.

117988 to 118000.

From Brazil. Seeds and plants collected by W. A. Archer, Bureau of Plant Industry. Received September 9, 1936.

Unless otherwise mentioned, the material was received as seeds.

117988. *ANANAS COMOSUS* (L.) Merr. Bromeliaceae. Pineapple.

No. 3689. From the Serra do Cipó, eastern Minas Geraes, August 5, 1936. Suckers of a cultivated pineapple; the fruits are small but of extremely good flavor and the flesh is white. Apparently a local variety and long cultivated here.

117989. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

No. 3688. From Itãocara, State of Rio de Janeiro, August 13, 1936. Presented by the agency of Secretaria de Agricultura in Rio de Janeiro.

117990. *BARBACENIA* sp. Velloziaceae.

No. 3691. From Serra do Cipó, eastern Minas Geraes, August 5, 1936. A species with scented leaves, found in barren soil among rocks.

117988 to 118000—Continued.

117991. *GALACTIA SCARLATINA* (Mart.) Taub. Fabaceae.

No. 3693. From Serra do Cipó, eastern Minas Geraes, August 5, 1936. A twining suffrutescent vine with trifoliolate leaves, the elliptic leaflets about 2 inches long, and numerous showy red flowers in axillary clusters. Native to Brazil.

117992. *LAVOISIERA FRANCAVILLANA* Cogn. Melastomaceae.

No. 3692. From Serra do Cipó, State of Minas Geraes, August 5, 1936. Received as "variety longiciliata," for which a place of publication has not been found. A shrub about 3 feet high, with leathery oblong-lanceolate, light-green leaves, covered with long silky hairs, appressed against the stem. The flowers are rose-colored.

117993 to 117996. *NICOTIANA TABACUM* L. Solanaceae. Tobacco.

117993. No. 3687. *Salomichi*. Cultivated tobacco from Serra do Cipó, eastern Minas Geraes, August 5, 1936. Seed apparently from Europe.

117994. No. 3586. From Bello Horizonte, Minas Geraes, August 2, 1936. Volunteer tobacco, 8 feet high, leaves slightly gummy; flowers pale green, edges of corolla tinged dull pink.

117995. No. 3616. From Lagoa Santo, State of Minas Geraes, August 3, 1936. Volunteer tobacco 3 feet high; corolla greenish white below, mottled red above; leaves slightly viscid.

117996. No. 3686. *Goumã*. From Serra do Cipó, eastern Minas Geraes, August 5, 1936. Cultivated tobacco; seed apparently from Europe.

117997. *PHYSOCALYX* sp. Scrophulariaceae.

No. 3694. From Serra do Cipó, eastern Minas Geraes, August 5, 1936. An attractive shrub with showy flowers in terminal, leafy racemes.

117998. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 3685. *Ervilha torta flor róxa*. From Serra do Cipó, Minas Geraes, August 5, 1936. A cultivated pea, said to have been imported from Europe, cooked in the pod as a vegetable.

117999. *TRIMEZA JUNCIFOLIA* (Klatt) Benth. and Hook. Iridaceae.

No. 3675. From Serra do Cipó, Minas Geraes, August 5, 1936. Found growing in sandy soil.

For previous introduction and description see 117960.

118000. *ZEA MAYS* L. Poaceae. Corn.

No. 3684. From Rio de Janeiro, August 12, 1936. Cultivated popcorn.

118001. *STROPANTHUS GRATUS* (Wall. and Hook.) Baill. Apocynaceae.

From Cuba. Seeds presented by the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos. Received September 18, 1936.

Presented by the Department of Agriculture, Gold Coast, West Africa. A rank-growing woody creeper, with pinkish-white flowers in terminal clusters and enormous fruits nearly 3 feet long. Native to tropical Africa.

118001—Continued.

For previous introduction see 67745.

118002 to 118004. FRAGARIA VESCA L.
Rosaceae. **Strawberry.**

From Switzerland. Seeds presented by Emil Mauser, Samenhandlung, Rathausbrocke, Zürich. Received September 28, 1936.

118002. Rügen. An everbearing variety.

118003. Baron Solemacher. An everbearing variety, of large size.

118004. Baron Solemacher Weiss. A light-colored variety.

118005 and 118006. ALLIUM spp. Liliaceae.

From Turkey. Bulbs and seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received September 4, 1936.

From 10 km. northwest of Buruyek, in the Toros Mountains, July 23, 1936.

118005. ALLIUM sp.
No. 900. (Bulbs.)

118006. ALLIUM sp.
No. 926-A. (Seeds.)

118007 to 118098.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received September 3, 1936.

118007 to 118010. AMYGDALUS spp. Amygdalaceae.

118007 to 118009. AMYGDALUS PERSICA L.
Peach.

118007. No. 974. Aru. From Chamba, Chamba State, at 3,000 feet altitude, July 12, 1936. A small tree 8 inches in diameter, fruit white, freestone, 1½ inches in diameter, of good flavor.

118008. No. 975. Aru. From Chamba, Chamba State. A yellow-fleshed, beaked, clingstone peach, 2¼ inches in diameter. This variety is found from 3,000 to 7,500 feet altitude.

118009. No. 1008. Aru. From Srinagar, Kashmir, July 20, 1936. Presented by the Government Gardens. Fruit well marked with crimson, 1½ inches in diameter; a white-fleshed freestone of good quality. Said to be one of the Saharanpur varieties and, as such, grows in extreme heat. Here it tolerates mild freezes.

118010. AMYGDALUS sp.

No. 939. From Kukti, Chamba State, July 4, 1936, at 9,000 feet altitude. Tall slender trees, 3 or 4 inches in diameter and 40 feet high, which resemble willows from a distance. Fruit 1 inch in diameter. Should be a fine ornamental.

118011. ANDROSACE sp. Primulaceae.

No. 936. *Kukti Nulla*; From Lahul, Punjab, July 1, 1936. An herb with attractive heads of pink flowers, found on dry ground.

118007 to 118098—Continued.

118012. ANEMONE sp. Ranunculaceae.

No. 937. From Reling, Chamba State, July 2, 1936, at 14,000 feet altitude. Flowers yellow, backed more or less with indigo. Attractive clumps to 2 feet.

118013. AQUILEGIA sp. Ranunculaceae.

No. 981. From the Kalatop Forest, Dalhousie, Punjab, July 12, 1936. A plant 2½ feet high, with glaucous foliage, found in the shade. The few flowers are deep wine colored without fragrance and appear early.

118014 and 118015. BRASSICA RAPA L.
Brassicaceae. **Turnip.**

From Partan, Kashmir, July 22, 1936. Collected in the market.

118014. No. 1023. A greenish rutabaga, common on the market, up to 4 inches in diameter, mild and of good flavor.

118015. No. 1022. Said to be red-rooted and globular.

118016. CAESALPINIA SEPIARIA Roxb. Caesalpiniaceae. **Mysore thorn.**

No. 978. From Khajjar, Chamba State, July 11, 1936. A thorny shrub sometimes 10 feet high, semiscandent, with long racemes of orange or yellow flowers.

For previous introduction see 103116.

118017 to 118023. CITRULLUS VULGARIS
Schrad. Cucurbitaceae. **Watermelon.**

118017 to 118021. *Tarbusa*. From Lahore, Punjab, July 14, 1936, but of unknown source.

118017. No. 984. Fruit elongate, 16 inches long, pale green, lightly and finely netted. Flesh of good quality, but low in sugar.

118018. No. 985. A pale-green elongate fruit 18 inches long with longitudinal blotching. Flesh good, but not very sweet.

118019. No. 986. A dark-green globular fruit, 18 inches in diameter, with red flesh.

118020. No. 987. A dark-green globular fruit 12 inches in diameter; flesh of good texture and sweet.

118021. No. 991. A pale-green sub-globose fruit 8 inches in diameter, lightly netted.

118022. No. 1005. *Tarbusa*. From Lake Dal, Kashmir, July 19, 1936. A dark-green globose fruit 12 inches in diameter which is indistinguishable externally from the regular red-seeded form.

118023. No. 1037. *Hendvend*. From Srinagar, Kashmir, at 5,200 feet altitude, July 24, 1936. A pale-green elongated fruit 18 inches long, with cloud stripes of darker green. Grown on rafts in the lake.

118024. CORYLUS sp. Betulaceae.

No. 969. *Tangi*. From Chamba, Chamba State, July 12, 1936. Said to have come from Pangli. A large ornamental tree that grows in the walnut-fir zone. The nuts have a good flavor and are not so woody as our bush hazels.

118007 to 118098—Continued.

118025 to 118031. *CUCUMIS* spp. Cucurbitaceae.

118025 to 118029. *CUCUMIS* MELO L. Muskmelon.

118025. No. 967. *Kharbuza*. From Chamba, Chamba State, July 12, 1936. A smooth, nearly globular orange fruit, 6 inches in diameter, with pronounced ribs and fragrant orange flesh.

Nos. 118026 to 118028 were from Lahore, Punjab, July 14, 1936.

118026. No. 988. *Kharbuza*. Said to have come from Neahey. A smooth globular orange fruit with prominent ribs. The fragrant orange flesh is sweet with no musky flavor.

118027. No. 989. *Kharbuza*. Said to have come from Lucknow. A smooth yellow compressed fruit 8 by 4 inches, nearly unribbed, and sometimes netted with green. Flesh white to salmon, but the white flesh is usually the best; sweet with attractive flavor.

118028. No. 992. *Lada*. Said to have come from Chaman. Fruit elongate, 18 inches long, yellow to gold, well netted. A variety of very favorable reputation.

118029. No. 999. *Kharbuza*. Said to have come from Kobat, North West Frontier Province. A pale-yellow, slightly netted cigarlike fruit, 1 foot long, with sweet and very attractive yellow flesh.

118030 and 118031. *CUCUMIS SATIVUS* L. Cucumber.

118030. No. 952. *Kakri*. From Chamba Brahmaur, Chamba State, July 7, 1936. Said to be a cucumber of ordinary size and shape.

118031. No. 1038. *Dadar*. From Srinagar, Kashmir, July 25, 1936. A water-grown cucumber; planted on floating rafts.

118032 to 118034. *CUCURBITA* spp. Cucurbitaceae.

118032. *CUCURBITA MAXIMA* Duchesne. Squash.

No. 972. From Chamba, Chamba State, July 12, 1936. Described as a squash that attains a very large size.

118033 and 118034. *CUCURBITA PEPO* L. Pumpkin.

From Chamba, Chamba State, July 12, 1936.

118033. No. 971. Said to have an elongate fruit which weighs 30 pounds. Vines very vigorous and climb over houses and trees.

118034. No. 970. Said to be a small turban-squash, cream-colored to deep orange, 6 inches in diameter.

118035. *DAUCUS CAROTA* L. Apiaceae. Carrot.

No. 961. *Gadjar*. From Chamba, Chamba State, July 10, 1936. Said to be a mixture of local races.

118007 to 118098—Continued.

118036. *DELPHINIUM* sp. Ranunculaceae. Larkspur.

No. 953. From Brahmaur, Chamba State, July 7, 1936. A perennial about 3 feet high, found usually on dry grassy slopes. The flowers are beautiful deep sky blue.

118037 to 118039. *FRAGARIA* spp. Rosaceae. Strawberry.

118037. *FRAGARIA* sp.

No. 935. *Paljur*. From Kukti Nulla, Lahul, Punjab, June 30, 1936. Small fruits, one-half inch in diameter and of poor flavor.

118038. *FRAGARIA* sp.

No. 940. From Kukti, Chamba State, July 4, 1936, at 9,600 feet altitude. Growing in pine forest; fruits in clusters of 1 to 3 and one-fourth inch in diameter; sweet and well-flavored.

118039. *FRAGARIA* sp.

No. 980. From Dalhousie, Punjab, in the Kalatop Forest, at 7,000 feet altitude, July 12, 1936. Plants up to 8 inches in height, with sweet crimson fruits one-half inch in diameter.

118040. *HAMAMELIS* sp. Hamamelidaceae.

No. 950. From Hursar, Chamba State, July 5, 1936. An enormous shrub 20 feet high, with branches 6 inches in diameter. Grows in shade or sun. Attractive form and leaves. All plants seen were laden with fruit.

118041. *HYPERICUM* sp. Hypericaceae.

No. 977. From Khajvas, Chamba State, 6,500 feet altitude, July 11, 1936. A dense ornamental shrub 3½ feet high, with abundant golden flowers. Grows in part shade or sun.

118042. *IRIS* sp. Iridaceae.

No. 1015. From Partan, Kashmir, July 22, 1936, at 5,000 feet altitude.

118043. *LONICERA* sp. Caprifoliaceae.

No. 976. From Chamba, Chamba State, July 12, 1936. Found in dense forest at 5,000 feet altitude. A scraggly shrub about 10 feet high, with very attractive scarlet berries.

118044 and 118045. *MANGIFERA INDICA* L. Anacardiaceae. Mango.

Aru. From Jammu State, July 16, 1936. Fruits almond-shaped, sweet, but with little flesh. All the wild northern forms are "suckling mangoes" and have much fiber, but are cold tolerant.

118044. No. 996. Fruits green, 2½ inches high.

118045. No. 997. Fruits green, yellow and scarlet, about 1¾ inches high.

118046. *MORUS* sp. Moraceae.

No. 954. From Brahmaur, Chamba State, July 7, 1936, at 7,500 feet altitude. A huge tree over 30 feet in circumference with attractive foliage. The small red fruits, about 1 inch long, are said to be very good. The tree tolerates snow for 3 months and probably zero Fahrenheit, but the ground freezes only about 12 inches. The tree grows also at lower elevations and could probably be used as an ornamental.

118007 to 118098—Continued.

- 118047 to 118054. *ORYZA SATIVA* L. Poaceae. Rice.
118047. No. 983. *Lal chaul*. From Chamba, Chamba State, July 11, 1936. A wet rice with low heat requirements. Planted now and harvested in October.
118048. No. 1000. *Nwar*. From Verinag, Kashmir, July 16, 1936, at 6,400 feet altitude. One of the good rices of the State, and there are said to be about 200 varieties.
118049. No. 1001. *Dad Kaver*. From Verinag, Kashmir, July 16, 1936, at 6,400 feet altitude. A red rice, not widely cultivated here.
118050. No. 1017. *Bozan*. From Partan, Kashmir, July 22, 1936, at 5,000 feet altitude. Said to be a white rice, but not particularly recommended. Grown in water.
118051. No. 1018. *Babri Biol*. From Partan, Kashmir, July 22, 1936, at 5,000 feet altitude. A wet rice, described as one of the best grown in Kashmir.
118052. No. 1019. *Moghul biol*. From Partan, Kashmir, July 22, 1936, at 5,000 feet altitude. A wet rice, said to be one of the best white rices grown in Kashmir.
118053. No. 1020. *Bava*. From Partan, Kashmir, July 22, 1936, at 5,000 feet altitude. A wet rice, said to be one of the best grown in Kashmir.
118054. No. 1035. *Lulanza*. From the Srinagar bazar, Kashmir, July 23, 1936. Said to be one of the best of the Kashmir rices.
118055. *PEDICULARIS* sp. Scrophulariaceae. No. 946. From Kukti, Chamba State, July 5, 1936, at 10,000 feet altitude. A perennial with very attractive large yellow flowers in heads 6 inches long. Most species of *Pedicularis* here grow in wet peaty soil.
- 118056 to 118065. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.
- 118056 to 118060. *Rong*. Climbing beans with edible pods. Nos. 118056 and 118057 were collected at Brahmaur, Chamba State, July 7, 1936.
118056. No. 956. 118057. No. 957.
- 118058 to 118060. From Chamba, Chamba State, July 10, 1936.
118058. No. 960.
118059. No. 968.
118060. No. 982.
- 118061 to 118065. *Razma*. From Srinagar, Kashmir, July 7 to 23, 1936. Used as green beans and also as dried beans.
118061. No. 1027.
118062. No. 1028.
118063. No. 1029.
118064. No. 1030.
118065. No. 1031.

118007 to 118098—Continued.

118066. *PINUS GERARDIANA* Wall. Pinaceae. No. 964. *Nezoa*. From Chamba, Chamba State, July 11, 1936, but said to be from Brahmaur at 7,500 feet altitude. An attractive tree with sycamorelike bark and edible seeds which are exported in quantities.
118067. *PISUM SATIVUM* L. Fabaceae. Pea. No. 1021. *Kara*. From Srinagar, Kashmir, July 23, 1936. Eaten roasted or boiled, both green and dried.
118068. *POPULUS* sp. Salicaceae. No. 949. From Hursar, Chamba State, July 6, 1936. A tree 60 feet high and 3 feet in diameter, found growing in river bottoms and plantations. It is a fast grower and does not seem to spread from the roots.
118069. *PRIMULA* sp. Primulaceae. No. 938. From Reling, Chamba State, July 2, 1936, at 1,400 feet altitude. Plants 8 to 10 inches high. The large purple flowers, one-half inch across, have white eyes.
118070. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot. No. 955. From Brahmaur, Chamba State, July 7, 1936, at 8,000 feet altitude. Tree between 2 and 3 feet high, with fruit 1 inch in diameter.
118071. *PRUNUS ARMENIACA* L. Amygdalaceae. No. 990. *Chuli*. From Lahore, Punjab, July 14, 1936, but said to have come originally from Baluchistan. Fruits 1 inch in diameter, the color of a greengage plum, very sweet and pleasant.
118072. *PRUNUS CERASIFERA* Ehrh. Amygdalaceae. Myrobalan plum. No. 994. *Alucha*. From Jammu, Jammu State, July 16, 1936. Yellow fruits 1 inch in diameter, rather flavorless.
118073. *RAPHANUS SATIVUS* L. Brassicaceae. Radish. No. 965. *Muli*. From Chamba, Chamba State, July 12, 1936. A long white radish; used fresh or in curry.
- 118074 to 118080. *RUBUS* spp. Rosaceae. 118074. *RUBUS* sp. No. 944. From Kukti, Chamba State, July 4, 1936. A large well-formed bush 6 feet high, growing in pine forest. Fruits not ripe but probably blackish.
118075. *RUBUS* sp. No. 945. From Kukti, Chamba State, July 5, 1936, at 9,000 feet altitude. A small plant between 3 and 4 feet high, with scarlet to crimson fruits one-fourth inch across which are sweet and pleasant.
118076. *RUBUS* sp. No. 948. From Hursar, Chamba State, July 5, 1936. A bush about 5 feet high with small, few-seeded fruits.
118077. *RUBUS NIVEUS* Thunb. Rosaceae. No. 979. From Dalhousie, Punjab, July 12, 1936, at 7,000 feet altitude. Sweet crimson fruits from a bush 4 feet high.

118007 to 118098—Continued.

118078. *RUBUS* sp.

No. 1002. From Harwan, Kashmir, July 19, 1936, at 7,000 feet altitude. Sweet purple-black fruits, one-half inch in diameter.

118079. *RUBUS* sp.

No. 1003. From Nishat Gardens, Kashmir, July 19, 1936. Fruits sweet, crimson, but a bit watery, one-half inch across; purchased from a native.

118080. *RUBUS ULMIFOLIUS* Schott.

No. 1012. From Srinagar, Kashmir, July 22, 1936, at 5,200 feet altitude. Well rounded, dense, heavily armed shrubs up to 8 feet high, with rose-colored flowers, borne in profusion. Fruits black, one-half inch in diameter, and of good flavor.

118081 to 118083. *SALVIA* spp. *Mentha*-*ceae*.

118081. *SALVIA MOORCROFTIANA* Wall.

No. 958. From near Brahmaur, Chamba State, July 8, 1936, at 7,000 feet altitude. An herb about 2 feet high, with spikes of large blue-purple flowers and large woolly leaves; related to *Salvia sclarea*. It will tolerate hot sun and a dry situation.

For previous introduction see 101795.

118082. *SALVIA VERBENACA OBLONGIFOLIA* Benth.

No. 1010. From Sopor, Kashmir, July 22, 1936, at 5,000 feet altitude. A plant 18 inches high with spikes of attractive blue-purple flowers and thick rugose leaves. It prefers rather dry open ground.

118083. *SALVIA SCLAREA* L.

No. 1011. From Sopor, Kashmir, July 22, 1936, at 5,000 feet altitude. Plant 18 inches high with spikes of large pale-purple-blue flowers and thick rugose leaves. Prefers rather dry open ground.

118084. *SEDUM* sp. *Crassulaceae*.

No. 943. From Kukti, Chamba State, July 4, 1936. A small plant 4 inches high with leaves one-fourth inch long and white flowers. Grows on mossy cliffs; a rock garden plant.

118085. *SOLANUM MELONGENA* L. *Solana*-*ceae*. **Eggplant.**

No. 966. *Bengan*. From Chamba, Chamba State, July 12, 1936. Said to be a long purple variety.

118086. *SOPHORA* sp. *Fabaceae*.

No. 959. From near Brahmaur, Chamba State, July 8, 1936, at 7,000 feet altitude. A leguminous shrub about 5 feet high, found on hot dry slopes. Leaves glaucous, pinnate, and 4 inches long. A possible ornamental for semiarid, hot situations.

118087 and 118088. *SPINACIA OLERACEA* L. *Chenopodiaceae*. **Common spinach.**

Palag. From Chamba, Chamba State, July 11, 1936. A potheib.

118087. No. 963. 118088. No. 962.

118007 to 118098—Continued.

118089. *VIBURNUM* sp. *Caprifoliaceae*.

No. 941. From Kukti, Chamba State, July 4, 1936, at 9,000 feet altitude. A shrub 7 feet high, with attractive white to pink flowers which appear as the snow begins to melt. The flowers have a pleasant scent, like that of trailing-arbutus.

118090. *VIBURNUM* sp. *Caprifoliaceae*.

No. 1009. From Pir Pinjal, Kashmir, June 16, 1936, at 9,000 feet altitude. Shrubs 5 feet high, said to have fragrant pink flowers borne early in the spring.

118091 and 118092. *VICIA FABA* L. *Faba*-*ceae*. **Broadbean.**

From the bazar at Srinagar, Kashmir, July 23, 1936; a form used dry, like pigeonpeas.

118091. No. 1033. 118092. No. 1034.

118093 to 118095. *VIGNA CYLINDRICA* (Stickm.) Skeels. *Fabaceae*. **Catjang.**

118093. No. 1026. *Wair mut*. From Srinagar, Kashmir, July 23, 1936. Used as green pods and dried beans.

118094. No. 973. From Chamba, Chamba State, July 12, 1936. Said to be a climbing bean with long edible pods.

118095. No. 1025. *Wair mut* or *loba*. From Srinagar, Kashmir, July 23, 1936. A climbing bean with edible pods 18 inches long. The beans are also used dried.

118096 to 118098. *VIOLA* spp. *Violaceae*.

118096. *VIOLA* sp.

No. 942. From Kukti, Chamba State, July 5, 1936.

118097. *VIOLA* sp.

No. 947. From Hursar, Chamba State, July 5, 1936.

118098. *VIOLA* sp.

No. 951. From Brahmaur, Chamba State, July 7, 1936.

118099 and 118100.

From Brazil. Seeds presented by J. W. T. Duvel. Commodity Exchange Administration. United States Department of Agriculture. Received September 26, 1936.

118099. *ASTROCARYUM TUCUMA* Mart. *Phoenicaceae*. **Palm.**

For previous introduction see 97803.

118100. *ORBIGNYA* sp. *Phoenicaceae*. **Palm.**

The orbignyas are oil-bearing palms, native to the northern part of South America.

118101 to 118104.

From India. Bulbs and seeds collected by Walter Koelz, Bureau of Plant Industry. Received September 15, 1936.

118101. *ALLIUM SATIVUM* L. *Liliaceae*. **Garlic.**

No. 1036. *Rohan*. Bulbs from the Srinagar bazar, Kashmir, July 23, 1936. Said to be locally grown.

118102. *NELUMBO NUCIFERA* Gaertn. *Nymphaeaceae*. **Hindu lotus.**

No. 1044. *Pamposh*. From Srinagar, Kashmir, July 27, 1936.

118101 to 118104—Continued.

118103. *NYMPHAEA ALBA* L. Nymphaeaceae.
European white waterlily.

No. 1041. *Buimposh*. Seeds from Dal Lake, Kashmir, at 5,200 feet altitude. The flowers are dainty, white, and the largest are 2 inches across.

118104. *NYMPHAEA* sp. Nymphaeaceae.

No. 1042. *Buimposh*. Seeds from Dal Lake, Kashmir, at 5,200 feet altitude. This plant is considered identical with No. 1041 [P. I. 118103], but the seeds are red instead of blackish and have no gelatinous envelope.

118105 to 118181. *NICOTTANA TABACUM* L. Solanaceae. Common tobacco.

From Venezuela. Seeds collected by Raymond Stadelman. Bureau of Plant Industry. Received September 26, 1936.

118105 to 118108. From the Valle de la Pascua, Guárico, July 25, 1936.

118105. No. 176. 118107. No. 178.

118106. No. 177. 118108. No. 179.

118109. No. 180. From La Mal Querida, Guárico, July 26, 1936.

118110. No. 181. From Santa Maria de Ipire, Guárico, July 27, 1936.

118111. No. 182. *Guácharo*. From Paria-guan, Anzoategui, July 27, 1936.

118112. No. 183. From Canraura, Anzoategui, between 250 m. and 300 m. altitude, July 28, 1936.

118113. No. 184. *Rabo de gallo*. From El Purgatorio, Monagas, at 380 m. altitude, July 28, 1936.

118114 and 118115. From Bejucales, near Caicara, Monagas, at 200 m. altitude, August 1, 1936.

118114. No. 185. *Puya*.

118115. No. 186. *Guácharo*.

118116. No. 187. *Tabaco negro*. From Caicara, Monagas, at 200 m. altitude, August 2, 1936.

118117 and 118118. From San Félix, Monagas, at 250 m. altitude, August 2, 1936.

118117. No. 188. *Tabaco blanco*.

118118. No. 189. *Tabaco negro*.

118119 and 118120. From Las Merellas, near San Félix, Monagas, August 2, 1936, at 250 m. altitude.

118119. No. 190. 118120. No. 191.

118121. No. 192. *Puya*. From San Félix, Monagas, at 250 m. altitude, August 2, 1936.

118122. No. 197. *Zambo*. From the Colorado River near San Antonio, Monagas, August 3, 1936, at 250 m. altitude.

118123. No. 198. *Zambo calado*. From near San Antonio, Monagas, August 3, 1936, at 250 m. altitude.

118124 and 118125. From La Fantasma, near San Antonio, Monagas, at 250 m. altitude, August 3, 1936.

118124. No. 199. *Tabaco negro*.

118125. No. 200. *Tabaco blanco*.

118126. No. 201. From La Soledad, south of San Antonio, on the way to Cumanao, at 250 m. altitude, August 3, 1936.

118105 to 118181—Continued.

118127 and 118128. *Tabaco negro*. From Clavellines, near Santa Cruz, Sucre, at 250 m. altitude, August 8, 1936.

118127. No. 202. 118128. No. 203.

118129. No. 204. *Tabaco negro*. From Los Cavimbos, near Santa Maria, Sucre, at 300 m. altitude, August 8, 1936.

118130. No. 205. *Tabaco negro*. From Sabana de Piedras, Sucre, at 1,000 m. altitude, August 9, 1936.

118131. No. 206. *Tabaco negro*. From Cueva del Guácharo, near Caripe, Monagas, at 950 m. altitude, August 10, 1936.

118132 and 118133. *Guácharo*. From Guácharo, Monagas, at 800 m. altitude, August 10, 1936.

118132. No. 207. 118133. No. 208.

118134 to 118137. From Amanitas, near Caripe, Monagas, at 750 m. altitude, August 11, 1936.

118134. No. 209. *Tabaco negro*.

118135. No. 210. *Zambo calado*.

118136. No. 211. *Guácharo*.

118137. No. 212. *Tabaco negro*.

118138. No. 213. *Tabaco negro*. From Boqueron, near San Agustín, Sucre, at 1,000 m. altitude, August 11, 1936.

118139 and 118140. From Santa Maria, Sucre, at 300 m. altitude, August 11, 1936.

118139. No. 214. *Guácharo*.

118140. No. 215. *Tabaco negro*.

118141. No. 216. *Uracoa*. From Santa Cruz, at 250 m. altitude, August 12, 1936.

118142 and 118143. *Tabaco negro*. From El Toro, near Santa Cruz, Sucre, at 260 m. altitude, August 12, 1936.

118142. No. 217. 118143. No. 218.

118144 and 118145. *Tabaco negro*. From Catuaro, Sucre, at 340 m. altitude, August 12, 1936.

118144. No. 219. 118145. No. 220.

118146. No. 221. *Tabaco negro*. From La Horquita, near Catuaro, Sucre, at 330 m. altitude, August 12, 1936.

118147 and 118148. From Caigüire, near Cumanacoa, Sucre, at 220 m. altitude, August 19, 1936.

118147. No. 220. *Tabaco negro*.

118148. No. 223. *Tabaco negro* or *Satom*.

118149 to 118151. From La Rinconada, near Cumanacoa, Sucre, at 230 m. August 19, 1936.

118149. No. 224.

118150. No. 225. *Tabaco blanco*.

118151. No. 226. *Tabaco negro*.

118152. No. 227. *Cola de gallo*. From Los Altos, near Barcelona, Anzoategui, at 600 m. altitude, August 11, 1936.

118153. No. 228. *Cubano*. From Pachquito, near Piritu, Anzoategui, at 120 m. altitude, August 11, 1936.

118105 to 118181—Continued.

- 118154 to 118157. From Guanape, Anzoategui, August 15 and 16, 1936, at 180 m. altitude.
118154. No. 229. *Gacho*.
118155. No. 230. *Virginia*.
118156. No. 231. *Caraqueño*.
118157. No. 232. *Uvero*.
- 118158 and 118159. *Rabo de gallo*. From El Guamo, near Guanape, Anzoategui, at 110 m. altitude, August 15, 1936.
118158. No. 233. 118159. No. 234.
118160. No. 235. *Rabo de gallo* and *Virginia*. From Campo Alegre near El Valle, Anzoategui, at 140 m. altitude, August 15, 1936.
118161. No. 236. *Capadare*. From Las Cruces, near El Valle, Anzoategui, at 280 m. altitude, August 15, 1936.
118162. No. 237. *Capadare* and *Virginia*. From Santa Rosa, near El Valle, Anzoategui, at 237 m. altitude, August 15, 1936.
- 118163 to 118166. From El Placer, near El Valle, Anzoategui, from 260 to 270 m. altitude, August 16, 1936.
118163. No. 238. *Cubano*.
118164. No. 239. *Cubano*.
118165. No. 240. *Capadare*.
118166. No. 241. *Cubano*.
- 118167 and 118168. From La Chaguarama, near El Valle, at 280 m. altitude, August 16, 1936.
118167. No. 242. *Capadare* and *Rabo de gallo*.
118168. No. 243. *Uvero*, *Caujaro*, and *Capadare*.
- 118169 to 118171. From San José de Guárico, Guárico, August 16, 1936, at 260 m. altitude.
118169. No. 244. *Caujaro*, *Pailon*, *Gacho*, and *Rabo de gallo*.
118170. No. 245. *Pylon*.
118171. No. 246. *Caujaro*.
118172. No. 247. A locally grown strain. From El Guamo, near Guanape, Anzoategui, at 160 m. altitude, August 17, 1936.
118173. No. 248. From El Chaparral, near Guanta, Anzoategui, at 160 m. altitude, August 20, 1936.
118174. No. 249. A mixture of No. 227 and No. 228.
- 118175 to 118177. From Cocoyal, near San Antonio, Monagas, at 1,500 m. altitude, August 21, 1936.
118175. No. 250. *Tabaco negro*.
118176. No. 251. *Tabaco negro*.
118177. No. 252. *Guácharo*.
118178. No. 253. *Tabaco negro*. From El Hato de la Cuesta, near San Antonio, at 1,500 m. altitude, August 21, 1936.
- 118179 and 118180. From Guanaguana, Monagas, at 440 m. altitude, August 22, 1936.
118179. No. 254. *Guácharo*.
118180. No. 255. *Tabaco común*.

118105 to 118181—Continued.

118181. No. 256. A mixed sample.
118182. SACCHARUM OFFICINARUM L. Poaceae. Sugarcane. From Papeete, Tahiti, Society Islands. Cuttings obtained through the Division of Sugar Investigation, Bureau of Plant Industry. Received September 29, 1936. *Rutu*.
118183. PHOENIX HANCEANA Naudin. Phoenicaceae. Date palm. From Japan. Seeds presented by Prof. Tyōzaburō Tanaka, Taihoku Imperial University, Taiwan. Received September 24, 1936. A Chinese relative of the date palm which has short, tufted stems and pinnate foliage. For previous introduction see 101094.
118184. AMYGDALUS PERSICA L. Amygdalaceae. Peach. From China. Seeds presented by Miss B. C. Patterson, Tenghsien, Shantung. Received September 24, 1936. A wild peach which becomes a tree 35 feet high, with fruits little larger than a cherry.
- 118185 to 118356. From Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 21, 1936. Unless otherwise stated, these were all purchased in seed stores in São Paulo, August 28, 1936.
- 118185 to 118191. ALLIUM CEPA L. Liliaceae. Onion.
118185. No. 3818. *Cebola branca Italiana*.
118186. No. 3819. *Cebolas do Rio Grande*.
118187. No. 3820. *Cebola vermelha das Canarias*.
118188. No. 3821. *Cebola das Canarias amarella*.
118189. No. 3822. *Cebola branca rainha*. Used for pickling.

118353. No. 3911. *Escorcionero da Espanha.*

118354. No. 3912. *Salsifis branco.*

118355. VALERIANELLA OLITORIA Pollich.
Valerianaceae.

No. 3844. *Alface do campo verde plena.*

118356. VICIA FABA L. Fabaceae. **Broadbean.**

No. 3768. *Favas de sevilha.*

118357 to 118362.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, All-Union Research Institute of Humid Subtropics, Sukhum, Transcaucasus. Received September 23, 1936.

118357. ACER CAPPADOCICUM Gleditsch.
Aceraceae. **Coliseum maple.**

A tree which becomes 50 feet high, native to the Caucasus region and eastward to western China. The five- to seven-lobed, cordate leaves are 3 to 6 inches wide, and the greenish yellow flowers, in upright corymbs, are followed by spreading winged fruits.

For previous introduction see 98308.

118358. ACER VELUTINUM Boiss. Aceraceae. **Maple.**

A large tree with deeply cordate leaves, 5 to 10 inches across, having coarsely crenate-serrate lobes. The flowers are borne in large erect panicles. It is native to the Caucasus region and northern Iran (Persia).

For previous introduction see 95564.

118359. ALNUS GLUTINOSA BARBATA (C. A. Mey.) Ledeb. Betulaceae.

An alder up to about 75 feet high, of narrow pyramidal habit with dark-green, ovate-oblong leaves. Native to the Caucasus region.

118360. GLEDITSIA CASPICA Desf. Caesalpiniaceae. **Honeylocust.**

A very spiny tree, 30 to 40 feet high, the spines branched and slightly flattened, 6 inches or more long. The pinnate or bipinnate leaves are 6 to 10 inches long, and the green flowers, almost sessile, are in dense downy racemes 2 to 4 inches long. The scimitar-shaped pods are about 8 inches long and 1 inch wide. Native to northern Iran (Persia).

For previous introduction see 42777.

118361. PARROTIA PERSICA (DC.) Meyer. Hamamelidaceae.

A shrub or small tree up to 15 feet high, with spreading branches and ovate-oblong, coarsely crenate leaves, 3 to 4 inches long, which turn scarlet, yellow, and orange in the autumn and remain on the branches a long time. The flower heads, which appear in March before the leaves, are rather inconspicuous except for the pendent purple stamens; the ovoid fruits are half an inch long with two recurved lobes. Native to Iran (Persia).

For previous introduction see 81354.

118357 to 118362—Continued.

118362. PTEROCARYA PRAXINIFOLIA (Lam.) Spach. Juglandaceae. **Caucasian wingnut.**

A handsome spreading tree which becomes 60 feet high, with attractive dark-green pinnate leaves about 1 foot long. It is native to the Caucasus region.

For previous introduction see 74596.

118363. HIBISCUS sp. Malvaceae.

From Argentina. Seeds presented by Dr. Arturo Donat, Botanico del Parque Nacional de Nahuel Huapi, Bariloche, Rio Negro. Received September 28, 1936.

Seeds from a plant growing near Napalpi, Chaco, in a nearly dried swamp, and apparently very rare in that region.

118364 to 118402.

From Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received September 19, 1936.

Unless otherwise mentioned, all of this material was purchased in seed stores in São Paulo, August 28, 1936.

118364. ALSTROEMERIA sp. Amaryllidaceae.

No. 3947. Presented by Dr. F. C. Hoehne, Instituto Biologico, São Paulo, August 28, 1936. Received as *Alstroemeria insignis* Kraenzl, an invalid name.

118365. ANTHRISCUS CEREFOLIUM (L.) Hoffm. Apiaceae. **Chervil.**

No. 3918. *Cerfolio comum.*

118366. ARAUJIA SERICIFERA Brot. Asclepiadaceae.

No. 3945. A twining vine with nearly glabrous, oblong-acuminate leaves 3 inches long and cymes of faintly odorous, saucer-shaped white flowers, which are pale rose in bud. Native to southern Brazil, where the fiber around the seed is used locally in the manufacture of paper.

For previous introduction see 88685.

118367. ARISTOLOCHIA ARCUATA Mast. Aristolochiaceae.

No. 3950. From the Instituto Biologico, São Paulo, August 28, 1936. A perennial twiner with membranous, deltoid-ovate leaves 2 to 4 inches long and large solitary axillary brownish flowers. Native to east-central Brazil.

118368. ARTEMISIA ABSINTHIUM L. Asteraceae. **Common wormwood.**

No. 3910. *Losna. (Absinthio officinal.)* A cultivated herb.

118369. BOMBAX CYATHOPHORUM (Casar.) K. Schum. Bombacaceae.

No. 3943. From the Instituto Biologico, São Paulo, August 28, 1936. An ornamental tree up to about 20 feet high, with digitate leaves, the oblong leaflets 4 to 6 inches long, and showy flowers about 7 inches long. A kapoklike fiber is obtained from the pods. Native to Brazil.

118370. BORAGO OFFICINALIS L. Boraginaceae. **Common borage.**

No. 3916. *Borragem. (Boraja da Espanha.)*

118364 to 118402—Continued.

118371. *BYRSONIMA LIGUSTRIFOLIA* A. Juss.
Malpighiaceae.

No. 3956. An evergreen tree about 20 feet high, with leathery oblong or lanceolate leaves about 2 inches long and terminal racemes of small rose-colored flowers. Native to Brazil.

118372. *CARPOTROCHE BRASILIENSIS* (Raddi) Endl. Flacourtiaceae.
Sapucainha.

No. 3941. A tropical tree 30 to 50 feet high, with oblong leaves about 4 inches long and few-flowered racemes of small white flowers. The fruits are about 4 inches in diameter. A sirup used in treating leprosy is prepared from the seeds.

For previous introduction see 103624.

118373. *CHAEROPHYLLUM BULBOSUM* L.
Apiaceae. Turnip-chervil.

No. 3917. *Cerafolio bulboso*.

For previous introduction see 29816.

118374. *CHORISIA SPECIOSA* St. Hil. Bombacaceae.
Floss-silk-tree.

No. 3926. *Paineiro*. A timber tree; the floss from the seed pods is used locally like kapok.

For previous introduction see 104108.

118375. *CUPRESSUS* sp. Pinaceae.

No. 3925. *Cedrinho*.

118376. *RHYNCHOSIA MINIMA* (L.) DC.
Fabaceae.

No. 3953. From the Instituto Biologico, São Paulo, August 28, 1936.

118377. *RHYNCHOSIA PHASEOLOIDES* (Sw.) DC. Fabaceae.

No. 3954. From the Instituto Biologico, São Paulo, August 28, 1936.

118378. *RHYNCHOSIA RETICULATA* (Sw.) DC. Fabaceae.

No. 3955. From the Instituto Biologico, São Paulo, August 28, 1936.

118379. *ERYTHRINA RETICULATA* Presl.
Fabaceae.

No. 3952. From the Instituto Biologico, São Paulo, August 28, 1936. A spiny shrub up to 6 feet high, with leathery leaves of three leaflets and showy scarlet flowers in erect racemes about 5 inches long. It is used as an ornamental hedge plant in Brazil, where it is native.

118380 to 118383. *EUCALYPTUS* spp. Myrtaceae.

118380. *EUCALYPTUS BOTRYOIDES* J. E. Smith.
Bangalay.

No. 5924. A tall handsome tree, native to Australia, with beautiful dark-green horizontal lanceolate leaves, umbels of small sessile white flowers, and obovate fruits. Used in Australia as a windbreak and as a shade tree. The wood is hard, tough, and durable.

For previous introduction see 77609.

118381. *EUCALYPTUS LONGIFOLIA* Link.

No. 3922.

118364 to 118402—Continued.

118382. *EUCALYPTUS LONGIROSTRIS* F. Muell.
Creek gum.

No. 3923. In Australia, where this tree is native, it becomes 200 feet high, with smooth dark-gray bark, narrowly lanceolate leaves 6 inches or more long, stalked umbels of small white flowers, attractive to bees, and globular fruits with conical tops. The heavy red wood is durable both above and below the ground and is used for railroad ties, piles, and fence posts.

For previous introduction see 77610.

118383. *EUCALYPTUS TERETICORNIS* J. E. Smith.
Slaty gum.

No. 3921. This evergreen tree is usually not more than 100 feet high in Australia, where it is native. It is closely related to *Eucalyptus longirostris*, differing only in minor botanical characteristics.

For previous introduction see 50347.

118384. *FOENICULUM VULGARE* Hill. Apiaceae.
Fennel.

No. 3756. *Funcho (Herba doce)*.

118385. *HIPPEASTRUM AULICUM ROBUSTUM* (A. Dietr.) Voss. Amaryllidaceae.

No. 3940. From the Instituto Biologico, São Paulo, August 28, 1936. A variety which is distinguished by its more vigorous growth and broader perianth segments. The large crimson flowers are produced in spring and autumn. Native to Brazil.

118386. *HUBERIA SEMISERRATA* DC. Melastomaceae.

No. 3944. From the Instituto Biologico, São Paulo, August 28, 1936. An ornamental shrub or small tree with leathery lanceolate or ovate-lanceolate leaves about 4 inches long and small white flowers. Native to Brazil.

118387. *LUPINUS* sp. Fabaceae.

No. 3932. An annual lupine.

118388. *MAYTENUS ALATERNOIDES ANGSTIFOLIA* Reiss. Celastraceae.

No. 3946. From the Instituto Biologico, São Paulo, August 28, 1936. An evergreen shrub or small tree with narrow-lanceolate or oblong leaves $1\frac{1}{2}$ to 3 inches long and small whitish flowers. Native to Brazil.

118389. *MELINIS MINUTIFLORA* Beauv.
Poaceae. Molasses grass.

No. 3748. *Capim catiqueiro*.

118390. *MIMOSA BRACAATINGA* Hoehne.
Mimosaceae.

No. 3937. From the Instituto Biologico, São Paulo, August 28, 1936.

For previous introduction see 92939.

118391. *NICOTIANA TABACUM* L. Solanaceae.
Common tobacco.

No. 3745. Volunteer tobacco, collected in a vacant lot in São Paulo, August 28, 1936.

118392. *NICOTIANA LANGSDORFII* Schrank.
Solanaceae. Tobacco.

No. 3746. Presented by Ricardo Azzi, Seccão de Fumo, Secretaria de Agricultura; grown in Pico de Yaragua, Serra da Mantiqueira.

118364 to 118402—Continued.

118393. *OCIMUM BASILICUM* L. Mentha-
ceae. Common basil.

No. 3833. *Mangericão* (Basilico).

118394. *PIMPINELLA ANISUM* L. Apiaceae.
Anise.

No. 3915. *Aniz verde*.

118395. *PAULLINIA TRIGONIA* Vell. Sapin-
daceae.

No. 3948. From the Instituto Biológico,
São Paulo, August 28, 1936. A climbing
evergreen shrub with biternate, rarely pin-
nate leaves and clusters of small white
flowers. Native to Brazil.

118396. *PHOENIX SPINOSA* Schum. Phoe-
nicaceae. Palm.

No. 3747. From one of the city parks,
São Paulo, August 28, 1936. A bushy or
a small erect arborescent palm up to 20
feet high, with less spiny leaves and much
smaller fruits than those of *Phoenix dac-
tylifera*. Native to tropical Africa.

118397. *RUMEX ACETOSA* L. Polygonaceae.

No. 3913. *Azeda de folha larga*.

118398. *SALVIA OFFICINALIS* L. Mentha-
ceae. Garden sage.

No. 3909. *Salvia rivaz*.

118399. *SATUREJA HORTENSIS* L. Mentha-
ceae. Summer savory.

No. 3858. *Segurelha das hortas*.

118400. *SERJANIA RETICULATA* Cambess.
Sapindaceae.

No. 3949. From the Instituto Biológico,
São Paulo, August 28, 1936. A climbing
shrub with biternate, evergreen leaves and
small white flowers, solitary or in com-
pound racemes. Native to Brazil.

118364 to 118402—Continued.

118401. *TABEBUIA IPE* (Mart.) Standl.
Bignoniaceae.

No. 3939. From the Instituto Biológico,
São Paulo, August 28, 1936. A large
Brazilian tree, with digitate leaves and
showy red flowers in terminal clusters.

118402. *MYROXYLON PEREIRAE* (Royle)
Klotzsch. Fabaceae. Balsam-of-Peru.

No. 3942. From the Instituto Biológico,
São Paulo, August 28, 1936. A handsome
leguminous tree with glossy green pinnate
leaves and racemes of white flowers. The
balsam-of-Peru of commerce is obtained
from the lower part of the trunk.

For previous introduction see 104163.

118403 to 118410.

From Venezuela. Seeds collected by Ray-
mond Stadelman, Bureau of Plant Indus-
try. Received September 25, 1936.

118403 to 118409. *LYCOPERSICON ESCULEN-
TUM* Mill. Solanaceae. Tomato.

118403. From Rio Colorado, Monagas,
August 3, 1936.

118404. From Bejucal, near Monagas,
August 1, 1936.

118405. From Muelle de Cariaco, State
of Sucre.

118406. From Cumaná, State of Sucre,
August 5, 1936.

118407. From Las Mercedes, Guárico,
July 25, 1936.

118408. From Cantaura, Anzoategui,
July 28, 1936.

118409. From Muelle de Cariaco, State
of Sucre, August 12, 1936.

118410. *SOLANUM MELONGENA* L. Solana-
ceae. Eggplant.

From Las Mercedes, Guárico, July 25,
1936.

INDEX OF COMMON AND SCIENTIFIC NAMES

Introductory statement.....	1
Inventory.....	3
Index of common and scientific names.....	30

INTRODUCTORY STATEMENT

This inventory, No. 129, records the plant material (Nos. 118411-119266) received by the Division of Plant Exploration and Introduction during the period from October 1 to December 31, 1936.

The greater part of this inventory may be considered essentially as a continuation of the preceding inventory, as the agricultural explorers discussed in No. 128, H. L. Westover and F. L. Wellman, Walter Koelz, W. A. Archer, and Raymond Stadelman) continued to send in material during this period from Turkey, India, Brazil, and western South America, respectively.

Although the general nature of the plant material received from these expeditions remained the same, it is of interest to note, in Dr. Archer's collections from Brazil, the increased proportion of peanut varieties (*Arachis hypogaea*) and also of other *Arachis*. This chief objective of Dr. Archer's South American trip was to get material of as many as possible of the wild species of *Arachis*, and also of the cultivated forms of the common peanut, for the particular use of Department specialists.

The genetics and pathology of the cultivated snapdragon have received much attention during the past decade, and the interests of specialists working with these projects are being served by the introduction of seeds of nearly 50 species and varieties of *Antirrhinum* (Nos. 118940-118986), presented by the Director of the Kaiser Wilhelm Institute, Müncheberg, Germany.

The botanical determinations of seeds introduced have been made and the nomenclature determined by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., September 3, 1940.

INVENTORY¹

NOTE.—This inventory is a historical record of plant material introduced for Department and other specialists. It is not to be considered as a list of plant material for distribution.

118411. ZEPHYRANTHES sp. Amaryllidaceae.

From Mexico. Bulbs purchased from Dr. C. A. Purpus, Zacuapam, Huatusco, Veracruz. Received October 15, 1936.

Salto de Agua. From the high sierra north of the volcano Orizaba.

118412. COCCOCYPSELUM LANCEOLATUM (Ruiz and Pav.) Pers. Rubiaceae.

From Brazil. Seeds collected by Dr. Doris Cochran, Smithsonian Institution, Washington, D. C. Received November 11, 1935. Numbered in October 1936.

A herbaceous creeper, densely pubescent throughout, with opposite, lanceolate, acute leaves, pale-violet flowers in small umbels, and small brilliant blue berries. Native to Peru.

118413. MESEMBRYANTHEMUM. Aizoaceae.

From California. Plants presented by Morris Schick, Glendale. Received October 19, 1936.

A hybrid mesembryanthemum (*Mesembryanthemum linguiforme* × *echinatum*), freely branching, forming a low mound of weak terete stems, yellow-green to bright-green falcate leaves, and light-yellow flowers.

118414. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Mexico. Seeds received through the American Legation, Mexico City, D. F., at the request of W. A. Archer, Bureau of Plant Industry. Received October 20, 1936.

Tabaco Habanero.

118415 and 118416. CASSIA spp. Caesalpinaceae.

From Australia. Seeds presented by J. Howard Johnson, St. Peters, South Australia. Received October 13, 1936.

118415. CASSIA EREMOPHILA A. Cunn.

An Australian shrub 8 to 10 feet high, with 2 pairs of long narrow terete leaflets and yellow flowers. Found growing in red sandy soil on limestone at Murray Bridge. The shrub has a long blooming season and the leaves and pods are eaten by stock.

For previous introduction see 113760.

118416. CASSIA STURTHI R. Br.

A bushy attractive evergreen shrub 3 to 6 feet high, with pinnate leaves of 3 to 5 pairs of linear to almost obovate leaflets and short dense axillary racemes of small yellow flowers. Native to Australia.

118417. ALLIUM sp. Liliaceae.

From Ankara, Turkey. Bulbs collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received October 7, 1936.

No. 940. From the Erzinjan bazar, August 8, 1936. Wild garlic brought in from the mountains.

118418. DILLENIA INDICA L. Dilleniaceae. Indian dillenia.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received June 26, 1936. Numbered in October 1936.

No. 709. From the Saharanpur Gardens, United Provinces, April 21, 1936. A handsome medium-sized tree with a round com-

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identification, therefore, must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

118418—Continued.

pact crown; the dark-green leaves are 15 inches long and 3 inches wide. The large white flowers are fragrant and very attractive; and the smooth, greenish, heart-shaped fruits, 3 inches long and 4 inches wide, are produced in great profusion, maturing in September and October. The edible part consists of the large fleshy sepals which enclose the carpels and are pleasantly acid. In India the sepals are used in making jelly and cooling drinks and are also used in curries.

For previous introduction see 56791.

118419. JARILLA HETEROPHYLLA (Llave) Rusby. Papayaceae.

From Mexico. Seeds presented by Dr. G. Gandra, Department of Agriculture, Mexico, D. F. Received October 30, 1936.

Jarrilla or *bonete*. A climbing herbaceous perennial about 3 feet high, with a large tuberous root, hastate leaves up to 5 inches long, and subglobose pendent fruits about 1 inch in diameter with short, thick, fleshy appendages. These have a lemonlike odor and are used for making preserves. Native to Mexico.

118420 and 118421.

From Kenya Colony, Africa. Seeds purchased from the Mount Elgon Nurseries, Kitale. Received October 19, 1936.

118420. GLORIOSA VIRESCENS Lindl. (*G. simplex* L.). Melanthiaceae. Glorylily.

A vinelike perennial, which supports itself by the tendril-bearing tips of the oblong-lanceolate leaves 3 to 6 inches long. The yellow and red flowers, 3 inches across and borne in a lax terminal corymb, are reflexed and slightly undulate.

For previous introduction see 113843.

118421. HAEMANTHUS MULTIFLORUS Martyn. Amaryllidaceae. Bloodlily.

A tropical African species with 3 to 4 oblong leaves 6 to 12 inches long, on a short separate stem and a straight scape, 1 to 3 feet high, bearing a large umbel of 30 to 100 usually blood-red flowers with long exserted filaments and prominent yellow anthers.

118422 to 118430.

From the State of Minas Geraes, Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 23, 1936.

118422 to 118428. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

Nos. 118422 to 118424 were collected at Lavras, October 19, 1936; cultivated peanuts.

118422. No. 4033.

118423. No. 4045.

118424. No. 4046. From the Escola Agrícola de Lavras.

118425. No. 4047. From Fazenda Morro Redondo near Lavras, September 20, 1936.

118426. No. 4058. From Lavras, September 20, 1936. A common type in this locality.

118427. No. 4061. From Diamantina, September 23, 1936; grown at Rio Vermelho.

118428. No. 4113. Cultivated peanuts from Diamantina, September 25, 1936.

118422 to 118430—Continued.

118429 and 118430. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

118429. No. 4080. Volunteer tobacco found near a house at Mandaniya, September 24, 1936. The plants were 5 feet high; flowers white, tinged or mottled with very pale pink.

118430. No. 4082. From Diamantina, September 24, 1936. Slender plants, 5 feet tall, with sticky leaves and white flowers tinged with pink.

118431. MEDICAGO SATIVA L. Fabaceae. Alfalfa.

From Santiago, Chile. Purchased from W. R. Grace & Cia., New York, N. Y. Received October 20, 1936.

Huasco variety of Chilean alfalfa.

118432. PHYTOLACCA DIOICA L. Phytolaccaceae. Pokeberry.

From California. Seeds presented by E. O. Orpet, Santa Barbara. Received May 27, 1936. Numbered in October 1936.

Ombu. An evergreen tree, native to Argentina, which develops, eventually, a thick trunk and a large crown. The slender-stemmed leaves are elliptic to oval, and the small greenish-white, inconspicuous flowers are in pendulous racemes. The chief value of this tree is for shade; in its native country it is called "bella sombra" (handsome shade).

For previous introduction see 66817.

118433. DIOSPYROS DISCOLOR Willd. Diospyraceae. Mabolo.

Plant growing at the United States Plant Introduction Garden, Coconut Grove, Fla. Numbered in October 1936.

P. I. G. No. 1238. A medium-sized tree, native to the Philippine Islands, with shining leaves 5 to 10 inches long, pubescent beneath. The velvety, dull-reddish, thin-skinned fruits, 3 inches long and nearly 4 inches in diameter, have firm, rather dry flesh of a rather indefinite sweet flavor and 4 to 8 large seeds.

For previous introduction see 106988.

118434 to 118436. ALLIUM spp. Liliaceae.

From Greece and Turkey. Bulbs collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received October 22, 1936.

118434. ALLIUM sp.

No. 996. From Mount Olympus, Greece, September 9, 1936.

118435. ALLIUM sp.

No. 993. From the sea beach, 1 km. west of Yalove, Turkey, September 12, 1936.

118436. ALLIUM sp.

No. 994. From the slopes of Mount Olympus, Greece, September 8, 1936. An ornamental with yellow flowers.

118437 to 118443. HIPPEASTRUM spp. Amaryllidaceae.

From Brazil. Bulbs purchased by W. A. Archer, Bureau of Plant Industry. Received October 9, 1936.

118437. HIPPEASTRUM EQUESTRE (L. f.) Herb.

No. 3957. From Tres Lagoas, Matto Grosso, August 31, 1936. A cultivated plant with salmon flowers.

118437 to 118443—Continued.

118438 and 118439. HIPPEASTRUM.

Hybrid hippeastrums purchased at São Paulo, September 14, 1936. Cultivated types.

118438. No. 4015. Flowers dark red.

118439. No. 4016. Flowers pink.

118440. HIPPEASTRUM PSITTACINUM (Ker) Herb.

No. 4017. From São Paulo, September 14, 1936. A robust hippeastrum with 6 to 8 strap-shaped leaves about 2 feet long and a 2- to 4-flowered umbel on a stout peduncle. The perianth limb is 4 to 5 inches long, and the segments are apple-green with profuse crimson markings. Native to Brazil.

118441. HIPPEASTRUM CALYPTRATUM (Ker) Herb.

No. 4018. From São Paulo, September 14, 1936. A Brazilian hippeastrum with 5 or 6 strap-shaped leaves up to 2 feet long and an equally long peduncle with 2 or 3 pale-yellow flowers with green stripes; the segments are about 1½ inches wide.

118442. HIPPEASTRUM DECORATUM Lem.

No. 4019. A Brazilian hippeastrum closely allied to *Hippeastrum psittacinum*. It has about 10 linear leaves over 2 feet long and large flowers with pale-green segments tipped with purplish red.

118443. HIPPEASTRUM.

No. 4020. A hybrid hippeastrum with white and yellow flowers with red stripes.

118444 and 118445. ARTOCARPUS COMMUNIS FORST. (*Artocarpus incisa* L. f.). Moraceae. Breadfruit.

From Trinidad, British West Indies. Root cuttings presented by the manager of the St. Augustine Nursery. Received November 2, 1936.

118444. A white variety.

118445. A yellow variety.

118446. ARTOCARPUS sp. Moraceae.

From China. Seeds presented by F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Soledad Cienfuegos, Cuba. Received October 30, 1936.

Originally from the Botanical Gardens, Hong Kong, China.

118447. PAEONIA sp. Ranunculaceae.

Peony.

From Turkey. Roots collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received November 2, 1936.

No. 1046. From the mountains 20 km. south of Inebolu, near Samsun, August 14, 1936.

118448. COFFEA ARABICA L. Rubiaceae. Arabian coffee.

From Puerto Rico. Seeds presented by the Agricultural Experiment Station, Mayaguez, and grown at the United States Plant Introduction Garden, Coconut Grove, Fla. Numbered in October 1936.

Variety *Erecta*. This species, as it grows wild is a handsome small tree, 10 to 15 feet high, with somewhat thin, oblong, glossy leaves 3 to 6 inches long and about

118448—Continued.

one-third as wide, abruptly narrowed to a rather short point at the apex. The fragrant white flowers are clustered in the axils. The variety *Erecta* is described as having a more upright habit, smaller leaves, and shorter joints than the type and is supposed to be better adapted to situations exposed to wind.

118449. INODES EXUL O. F. Cook. Phoenicaceae. Victoria palmetto.

Plants growing at the United States Plant Introduction Garden, Coconut Grove, Fla. Numbered in October 1936.

P. I. G. Nos 7786 and 7787. This is a new palmetto occurring in cultivation in some parts of Texas. It is distinguished from related species by its large size, the deep-green foliage, the thickened branchlets of the inflorescence, the solitary fruit, and the large seed, not wrinkled above nor hollowed out below.

For previous introduction see 44345.

118450. STYLOMA sp. Phoenicaceae.

Palm.

From Washington, D. C. Seeds collected at the National Botanic Garden, Washington, by O. F. Cook, Bureau of Plant Industry. Received October 8, 1936.

Fruits ripened in the United States Botanic Garden, October 1936. This is one of the Pacific Island palms, of the group commercially known as Pritchardia, probably from one of the eastern archipelagos—Tabiti, Marquesas, or Hawaii.

The leaves are smaller than those of *Styloma pacifica*, the segments more deeply divided, and split at the ends. The fruits have a soft fibrous pericarp instead of the thick woody shell of many of the Hawaiian *S. eriophora*, including a brown tomentum covering the leaf sheaths, petioles, and inflorescences, and the calyx is not swollen nor indurated.

118451 to 118463. ARACHIS spp. Fabaceae. Peanut.

From Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 9, 1936.

118451. ARACHIS HYPOGAEA L.

No. 3963. From Campo Grande, eastern Matto Grosso, September 1, 1936. A cultivated peanut.

118452. ARACHIS sp.

No. 3965. From the streets of Campo Grande, eastern Matto Grosso, September 2, 1936. Received under the specific name "rastrero," for which a place of publication has not been found.

118453 to 118455. ARACHIS DIOGOI Hoehne.

A prostrate herb about 1 foot long, with leaves composed of 4 linear-oblong leaflets and yellow flowers in small axillary clusters. Native to Brazil.

118453. No. 3966. From Campo Grande, eastern Matto Grosso, September 2, 1936. Collected along the streets.

118454. No. 3967. From Fazenda Narqueada Velha, Campo Grande, eastern Matto Grosso, September 3, 1936. Four pods were double-seeded.

118455. No. 3968. Variety Minor. From Lagoinha, on the road between Campo Grande and Capão, eastern Matto Grosso, September 6, 1936.

118451 to 118463—Continued.

118456. ARACHIS sp.

No. 3982. From Capão Bonita, eastern Matto Grosso, September 5, 1936. A peanut with tuberlike roots found in a pasture on hard red clay mixed with sand below.

118457. ARACHIS GLABRATA Benth.

No. 3990. From Campo Grande, Matto Grosso, September 9, 1936. Found in rich black earth, in the streets of the town. A dwarf perennial with a glabrous ascending stem, oblong-elliptical leaflets about one-half inch long, and small yellow flowers. Native to Brazil.

118458. ARACHIS sp.

No. 3992. Found growing in sand at Fazenda das Mocas, near Campo Grande, Matto Grosso, September 9, 1936.

118459. ARACHIS sp.

No. 3994. Found in sandy soil near Yaraguari, about 60 km. north of Campo Grande, Matto Grosso, September 10, 1936.

118460 to 118463. ARACHIS HYPOGAEA L.

118460 No. 3996. Purchased in a store at Yaraguari, Matto Grosso, September 11, 1936.

Nos. 118461 to 118463 were purchased in the market at Campinas, eastern São Paulo, September 15, 1936.

118461. No. 4028.

118462. No. 4029.

118463. No. 4030.

118464. PASPALUM NOTATUM Fluegge.
Poaceae. Bahia grass.

From Cuba. Seeds presented by R. Lopez Adams, Casa Blanca, through the Division of Forage Crops and Diseases. Received October 2, 1936.

A perennial tropical American grass which has shown promise as a pasture grass in the southern United States.

118465 and 118466. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

From Brazil. Seeds presented by the Departamento de Produção Vegetal, through W. A. Archer, Bureau of Plant Industry. Received October 20, 1936.

118465. *Goiano amarelo*.

118466. *Jalo branco*.

118467 to 118506.

From Brazil. Bulbs and seeds collected in the State of São Paulo by W. A. Archer, Bureau of Plant Industry. Received October 5, 1936.

Unless otherwise stated, this material was received as seeds.

118467 and 118468. ALLIUM SATIVUM L. Liliaceae. Garlic.

Bulbs purchased in the general market at São Paulo, August 21, 1936.

118467. No. 3698. *Alho grande*. Sweeter and less strong than the ordinary type. A white variety.

118468. No. 3699. *Alho grande*. Purplish.

118467 to 118506—Continued.

118469 to 118482. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

Nos. 118469 to 118476 were purchased in the general market of São Paulo, August 21, 1936.

118469. No. 3700. *Amendoim branca*. Seed oblong, integument whitish, pod crooked with prominent crest and deep reticulations and constrictions.

118470. No. 3701. *Amendoim tatu*. Seed coat pink, seed strongly compressed, semicylindrical; pods straight, smooth.

118471. No. 3702. Apparently "tatu" type.

118472. No. 3703. Seed oblong, integument red, pods deeply reticulated and somewhat crooked.

118473. No. 3704. Apparently the same as No. 3701 [P. I. 118470].

118474. No. 3705. Some seeds compressed cylindrical; others oblong and not compressed.

118475. No. 3706. Apparently "tatu" type.

118476. No. 3707.

118477. No. 3730. Seeds grown at the Botanical Garden, São Paulo, and presented by Dr. F. C. Hoehne. Received as *Arachis nambiquarae*.

118478. No. 3731. From a store, São Paulo, August 23, 1936. A peanut with an oblong seed, pale integument, and a rough crooked pod.

Nos. 118479 to 118482 were collected in a wholesale house at São Paulo, August 25, 1936.

118479. No. 3737. Seeds oblong, integument pale, pods small, dark.

118480. No. 3738. *Tatu*.

118481. No. 3739. *Tatu*.

118482. No. 3740. *Tatu*.

118483. CARICA PAPAYA L. Papayaceae. Papaya.

No. 3697. *Mamão vermelho*. A red-fleshed papaya from the general market at São Paulo, August 21, 1936.

118484 and 118485. CICER ARIETINUM L. Fabaceae. Chickpea.

From the general market at São Paulo, August 21, 1936.

118484. No. 3713. *Grão de bico nacional*.

118485. No. 3714. *Grão de grande bico*. This is the Spanish "garbanzo." The seeds are roasted and eaten like peanuts.

118486. CICHORIUM INTYBUS L. Cichoriaceae. Chicory.

No. 3727. *Catalonha*. From a seed store in São Paulo, August 25, 1936. A cultivated vegetable that is used for salads. Introduced from Italy.

118487. HORDEUM DISTICHON L. Poaceae. Barley.

No. 3710. *Cebada*. A cultivated barley from the general market at São Paulo, August 21, 1936.

118467 to 118506—Continued.

118488 and 118489. *ORYZA SATIVA* L. Poaceae. Rice.

Cultivated rice from the general market at São Paulo, August 21, 1936.

118488. No. 3708.

118489. No. 3709. *Arroz argulho*.

118490. *PHASEOLUS LUNATUS* L. Fabaceae. Lima bean.

No. 3733. *Feijão branco*. From a store in São Paulo, August 23, 1936.

118491 to 118500. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.

From the general market at São Paulo, August 21, 1936.

118491. No. 3715. *Feijão de vara branca*. A climbing bean.

118492. No. 3716. *Feijão de vara maron*. A climbing bean.

118493. No. 3717. *Feijão preto*.

118494. No. 3718. *Feijão branco*.

118495. No. 3719. *Feijão chumbinho*.

118496. No. 3720. *Feijão manteiga riscado*.

118497. No. 3721. *Feijão manteiga*.

118498. No. 3722. *Feijão mulatinho*.

118499. No. 3723. *Feijão branco miúdo*.

118500. No. 3724. *Feijão côr de vinha*.

118501. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 3711. *Ervilha branca*. From the general market at São Paulo, August 21, 1936.

118502. *SCLEROBIUM DENUDATUM* Vog. Caesalpinaceae.

No. 3734. From the Botanical Garden, São Paulo, August 24, 1936. A handsome ornamental tree with leathery leaves composed of 2 to 5 obovate or lanceolate, oblong leaflets $1\frac{1}{2}$ to 4 inches long and terminal panicles of small, yellow, fragrant flowers. Native to southern Brazil.

118503. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

No. 3732. Cultivated wheat purchased in a store at São Paulo, August 23, 1936.

118504. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.

No. 3712. *Feijão frade*. From the general market at São Paulo, August 21, 1936.

118505 and 118506. *ZEA MAYS* L. Poaceae. Corn.

Milho pipoco. Cultivated popcorn from the general market at São Paulo, August 21, 1936.

118505. No. 3695. A variety with yellow grains.

118506. No. 3696. A variety with red grains.

118507 to 118555. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Venezuela. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received October 23, 1936.

118507 to 118555—Continued.

Nos. 118507 to 118511. From Yagua, Carabobo.

118507. No. 257. *Habano*.

118508. No. 258.

118509. No. 259. *Americano and Cubano*.

118510. No. 260. *Americano*.

118511. No. 261.

Nos. 118512 and 118513. From Magdalena, Aragua.

118512. No. 262.

118513. No. 263.

118514. No. 264. From San Joachim, Carabobo.

Nos. 118515 to 118518. From Miranda, Carabobo.

118515. No. 265. 118517. No. 267.

118516. No. 266. 118518. No. 268.

Nos. 118519 and 118520. From El Zimbron (Miranda), Carabobo.

118519. No. 269. *Guacharo*.

118520. No. 270. *Capadare*.

Nos. 118521 to 118524. From Hato Viejo, Carabobo.

118521. No. 271. *Guacharo*.

118522. No. 272. *Guacharo*.

118523. No. 273. *Guacharo and Capadare*.

118524. No. 274. *Guacharo and Capadare*.

Nos. 118525 and 118526. From Salom, Yaracuy.

118525. No. 275. *Capadare*.

118526. No. 276. *Guacharo*.

Nos. 118527 to 118529. From Cocorote, Yaracuy.

118527. No. 277. *Rabo de gallo negro*.

118528. No. 278. *Rabo de gallo negro*.

118529. No. 279. *Rabo de gallo negro*.

Nos. 118530 to 118533. From Guama, Yaracuy.

118530. No. 280. *Capadare*.

118531. No. 281. *Rabo de gallo negro*.

118532. No. 282. *Rabo de gallo negro*.

118533. No. 283. *Rabo de gallo negro*.

Nos. 118534 to 118539. From Yaritagua, Yaracuy.

118534. No. 284. *Rabo de gallo negro and Congo*.

118535. No. 285. *Virginia*.

118536. No. 286. *Congo*.

118537. No. 287. *Congo*.

118538. No. 288. *Congo*.

118539. No. 289. Mixed varieties.

Nos. 118540 and 118541. *Maporito*. From Las Palmitas, Lara.

118540. No. 290. 118541. No. 291.

118542. No. 292. Mixed varieties from El Toro (Duaca) Lara.

118507 to 118555—Continued.

118543. No. 293. *Cocuzo* and *Maporito*. From Cordero (Barguisimeto) Lara.

118544. No. 294. *Virginia*. From Pirita, Falcon.

Nos. 118545 to 118551. From Mirimire, Falcon.

118545. No. 295. Mixed varieties.

118546. No. 296. *Negro*.

118547. No. 297. *Virginia corta*.

118548. No. 298. *Amarillo*.

118549. No. 299.

118550. No. 300. *Virginia*.

118551. No. 301. *Virginia*.

Nos. 118552 and 118553. From Capadare, Falcon.

118552. No. 302. *Planton*.

118553. No. 303. *Cola de gallo*.

118554. No. 304. *Rabo de gallo*. From Tocuyo, Falcon.

118555. No. 305. *Cocoroteno*. From Na-guanagua, Aragua.

118556 to 118661.

From the State of Kashmir, India. Seeds and bulbs collected by Walter Koelz, Bureau of Plant Industry. Received October 1, 1936.

Unless otherwise mentioned, the material was received as seeds.

118556 to 118563. ALLIUM spp. Liliaceae.

118556 and 118557. ALLIUM CEPA L.

Onion.

118556. No. 1143. From Skardo, Baltistan Province, August 15, 1936, at 6,500 feet altitude. A flattened white onion, strong, of good quality, and said to be a good keeper.

118557. No. 1144. From Skardo, Baltistan Province, August 14, 1936, at 6,500 feet altitude. A mixed sample of red and white onions, the two varieties grown in this region.

118558. ALLIUM SATIVUM L. Garlic.

No. 1140. *Asgakpa*. Bulbs from Skardo, Baltistan Province, August 14, 1936 at 6,500 feet altitude. Used for flavoring.

118559. ALLIUM sp.

No. 1070. From above Tarakbal, at 10,000 feet altitude in an alpine meadow, July 21, 1936. An ornamental plant about 6 inches high.

118560. ALLIUM sp.

No. 1094. From Burzil, in an alpine meadow at 10,000 feet altitude, August 5, 1936. An ornamental plant with a head of yellow flowers.

118561. ALLIUM sp.

No. 1122. From Sodpur, Baltistan Province, at 7,500 feet altitude, August 10, 1936. A plant 18 inches high with heads of fragrant white flowers; found along a watercourse.

118562. ALLIUM sp.

No. 1105. Bulbs from Burzil, August 6, 1936, at 11,000 feet altitude. A plant about 2 feet high with rose-purple flowers; grows best in dry rocky places.

118556 to 118661—Continued.

118563. ALLIUM sp.

No. 1057. *Pran*. From Bandipur, July 29, 1936, at 5,200 feet altitude. An onion described as small but strong scented.

118564. ANDROSACE sp. Primulaceae.

No. 1085. From Charban, August 3, 1936, at 8,000 feet altitude. A plant with a compact rosette of leaves and a flower stalk 1 foot high, with a terminal cluster of flowers.

118565. ANDROSACE sp. Primulaceae.

No. 1088. From a mountain slope, 11,000 feet altitude near Burzil, August 5, 1936. A rock plant 2 inches high, found growing in mats. The flowers are pink, with a darker eye.

118566. ANEMONE sp. Ranunculaceae.

No. 1098. From an alpine meadow at 10,000 feet altitude, near Burzil, August 6, 1936. A bushy ornamental plant up to 19 inches high, with large, semidouble, yellow or white flowers over an inch across.

118567 to 118569. AQUILEGIA spp. Ranunculaceae. Columbine.

118567. AQUILEGIA VULGARIS L.

No. 1074. From above Tarakbal, July 31, 1936, at 10,000 feet altitude, in a damp fir forest. A very attractive plant nearly 4 feet high, with fragrant flowers 2 inches across; spurs white or tinged rose or purple, petals yellowish.

118568. AQUILEGIA sp.

No. 1082. From near Charban, August 3, 1936, on a dry open slope at 8,000 feet altitude. A plant 18 inches high found growing in clumps with abundant, very fragrant flowers; petals yellow and spurs tipped with rose.

118569. AQUILEGIA sp.

No. 1091. From an alpine meadow near Burzil, at 9,000 feet altitude, August 5, 1936. A plant 18 inches high with very attractive flowers, 1½ inches across; sepals deep blue purple, petals rich wine-colored.

118570. ASTRAGALUS sp. Fabaceae.

No. 1103. From Burzil, August 6, 1936, at 10,000 feet altitude. A plant 4 feet tall, found in clumps in dry open places. The flowers, whitish tinged with red, are in long spikes.

118571. BRASSICA OLERACEA VIRIDIS L. Brassicaceae. Kale.

No. 1043. *Karum Sag*. From Srinagar, July 27, 1936. Purchased in the bazar. The leaves are picked all summer for greens; by autumn the plant may be 5 feet tall.

118572. BRASSICA RAPA L. Brassicaceae. Turnip.

No. 1136. From Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. Said to be a round, sweet, white turnip of superior quality.

118573. CALTHA PALUSTRIS L. Ranunculaceae. Marshmarigold.

No. 1072. Variety *Alba*. From above Tarakbal, at 10,000 feet altitude in the dry, rocky bed of a spring freshet, August 1, 1936. A white-flowered form.

118556 to 118661—Continued.

118574. *CAPSICUM ANNUM L.* Solanaceae.
Common redpepper.

No. 1050. *Marzuwangun.* From Srinagar, July 27, 1936. Seeds taken from dried fruits purchased in the bazar. Fruits to 6 inches long, sharp, red, and 1½ inches wide.

118575. *CHENOPODIUM ALBUM L.* Chenopodiaceae.

No. 1051. *Ostahak.* Seeds purchased in the market at Srinagar, July 27, 1936. Plant over 6 feet high; leaves used as a potherb.

For previous introduction see 115889.

118576 to 118578. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

118576. No. 1004. *Tarbus; handvend.* From Dal Lake, July 19, 1936. Fruit subglobose, 14 inches long, dark green with thick rind and pink flesh; fairly sweet, but with large air spaces. The plants are grown on rafts in the water; the floating rafts are made by piling dirt and pond weeds, bulrushes, cattails, etc., on sticks, and the ripe fruits often seem half in the water.

118577. No. 1039. *Handvend.* From Srinagar, July 25, 1936, at 5,200 feet altitude. Fruit globose, 14 inches long, pale green with faint fine mottling; flesh particularly sweet and air spaces particularly large. Grown on a floating raft in Lake Dal.

118578. No. 1045. *Handvend.* From the market at Srinagar, July 27, 1936. Fruit dark green, 10 inches in diameter; rind tough and hard; flesh sweet and very seedy; seeds red and black.

118579. *CODONOPSIS* sp. Campanulaceae.

No. 1081. From Gurez, August 2, 1936, at 8,500 feet altitude. Plant grows 3 feet high in dry or damp open situations and has attractive bell-like, purple-blue flowers.

118580. *COLUTEA* sp. Fabaceae.

No. 1108. From Sodpur, Baltistan Province, August 10, 1936, on a dry slope at 7,000 feet altitude. A shrub up to 5 feet high, with thick glaucous pinnate leaves and yellow flowers, but it is chiefly interesting for the large inflated pods that remain till winter.

118581. *CUCUMIS MELO L.* Cucurbitaceae.
Muskmelon.

No. 998. *Karbuza.* From Srinagar, July 17, 1936, at 5,000 feet altitude. Fruits 18 inches long, ellipsoid, yellow, decidedly but sparsely netted, fragrant and of fair flavor. Its chief quality is its adaptability to wet conditions. Grown on the floating raft gardens in Lake Dal.

118582. *CUCUMIS MELO L.* Cucurbitaceae.
Muskmelon.

No. 1046. *Sarda.* Fruit bought in the bazar at Srinagar, July 27, 1936, but probably of western origin. Fruit yellow, nearly smooth, elongate or round, 1 foot long; fragrant with thick sweet flesh.

118583. *CUCUMIS SATIVUS L.* Cucurbitaceae.
Cucumber.

No. 1007. From Dal Lake, July 20, 1936. Fruit 2 feet long and 4 inches through, smooth, pale green, becoming netted and golden brown when ripe. Plants grown on floating rafts.

118556 to 118661—Continued.

118584. *CUCUMIS SATIVUS L.* Cucurbitaceae.
Cucumber.

No. 1059. From Bandipur, July 31, 1936. A wild fruit, the shape and size of an egg, pale green, and the pulp not acid.

118585. *DAUCUS CAROTA L.* Apiaceae.
Carrot.

No. 1134. *Wapalu.* From Skardo, Baltistan Province, at 6,500 feet altitude, August 12, 1936. Probably a mixture of two extremes; one yellow, one white, but both woody and watery.

118586. *DELPHINIUM* sp. Ranunculaceae.
Larkspur.

No. 1063. From above Bandipur, July 30, 1936, in a pine forest. A very attractive plant 3 feet high, with sky-blue flowers; growing on a dry rocky slope.

118587. *DIANTHUS* sp. Silenaceae.

No. 1064. From above Bandipur, July 20, 1936. Plants 19 inches high with large, attractive, unscented white flowers. Found growing in clumps on a dry rocky slope near a pine forest.

118588. *DIANTHUS* sp. Silenaceae.

No. 1129. From Skardo, Baltistan Province, at 6,500 feet altitude, August 12, 1936. Plant 1 foot high with narrow glaucous basal leaves and white single flowers 1¼ inches across. Found on dry open plain.

118589. *EPHEDRA* sp. Gnetaceae.

No. 1084. From Peshwari, at 8,500 feet altitude, August 4, 1936. An ornamental plant 6 inches high, laden with red berries, found growing on a dry open slope.

118590. *EREMURUS HIMALAICUS* Baker.
Liliaceae. Himalayan desertcandle.

No. 1087. From Mimarg, August 4, 1936, at 8,500 feet altitude. Plants 5 feet high, with creamy white flowers.

118591. *FRAGARIA* sp. Rosaceae.

No. 1071. July 31, 1936. From above Tarakbal at 10,000 feet altitude. Plants 6 inches high, with pleasant crimson fruits one-half inch in diameter.

118592. *FRTLILLARIA* sp. Liliaceae.

No. 1096. August 5, 1936. From Burzil, in alpine meadows at 10,000 feet altitude. Bulbs of plants 2½ to 3 inches high.

118593. *GENTIANA* sp. Gentianaceae.

No. 1104. From Burzil, August 6, 1936, at 10,000 feet altitude. Plants 18 inches high, with attractive wine to purplish flowers. Found growing in rather dry places.

118594. *IMPATIENS* sp. Impatiensaceae.

No. 1077. August 1, 1936. From Karagabal, at 8,000 feet altitude. Attractive plants over 3 feet high, covered with a succession of large rose-colored flowers 1 by 1½ inches wide; often found on dry open ground in pure colonies.

118595. *IMPATIENS* sp. Impatiensaceae.

No. 1068. July 31, 1936, above Tarakbal at 10,000 feet altitude. Plants 3 feet high, found in pure colonies on dry ground in openings in fir forest. The attractive deep old-rose flowers, 1 to 1½ inches across, are borne in clusters.

118556 to 118661—Continued.

118596 to 118599. IRIS spp. Iridaceae.

118596. IRIS KUMAONENSIS Wall.

No. 1099. From Burzil, August 5, 1936, in alpine meadows at 10,000 feet altitude.

For previous introduction see 110098.

118597. IRIS sp.

No. 1060. From Bandipur, July 30, 1936. A wild iris of the Apogon section.

118598. IRIS sp.

No. 1013. From Partan, July 22, 1936, at 5,000 feet altitude. Plants 4 feet high growing in semishade on damp ground, with several flowers on each stalk; Apogon section.

118599. IRIS sp.

No. 1014. From Partan, July 22, 1936, at 5,000 feet altitude. Plants in masses, often filling the whole roadside; clusters up to 2½ feet high; Apogon section.

118600. JUGLANS REGIA L. Juglandaceae.
Persian walnut.

No. 1080. From Gurez, Kashmir, August 2, 1936, at 8,500 feet altitude. Stunted trees usually not over 25 feet high and 1 foot in diameter, found in groves in ravines along the river on the isolated slopes that have otherwise practically no trees. The season is short, and the winters are said to be very cold.

118601 to 118604. LACTUCA spp. Cichoriaceae.
Lettuce.

118601. LACTUCA SATIVA L. Garden lettuce.

No. 1127. *Dum.* From Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. A native head lettuce, now going to seed; plants 3 feet high, seeds white.

118602. LACTUCA sp.

No. 1055. From Bandipur, July 29, 1936.

118603. LACTUCA sp.

No. 1062. July 30, 1936. Above Bandipur in pine forest at 7,000 feet altitude. A wild plant 3 feet high, with purple flowers.

118604. LACTUCA sp.

No. 1126. *Dum.* From Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. A native head lettuce, now going to seed; plants 3 feet high, seeds black.

118605. ALTHAEA ROSEA (L.) Cav. Malvaceae.
Hollyhock.

No. 1053. From Bandipur, July 29, 1936, at 5,200 feet altitude.

118606. LAVATERA sp. Malvaceae.

No. 1075. From Karagbal, August 1, 1936, at 8,000 feet altitude. A very attractive plant, 4 feet high, covered with lovely rose-pink flowers 3 inches across. Found growing in clumps and not so scraggly as most of our mallows. Tolerant of heat and drought.

118556 to 118661—Continued.

118607. LLOYDIA sp. Liliaceae.

No. 1095. From Burzil, August 5, 1936, on a mountain slope at 11,000 feet altitude. An onionlike plant 9 inches high; flowers probably yellowish with purple markings.

118608 to 118610. LONICERA spp. Cadi-foliaceae.

118608. LONICERA sp.

No. 1109. August 10, 1936. From above Sodpur, Baltistan Province, at 12,000 feet altitude, on a dry slope along a stream. A well-formed attractive shrub 8 feet high, with small pale-green leaves and lovely orange to orange-red berries.

118609. LONICERA sp.

No. 1110. August 10, 1936. From above Sodpur, Baltistan Province, at 12,000 feet altitude, on dry ground. A well-formed shrub 4 feet high, with stiff, bristly-edged leaves and attractive orange berries.

118610. LONICERA sp.

No. 1118. August 10, 1936. From above Sodpur, Baltistan Province, at 12,000 feet altitude on a dry slope. An ornamental well-branched shrub, 4 feet high, with attractive red berries.

118611. LYCOPERSICON ESCULENTUM Mill. Solanaceae.
Tomato.

No. 1006. From Dal Lake, July 19, 1936. Red fruits 1½ inches in diameter, flattened to one-half inch. Grown on the floating rafts along with cattails and bulrushes.

118612. MALVA SYLVESTRIS L. Malvaceae.

No. 1124. From Skardo, Baltistan Province, August 11, 1936, in a garden at 6,500 feet altitude. A cultivated bushy plant 3 feet high, with rose-purple flowers 1½ to 2 inches across.

118613. MECONOPSIS sp. Papaveraceae.

No. 1100. From Burzil, August 5, 1936, at 10,000 feet altitude. A plant 2 feet high, which grows under ledges or in the open; flowers blue-purple or tinged with wine red.

118614. MEDICAGO SATIVA L. Fabaceae.
Alfalfa.

No. 1154-A. From Skardo, Baltistan Province, August 15, 1936, at 6,500 feet altitude. Said to be very good.

118615. MELILOTUS sp. Fabaceae.

No. 1154-B. From Skardo, Baltistan Province, August 15, 1936, at 6,500 feet altitude. A form with yellow flowers; "said to be poisonous unless watered before it is fed to stock."

118616. MEDICAGO SATIVA L. Fabaceae.
Alfalfa.

No. 1154-C. From Skardo, Baltistan Province, August 15, 1936, at 6,500 feet altitude; said to be Gilgiti in origin and to give three or four cuttings a year.

118617. MEDICAGO SATIVA L. Fabaceae.
Alfalfa.

No. 1154-D. From Skardo, Baltistan Province August 15, 1936, at 6,500 feet altitude; said to be a tall Yarkand sort.

118556 to 118661—Continued.

118618. *MEDICAGO SATIVA* L. Fabaceae.
Alfalfa.

No. 1056. From Bandipur, July 29, 1936. An alfalfa that becomes 6 feet high; said to be an excellent fodder.

118619. *MOMORDICA CHARANTIA* L. Cucurbitaceae.
Balsam-pear.

No. 1040. *Karela*. From Srinagar, July 26, 1936, at 5,200 feet altitude. Fruit 6 inches long, tender and only moderately bitter; watery with large flattened tubercules.

For previous introduction see 116939.

118620. *MOMORDICA* sp. Cucurbitaceae.

No. 993. *Kakari*. From Lahore, Punjab, July 14, 1936. A rather top-shaped fruit 2 inches in diameter, papillose, green turning yellow, while the seeds are in a red matrix. The bitter fruit is used as a vegetable.

118621 to 118623. *MORUS* spp. Moraceae.
Mulberry.

From Skardo, Baltistan Province, August 12 to 14, 1936, at 6,500 feet altitude.

118621. *MORUS* sp.

No. 1128. Fruit 1 to 1½ inches long, resembling a loganberry in form, color, and taste. One of the best mulberries found.

118622. *MORUS* sp.

No. 1135. Fruit 1 inch long and one-half inch wide, white with large druplets; sweet and rich-flavored.

118623. *MORUS* sp.

No. 1146. Fruit 1½ inches long and five-eighths of an inch wide, lavender purple to black, resembling a blackberry. Seeds small and inconspicuous. Fruit very sweet.

118624. *MYRICARIA* sp. Tamaricaceae.

No. 1116. From Sodpur, Baltistan Province, August 11, 1936, at 7,000 feet altitude, along a lake. An ornamental shrub about 6 feet high, with long graceful branches, small, thick, pale-green leaves, and terminal spikes of pink flowers.

118625. *MYRICARIA* sp. Tamaricaceae.

No. 1120. From Sodpur, Baltistan Province, August 10, 1936, at 12,500 feet altitude, along a stream. A useful ornamental which resembles the tamarisk in form, but has larger leaves.

118626. *MYOSOTIS SYLVATICA* Hoffm. Boraginaceae.
Forget-me-not.

No. 1067. From above Tarakbal, July 31, 1936, at 10,000 feet altitude.

118627. *NARCISSUS* sp. Amaryllidaceae.

No. 1058. Bulbs from Srinagar, July 30, 1936. Said to be native.

118628. *OCIMUM* sp. Menthaceae.

No. 1047. From the market at Srinagar, July 27, 1936.

118629. *OCIMUM* sp. Menthaceae.

No. 1048. From the market at Srinagar, July 27, 1936.

118556 to 118661—Continued.

118630 to 118632. *PAPAVER* spp. Papavera-
ceae.
Poppy.

118630. *PAPAVER SOMNIFERUM* L.
Opium poppy.

No. 1132. *Lamgan*. From Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. A variety with large, double, crimson flowers 3 to 4 inches across.

118631. *PAPAVER RHOEAS* L.

No. 1125. From Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. A cultivated annual 3 feet high, with fully double, deep crimson to pink flowers 2 inches across. Said to have come from Iran (Persia).

118632. *PAPAVER SOMNIFERUM* L.
Opium poppy.

No. 1133. From a garden at Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. Said to be an annual with double pink flowers of medium size.

118633. *PARAQUILEGLIA* sp. Ranunculaceae.

No. 1093. From Burzil, August 5, 1936, at 11,000 feet altitude. Plants growing in clumps on the mountain peak; flowers probably pale blue purple.

118634. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 1141. *Pokshang*. From Skardo, Baltistan Province, August 14, 1936, at 6,500 feet altitude.

118635. *PLANTAGO OVATA* Forsk. Plantagi-
naceae.

No. 1049. *Ismogul*. From the market at Srinagar, July 27, 1936. An annual plantain, the seeds of which are used medicinally. Native to the Mediterranean region.

For previous introduction see 5441.

118636. *POLEMONIUM* sp. Polemoniaceae.

No. 1079. From Gurez, August 2, 1936, at 8,500 feet altitude. Plant 3½ feet high, found on damp ground in both open places and shade. The terminal clusters of large blue-purple flowers are very attractive.

118637. *PORTULACA* sp. Portulacaceae.

No. 1131. From a garden at Skardo, Baltistan Province, August 12, 1936, at 6,500 feet altitude. The flowers of this species here are all alike; nearly 2 inches across, deep rose magenta with a white throat.

118638. *PRANGOS* sp. Apiaceae.

No. 1097. *Palangos*. From Peshwari, August 3, 1936, at 8,500 feet altitude. A bushy plant with long, finely divided basal leaves and a flower stalk 3 feet high, with yellow flowers. When dry the plant is cut for fodder and is said to be relished by all stock except horses. Found on dry hill-sides and said to be tolerant of heat, drought, and low temperatures.

118639 to 118643. *PRIMULA* spp. Primu-
laceae.
Primrose.

From near Burzil, August 5, 1936, along streams.

118556 to 118661—Continued.

118639 to 118643—Continued.

118639. PRIMULA sp.

No. 1089. Plant 3 feet high, with blue-purple or purple flowers with yellow eyes, in heads 2 inches across; found at 9,000 feet altitude.

118640. PRIMULA sp.

No. 1090. Plant 3 feet high, flowers probably white, tinged with pink; found at 10,000 feet altitude.

118641. PRIMULA sp.

No. 1092. Plant 6 inches high, leaves whitish beneath, flowers not seen; from 11,000 feet altitude.

118642. PRIMULA sp.

No. 1101. Plant up to 18 inches high, with head of large purplish flowers with lighter eye; very attractive, will grow on high ground, but does best with roots in cold water.

118643. PRIMULA ROSEA Royle.

No. 1102. From 11,000 feet altitude, just below the snow line. A primula that often forms large tufts 4 to 8 inches high, with oblong-ovate or oblanceolate, crenulate, or small-toothed leaves and few to many rose-red flowers in a loose head, before the leaves. Native to the western Himalayas.

For previous introduction see 28232.

118644. RIBES sp. Grossulariaceae.

No. 1121. From Sodpur, Baltistan Province, August 11, 1936, at 11,000 feet altitude. A compact bush up to 6 feet high, well-laden with orange-red fruits; sweet but with large seeds; used for jams and jellies. The plant, with its persistent fruit and strong green leaves, is distinctly ornamental.

118645. ROSA sp. Rosaceae.

No. 1061. From above Bandipur, July 30, 1936, at 6,000 feet altitude. Dense, rounded, free-flowering bushes 5 feet high, growing wild on a dry isolated slope.

118646. RUBUS sp. Rosaceae.

No. 1075. From near Karagbal, August 1, 1936, at 9,000 feet altitude, on a dry slope at the edge of a fir forest. Bushes 2 feet high, bearing sweet, fragrant, red fruits one-half inch in diameter.

118647. RUBUS sp. Rosaceae.

No. 1086. From Peshwari, August 3, 1936, at 8,500 feet altitude. Plant 1 foot high, found growing in deep shade in fir forest. The few fruits were red, acid, and about one-half inch in diameter.

118648. NEPETA ERECTA (Royale) Benth. Menthaceae.

No. 1073. Above Karagbal, July 31, 1936, at 10,000 feet altitude. An herb 18 inches tall with ovate or oblong acute leaves and many small blue-purple flowers in axillary or terminal spikes. Found growing in fir forest. Native to the Himalayan region.

118649. SAMBUCUS WIGHTIANA Wall. Caprifoliaceae.

No. 1005. From above Bandipur, July 30, 1936, in pine forest in shade and sun. A shrubby plant with herbaceous stems 4 to 5 feet high, large pinnatifid leaves, and corymbs of creamy, heavy-scented flowers, followed by small, orange, edible berries. Native to India.

118556 to 118661—Continued.

118650. BERGENIA sp. Saxifragaceae.

No. 1113. From a dry slope above Sodpur, Baltistan Province, August 10, 1936, at 11,000 feet altitude. A perennial with 2 or 3 large shining leaves and a spray of white to pink flowers. The leaves turn red in the autumn.

118651. SEDUM sp. Crassulaceae.

No. 1083. From Charban, August 3, 1936, at 8,000 feet altitude, on a dry open slope. Plants 8 inches high with a rosette of fleshy leaves and pinkish flowers.

118652. SOLANUM MELONGENA L. Solanaceae. Eggplant.

No. 1156. Paghan. From Skardo, Baltistan Province, August 5, 1936, at 6,500 feet altitude. Medium-sized green fruits more or less tinged with purple; of fair quality.

118653. SPINACIA OLERACEA L. Chenopodiaceae. Common spinach.

No. 1153. From Skardo, Baltistan Province, August 15, 1936, at 6,500 feet altitude. Grown as a potherb.

118654. SPINACIA OLERACEA L. Chenopodiaceae. Common spinach.

No. 1052. From Srinagar, July 27, 1936. Purchased in the market. Grown as a potherb.

118655. SPIRAEA CRENATA L. Rosaceae. Snow spirea.

No. 1117. From Sodpur, Baltistan Province, August 10, 1936, at 12,000 feet altitude, along a stream. An ornamental shrub 7 feet high, with well-formed, graceful branches and dense umbels of small white flowers. Native from southeastern Europe to the Caucasus region.

118656. TROLLIUS sp. Ranunculaceae.

No. 1066. From above Tarakbal, July 31, 1936, at 10,000 feet altitude in alpine meadow. A plant 2 feet high.

118657. VIBURNUM NERVOSUM D. Don. Caprifoliaceae.

No. 1078. From near Karagbal, August 2, 1936, from fruit growing in the open along a stream. A large shrub or small tree with elliptic-oblong, shiny green leaves about 3 inches long and cymes of a few small rose-colored flowers followed by purple-black drupes. Native to the Himalayas at altitudes of 10,000 to 13,000 feet.

118658. VIOLA sp. Violaceae. Violet.

No. 1106. From Deosai Plain, Baltistan Province, in a meadow at 12,000 feet altitude, August 8, 1936. Plants small and bushy, growing in clumps 6 inches across and 2 or 3 inches high. The purple flowers have a white spot on the lower petal and are veined with darker purple.

118659. (Undetermined.)

No. 1115. From Sodpur, Baltistan Province, August 10, 1936, at 7,500 feet altitude. An attractive shrubby perennial up to 5 feet high, which grows on dry or damp ground and, in season, is covered with fine purple flowers in long loose spikes.

118660. (Undetermined.)

No. 1119. From below Sodpur, Baltistan Province, August 11, 1936, at 7,000 feet altitude in a stream bed. An ornamental bush 3 feet high, with thick, pale-green, elliptic leaves and white flowers followed by large orange-red berries.

118556 to 118661—Continued.

118661. (Undetermined.)
No. 1107. From Deosai Plain, Baltistan Province, August 7, 1936, at 12,000 feet altitude. An attractive plant 18 inches high, with thick, shiny leaves and long heads of very fragrant white flowers; found growing in clumps.
- 118662 to 118694.
From the State of Matto Grosso, Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received October 9, 1936.
118662. *ACROCOMIA* sp. Phoenicaceae. Palm.
No. 3987. *Bacahuba*. From Capão Bonito, September 5, 1936.
118663. *ARISTOLOCHIA* sp. Aristolochiaceae.
No. 3961. From Capão Grande, September 1, 1936. A tropical twiner with slender stems, leathery, broad-ovate leaves about 2 inches long, and large yellow solitary flowers. Native to Brazil.
118664. *ASPIDOSPERMA* sp. Apocynaceae.
No. 3976. From Fazenda das Moças, near Campo Grande, September 6, 1936.
118665. *ATTALEA* sp. Phoenicaceae. Palm.
No. 3964. *Pindoba*. From Nova Niponica, August 31, 1936. A small palm 20 feet high, whose leaves are used as forage.
118666. *ATTALEA* sp. Phoenicaceae. Palm.
No. 3988. From Capão Bonito, September 5, 1936.
- 118667 and 118668. *BETA VULGARIS* L. Chenopodiaceae. Common beet.
Purchased in a shop in Campo Grande, September 9, 1936.
118667. No. 4009. *Beterraba vermelha comprida*.
118668. No. 4010. *Beterraba roxa redonda*.
- 118669 and 118670. *BRASSICA OLERACEA CAPITATA* L. Brassicaceae. Cabbage.
Purchased in a shop in Campo Grande, September 9, 1936.
118669. No. 3998. *Repolho crespo de Milão*.
118670. No. 3999. *Repolho pé curto de Hollanda*.
118671. *CAPSICUM ANNUUM* L. Solanaceae. Common redpepper.
No. 4008. *Pimentão doce da Hespanha*. Purchased in a shop in Campo Grande, September 9, 1936.
118672. *CARICA PAPAYA* L. Papayaceae. Papaya.
No. 3962. From Campo Grande, September 1, 1936. A cultivated fruit with yellow flesh.
- 118673 and 118674. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.
Purchased in a shop in Campo Grande, September 9, 1936.
118673. No. 4013. *Melancia de Santa Barbara*.
118674. No. 4014. *Melancia favorita*.

118662 to 118694—Continued.

118675. *COCOS* sp. Phoenicaceae. Palm.
No. 3986. Collected halfway between Campo Grande and Capão Bonito, September 4, 1936.
118676. *TEPHEROSIA CANDIDA* DC. Fabaceae.
No. 4024. From the Instituto Agronomico, Campinas, September 15, 1936.
- 118677 and 118678. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.
Purchased in a shop in Campo Grande, September 9, 1936.
118677. No. 4011. *Pepino pequeno cor-nichon*.
118678. No. 4012. *Pepino verde grande*.
118679. *DAUCUS CAROTA* L. Apiaceae. Carrot.
No. 4007. *Cenoura vermelho 1/2 comprida*. Purchased in a shop in Campo Grande, September 9, 1936.
118680. *FICUS* sp. Moraceae. Fig.
No. 3971. From Lagoinho, on the road between Campo Grande and Capão Bonito, September 4, 1936. A large tree whose fruits are hard and green when ripe.
118681. *GOSSYPIUM* sp. Malvaceae. Cotton.
No. 3972. From Boliche Boa Vista, on the road between Campo Grande and Capão Bonito, September 4, 1936.
118682. *GOSSYPIUM* sp. Malvaceae. Cotton.
No. 4025. *Goyas*. From the Instituto Agronomico, Campinas, September 15, 1936. The fiber is brown.
- 118683 and 118684. *LACTUCA SATIVA* L. Cichoriaceae. Garden lettuce.
Purchased in a shop in Campo Grande, September 9, 1936.
118683. No. 4005. *Alface repolhuda des estações*.
118684. No. 4006. *Alface romana*.
- 118685 and 118686. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.
Purchased in a shop in Campo Grande, September 9, 1936.
118685. No. 4003. *Tomate liso grande*.
118686. No. 4004. *Tomate grande vermelho*.
118687. *MELANCIUM CAMPESTRIS* Naud. Cucurbitaceae.
No. 3959. From Campo Grande, September 1, 1936. A decumbent annual with 3- to 5-lobed leaves about 2 inches long and small yellow flowers. The vine and fruit resemble those of the watermelon, and the fruit is sweet scented. Native to Brazil.
118688. *OPUNTIA* sp. Cactaceae.
No. 3958. From Campo Grande, September 1, 1936. A native arborescent species which endures freezing.
118689. *PASSIFLORA ALATA* Curtis. Passifloraceae. Passionflower.
No. 3960. From Campo Grande, September 1, 1936. An evergreen climber with winged stems, oval to ovate entire leaves, large fragrant blue-green flowers, the segments carmine within, and edible fruits about 5 inches long. Native to Brazil.

118662 to 118694—Continued.

118690. *PHASEOLUS VULGARIS* L. Fabaceae.
Common bean.

No. 4000. *Feijão amarelo manteiga*.
Purchased in a shop in Campo Grande,
September 9, 1936.

118691 and 118692. *PISUM SATIVUM* L. Fa-
baceae. Pea.

Purchased in a shop in Campo Grande,
September 9, 1936.

118691. No. 4001. *Ervilha torta flor*
branca.

118692. No. 4002. *Ervilha ãna para*
grão.

118693. *ROLLINIA* sp. Annonaceae.

No. 3973. From Lagoinha, near Campo
Grande, September 6, 1936.

118694. *ROLLINIA* sp. Annonaceae.

No. 3974. From Capão Bonito, Septem-
ber 6, 1936. A medium-sized tree.

118695 to 118715.

From Brazil. Seeds collected by Graham Bell
Fairchild. Received October 5, 1936.

118695. *BAUHINIA* sp. Caesalpinaceae.

From Cambará, Paraná, August 1936.
A small forest tree; flowers not seen, but
at this season the tree is a mass of pinkish
fluff, very ornamental.

118696. *CITRULLUS VULGARIS* Schrad. Cu-
cubitaceae. Watermelon.

From Anapolis, Goyaz. A very sweet
melon with small seeds.

118697 to 118700. *CROTALARIA* spp. Faba-
ceae.

From Anapolis, Goyaz.

118697. A purple-flowered legume.

118698. A legume with small heavy pods.

118699. A shrubby ornamental legume
with yellow flowers.

118700. [No data.]

118701. *EUTERPE* sp. Phoenicaceae. Palm.

Collected in Cambará, Paraná.

118702. *GALACTIA* sp. Fabaceae.

A silver-leaved legume.

118703. *HELIOCARPUS* sp. Tiliaceae.

The tropical American genus *Heliocar-*
pus is composed of trees and shrubs with
usually trilobate leaves and small yellow
or greenish flowers. The wood is soft
and light.

118704. *INDIGOFERA* sp. Fabaceae.

118705 and 118706. *MICONIA* spp. Melasto-
maceae.

From Anapolis, Goyaz. The miconias
are tropical American trees and shrubs
with large, prominently veined leaves and
rather small white, rose, purple, or yel-
low flowers in corymbs and panicles.

118705. A shrub with purple flowers.

118706. An ornamental shrub with dark-
green leaves, rufous hairy beneath,
and spikes of purple berries.

118707. *NICOTIANA TABACUM* L. Solanaceae.
Common tobacco.

From Anapolis, Goyaz. Collected in an
old garden.

118695 to 118715—Continued.

118708. *PHYSALIS* sp. Solanaceae.

From Anapolis, Goyaz. A sweet edible
tomatolike fruit.

118709. *PASSIFLORA* sp. Passifloraceae.

From Anapolis, Goyaz. A large-fruited
passionflower.

118710. *PITHECELLOBIUM* sp. Mimosaceae.

From Cambará, northern Paraná.

118711. *RUBUS* sp. Rosaceae.

From Anapolis, Goyaz. The fruit is
green when ripe, sweet, aromatic, and
seedy.

118712. *TECOMA* sp. Bignoniaceae.

From Cambará, Paraná, August 5,
1936.

Nos. 118713 to 118715 were collected at
Anapolis, Goyaz.

118713. (Undetermined.)

A tree with small pinnate leaves and
seed pods in long racemes. Flowers not
seen.

118714. (Undetermined.)

A plant with gingerlike red fruits.

118715. (Undetermined.)

A plant with blue flowers.

118716 to 118730.

From Honan, China. Seeds presented by
George D. Schlosser, Greenville, Ill. Re-
ceived October 15, 1936.

118716. *HORDEUM VULGARE* COELESTE L.
Poaceae. Six-rowed barley.

A bearded, white, hull-less barley.

118717. *HORDEUM VULGARE TRIFURCATUM*
(Schlecht.) Beauv. Poaceae. Barley.

A white, beardless and hull-less barley.

118718 to 118724. *SETARIA ITALICA* (L.)
Beauv. Poaceae. Millet.

From the Experiment College farm, Kai-
feng, Honan.

118718. [No data.]

118719. Common white millet.

118720. Yellow millet.

118721. Good early millet.

118722. Small yellow millet.

118723. An early millet.

118724. A small yellow millet.

118725 to 118728. *TRITICUM AESTIVUM* L.
Poaceae. Common wheat.

From the Experiment College farm, Kai-
feng, Honan.

118725. An early, drought-resistant, soft
wheat.

118726. No. 12-13. A very good and
early beardless wheat with strong
stems.

118727. No. 124. An early wheat.

118728. A good Chinese wheat.

118729. *ZEA MAYS* L. Poaceae. Corn.

Yellow corn from Honan, drought-re-
sistant and very early. There are 2 ears
on each stalk, and the plant does not grow
suckers.

118716 to 118730—Continued.

118730. *ZEA MAYS* L. Poaceae. Corn.

An early white variety of excellent flint corn from north-central China near the Yellow River.

118731 to 118754.

From the Estado de São Paulo, Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 2, 1936.

118731. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

No. 4125. *Jambo*. October 7, 1936. From the Estação Biológico do Alto de Serra.

118732. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

No. 4126. October 7, 1936. From the peanut oil mill of Giorgi, Picosse & Cia.

118733 to 118754. *NICOTIANA* spp. Solanaceae. Tobacco.118733. *NICOTIANA ALATA* GRANDIFLORA Comes.

No. 4129. Purchased October 8, 1936, from Dierberger & Cia.

118734 to 118753. *NICOTIANA TABACUM* L. Common tobacco.

Presented by the Instituto Agronomico do Estado de São Paulo, Campinas, October 1936.

118734. No. 4160. *Virginia Bright*. From the fazenda Santa Eliza, in 1932.118735. No. 4161. *São Gonçalo*. From Estação Experimental de São Gonçalo dos Campos, Bahia, in 1933.118736. No. 4162. *Yanhi Yaká*. From Directorie de Inspeção e Fomento Agricolas, São Paulo, in 1932.118737. No. 4163. *Brazil Bahia*. From the Instituto Bahiano de Fumo, Bahia, in 1935.118738. No. 4164. *Cubano*. From the Fazenda Santa Eliza, in 1932.118739. No. 4165. *Verpelet*. From Estação Experimental de São Gonçalo dos Campos, Bahia, in 1935.118740. No. 4166. *Georgia*. From Escola Superior de Agricultura de Viçosa, Minas Geraes.118741. No. 4167. *Gober Peloss*. From Buitenzorg, Java, in 1933.118742. No. 4168. *Gober Koenjit*. From Buitenzorg, Java, in 1933.

118743 to 118745. From Estação Experimental de Cana de Assucar, Piracicaba, São Paulo, in 1933.

118743. No. 4169. *Hickory Pryor*.118744. No. 4170. *Habano Colorado*.118745. No. 4171. *Heavy Drooping Leaf*.118746. No. 4172. *Porsutian*. From Italy in 1933.

118747 to 118749. From Tripoli in 1933.

118747. No. 4173. *Fazzani*.118748. No. 4174. *Salento*.118749. No. 4175. *Tripoli*.118750. No. 4176. *Perustitzia*. From Italy in 1933.

118731 to 118754—Continued.

118733 to 118754—Continued.

118734 to 118753—Continued.

118751. No. 4177. *Samsoum*. From Italy in 1933.118752. No. 4178. *Goyano*. From Estação Experimental de Limeira, São Paulo, 1936.118753. No. 4179. *Habana*. From Afonso Penna, Bahia, in 1935.118754. *NICOTIANA SYLVESTRIS* Spegaz.

No. 4128. Purchased from Dierberger & Cia., São Paulo, October 8, 1936.

118755. *CLADRASTIS PLATYCARPA* (Maxim.) Mak. Fabaceae.

From Jamaica Plain, Mass. Plant presented by William H. Judd, Arnold Arboretum. Received November 2, 1936.

A deciduous tree up to about 60 feet high, with rather large pinnate leaves and many small white flowers in large upright pyramidal panicles. This is a Japanese relative of the yellow-wood (*Cladrastis lutea*) of the eastern United States.

118756. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

From Turkey. Roots collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received November 2, 1936.

No. 1050. Wild alfalfa, collected October 12, 1936, 39 km. north of Kastamonu.

118757. *CORYDALIS DIPHYLLIA* Wall. Papaveraceae.

From India. Bulbs purchased from Mrs. P. Kohli, Baramulla, Kashmir. Received November 3, 1936.

A low herbaceous perennial about 2 feet high, with triternate leaves about 1 inch long and yellowish flowers tipped with purple, in racemes 1 to 2 inches long. Native to the Himalayan region.

118758. *RUBUS PROBUS* Bailey. Rosaceae. Raspberry.

From Puerto Rico. Plants presented by Atherton Lee, Agricultural Experiment Station, Mayaguez. Received November 4, 1936.

The so-called "Queensland" raspberry, which is related to *Rubus rosaeifolius* but is less thorny and has glabrous leaves and pedicels, with usually 7 leaflets which are relatively broader than those of *R. rosaeifolius*. The plant is upright, about 8 feet high, and the canes are not perennial. This is a cultivated plant in Puerto Rico, where it has been grown for some years, and is probably originally from Queensland.

For previous introduction see 66088.

118759. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.

From New Zealand. Seeds presented by the Canterbury Agricultural College, Lincoln. Received November 4, 1936.

Cocksfoot Akroa.

118760. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

From Honan, China. Seeds presented by George D. Schlosser, Greenville, Ill. Received November 3, 1936.

A large fall or winter radish.

118761 to 118765. CALLISTEMON spp.
Myrtaceae.

Seedlings growing at the United States Plant Introduction Garden, Chico, Calif. Numbered in November 1936.

118761. CALLISTEMON CITRINUS (Curtis) Skeels.

(Lath house.) Selection No. 1 of P. I. No. 90845.

118762. CALLISTEMON.

(Arboretum.) Selection No. 1 of P. I. No. 90845.

118763. CALLISTEMON.

(Lath house.) Selection No. 5 of P. I. No. 90845.

118764. CALLISTEMON.

(Testing beds.) Selection No. 1 of P. I. No. 90847. A handsome shrub of drooping habit that has reached a height of 5½ feet with a spread of 7 feet. The foliage is dense and the individual leaves resemble those of *Callistemon acuminatus*. The flowers, with very dark red stamens an inch long, are in dense spikes 3 to 5 inches long and appear during April and May. This is a selection from second-generation seedlings of a cross between *C. citrinus* and *C. acuminatus*.

118765. CALLISTEMON.

(Testing beds.) Selection No. 3 of P. I. No. 90847.

118766. HAEMANTHUS NATALENSIS
Pape. Amaryllidaceae.

From South Africa. Seeds purchased from the Winton Nurseries, Bonnie Vale, Cape Province. Received November 9, 1936.

A haemanthus with 8 or 9 membranous, bright-green leaves more than a foot long, the lower ones spotted on the back with red-brown. The small flowers, in a very dense globose mass, 3 to 4 inches in diameter, surrounded by several large, deep-purple bracts, are obscured by the long scarlet filaments and bright yellow anthers. Native to southern Africa.

118767 to 118781.

From Brazil. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received November 20, 1936.

Unless otherwise mentioned, the material was received as seeds.

118767. ACROCOMIA MOKAYAYBA Barb. Rodr.
Phoenicaceae. Palm.

No. 4127. From Capão Bonito, Minas Geraes. A pinnate-leaved palm 12 to 20 feet high, with a dense terminal crown of leaves about 6 feet long and linear leaflets. Native to Brazil.

118768. ACROCOMIA sp. Phoenicaceae. Palm.

No. 4059. From Lavras, eastern Minas Geraes, September 20, 1936.

118769. ARISTOLOCHIA GALEATA Mart. and Zucc. Aristolochiaceae.

No. 4073. From near Mendanha, along a road in eastern Minas Geraes, September 24, 1936. A twining aristolochia allied to *A. brasiliensis*, with broad cordate leaves about 3 inches long and large solitary flowers, green and dark purple. Native to Brazil.

118767 to 118781—Continued.

118770. CORCHORUS CAPSULARIS L. Tiliaceae. Jute.

No. 4038. *Yassourão*. From the Escola Agricola de Lavras, Minas Geraes, September 19, 1936. Used as a substitute for flax.

118771. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

No. 4031. From the market at São Paulo, September 14, 1936. This melon is now arriving from Portugal, being shipped in large quantities by boat. Each fruit is wrapped in cellophane.

118772. FICUS NITIDA Thunb. Moraceae. Fig.

No. 4039. From the Escola Agricola de Lavras, September 19, 1936. A tree 20 feet high; reproduced by cuttings.

118773. FRAGARIA VESCA L. Rosaceae. Strawberry.

No. 4027. From the market at Campinas, eastern São Paulo, September 15, 1936.

118774. FREESIA REFRACTA (Jacq.) Klatt. Iridaceae.

No. 4130. Purchased from Dierberger & Cia., São Paulo, October 8, 1936. Flowers were varicolored, pink, white, blue, etc.

118775. GOSSYPIUM PERUVIANUM Cav. Malvaceae. Cotton.

No. 4081. *Rim de Boi*. From near Mendanha, Minas Geraes. Plant 15 feet high, flowers pale yellow tinged with pink.

118776. HIPPEASTRUM ORGANENSE Hook. Amaryllidaceae.

No. 4115. From Serra de Piedade, September 1936. Bulbs of a Brazilian hippeastrum with 5 or 6 lorate, purple-glaucous leaves about a foot long and a stout peduncle usually bearing 2 large bright-crimson flowers with a green mark on each segment.

118777. INDIGOFERA ENDECAPHYLLA Jacq. Fabaceae. Indigo.

No. 4116. From the Fazenda Gamelleira of the Secretaria de Agricultura, Bello Horizonte, eastern Minas Geraes, August 24, 1936. An annual or biennial tropical African prostrate legume 2 to 3 feet long, with 7 to 9 oblong leaflets and a dense raceme of violet purple flowers. Used as a cover crop.

For previous introduction see 77296.

118778. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

No. 4070. Near Mendanha, along a road in eastern Minas Geraes, September 24, 1936; near a long-abandoned camp.

118779. ZEA MAYS L. Poaceae. Corn.

No. 4232. *Milho cravo*. From Lavras, eastern Minas Geraes, September 19, 1936.

118780. ZEPHYRANTHES COMMERSONIANA Herbert. Amaryllidaceae.

No. 4114. From Sierra de Piedade, eastern Minas Geraes, September 1936. Bulbs of a zephyranthes with 3 or 4 narrow linear leaves about 8 inches long and flowers over an inch long with bright-red limbs, yellow at the base. Native to Argentina and Uruguay.

118767 to 118781—Continued.

118781. ZEPHYRANTHES CARINATA Herbert. Zephyrilly. Amaryllidaceae.

No. 4091. Bulbs collected along the highway between Diamantina and Guinda, eastern Minas Geraes, March 25, 1936. A bulbous perennial with linear leaves and a scape about a foot high, bearing a single rosy flower. Said to be the largest and choicest of the rosy-flowered zephyrillies and blooms in the summer. Native to the West Indies.

For previous introduction see 112351.

118782 to 118790. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

From Venezuela. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received November 2, 1936.

118782. No. 1. From La Victoria, Aragua, July 22, 1936.

118783. No. 2. *Riñon*. From Yaritagua, Yaracuy, at 374 m. altitude, September 23, 1936.

118784. No. 3. From El Cordero, Lara, at 580 m. altitude. September 25, 1936. A very small variety.

118785. No. 4. *Liso*. From Yaritagua, Yaracuy, at 374 m. altitude, September 23, 1936.

118786. No. 5. *Jobo*. From Yaritagua, Yaracuy, at 374 m. altitude, September 23, 1936.

118787. No. 6. From Yagua, Carabobo, at 450 m. altitude, September 15, 1936.

118788. No. 7. *Isteña*. From Yagua, Carabobo, at 450 m. altitude, September 15, 1936.

118789. No. 8. From Yagua, Carabobo, at 450 m. altitude September 15, 1936.

118790. No. 9. From Yagua, Carabobo, at 450 m. altitude, September 15, 1936.

118791 and 118792. SACCHARUM. Poaceae. Sugarcane.

From Australia. Cuttings presented by the Bureau of Sugar Experiment Stations, Brisbane, at the request of E. W. Brandes, Bureau of Plant Industry. Received November 10, 1936.

118791. N. G. 15 × 28 N. G. 251.

118792. *Oramboo* × 28 N. G. 251.

118793. HYPARRHENIA RUF A (Nees) Stapf. Poaceae. Jaragua grass.

From São Paulo, Brazil. Seeds presented by J. F. Tippet, New York City, N. Y., through H. N. Vinall, Bureau of Plant Industry. Received November 12, 1936.

A perennial grass, native to Brazil and cultivated there and at other places in the American Tropics. It is a leafy bunchgrass, the tussocks of which become a foot or so in diameter and the numerous leafy culms 6 to 10 feet high. It is primarily a hay grass.

For previous introduction see 54679.

118794. LILIUM BROWNII Poit. Liliaceae. Browns lily.

From China. Seeds presented by Dr. Andrew Tze, Hong Kong. Received November 13, 1936.

Seed from plants growing wild in the hills of Hong Kong. A Chinese lily with

118794—Continued.

stem 2 to 3 feet high and lanceolate leaves 3 to 5 inches long. The trumpet-shaped flowers, usually solitary but sometimes 2 to 4 together, are 6 to 8 inches long and nearly as wide and are delicately fragrant. The waxy segments are creamy white inside, fading to pure white and tinged with yellow at the base. Outside they are white with brown-purple midribs, the 3 outer ones variably tinged with brownish purple.

For previous introduction see 105324.

118795 and 118796.

From Nebraska. Seeds purchased from J. B. E. Wernecke, Royal, Nebr. Received November 9, 1936.

118795. AMORPHA CANESCENS Pursh. Fabaceae.

118796. AMORPHA FRUTICOSA L. Fabaceae. Indigobush.

For previous introduction see 107651.

118797 to 118800. CINCHONA spp. Rubiaceae.

From Tanganyika Territory, Africa. Seeds presented by the East African Agricultural Research Station, Amani. Received November 11, 1936.

118797. CINCHONA OFFICINALIS L.

A tree, native to the Andes, yielding a bark remarkably rich in quinine which crystallizes readily as quinine sulfate.

For previous introduction see 104220.

118798. CINCHONA PUBESCENS Vahl.

For previous introduction see 104224.

118799. CINCHONA PUBESCENS × OFFICINALIS.

Introduced under the specific name "robusta," for which a place of publication has not been found.

118800. CINCHONA OFFICINALIS × PUBESCENS.

For previous introduction see 104222.

118801 to 188808.

From Brooklyn, N. Y. Plants presented by the Brooklyn Botanic Garden, Brooklyn. Received November 16, 1936.

118801. ACTINIDIA CALLOSA Lindl. Dilleniaceae.

A climbing shrub, becoming 20 feet or more long, with conspicuous lenticels on the branchlets. The oval to oblong, serrulate acuminate leaves are 3 to 5 inches long, and the small white flowers, one-half inch across, are followed by ovoid spotted fruits 1 inch long. Native to the Himalayas and southwestern China.

For previous introduction see 114707.

118802. EUPTELEA POLYANDRA Sieb. and Zucc. Tro hodendraceae.

A shrub or small tree to 30 feet high, with roundish-ovate, dentate leaves 2 to 4 inches long and precocious flowers, conspicuous by their red anthers. Native to Japan.

118803. EUROTIA EVERSMANNIANA Stzchégel. Chenopodiaceae.

A shrub to about 6 feet high, with small oval or oblong-ovate rigid leaves. Native to western Asia.

118801 to 118808—Continued.

118804. *EVODIA HUPEHENSIS* Dode. **Ruta-**
Evodia. **ceae.**

A common tree in the woodlands of western Hupeh, China, where it grows to a height of 20 to 40 feet. It has smooth gray bark, spreading branches, and white flowers in large flat corymbs.

For previous introduction see 90143.

118805. *LONICERA HETEROLOBA* Batalin. **Caprifoliaceae.**

A shrub similar to *Lonicera tatsienensis*, but with smaller, more hairy leaves. Native to northwestern China.

118806. *RUBUS FLOSCULOSUS* Focke. **Rosa-**
ceae.

A deciduous shrub up to 12 feet in height, with stout erect stems arching at the much-branched top. The pinnate leaves, 4 to 7 inches long, are smooth above and covered beneath with a close white felt. The small pink flowers, in narrow racemes, 2 to 4 inches long, are succeeded by small, very dark-red or black edible fruits of agreeable flavor. Native to central and western China.

For previous introduction see 66605.

118807. *RUBUS XANTHOCARPUS* Bur. and Franch. **Rosaceae.**

A perennial Chinese climber, 1 to 4 feet long, sparsely prickly or unarmed, which dies to the ground every year. The edible fruits are golden yellow. Native to central and western China.

For previous introduction see 92796.

118808. *STYRAX DASYANTHA* Perkins. **Sty-**
racaceae. **Snowbell.**

An ornamental Chinese shrub or small tree up to 25 feet high, with oblong-elliptic leaves about 3 inches long and showy white flowers in slender racemes.

For previous introduction see 104208.

118809 to 118823.

From Brazil. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received November 6, 1936.

118809. *ARACHIS HYPOGAEA* L. **Fabaceae.**
Peanut.

No. 4212. From Usina, 9 km. west of Santa Cruz de Rio Pardo, São Paulo, October 12, 1936.

118810. *Cocos* sp. **Phoenicaceae.** **Palm.**

No. 4214. From Usina, 9 km. west of Santa Cruz de Rio Pardo, São Paulo, October 12, 1936.

118811. *Cocos* sp. **Phoenicaceae.** **Palm.**

No. 4213. From Usina, 9 km. west of Santa Cruz de Rio Pardo, São Paulo, October 12, 1936.

118812. *GOSYPIUM HIRSUTUM* L. **Malva-**
ceae. **Upland cotton.**

No. 4200. From Usina, 9 km. west of Santa Cruz de Rio Pardo, São Paulo, October 12, 1936.

118813 to 118819. *HIPPEASTRUM* spp. **Amaryllidaceae.**

Nos. 118813 to 118818. Bulbs presented by Dr. F. C. Hoehne, Estação Biológico de Alto de Serra, city of São Paulo, October 8, 1936.

118809 to 118823—Continued.

118813 to 118819—Continued.

118813. *HIPPEASTRUM AULICUM* ROBUSTUM (A. Dietr.) Voss.

No. 4154. Flowers red; said to be native in this region.

For previous introduction see 118385.

118814. *HIPPEASTRUM BLUMENAVIA* (Carr.) Sealy.

No. 4153. A hippeastrum allied to *H. vittatum*, with smaller narrow-oblong to broad oblong-oval petiolate leaves and 4 or 5 white or pale reddinged flowers 2 inches long. Native to southeastern Brazil.

118815. *HIPPEASTRUM CALYPTRATUM* (Ker) Herbert.

No. 4158.

For previous introduction and description see 118441.

118816. *HIPPEASTRUM PSITTACINUM* (Ker) Herbert.

No. 4157. A robust hippeastrum with 6 to 8 strap-shaped leaves about 2 feet long and a 2- to 4-flowered umbel on a stout peduncle. The perianth limb is 4 to 5 inches long, and the segments are apple green with profuse crimson markings. Native to Brazil.

118817. *HIPPEASTRUM PUNICEUM* BARBATUM (Herbert) Voss.

No. 4155. A variety with umbels of about 3 white flowers. Native to tropical South America.

118818. *HIPPEASTRUM RUTILUM* CROCATUM (Ker) Baker.

No. 4156. A variety differing from the type in having bright-orange flowers, more undulate segments, larger leaves, and a taller stem.

118819. *HIPPEASTRUM PSITTACINUM* (Ker) Herbert.

No. 4139. Bulbs from Bututan, São Paulo, October 8, 1936.

For previous introduction and description see 118816.

118820. *TRITONIA HYALINA* (L.) Baker. **Iridaceae.**

No. 4118. Bulbs purchased from Dierberger & Cia., city of São Paulo, October 6, 1936. A tritonia with slender or branched stems about 1 foot high; flowers pale salmon, marked with white outside, in a raceme. Native to South Africa.

118821. *ZEPHYRANTHES CANDIDA* (Lindl.) Herbert. **Amaryllidaceae.**

No. 4159. Bulbs presented by Dr. F. C. Hoehne, Estação Biológico de Alto de Serra, city of São Paulo, October 8, 1936. A subtropical white-flowered species with linear leaves a foot long appearing with the flowers; the flowers are often rose tinted on the outside and about 2 inches long. Native to Argentina.

For previous introduction see 112350.

118822. *ZEPHYRANTHES* sp. **Amaryllidaceae.**

No. 4182. Bulbs presented by Augusto Gehrt, city of São Paulo, October 8, 1936. A variety with pink flowers.

118809 to 118823—Continued.

118823. ZEPHYRANTHES CARINATA Herbert.
Amaryllidaceae. Zephyrilly.

No. 4119. Bulbs purchased from Dierberger & Cia., city of São Paulo, October 6, 1936.

For previous introduction and description see 118781.

118824 and 118825.

From the Union of Soviet Socialist Republics. Scions presented by the Institute of Plant Industry, Leningrad. Received January 18, 1936. Numbered in November 1936.

118824. PRUNUS ARMENIACA L. Amygdalaceae.
Apricot.

Shirassky.

118825. PRUNUS SIMONII Carr. Amygdalaceae.
Simon plum.

118826. PRUNUS ARMENIACA L. Amygdalaceae.
Apricot.

From Morocco. Tree presented by H. Brayard, Directeur de la Station Experimentale, Marrakech. Received April 9, 1936. Numbered in November 1936.

Jusseie No. 13.

118827 to 118895.

From Mexico. Seeds collected by J. H. Kempton, Bureau of Plant Industry. Received November 2, 1936.

118827. CENTAUREA sp. Asteraceae.

From Arroya Rosilla, Durango.

118828 to 118841. DATURA spp. Solanaceae.

From Los Herreras, Durango.

118828. No. 1. 118835. No. 8.

118829. No. 2. 118836. No. 9.

118830. No. 3. 118837. No. 10.

118831. No. 4. 118838. No. 11.

118832. No. 5. 118839. No. 12.

118833. No. 6. 118840. No. 13.

118834. No. 7. 118841. No. 14.

118842 to 118872. EUCHLAENA MEXICANA Schrad. Poaceae. Teosinte.

118842. From Cerro Prieto, Durango.

118843 to 118845. From Nobogame, Chihuahua.

118843. No. 1.

118844. No. 2.

118845. No. 3.

118846. From San Lorenzo, Durango.

118847 to 118849. From Arroya de Tarahumaras.

118847. No. 1.

118848. No. 2.

118849. No. 3.

118850 to 118862. From Nobogame, Chihuahua.

118850. No. 1. 118857. No. 8.

118851. No. 2. 118858. No. 9.

118852. No. 3. 118859. No. 10.

118853. No. 4. 118860. No. 11.

118827 to 118895—Continued.

118842 to 118872—Continued.

118854. No. 5. 118861. No. 12.

118855. No. 6. 118862. No. 13.

118856. No. 7.

118863 to 118872. From Cerro Prieto, Durango.

118863. No. 1. 118868. No. 6.

118864. No. 2. 118869. No. 7.

118865. No. 3. 118870. No. 8.

118866. No. 4. 118871. No. 9.

118867. No. 5. 118872. No. 10.

118873. HORDEUM VULGARE L. Poaceae.
Barley.

From San Pedro, near Guanacera, Durango.

118874 to 118876. SENECIO spp. Asteraceae.

From Arroya Rosilla, Durango.

118874. No. 1.

118875. No. 2.

118876. No. 3.

118877. TRIPSACUM sp. Poaceae.

From near Cienaga Prieta, Chihuahua.

118878 to 118895. ZEA MAYS L. Poaceae.
Corn.

118878. From Tarahumara, San Pedro. October 12, 1936.

118879. From Cienaga Prieta. White corn.

118880. From Cienaga Prieta.

118881. From Ojo Frio.

118882. From Cienaga Prieta.

118883. From Cienaga Prieta.

118884. From Cienaga Prieta.

118885. From Cienaga Prieta.

118886. From Trampas, Durango.

118887. From Trampas, Durango.

118888. From Cienaga Prieta.

118889. From Nobogame.

118890. From Nobogame.

118891. From Nobogame.

118892. From Arroya de Tarahumaras.

118893. From Cienaga Prieta.

118894. From Cienaga Prieta.

118895. From Cienaga Prieta.

118896 to 118904. TRITICUM AESTIVUM L. Poaceae. Common wheat.

From Australia. Seeds presented by Dr. H. Wenholz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received November 21, 1936.

Kenya wheat. From the Glen Innes Experiment Farm; introduced for its high resistance to stem rust.

118896. No. C. 9906. 118901. No. C. 10862.

118897. No. C. 9965. 118902. No. C. 10863.

118898. No. C. 9968. 118903. No. C. 10865.

118899. No. C. 10854. 118904. No. C. 10866.

118900. No. C. 10857.

118905 to 118919. PHASEOLUS VULGARIS
L. Fabaceae. **Common bean.**

From the Union of Soviet Socialist Republics. Seeds presented through the Institute of Plant Industry, Leningrad. Received November 18, 1936.

A collection of beans which have proved resistant to mosaic disease and bacteriosis, from the Ukraine and Transcaucasus.

118905. No. 1458.	118913. No. 3393.
118906. No. 1475.	118914. No. 3688.
118907. No. 1527.	118915. No. 4889.
118908. No. 1571.	118916. No. 4891.

118910. No. 3076.	118918. No. 6732.
118911. No. 3078.	118919. No. 6900.
118912. No. 1921.	

118920 to 118925.

From Turkey. Bulbs and seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received November 13, 1936.

118920. *ALLIUM* sp. Liliaceae.

No. 1028. Bulbs collected 32 km. east of Chanakkale, September 19, 1936.

118921. *ALLIUM* sp. Liliaceae.

No. 1019. A mixed collection of bulbs from the mountains 35 km. east of Chanakkale, September 19, 1936.

118922. *CASTANEA SATIVA* Mill. Fagaceae. Spanish chestnut.

No. 1025. Purchased in Istanbul; (originally from large trees at Burma). September 30, 1936.

For previous introduction see 103975.

118923. *PINUS HALEPENSIS* Mill. Pinaceae. Aleppo pine.

No. 1026. From the mountains 17 km. north of Izmir, September 24, 1936.

118924. *PISTACIA* sp. Anacardiaceae.

No. 1018. From large shade trees in a park at Balikesir, September 20, 1936.

118925. *QUERCUS COCCIFERA* L. Fagaceae. Kermes oak.

No. 1014. From 7 km. southeast of Kemal Pasha, September 25, 1936. An evergreen shrub or small tree of dense habit with stiff, spiny, broad-elliptic to ovate-oblong, hollylike leaves one-half to 1½ inches long. Native to the Mediterranean region.

118926. *PHYLLOSTACHYS* sp. Poaceae. **Bamboo.**

From Canada. Plants presented by J. Basil Keys, Victoria, British Columbia. Received November 24, 1936.

A moderately hardy bamboo obtained several years ago, under the name *Phyllostachys mitis*, by Mr. Keys from a local nursery.

118927. *SECURIDACA LONGIPEDUNCULATA* Fres. Polygalaceae.

Rhodesia violet-tree.

From Southern Rhodesia, Africa. Seeds presented by R. H. B. Dickson, Maienji, Odzi. Received November 24, 1936.

118927—Continued.

A much-branched divaricate shrub or small tree native to tropical Africa. The coriaceous leaves are ovate-elliptic, and the flowers, in terminal spreading racemes, are rose, shades of purple, or violet and variegated with white.

For previous introduction see 103920.

118928. *CITRUS LIMONIA* Osbeck. Rutaceae. **Lemon.**

From the Union of Soviet Socialist Republics. Budsticks presented by A. M. Troyer, Institute of Wet Subtropics, Sukhum, Abkhazia. Received November 24, 1936.

Kusner. A lemon reputed to be considerably more hardy than the *Eureka* or *Lisbon*.

118929 to 118932.

From California. Seeds collected in Death Valley by French Gilman, of the National Park Service. Received November 11, 1936.

118929. *ARCTOMECON MERRIAMII* Coville. Papaveraceae.

118930. *ENCELOPISIS COVILLEI* (A. Nels.) Blake. Asteraceae.

118931. *SALVIA FUNEREA* M. E. Jones. Menthaceae.

118932. *SALVIA PACHYPHYLLA* Epling. Menthaceae.

118933 and 118934.

From Peru. Bulbs collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received November 21, 1936.

118933. *HIPPEASTRUM REGINAE* (L.) Herbert. Amaryllidaceae.

No. 8211-A. *Cebolleta*. September 18, 1936. Hacienda San Carlos, Distrito Churubamba, Departamento Huanuco, along the trail from Rio Ysabel to San Carlos, in an open field at 1,450 m. altitude. Flowers crimson with white at the center.

118934. *URCEOLINA URCEOLATA* (Ruiz and Pav.) Asch. and Graebn. Amaryllidaceae.

No. 8305-A. October 17, 1936. From the Departamento Huanuco, along the left bank of the Rio Huallaza, among rocks in dense forest, at 805 m. altitude. A tender bulbous plant with wide oblong leaves 1 foot long and a solitary scape with an umbel of 4 to 6 nodding canary-yellow flowers striped with pale green. Native to the Andes of Peru.

118935. *COTONEASTER* sp. Malaceae.

From England. Plants presented by Sir Lionel de Rothschild, St. Swithins Lane, London. Received November 27, 1936.

Received under the specific name "cornubia," for which a place of publication has not been found. Said to be a handsome cotoneaster closely allied to *C. frigida*, but it is much more fructiferous, with larger and brighter berries, and has smaller, more acuminate leaves.

118936 to 118939. *CINCHONA* spp. Rubiaceae.

From the Philippine Islands. Seeds presented by Arthur P. Fischer, Director of Forestry, Bureau of Forestry, Manila. Received November 23, 1936.

118936. *CINCHONA OFFICINALIS* L.

For previous introduction and description see 118797.

118936 to 118939—Continued.

118937. *CINCHONA PUBESCENS* Vahl.

For previous introduction see 118798.

118938. *CINCHONA OFFICINALIS* × *PUBESCENS*.118939. *CINCHONA* sp.118940 to 118986. *ANTIRRHINUM* spp.
Scrophulariaceae. **Snapdragon.**

From Germany. Seeds presented by Dr. Husfeld, Director, Kaiser Wilhelm Institute, Müncheberg, Mark. Received November 23, 1936.

118940 and 118941. *ANTIRRHINUM BARBELLIERI* Boi.118942. *ANTIRRHINUM CALYCNINUM* Russ.118943. *ANTIRRHINUM CHARIDEMI* Lange.118944. *ANTIRRHINUM CHRYSOTHALES* Font Quer.118945 to 118954. *ANTIRRHINUM GLUTINOSUM* Boiss. and Reut.

A wild Spanish antirrhinum.

For previous introduction see 100955.

118945. *Alhama* (hairy).118946. *Alhama* (glabrous).118947. *Alhambra*.118948. *Baryacas*.118949. *Capileira*.118950. *Genital*.118951. *Silla del Moro*.118952. *Mulhacén* (Lagerfels).118953. *Orgiva*.118954. *Pampaneira* (hairy).118955 and 118956. *ANTIRRHINUM HISPANICUM* Chav.

A wild snapdragon, native to Spain.

For previous introduction see 100956.

118955. *Cetorico*.118956. *Savogia*.118957 and 118958. *ANTIRRHINUM LATIFOLIUM* Mill.

A wild snapdragon, native to Spain.

For previous introduction see 104924.

118957. *Mentone*.118958. *Villefranche*.118959. *ANTIRRHINUM LINKIANUM* Boiss. and Reut.*Cintra*.118960. *ANTIRRHINUM LITIGIOSUM* Pau.*Chorro*.118961 to 118973. *ANTIRRHINUM MAJUS* L.
Common snapdragon.

For previous introduction see 117320.

20493/49a.

118980. *ANTIRRHINUM SEMPERVIRENS* Lapeyr.118981. *ANTIRRHINUM SICULUM* Mill.

A wild antirrhinum, native to Spain.

118982. *ANTIRRHINUM TORTUOSUM* Bosc.

A wild antirrhinum, native to Spain.

For previous introduction see 100963.

118983. *ANTIRRHINUM VALENTINUM* Font Quer.A shrubby snapdragon with elliptic or roundish leaves and small white flowers. It is allied to *Antirrhinum sempervirens*. Native to Spain.

For previous introduction see 100964.

118984. *ANTIRRHINUM* sp.*Cartagena*. Received under the specific name "ibanjezi," for which a place of publication has not been found.118985. *ANTIRRHINUM* sp.

Received under the specific name "kerynia," for which a place of publication has not been found.

118986. *ANTIRRHINUM* sp.

Received under the specific name "lapithos," for which a place of publication has not been found.

118987 to 118998. *ARACHIS HYPOGAEA* L. Fabaceae. **Peanut.**

From the State of Rio Grande do Sul, Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received November 30, 1936.

118987. No. 4221. From Marcelino Ramos, October 19, 1936. A cultivated peanut.

118988. No. 4252. From the market at Porto Alegre, October 22, 1936.

Nos. 118989 to 118998 were purchased in shops in Porto Alegre, October 23, 1936.

118989. No. 4255.

118990. No. 4256. *Muido* or *Commum*.118991. No. 4257. *Muido* or *Commum*.

118987 to 118998—Continued.

118992. No. 4258.
 118993. No. 4259. Said to be volunteer plants.
 118994. No. 4260.
 118995. No. 4261.
 118996. No. 4262.
 118997. No. 4263.
 118998. No. 4264.

118999. *MEDICAGO SATIVA* L. Fabaceae.
Alfalfa.

From Chile. Seeds presented by Salvador Izquierdo S., Santiago. Received November 23, 1936.

Huasco alfalfa. From the northern part of Chile, where it has been cultivated since ancient times.

119000. *ARISTOLOCHIA BRASILIENSIS* MACROPHYLLA Duchatre. Aristolochiaceae.

From Cuba. Seeds presented by F. G. Walsingham, Atkins Institution of the Arnold Arboretum. Received November 25, 1936.

Originally presented by the Forest Botanist, Forest Research Institute, Dehra Dun, United Provinces, India. A stout woody climber with large, gray-green, cordate-reniform leaves. The flowers, difficult to describe, are basically green, with nettings and reticulations of chocolate brown or purplish brown, rather dull on the outer surfaces, but often becoming velvety in patterns on the inner surfaces and deep within the flowers. The upper lip is 5 inches long, projects from the inflated tube like the beak of a bird, and the lower lip expands into a flattened wavy limb 4 to 6 inches across. Native to Brazil.

119001. *VITIS POPENOEI* Fennell. Vitaceae. Grape.

From Puerto Mexico, Veracruz, Mexico. Seeds presented by Wilson Popenoe, United Fruit Co. Received November 11, 1936.

Totoloche. A slender vine with small to medium, usually cordate-ovate leaves and bunches of 5 to 10 dark maroon-red, thick, and rather tough-skinned fruit, of fair flavor, one-half inch in diameter. Related to *Vitis rotundifolia*. Native to Veracruz.

119002. *CINCHONA* sp. Rubiaceae.

From Peru. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received December 4, 1936.

No. 8170-A. *Azhar*. From the Hacienda Mercedes, Distrito Churubamba, Departamento Huancu, along the trail to Balsa Playa, through virgin forest on a slope above the Rio Cayumba, at 1,200 m. altitude. A forest tree, 30 m. tall, with the seeds in pale green capsules.

119003 to 119006.

From Istanbul, Turkey. Seeds and plants collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received November 30, 1936.

119003 and 119004. *CASTANEA SATIVA* Mill. Fagaceae. Spanish chestnut.

From the Inebolu bazar, October 13, 1936.

For previous introduction see 118922.

119003. No. 1042. 119004. No. 1043.

119003 to 119006—Continued.

119005. *PAEONIA* sp. Ranunculaceae.

No. 1044. Plants collected in the hills between Haydarfrasha and Shile, October 25, 1936.

119006. *PISTACIA VERA* L. Anacardiaceae. Pistachio.

No. 1059. From the Istanbul bazar, October 24, 1936.

119007 to 119023.

From Brazil. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received November 30, 1936.

Nos. 119007 to 119019 were collected at Porto Alegre, Rio Grande do Sul, October 22 and 23, 1936.

119007 and 119008. *AMYGDALUS COMMUNIS* L. Amygdalaceae. Almond.

Cultivated almonds.

119007. No. 4242. 119008. No. 4243.

119009. *AVENA SATIVA* L. Poaceae. Oats. No. 4266. Cultivated oats.

119010 and 119011. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

Locally grown seed.

119010. No. 4244. 119011. No. 4248.

119012 and 119013. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

119012. No. 4249. Seed grown locally; the fruit is said to be large, oblong, with greenish rind.

119013. No. 4246. *Melão portuguez*. Fruit small, round.

119014. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.

No. 4250. Seed grown locally.

119015. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cushman.

No. 4250. Seed grown locally.

119016. *CORYLUS AVELLANA* L. Betulaceae. Filbert.

No. 4245. Seed imported from Portugal.

For previous introduction see 104742.

119017. *FRAGARIA* sp. Rosaceae. Strawberry.

No. 4253. A cultivated strawberry.

119018. *FRAGARIA VESCA* L. Rosaceae. Strawberry.

No. 4254. A cultivated strawberry.

119019. *JUGLANS REGIA* L. Juglandaceae. Persian walnut.

No. 4241. A cultivated thin-shelled variety.

119020. *MEDICAGO ARABICA* (L.) All. Fabaceae. Medick.

No. 4228. From Marcelino Ramos, Rio Grande do Sul, October 19, 1936. A prostrate plant found growing on embankments and even in cinders along the railroad track.

For previous introduction see 36136.

119021. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

No. 4265. Purchased in a shop at Porto Alegre, Rio Grande do Sul. Cultivated alfalfa, imported from Argentina.

119007 to 119023—Continued.

119022. *SOJA MAX* (L.) Piper. Fabaceae.
Soybean.

No. 4251. From the market at Porto Alegre, Rio Grande do Sul.

119023. *CALYDOREA CAMPESTRIS* (Saub.) Baker. Iridaceae.

No. 4230. From Cruz Alta, Rio Grande do Sul, October 20, 1936. Bulbs of a plant 6 to 9 inches high with 1 to 3 blue flowers one-half inch long. Native to southern Brazil, Uruguay, and Paraguay.

119024 to 119035. *TRITICUM AESTIVUM* L. Poaceae. Wheat.

From the Union of Soviet Socialist Republics. Seeds presented by the Administration for Grain and Oil Culture, Saratov Selection Station, Saratov. Received November 24, 1936.

119024 to 119026. *Erythrospermum*.

119024. No. 118.

119025. No. 46/131.

119026. No. 46/112.

119027. *Gracuum*, No. 17/64.

119028 and 119029. *Hostianum*.

119028. No. 122/76.

119029. No. 0237.

119030 to 119035. *Lutescens*.

119030. No. 27/36. 119033. No. 434/154.

119031. No. 0329. 119034. No. 1060/10.

119032. No. 527/30. 119035. No. 0121.

119036. *RIBES* sp. Grossulariaceae.

From Germany. Plants purchased from Julius Hönings, Neuss am Rhein. Received December 14, 1936.

Rheinland currant.

119037. *AGAVE ATROVIRENS* Karw. Amaryllidaceae. Pulque agave.

From Mexico. Plants presented by Dr. José Figueroa, Instituto Biotecnico Colonia Anahuac, D. F. Received December 15, 1936.

An agave with very large lanceolate leaves up to about 8 feet long and large yellow flowers in open panicles. Native to Mexico, where it is the principal source of pulque.

119038. *BRASSICA OLERACEA CAPITATA* L. Brassicaceae. Cabbage.

From Japan. Seeds purchased from the Japan Seed & Plant Co., Tokyo. Received December 10, 1936.

Improved Succession Reselected.

119039. *ARAUCARIA BRASILIANA* A. Rich. Pinaceae.

From Oklahoma. Seeds presented by Ralph Bienfang, School of Pharmacy, University of Oklahoma, Norman. Received December 14, 1936.

An evergreen tree native to Brazil.

For previous introduction see 117925.

119040. *NAUCLEA ESCULENTA* (Afzel.) Merr. (*Sarcocephalus esculentus* Afzel.). Rubiaceae.

From Africa. Seeds presented by the Director of Agriculture, Freetown, Sierra Leone. Received December 17, 1936.

Sierra Leone peach. From Njala. A scandent shrub or tree up to 25 feet high, native to tropical Africa. The sharp-pointed elliptical leaves are 2 to 8 inches long, and the white, yellowish, or pale-pink fragrant flowers are in dense heads. The fruiting head, 2 to 4 inches in diameter, is deep red with a brown-granulated surface and a solid edible core which occupies about a quarter of the diameter.

119041 to 119044. *CASTANEA CRENATA* Sieb. and Zucc. Fagaceae. Japanese chestnut.

From Japan. Plants presented by the Mutual Supply Co., San Francisco, Calif. Received December 28, 1936.

119041. *Gin Yose*.

119042. *Nakade Tamba*.

119043. *Taisho Wase*.

119044. *Tayotama Wase*.

119045. *CITRUS LIMONIA* Osbeck. Rutaceae. Lemon.

From India. Bud sticks collected by Walter Koelz, Bureau of Plant Industry. Received December 29, 1936.

No. 1743. *Gombru*. From Bandrole, Kulu, Punjab, November 14, 1936. The fruit, said to come true from seed, is of large size and will keep for a year in ordinary storage. The attractive, quick-growing tree withstands a temperature of about 22° F.

119046. *CROTALARIA* sp. Fabaceae.

From the Philippine Islands. Seeds presented by F. W. McCarthy, Iloilo. Received December 23, 1936.

A plant which grows and seeds, sometimes in pure river sand, during the dry season which, in Iloilo, sometimes lasts 2 months.

119047 and 119048.

From Africa. Plants presented by the Director of Agriculture, Freetown, Sierra Leone. Received December 28, 1936.

119047. *ANANAS COMOSUS* (L.) Merr. Bromeliaceae. Pineapple.

A small tender pineapple.

119048. *MUSA PARADISIACA SAPIENTUM* (L.) Kuntze. Musaceae. Banana.

Silver banana.

119049 to 119086. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

From Brazil. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received December 7, 1936.

Nos. 119049 to 119051 were purchased in seed stores in Pelotas, Rio Grande do Sul, November 2, 1936.

119049. No. 4306.

119050. No. 4321.

119049 to 119086—Continued.

119051. No. 4323.

Nos. 119052 to 119086 were strains presented by Dr. Grosman, Instituto Borges de Medeiros, Porto Alegre, Rio Grande do Sul.

119052. No. 4364. 119070. No. 4382.

119053. No. 4365. 119071. No. 4383.

119054. No. 4366. 119072. No. 4384.

119055. No. 4367. 119073. No. 4385.

119056. No. 4368. 119074. No. 4386.

119057. No. 4369. 119075. No. 4387.

119058. No. 4370. 119076. No. 4388.

119059. No. 4371. 119077. No. 4389.

119060. No. 4372. 119078. No. 4390.

119061. No. 4373. 119079. No. 4391.

119062. No. 4374. 119080. No. 4392.

119063. No. 4375. 119081. No. 4393.

119064. No. 4376. 119082. No. 4394.

119068. No. 4380. 119086. No. 4398.

119069. No. 4381.

119087. TEPHROSIA VOGELII Hook. f.
Fabaceae.

From Africa. Seeds purchased from the Mount Elgon Nurseries, Kenya Colony. Received December 5, 1936.

Variety *Alba*. A white-flowered variety.

119088 and 119089. POLYTOCA spp. Poaceae.
Grass.

From Java. Seeds presented by the Director, Botanic Gardens, Buitenzorg. Received December 4, 1936.

119088. POLYTOCA DIGITATA (L. f.) Druce.

A tall branching grass, native to India.

119089. POLYTOCA MACROPHYLLA Benth.

A perennial grass up to 10 feet high. Native of the Louisiade Archipelago.

119090 to 119127.

From Brazil. Seeds and roots collected by W. A. Archer, Bureau of Plant Industry. Received December 2, 1936.

Unless otherwise stated, this material was collected in the State of Rio Grande do Sul and was received as seeds.

119090. ALLIUM CEPA L. Liliaceae. Onion.

No. 4317. *Cebolas peras*, a pear-shaped onion. Purchased in a store at Pelotas, November 2, 1936.

119091. CICER ARIETINUM L. Fabaceae.
Chickpea.

No. 4361. Presented by the Instituto Borges de Medeiros, Viamão, near Porto Alegre, November 3, 1936.

119092 to 119096. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

Purchased in stores at Pelotas, November 2, 1936.

119092. No. 4307.

119093. No. 4308.

119090 to 119127—Continued.

119092 to 119096—Continued.

119094. No. 4309. *Melancia americana*.119095. No. 4310. *Melancia rei de carlo*.119096. No. 4311. *Melancia valencia*.119097. ARECASTRUM ROMANZOFFIANUM (Cham.) Becc. (*Cocos romanzoffiana* Cham.). Phoeniceaceae. Palm.

No. 4269. From the garden of the Hotel Grande, Porto Alegre, October 29, 1936. A palm, native to Brazil, with an unarmed trunk about 20 feet high and 1 foot in diameter, bearing a crown of plumelike leaves 12 to 15 feet long. The fruit is a pale-orange drupe about the size of a large acorn, enclosing a bony seed which has 3 eyes near the base.

For previous introduction see 94765.

119098 and 119099. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

Purchased in stores at Pelotas, November 2, 1936.

119098. No. 4318. *Melão banana*.119099. No. 4319. *Melão carvalho*.

119100. CUCURBITA MAXIMA Duchesne. Cucurbitaceae. Squash.

No. 4314. *Abobora para porco*. Purchased in a store at Pelotas, November 2, 1936. A forage pumpkin.

119101. CUCURBITA MOSCHATA Duchesne. Cucurbitaceae. Cushaw.

No. 4316. *Abobora menina*. Purchased in a store at Pelotas, November 2, 1936.

119102. CUCURBITA PEPO L. Cucurbitaceae. Pumpkin.

No. 4315. *Abobora Verde Paris*. Purchased in a store at Pelotas, November 2, 1936.

119103. FRAGARIA sp. Rosaceae. Strawberry.

No. 4320. Purchased in a store at Pelotas, November 2, 1936.

119104 and 119105. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

Purchased in a store at Pelotas, November 2, 1936.

119104. No. 4312. *Perfeição*.119105. No. 4313. *Retiro*. Apparently a local selection by the Retiro nursery.

119106 and 119107. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

119106. No. 4211. Volunteer tobacco from the streets in Santa Cruz do Rio Pardo, State of São Paulo, October 12, 1936. Plants 6 feet high; inflorescence resinous, but not the stems or leaves; flowers pale greenish at first, changing to pink on lip.

119107. No. 4220. From Marcelino Ramos, October 10, 1936. Plants 1 to 3 feet high; corolla pale greenish white below, lip pure white inside; stem and leaves resinous.

119108 to 119126. PHASEOLUS spp. Fabaceae. Bean.

Presented by the Instituto Borges de Medeiros, Viamão, November 3, 1936.

119108 and 119109. PHASEOLUS CALCARATUS Roxb. Rice bean.

119108. No. 4345.

119109. No. 4355.

119090 to 119127—Continued.

119108 to 119126—Continued.

119110 and 119111. *PHASEOLUS LUNATUS* L. Lima bean.

A variety which produces bacterial nodules of 5 to 6 cm. in diameter on the roots.

119110. No. 4362. A variety with black and white seeds.

119111. No. 4363. A variety with red and white seeds.

119112 to 119126. *PHASEOLUS VULGARIS* L. Common bean.

119112. No. 4344. 119120. No. 4353.

119113. No. 4346. 119121. No. 4354.

119114. No. 4347. 119122. No. 4356.

119115. No. 4348. 119123. No. 4357.

119116. No. 4349. 119124. No. 4358.

119117. No. 4350. 119125. No. 4359.

119118. No. 4351. 119126. No. 4360.

119119. No. 4352.

119127. *HERBERTIA PULCHELLA* Sweet. Iridaceae.

No. 4274. From the Escola Aprendizado Agrícola do Rio Grande do Sul; near Pelotas, October 31, 1936. A South American plant allied to *Tigrida*, with about 4 long narrow leaves 3 to 6 inches long and several fugitive blue flowers from a single terminal spathe. The outer flower segments are marked with a central white line.

119128 to 119139. *TRITICUM AESTIVUM* L. Poaceae. Common wheat.

From China. Seeds presented by Raymond T. Moyer, Oberlin Shansi Memorial Schools, Taiku, Shansi. Received December 17, 1936.

A collection of drought-resistant winter wheats.

119128. No. 33. 119134. No. 204.

119129. No. 87. 119135. No. 298.

119130. No. 140. 119136. No. 1035.

119131. No. 169. 119137. No. 1050.

119132. No. 171. 119138. No. 1274.

119133. No. 203. 119139. No. 1376.

119140 to 119150.

From Brazil. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received December 15, 1936.

This material was collected in the State of Rio Grande do Sul and, unless otherwise mentioned, was received as seeds.

119140 and 119141. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

From Rio Pardo, November 7, 1936.

119140. No. 4406.

119141. No. 4407.

119142. *CANNA* sp. Cannaceae.

No. 4423. From wasteland near Rio Pardo, November 8, 1936. Plants 3 feet high, with orange-red flowers; very common in this State.

119140 to 119150—Continued.

119143 and 119144. From the fazenda of Col. José Antonio, Pereira Rego, 23 km. east of Rio Pardo, November 8, 1936.

119143. *ARECASTRUM ROMANZOFFIANUM* (Cham.) Becc. (*Cocos romanzoffiana* Cham.). Phoenicaceae. Palm.

No. 4427. *Geriva*. A palm about 25 feet high, with a smooth trunk. The foliage is used extensively as cattle forage.

119144. *Cocos* sp. Phoenicaceae. Palm.

No. 4428. *Butia*. A palm about 15 feet high, with persistent petioles.

119145. *MEDICAGO HISPIDA* *RETICULATA* (Benth.) Urban. Fabaceae.

No. 4329. From Viamão, November 5, 1936. An excellent forage plant.

119146 and 119147. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

119146. No. 4273. From the streets in Porto Alegre, October 30, 1936. Plants 2 feet high.

119147. No. 4276. From an arroyo near Pelotas, October 31, 1936.

119148. *ORYZA SATIVA* L. Poaceae. Rice.

No. 4426. *Arroz Santa Maria*. From Rio Pardo, November 2, 1936. A variety said to be superior in size and quality to other known types.

119149. *TRACHYCARPUS EXCELSUS* (Thunb.) Wendl. Phoenicaceae. Palm.

No. 4420. From the streets of Rio Pardo, November 8, 1936.

For previous introduction see 66766.

119150. *PHALOCALLIS HERBERTII* (Herbert) Kuntze. Iridaceae.

No. 4409. From the Fazenda of Col. José Antonio Pereira Rego, 23 km. east of Rio Pardo, November 8, 1936. A bulbous plant, native to moist open places in Argentina. The linear plaited leaves are about a foot long, and the branching scape, 2 to 3 feet high, bears brown flowers about 2 inches across.

For previous introduction see 77593.

119151 to 119154. *GOSSYPIUM* spp. Malvaceae. Cotton.

From Peru. Seeds collected by James West and presented through the University of California Botanical Garden Expedition to the Andes, 1935-36. Received December 18, 1936.

Collected in the Urubamba Valley, Departamento Cuzco, in September 1936.

119151. *GOSSYPIUM BARBADENSE* L. Sea-island cotton.

No. 8069. From the Hacienda Alcu-sama, at 900 m. altitude. A cultivated cotton.

119152. *GOSSYPIUM PERUVIANUM* Cav.

No. 8070. At 1,000 m. altitude.

119153. *GOSSYPIUM* sp.

No. 8072. At 1,000 m. altitude.

119154. *GOSSYPIUM* sp.

No. 8071. From Poronococ, at 1,000 m. altitude.

119155 to 119197. *NICOTIANA TABACUM*
L. Solanaceae. Common tobacco.

From Venezuela. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received December 29, 1936.

Nos. 119155 to 119157. Collected at Carache, Trujillo, October 19, 1936, at 1,200 m. altitude.

119155. No. 306.

119156. No. 307.

119157. No. 308.

Nos. 119158 to 119161. From La Barinena, Zamora, October 24, 1936, at 400 m. altitude.

119158. No. 309.

119159. No. 310.

119160. No. 311. *Rabo de gallo.*

119161. No. 312. *Oreja de mula.*

Nos. 119162 to 119164. From the State of Zamora, October 24, 1936, at 400 m. altitude.

119162. No. 313. *Habano.*

119163. No. 314.

119164. No. 315.

Nos. 119165 to 119167. From Mesparro, Zamora, October 25, 1936, at 200 m. altitude.

119165. No. 316.

119166. No. 317.

119167. No. 318.

119168. No. 319. From San Rafael near Bocono, Trujillo, October 29, 1936, at 1,300 m. altitude.

119169. No. 320. From Bettjoque, Trujillo, October 21, 1936, at 540 m. altitude.

Nos. 119170 to 119172. From Isnotu, Trujillo, October 31, 1936, at 700 m. altitude.

119170. No. 321.

119171. No. 322.

119172. No. 323.

Nos. 119173 to 119180. Collected in the State of Merida, November 2 and 3, 1936.

119173. No. 324. *Habano.* From San Juan, at 1,500 m. altitude.

119174. No. 325. *Ambalema.* From Lagumillas, at 1,000 m. altitude.

119175. No. 326. *Ambalema.* From Lagumillas, at 1,000 m. altitude.

119176. No. 327. *Habano.* From Estanguetz, at 600 m. altitude.

119177. No. 328. *Cuba pimon.* From Tabacal.

119178. No. 329. *Habano negro.* From Zea, at 800 m. altitude.

119179. No. 330. *Bixentone.* From Tovar, at 950 m. altitude.

119180. No. 331. *Criollo.* From La Playa da Bailadores, at 900 m. altitude.

Nos. 119181 and 119182. From Seboruco, Tachira, November 3, 1936, at 800 m. altitude.

119181. No. 332. *Palmireno.*

119155 to 119197—Continued.

119182. No. 333. *Habano.*

Nos. 119183 to 119185. From La Grita, Tachira, November 3, 1936, at 1,100 m. altitude.

119183. No. 334. *Ambireno.*

119184. No. 335. *Tabaco negro.*

119185. No. 336. *Palmira.*

Nos. 119186 to 119188. From Tariba, Tachira, November 3, 1936, at 1,000 m. altitude.

119186. No. 337. *Habano negro.*

119187. No. 338.

119188. No. 339. *Habano negro.*

Nos. 119189 to 119192. From Palmira, Tachira, November 4, 1936, at 1,000 m. altitude.

119189. No. 340. *Cuba.*

119190. No. 341.

119191. No. 342. *Cuba negro.*

119192. No. 343.

119193. No. 344. From Bocono, Trujillo, October 29, 1936, at 1,200 m. altitude.

Nos. 119194 to 119196. From Rubio, Tachira, November 5, 1936, at 800 m. altitude.

119194. No. 345. *Cuba.*

119195. No. 346. *Puntillanza.*

119196. No. 347. *Palmira.*

119197. From Carache, Trujillo, October 29, 1936, at 1,400 m. altitude.

119198. *JACARANDA ACUTIFOLIA* Humb. and Bonpl. Bignoniaceae.

From Argentina. Seeds presented to President Franklin D. Roosevelt by Augustin P. Justo, President General of Argentina. Received December 30, 1936.

A smooth tree with bipinnate leaves made up of 5 to 8 pairs of sharp-pointed entire leaflets and terminal and axillary panicles of tubular violet flowers. It is native to Peru.

For previous introduction see 88238.

119199 to 119211.

From Buenos Aires, Argentina. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received December 30, 1936.

119199 to 119204. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

Nos. 119199 to 119203 were purchased in seed stores, November 25, 1936.

119199. No. 4485.

119200. No. 4486.

119201. No. 4487.

119202. No. 4488.

119203. No. 4489.

119204. No. 4557. Presented November 27, 1936, by Dr. L. R. Parodi, Jardin Botánico de la Facultad de Agronomía, Buenos Aires.

119205 to 119211. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

Nos. 119205 to 119210. Presented by Agiros Villanueva, Jefe de Sección. Ex-

119199 to 119211—Continued.

119205 to 119211—Continued.

perimental Tobacco, Ministerio de Agricultura, Buenos Aires, November 22, 1936.

119205. No. 4547. *Habano colorado*. Strain S. R.

119210. No. 4552. *Cubano de las sieras*. Strain E. R.

119211. No. 4567. Presented November 27, 1936, by Dr. L. R. Parodi, Jardín Botánico de la Facultad de Agronomía, Buenos Aires.

119212. ACACIA RETINODES Schlecht. Mimosaceae.

From Mexico. Seeds collected by C. C. Cole, of Coconut Grove, Fla. Received December 28, 1936.

A tall, vigorous, evergreen shrub or small tree, native to southeastern Australia, with long, narrow phyllodes, when mature, and dense yellow flower heads. It is said to flower in France almost throughout the year. The young seedlings, in common with many acacias, have feathery foliage.

For previous introduction see 92330.

119213 to 119215.

From Venezuela. Seeds collected by Raymond Stadelman, Bureau of Plant Industry. Received December 29, 1936.

119213. CAPSICUM ANNUM L. Solanaceae. Common redpepper.

Mongo. A hot pepper from Niguitao, Trujillo, October 28, 1936.

119214 and 119215. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.

From Barinitas, Zamora, October 24, 1936.

119214. A small tomato.

119215. A medium-sized tomato.

119216. MALUS SYLVESTRIS Mill. Malaceae. Apple.

From the Union of Soviet Socialist Republics. Scions presented by the Institute of Plant Industry, Leningrad. Received June 2, 1932. Numbered in December 1936.

Pippin Chinese. No. 137721. Cat. No. 24.

119217 and 119218.

From Japan. Scions collected by P. H. Dorsett and W. J. Morse, Bureau of Plant Industry. Received in 1929 and 1930. Numbered in December 1936.

119217. PYRUS SEROTINA Rehder. Malaceae. Late pear.

No. 4345. *Okusankichi*. Presented by the Horticultural Institution, Department of Agriculture, Kyoto Imperial University, Kyoto, February 24, 1930.

119217 and 119218—Continued.

119218. MALUS FLORIBUNDA Sieb. Malaceae. Japanese flowering crab.

No. 1376. From along the seacoast near Shirai, Hokkaido, September 29, 1929. A small tree with small red fruits.

119219 to 119235.

From India. Seeds, bulbs, and roots collected by Walter Koelz, Bureau of Plant Industry. Received December 11, 1936.

119219 and 119220. ARISAEMA AMBIGUUM Engl. Araceae.

An arisaema with a large pedate leaf of 13 to 15 segments. Native to China.

119219. Received as bulbs.

119220. No. 1504-A. From Kulu, Kulu, Punjab.

119221. BERBERIS sp. Berberidaceae.

No. 1467. From Gundla, Lahul.

119222. BERBERIS sp. Berberidaceae.

No. 1468. From Tsokang Nulla, Lahul.

119223 to 119226. COTONEASTER spp. Malaceae.

119223. COTONEASTER sp.

No. 1469. From Kyelang, Lahul.

119224. COTONEASTER sp.

No. 1471. From Rotang Pass, Kulu, Punjab.

119225. COTONEASTER sp.

No. 1477. From Kalung, Lahul.

119226. COTONEASTER MULTIFLORA Bunge. Malaceae.

No. 1478. From Rahla, Kulu, Punjab. A deciduous shrub about 6 feet high, with slender arching branches; native to western China. The broadly ovate leaves are 1 to 2 inches long, and the dense clusters of small white flowers are followed by subglobose to ovoid red fruits one-third of an inch in diameter.

For previous introduction see 102477.

119227. CYDONIA OBLONGA Mill. Malaceae.

No. 1509. From Skardo, Baltistan.

119228. JUNIPERUS PSEUDOSABINA Fisch. and Mey. Pinaceae.

No. 1454. From Tsokang, Nulla, Lahul. A low shrubby juniper. Native to dry mountain slopes in Turkistan.

For previous introduction see 111057.

119229. MALUS BACCATA (L.) Moench. Malaceae. Siberian crab.

No. 1450. From Kyelang, Lahul.

119230. MALUS sp. Malaceae.

No. 1464. From Gozang, Lahul. An ornamental species.

119231. MELIA sp. Meliaceae.

No. 1505. From Raison, Kulu, Punjab.

119232. PRUNUS CORNUTA (Wall.) Steud. Amygdalaceae. Himalayan bird cherry.

No. 1452. From the Upper Bhaga Valley, Lahul. A deciduous tree 50 to 60 feet

119219 to 119235—Continued.

119232—Continued.

high, native to the Himalayan region up to 10,000 feet altitude. The cylindrical racemes of small white flowers are followed by round red fruits, one-third of an inch in diameter, which become dark brown purple. Closely allied to *Prunus padus*.

119233. *PYRUS* sp. Malaceae.

No. 1506. From Kulu, Kulu, Punjab.

119234. *SORBUS* sp. Malaceae.

No. 1451. From Lahul.

119235. (Undetermined.)

No. 1470. Rhizomes from Nagger, Kulu, Punjab.

119236 to 119251.

From Brazil and Uruguay. Seeds, bulbs, and roots collected by W. A. Archer, Bureau of Plant Industry. Received December 23, 1936.

119236. *ABUTILON MOLLISSIMUM* (Cav.) Sweet. Malvaceae.

No. 4448. From Santa Anna, Rio Grande do Sul, Brazil, November 14, 1936. A compact shrub 3 feet in diameter, but reported to grow 10 feet high in Peru, where the plant is native. The stem and very large heart-shaped leaves are quite hairy, and the solitary axillary flowers, about an inch long, are sulfur yellow.

For previous introduction see 56908.

119237 to 119240. *ARACHIS HYPOGAEA* L. Fabaceae.

119237. No. 4447. From Santa Anna, Rio Grande do Sul, Brazil, November 13, 1936. A mixture of at least four types.

Nos. 119238 to 119240 were collected at Ribera, Uruguay, November 16, 1936.

119238. No. 4458. A variety said to yield 37 percent of oil.

119239. No. 4459. Cultivated peanut.

119240. No. 4460. Cultivated peanut.

119241. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 4435. Along the road 12 km. north of Santa Anna, Rio Grande do Sul, Brazil, November 13, 1936. Bulbs of a plant common in this region, found in swampy places. The flower stalk is 2 to 3 feet long and bears 5 or 6 flowers; the petals are orange red with green markings at the base.

119242. *SPREKELIA FORMOSISSIMA* (L.) Herb. Amaryllidaceae. St. Jameslily.

No. 4456. From Ribera, Uruguay, November 14, 1936. Bulbs of a perennial, native to Mexico, with 3 to 6 linear leaves 1 to 2 feet long and a reddish scape 1 foot high, with 1 large gaping, bright crimson flower 3 to 4 inches long.

For previous introduction see 93155.

119243. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 4457. From Ribera, Uruguay, November 14, 1936. Bulbs of a cultivated plant, said to be native here. The leaves are strap-shaped, and the scape bears 5 or 6 flowers marked with red and white with narrow petals.

119236 to 119251—Continued.

119244. *PHALOCALLIS HERBERTII* (Herbert) Kuntze. Iridaceae.

No. 4436. Roots collected on a sandy hillside, along a road 12 km. north of Santa Anna, Rio Grande do Sul, Brazil, November 13, 1936.

For previous introduction and description see 119150.

119245. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. 4461. *Yerua*. From Ribera, Uruguay, November 16, 1936. The fruit is cultivated for its bottle-shaped fruits, which are about 8 inches long and are used as containers for maté.

119246. *LUPINUS* sp. Fabaceae.

No. 4303. From Viera, near Rio Grande, Rio Grande do Sul, Brazil, November 1, 1936. Plants growing in clumps a foot high and 4 feet in diameter on sand dunes near the sea.

119247. *RAPHANUS SATIVUS* L. Brassicaceae. Radish.

No. 4424. From Rio Pardo, Rio Grande do Sul, Brazil, November 8, 1936. Plants occurring as weeds in vegetable gardens.

Nos. 119248 and 119249 were collected near Ribera, Uruguay, November 16, 1936.

119248. *VERBENA PERUVIANA* (L.) Britton. Verbenaceae.

No. 4454. A scarlet-flowered trailing verbena with stems sometimes 2 feet or more long. Native to southern and western South America.

119249. *VERBENA RIGIDA* Spreng. Verbenaceae.

No. 4452. A perennial verbena, native to Brazil, with oblong-lanceolate, deeply dentate leaves and terminal cymes of whitish flowers.

119250. *VICIA TETRASPERMA* (L.) Moench. Fabaceae. Vetch.

No. 4430. From Posto Zoo-tecnico, at Tupacretan, Rio Grande do Sul, Brazil, November 11, 1936. A plant native to Brazil, with white flowers tinged with lavender. It is cultivated as forage.

119251. *ZEPHYRANTHES* sp. Amaryllidaceae.

No. 4432. From Posto Zoo-tecnico, at Tupacretan, Rio Grande do Sul, Brazil, November 11, 1936. Bulbs of a plant with pink flowers.

119252 to 119266.

From India. Seeds, roots, and bulbs collected by Walter Koelz, Bureau of Plant Industry. Received December 29, 1936.

119252. *AESCULUS INDICA* (Royle) Hook. Aesculaceae. Horsechestnut.

No. 1651. From above Bandrole, Kulu, Punjab, November 14, 1936, at 8,000 feet altitude. A tree that becomes 100 feet high in northern India, with a trunk 4 feet in diameter, flowering the latter part of June when other horsechestnuts have finished. The foliage is shining green, and the dainty white flowers, which are borne in fairly dense racemes, have the 2 upper petals heavily blotched with yellow, changing to orange-red, and the lower petals are tinged with pink.

For previous introduction see 52625.

119252 to 119266—Continued.

119253 to 119258. *ALLIUM* spp. Liliaceae.119253. *ALLIUM CEPA* L. Onion.

No. 1370-A. Bulbs from Kampuk, Baltistan, at 9,000 feet altitude, September 9, 1936. An onion which will stand freezing.

119254 to 119256. *ALLIUM SATIVUM* L. Liliaceae. Garlic.119254. No. 1511. *Gokpa*. From Kailung, Lahul, at 12,000 feet altitude, October 12, 1936. Bulbs of a pungent sort.119255. No. 1510. *Gokpa*. From Kampuk, Shyok Valley, Baltistan, September 9, 1936, at 12,000 feet altitude. Bulbs of a highly scented variety.119256. No. 1741. *Lassan*. Bulbs from Kulu, Kulu, Punjab, at 4,500 feet altitude, November 13, 1936.119257. *ALLIUM* sp.No. 1475. *Rigok*. From Kyelang, Lahul, at 10,000 feet altitude, October 21, 1936. Bulbs of a very attractive species, with cylindrical leaves and heads of clear-purple flowers $1\frac{1}{2}$ inches in diameter. Grows on dry slopes and blooms in the damp earth of spring.119258. *ALLIUM* sp.No. 1720. *Pram*. Presented by the Director of Agriculture, Kashmir. Bulbs said to be used for flavoring.119259. *CITRUS LIMONIA* Osbeck. Rutaceae. Lemon.

No. 1743-A. From Bandrole, Kulu, Punjab.

119260. *IRIS KASHMIRIANA* Baker. Iridaceae.

No. 1664. Roots of a wild species presented by the Director of Agriculture, Kashmir, November 14, 1936.

119252 to 119266—Continued.

119261. *LILIUM POLYPHYLLUM* D. Don. Liliaceae.

No. 1740. Bulbs presented by the Director of Agriculture, Kashmir.

For previous introduction see 112748.

119262. *LIGUSTRUM COMPACTUM* Hook. f. and Thoms. Rhamnaceae. Privet.

No. 1742. From Bandrole, Kulu, Punjab, at 5,000 feet altitude, November 14, 1936. A well-formed evergreen tree with large trusses of creamy flowers, followed by blue-black fruits.

For previous introduction see 114763.

119263. *SARCOCOCCA SALIGNA* (D. Don) Muell. Arg. Buxaceae.

No. 1654. From Bandrole, Kulu, Punjab, at 6,000 feet altitude, November 14, 1936. An evergreen shrub from 2 to 3 feet high, which covers the ground in well-watered shady places. Interesting chiefly from its very fragrant green flowers in short axillary racemes and the purple ovoid fruits nearly an inch long. Game birds find both food and shelter among the clumps.

For previous introduction see 92760.

119264. *TAXUS* sp. Taxaceae.No. 1661. *Rak Kahr*. From above Bandrole, Kulu, Punjab, at 8,000 feet altitude, November 14, 1936. A handsome evergreen tree that becomes 4 feet in diameter, but occurs sparingly in the spruce-balsam forest.119265. *TULIPA* sp. Liliaceae.

No. 1665. Bulbs presented by the Director of Agriculture, Kashmir.

119266. (Undetermined.)

No. 1472. *Kukum*. From Lahul, Punjab, at 9,000 feet altitude, October 22, 1936. Bulbs of a plant with crocuslike yellow flowers which bloom early in the spring; said to be poisonous to horses until after blooming.

INTRODUCTORY STATEMENT

This inventory, No. 130, is a record of the plant material (Nos. 119267 to 123341) received by the Division of Plant Exploration and Introduction during the period from January 1 to March 31, 1937.

More than 4,000 introductions are recorded in this inventory, which is nearly twice as many as have ever been received before during a like period. They represent the wide collections from two exploring parties, each of which was primarily concerned with the collection of vegetable varieties in the several areas. In making these collections, both parties were instructed to keep in mind the choice of varieties that showed health and vigor of growth, even if the food quality of the plant was poor. Any and all types of vegetables were collected except those very recently introduced into the area. All were to be considered as potential breeding materials for the Southeastern Vegetable Breeding Station, Charleston, S. C., and for various State experiment stations.

H. L. Westover, forage crop specialist, and F. L. Wellman, vegetable pathologist, traveled through Turkey for this purpose, and Walter Koelz, a former explorer of the Department, collected in northern India.

In addition to these projects, the results of two other collecting trips appear in this inventory; those of W. A. Archer and Raymond Stadelman, who collected peanuts and tobaccos for special breeding studies, traveling through various Latin-American countries and observing both small noncommercial cultures and plants in the wild.

Other materials besides those covered by their main projects included useful crop plants and some ornamentals from all these areas.

Initial identifications of the seeds and determination of the nomenclature have been made by Paul Russell, who has had general supervision of this inventory.

B. Y. MORRISON,
Principal Horticulturist, in Charge.

DIVISION OF PLANT EXPLORATION AND INTRODUCTION,
Washington, D. C., May 22, 1941.

INVENTORY¹

NOTE.—This inventory is a historical record of plant material introduced for Department and other specialists. It is not to be considered as a list of plant material for distribution.

119267. APLOPAPPUS CUNEIFOLIUS Nutt. Asteraceae.

From Chile. Seeds collected by Clarence Elliott, of England, and presented by Ralph A. Fenton, of Oswego, Oreg. Received January 6, 1937.

A shrubby yellow-flowered composite with stiff alternate leaves; native to Chile.

119268. CARICA PENTAGONA Heilborn. Papayaceae.

From Ecuador. Cuttings presented by Luis A. Gattoni D., Quito. Received January 19, 1937.

Babaco. This is the most remarkable and valuable of the several interesting species of *Carica* cultivated in Ecuador, because of its large, very acid fruits, from which an excellent sauce is made, the relatively low temperatures which the plant can stand, and because of its habit of producing seedless fruits.

The plant is seen only under cultivation where it is a small tree about 3 m. high; the leaves are glabrous, like those of *Carica chrysopetala*, but with fewer and broader lobes. The fruits are about 30 cm. long and 7 to 12 cm. in diameter, truncate at the base and sharply acute at the apex. The flesh is about 1 cm. thick, white, distinctly fragrant, and very acid. It is eaten only after it is cooked. The large cavity in the center contains a quantity of white cottony substance and occasionally a few seeds.

For previous introduction see 62552.

119269 to 119271.

From Peru. Seeds presented by Cesar Vargas C., Universidad del Cuzco, Museo de Historia Natural, Sección Botánica, Cuzco. Received January 14, 1937.

119269. FRAGARIA sp. Rosaceae.

From Urubamba, 3,100 m. altitude, December 3, 1936.

119269 to 119271—Continued.

Nos. 119270 and 119271 were from Pihahuata, Paucartambo Valley, at 2,800 m. altitude, December 5, 1936.

119270. RUBUS sp. Rosaceae.

119271. RUBUS sp. Rosaceae.

119272. SACCHARUM. Poaceae.

Sugarcane.

From Barbados, West Indies. Seeds presented by the Department of Agriculture, Barbados, through E. W. Brandes, Bureau of Plant Industry. Received January 15, 1937.

119273. CITRUS LIMONIA Osbeck, Ruta- ceae. Lemon.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received January 4, 1937.

No. 1650. *Gulgul, gombru*. From Bandrole, Kulu, Punjab, at 5,000 feet altitude, November 14, 1936. A remarkable lemon; the tree withstands a temperature of 18° F. and is covered with snow a month or so in the winter. It is quick-growing; one 3-year-old tree (3 feet high when planted) is now bearing and is 8 feet high. The fruit is large, of good flavor, and will keep in ordinary storage for over a year. The tree is quite ornamental, principally on account of its large strongly scented flowers.

119274 to 119286. GLADIOLUS spp. Iri- daceae.

From the Union of South Africa. Seeds presented by A. Cheverton Buller. Dwaarsriviers Hoek, Stellenbosch District, Cape Province. Received January 13, 1937.

119274. GLADIOLUS ALATUS L.

A gladiolus with flowers of a delightful fragrance, not unlike that of the sweet brier. The three upper segments are bright

¹ It should be understood that the names of varieties of fruits, vegetables, cereals, and other plants used in this inventory are those under which the material was received when introduced by the Division of Plant Exploration and Introduction, and, further, that the printing of such names here does not constitute their official publication and adoption in this country. As the different varieties are studied, their entrance into the American trade forecast, and the use of varietal names for them in American literature becomes necessary, the foreign varietal designations appearing in this inventory will be subject to change with a view to bringing the forms of the names into harmony with recognized horticultural nomenclature.

It is a well-known fact that botanical descriptions, both technical and economic, seldom mention the seeds at all and rarely describe them in such a way as to make possible identification from the seeds alone. Many of the unusual plants listed in these inventories are appearing in this country for the first time, and there are no seed samples or herbarium specimens with ripe seeds with which the new arrivals may be compared. The only identification possible is to see that the sample received resembles seeds of other species of the same genus or of related genera. The responsibility for the identifications therefore must necessarily often rest with the person sending the material. If there is any question regarding the correctness of the identification of any plant received from this Division, herbarium specimens of leaves and flowers should be sent in so that definite identification can be made.

119274 to 119286—Continued.

orange scarlet, and the three lower ones are banded with greenish yellow and tipped with orange scarlet. The bulbs are not larger than ordinary peas and cannot survive long out of the ground.

For previous introduction see 116983.

119275. *GLADIOLUS ANGUSTUS* L.

A plant with an ascending stem up to 2 feet in height and narrow upright leaves with prominent midribs. The white scentless flowers which grow in a lax one-sided spike are narrow, straight, and funnel-shaped. It is a native of the Cape of Good Hope.

For previous introduction see 44723.

119276. *GLADIOLUS BLANDUS* Ait.

A species with sword-shaped leaves somewhat shorter than the stem, which is from 6 inches to 2 feet high and which bears 3 to 10 white or reddish-tinted scentless flowers over an inch long.

For previous introduction see 116984.

119277. *GLADIOLUS BREVIFOLIUS* Jacq.

A South African gladiolus, with firm linear leaves $1\frac{1}{2}$ to 2 feet long and a very slender simple flower stem of equal length, with 4 to 12 pink or lilac flowers in a lax second spike. The lower segments are purplish at the throat.

119278. *GLADIOLUS DEBILIS* Ker.

A South African gladiolus with a very slender stem 1 to $1\frac{1}{2}$ feet high, about 3 linear leaves and 1 to 3 whitish flowers in a lax spike. The obtuse segments are about three-fourths of an inch long and the inner ones are marked with a carmine, 3-lobed spot at the base of each.

119279. *GLADIOLUS GRANDIS* Thunb.

Closely related to *Gladiolus tristis*, this has 3 strongly terete leaves 12 to 18 inches long and a slender stem up to 2 feet high. The purplish, brown-tinted flowers are 2 to 3 inches long in a lax second spike. Like *Gladiolus tristis*, the flowers give off a pleasant scent during the night. Native to the Cape of Good Hope.

For previous introduction see 113571.

119280. *GLADIOLUS ALATUS NAMAQUENSIS* (Ker) Baker.

A variety differing from the type by the more robust habit, with sword-shaped leaves sometimes to 2 inches broad and more numerous flowers in the spike.

119281. *GLADIOLUS ORCHIDIFLORUS* Andr.

The 3 or 4 leaves of this gladiolus are linear, firm, crowded, and 6 to 12 inches long, and the 4 to 6 greenish, very fragrant flowers are in a very lax spike on a stem the same height as the leaves. Native to South Africa.

For previous introduction see 105293.

119282. *GLADIOLUS PSITTACINUS* Hook.
Parrot gladiolus.

A gladiolus with a stout stem 3 feet or more in length and usually 4 rigid sword-like leaves up to 2 feet long. The many-flowered spike reaches a foot or more in length. The flowers are a rich yellow, grained and overlain with red, particularly about the margins of the segments.

For previous introduction see 116985.

119274 to 119286—Continued.

119283. *GLADIOLUS RECURVUS* L.

A slender-stemmed species, up to 2 feet high, native to boggy sandy places in South Africa. The 2 to 6 mildly fragrant flowers which appear in August are borne in a very lax spike and vary in color from blue to flus'ed pink with minute blackish-lilac spots.

For previous introduction see 105295.

119284. *GLADIOLUS SCAPHOCHLAMYS* Baker.

A South African gladiolus related to *G. blandus*. It has 3 or 4 ensiform, rigid leaves about 1 foot long and a rigid stem $1\frac{1}{2}$ to 2 feet high, with 6 to 8 straw-yellow flowers in a lax curved spike.

119285. *GLADIOLUS VITTATUS* Hornem.

A gladiolus about 1 foot high with several narrow linear leaves 6 to 9 inches long and numerous pink or whitish flowers in a stout curved spike. The nearly erect flowers are about 1 inch long, the limbs slightly longer, and the three lower segments with a purple central blotch. Native to South Africa.

119286. *GLADIOLUS WATERMEYERI* L. Bolus.

A species with 3 or 4 leaves about 10 inches long, conspicuously two-nerved, and very fragrant flowers $1\frac{1}{2}$ inches long. The upper segments are usually greenish, flushed with pinkish buff, with conspicuous purple veins.

For previous introduction see 105298.

119287. *COLOCASIA ESCULENTA* (L.) Schott. Araceae. Dasheen.

From China. Tubers collected by F. A. McClure, Lingnan University, Canton. Received January 25, 1926. Numbered in January 1937.

No. 271. *Taai Fa Oo, Fa T'au Oo*. Canton, November 26, 1925. A dasheen resembling in general the Trinidad dasheen, but differing from it in certain respects. The corms tend to be tough when cooked, but the tubers are of good quality and fairly uniform in size and shape.

119288. *PAPAVER* sp. Papaveraceae.

Poppy.

Plants grown at the Plant Introduction Garden, Glenn Dale, Md. Numbered in January 1937.

Grown from seed collected in Turkistan, 1934-35, by H. L. Westover and C. R. Enlow, Bureau of Plant Industry; exact locality unknown.

119289 to 119294.

From the Union of South Africa. Seeds presented by the McGregor Museum, Kimberley. Received January 14, 1937.

119289. *COMBRETUM BRYTHOPHYLLUM* (Burch.) Sond. Combretaceae.

A tree up to 40 feet high, with unarmed, spreading branches and ovate-acute leaves which turn crimson in autumn. Native to tropical Africa.

For previous introduction see 112639.

119290. *DIMORPHOTHECA VISCOSA* (Andr.) Druce. Asteraceae.

A shrubby, much-branched perennial with variable leaves and deep-yellow flower heads. Native to South Africa.

119291. *OLEA VERRUCOSA* (Roem. and Schult.) Link. Oleaceae. Olive.

119289 to 119294—Continued.

119292. RHUS LANCEA L. f. Anacardiaceae.
Sumac.

Karree-boom. A small bushy tree with gray bark and long-stemmed leaves, with linear-lanceolate leaflets 4 to 6 inches long. It is a valuable hardwood tree for regions of limited rainfall. Native to the Cape of Good Hope.

For previous introduction see 115811.

119293. RHUS VIMINALIS Ait. Anacardiaceae.
Sumac.

Karree-boom. An evergreen tree up to 30 feet high, native to South Africa in semiarid regions at over 4,000 feet altitude. Sheep and goats browse on the foliage.

For previous introduction see 114495.

119294. V E N D I U M FASTUOSUM (Jacq.) Stapf. Asteraceae.

A showy annual a foot or more high, with lanceolate or obovate, irregularly lobed leaves 1 to 2 inches long and terminal solitary bright-orange flower heads up to 4 inches across. Native to South Africa.

For previous introduction see 106099.

119295. LEBECKIA SERICEA (Ait.) Thunb. Fabaceae.

From the Union of South Africa. Seeds presented by M. Henrici, Officer in Charge, Veld Reserve, Fauresmith, Orange Free State. Received January 21, 1937.

A densely branched shrub about 3 feet high, with trifoliolate leaves, linear-oblong leaflets up to 1½ inches long, and numerous small, deep-yellow flowers. Native to South Africa.

119296 to 119298. ZEA MAYS L. Poaceae.
Corn.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 14, 1937.

119296. No. 3276-A. From Edime.

119297. No. 2429-A. From 30 km. northwest of Susheri.

119298. No. 2929-A. From Biga.

119299. TRITICUM AESTIVUM L. Poaceae.
Common wheat.

From the Netherlands. Seeds presented by the Instituut voor Phytopathologie, Wageningen. Received January 8, 1937.

Robusta wheat.

119300 to 119407. TRITICUM AESTIVUM L. Poaceae.
Common wheat.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 5, 1937.

119300. No. 560. From the Isparta bazar, June 6, 1936.

119301. No. 760. From a mill near Tavas, May 30, 1936.

Nos. 119302 to 119304. From fields near Denizli, May 31, 1936.

119302. No. 763.

119303. No. 764.

119304. No. 774.

119300 to 119407—Continued.

119305. No. 811. From a field near Antalya, June 4, 1936.

119306. No. 1070. From a field 40 km. northwest of Izmir, June 10, 1936.

119307. No. 1071. From a field 10 km. west of Soma, June 10, 1936.

119525. No. 3215. 119527. No. 3217.
119526. No. 3216. 119528. No. 3218.
119529. No. 3219. From Denizli, October 16.
119530. No. 3220. From Konya, October 16.
119531. No. 3221. From Kayseri, October 16.
119532. No. 3222. From Erzerum, October 16.
119533. No. 3223. From Yeshilkoy, October 16.
119534. No. 3224. From Mush (Mus), October 16.
119535. No. 3290. From the Edirne bazar, October 22.

119536 to 119540. *MEDICAGO*. Fabaceae.
Medick.

- A collection of hybrid alfalfas.
119536. No. 1979. From Birejik, July 24.
119537. No. 2110. From 106 km. east of Sivas, August 5.
119538. No. 2621. From 85 km. southwest of Samsun, August 24.
- Nos. 119539 and 119540. Collected south of Tokat, August 26.
119539. No. 2681. From 15 km. south.
119540. No. 2689. From 21 km. south.

119474 to 119586—Continued.

- 119541 to 119548. *SECALE CEREALE* L. Poaceae.
Rye.
119541. No. 822. From a field; en route from Aydin to Milas, May 26.
119542. No. 1072. From a field 10 km. west of Soma, June 10.
119543. No. 1167. From a field 8 km. west of Balikesir, June 16.
- Nos. 119544 and 119545. Collected in a field 20 km. southeast of Elaziz, July 13.
119544. No. 1765.
119545. No. 1766.
119546. No. 1817. From the Malatya bazar, July 16.
119547. No. 2016. From a field 45 km. north of Nigde, July 26.
119548. No. 2102. From a field on the slopes of Alma Dag, 25 km. southeast of Ankara, August 1.
- 119549 to 119586. *ZEA MAYS* L. Poaceae.
Corn.
119549. No. 1245. From the Bursa bazar, June 18.
119550. No. 1389. From the Marash bazar, July 2.
119551. No. 1556. From the Urfa bazar, July 6.
119552. No. 1712. From the Elaziz bazar, July 13.
119553. No. 1843. From the Malatya bazar, July 16.
119554. No. 1907. From Diyarbekir, July 8. This type is eaten roasted.
- Nos. 119555 and 119556. From the Nigde bazar, July 27.
119555. No. 2036. 119556. No. 2044.
119557. No. 2131. From the Sivas bazar, August 5.

119592. LF. 23066. *Kanred* × *Florence*
F₇. Cheg: 27-7 × 11-1-23/34.

119593 to 119705.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 11, 1937.

This material was all collected in the summer and autumn of 1936.

- 119593 to 119598. *AEGILOPS* spp. Poaceae.
119593. *AEGILOPS SPELTOIDES AUCHERI* (Boiss.) Meyer.
- No. 1595. From between Urfa and Diyarbekir, July 7. Found growing plentifully on basalt formation.
119594. *AEGILOPS BICORNIS* (Forsk.) Jaub. and Spach.

119593 to 119705—Continued.

- No. 1077. From 50 km. northwest of Izmir, June 10.
119595. *AEGILOPS MUTICA* Boiss.
- No. 1901. From dry plains 25 km. north of Malatya, July 17. An annual grass with erect stems about 12 inches high, native to Asia Minor.
119596. *AEGILOPS MUTICA* Boiss.
- No. 2182. From 20 km. east of Susheri, August 7.
119597. *AEGILOPS SPELTOIDES* Tausch.
- No. 1402. From 30 km. southeast of Gaziantep, July 2.
- For previous introduction see 116293.
119598. *AEGILOPS SPELTOIDES* Tausch.
- No. 1610. Found growing abundantly on dry basalt plains between Urfa and Diyarbekir, July 7.
- 119599 to 119608. *AGROPYRON* spp. Poaceae. Grass.
- 119599 to 119601. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.
119599. No. 2015. From 25 km. north of Nigde, July 26.
119600. No. 2280. From 94 km. east of Erzinjan, August 9.
119601. No. 3409. From near Ankara, June 26. An early maturing dwarf variety found growing on dry plains.
119602. *AGROPYRON DIVARICATUM* Boiss. and Bal.
- No. 1888. A perennial grass found 55 km. north of Malatya, July 17.
119603. *AGROPYRON INTERMEDIUM* (Host) Beauv.
- No. 2902. From the ruins in Troy, September 18.
119604. *AGROPYRON JUNCEUM* (L.) Beauv.
- No. 2875. Beach grass from 1 km. west of Yalova, September 12.
- For previous introduction see 115323.
119605. *AGROPYRON ORIENTALE LASIANTHUM* Boiss.
- No. 1905. From 25 km. north of Malatya, July 17. An annual grass found on dry plains.
- For previous introduction see 108846.
119606. *AGROPYRON PANORMITANUM* Parl.
- No. 1937. From Birejik, July 22. A fibrous-rooted perennial grass with erect stems. Native to the Mediterranean region.
119607. *AGROPYRON* sp.
- No. 1892. From 60 km. north of Malatya, July 17.
119608. *AGROPYRON* sp.
- No. 2971. From 20 km. northeast of Izmir, August 24.
- 119609 to 119615. *AGROSTIS* spp. Poaceae. Bentgrass.
- 119609 and 119610. *AGROSTIS SPICA-VENTI* L.
- An annual grass, usually about 20 inches high, with feathery panicles 4 to 8 inches long. Native to Europe.

119593 to 119705—Continued.

- For previous introduction see 109222.
119609. No. 1644. From 70 km. south of Diyarbekir, July 9.
119610. No. 2012. From 30 km. north of Nigde, July 26.
119611. *AGROSTIS VERTICILLATA* Vill.
No. 1848. From 11 km. west of Malatya, July 16.
119612. *AGROSTIS* sp.
No. 1176. From 40 km. west of Balikesir, June 16.
119613. *AGROSTIS* sp.
No. 2281. From 128 km. east of Erzinjan, August 9.
119614. *AGROSTIS* sp.
No. 2813. From Yalova Kaplijalari, September 11.
119615. *AGROSTIS* sp.
No. 2817. From Yalova Kaplijalari, September 11.
119616. *ALOPECURUS PRATENSIS* L. Poaceae.
Meadow foxtail.
No. 617. From Ephesus, May 24.
119617. *ANDROPOGON ISCHAEMUM* L. Poaceae.
Grass.
No. 2561. From 41 km. east of Samsun, August 22.
119618. *ANTHOXANTHUM ODORATUM* L. Poaceae.
Sweet vernal grass.
No. 671. From south of Chine, June 26.
- 119619 to 119622. *ARRHENANTHERUM ELATIUS* (L.) Beauv. Poaceae. Tall oatgrass.
119619. No. 1169. From 10 km. west of Balikesir, June 16.
119620. No. 1288. From 31 km. northeast of Bandirma, June 18.
119621. No. 2080. From Alma Dag, 36 km. southeast of Ankara, August 1.
119622. No. 2192. From 100 km. southeast of Susheri, August 7.
- 119623 to 119625. *BRACHYPODIUM PINNATUM* (L.) Beauv. Poaceae. Grass.
119623. No. 2112. From 100 km. east of Sivas as 6,000 feet altitude on rocky soil, August 5.
119624. No. 2183. From 100 km. southeast of Susheri, August 7.
119625. No. 2680. From 41 km. south of Tokat, August 26.
119626. *BRIZA MAXIMA* L. Poaceae.
Big quaking grass.
No. 1190. From 5 km. west of Balikesir, June 16. An annual grass with erect or decumbent culms up to 2 feet high and large showy spikelets. Native to southern Europe.
- For previous introduction see 111268.
- 119627 and 119628. *BRIZA HUMILIS* Bieb. Poaceae.
Quaking grass.
An annual grass with ascending stems about 1 foot high. Native to the Near East.
119627. No. 3405. From 3 km. west of Ankara, June 25.

119593 to 119705—Continued.

119628. No. 3306. From 10 km. west of Gaziantep, May 1.
- 119629 to 119633. *BROMUS* spp. Poaceae.
Brome-grass.
119629. *BROMUS SECALINUS* L. Chess.
No. 2228. From the Erzinjan bazar, August 8.
119630. *BROMUS TECTORUM* L.
No. 2188. From 100 km. southeast of Susheri, August 7.
119631. *BROMUS TECTORUM* L.
No. 2052. From Alma Dag, 25 km. southeast of Ankara, August 1.
119632. *BROMUS* sp.
No. 1287. From 40 km. northeast of Bandirma, June 18.
119633. *BROMUS STERILIS* L.
No. 2807. From Yalova Kaplijalari, September 11.
119634. *CALAMAGROSTIS* sp. Poaceae.
Grass.
No. 2425. From 77 km. south of Giresun, August 17.
119635. *CYNODON DACTYLON* (L.) Pers. Poaceae.
Bermuda grass.
No. 1900. A coarse type from dry plains 25 km. northeast of Malatya, July 17.
- 119636 to 119639. *DACTYLIS GLOMERATA* L. Poaceae.
Orchard grass.
119636. No. 1196. From 80 km. west of Balikesir, June 16.
119637. No. 1645. From 70 km. south of Diyarbekir, July 9.
119638. No. 1869. From 60 km. north of Malatya in the mountains, July 17.
119639. No. 2208. From 60 km. southeast of Susheri, August 7.
119640. *DESCHAMPSIA CAESPITOSA* (L.) Beauv. Poaceae. Tufted hairgrass.
No. 2745. From Alma Dag, 35 km. south of Bursa, August 7.
119641. *ERIANTHUS HOSTII* Griseb. Poaceae.
Grass.
No. 2852. From Yalova Kaplijalari, September 12. A perennial tufted reedlike grass about 6 feet high, with densely woolly panicles. Native to southern Europe and Asia Minor.
- For previous introduction see 109495.
- 119642 to 119652. *FESTUCA* spp. Poaceae.
Fescue.
- 119642 to 119648. *FESTUCA OVINA* L. Sheep fescue.
119642. No. 1884. From 45 km. north of Malatya, July 17.
- Nos. 119643 and 119644. From Birejik, July 21.
119643. No. 1928. 119644. No. 1929.
119645. No. 2079. From Alma Dag, 25 km. southeast of Ankara, August 1.
119646. No. 2676. From 39 km. south of Tokat, August 26.

119593 to 119705—Continued.

119647. No. 2748. From Ulu Dag, 35 km. south of Bursa, August 7. A form with stiff grayish-green leaves; seldom eaten.
119648. No. 3424. From 3 km. north-east of Ankara, June 26.
119649. *FESTUCA* sp.
No. 724. From a lake bottom, 50 km. southeast of Mugla, May 28.
119650. *FESTUCA* sp.
No. 2746. From Ulu Dag, 35 km. south of Bursa, September 7.
119651. *FESTUCA* sp.
No. 2788. From Ulu Dag, 35 km. south of Bursa, September 9.
119652. *FESTUCA* sp.
No. 2832. From Yalova Kaplijalari, September 11.
119653. *GAUDINIA FRAGILIS* (L.) Beauv. Poaceae.
No. 1173. From 10 km. west of Balikesir, June 16. An annual ascending grass, up to 2 feet high, with thick, rough-hairy leaves. It is confined almost entirely to the Mediterranean countries.
For previous introduction see 74167.
119654. *KOELERIA PHLEOIDES* (Vill.) Pers. Poaceae.
No. 632. A low-growing type found near Selchuk, May 24.
- 119655 to 119657. *LOLIUM* spp. Poaceae.
119655. *LOLIUM PERENNE* L.
Perennial ryegrass.
No. 1131. From lowlands south of Kirkagach, June 11.
- 119656 and 119657. *LOLIUM TEMULENTUM* L.
Darnell.
119656. No. 765. From 2 km. north of Denizli, May 31.
119657. No. 2578. From 7 km. west of Terme, August 22.
119658. *MELICA CILIATA* L. Poaceae.
No. 1168. From 10 km. west of Balikesir, June 16.
For previous introduction see 111686.
119659. *MELICA MINUTA* L. Poaceae.
No. 624. From Ephesus, May 22.
For previous introduction see 117376.
- 119660 to 119665. *ORYZOPSIS* spp. Poaceae.
119660 and 119661. *ORYZOPSIS COERULESCENS* (Desf.) Hack.
For previous introduction see 117384.
119660. No. 656. From 25 km. south-east of Izmir, June 25.
119661. No. 1930. From Birejik, July 21.
- 119662 and 119663. *ORYZOPSIS HOLCIFORMIS* (Bieb.) Hack.
A perennial grass with a thick short rhizome and stems 3 feet or more high. The panicles are a foot or more long. It is native to southern and southeastern Europe.
For previous introduction see 78797.

119593 to 119705—Continued.

119662. No. 777. From 35 km. west of Isparta, June 2.
119663. No. 2186. From 100 km. southwest of Susheri, August 7.
- 119664 and 119665. *ORYZOPSIS MILIACEA* (L.) Benth. and Hook.
For previous introduction see 109536.
119664. No. 2560. From 4 km. east of Samsun, August 22.
119665. No. 2948. From Kemal Pasha, September 23.
- 119666 to 119670. *PHALARIS* spp. Poaceae. Grass.
119666. *PHALARIS BRACHYSTACHYS* Link.
No. 1647. An annual grass from 20 km. south of Diyarbekir, July 9.
119667. *PHALARIS PARADOXA* L.
No. 620. From Ephesus, June 24.
- 119668 to 119670. *PHALARIS TUBEROSA* L.
For previous introduction see 117386.
119668. No. 1565. From 30 km. north-east of Urfa, July 7.
119669. No. 1649. Found growing in large clumps 20 km. south of Diyarbekir, July 9.
119670. No. 2907. From 2 km. south of Biga, September 19.
- 119671 to 119676. *PHLEUM* spp. Poaceae. Timothy.
119671 and 119672. *PHLEUM ARENARIUM* L.
For previous introduction see 109345.
119671. No. 1641. From 30 km. south of Diyarbekir, July 9.
119672. No. 2284. From 25 km. east of Erzinjan, August 9.
119673. *PHLEUM PRATENSE* L.
No. 2583. From 31 km. west of Samsun, August 23.
- 119674 to 119676. *PHLEUM SUBULATUM* (Savi) Aschers. and Graebn.
For previous introduction see 109547.
119674. No. 1094. From south of Akhisar, June 11.
119675. No. 1187. From 50 km. west of Balikesir, June 16.
119676. No. 2603. From 3 km. west of Samsun, August 23.
- 119677 to 119688. *POA* spp. Poaceae. Grass.
119677 to 119682. *POA BULBOSA* L.
119677. No. 633. From the Izmir district, June 25.
119678. No. 1577. From 30 km. northeast of Urfa, July 7.
119679. No. 1887. From 42 km. north of Malatya, July 17.
119680. No. 2020. From 45 km. north of Nigde, July 26.
119681. No. 2771. From 6,500 feet altitude on Ulu Dag, 35 km. south of Bursa, September 8.
119682. No. 3308. From 10 km. west of Gaziantep, May 1.

119593 to 119705—Continued.

119683. *POA* sp.
No. 1115. From 2 km. south of Kiiikagach, June 11.
119684. *POA* sp.
No. 1199. From 65 km. west of Balikesir, June 16.
119685. *POA* sp.
No. 2066. From Alma Dag, 25 km. southeast of Ankara, August 1.
119686. *POA* sp.
No. 2071. From Alma Dag, 25 km. southeast of Ankara, August 1.
119687. *POA* sp.
No. 2337. From 55 km. south of Trabzon, August 10.
119688. *POA* sp.
No. 2682. From 41 km. south of Tokat, August 26.
119689. *POLYPOGON MONSPELIENSIS* (L.) Desf. Poaceae. Grass.
No. 1443. From 60 km. north of Gaziantep, July 2. An annual grass with soft bristly green or yellowish spikes up to 6 inches long. A common weed on our Pacific coast.
For previous introduction see 109143.
- 119690 to 119696. *RHAPHIS GRYLLOS* (L.) Desv. Poaceae. Grass.
119690. No. 723. From dry limestone hills 45 km. southeast of Mugla, May 28.
119691. No. 1076. From 60 km. north-west of Izmir, June 10.
119692. No. 1171. From 65 km. west of Balikesir, June 16.
119693. No. 1175. From 40 km. west of Balikesir, June 16. Very common on the dry plains and hills of this region.
119694. No. 1399. From 15 km. southeast of Marash, where it forms bright green patches on dry rocky slopes, July 2.
119695. No. 1522. From 25 km. east of Birejik, July 5.
119696. No. 2834. From Yalova Kapli-jalari, September 11.
119697. *SECALE ANATOLICUM* Boiss. Poaceae. Grass.
No. 2060. From Alma Dag, 25 km. southeast of Ankara, August 1. A perennial grass with stems 2 to 3 feet high. Native to Asia Minor.
- 119698 to 119705. *STIPA* spp. Poaceae. Feathergrass.
119698. *STIPA BROMOIDES* (L.) Beck.
No. 2911. From 50 km. east of Chanak Kale, September 19.
- 119699 and 119700. *STIPA PENNATA* L.
119699. No. 2062. From Alma Dag, 25 km. southeast of Ankara, August 1.
119700. No. 3384. From 3 km. west of Ankara, June 26.
119701. *STIPA SZOVITZIANA* Trin.

119593 to 119705—Continued.

- No. 806. From 20 km. south of Burdur, June 3.
119702. *STIPA* sp.
No. 775. From 35 km. west of Isparta, June 2.
119703. *STIPA* sp.
No. 1068. From the Bergama ruins, June 10.
119704. *STIPA* sp.
No. 1762. From 40 km. southeast of Elaziz, July 13.
119705. *STIPA* sp.
No. 2009. From 20 km. north of Nigde, July 26.
119706. *BRASSICA OLERACEA CAPITATA* L. Brassicaceae. Cabbage.
From New Zealand. Seeds presented by Richard Norman, Otago, through Mrs. John Waldron, National Geographic Society, Washington, D. C. Received January 13, 1937.
Maori cabbage. A variety native to New Zealand, which grows rapidly and is a fine culinary plant; the seeds look like rape.
- 119707 and 119708.
From Kenya Colony, Africa. Seeds and bulbs purchased from the Mount Elgon Nurseries, Kama Koia, Mount Elgon, Kitale. Received January 11, 1937.
119707. *CLEODENDRUM MYRICOIDES* R. Br. Verbenaceae.
A tender erect evergreen shrub 3 to 5 feet high, with 2- to 4-lobed oblong leaves 2 to 6 inches long and small bicolored blue and white flowers in short terminal panicles. Native to tropical Africa.
119708. *AMMOCHARIS HETEROSTYLA* (Bullock) Mil.-Redh. and Schw. Amaryllidaceae.
Bulbs of an amaryllid with glaucous green, strap-shaped, spreading leaves about 10 inches long and up to 18 erect, mildly fragrant flowers in an umbel; the narrow segments are 2 to 3 inches long. The fresh flowers are creamy white with a pinkish tube; as they age, usually in 2 or 3 days, they become dull rose over all. Native to South Africa.
- 119709 to 119804.
From Buenos Aires, Argentina. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received January 4, 1937.
Collected in markets and seed stores in Buenos Aires, November 25 to 27, 1936, and, unless otherwise stated, received as seeds.
- 119709 to 119720. *ALLIUM CEPA* L. Liliaceae. Onion.
119709. No. 4538. *Colorado de Madeira*.
119710. No. 4539. *Ognon Jaune de Danvers*.
119711. No. 4540. *Blanca Chata de la Costa*.
119712. No. 4541. *Amarilla de Trebans*.
119713. No. 4542. *Amarilla Valenciana*.
119714. No. 4543. *Blanca Chata de Nápole*.

119709 to 119804—Continued.

119715. No. 4544. *Colorada de la Costa*.
 119716. No. 4545. *Colorada Viva de Agosto*.
 119717. No. 4546. *Amarilla Chata de Vertus*.
 119718. No. 4499. *Amarilla Aglobada de la Costa*.
 119719. No. 4500. *Colorada Chata de la Costa*.
 119720. No. 4501. *Amarilla Chata In-versiza*.
 119721 and 119722. BRASSICA OLERACEA CAPITATA L. Brassicaceae. **Cabbage**.
 119721. No. 4507. *Repollo Crespo Grueso San Juan Temprano*.
 119722. No. 4505. *Col Negro Romano*. Native seed.
 119723. TARA SPINOSA (Molina) Britton and Rose (*Caesalpinia pectinata* Cav.). Caesalpiniaaceae.
 No. 4559. *Tara*. A tall upright spiny shrub or small tree, often used as a hedge in Peru. The foliage is deep green with the leaflets smooth and polished on the upper surface. The greenish-yellow flowers, in cylindrical open spikes, are not very conspicuous, but the pods are produced in large clusters and the exposed surfaces show bright scarlet for a long time before maturing. The pods contain a high percentage of tannin.
 For previous introduction see 64915.
 119724. CICER ARIETINUM L. Fabaceae. **Chickpea**.
 No. 4479. *Garbanzo*.
 119725. CICHORIUM INTYBUS L. Cichoriaceae. **Chicory**.
 No. 4508. *Radichota Fina do Cortar*. Native seed.
 119726 to 119735. CITRULLUS VULGARIS Schrad. Cucurbitaceae. **Watermelon**.
 119726. No. 4494. *Florida Favorita*.
 119727. No. 4495. *Colorada de la Costa*.
 119728. No. 4509. *Colorada Delicia*.
 119729. No. 4510. *Colorada de la Costa*. Native seed.
 119730. No. 4523. *Colosal*.
 119731. No. 4524. A mixed sample of native varieties.
 119732. No. 4531. *De Cremona*.
 119733. No. 4532. *Larga de Valencia*.
 119734. No. 4533. *Colorada Redonda*.
 119735. No. 4564.
 119736 to 119753. CUCUMIS MELO L. Cucurbitaceae. **Muskmelon**.
 119736. No. 4491. *Cantaloup de Argel*.
 119737. No. 4492. *Campeón del Mercado*.
 119738. No. 4493. *Azucarado de Tours*.
 119739. No. 4514. A mixed sample.
 119740. No. 4515. *Cantaloup Nantais*.
 119741. No. 4516. *Cantaloup Azucarado*.
 119742. No. 4517. *Valenciano Largo, Carne Amarillo*.

119709 to 119804—Continued.

119743. No. 4518. *Malta de Invierno, Carne Colorado*.
 119744. No. 4519. *Mediano Redondo*. Native seed.
 119745. No. 4520. *Brodi Bola de Oro, Carne Verde*.
 119746. No. 4521. *Redondo Escrito*.
 119747. No. 4522. *Vaucluse é Cavallon*.
 119748. No. 4534. *Cantaloup de Argel*.
 119749. No. 4535. *Campeón del Mercado*.
 119750. No. 4536. *Azucarado de Tours*.
 119751. No. 4537. *Amarillo de Valencia*.
 119752. No. 4562. A cultivated melon.
 119753. No. 4563. A cultivated melon.
 119754 and 119755. CUCUMIS SATIVA L. Cucurbitaceae. **Cucumber**.
 119754. No. 4496-A. *Largo Verde*.
 119755. No. 4497. *Chico de Rusia*.
 119756 to 119768. CUCURBITA spp. Cucurbitaceae.
 119756 to 119761. CUCURBITA MAXIMA Duchesne. **Squash**.
 119756. No. 4496. *Zapallito Redondo de Tronco*. A variety common in the market; it is filled with meats, etc., for roasting.
 119757. No. 4502. *Redondo Criollo*. Native seed.
 119758. No. 4503. *Español Chato*.
 119759. No. 4504. *Zapallito Redondo de Tronco*. The same as No. 4496 (P. I. 119756).
 119760. No. 4527. *Courge Sucrière de Brésil*.
 119761. No. 4529. *Zapallo Criollo Grueso*.
 119762 to 119764. CUCURBITA MOSCHATA Duchesne. **Cushaw**.
 119762. No. 4566. From the Province of Salta.
 119763. No. 4565. A form with curved fruits.
 119764. No. 4483. A cultivated pumpkin.
 119765 to 119768. CUCURBITA PEPO L. **Pumpkin**.
 119765. No. 4526. *Courge a la Moelle*.
 119766. No. 4528. *Zapallito Largo del Tronco Temprano Genoves*.
 119767. No. 4530. *Zapallo Angola*.
 119768. No. 4556. *Boliviana*. Cultivated by the Indians of the Province of Salta. The fruits keep a long time.
 119769. DOLICHOS LABLAB L. Fabaceae. **Hyacinth-bean**.
 No. 4465. An ornamental vine; seeds sometimes eaten.
 119770. FRAGARIA VESCA L. Rosaceae. **Strawberry**.
 No. 4462. A cultivated strawberry with small fruits of good flavor.
 119771. HELIANTHUS ANNUUS L. Asteraceae. **Common sunflower**.

119709 to 119804—Continued.

- No. 4481. A cultivated sunflower.
119772. HIPPEASTRUM sp. Amaryllidaceae.
No. 4555. Bulbs; native in Corrientes, Argentina.
119773. LACTUCA SATIVA L. Cichoriaceae.
Garden lettuce.
No. 4464. Cultivated lettuce; native seed.
119774. LATHYRUS SATIVUS L. Fabaceae.
Bittervetch.
No. 4474. A cultivated pea.
119775. LUPINUS sp. Fabaceae.
No. 4558.
- 119776 to 119778. LYCOPERSICON ESCULENTUM Mill. Solanaceae. Tomato.
119776. No. 4511. *Liso Colorado Argentino*. Native seed.
119777. No. 4512. *Grueso Liso Chemin*.
119778. No. 4513. *Colorado Grueso*.
- 119779 to 119782. MEDICAGO spp. Fabaceae.
119779. MEDICAGO LUPULINA L.
Black medick.
No. 4570. A prostrate variety with yellow flowers.
- 119780 to 119782. MEDICAGO SATIVA L.
Alfalfa.
119780. No. 4484.
119781. No. 4463. Native seed.
119782. No. 4525. *Alfalfa de la Pampa*. Native seed.
119783. OCMUM BASILICUM L. Mentha-
ceae. Common basil.
No. 4506. *Albahaca a Hoja Ancha*. Native seed.
For previous introduction see 118393.
119784. ORYZA SATIVA L. Poaceae. Rice.
No. 4561. A cultivated rice.
- 119785 to 119792. PHASEOLUS spp. Fab-
aceae. Bean.
119785 and 119786. PHASEOLUS COCCINEUS
L. Scarlet runner bean.
119785. No. 4468. 119786. No. 4471.
119787. PHASEOLUS LUNATUS L.
Lima bean.
No. 4472. A cultivated butter bean.
- 119788 to 119792. PHASEOLUS VULGARIS
L. Common bean.
119788. No. 4466. *Chauca*. Used as
food, also as stock feed.
119789. No. 4467. 119791. No. 4470.
119790. No. 4469. 119792. No. 4480.
- 119793 to 119796. PISUM SATIVUM L. Fab-
aceae. Pea.
119793. No. 4475. 119795. No. 4477.
119794. No. 4476. 119796. No. 4478.
119797. PRUNUS ARMENIACA L. Amygdala-
ceae. Apricot.
No. 4599. *Damasco*. Fruit small, about
1 inch in diameter.

119709 to 119804—Continued.

119798. VIGNA SINENSIS (Torner) Savi.
Fabaceae. Cowpea.
No. 4473. A cultivated black-eyed pea.
- 119799 to 119802. ZEA MAYS L. Poaceae.
Corn.
119799. No. 4561—A. *Maiz Arco Iris*.
119800. No. 4482. Cultivated popcorn.
119801. No. 4498. *Maiz Dulce Para Choclo*. Native seed.
119802. No. 4560. *Maiz Vestido*.
119803. ZEPHYRANTHES sp. Amaryllida-
ceae.
No. 4553. Bulbs from Iguazu, Argen-
tina.
119804. ZEPHYRANTHES sp.
No. 4554. Bulbs, native to Puerto Ber-
toni, Argentina. A variety with yellow
flowers.
- 119805 to 119809. XANTHOSOMA spp.
Araceae. Malanga.
From Puerto Rico. Tubers presented by
Atherton Lee, Puerto Rico Federal Exper-
iment Station, Mayaguez. Received Janu-
ary 27, 1937.
119805. XANTHOSOMA ATROVIRENS Koch and
Bouché.
119806. XANTHOSOMA CARACU Koch and
Bouché. Yautia.
A yautia remarkable for the large and
uniform size of its tubers.
For previous introduction see 98519.
119807. XANTHOSOMA SAGITTAEFOLIUM (L.)
Schott. Yautia.
A white-fleshed yautia of very good
quality.
For previous introduction see 51388.
119808. XANTHOSOMA sp.
119809. XANTHOSOMA sp.
- 119810 to 119823.
From Argentina and Brazil. Collected by
W. A. Archer, Bureau of Plant Industry.
Received January 13, 1937.
Unless otherwise mentioned, the material
was received as seeds.
- 119810 to 119815. ARACHIS HYPOGAEA L.
Fabaceae. Peanut.
Nos. 119810 to 119813 were from Pos-
adas, Argentina, December 5, 1936. Cult-
ivated peanuts.
119810. No. 4600. 119812. No. 4602.
119811. No. 4601. 119813. No. 4603.
Nos. 119814 and 119815 were from
Santa Anna, Argentina, December 10,
1936.
119814. No. 4622. *Negro*.
119815. No. 4623. *Rojo*.
- 119816 and 119817. CUCUMIS MELO L. Cu-
curbitaceae. Muskmelon.
Cultivated melons from Posadas, Argen-
tina, December 5, 1936.
119816. No. 4605. 119817. No. 4606.

119810 to 119823—Continued.

119818. *PHALOCALLIS HERBERTII* (Herbert) Kuntze. Iridaceae.

No. 4435-A. From Santa Anna, Brazil, November 13, 1936. A plant commonly found in this region growing in muck or in moist sand. Flower stalk 2 to 3 feet long, with bulbous base, bearing 5 or 6 flowers. Petals orange-red with green markings at base.

119819. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae. Suakwa towelgourd.

No. 4604. *Esonja enredadera*. From a shop in Posadas, Argentina, December 5, 1936.

119820. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 4607. *Calabasita*. From a shop in Posadas, Argentina, December 5, 1936. A cultivated vine with edible fruits.

119821 and 119822. *NICOIYANA TABACUM* L. Solanaceae. Common tobacco.

From Bonpland, Argentina, December 8, 1936.

119821. No. 4616. *Chileno guazú*. Native to Misiones.

119822. No. 4617. *Amarellinha*. Seed imported from Rio Grande do Sul, Brazil.

119823. *PASSIFLORA CAERULEA* L. Passifloraceae. Bluecrown passionflower.

No. 4614. On the road between Posadas and Bonpland, Misiones, Argentina, December 8, 1936. A slender, strong-growing vine, native to Brazil, with leaves divided into 5 to 7 lanceolate segments and fragrant greenish-white flowers 4 inches across. The rays of the crown are blue at the tip, white in the middle, and purple at the base, while the styles are light purple. The orange-colored fruits are 2 inches long and 1½ inches in diameter. The edible pulp is red.

For previous introduction see 79178.

119824 to 119834.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received January 15, 1937.

119824 and 119825. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.

From Lahore, Punjab, November 26 and 28, 1936, but said to have come from Quetta.

119824. No. 1797. *Tarbuza*. Fruit globose, 1 foot long, pale to dark green; if pale, finely reticulated with dark green; rind rough; flesh thin, very sweet and very seedy; an excellent keeper.

119825. No. 1802. *Tarbuza*. A globose melon which weighs 15 pounds; medium green, blotched with darker green; flesh very sweet.

119826. *COCCINIA* sp. Cucurbitaceae.

No. 1830. From Saharanpur, United Provinces, December 2, 1936. The *Coccinias* are perennial tropical vines, usually with tuberous roots. This form has insipid scarlet fruits 2 inches long.

119827. *CUCUMIS MELO* L. Cucurbitaceae. Muskmelon.

No. 1792. *Sarda*. Purchased at Pathankot, Punjab, November 23, 1936; said

119824 to 119834—Continued.

to have come from Baluchistan. Fruit oval, 1 foot long, golden yellow, well netted, no cavity, seeds embedded in flesh. Flesh salmon, thick, fragrant.

119828. *DIOSPYROS MONTANA* Roxb. Diospyraceae. Mountain persimmon.

No. 1817. Presented by the Government Gardens, Saharanpur, United Provinces, December 1, 1936. An evergreen tree 1 foot in diameter, laden with globular orange fruits, 1 to 1½ inches in diameter.

For previous introduction see 52287.

119829. *EUONYMUS* sp. Celastraceae.

No. 1825. From Saharanpur, United Provinces.

119830. *IXORA COCCINEA* L. Rubiaceae. Scarlet ixora.

No. 1827. From the Government Gardens, Saharanpur, United Provinces, December 1, 1936. An attractive evergreen shrub 4 feet high, with heads of lovely scarlet flowers, followed by crimson berries.

119831. *KIGELIA PINNATA* (Jacq.) DC. Bignoniaceae.

No. 1831. The "sausage tree" of eastern tropical Africa; becomes 30 to 50 feet high, with rough ternate leaves made up of 7 to 9 elliptic-oblong leaflets and large claret-colored flowers in long spikes, followed by sausagelike fruits 12 to 18 inches long.

For previous introduction see 106507.

119832. *MALUS* sp. Malaceae.

No. 1832. *Sarak*. From Lahore, Punjab, November 29, 1936. Fruits 1½ to 2 inches in diameter, red and yellow; flesh sweet, nonstringent, of agreeable flavor.

119833. *SARACA INDICA* L. Caesalpiniaceae. Common saraca.

From Saharanpur, United Provinces. A medium-sized Indian tree with pinnately compound leaves of 6 to 12 oblong leathery leaflets 6 to 12 inches long and fragrant orange-red flowers in compact panicles.

For previous introduction see 98093.

119834. *TABERNAEMONTANA CORONARIA* R. Br. Apocynaceae.

No. 1823. From the Government Gardens, Saharanpur, United Provinces, December 1, 1936. An evergreen shrub up to 8 feet tall, with white flowers and fruits which split and show the crimson seeds.

119835 to 119866.

From the Union of Soviet Socialist Republics. Plants presented by Dr. N. I. Sharapov, Institute of Plant Industry, Leningrad. Received January 25, 1937.

Originally from Turkistan, unless otherwise stated.

119835 to 119846. *AMYGDALUS* spp. Amygdalaceae.

119835. *AMYGDALUS DAVIDIANA* (Carr.) Zabel. Chinese wild peach.

No. 1674.

119836 to 119840. *AMYGDALUS PERSICA* L. Peach.

119836. No. 224. *Khidistavsky*.

119835 to 119866—Continued.

119837. No. 349—T. *Sarji Oilar*.
 119838. No. 0647. *Shaptaly*.
 119839. No. 1281—T. *Shirim-Danak*.
 119840. No. 0195. Turnip-shaped.
 119841 to 119843. *AMYGDALUS PERSICA* L.
 Peach.
 Variety *Ferganensis*.
 119841. No. 849. A white-fleshed form.
 119842. No. 0439. An early yellow form.
 119843. No. 02288. A yellow form.
 119844. *AMYGDALUS PERSICA* NECTARINA Ait.
 Nectarine.
 No. 0932. A flat red nectarine.
 119845 and 119846. *AMYGDALUS PERSICA* PLATYCARPA (Decaisne) Ricker.
 Flat peach.
 119845. No. 240. An early peach.
 119846. No. 1383—T.
 119847 to 119866. *PRUNUS* spp. Amygdalaceae.
 119847 to 119857. *PRUNUS ARMENIACA* L.
 Apricot.
 119847. No. 210—T.
 119848. No. 1070. *Shirpaivan*.
 119849. No. ———. *Krurmai*.
 119850. No. 1820—T. *Spitak*. Originally from Transcaucasia.
 119851. No. 1770. *Uimautsky*.
 119852. No. 0416. *Tadji-Eai*.
 119853. No. 321. *Badam-Tsfarak*.
 119854. No. 1163. *Shirassky*. From Transcaucasia.
 119855. No. 0466. *Golden Dust*.
 119856. No. 0234. *Kandsk*.
 119857. No. 1189. *Mirsandjhal*.
 119858. *PRUNUS MANDSHURICA* (Maxim.) Koehne.
 No. 1720. A small Manchurian tree up to 15 feet high, with spreading branches, ovate acuminate leaves, solitary pinkish flowers an inch or more across, and yellow subglobose fruits an inch in diameter.
 For previous introduction see 76743.
 119859 to 119863. *PRUNUS ARMENIACA* L.
 Apricot.
 119859. No. 1431—T. *Arsami*.
 119860. No. 0247. *Mulla Gadai*.
 119861. No. 0487. *Daravshak*.
 119862. No. 665—T. *Bonhara*.
 119863. No. 429. *Salgirshy*. Originally from the Crimea.
 119864 to 119866. × *PRUNUS DASYCARPA* Ehrh.
 Plum-apricot.
 For previous introduction see 117678.
 119864. No. 01276. A natural hybrid.
 119865. No. 03484. *Flor-Tsiran*. Originally from Armenia.
 119866. No. 0347.

119867. *SOLANUM* sp. Solanaceae.

From Paraguay. Tubers collected by W. A. Archer, Bureau of Plant Industry. Received January 27, 1937.

No. 4662. *Papa silvestre*. From San Miguel Curuzú, 3 km. north of Villa Encarnación, December 14, 1936.

119868 to 119874. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

From Peru. Seeds presented by Luis Aspilaga A., Hacienda Cayalti, Eten, through Raymond Stadelman, Bureau of Plant Industry. Received January 25, 1937.

119868. *Adcock*.
 119869. *Cold leaf Orinoco*.
 119870. *Connecticut Habana*.
 119871. *Judi Pride Buriel*.
 119872. *Madole tabaco*.
 119873. *Maryland broadleaf*.
 119874. *Rustico Peruano*, originally from the Hacienda Chumbenique.

119875 to 119889.

From Paraguay. Seeds and plants collected by W. A. Archer, Bureau of Plant Industry. Received January 27, 1937.

119875. *ANANAS COMOSUS* (L.) Merr. Bromeliaceae. Pineapple.

No. 4771. *Abacachi del pais*. Plants from San Lorenzo, December 24, 1936. Said to have originated in Brazil, but cultivated in Paraguay for over a century. Fruit small, about 6 inches in diameter, and 8 to 9 inches long; flesh white, very sweet and juicy; core very small, eyes do not extend into meat. The fruit here is eaten with a spoon, by merely cutting off one end.

119876 to 119881. *ARACHIS* spp. Fabaceae. Peanut.

119876 and 119877. *ARACHIS HYPOGAEA* L.

From the Villa Encarnación, December 14, 1936.

119876. No. 4638. *Colorado*. A cultivated peanut.

119877. No. 4639. *Abá*. A cultivated peanut.

119878. *ARACHIS MARGINATA* Gardn.

No. 4655. From San Miguel Curuzú, 3 km. north of Villa Encarnación, December 14, 1936. A perennial species, native to Brazil.

119879 to 119881. *ARACHIS HYPOGAEA* L.

Mixed varieties of cultivated peanuts; integuments, white, red, and black. Purchased in the market at Villa Rica, December 17, 1936.

119879. No. 4705.

119880. No. 4706.

119881. No. 4707.

119882 to 119889. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

119882. No. 4649. *Tobaco parrá; pet'há*. A large leaf, black when cured. From the Villa Encarnación, December 14, 1936.

119875 to 119889—Continued.

Nos. 119883 and 119884. From Játád, 8 km. north of Villa Rica, December 16, 1936.

119883. No. 4685. *Canela*.

119884. No. 4686. *Via Pagar Mi Cuenta*. A heavy producer, leaves taper-pointed.

Nos. 119885 to 119889. From San Lorenzo, December 25, 1936. Cultivated tobacco.

119885. No. 4762. *Pety canela-i*.

119886. No. 4763. *Pety-chai*, meaning wrinkled leaf.

119887. No. 4764. *Para pagar su cuenta*.

119888. No. 4765. Mixed varieties; probably includes one that has anise odor.

119889. No. 4766. *Romero*.

119890 to 119910.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received January 8, 1937.

119890. *ACACIA NILOTICA* (L.) Willd. *Mimosaceae*.

No. 1805. *Kikas*. From Lahore, Punjab, November 28, 1936. A handsome tree, found in both dry and wet situations, which provides a dense shade.

119891. *ALLIUM CEPA* L. *Liliaceae*. *Onion*.

No. 1804. *Piyaz*. From Lahore, Punjab. A rather flattened red onion from Karachi; keeps well.

119892. *BETA VULGARIS* L. *Chenopodiaceae*. *Common beet*.

No. 1808. *Palag*. From Lahore, Punjab, November 28, 1936. A potheb.

119893. *BRASSICA OLERACEA BOTRYTIS* L. *Brassicaceae*. *Cauliflower*.

No. 1822. *Phulgob*. Purchased in Saharanpur, United Provinces, December 1, 1936. Said to be *Walcheren*, a German variety that thrives here, producing large white heads.

119894 and 119895. *CAPSICUM ANNUM* L. *Solanaceae*. *Common redpepper*.

Mirch. From Saharanpur, United Provinces, December 1, 1936.

119894. No. 1818. Very pungent orange fruit $2\frac{1}{2}$ inches wide and $1\frac{1}{2}$ inches long. Said to have come from Patrala.

119895. No. 1819. Moderately pungent, red, top-shaped fruit, $1\frac{1}{2}$ inches high. Said to have come from the Punjab.

119896. *CITRULLUS VULGARIS* Schrad. *Cucurbitaceae*. *Watermelon*.

No. 1800. *Tarbutz*. From Lahore, Punjab, November 28, 1936, said to have come from Quetta. Fruit elongate, 1 foot long, very pale green with blotched strip of darker green. The light part is apt to have pale-green tubercles. Rind hard; flesh very sweet and of good quality. Apparently a good keeper.

119897. *ERIANTHUS RAVENNAE* (L.) Beauv. *Poaceae*. *Ravenna grass*.

No. 1798. *Sarkanda, kamma*. From Pathankot, Punjab, November 25, 1936. An ornamental grass 15 feet high, found growing in clumps; used here for thatching.

For previous introduction see 109496.

119890 to 119910—Continued.

119898. *MALUS* sp. *Malaceae*.

No. 1803. *Sarak*. From Lahore, Punjab, November 28, 1936. A sweet yellow crab, with a red cheek, $1\frac{1}{2}$ inches in diameter.

119899. *MEDICAGO SATIVA* L. *Fabaceae*. *Alfalfa*.

No. 1806. *Senje; Clara*. From Lahore, Punjab, November 28, 1936. Said to be a variety that grows from 8 to 10 years.

119900 to 119905. *ORYZA SATIVA* L. *Poaceae*. *Rice*.

Nos. 119900 to 119902 were from Lahore, Punjab, November 28 and 29, 1936.

119900. No. 1807. *Bansmati*. One of the best of the local rices.

119901. No. 1810. *Seon*. Said to be a short season rice (90 days), a heavy yielder, 2,800 pounds per acre, and a poor quality table rice.

119902. No. 1811. *Begami*. A second-class table rice which yields 1,600 to 2,000 pounds per acre. Said to mature in 110 to 120 days.

Nos. 119903 to 119905 were from Kala Shah Kaku, Punjab, November 29, 1936.

119903. No. 1812. *Basmati*. This form originated in Gujranwala District in 1927. Superior to local *basmati*. Matures in 110 to 112 days; yields 2,000 to 2,240 pounds per acre. Considered the best table rice in Punjab; remarkably white and fragrant.

119904. No. 1813. *Mushkan 41*. A strain, developed by the Government rice specialists, that matures in 100 to 107 days, and yields 2,000 to 2,200 pounds per acre. Grain fine, white, fragrant. Used as an adulterant for *basmati*, a superior rice.

119905. No. 1814. *Palman sufed 246*. A strain, developed by the Government rice specialists, that matures in 90 to 95 days, yielding 2,240 to 2,560 pounds per acre. Used to adulterate *basmati*, a superior rice.

119906. *PUNICA GRANATUM* L. *Punicaceae*. *Pomegranate*.

No. 1796. *Anan*. From Lahore, Punjab, November 26, 1936, but said to have come from Afghanistan. A deep-crimson fruit the size of a large orange with an abundance of very agreeable crimson juice.

119907. *SALIX* sp. *Salicaceae*.

No. 1826. From Saharanpur, United Provinces, December 1, 1936. An attractive sturdy tree with shiny elliptical leaves $3\frac{1}{2}$ to 4 inches long; found growing along canal banks; blooms in the fall.

119908 and 119909. *SPINACIA OLERACEA* L. *Chenopodiaceae*. *Common spinach*.

119908. No. 1811—A. *Palag*. From Lahore, Punjab, November 28, 1936.

119909. No. 1828. Purchased at Saharanpur, United Provinces, December 1, 1936. Said to be from seed imported from France and to be a large round-leaved type with prickly leaves.

119910. *TECTONA GRANDIS* L. f. *Verbenaceae*. *Teak*.

No. 1820. From the Government Gardens at Saharanpur, United Provinces, De-

119890 to 119910—Continued.

ember 1, 1936. A large tree 3 feet in diameter, with large nearly evergreen leaves; attractive as a roadside tree.

119911 to 119917.

From Argentina. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 15, 1937.

119911. *ARACHIS HYPOGAEA* L. Fabaceae.
Peanut.

No. 4634. From Posadas, Misiones, December 12, 1936. A cultivated peanut.

119912. *AXONOPUS COMPRESSUS* (Swartz) Beauv. Poaceae. Carpet grass.

No. 4618. *Periquita, Grama Paraguaya*. From near Bonpland, Misiones, December 9, 1936. A good pasture grass, used as erosion control by farmers in this region; resists freezing.

119913. *CUCUMIS MELO* L. Cucurbitaceae.
Muskmelon.

No. 4635. A cultivated melon from Posadas, Misiones, December 12, 1936.

119914. *CUCUMIS* sp. Cucurbitaceae.

No. 4621. *Pepino*. From near Bonpland, Misiones, December 9, 1936. Flowers yellow; fruit faintly striped. Fruit is eaten raw or as pickles and has the odor of cucumbers.

119915. *NICOTIANA TABACUM* L. Solanaceae.
Common tobacco.

No. 4608. From the streets of Posadas, Misiones, December 7, 1936. Plants 2 to 3 feet high, producing a basal rosette of leaves in young stage; flowers pale greenish outside, white within or sometimes lavender tinged.

119916. *VERBENA LACINIATA* (L.) Briq. Verbenaceae.

No. 4609. From Posadas, Misiones, December 7, 1936. A prostrate herb with purple flowers.

119917. *VERBENA PLATENSIS* Spreng. Verbenaceae.

No. 4625. Along the road between Posadas and Candelaria, Misiones, December 10, 1936. A shrubby verbena with lax spikes of fragrant crimson flowers.

119918 and 119919. *HORDEUM VULGARE* L. Poaceae. Barley.

From India. Seeds presented by the Imperial Institute of Agricultural Research, Botanical Sub-Station, Pusa. Received January 22, 1937.

119920 to 119931.

From Paraguay. Seeds and tubers collected by W. A. Archer, Bureau of Plant Industry. Received January 29, 1937.

Nos. 119920 to 119927 were from Asunción, purchased in the market and in shops.

119920 to 119924. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

119920. No. 4793. 119923. No. 4796.

119921. No. 4794. 119924. No. 4797.

119922. No. 4795.

119925. *HORDEUM VULGARE* L. Poaceae. Barley.

No. 4790. *Cebada Paraguaya*. Seed used for beverages.

119920 to 119931—Continued.

119926 and 119927. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

119926. No. 4791. Tubers.

119927. No. 4792. Tubers.

119928. *SORGHUM VULGARE* Pers. Poaceae. Sorghum.

No. 4772. *Sorgo azucarado*. Seed secured from Carandaity, Chaco, and presented by the Jardin Botánico, Santissima, Trinidad, near Asunción, December 24, 1936.

119929 and 119930. *ZEA MAYS* L. Poaceae. Corn.

Purchased in the market at Villa Rica, December 17, 1936.

119929. No. 4708.

119930. No. 4709.

119931. *ZEPHYRANTHES* sp. Amaryllidaceae.

No. 4756. Bulbs of a native Paraguayan plant with white flowers.

119932 to 119935.

From Colombia. Seeds presented by Eduardo Hernandez Pijas, Caldas. Received January 29, 1937.

119932 to 119934. *BOMAREA CALDASII* (H. B. K.) Herbert. Amaryllidaceae.

Twining, ornamental plants, native to the Andes as far south as Peru. The thin spreading leaves are 3 to 6 inches long, and the orange-red to red flowers, about an inch long, are borne in many-flowered, pendulous clusters.

For previous introduction see 101216.

119935. *CROTALARIA* sp. Fabaceae.

119936 to 119938.

From Cuba. Seeds presented by F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos. Received February 1, 1937.

119936. *ARISTOLOCHIA GIGANTEA* Mart. and Zucc. Aristolochiaceae.

From the Botanic Garden, Rio de Janeiro, Brazil. A tropical climber with very large flowers, purple blotched and veined. The tube of the flower is bent so that it resembles a bird's neck, while the limb is much like the head drawn back against the neck as a swan or pelican rests.

119937. *BAUHINIA MACRANTHA* Oliver. Caesalpiniaceae.

From the Horticultural Section, Ministry of Agriculture, Cairo, Egypt. A pubescent shrub 4 to 5 feet high, with thin leathery compound leaves and very large flowers, 2 or 3 together, on short terminal peduncles; the obovate petals are over 2 inches long, pinnately veined from a prominent deliquescent midrib. Native to tropical Africa.

For previous introduction see 48236.

119938. *COCHLOSPERMUM ORINOCENSE* (H. B. K.) Steud. Cochlospermaceae.

From the Botanic Garden, Rio de Janeiro, Brazil. A tree about 50 feet high, with digitate leaves and large showy yellow flowers. Native to Brazil.

119939 to 120029.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 9, 1937.

This material was all collected in the spring and summer of 1936.

119939. *LATHYRUS GORGONI* Parl. Fabaceae.

No. 1341. From Adana, June 10.

119940 to 119947. *VICIA* spp. Fabaceae. Vetch.

119940. *VICIA LATHYROIDES* L.

No. 698. From east of Milas in open pine forest. May 27. An annual vetch, native to Europe.

119941. *VICIA MONANTHOS* (L.) Desf.

No. 699. From open pine woods east of Milas, May 27.

119942. *VICIA LATHYROIDES* L.

No. 701. From 30 km. east of Milas, May 27.

119943. *VICIA SATIVA* L. Common vetch.

No. 705. From 35 km. east of Milas, May 27.

119944. *VICIA DASycARPA* Ten.

No. 736. From 45 km. southeast of Mugla, May 28.

119945. *VICIA SERRATIFOLIA INTEGRIFOLIA* Beck.

No. 781. From 40 km. west of Isparta, June 2.

119946. *VICIA DASycARPA* Ten.

No. 802. From Bujak, June 3.

119947. *VICIA PEREGRINA* L.

No. 824. From along the road between Isparta and Antalya, June 3.

119948. *LATHYRUS* sp. Fabaceae.

No. 826. From Ephesus, May 24.

119949. *VICIA PEREGRINA* L. Fabaceae. Vetch.

No. 1062. From 20 km. west of Soma, June 10.

119950. *VICIA DASycARPA* Ten. Fabaceae. Vetch.

No. 1085. From 15 km. east of Bergama, June 10.

119951. *LATHYRUS* sp. Fabaceae.

No. 1086. From a wheat field 40 km. northwest of Izmir, June 10.

119952. *LATHYRUS ANNUUS* Hoejer. Fabaceae. Pea.

No. 1099. From 2 km. south of Kirkagach, June 11.

119953 to 119955. *VICIA* spp. Fabaceae. Vetch.

119953. *VICIA SERRATIFOLIA INTEGRIFOLIA* Beck.

No. 1125. From 2 km. south of Kirkagach, June 11.

119954. *VICIA MONANTHOS* (L.) Desf.

No. 1197. From 30 km. west of Balikesir, June 16.

119939 to 120029—Continued.

119955. *VICIA LATHYROIDES* L.

No. 1307-A. From 20 km. east of Bursa.

119956. *LATHYRUS ANNUUS* Hoejer. Fabaceae. Pea.

No. 1331. From Adana, June 10. A form with yellow flowers.

119957. *VICIA HYBRIDA* L. Fabaceae. Vetch.

No. 1332. From Adana, June 10. A form with attractive white and yellow flowers.

199958. *LATHYRUS* sp. Fabaceae. Pea.

No. 1351. From Adana, June 10.

119959. *LATHYRUS* sp. Fabaceae. Pea.

No. 1427. From 37 km. north of Gaziantep, July 2.

119960. *VICIA SERIOCARPA MICROPHYLLA* Boiss. Fabaceae. Vetch.

No. 1440. From 37 km. north of Gaziantep, July 2.

119961. *VICIA PEREGRINA* L. Fabaceae. Vetch.

No. 1442. From 20 km. north of Gaziantep, July 2.

119962. *LATHYRUS* sp. Fabaceae. Pea.

No. 1446. From 37 km. north of Gaziantep, July 2.

119963. *VICIA HYBRIDA* L. Fabaceae. Vetch.

No. 1463. From 30 km. southeast of Marash, July 2.

119964. *LATHYRUS ERECTUS* Lag. Fabaceae. Pea.

No. 1473. From 37 km. north of Gaziantep, July 3.

119965. *LATHYRUS* sp. Fabaceae. Pea.

No. 1474. From 37 km. north of Gaziantep, July 3.

119966. *VICIA SERIOCARPA MICROPHYLLA* Boiss. Fabaceae. Vetch.

No. 1476. From 37 km. north of Gaziantep, July 3.

119967 to 119969. *LATHYRUS* spp. Fabaceae. Pea.

119967. *LATHYRUS* sp.

No. 1593. From 35 km. west of Diyarbekir, July 7.

119968. *LATHYRUS* sp.

No. 1594. From 50 km. west of Diyarbekir, July 7.

119969. *LATHYRUS ERECTUS* Lag.

No. 1790. From 35 km. southwest of Elaziz, July 14.

119970. *VICIA LATHYROIDES* L. Fabaceae. Vetch.

No. 1952. From Birejik, July 22.

119971. *VICIA PEREGRINA* L. Fabaceae. Vetch.

No. 1976. From Birejik, July 24.

119972 to 119974. *LATHYRUS* spp. Fabaceae. Pea.

119939 to 120029—Continued.

119972. *LATHYRUS GORGONI* Parl.
No. 1978. From Birejik, July 24.
119973. *LATHYRUS* sp.
No. 2068. From Alma Dag, 25 km. southeast of Ankara, August 1.
119974. *LATHYRUS ERECTUS* Lag.
No. 2081. From Alma Dag, 25 km. southeast of Ankara, August 1.
119975. *VICIA SATIVA* L. Fabaceae.
Common vetch.
No. 2858. From Yalova Kaplijalari, September 12.
119976. *LATHYRUS* sp. Fabaceae. Pea.
No. 3342. From the Bergama ruins, June 10.
119977. *VICIA PEREGRINA* L. Fabaceae.
Vetch.

120095. No. 2556. From 51 km. east of Samsun, August 22.
120096. No. 2598. From 31 km. west of Samsun, August 23.
120097. No. 2837. From Yalova Kap-ljalari, September 11.
120098. No. 2859. From Yalova Kap-ljalari, September 12.
120099. No. 2426. From 75 km. south of Giresun.
- 120100 to 120119. *TRIFOLIUM REPENS* L.
White clover.
120100. No. 727. From near Denizli, May 31.
120101. No. 1357. A form with pink flowers, from Ankara, June 24.
120102. No. 1411. From 50 km. north of Gaziantep, July 2.
120103. No. 1576. A variety with small white flowers from between Siverek and Diyarbekir, July 7.
120104. No. 1640. From 70 km. south of Diyarbekir, July 9.
120105. No. 1757. From 30 km. south-east of Elaziz, July 13.
120106. No. 1856. From 23 km. west of Malatya, July 16.
120107. No. 1862. From 11 km. west of Malatya, July 16.
120108. No. 2092. A pink-flowered strain from Alma Dag, 25 km. southeast of Ankara, August 1.
120109. No. 2121. From 100 km. east of Sivas at 6,000 feet altitude, August 5.
120110. No. 2321. From 35 km. north of Gemusbane, August 10.
120111. No. 2340. From meadows 70 km. south of Trabzon, August 10.
120112. No. 2341. A very large type found 60 km. south of Trabzon, August 10.
120113. No. 2428. From 86 km. south of Giresun, August 17.
120114. No. 2593. From 31 km. west of Samsun, August 23.
120115. No. 2772. A strain with large white flowers, from Ulu Dag at 6,500 feet altitude, 35 km. south of Bursa, August 8.
120116. No. 2810. From Yalova Kap-ljalari, August 11.
120117. No. 3391. A strain with very small pink flowers from Ankara, June 25.
120118. No. 3428. From Alma Dag, 25 km. southeast of Ankara, June 28.
120119. No. 798. From Dinar, 25 km. north of Antalya, June 3. A small-flowered type, very abundant in the wet meadows in this region.
120120. *TRIFOLIUM* sp.
No. 816. From 25 km. east of Antalya, June 4. A small-flowered white clover, found in wet places. The main stems are coarse and 3 feet long.

120033 to 120250—Continued.

120121. *TRIFOLIUM* sp.
No. 626. From Ephesus, May 24.
120122. *TRIFOLIUM* sp.
No. 629. From Ephesus, May 24.
120123. *TRIFOLIUM LAPPACEUM* L.
No. 636. From 23 km. southwest of Izmir, May 25.
- 120124 to 120126. *TRIFOLIUM HIRTUM* All.
120124. No. 672. From south of Chine, May 26.
120125. No. 692. From 30 km. east of Milas, May 27.
120126. No. 693. From 3 km. north of Mugla, May 27.
Nos. 120127 to 120134. Collected between 30 and 40 km. east of Milas, May 27.
120127. *TRIFOLIUM* sp.
No. 694.
120128. *TRIFOLIUM* sp.
No. 697. A very small strain.
120129. *TRIFOLIUM LAPPACEUM* L.
No. 702. From between Kulluk and Milas.
120130. *TRIFOLIUM HIRTUM* All.
No. 704.
120131. *TRIFOLIUM* sp.
No. 712.
120132. *TRIFOLIUM* sp.
No. 713. From open pine wood.
120133. *TRIFOLIUM* sp.
No. 707. A strain with small flowers.
120134. *TRIFOLIUM* sp.
No. 710.
120135. *TRIFOLIUM* sp.
No. 731. From the mountains 30 km. southeast of Mugla, May 28.
- 120136 to 120138. *TRIFOLIUM HIRTUM* All.
120136. No. 746. From 10 km. south of Denizli, May 30.
120137. No. 794. From 25 km. north of Antalya, June 3.
120138. No. 807. From 46 km. north of Antalya, June 3.
120139. *TRIFOLIUM* sp.
No. 818. Found on dry gravelly soil, 20 km. east of Antalya, June 4.
120140. *TRIFOLIUM LAPPACEUM* L.
No. 1063. From 40 km. northwest of Izmir, June 10.
Nos. 120141 and 120142 were from Ephesus, June 12.
120141. *TRIFOLIUM* sp.
No. 1136.
120142. *TRIFOLIUM* sp.
No. 1139.
Nos. 120143 to 120147. Collected between 30 and 65 km. west of Balikesir, June 16.

120033 to 120250—Continued.

120143. TRIFOLIUM sp.
No. 1174.
120144. TRIFOLIUM HIRTUM All.
No. 1177. A wild red clover.
120145. TRIFOLIUM sp.
No. 1178.
120146. TRIFOLIUM HIRTUM All.

120489 and 120490. LUFFA ACUTANGULA (L.) Roxb. Cucurbitaceae. Singkwa towelgourd.

120489. No. 1238. From the Bursa bazar, June 18.

120490. No. 1367. From the Marash bazar, July 2. Dishrag gourd.

120491 to 120495. VITIS spp. Vitaceae. Grape.

From France. Vines purchased from the Rielter Nurseries, Montpellier. Received February 12, 1937.

120491. Cabernet Franc on Riparia × Rupestris No. 3309.

120492. Chasselas Musque on Riparia × Rupestris No. 3309.

120493. Muscat Blanc de Frontignan on Riparia × Rupestris No. 3309.

120494. Pinot Blanc Chardonnay on Riparia × Rupestris No. 3309.

120495. Pinot Noir on Riparia × Rupestris No. 3309.

120496 to 120521.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 12, 1937.

120496 to 120499. CANNABIS SATIVA L. Moraceae. Hemp.

120496. No. 3241. From the Adapazari bazar, October 20.

120497. No. 3179. From the Kastamonu bazar, October 14.

120496 to 120521—Continued.

120498. No. 1391. From the Marash bazar, July 2.

120499. No. 2136. From the Sivas bazar, August 4.

120500 and 120501. LINUM USITATISSIMUM L. Linaceae. Flax.

120500. No. 564. From the Isparta bazar, June 2.

120501. No. 606. From the Izmir bazar, May 23.

120502. URTICA sp. Urticaceae.

No. 622. From the Izmir bazar, May 23.

120503 to 120511. LINUM USITATISSIMUM L. Linaceae. Flax.

120503. No. 711. From a field between Milas and Kulluk, May 27.

120504. No. 1243. From the Bursa bazar, June 18.

120505. No. 1279. From a field near Karacabey, June 18.

120506. No. 2410. From 32 km. west of Rize, August 13.

120507. No. 2581. From 20 km. west of Samsun, August 23.

120508. No. 3008. From Kutahya bazar, August 28.

120509. No. 3060. From the Amasya bazar, October 6.

120510. No. 3225. From the Adapazari bazar, October 10.

120511. No. 3279. From the Edirne bazar, October 22.

120512 to 120521. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

120512. No. 1217. From the Bursa bazar, June 18.

120513. No. 2464. From a field near Trabzon, August 15.

120514. No. 2553. From 4 km. east of Samsun, August 22.

120515. No. 2613. From a field near Basra, August 23.

120516. No. 2663. From Tokat, August 26.

120517. No. 2734. From 5 km. west of Yalova, September 6.

Nos. 120518 and 120519. From Biga, September 19.

120518. No. 2908. A tall tobacco.

120519. No. 2909. A short type of tobacco.

120520. No. 2926. From near Chesme, Smyrna region, September 12.

120521. No. 2981. From Ephesus, September 25.

120522 to 120524. CITRUS spp. Rutaceae.

From Egypt. Seeds presented by Thomas W. Brown, Horticultural Section of the Ministry of Agriculture, Giza. Received February 11, 1937.

120522. CITRUS AURANTIFOLIA (Christm.) Swingle. Lime.

Beledy, a Persian lime.

120522 to 120524—Continued.

120523. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Mandarin orange.

Beledy mandarine.

120524. CITRUS SINENSIS (L.) Osbeck. Orange.

Sokkary, a sugar orange.

120525. KETELEERIA DAVIDIANA (Bertrand) Beissner. Pinaceae.

From France. Seeds presented by A. Gerard, La Fosse, par Montroire-sur-Loir, Loir-et-Cher. Received February 11, 1937.

A coniferous tree, native to western China, closely allied to the firs. It sometimes becomes 100 feet tall, is of pyramidal habit, and has handsome glossy-green firlike foliage.

For previous introduction see 111742.

120526. CAMPOMANESIA FENZLIANA (Berg.) Glaziou. Myrtaceae.

Guabiroba.

From Brazil. Seeds presented by Graham Bell Fairchild, Anapolis, Goyaz. Received February 5, 1937.

A low bush 1 to 2 feet high. The fruit is very good, juicy, and very sweet. The skin is tough, leathery, and bitter, but this is no drawback, as the seeds and pulp pop out when squeezed. It grows in the open scrubby plains of central Brazil and is called *guivira* in Matto Grosso.

For previous introduction see 44784.

120527 to 120529. GLADIOLUS spp. Iridaceae.

From the Union of South Africa. Seeds presented by A. Cheverton Buller, Dwarsriviers Hoek, District of Stellenbosch, Cape Province. Received February 9, 1937.

120527. GLADIOLUS CALLISTUS Bolus f.

A tall plant, 30 to 40 inches high, with 4 to 7 narrow, sword-shaped leaves 1 to 2 feet long, and 2 stem leaves. The flowers, white suffused with lavender pink and 9 to 12 in number, are produced in 1 to 3 branches. Native to South Africa.

120528. GLADIOLUS GRACILIS Jacq.

A plant with about 3 rigid, subterete leaves a foot long and very slender stems up to 2 feet high, bearing 2 to 6 pale-lilac scentless flowers in a lax secund spike. Native to South Africa.

For previous introduction see 113570.

120529. GLADIOLUS VILLOSUS Ker.

The simple stems of this gladiolus are up to 2 feet long, and the sheaths are very hairy, the lowest without any leaf blade. The upper sheaths enclose linear, thick, rigid leaves up to 12 inches long. The bright-red or lilac flowers are in a lax secund spike. Native to South Africa.

For previous introduction see 105297.

120530 to 120640.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received February 9, 1937.

120530 and 120531. DOLICHOS LABLAB L. Fabaceae. Hyacinth-bean.

120530. No. 3031. From the Amasya bazar. October 9.

200597—42—3

120530 to 120640—Continued.

120531. No. 598. From the Izmir bazar, May 23.

120532 to 120537. LENS ESCULENTA Moench. Fabaceae. Lentil.

120532. No. 566. From the Isparta bazar, June 2.

120533. No. 1615. From the Diyarbekir bazar, July 8.

120534. No. 1717. From the Elaziz bazar, July 13.

120535. No. 1839. From the Malatya bazar, July 16.

120536. No. 2678. From 10 km. south of Tokat, August 26.

120537. No. 2881. From the Chanak Kale bazar, September 18.

120538 to 120616. PHASEOLUS spp. Fabaceae. Bean.

120538 to 120542. PHASEOLUS COCCINEUS L. Fabaceae. Scarlet-runner bean.

120538. No. 3151. From the Kastamonu bazar, October 14.

120539. No. 1158. From the Balikesir bazar, June 17.

120540. No. 1242. From the Bursa bazar, June 18.

120541. No. 1536. From the Urfa bazar, July 6.

120542. No. 2214. From the Erzinjan bazar, August 9.

120543 to 120613. PHASEOLUS VULGARIS L. Common bean.

120543. No. 547. From the Mugla bazar, May 28.

Nos. 120544 to 120548. From the Isparta bazar, June 2.

120544. No. 551. 120547. No. 559.

120622. No. 3344. From 2 km. south of Kirkagach, June 11.

120623 to 120628. *PISUM SATIVUM* L.

120623. No. 545. From Mugla bazar, June 28.

120624. No. 1258. From the Bursa bazar, June 18.

Nos. 120625 and 120626. From the Amasya bazar.

120625. No. 2708. Collected August 25.

120626. No. 3071. Collected October 6.

120627. No. 3123. From the Inebolu bazar, October 13.

120628. No. 3229. From the Adapazari bazar, October 20.

120629. *PISUM ELATIUS* Bieb.

No. 1317. From the hills near Mudanya, June 21.

120630. *PISUM SATIVUM* L.

No. 3257. From the Adapazari bazar, October 20.

120631. *PISUM* sp.

No. 1468. From 45 km. north of Gaziantep, July 3.

120530 to 120640—Continued.

120632. *PISUM* sp.

No. 1162. From 2 km. west of Bali-kesir, June 16.

120633. *SOLANUM MELONGENA* L. Solana-
ceae. Eggplant.

No. 576. From the Antalya bazar, June 4.

120634 to 120638. *VIGNA* spp. Fabaceae.

120634 and 120635. *VIGNA SINENSIS* (Torner) Savi. Cowpea.

120634. No. 555. From the Isparta bazar, June 2.

120635. No. 1383. From the Marash bazar, July 2. A black-eyed bean.

120636 and 120637. *VIGNA CYLINDRICA* (Stickm.) Skeels. Catjang.

120636. No. 1684. From the Elaziz bazar, July 13.

120637. No. 553. From the Isparta bazar, June 2. Black-eyed peas.

120638. *VIGNA SINENSIS* (Torner) Savi. Cowpea.

No. 546. From the Mugla bazar, May 28.

120639. *PISUM* sp. Fabaceae.

No. 1968. From Birejik, July 22. A species with small pods.

120640. *PISUM* sp. Fabaceae.

No. 667. An edible wild pea from the hills near Milas, June 26.

120641 to 120645.

From Algeria, Africa. Seeds presented by Dr. René Maire, University of Algiers, Algiers. Received February 11, 1937.

120641. *ACACIA RADDIANA* Savi. Mimosa-
ceae.

A tropical African tree, somewhat spiny, with bipinnate leaves and linear-oblong leaflets which are obtuse and one-fourth of an inch long.

For previous introduction see 106613.

120642. *ARISTIDA PUNGENS* Desf. Poaceae.

A tall vigorous grass.

For previous introduction see 84278.

120643. *CALLIGONUM AZEL* Maire. Poly-
gonaceae.

A small desert tree related to *Calligonum comosum*. Native to northern Africa.

120644. *CALLIGONUM COMOSUM* L'Her. Polygonaceae.

A densely branched shrub 10 to 15 feet high, with minute subulate leaves and small ovate, densely spiny, nutlike fruits. Native to the eastern Mediterranean region.

For previous introduction see 112046.

120645. *GENISTA RAETEM* Forsk. Fabaceae.
Retem.

A bushy shrub, up to 10 feet high, with simple leaves about 5 mm. long. The sessile white flowers, in small clusters, are about 1 cm. long; the pods are inflated and abruptly beaked. It is native to northern Africa, where it grows on sand dunes.

120646 to 120658.

From China. Seeds purchased from R. C. Ching, Keeper of the Garden, Lu-Shan Arboretum, Kiukiang. Received February 17, 1937.

120646. *CASTANEA HENRYI* (Skan) Rehd. and Wils. Fagaceae. Chestnut.

For previous introduction see 116862.

120647. *CASTANEA SEGUINII* Dode. Faga-
ceae. Chestnut.

120648. *CASTANOPSIS CAUDATA* Franch. Fagaceae.

A large evergreen shrub or small tree with shining entire ovate leaves. Native to central China.

120649. *CASTANOPSIS SCLEROPHYLLA* (Lindl.) Schottky. Fagaceae.

For previous introduction see 116123.

120650. *LITHOCARPUS GLABRA* (Thunb.) Rehd. Fagaceae.

An evergreen tree with oblong entire leaves 3 to 6 inches long and small nuts in spikes. Native to Japan.

For previous introduction see 116140.

120651. *LITHOCARPUS HENRYI* (Seemen) Rehd. and Wils. Fagaceae.

An evergreen tree, sometimes 60 feet high, with oblong-lanceolate leaves 3 to 7 inches long. Native to central China.

120652. *QUERCUS ACUTISSIMA* Carruthers. Fagaceae. Brittletooth oak.

A narrow-leaved oak with attractive bright-green leaves.

120653. *QUERCUS CHENII* Nakai. Fagaceae.
Oak.

An oak which becomes 90 feet high, with lanceolate leaves about 5 inches long. It is allied to *Quercus glandulifera*. Native to Chekiang Province, China.

120654. *QUERCUS FABRI* Hance. Fagaceae.
Oak.

A small evergreen oak of the *Prinus* section, up to 45 feet high, with obovate to oblong leaves about 6 inches long, sinuate and shallow lobed. Native to China.

For previous introduction see 116148.

120655. *QUERCUS GLAUCA* Thunb. Faga-
ceae. Blue Japanese oak.

120656. *QUERCUS MYRSINAEFOLIA* Blume. Fagaceae.

From Chia-hua-shan, Anhwei Province.

120657. *QUERCUS GLANDULIFERA* Blume (*Q. serrata* Thunb.). Fagaceae. Oak.

A white oak up to 70 feet high, native to Japan, Chosen, and China. The oblong-ovate leaves are lustrous bright green and hold their color until late in the autumn. It is usually shrubby under cultivation.

For previous introduction see 103774.

120658. *QUERCUS VARIABILIS* Blume. Faga-
ceae. Oriental oak.

A large oak up to 80 feet high, forming pure stands between 2,000 and 5,000 feet altitude in central and eastern China. The bark is pale yellowish gray and deeply furrowed; the dark-green, crenately serrate leaves with bristlike teeth are oblong to oblong-lanceolate; the roundish acorns are almost sessile.

For previous introduction see 89606.

120659. RUBUS sp. Rosaceae.

From England. Plants purchased from Laxton Bros. Nurseries, Bedford. Received February 19, 1937.

Bedford Giant blackberry.

120660 to 120820.

From Turkey. Seeds and bulbs collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 9, 1937.

This material was all collected in 1936 and, unless otherwise stated, was received as seeds.

120660 and 120661. ABELMOSCHUS ESCULENTUS (L.) Moench. Malvaceae. Okra.

120660. No. 536. From the Mugla bazar, May 28.

120661. No. 1708. From the Elaziz bazar, July 13.

120662 to 120681. ALLIUM CEPA L. Liliaceae. Onion.

120662. No. 565. From the Isparta bazar, June 2.

120663. No. 623. From the Izmir bazar, May 23.

Nos. 120664 and 120665. From the Balikesir bazar, June 17.

120664. No. 1145. 120665. No. 1159.

120666. No. 1213. From the Bursa bazar, June 18.

120667. No. 1376. From the Marash bazar, July 2.

120668. No. 1538. From the Urfa bazar, July 6.

120669. No. 1826. From the Malatya bazar, July 16.

120670. No. 2025. From the Nigde bazar, July 27.

120671. No. 2140. From the Sivas bazar, August 5.

120672. No. 2211. From the Erzinjan bazar, August 8.

120673. No. 2546. From the Samsun bazar, August 21.

120674. No. 2724. From the Mission garden at Talas, August 29. A cultivated multiplier type.

120675. No. 3089. From the Yozgat bazar, October 9.

120676. No. 2993. From the Kutahya bazar, October 28.

120677. No. 3126. From the Inebolu bazar, October 13.

120678. No. 3162. From the Kastamonu bazar, October 14.

120679. No. 3212. From the Chankiri bazar, October 15.

120680. No. 3259. From the Adapazari bazar, October 20.

120681. No. 3457. From Elaziz, August 30.

120682 to 120685. ALLIUM SATIVUM L. Liliaceae. Garlic.

120682. No. 1534. Bulblets from the Urfa bazar, July 6.

120683. No. 3078. Bulblets from the Yozgat bazar, October 9.

120660 to 120820—Continued.

120684. No. 3433. Bulblets from Alma Dag, June 28.

120685. No. 3474. From the Inebolu bazar, October 15.

120686. ANETHUM GRAVEOLENS L. Apiaceae. Dill.

No. 1624. From the Diyarbekir bazar, July 9.

120687. APIUM GRAVEOLENS L. Apiaceae. Celery.

No. 534. From the Mugla bazar, May 28.

120688 to 120707. BETA VULGARIS L. Chenopodiaceae. Common beet.

120688. No. 578. From the Antalya bazar, June 4.

Nos. 120689 and 120690. From the Bursa bazar, June 18.

120689. No. 1219. 120690. No. 1239.

120691. No. 1379. From the Marash bazar, July 2.

120692. No. 1539. From the Urfa bazar, July 6.

120693. No. 1656. From the Diyarbekir bazar, July 10.

120694. No. 1714. From the Elaziz bazar, July 13.

120695. No. 1814. From the Malatya bazar, July 16.

120696. No. 2124. From the Sivas bazar, August 5.

120697. No. 2358. From the Trabzon bazar, August 11.

120698. No. 2529. A yellow beet from the Samsun bazar, August 21.

120699. No. 2709. From the Amasya bazar, August 25.

120700. No. 2899. From the Chanak Kale bazar, September 18.

120701. No. 2992. From the Kutahya bazar, September 28.

120702. No. 3021. From gardens in Eskishehir, September 29. The sugar-beet type.

120703. No. 3094. From the Yozgat bazar, October 9.

120704. No. 3170. From the Kastamonu bazar, October 10.

120705. No. 3208. From the Chankiri bazar, October 15.

Nos. 120706 and 120707. From the Adapazari bazar, October 20.

120706. No. 3238. 120707. No. 3264.

120708 to 120714. BETA VULGARIS CICLA L. Chenopodiaceae. Chard.

120708. No. 614. From the Izmir bazar, May 23.

120709. No. 2378. From the Trabzon bazar, August 11.

120710. No. 2531. From the Samsun bazar, August 21.

Nos. 120711 and 120712. From the Adapazari bazar, October 20.

120711. No. 3243. 120712. No. 3270.

120713. No. 1393. From the Marash bazar, July 2.

120660 to 120820—Continued.

120714. No. 3124. From the Inebolu bazar, October 13.
- 120715 to 120752. *CAPSICUM ANNUUM* L. Solanaceae. Common redpepper.
120715. No. 530. From the Mugla bazar, May 28.
- Nos. 120716 to 120718. From the Izmir bazar, May 23.
120716. No. 572. A bell-shaped pepper.
120717. No. 589. A small slender pepper.
120718. No. 594. A hot pepper.
120719. No. 1253. From the Bursa bazar, June 18.
120720. No. 1372. A mild pepper from the Marash bazar, July 2.
- Nos. 120721 to 120723. From the Urfa bazar, July 6.
120721. No. 1558. An elongated pepper.
120722. No. 1560.
120723. No. 1559. A cylindrical pepper.
120724. No. 1666. From the Diyarbekir bazar, July 10.
- Nos. 120725 and 120726. From the Elaziz bazar, July 13.
120725. No. 1690. 120726. No. 1691.

120817. No. 3150. 120818. No. 3152.
120819. No. 3202. From the Chankir bazar, October 15.
120820. No. 3235. From the Adapazari bazar, October 20.
- 120821 to 120823.**
- From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received January 28, 1937.
120821. *TEPHROSIA TOXICARIA* (Swartz)
Pers. Fabaceae.
- No. 8486-A. December 23, 1936. *Barbasco*. From Playa Rica, Provincia Esmeraldas, Parroquia Concepción, at 350 feet altitude, where it rains throughout the year, with the temperature ranging from 70° to 90° F.
- For previous introduction see 116245.
120822. *OCHROMA GRANDIFLORA* Rowlee.
Bombacaceae.
- No. 8487-A. *Balsa*. From Guayaquil, December, 1936. Found growing in a back yard. A tree with soft, very light wood used for rafts and grown for export.
120823. (Undetermined.)
- No. 8460. December 16, 1936. From Playa Rica, Provincia Esmeraldas, Parroquia Concepción, at 350 feet altitude. An ornamental vine, with cream-white flowers, which climbs to the tops of forest trees. The climate is rainy throughout the year and the temperature ranges from 70° to 90° F.
- 120824. CITRUS LIMONIA** Osbeck. **Ruta-**
ceae. Lemon.
- From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 5, 1937.
- No. 1650. *Gulgul, gombrou*. From Bandrole, Kulu, Punjab, November 14, 1936, at 5,000 feet altitude. A citrus tree which stands 18° F. with little apparent injury; in some sections snow covers it for a month. The tree is a moderately rapid grower, bears fairly early, and the fruit is of good flavor and has excellent keeping quality.

120825 to 121052.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 18, 1937.

This material was all collected in the summer and autumn of 1936.

From Paraguay and Argentina. Collected by W. A. Archer, Bureau of Plant Industry. Received February 16, 1937.

Unless otherwise stated the material was received as seeds.

121053. *ANANAS COMOSUS* (L.) Mer. Bromeliaceae. Pineapple.

No. 4906. Var. *Tipica*. From the Jardín Botánico, Santísima, Trinidad, Paraguay, January 6, 1937. Suckers of a semi-wild, very sweet pineapple.

121054 to 121071. *ARACHIS HYPOGAEA* L. Fabaceae. Peanut.

Nos. 121054 to 121070 are pure-strain selections of cultivated peanuts, presented by Sr. Clos of the Ministerio de Agricultura, Buenos Aires, Argentina, January 22, 1937.

121054. No. 4985. *Negro*. Strain A. H. 198-2. From the Facultad de Agronomía y Veterinaria de Buenos Aires.

121055. No. 4986. *Colorado*. Strain A. H. 901-1. From Tucumán.

121056. No. 4987. *Rastrero*. Strain A. H. 833-2. From China.

121057. No. 4988. Strain A. H. 1,000-1. From the market, Jujuy.

121058. No. 4989. *Negro*. Strain A. H. 1002-1. From Loreto, Misiones.

121059. No. 4990. *Colorado*. Strain A. H. 1039-1. From Córdoba.

121060. No. 4991. *Rastrero*. Strain A. H. 1042-1. From Mancopas, Tucumán.

121061. No. 4992. *Negro*. Strain A. H. 1048-A. From Corrientes.

121062. No. 4993. Strain A. H. 1051-1. From Santa Fé, Reconquista.

121063. No. 4994. Strain A. H. 1053-B. From Santa Fé, Monte Caseros.

121064. No. 4995. *Colorado*. Strain A. H. 1066-1. From Córdoba.

121065. No. 4996. Strain A. H. 1068-1. From Colonia Yeraú, Entre Ríos.

121066. No. 4997. *Bianco*. Strain A. H. 1070-1. From Córdoba.

121067. No. 4998. *Indio*. Strain A. H. 1119-A. From Misiones.

121068. No. 4999. *Imperial*. Strain A. H. 1120-A. From the Tucumán Experiment Station.

121069. No. 5000. Strain A. H. 1122-1. From Corcordia, Entre Ríos.

121070. No. 5001. Strain A. H. 1131-1. From Chajarí, Entre Ríos.

121071. No. 4951. *Tucuru*. A cultivated peanut from Bonpland, Misiones, Argentina, December 1936.

121072 to 121074. *NICOTIANA TABACUM* L. Solanaceae. Common tobacco.

121072. No. 4879. A mixed sample from Cabaña, Paraguay.

Nos. 121073 and 121074. Cultivated tobacco from Bonpland, Misiones, Argentina, December 1936.

121073. No. 4950. *Chileno grande colorado*.

121053 to 121077—Continued.

121074. No. 4949. *Chileno grande amarillo*.

121075. *ZEA MAYS* L. Poaceae. Corn.

No. 4922. From the Jardín Botánico, Santísima, Trinidad, Paraguay, January 6, 1937. A soft corn, cultivated and grown especially for a certain type of bread; also for roasting ears.

121076. *ZEPHYRANTHES* sp. Amaryllidaceae.

No. 4944. From the Jardín Botánico, Santísima, Trinidad, Paraguay, January 9, 1937. Bulbs of a cultivated species thought to be native.

121077. *NOTHOSCORDUM* sp. Liliaceae.

No. 4945. From the Jardín Botánico, Santísima, Trinidad, Paraguay, January 9, 1937. Bulbs of a native species.

121078 to 121085.

From New Zealand. Seeds presented by the Plant Research Bureau, Grasslands Division, Department of Scientific and Industrial Research, Palmerston North. Received February 11, 1937.

121078. *AGROSTIS TENUIS* Sibth. Poaceae.

Brown top. No. Bt. 657.

For previous introduction see 111986.

121079. *DACTYLIS GLOMERATA* L. Poaceae. Orchard grass.

Cocksfoot No. Bc. 286.

121080. *LOLIUM MULTIFLORUM* Lam. Poaceae. Italian ryegrass.

No. Bb. 229.

121081 and 121082. *LOLIUM PERENNE* L. Poaceae. Perennial ryegrass.

121081. No. Ba. 6310.

121082. No. Ba. 6256.

121083. *TRIFOLIUM PRATENSE* L. Fabaceae. Red clover.

Montgomery Extra Late Flowering. No. Aa. 415.

121084 and 121085. *TRIFOLIUM REPENS* L. Fabaceae. White clover.

121084. No. Ac. 2377.

121085. No. Ac. 2297.

121086 to 121290.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 9, 1937.

This material was collected in the summer and autumn of 1936.

121086. *ANTHYLLIS VULNERARIA* L. Fabaceae. Kidneyvetch.

No. 2455. From Alma Dag, 25 km. southeast of Ankara, August 1.

For previous introduction see 93068.

121087. *ANTHYLLIS* sp. Fabaceae.

No. 1763. From 32 km. southeast of Elaziz, July 13.

121088. *ANTHYLLIS VULNERARIA* L. Fabaceae. Kidneyvetch.

No. 709. From 30 km. east of Milas, June 27.

121086 to 121290—Continued.

121089. ARGYROBIUM sp. Fabaceae.
No. 2666. From 46 km. south of Tokat, August 26.
- 121090 to 121106. ASTRAGALUS spp. Fabaceae. Milkvetch.
121090. ASTRAGALUS sp.
No. 739. From 10 km. north of Tavas, May 30.
121091. ASTRAGALUS sp.
No. 808. From 35 km. north of Antalya, June 3.
121092. ASTRAGALUS sp.
No. 1083. From the ruins at Bergama, June 10. A shrub with large yellow flowers.
121093. ASTRAGALUS sp.
No. 1749. From 30 km. southeast of Elaziz, July 13.
121094. ASTRAGALUS sp.
No. 1873. From 50 km. north of Malatya, July 17.
121095. ASTRAGALUS sp.
No. 2117. From 84 km. east of Sivas, August 5.
121096. ASTRAGALUS sp.
No. 2408. From 29 km. west of Rize, August 13.
121097. ASTRAGALUS sp.
No. 2456. From Alma Dag, 25 km. southeast of Ankara, August 1.
121098. ASTRAGALUS sp.
No. 3398. From dry plains around Ankara, June 25.
121099. ASTRAGALUS sp.
No. 3418. From a dry rocky slope 3 km. northeast of Ankara, June 26.
121100. ASTRAGALUS sp.
No. 3452. From 10 km. southeast of Ankara, June 28.
121101. ASTRAGALUS sp.
No. 1447. From 20 km. north of Gaziantep, July 2.
121102. ASTRAGALUS sp.
No. 2768. From Ulu Dag, 35 km. north of Bursa, September 8.
121103. ASTRAGALUS sp.
No. 1883. From 50 km. north of Malatya, July 17.
121104. ASTRAGALUS sp.
No. 3394. From 3 km. southwest of Ankara, June 25.
121105. ASTRAGALUS sp.
No. 3311. From Gaziantep, June 3.
121106. ASTRAGALUS sp.
No. 1633. From 20 km. south of Diyarbekir, July 9.
- 121107 to 121112. CICER spp. Fabaceae.
121107. CICER sp.
No. 1914. From 20 km. west of Diyarbekir, July 9.

121086 to 121290—Continued.

121108. CICER sp.
No. 1596. From 30 km. west of Diyarbekir, July 7.
121109. CICER sp.
No. 1791. From 10 km. southwest of Elaziz, July 14.
- 121110 to 121112. CICER ARIETINUM L. Chickpea.
121110. No. 1752. From 39 km. southeast of Elaziz, July 13.
121111. No. 1623. Garbanzo. From the Diyarbekir bazar, July 8.
121112. No. 3193. Garbanzo. From the Chankiri bazar, October 15.
121113. COLUTEA sp. Fabaceae.
No. 3416. From 3 km. northeast of Ankara, June 26. A shrub with large yellow flowers and papery pods.
- 121114 to 121119. CORONILLA spp. Fabaceae.
121114. CORONILLA VARIA L. Crownvetch.
No. 1802. From 42 km. southwest of Elaziz, July 14. A legume with leaves like the common vetch.
121115. CORONILLA sp.
No. 1944. From Birejik, July 22.
121116. CORONILLA sp.
No. 2491. From 66 km. south of Giresun, August 17.
121117. CORONILLA sp.
No. 2719. From Alma Dag, August 27.
121118. CORONILLA sp.
No. 772. From 2 km. north of Denizli, June 31.
121119. CORONILLA sp.
No. 797. From 25 km. north of Antalya, June 3.
121120. CYTISUS sp. Fabaceae.
No. 2766. From Ulu Dag, 35 km. south of Bursa, September 8.
121121. CYTISUS sp. Fabaceae.
No. 2812. A shrub from Yalova Kaplijalari, September 11.
- 121122 to 121128. GENISTA spp. Fabaceae.
121122. GENISTA sp.
No. 2389. From 50 km. east of Trabzon, August 12.
121123. GENISTA sp.
No. 2430. From 12 km. east of Ordu, August 19.
121124. GENISTA sp.
No. 2555. From 9 km. east of Samsun, August 22.
121125. GENISTA sp.
No. 2696. A shrub with yellow flowers from 106 km. south of Samsun, August 25.
121126. GENISTA sp.
No. 2819. A spiny leafless shrub from Yalova Kaplijalari, September 11.

121086 to 121290—Continued.

121127. *GENISTA* sp.
No. 2744. A shrub from near Gemlik, September 6.
121128. *GENISTA* sp.
No. 2821. A leafless shrub from Yalova Kaplijalari, September 11.
- 121129 to 121131. *HEDYSARUM* spp. Fabaceae.
121129. *HEDYSARUM* sp.
No. 2001. From Ulukishla, July 25.
121130. *HEDYSARUM* sp.
No. 2162. From 59 km. east of Sivas, August 6.
121131. *HEDYSARUM* sp.
No. 3451. From 10 km. southeast of Ankara, June 28.
121132. *INDIGOFERA* sp. Fabaceae.
No. 1130. From 75 km. northwest of Izmir, June 10.
- 121133 to 121135. *LATHYRUS* spp. Fabaceae. Pea.
121133. *LATHYRUS* *APHACA* L.
No. 618. From Ephesus, May 24.
121134. *LATHYRUS* *ERECTUS* Lag.
No. 804. From Bujak, June 3.
121135. *LATHYRUS* sp.
No. 1106. From the mountains between Manisa and Izmir, June 11.
121136. *VICIA* *LATHYROIDES* L. Fabaceae. Vetch.
No. 1108. From the mountains between Manisa and Izmir, June 11.
- 121137 to 121143. *LATHYRUS* spp. Fabaceae.
121137. *LATHYRUS* *ERECTUS* Lag.
No. 1113. From 2 km. south of Kirkagach, June 11.
121138. *LATHYRUS* *ERECTUS* Lag.
No. 1181. From 30 km. west of Balikesir, June 16.
121139. *LATHYRUS* sp.
No. 1195. From 30 km. west of Balikesir, June 16.
121140. *LATHYRUS* *APHACA* L.
No. 1342. From Adana, June 10.
121141. *LATHYRUS* *SATIVUS* L. Bittervetch.
No. 1354. From Adana, June 10.
121142. *LATHYRUS* sp.
No. 1461. From 30 km. southeast of Marash, July 2.
121143. *LATHYRUS* sp.
No. 1603. From 20 km. east of Siverek, July 7.
121144. *VICIA* *ERVILIA* (L.) Willd. Fabaceae. Vetch.
No. 1793. From 35 km. southwest of Elaziz, July 14.
121145. *LATHYRUS* *ERECTUS* Lag. Fabaceae.
No. 1880. From 44 km. north of Malatya, July 17.

121086 to 121290—Continued.

- 121146 to 121148. *VICIA* spp. Fabaceae. Vetch.
121146. *VICIA* *PEREGRINA* L.
No. 1940. From Birejik, July 22.
121147. *VICIA* *SERICOCARPA* *MICROPHYLLA* Boiss.
No. 1949. From Birejik, July 22.
121148. *VICIA* *LATHYROIDES* L.
No. 2058. From Alma Dag, 25 km. southeast of Ankara, August 1.
121149. *LATHYRUS* *APHACA* L. Fabaceae.
No. 2494. From 8 km. southwest of Sbebinkarahisar, August 18.
121150. *LATHYRUS* sp. Fabaceae.
No. 2574. From 7 km. west of Terme, August 22.
121151. *VICIA* *HYBRIDA* L. Fabaceae. Vetch.
No. 2587. From 8 km. west of Samsun, August 23.
- 121152 to 121154. *LATHYRUS* *GORGONI* Parl. Fabaceae.
121152. No. 3304. From 25 km. south of Gaziantep, June 1.
121153. No. 3305. From 10 km. west of Gaziantep, June 1.
121154. No. 3403. From 3 km. west of Ankara, June 25.
121155. *VICIA* *LATHYROIDES* L. Fabaceae. Vetch.
No. 3423. From a dry rocky slope 3 km. northeast of Ankara, June 26.
121156. *PISUM* *ELATIUS* Bieb. Fabaceae. Pea.
No. 644. From near Aydin, June 25. A wild pea.
- 121157 to 121160. *LATHYRUS* spp. Fabaceae. Pea.
121157. *LATHYRUS* *APHACA* L.
[No number.] From 86 km. southeast of Susheri, August 7.
121158. *LATHYRUS* sp.
No. 649. From near Söke, June 25.
121159. *LATHYRUS* *APHACA* L.
No. 727. From a lake bottom 50 km. southeast of Mugla, May 28.
121160. *LATHYRUS* *GORGONI* Parl.
No. 749. From 10 km. north of Tavas, May 30.
121161. *VICIA* *SATIVA* L. Fabaceae. Common vetch.
No. 753. From 8 km. north of Tavas, May 30.
- 121162 to 121181. *LATHYRUS* spp. Fabaceae. Pea.
121162. *LATHYRUS* *SETIFOLIUS* L.
No. 754. From 10 km. south of Denizli, May 30.
121163. *LATHYRUS* *GORGONI* Parl.
No. 800. From 25 km. south of Burdur, June 3.

121086 to 121290—Continued.

121164. *LATHYRUS APHACA* L.
No. 1074. From 40 km. northwest of Izmir. June 10. A small pea found in a wheat field.
121165. *LATHYRUS ANNUUS* Hoejer.
No. 1095. From 2 km. south of Kir-kagach, June 11.
121166. *LATHYRUS GORGONI* Parl.
No. 1097. From 2 km. south of Kir-kagach, June 11.
121167. *LATHYRUS CASSIUS* Boiss.
No. 1439. From 37 km. north of Gaziantep, July 2.
121168. *LATHYRUS* sp.
No. 1472. From 37 km. north of Gaziantep, July 3.
121169. *LATHYRUS CASSIUS* Boiss.
No. 1478. From 30 km. southeast of Marash, July 3.
121170. *LATHYRUS ANNUUS* Hoejer.
No. 1480. From 30 km. southeast of Marash, July 3.
121171. *LATHYRUS APHACA* L.
No. 1609. From 30 km. west of Di-yarbakir, July 7.
121172. *LATHYRUS GORGONI* Parl.
No. 1648. From 20 km. south of Di-yarbakir, July 9.
121173. *LATHYRUS ODORATUS* L.
Sweet pea.
No. 1741. From 25 km. southeast of Elaziz, September 13. A form with large yellow flowers.
121174. *LATHYRUS ERECTUS* Lag.
No. 1750. From 40 km. southeast of Elaziz, July 13.
121175. *LATHYRUS ERECTUS* Lag.
No. 1769. From 30 km. southeast of Elaziz, July 13.
121176. *LATHYRUS APHACA* L.
No. 1792. From 35 km. southwest of Elaziz, July 14.
121177. *LATHYRUS ERECTUS* Lag.
No. 2061. From Alma Dag, 25 km. southeast of Ankara, August 1.
121178. *LATHYRUS HIRSUTUS* L.
No. 2113. From 106 km. east of Sivas, August 5.
121179. *LATHYRUS ERECTUS* Lag.
No. 2114. From 84 km. east of Sivas, August 5.
121180. *LATHYRUS* sp.
No. 2170. From 84 km. northeast of Sivas, August 6.
121181. *LATHYRUS HIRSUTUS* L.
No. 2391. From 60 km. east of Trabzon, August 17.
121182. *VICIA SATIVA* L. Fabaceae.
Common vetch.
No. 2427. From 50 km. south of Giresun, August 17.

121086 to 121290—Continued.

121183. *LATHYRUS* sp.
No. 2510. From 30 km. east of Ordu, August 18.
121184. *LATHYRUS GORGONI* Parl.
No. 3454. From 30 km. southeast of Ankara on Alma Dag, June 28.
121185. *LATHYRUS* sp.
No. 2073. From Alma Dag, 25 km. southeast of Ankara, August 1.
- 121186 to 121199. *LOTUS* spp. Fabaceae.
121186. *LOTUS* sp.
No. 792. En route from Isparta to Antalya, June 3.
121187. *LOTUS* sp.
No. 1022. From the Bergama ruins, June 10.
121188. *LOTUS* sp.
No. 1319. From the hills near Mudanya, June 21.
121189. *LOTUS* sp.
No. 1353. From Adana, June 10.
121190. *LOTUS* sp.
No. 2089. An ornamental rock plant from Alma Dag, 25 km. southeast of Ankara, August 1.
121191. *LOTUS* sp.
No. 2390. From 50 km. east of Trabzon, August 12.
121192. *LOTUS* sp.
No. 2822. From Yalova Kaplijalari, August 11.
121193. *LOTUS* sp.
No. 3338. From 3 km. west of Ankara, June 25.
121194. *LOTUS* sp.
No. 1209. From 50 km. west of Balikesir, June 16.
121195. *LOTUS* sp.
No. 1882. From 18 km. north of Malatya, July 17.
121196. *LOTUS* sp.
No. 2104. From 106 km. east of Sivas, October 5.
121197. *LOTUS* sp.
No. 2454. From Alma Dag, 25 km. southeast of Ankara, August 1.
121198. *LOTUS* sp.
No. 2677. From 46 km. south of Tokat, August 26.
121199. *LOTUS* sp.
No. 3390. From 3 km. west of Ankara, June 25.
121200. *LUPINUS* sp. Fabaceae.
No. 2809. From Yalova Kaplijalari, September 11.
121201. *LUPINUS* sp.
No. 1069. From 60 km. northwest of Izmir, June 10.
- 121202 to 121205. *MEDICAGO* spp. Fabaceae.
Medick.

121086 to 121290—Continued.

121202. *MEDICAGO RADIATA* L.
No. 1759. From 40 km. southeast of Elaziz, July 13.
121203. *MEDICAGO* sp.
No. 2306. From 40 km. north of Gemushane, August 10.
121204. *MEDICAGO SATIVA* L. Alfalfa.
No. 2634-A. From 15 km. from Amasya.
121205. *MEDICAGO* sp.
No. 1606. From 20 km. west of Diyarbekir, July 7.
121206. *MELILOTUS* sp. Fabaceae.
No. 1126. From the mountains between Manisa and Izmir, June 11.
121207. *MELILOTUS* sp. Fabaceae.
No. 3309. From 10 km. west of Gaziantep, June 1.
- 121208 to 121217. *ONOBRYCHIS* spp. Fabaceae.
121208. *ONOBRYCHIS ORNATA* (Willd.) Desv.
No. 1662. From 20 km. east of Diyarbekir, July 10. An erect perennial over 6 inches high, native to Asia Minor.
121209. *ONOBRYCHIS AURANTIACA* Boiss.
No. 1663. From 20 km. east of Diyarbekir, July 10. A perennial with thick ascending stems about 18 inches long, native to Asia Minor.
121210. *ONOBRYCHIS ORNATA* (Willd.) Desv.
No. 3453. From 10 km. southeast of Ankara, June 28.
For previous introduction and description see 121208.
121211. *ONOBRYCHIS CAPUT-GALLI* (L.) Lam.
No. 625. From Ephesus, June 24.
121212. *ONOBRYCHIS AERUQUIDENTATA* (Sibth. and Smith) D'Urv.
No. 751. From 16 km. south of Denizli, June 30. An annual with ascending or erect stems about a foot high, native to southern Europe.
121213. *ONOBRYCHIS* sp.
No. 1460. From 30 km. southeast of Marash, July 2.
121214. *ONOBRYCHIS* sp.
No. 1470. From 45 km. north of Gaziantep, July 3.
121215. *ONOBRYCHIS TOURNEFORTII* (Willd.) Desv.
No. 1906. From 45 km. north of Gaziantep, July 3. A hardy herbaceous perennial, native to Asia Minor.
For previous introduction see 72811.
121216. *ONOBRYCHIS* sp.
No. 1970. From Birejik, July 23.
121217. *ONOBRYCHIS TOURNEFORTII* (Willd.) Desv.
No. 1991. From Ulukishla, July 25.
For previous introduction and description see 121215.

121086 to 121290—Continued.

121218. *ONONIS* sp. Fabaceae.
No. 1296. From 40 km. east of Bursa, June 19.
121219. *ONOBRYCHIS CAPUT-GALLI* (L.) Lam. Fabaceae.
No. 1313. From 25 km. north of Bursa, June 20.
121220. *ONONIS* sp. Fabaceae.
No. 1315. From 25 km. north of Bursa, June 20.
121221. *ONONIS* sp. Fabaceae.
No. 1320. From the hills near Mudanya, June 21.
121222. *ONONIS* sp. Fabaceae.
No. 1933. From Birejik, July 22.
121223. *ORNITHOPUS COMPRESSUS* L. Fabaceae.
No. 695. From open pine forest east of Milas, May 27. A slender spreading annual with pinnate leaves and very small yellow flowers.

121225. No. 664. From 5 km. west of Tireh, June 25.
121226. No. 682. From 30 km. southwest of Izmir, June 25.
121227. No. 1112. From 2 km. south of Kirkagach, June 11.
121228. No. 1345. From Adana, June 10.
121229. No. 1456. From 30 km. southeast of Marash, July 2.
121230. *SOPHORA* sp. Fabaceae.
No. 817. From 25 km. southeast of Izmir, May 25.
121231. *THERMOPSIS* sp. Fabaceae.
No. 1061. From 3 km. east of Antalya, June 4.
- 121232 to 121250. *TRIFOLIUM* spp. Fabaceae. Clover.
121232. *TRIFOLIUM* sp.
No. 1073. From 50 km. northwest of Izmir, June 10.
121233. *TRIFOLIUM* sp.
No. 1324. From Adana, June 19.
121234. *TRIFOLIUM* sp.
No. 1352. From Adana, June 19.
121235. *TRIFOLIUM PURPUREUM* Loisel.
No. 1475. From 37 km. north of Gaziantep, July 3.
121236. *TRIFOLIUM* sp.
No. 1479. From 25 km. northwest of Gaziantep, July 3.

121086 to 121290—Continued.

121237. TRIFOLIUM sp.
No. 1520. From 25 km. northwest of Urfa, July 5.
121238. TRIFOLIUM sp.
No. 1604. From 3 km. east of Sive-
rek, July 7.
121239. TRIFOLIUM sp.
No. 1605. From 3 km. northeast of
Siverek, July 7.
121240. TRIFOLIUM sp.
No. 1748. From 35 km. southeast of
Elaziz, July 13.
121241. TRIFOLIUM sp.
No. 1803. From 35 km. southwest of
Elaziz, July 14.
121242. TRIFOLIUM sp.
No. 1857. From 15 km. west of Mala-
tya, July 16.
121243. TRIFOLIUM sp.
No. 1922. From Birejik, July 21.
121244. TRIFOLIUM sp.
No. 1943. From Birejik, July 22.
121245. TRIFOLIUM sp.
No. 1988. From Ulukishla, July 25.
121246. TRIFOLIUM sp.
No. 2021. From 45 km. north of
Nigde, July 26.
121247. TRIFOLIUM sp.
No. 2116. From 84 km. east of Sivas,
August 5.
121248. TRIFOLIUM sp.
No. 2210. From 60 km. southeast of
Susheri, August 7.
121249. TRIFOLIUM sp.
No. 2615. From 20 km. southwest of
Samsun, August 24.
121250. TRIFOLIUM sp.
No. 3400. From dry plains around
Ankara, June 25.
- 121251 to 121262. TRIGONELLA spp. Faba-
ceae.
- 121251 to 121253. TRIGONELLA FOENUM-
GRAECUM L. Fenugreek.
121251. No. 768. From about 4 km.
north of Denizli, May 31.
121252. No. 1334. From Adana, June
19.
121253. No. 2125. From the Sivas
bazar, August 5.
121254. TRIGONELLA sp.
No. 1518. From 25 km. northwest of
Urfa, July 5.
121255. TRIGONELLA sp.
No. 1767. From 35 km. southeast of
Elaziz, July 13.
121256. TRIGONELLA sp.
No. 1789. From 10 km. southeast of
Elaziz, July 14.
121257. TRIGONELLA sp.
No. 1927. From 40 km. southwest of
Elaziz, July 13.

121086 to 121290—Continued.

121258. TRIGONELLA sp.
No. 2565. From 51 km. east of Sam-
sun, August 22.
121259. TRIGONELLA sp.
No. 2733. From Yalova Kaplijalari,
September 6.
121260. TRIGONELLA sp.
No. 2876. From 1 km. west of Yalova
Kaplijalari, September 12.
121261. TRIGONELLA sp.
No. 3411. A mixed sample, from dry
gravelly soil 3 km. northeast of Ankara,
June 26.
121262. TRIGONELLA sp.
No. 3417. From 3 km. northeast of
Ankara, June 26.
- 121263 to 121276. VICIA spp. Fabaceae.
Vetch.
121263. VICIA FABA L. Broadbean.
No. 3068. From the Amasya bazar,
October 6.
121264. VICIA ERVILIA (L.) Willd.
No. 3490-F. From Eskishehir, No-
vember 2.
For previous introduction see 107594.
121265. VICIA ANGUSTIFOLIA Grufberg.
No. 665. From near Söke, May 25.
121266. VICIA sp.
No. 1120. From the mountains be-
tween Manisa and Izmir, June 11.
121267. VICIA SATIVA L. Common vetch.
No. 1124. From the mountains be-
tween Manisa and Izmir, June 11.
121268. VICIA HIRSUFA (L.) S. F. Gray.
No. 1166. From 30 km. west of Bali-
kesir, June 16.
121269. VICIA SATIVA L. Common vetch.
No. 1188. From 30 km. west of Bali-
kesir, June 16.
121270. VICIA sp.
No. 1207. From 30 km. west of Bali-
kesir, June 16.
Nos. 121271 to 121275. From Adana,
June 19.
121271. VICIA ANGUSTIFOLIA Grufberg.
No. 1327.
121272. VICIA sp.
No. 1330.
121273. VICIA sp.
No. 1335. *Dream flowers*.
121274. VICIA LUTEA HIRTA (Balb.)
Loisel.
No. 1336.
121275. VICIA ANGUSTIFOLIA Grufberg.
No. 1344.
121276. VICIA sp.
No. 1876. From 44 km. north of
Malatya, July 17.

121086 to 121290—Continued.

121277. *LATHYRUS APHACA* L. Fabaceae.
Pea.
No. 1889. From 44 km. north of Malatya, July 17.
121278. *VICIA* sp. Fabaceae.
No. 1915. From 25 km. west of Diyarbakir, July 9.
121279. *VICIA SERRATIFOLIA INTEGRIFOLIA* Beck. Fabaceae.
No. 2204. From a wheat field, 86 km. southeast of Susheri, August 7.
121280. *LATHYRUS APHACA* L. Fabaceae.
Pea.
No. 2204-A. From 86 km. southeast of Sivas, August 7.
- 121281 to 121283. *VICIA* spp. Fabaceae.
Vetch.
121281. *VICIA TETRASPERMA* (L.) Moench.
No. 2576. From 7 km. west of Terme, August 22.
121282. *VICIA* sp.
No. 2942-A. From the Izmir bazar, September 22.
121283. *VICIA* sp.
No. 2727. From Yalova Kaplijalari, September 6.
121284. *LATHYRUS GORGONI* Parl. Fabaceae.
No. 2339. From 50 km. south of Trabzon, August 10.
121285. *VICIA ERVILIA* (L.) Willd. Fabaceae.
Vetch.
No. 3422. A small vetch from a dry rocky slope 3 km. northeast of Ankara, June 26.
121286. *VICIA SERRATIFOLIA INTEGRIFOLIA* Beck. Fabaceae.
Vetch.
No. 3490-E. From Eskishehir, November 2.
121287. *VICIA FABA* L. Fabaceae.
Broadbean.
No. 3122. From the Inebolu bazar, October 13.
121288. *LATHYRUS OCHRUS* (L.) DC. Fabaceae.
Pea.
No. 609. From the Izmir bazar, May 23.
121289. *VICIA* sp. Fabaceae.
No. 1247. From the Bursa bazar, June 18.
121290. *VICIA* sp. Fabaceae.
No. 2629. From 54 km. southwest of Samsun, August 24.

121291 to 121366—Continued.

121308. CASUARINA EUISETIFOLIA Stickm.
Casuarinaceae. Horsetail-tree.

No. 1824. From the Saharanpur Government Gardens, December 1.

For previous introduction see 67683.

121309 to 121314. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

121309. No. 1858. *Delfsand* or *Tinda*. From Lucknow, December 11.

121310. No. 1799. *Tarbuз*. From Lahore, Punjab, November 27, but said to have come from Quetta. Fruit globose, pale to dark green, marked with darker green; flesh stringy like a pumpkin, but sweet and not tough.

121311. No. 1839. *Tarbuз*. From Lucknow, December 8. Originally from Shahjehanpur.

121312. No. 1840. From Lucknow, December 8. Originally from Farukhabad.

121313. No. 1877. *Tarbuзa*. From Benares, December 15. An extra fine native melon.

121314. No. 1883. *Tarbuзc*. From Benares, December 15. An extra good native melon.

121315. CLIANTHUS DAMPIERI A. Cunn. Fabaceae.

No. 1878. From Benares, December 15. A half-trailing shrub with branches 2 to 4 feet long, white hairy throughout, with pinnate leaves and large crimson flowers in a drooping raceme. Native to Australia.

121316 to 121331. CUCUMIS spp. Cucurbitaceae.

121316 to 121320. CUCUMIS MELO L. Muskmelon.

121316. No. 1837. *Poot*. From Lucknow, December 8. A rainy season melon said to be 18 inches in diameter, splitting when ripe. Flavor not strong, but ripens after the hot season varieties are finished.

121317. No. 1843. *Kharbuзa*. From Lucknow, December 8. A variety for which Lucknow is famous. A smooth yellow oval melon that ripens in the hottest season. The flavor is sweet, but unlike that of any American melon.

121318. No. 1854. *Kharbuзa*. From Lucknow, December 11. A good local variety.

121319. No. 1855. *Kharbuзa*. From Lucknow, December 11. A very sweet local variety.

121320. No. 1876. *Kharbuзa*. From Benares, December 15. A Jampuri variety.

121321 to 121331. CUCUMIS SATIVUS L. Cucumber.

Nos. 121321 to 121329. *Kakri*. From Lucknow, December 10 to 13.

121321. No. 1846. A winter form, 1 foot long.

121322. No. 1847. A special Lucknow sort, very tender and sweet.

121323. No. 1848. *Bareilly Kakri*. A very large cucumber grown at Bareilly.

121291 to 121366—Continued.

121324. No. 1849. *Balam Khiri*. Said to be 1 foot long and to endure the greatest heat.

121325. No. 1861. A long green cucumber, grown in the hot season.

121326. No. 1863. *Khiri*. A rainy season form.

121327. No. 1867. A round cucumber of good quality, grown in the rainy season.

121328. No. 1868. *Khiri*. An early winter variety.

121329. No. 1871. *Khari*. An early local variety of good quality.

121330. No. 1893. *Kakri*. From Benares, December 16. A native variety.

121331. No. 1894. *Kakri*. From Benares, December 16. A long green cucumber from Lucknow.

121332 to 121334. CUCURBITA MOSCHATA Duchesne. Cushaw.

Nos. 121332 and 121333. *Kaddu*. From Lucknow, December 8 and 13.

121332. No. 1836. Fruit oval, 18 inches long, deeply ribbed, green, spotted and blotched with buff.

121333. No. 1872. A round melon grown in the rainy hot season.

121334. No. 1898. *Kumsa*. From Benares, December 16. Grown in the hot season.

121335 to 121337. DAUCUS CAROTA L. Apiaceae. Carrot.

Nos. 121335 and 121336. *Gajas*, Lucknow, December 8.

121335. No. 1833. A native orange carrot.

121336. No. 1834. A native purple carrot, short, stubby, with thick, purple red rind, not sweet, fairly tender.

121337. No. 1887. *Gajas*. From Benares, December 15. The native purple-red sort; stubby, tender, hardy, but not sweet.

121338 to 121340. DOLICHOS LABLAB L. Fabaceae. Hyacinth-bean.

Sem. From Benares, December 15. It occurs in many varieties and most are sold as green "string beans." They are tender but stringy, and have a stronger flavor than our green beans. They have the advantage of being heavy and long-season producers.

121338. No. 1888.

121339. No. 1889.

121340. No. 1890. A form with round pods.

121341 and 121342. LAGENARIA LEUCANTHA (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

From Benares, December 16.

121341. No. 1900. *Kaddu*. A round form.

121342. No. 1901. *Lanki*. A long form of particularly good quality.

121291 to 121366—Continued.

121343. *LUFFA ACUTANGULA* (L.) Roxb. Cucurbitaceae. Singkwa towelgourd.

No. 1841. *Satfuta*. From Lucknow, December 8. A small variety that bears its fruits in clusters.

121344. *LUFFA CYLINDRICA* (L.) Roemer. Cucurbitaceae. Suakwa towelgourd.

No. 1895. *Nenua*. From Benares, December 16. A hot season vegetable.

121345. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

No. 1865. *Termater*. From Lucknow, December 12. A native variety.

121346. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Baisam-pear.

No. 1902. *Karela*. From Benares, December 16. A particularly good kind.

121347. *NELUMBO NUCIFERA* Gaertn. Nymphaeaceae. Hindu lotus.

No. 1892. *Kamal*. From Benares, December 16. A mixture of native varieties.

121348. *OROXYLON INDICUM* (L.) Vent. Bignoniaceae. East Indian trumpetflower.

No. 1816. *Tsampaka*. From the Government Gardens, Saharanpur, November 30. A small tree with long flat pods; grows at 3,000 feet altitude in the Kangra Valley.

121349. *ORYZA SATIVA* L. Poaceae. Rice.

No. 1809. *Bansmat*. From Lahore, Punjab, November 29. The best rice grown here. Planted the last of summer and requires about 120 days to mature; yields from 1,600 to 2,000 pounds per acre.

121350. *ORYZA SATIVA* L. Poaceae. Rice.

No. 1815. *Sathra 278*. From Kala Shah Kaku, Punjab, November 29. A strain from the Government Rice Farm, maturing in 60 to 70 days and yielding about 2,400 pounds per acre. The grain is coarse and not valued as a table rice, but it will grow in nearly any kind of soil.

121351. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.

No. 1851. *Sem*. From Lucknow, December 10.

121352. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 1891. From Benares, December 15.

121353 to 121362. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

Nos. 121353 to 121356. *Bengan*; collected at Lucknow, from December 8 to 13.

121353. No. 1842. A mixture of local varieties.

121354. No. 1862. A long green round fruit which weighs 4 to 5 pounds.

121355. No. 1870. An early purple fruit, 1 foot long.

121356. No. 1874. A round purple fruit, weighing 2 pounds.

Nos. 121357 to 121362. *Bengan*; from Benares, December 15 and 16.

121357. No. 1879. A purple variety, 1 foot long, with tender skin; quality good.

121291 to 121366—Continued.

121358. No. 1884. Fruit large, round, green, up to 5 pounds in weight; skin thin, seeds few, flavor excellent; bush 3½ feet high, and bears well.

121359. No. 1885. A large green fruit of fine quality. Said to be the same as No. 1884 (P. I. 121358).

121360. No. 1886. A round, deep-purple fruit, weight about 1 pound, quality good.

121361. No. 1896. A round white native variety.

• 121362. No. 1897. A long green native variety.

121363. *SPINACIA OLERACEA* L. Chenopodiaceae. Common spinach.

No. 1899. *Palag*. From Benares, December 16. A vigorous growing spinach which makes plants 2 feet across.

121364. *TAGETES* sp. Asteraceae. Marigold.

No. 1903. From Benares, December 16. An interesting quilled yellow form is seen here in the gardens, and this may be the form here represented.

121365. *VICIA FABA* L. Fabaceae. Broadbean.

No. 1852. *Bagla*. From Lucknow, December 10.

121366. *STIZOLOBIUM* sp. Fabaceae.

No. 1853. From Lucknow, December 10. A native bean.

121367 to 121369. *VITIS VINIFERA* L. Vitaceae. European grape.

From Austria. Plants presented by Prof. Andre Teleki, Vienna. Received February 23, 1937.

121367. *Ezerjo*.

121368. *Kiknyeli*

121369. *Leányka*

121370 to 121400.

From Turkey. Seeds and bulbs collected by H. L. Westover and F. L. Wellman. Received January 18, 1937.

Unless otherwise stated, this material was all collected in 1936 and was received as seeds.

121370. *NIGELLA SATIVA* L. Liliaceae. Black cumin.

No. 2897. *Chörükotu*. From the Chanak Kale bazar, September 18.

121371 to 121395. *ALLIUM* spp. Liliaceae.

121371. *ALLIUM* sp.

No. 3271. From the Adapazari bazar, October 20.

121372. *ALLIUM* sp.

No. 2031. From the Nigde bazar, July 27.

121373. *ALLIUM* sp.

No. 1557. From the Urfa bazar, July 6. Used for flavoring bread.

121374. *ALLIUM* sp.

No. 2544. *Cherogote*. From the Samsun bazar, August 2.

121370 to 121400—Continued.

121375. ALLIUM sp.

No. 3009. From the Kutahya bazar, September 28. Used for flavoring bread.

121376. ALLIUM sp.

No. 3132. *Cherogote*. From the Inebolu bazar, October 13. Used for flavoring bread.

121377. ALLIUM sp.

No. 538. From the Mugla bazar, May 28.

121378. ALLIUM sp.

No. 1431. Bulbs of a white-flowered allium from 31 km. north of Gaziantep, July 2.

121379. ALLIUM sp.

No. 1525. Bulbs from the mountains near Urfa, July 6.

121380. ALLIUM sp.

No. 1566. From 5 km. east of Siverek, July 7.

121381. ALLIUM sp.

No. 1571. Bulbs from 41 km. southeast of Diyarbekir, July 7.

121382. ALLIUM sp.

No. 1589. Bulbs from 54 km. north of Urfa, July 7.

121383. ALLIUM sp.

No. 1851. From 26 km. west of Malatya, July 16.

121395. ALLIUM sp.

No. 3413-A. From 3 km. northeast of Ankara, June 26.

121396 to 121398. BETA spp. Chenopodiaceae.

121396. BETA VULGARIS CICLA L. Chard.

No. 541. From the Mugla bazar, May 28.

121397. BETA VULGARIS L. Common beet.

No. 561. From the Isparta bazar, June 2.

121398. BETA VULGARIS L. Common beet.

No. 577. From the Antalya bazar, June 4.

121399. LEPIDIUM sp. Brassicaceae.

No. 3490-A. From Eskishehir, November 2.

121400. PHASEOLUS VULGARIS L. Fabaceae. Common bean.

No. 2146. From the Sivas bazar, August 5.

121401 to 121435.

From Paraguay. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received January 27, 1937.

This material was all collected in 1936.

121401. CAMPOMANESIA OBYERSA (Miquel) Berg. Myrtaceae.

No. 4703. *Guabirami*. From Villa Rica, December 17. A shrub about 8 feet high; fruits round, about 2 cm. in diameter; skin green with minute pale-brown specks; pulp sweet, grapelike, with 5 seeds.

For previous introduction see 37064.

121402 to 121405. CITRULLUS VULGARIS Schrad. Cucurbitaceae. Watermelon.

Nos. 121402 and 121403. From Villa Encarnación, December 14.

121402. No. 4650. *Sandia amarilla*. Fruit with yellow flesh.

121403. No. 4651. A cultivated melon.

Nos. 121404 and 121405. From San Miguel Curuzú, 3 km. north of Villa Encarnación, December 14. Cultivated melons.

121404. No. 4659. 121405. No. 4660.

121406. CITRUS sp. Rutaceae.

No. 4704. *Apebo*. From the market at Villa Rica, December 17. Fruits 5 to 7 cm. in diameter, slightly flattened at the poles; skin fragile, puffy inside, bright orange. The pulp has the flavor of grapefruit, but looks like that of an orange. From the leaves of this plant is obtained the commercial "petit grain." Fruits are used locally for a bottled soft drink and for wine. The tree is large and occurs in a wild state in Paraguay.

121407 and 121408. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

121407. No. 4652. From the Villa Encarnación, December 14. A cultivated melon.

121408. No. 4698. From the Villa Rica, December 17. A cultivated melon.

121401 to 121435—Continued.

121409. CUCURBITA MOSCHATA Duchesne. Cucurbitaceae. Cushman.

No. 4653. *Zapallo duro*. From the Villa Encarnación, December 14. Fruit flattened at the poles, about 6 inches in diameter. It keeps well if a portion of the stem is left on.

121410 and 121411. CUCURBITA PEPO L. Cucurbitaceae. Pumpkin.

121410. No. 4654. *Zapallo guachio*. From the Villa Encarnación, December 14. A cultivated pumpkin.

121411. No. 4701. *Zapallo duro*. From the market at Villa Rica, December 17. Fruit 7 to 10 by 4 to 5 cm. in size; rind whitish green, very hard; keeps from one year to the next.

121412. EUGENIA sp. Myrtaceae.

No. 4699. *Ucavijá*. From the market at Villa Rica, December 17. A large shrub or small tree about 15 feet high. Fruits roundish, slightly flattened at the poles, calyx persistent, skin dark reddish purple. Flesh has the consistency of grape, slightly sweet; seeds green, 1 to 3 in a fruit. In general, the fruits look like large blueberries and are used to make a refreshing drink.

121413. HIPPEASTRUM sp. Amaryllidaceae.

No. 4661. From San Miguel Curuzú, 3 km. north of Villa Encarnación, December 14. Flowers said to be white.

121414. LAGENARIA LEUCANTHA (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. 4684. From Jatatú, 8 km. north of Villa Rica, December 16. Fruit spindle-shaped, used for maté containers.

121415. PASPALUM NOTATUM Fluegge. Poaceae. Bahía grass.

No. 4721. *Kaspiipe* (means: horse grass). From Jardín Botánico, Santísima Trinidad, December 21. A perennial tropical American grass, good for forage and for erosion control.

For previous introduction see 118464.

121416 to 121421. PHASEOLUS VULGARIS L. Fabaceae. Common bean.

Nos. 121416 to 121419 were from Villa Encarnación, December 14.

121416. No. 4640. *Avilla de 6 meses*.

121417. No. 4643. *Avilla há*.

121418. No. 4645. *Soperín*. Produces the year round.

121419. No. 4647. *Poroto blanco arroz*.

121420. No. 4694. *Avilla*. From Villa Rica.

121421. No. 4697. *Poroto de manteca*. From the market at Villa Rica, December 17.

121422. PISUM SATIVUM L. Fabaceae. Pea.

No. 4648. *Arveja*. From Villa Encarnación, December 14.

121423. RHEEDIA BRASILIENSIS (Mart.) Planch. and Triana. Clusiaceae.

No. 4702. *Pacuri*. From the market at Villa Rica, December 17. A large tree with bright-yellow, round fruits 3 to 4 cm. in diameter, which contain 2 or 3 large seeds that nearly fill the cavity. The

121401 to 121435—Continued.

lemon-flavored pulp, which surrounds the seeds, is used to make a refreshing beverage.

For previous introduction see 41150.

121424. RHYNCOSIA HAGENBECKII Harms. Fabaceae.

No. 4712. From the Jardín Botánico, Santísima Trinidad, December 21. A shrubby perennial with long racemes of many small yellow flowers. Native to Brazil.

121425. SALACIA ELLIPTICA (Mart.) G. Don. Hippocrateaceae.

No. 4714. From the Jardín Botánico, Santísima Trinidad, December 21. A semi-climbing evergreen shrub or small tree, with laurel-like leaves and axillary clusters of small yellowish-green flowers, followed by edible fruits. Native to Brazil.

121426. SORGHUM VULGARE Pers. Poaceae. Sorghum.

No. 4767. *Sorgo perenne*. From San Lorenzo, December 24. A perennial lasting 10 years. Seed obtained in the Chaco and said to have come originally from Matto Grosso, Brazil.

121427. STEVIA REBAUDIANA Bertoni. Asteraceae.

No. 4773. *Kaá-hee*. From Asunción, December 24. The leaves contain a sweet glucoside used locally, on a small scale, as a sugar substitute for diabetics.

121428. GALACTIA JUSSIEAANA Kunth. Fabaceae.

No. 4713. From the Jardín Botánico, Santísima Trinidad, December 21. A woody climber with ternate leaves; the leaflets elliptic rounded, sticky on the upper surface and hairy beneath, and small pink flowers. Native to Venezuela.

For previous introduction see 108259.

121429. VICIA FABA L. Fabaceae. Broadbean.

No. 4642. *Haba*. From Villa Encarnación, December 14. The young fruit and dry seeds are eaten.

121430 to 121433. VIGNA SINENSIS (Torner) Savi. Fabaceae. Cowpea.

Nos. 121430 to 121432. From Villa Encarnación, December 14.

121430. No. 4641. *Poroto todo el año*. A vine with curved pods 8 to 9 cm. long which are eaten green.

121431. No. 4644. *Cumandá*.

121432. No. 4646. *Poroto cuarenta*. Bears in 40 days after planting.

121433. No. 4696. A cultivated bean from the market at Villa Rica, December 17.

121434. VITIS sp. Vitaceae.

No. 4636. From Villa Encarnación, December 14. Cultivated for shade and ornament in many places. Fruits small, purple with dusty bloom, sweet but insipid, about 1 cm. in diameter with 1 to 3 seeds in each. The vine is a heavy bearer.

121435. ZEA MAYS L. Poaceae. Corn.

No. 4693. *Mafa dura*. From the market at Villa Rica, December 17. A cultivated corn.

- 121436 to 121438. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.
From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 15, 1937.
121436. No. 2115. From Calcutta, January 4, 1937. A red fruit, 3 inches across; possibly disease resistant.
121437. No. 1918. From Darjeeling, Bengal, December 22, 1936, at 7,000 feet altitude. Fruit red, globose, 2 inches in diameter.
121438. No. 1148. From Skardo, Baltistan Province, Kashmir, August 14, 1936, at 6,500 feet altitude. Fruit red, globose, 1½ to 2 inches in diameter.
- 121439 to 121491.
From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 16, 1937.
The material was all collected in 1936.
121439. *AMYGDALUS* sp. Amygdalaceae.
No. 2258. From 50 km. east of Erzincan, August 9. Seed from a wild tree.
- 121440 to 121444. *CORYLUS AVELLANA* L. Betulaceae. Filbert.
121440. No. 2511. From between Ordu and Giresun, August 19.
121441. No. 2384. Along the road between Trabzon and Rize, August 12.
121442. No. 2419. From a pile of drying filberts at Trabzon, August 14.
121443. No. 2923. From Giresun, August 20.
121444. No. 2550. From the Samsun bazar, August 21.
121445. *CEPHALARIA* sp. Dipsacaceae.
No. 2154. *Kangir*. From the Sivas bazar, August 5. Fruits eaten green or stewed.
- 121446 to 121450. *FRAGARIA* spp. Rosaceae. Strawberry.
121446. *FRAGARIA* sp.
No. 827. From the market at Izmir, June 8.
121447. *FRAGARIA VESCA* L.
No. 2307. A wild strawberry from 62 km. north of Gemushane, August 10.
121448. *FRAGARIA* sp.
No. 2476. From 49 km. south of Giresun, August 17.
121449. *FRAGARIA* sp.
No. 3314. From the Istanbul bazar, June 16. A common variety of excellent flavor.
121450. *FRAGARIA* sp.
No. 3327. From the Ankara bazar, June 20. A variety with white flesh.
121451. *MALUS SYLVESTRIS* Mill. Apple.
No. 3050. From the Amasya bazar, October 6.
121452. *MORUS ALBA* L. Moraceae. White mulberry.
No. 3046. From the Amasya bazar, October 6.
- 121439 to 121491—Continued.
121453. *MORUS NIGRA* L. Moraceae. Black mulberry.
No. 2503. From 30 km. northwest of Susheri, August 18. A delicious mulberry, very sour when green, but sweet and juicy when mature.
- 121454 to 121486. *PRUNUS* spp. Amygdalaceae.
- 121454 to 121469. *PRUNUS ARMENIACA* L. Apricot.
Nos. 121454 to 121457 were from the Elaziz bazar, July 11 to 13.
121454. No. 1680. Large, yellow-fleshed fruit.
121455. No. 1718. Medium-sized fruit of good quality with reddish skin.
121456. No. 1732. Medium-sized fruit of poor quality.
121457. No. 1808. Unusually large fruit but very poor quality.
121458. No. 1865. From the Malatya bazar, July 16. The famous "Malatya apricot" which has the highest sugar content and is the best for drying.
121459. No. 2452. From Develu Karahissan, July 27.
121460. No. 3331. From the Mugla bazar, June 30. Small fruits with yellow flesh.
121461. No. 3334. From the Antalya bazar, June 3. A yellow-fleshed apricot.
121462. No. 3336. From the Antalya bazar, June 3. A yellow-fleshed apricot.
121463. No. 3338. *Sugar money*. From a Mediterranean boat, June 4.
121464. No. 3339. From the Izmir bazar, June 8. A large sweet apricot.
- Nos. 121465 to 121469 were received at Gaziantep, June 16, from M. N. Isely.
121465. No. 3362. A large pulpy, not juicy, freestone variety.
121466. No. 3363. A small sweet freestone variety.
121467. No. 3364. A large freestone variety.
121468. No. 3366. *Sweet*.
121469. No. 3367. *Sugar money*.
121470. *PRUNUS* sp.
No. 1806. From the Elaziz bazar July 14. A small red freestone plum of good quality.
121471. *PRUNUS* sp.
No. 1911. From the Malatya bazar, July 16. A large round yellow plum with crisp sweet flesh and tough skin.
121472. *PRUNUS* sp.
No. 2184. A wild plum from 50 km. southeast of Susheri, August 7.
121473. *PRUNUS* sp.
No. 2380. From the Trabzon bazar, August 11. A blue plum of medium size, and a freestone; somewhat tart when not completely ripe.

121439 to 121491—Continued.

121474. *PRUNUS* sp.

No. 2470. A wild plum from 99 km. south of Giresun, August 17.

121475. *PRUNUS* sp.

No. 2554. From 16 km. east of Sam-sun, August 22. A yellow wild plum of medium size and fairly good quality.

121476. *PRUNUS* sp.

No. 2609. From 38 km. west of Sam-sun, August 23. A small wild blue plum with good sharp flavor.

121477. *PRUNUS* sp.

No. 3100. From the Yozgat bazar, October 9. A late-fruiting, oblong plum with pinkish tan skin.

121478. *PRUNUS* sp.

No. 3104. From the Ankara bazar, October 10. A purplish medium-sized, late plum with solid flesh of fair quality.

121479. *PRUNUS* sp.

No. 3340. A red plum from the Izmir bazar, June 8.

121480. *PRUNUS* sp.

No. 3341. From the Izmir bazar, June 8. A light-red plum with watery flesh, picked and eaten green in Turkey.

121481. *PRUNUS* sp.

No. 3378. A dark-red plum from the Bursa bazar, June 20.

121482. *PRUNUS* sp.

No. 3414. A wild plum from a dry rocky slope 3 km. northeast of Ankara, June 26.

121483. *PRUNUS* sp.

No. 3480. A round purple late plum from the Kastamonu bazar, October 14.

121484. *PRUNUS* sp.

No. 2469. From Giresun, August 16. A small-fruited evergreen tree with broad shining dark-green leaves; fruit eaten both fresh and dried.

121485. *PRUNUS* sp.

No. 2468. From Giresun, August 16. A large-fruited evergreen tree with broad, shining, dark-green leaves; fruit eaten both fresh and dried.

121486. *PRUNUS* sp.

No. 733. From the Mugla bazar, May 28. Fruit eaten green.

121487. *PIMPINELLA ANISUM* L. Apiaceae.
Anise.

No. 1246. From the Bursa bazar, June 18.

121488. *RUMEX* sp. Polygonaceae.

No. 1758. From 25 km. southeast of Elaziz, July 13. So-called "spinak" used as a salad and cooked as greens.

121489. *PYRUS* sp. Malaceae.

No. 3472. A wild pear from near Inebolu, October 13.

121490 and 121491. *SORBUS DOMESTICA* L. Malaceae.
Servicetree.

For previous introduction see 62586.

121439 to 121491—Continued.

121490. No. 3481. *Oves*. From the Kastamonu bazar, October 14.

121491. No. 3075. From the Amasya bazar, October 7.

121492 to 121507.

From Paraguay. Collected by W. A. Archer, Bureau of Plant Industry. Received February 10, 1937.

Unless otherwise mentioned, the material was collected as seeds.

121492. *PSEUDANANAS MACRODONTES* (E. Morr.) Harms (*Ananas macrodentes* E. Morr.) Bromeliaceae.

No. 4907. *Abacachy Tupi*. From the Jardín Botánica, Santissima Trinidad, January 5, 1937. A semiwild form which produces the year round. The fruits are used for making wine and vinegar.

121493. *ARACHIS HYPOGAEA* L. Fabaceae.
Peanut.

No. 4881. A cultivated peanut from Tobatý, January 2, 1937.

121494. *ARACHIS MARGINATA* Gardn. Fabaceae.

No. 4758. From San Lorenzo, December 24, 1936.

For previous introduction and description see 119878.

121495. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae.
Watermelon.

No. 4878. From Caacupé, January 1, 1937. Fruit with yellow flesh.

121496. *CUCUMIS MELO* L. Cucurbitaceae.
Muskmelon.

No. 4884. From Tobatý, January 2, 1937. Fruit oval, brown and yellow striped, about 2 inches long, very aromatic but insipid flavor.

121497. *HIPPEASTRUM* sp. Amaryllidaceae.

No. 4914. From near Tobatý, January 2, 1937. Said to be a native species. The long-tubed, fragrant flowers are white with two pink stripes on each segment; there are 4 to 6 flowers in each umbel.

121498. *MIMOSA* sp. Mimosaceae.

No. 4820. From the Arroyo Tobatý, near Tobatý, January 1, 1937. A shrub about 10 feet high, with rose-colored flowers.

121499 to 121502. *NICOTIANA TABACUM* L. Solanaceae.
Common tobacco.

121499. No. 4880. *Carapé guazú*. From near Tobatý, January 2, 1937.

Nos. 121500 to 121502. Purchased from Banco Agrícola, Asunción, January 4, 1937, and are varieties distributed to farmers.

121500. No. 4915. *Chileno guazú*.

121501. No. 4916. *Carapé*.

121502. No. 4917. *Santa Elena*.

121503. *PHASEOLUS LUNATUS* L. Fabaceae.
Lima bean.

No. 4874. From Caacupé, January 1, 1937.

121492 to 121507—Continued.

121504. SOLANUM CHACOENSE Bitter. Solanaceae. Nightshade.

No. 4909. Tubers from the Jardín Botánico, Santísima Trinidad, January 5, 1937.

For previous introduction see 47972.

121505. VERBENA BONARIENSIS L. Verbenaceae.

No. 4821. From the Arroyo Tobatý, near Tobatý, January 1, 1937. A stiff, erect shrub 1 to 3 feet high, with purple-blue flowers.

For previous introduction see 97712.

121506 and 121507. ZEA MAYS L. Poaceae. Corn.

121506. No. 4876. From Caacupé, January 1, 1937. Cultivated corn.

121507. No. 4882. *Mais blanco*. From Tobatý, January 3. Cultivated especially for flour.

121508 to 121517.

From India. Bulbs and tubers collected by Walter Koelz, Bureau of Plant Industry. Received February 25, 1937.

121508 to 121512. ALLIUM SATIVUM L. Liliaceae. Garlic.

Nos. 121508 and 121509. *Lassan*. Bulbs from Benares, United Provinces, December 16, 1936.

121508. No. 1911.

121509. No. 1912. This is the first time I have seen this single bulb garlic here.

121510. No. 1923. Bulbs from Darjeeling, Bengal, December 23, 1936.

Nos. 121511 and 121512. Bulbs from Calcutta, January 4, 1937.

121511. No. 2117. Said to have come from Singapore.

121512. No. 2119. A local variety.

121513 and 121514. IPOMOEA BATATAS (L.) Lam. Convolvulaceae. Sweetpotato.

Shaker Kandi. Tubers from Calcutta, January 7, 1937. The sugar content is much less than in our species, and by some is preferred on that account.

121513. No. 2142. 121514. No. 2143.

121515 to 121517. SOLANUM TUBEROSUM L. Solanaceae. Potato.

Nos. 121515 and 121516. Tubers of *Alu*, from Benares, United Provinces, December 16, 1936. White potatoes which may be stored all through the summer heat. Best seed comes from the mountains.

121515. No. 1909. 121516. No. 1910.

121517. No. 2141. Tubers of *Alu* from Calcutta, January 7, 1937. Grown nearby at Behar.

121518 to 121541.

From Uruguay and Argentina. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 25, 1937.

121518 to 121521. ARACHIS HYPOGAEA L. Fabaceae. Peanut.

121518. No. 4952. From Real de San Carlos, 7 km. north of Puerto Colonia, Uruguay, January 17, 1937.

121518 to 121541—Continued.

121519 to 121521. Presented by the Ministerio de Agricultura, Buenos Aires, Argentina, January 22, 1937. All three strains are fairly pure selections.

121519. No. 5002. *Colorado*. From Río Cuarto, Cordoba.

121520. No. 5003. *Colorado*. From Santo Tomé, Santa Fé.

121521. No. 5004. *Aecitoso* or *Mani blanco*. From Santo Tomé, Santa Fé. A white-skinned type, considered the most important for oil extraction.

121522 to 121541. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

121522. No. 4971. From along the steep eroded river banks at Puerto Colonia, Uruguay, January 19, 1937.

Nos. 121523 to 121541 were presented by the Ministerio de Agricultura, Buenos Aires, Argentina, January 22, 1937.

121523 and 121524. *Criollo Salteño*.

121523. No. 5006. 121524. No. 5007.

121525 and 121526. *Chileno Colorado Hoja*.

121525. No. 5008. 121526. No. 5009.

121527 and 121528. *Chileno colorado gigante Santa Cruz*.

121527. No. 5010. 121528. No. 5011.

121529. No. 5012. *Lampazo*.

121530 and 121531. *Hoja Parada*.

121530. No. 5013. 121531. No. 5014.

121532 to 121535. *Criollo Colorado*.

121532. No. 5015. 121534. No. 5017.

121533. No. 5016. 121535. No. 5018.

121536 and 121537. *Chileno Grande Colorado*.

121536. No. 5019. 121537. No. 5020.

121538 and 121539. *Chileno Grande amarillo*.

121538. No. 5021. 121539. No. 5022.

121540 and 121541. *Chileno correntino*.

121540. No. 5023. 121541. No. 5024.

121542 to 121555. ORYZA SATIVA L. Poaceae. Rice.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 25, 1937.

A collection of rice from the Dacca Agricultural Farm, Dacca, Bengal, January 13, 1937.

121542. No. 2146. *Jhingasail*. A fine rice which, when transplanted in July, ripens in December. Said to have short awns and weak straw, hence liable to lodge; of superior quality and a good yielder.

121543. No. 2147. *Hatisail*. A fine, late, medium-yielding, scented, white rice; transplanted in July and August and ripening in December.

121544. No. 2148. An early rice of superior quality and a good yielder.

121545. No. 2149. *Latisail*. A small, coarse, heavy-yielding, medium-early rice with short straw; adapted to several types of soil.

121542 to 121555—Continued.

121546. No. 2150. *Chinsura*. A fine late medium-yielding scented white transplanted rice.

121547. No. 2151. *Dandkhani*. Described as a fine scented, late, medium-yielding, white, transplanted rice.

121548. No. 2152. *Bhasmank*. A transplanted rice of medium quality and high yield.

121549. No. 2153. *Dudshar*. A transplanted rice of medium quality and high yield, ripening in about 170 days.

121550. No. 2154. *Black Kachari*. A coarse, heavy-yielding transplanted rice.

121551. No. 2155. *India sail* (Aman type). A medium-late, good yielding, transplanted rice.

121552. No. 2156. *Kalai Aman*. A transplanted rice of which there are many forms that grow in the lowlands where the floods raise the water to a depth of 8 feet or more.

Nos. 121553 to 121555 are Aus types, sown on upland and watered well. The life period of this group ranged from about 90 to 125 days.

121553. No. 2157. An early scented rice, suited to rich light soils.

121554. No. 2160. *Dhairal*. A coarse, very heavy-yielding, highland, red rice.

121555. No. 2162. *Kumari*. A medium fine rice of good quality, and a heavy yielder; a broadcast, highland type.

121556. *AGONANDRA BRASILIENSIS* Benth. and Hook. f. Opiliaceae.

From Brazil. Seeds collected by Mr. Barlow at Maranhão, and presented through G. S. Jamieson, Bureau of Chemistry and Engineering. Received February 26, 1937.

A small tree with pendulous branches, thin elliptical leaves, and racemes of inconspicuous flowers. The drupaceous fruits, over an inch long, enclose seeds rich in oil. This oil, however, does not yet have any known use. Native to tropical Brazil.

121557 to 121577.

From Morocco. Plants presented by H. Brayard, Directeur, Service de l'Agriculture, Station Experimentale de Marrakech. Received February 27, 1937.

121557 to 121559. *MALUS SYLVESTRIS* Mill. Malaceae. Apple.

121557. *Delice d'Avril*.

121558. *Dubusson*.

121559. *Reinette Descadre*.

121560 to 121577. *PRUNUS* spp. Amygdalaceae.

121560 to 121568. *PRUNUS ARMENIACA* L. Apricot.

121560. *Amor Leuch*.

121561. *Bedri*.

121562. *Blanc*.

121563. *Jacques*.

121564. *Nouveau de Versailles*.

121565. *Pourret*.

121566. *Saint Ambroise*.

121567. *Souvenir de Roberteau*.

121557 to 121577—Continued.

121568. *Triomphe de Brüssières*.

121569 and 121570. *PRUNUS AVIUM* L. Sweet cherry.

121569. *Bigarreau Abel*.

121570. *Marmotte*.

121571 to 121574. *PRUNUS DOMESTICA* L. Common plum.

121571. *Bleu de Belgique*.

121572. *Early Laxton*.

121573. *Georges Lafèvre*.

121574. *Madeleine Nomblot*.

121575. *PRUNUS INSITITIA* L.

Mirabelle precoce.

121576 and 121577. *PRUNUS DOMESTICA* L. Common plum.

121576. *Royale*.

131577. *Saint Jean*.

121578 to 121649.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 15, 1937.

This material was collected in the summer and autumn of 1936, unless otherwise mentioned.

121578 and 121579. *ALLIUM CEPA* L. Liliaceae. Onion.

Pujaz. From Calcutta, January 3 and 4.

121578. No. 2106. A native red onion.

121579. No. 2111. Originally from Bombay.

121580 to 121582. *BRASSICA* spp. Brassicaceae.

121580 and 121581. *BRASSICA CAMPESTRIS* L. Rutabaga.

121580. No. 1913. *Phulgabi*. From Benares, United Provinces, December 16. An early native variety which will tolerate great heat.

121581. No. 1940. *Raisag*. From Darjeeling, Bengal, December 24, at 7,000 feet altitude. Grown in India as a potherb. The leaves, about 2 feet long, are tender and resemble chard in appearance.

121582. *BRASSICA* sp.

No. 2109. *Raisag*. From Calcutta, January 3. May be the same as that from Darjeeling under the same name.

121583 to 121588. *CAPSICUM ANNUUM* L. Solanaceae. Common redpepper.

121583. No. 1955. From Sukua, Bengal, December 28. Plants 4 to 5 feet high, found in rain forest; fruits red, very pungent.

121584. No. 1907. *Mirch*. From Benares, United Provinces, December 16. Fruit elongated, three-fourths of an inch by 3 inches and hot, turning almost black then red.

121585. No. 1927. From Darjeeling, Bengal, December 23, at 7,000 feet altitude. Fruit red, pointed, 3 inches long, 1 inch across at base; some types sweet except for strong seeds, others with pungent flesh.

121578 to 121649—Continued.

121586. No. 2077. *Mirch*. From Calcutta, January 1. Fruit 3 to 4 inches long by $1\frac{1}{2}$ to 2 inches wide, moderately hot.
121587. No. 2078. *Mirch*. From Calcutta, January 1. Fruit red, $2\frac{1}{2}$ inches to 3 inches long by three-fourths to 1 inch wide; pungent.
121588. No. 2110. *Mirch*. From Calcutta, January 4. A large red wild pepper.
- 121589 to 121592. *CITRULLUS VULGARIS* Schrad. Cucurbitaceae. Watermelon.
- Nos. 121589 and 121590. *Matira*. From Calcutta, January 1.
121589. No. 2082. 121590. No. 2083.
121591. No. 2084. *Tarbuз Gulenda*. From Calcutta, January 1. From the market.
121592. No. 2113. *Tarbuз Amta*. From Calcutta, January 4.
121593. *CORYLUS FEROX* Wall. Betulaceae. Hazelnut.
- No. 1966. From Darjeeling, December 25; said to have come from Yatung (Sikkim), at 13,000 feet altitude.
- For previous introduction see 93190.
- 121594 to 121601. *CUCUMIS SATIVUS* L. Cucurbitaceae. Cucumber.
121594. No. 2072. *Kakri*. From Siliguri, Bengal, December 28.
- Nos. 121595 to 121597. From Calcutta, January 2.
121595. No. 2095. *Khira*. A small black fruit.
121596. No. 2096. *Khira*. A large cucumber.
121597. No. 2097. *Kakri*. Possibly the long snaky form that is eaten when very small and is then a fine salad vegetable.
121598. No. 2112. *Patna Kakri*. From Calcutta, January 4.
121599. No. 1939. *Kankra*. From Darjeeling, Bengal, December 24, at 7,000 feet altitude. Fruit 2 feet long and weighing 6 to 7 pounds, tender, few-seeded, and of fine flavor. Appears to grow only in the mountains and is said to be of Sikkimese origin.
121600. No. 2116. *Khira*. From Calcutta, January 4.
121601. No. 2098. From Calcutta, January 2.
- 121602 to 121604. *CUCURBITA MAXIMA* Duchesne. Cucurbitaceae. Squash.
- From Darjeeling, Bengal, December 22 to 24, at 7,000 feet altitude.
121602. No. 1916. Fruit elongate, 2 feet long with widely spaced ribs; gray-green blotched with orange.
121603. No. 1917. Fruit pale green blotched with paler green, 20 inches long and ribbed.
121604. No. 1932. From the bazar.
- 121605 to 121612. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae. Cushaw.
- Nos. 121605 to 121607. From Darjeeling, Bengal, December 2, at 7,000 feet altitude.

121578 to 121649—Continued.

121605. No. 1934. From the market; fruit said to be huge.
121606. No. 1914. Fruit 18 inches in diameter, ribs conspicuous, buff with a bloom, half flattened.
121607. No. 1915. Fruit buff with bloom, oval, 18 inches long and irregularly ribbed.
121608. No. 2073. *Kadu*. From Sevak, Bengal, December 29.
- Nos. 121609 to 121611. From Calcutta, January 3.
121609. No. 2104. *Kadu*. Fruit brown, oval.
121610. No. 2105. *Kadu*. Fruit round, flattened, brown.
121611. No. 2114. *Lalkadu*. A red pumpkin.
121612. No. 1933. From Darjeeling, Bengal, December 24. From the bazar; fruit said to be large.
121613. *DOLICHOS LABLAB* L. Fabaceae. Hyacinth-bean.
- No. 2079. *Sem*. From Calcutta, January 1. Used as green pods, mostly.
121614. *LACTUCA DUBYAEA* C. B. Clarke. Cichoriaceae.
- No. 2002. From Darjeeling, December 25, but said to have come from Sikkim at 3,000 feet altitude.
- 121615 to 121617. *LUFFA* spp. Cucurbitaceae.
121615. *LUFFA ACUTANGULA* (L.) Roxb. Singkwa towelgourd.
- No. 2102. *Tori*. From Calcutta, January 3. Used as a vegetable when young.
- 121616 and 121617. *LUFFA CYLINDRICA* (L.) Roemer. Suakwa towelgourd.
121616. No. 1947. From Darjeeling, Bengal, at 2,000 feet altitude, December 24. A wild annual with spongy fruits 6 by 3 inches.
121617. No. 2103. *Tori*. From Calcutta, January 3. Esteemed as a vegetable when young.
121618. *MELOTHRIA* sp. Cucurbitaceae.
- No. 1938. From the Rangit River, Darjeeling District, Bengal, at 2,000 feet altitude. An annual with small globose brown-red fruits.
121619. *MELOTHRIA* sp. Cucurbitaceae.
- No. 1943. From the Rangit River, Darjeeling District, Bengal, at 2,000 feet altitude. An annual with small globose, madder-red fruits.
121620. *MELOTHRIA* sp. Cucurbitaceae.
- No. 2075. From Siliguri, Bengal, December 30. An annual with pealike globose red fruits.
- 121621 to 121624. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.
- Nos. 121621 to 121623. From Darjeeling, Bengal, at 7,000 feet altitude, December 23 and 24.
121621. No. 1924.
121622. No. 1935. Bought in the market.
121623. No. 1944. Used as green and also as dried beans.

121578 to 121649—Continued.

121624. No. 2099. From Calcutta, January 3. Used chiefly as green beans.

121625. *PYRUS* sp. Malaceae.

No. 1789. *Shegal*. From Kangra, Kangra, Punjab, November 22, at 2,500 feet altitude. A vigorous tree attaining a diameter of 12 to 18 inches. The flowers are usually white, but sometimes pink. An ornamental tree, but used chiefly as a stock for pears in warm regions.

121626. *RHEUM ACUMINATUM* Hook. f. and Thoms. Polygonaceae. Rhubarb.

No. 2012. Obtained at Darjeeling, December 25; said to have come from 14,000 feet altitude in Tibet.

For previous introduction see 114652.

121627. *RHEUM NOBILE* Hook. f. and Thoms. Polygonaceae. Rhubarb.

No. 2011. Obtained at Darjeeling, December 25; said to have come from a high altitude in Tibet. A handsome herbaceous plant with a stem 3 to 4 feet high and as thick as the wrist at the base. It is found in the inner ranges of the Sikkim Himalayas at altitudes between 13,000 and 15,000 feet. The root resembles that of the common rhubarb, but is spongy and inert. The acid stems are eaten both boiled and raw, and the dried leaves afford a substitute for tobacco.

For previous introduction see 115985.

121628. *RIBES GRIFFITHII* Hook. f. and Thoms. Grossulariaceae.

No. 2000. From Darjeeling, Bengal, December 25; said to have come from a nearby locality at 9,000 feet altitude.

121629 to 121635. *RUBUS* spp. Rosaceae.

121629. *RUBUS ALPESTRIS* Blume.

No. 2029. Obtained at Darjeeling, Bengal, December 25; said to have come from a nearby locality at 9,000 feet altitude.

121630. *RUBUS ELLIPTICUS* J. E. Smith. Yellow Himalayan raspberry.

No. 2027. Obtained at Darjeeling, December 25; grows at 7,000 feet altitude; fruit edible.

121631. *RUBUS LINEATUS* Reinw.

No. 1925. From Darjeeling, Bengal, December 23, at 8,500 feet altitude. A stout shrub 10 feet high, with palmate leaves and small red fruits.

For previous introduction see 115006.

121632. *RUBUS NIVEUS* Thunb.

No. 2028. Obtained at Darjeeling, Bengal, December 25; said to have come from 12,000 feet altitude in Sikkim.

For previous introduction see 115012.

121633. *RUBUS* sp.

No. 1989. From Darjeeling, Bengal, December 25, at 7,000 feet altitude. A stout climbing shrub with long cordate leaves.

121634. *RUBUS* sp.

No. 1942. From Tiger Hill, Darjeeling District, Bengal, December 23, at 9,000 feet altitude. A climbing shrub 12 feet high with trifoliate leaves and small red fruits.

121578 to 121649—Continued.

121635. *RUBUS* sp.

No. 1945. From Tiger Hill, Darjeeling District, Bengal, at 8,000 feet altitude, December 23. An attractive shrub 6 feet high, with large maplelike leaves and red fruits.

121636. *SOJA MAX* (L.) Piper. Fabaceae. Soybean.

No. 1936. From Darjeeling, Bengal, at 7,000 feet altitude, December 23.

121637 to 121646. *SOLANUM MELONGENA* L. Solanaceae. Eggplant.

From Calcutta, January 1 to 3.

121637. No. 2081. Fruit long, purple.

121638. No. 2087. *Aushey*. A late variety.

121639. No. 2088. *Singa*. A variety with long fruits.

121640. No. 2089. *Bengan Makra*.

121641. No. 2090. *Bengan Kuli*. A prolific variety.

121642. No. 2091. *Bengan Sufed*. A large white variety.

121643. No. 2092. *Bengan Mukakeshi*. A large sweet variety.

121644. No. 2093. *Bengan Baramusi*. An everbearing variety.

121645. No. 2094. *Bengan*. A mixed sample.

121646. No. 2101. *Bengan*. A round purple variety.

121647. *STIZOLOBIUM* sp. Fabaceae.

No. 2107. From Calcutta, January 5. Used as green beans.

121648. *TITHONIA DIVERSIFOLIA* (Hemsl.) A. Gray. Asteraceae.

121649. *VIGNA CYLINDRICA* (Stickm.) Skeels. Fabaceae. Catjang.

No. 2080. From Calcutta, January 1. Used as green beans.

121650 to 121659. *PRUNUS* spp. Amygdalaceae.

From the United States Plant Introduction Garden, Chico, Calif. Seedlings grown at the garden; numbered in March 1937.

121650 to 121657. *PRUNUS ARMENIACA* L. Apricot.

Nos. 121650 to 121653 were grown from P. I. No. 82672.

121650. Row 74, tree no. 40.

121651. Row 74, tree no. 42.

121652. Row 74, tree no. 44.

121653. Row 74, tree no. 46.

Nos. 121654 to 121657 were grown from P. I. No. 82677.

121654. Row 74, tree no. 27.

121655. Row 74, tree no. 28.

121656. Row 74, tree no. 33.

121657. Row 74, tree no. 36.

121658 and 121659. *PRUNUS CERASUS* L. Sour cherry.

Grown from P. I. No. 82678.

121650 to 121659—Continued.

121658. Row 70, tree no. 34.

121659. Row 74, tree no. 35.

121660 and 121661.

From the Union of Soviet Socialist Republics. Seeds presented by the Director, Botanical Institute, Tiflis, Georgia. Received February 20, 1937.

121660. *CYCLAMEN* sp. Primulaceae.

Received under the name "abchasicum," for which a place of publication has not been found.

121661. *HEDERA COLCHICA* Koch. Araliaceae. Colchis ivy.

A high-climbing vine with the young growth covered by golden-yellow scales, broadly cordate, almost entire, very large, bright-green leaves of firm texture, and small umbels of greenish-yellow flowers in paniculate clusters, followed by black fruits. Native to the Caucasus region.

For previous introduction see 115641.

121662 to 121667. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

From Canada. Seeds presented by T. F. Ritchie, Chief-Assistant, Dominion Horticulturist, Central Experimental Farm, Ottawa. Received March 2, 1937.

121662. *Abel.* 121665. *Globonnie.*121663. *Alacrity.* 121666. *Herald.*121664. *Bestal.* 121667. *Pink.*121668 to 121775. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.

From Kashmir, India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received March 2, 1937.

Nos. 121668 to 121745. Collected in Skardo, Baltistan Province, August 16 and 17, 1936, at 6,000 feet altitude.

121668. No. 1166. *Hangol.* Fruit golden yellow, 1¾ inches in diameter, sweet and firm; one of the best grown there.121669. No. 1167. *Blochuli.* Fruit yellow, 1¼ inches in diameter; ripens in the fall, of fair quality.121670. No. 1168. *Kapyuka.* Fruit almond-shaped, 1½ inches high, yellow with traces of a red cheek; quality fair.121671. No. 1169. *Badam Ohuli.* Fruit sweet, yellow, 1½ inches in diameter.121672. No. 1170. *Shaganda.* Fruit round; flesh salmon colored, firm, fairly sweet.121673. No. 1171. *Kustarpa.* Fruit golden yellow, sweet, almond-shaped; flesh firm.121674. No. 1173. *Karpo Shagunda.* Fruit yellow with pale-red cheek; flesh white, sweet; for eating fresh.121675. No. 1174. *Margholand.* Fruit 2½ inches in diameter, somewhat flattened, yellow with pale-red cheek. Flesh yellow; said to be excellent when eaten fresh.121676. No. 1175. *Bagdus.* Fruit 2 inches in diameter; flesh firm, sweet, yellow.121677. No. 1176. *Kakas.* Fruit somewhat flattened, yellow with red cheek, sweet; seed usually split.

121668 to 121775—Continued.

121678. No. 1177. *Badam Chuli.* Fruit yellow with red cheek, fairly sweet; seed often split in fruit.121679. No. 1178. *Wapuli.* Fruit golden yellow, red cheeked; flesh very sweet, firm; one of the best for drying.121680. No. 1178-A. *Wapuli.* Fruit golden yellow with red cheek; flesh very sweet, firm.121681. No. 1179. *Odomas.* Fruit yellow with purple red cheek, very sweet, one of the best.121682. No. 1180. *Ribu Chuli.* Fruit round, golden yellow with red cheek; flesh firm and good.121683. No. 1181. *Marposhagunda.* Fruit round, 2 inches in diameter, golden yellow with red cheek; sweet, firm.121684. No. 1182. *Karpoblo.* Fruit pale yellow with white flesh; seed sweet.121685. No. 1183. *Blo.* Fruit yellow with red cheek, 1½ inches in diameter.121686. No. 1184. *Oston.* Fruit almond-shaped, green with pale cheek; flesh white; a late variety.121687. No. 1185. *Ribu Chuli.* Fruit round, yellow firm.121688. No. 1186. *Starin.* Fruit round, golden yellow, firm, sweet, midseason.121689. No. 1187. *Shogun.* Fruit said to be early.121690. No. 1188. *Gurdalu Chuli.* An early variety.121691. No. 1189. *Sobkur.* An early variety.121692. No. 1190. *Azguak.* Fruit very large, seed bitter; said to be good.121693. No. 1191. *Kachha Chuli.* An early variety.121694. No. 1192. *Yakkar Chuli.* An early variety.121695. No. 1193. *Khustar.* An early variety.121696. No. 1194. *Ribu Chuli.* Fruit round, golden yellow with red cheek; flesh firm and good, like No. 1180 (P. I. 121682).121697. No. 1195. *Kardaksha.* An early variety.121698. No. 1196. *Apu.* An early sweet variety.121699. No. 1197. *Wapuli.* An early variety.121700. No. 1198. *Jimbata.* An early variety.121701. No. 1199. *Arghonfa.* An early variety.121702. No. 1200. *Halman.* A variety of No. 1272 (P. I. 121758). One of the types used for drying.121703. No. 1201. *Margholam.* Fruit pale yellow, 2 inches in diameter; not used for drying, eaten fresh.121704. No. 1202. *Khohalman.* Like the well-known *Halman*, but with bitter seeds.121705. No. 1203. *Muldung.* An early variety.

121668 to 121775—Continued.

121706. No. 1204. *Khablo*. An early variety, said to have bitter seeds.
121707. No. 1205. *Shara Karpo*. An early variety.
121708. No. 1206. *Margholam*. One of the best varieties.
121709. No. 1207. *Lumur*. Fruits very poor; cultivated for the kernels.
121710. No. 1208. (No name.) An early variety with sweet seeds.
121711. No. 1210. *Yakkar*. An early variety.
121712. No. 1211. *Makpura*. An early variety.
121713. No. 1213. *Dosopa*. No two trees of this variety have exactly the same sort of fruit.
121714. No. 1214. *Khoban*. An early variety.
121715. No. 1215. *Sharakopo*. Said to be very good.
121716. No. 1216. *Ribu Khustar*. An early variety.
121717. No. 1217. *Khustar*. An early variety.
121718. No. 1218. *Yakkar*. Said to be like No. 1210 (P. I. 121711), but with bitter seeds.
121719. No. 1219. *Khustarchakhanda*. An early variety.
121720. No. 1220. *Rambyun Margholam*. An early variety.
121721. No. 1221. *Stalarumi*. An early variety.
121722. No. 1222. *Omachikpa*. An early variety.
121723. No. 1223. *Karu Margholam*. An early variety with bitter seeds.
121724. No. 1224. *Ribu Wapah*. An early variety.
121725. No. 1225. *Badam Chuli*. An earlier sort of *Badam Chuli* than No. 1177 (P. I. 121678).
121726. No. 1226. *Karpo Chuli*. A good variety to be eaten fresh.
121727. No. 1227. *Khohalman*. A bitter-seeded form of the standard variety *Halman*.
121728. No. 1228. *Yakkir*. An early variety.
121729. No. 1229. *Dosopa*. An early variety.
121730. No. 1230. (No name.)
121731. No. 1231. *Blomargholam*. Fruit yellow with pink cheek. A late variety.
121732. No. 1232. *Blo*. Fruit round, deep yellow, 1½ inches in diameter, and sweet.
121733. No. 1233. Said to be a good early variety.
121734. No. 1245. *Galbat*. Fruit golden yellow, 2 inches in diameter, slightly compressed; used fresh.
121735. No. 1246. *Kakas*. An early variety.
121736. No. 1247. *Biru*. Said to be one of the best.

121668 to 121775—Continued.

121737. No. 1248. *Chull Karpo*. Fruit oval, 2 inches in diameter, yellow with a faint cheek, sweet and one of the best to be eaten fresh.
121738. No. 1249. *Arghon*.
121739. No. 1250. *Karing Karpo*. Fruit not seen, but name indicates white flesh.
121740. No. 1251. *Miting*. An early variety.
121741. No. 1254. *Hagulapa*. An early variety.
121742. No. 1255. *Stonkhoban*. Fruit quince-shaped, 2 inches in diameter, yellow, firm, good.
121743. No. 1256. *Shakanda*. Fruit 1½ inches in diameter, golden yellow with a red cheek, sweet; used as dried fruit.
121744. No. 1257. *Kapyuk*. Fruit 1½ inches in diameter, golden yellow with trace of cheek color; flesh firm and good.
121745. No. 1258. *Karpo Shaganda*. Fruit pale yellow, compressed and 2 inches high; slightly bitter, not sweet.
- Nos. 121746 to 121760 were collected at Shigar, Baltistan Province, from August 18 to 20, 1936, at 6,500 feet altitude.
121746. No. 1259. *Marshronpa*. Fruit 1½ inches in diameter, golden yellow with red cheek; flesh firm and sweet.
121747. No. 1261. *Astakhal*. Fruit 2 inches in diameter, yellow with faint pink cheek; flesh watery, not dried, but good for eating fresh.
121748. No. 1262. *Ba*. Fruit golden yellow with red cheek; flesh firm and sweet.
121749. No. 1263. *Siabas*. Fruit 1½ inches in diameter, golden yellow with red base; flesh sweet and not too dry.
121750. No. 1264. *Hangor*. Fruit orange color, 2 inches in diameter; flesh firm and sweet.
121751. No. 1265. *Jan*. Fruit 1½ inches in diameter, golden yellow, used fresh.
121752. No. 1266. *Ghulabi Chuli*. Fruit 1½ inches in diameter, orange with red cheek, sweet, used fresh only.
121753. No. 1267. *Bek*. Fruit 2 inches in diameter, compressed; flesh yellow, watery, bitter, and never used dried.
121754. No. 1268. *Khaban*. Fruit 1½ inches in diameter, orange, with firm sweet flesh.
121755. No. 1269. *Gurdalu*. Fruit kidney-shaped, 2 inches in diameter, bright yellow with pink cheek; used fresh.
121756. No. 1270. *Pacha Kalwa*. Fruit flattened, 1½ inches wide, golden yellow; used fresh.
121757. No. 1271. *Karpo Shaganda*. Fruit pale yellow with red cheek; flesh of fine texture with delicate flavor.
121758. No. 1272. *Halman*. Fruit 2 inches in diameter, orange with red cheek; flesh sweet and firm; one of the best.
121759. No. 1273. *Sonkaban*. Fruit 2 inches in diameter, quince-shaped, golden yellow with red base.
121760. No. 1274. Fruit 2 inches in diameter, white with red cheek; flesh sweet, not firm.

121668 to 121775—Continued.

121761. No. 1373. From Kampuk, Baltistan Province, at 9,000 feet altitude, September 8, 1936. Said to have edible seed. From a colder climate than the seeds collected in Shardo and Shigar (P. I. 121668 to 121760).

Nos. 121762 to 121769. Collected at Shigar, Baltistan Province, August 20, 1936, at 6,500 feet altitude.

121762. No. 1275. *Ghon*. Fruit 2 inches in diameter, golden yellow, eaten fresh.

121763. No. 1276. *Altik*. Fruit elliptical, 1½ inches high, golden yellow with red cheek; flesh sweet, used fresh.

121764. No. 1277. *Dul*. Fruit ripens in the fall; flowers said to be pink.

121765. No. 1278. *Biru*. Fruit 1 inch in diameter, orange with red cheek; flesh firm and sweet.

121766. No. 1279. *Min n*. Fruit top-shaped, 2 inches high, orange colored flesh good to eat fresh.

121767. No. 1288. Fruit 2 inches in diameter, orange colored with sweet firm flesh.

121768. No. 1294. *Andiar*. An early variety.

121769. No. 1295.

Nos. 121770 to 121772 were collected in the region around Kapalu, Baltistan Province, between 6,000 and 7,000 feet altitude, August 26, 1936.

121770. No. 1315. Fruit 1½ inches in diameter, quince-shaped, yellow with trace of red cheek; flesh sweet and firm.

121771. No. 1315-A. Fruit 1½ inches in diameter, globose, yellow with trace of pink cheek; flesh sweet and firm. No Baltistan apricots have the woody veins that characterize many of the imported varieties grown in the Himalayas.

121772. No. 1317. *Chuli*. Fruit 2 inches in diameter, globose, golden yellow with red cheek; flesh firm, but not very sweet.

Nos. 121773 and 121774 were collected at Kampuk, Baltistan Province, at 9,000 feet altitude, September 9, 1936.

121773. No. 1371. *Chuli*. Said to have sweet seeds.

121774. No. 1372. *Chuli*. Said to have sweet seeds.

121775. No. 1172. *Biru*. From Skardo, Baltistan Province, August 26, 1936. Fruit 1½ inches in diameter, yellow and very sweet.

121776. *PISTACIA VERA* L. *Anacardiaceae*. *Pistachio*.

From the United States Plant Introduction Garden, Chico, Calif. Seedlings grown at the garden; numbered in March 1937.

Row 11, Tree no. 20, Orchard "O." A seedling of P. I. 86372.

121777 to 121783. *ARACHIS* spp. *Fabaceae*. *Peanut*.

From South America. Material collected by W. A. Archer, Bureau of Plant Industry. Numbered in March 1937.

121777 to 121783—Continued.

121777. *ARACHIS GLABRATA* Benth. *Fabaceae*.

No. 3990-A. Plants from Campo Grande, Matto Grosso, Brazil, September 9, 1936. Found in rich black earth in the streets of the town. A dwarf perennial with a glabrous ascending stem, oblong-elliptic leaflets about one-half inch long, and small yellow flowers. Native to Brazil.

For previous introduction of seeds, see 118457.

121778. *ARACHIS* sp. *Fabaceae*.

No. 3965. Roots from Campo Grande, eastern Matto Grosso, September 2, 1936. From the streets of the town.

121779. *ARACHIS MARGINATA* Gardn.

No. 4429. Plants from the Posto Zootecnico, Tupacretan, Rio Grande do Sul, Brazil, November 11, 1936.

121780. *ARACHIS MARGINATA* Gardn.

No. 4439. Plants from along the road 12 km. north of Santa Anna, Rio Grande do Sul, Brazil, November 13, 1936. Common in sandy soil.

121781. *ARACHIS* sp.

No. 4624. Plants from along the road between Posados and Candelaria, Misiones, Argentina, December 10, 1936. Found in hard red earth, often in stony soil; in cultivated ground the plants are larger. They produce numerous underground rhizomes.

121782. *ARACHIS* sp.

No. 4664. *Mandubi*. From the streets of Villa Rica, Paraguay, December 16, 1936.

121783. *ARACHIS* sp.

No. 4851. Along the road between Caacupé and Tobaty, Paraguay, January 2, 1937. Found in white sandy soil.

121784 to 121798.

From the Union of Soviet Socialist Republics. Seeds presented by B. A. Vakar, Cytological Laboratory, Siberian Agricultural Institute, Omsk. Received March 3, 1937.

121784 to 121793. *AGROPYRON* spp. *Poaceae*.

121784. *AGROPYRON TRICHOPIHORUM* (Link) Richt.

No. 149.

For previous introduction see 116253.

121785. *AGROPYRON* sp.

No. 2. Received as "altaicum," for which a place of publication has not been found.

121786 and 121787. *AGROPYRON CRISTATUM* (L.) Gaertn. Crested wheatgrass.

121786. No. 245.

121787. No. 3.

121788. *AGROPYRON ELONGATUM* (Host) Beauv.

No. 564.

121789 and 121790. *AGROPYRON INTERMEDIUM* (Host) Beauv.

121789.

121790. No. 7.

121791. *AGROPYRON* sp.

No. 16.

121784 to 121798—Continued.

121792. *AGROPYRON* sp.

No. 513.

121793. *AGROPYRON* sp.

No. 8.

121794 to 121798. *TRITICUM* spp. Poaceae.
Wheat.

121794. *TRITICUM SPELTA* × *AGROPYRON*
GLAUCUM.

121795. *TRITICUM DICOCCUM FARRUM* ×
AGROPYRON GLAUCUM.

121796. *TRITICUM HORDEIFORME* × *AGRO-*
PYRON GLAUCUM.

121797. *TRITICUM DURUM* × *AGROPYRON*
GLAUCUM.

121798. *TRITICUM AESTIVUM FERRUGINEUM*
× *AGROPYRON GLAUCUM*.

121799. *FRAGARIA CHILOENSIS* (L.) Du-
chesne. Rosaceae.

Chiloe strawberry.

From Chile. Seeds presented through the
American consul at Valparaiso. Received
March 8, 1937.

Wild strawberries from the island of Juan
Fernandez.

For previous introduction see 62679.

121800 to 121819.

From India. Material collected by Walter
Koelz, Bureau of Plant Industry. Received
February 27, 1937.

This material was collected in 1936 and,
unless otherwise stated, was received as
seeds.

121800. *IRIS* sp. Iridaceae.

No. 1794. Root from Shalimar, Bagh,
Kashmir, November 25, 1936. Said to be
a tall wild species.

121801 to 121812. *ORYZA SATIVA* L. Poa-
ceae. Rice.

Nos. 121801 to 121805 were from the
Kulu District, Punjab Province.

121801. No. 1548. *Jhatu*. From Jagat-
suk, October 22, at 6,000 feet altitude.
A coarse red rice.

121802. No. 1637. *Jhatu*. From Samsi,
November 2. A good red, irrigated
rice with low heat requirements.

121803. No. 1638. *Mangoi*. From Samsi,
November 2. A white irrigated rice
with low heat requirements.

121804. No. 1639. *Jatr*. From Samsi,
November 22. A white rice growing
on dry ground.

121805. No. 1672. *Bansmatti*. From
Buntar, November 14. A fine-grained
white wet rice. Said to be a local
development of the first class *bans-*
matti from Dehra Dun.

Nos. 121806 to 121810 were obtained
from the Director of Agriculture, Kash-
tore, Kashmir Province.

121806. No. 1687. *Paddy Moshkabudji*.
(K. D. 15.)

121807. No. 1688. *Paddy Lolanzan*.
(K. W. 48.)

121808. No. 1689. *Paddy Badzag*. (K.
A. 78B.)

121800 to 121819—Continued.

121809. No. 1690. *Paddy Shirmal*. (K.
S. 17.)

121810. No. 1691. *Paddy Babar*. Se-
lection No. 19.

Nos. 121811 and 121812 were from
Lag. Kulu District, Punjab Province,
at 6,000 feet altitude.

121811. No. 1747. *Kala Mori*. Novem-
ber 8. A dry grown rice of low heat
requirement.

121812. No. 1748. *Mota Golgol*. No-
vember 15. A type of rice with low
heat requirement, broadcast on dry
soil.

121813 to 121818. *TRITICUM AESTIVUM* L.
Poaceae. Common wheat.

Nos. 121813 to 121815 were from Leh,
Ladak District, Kashmir Province, Septem-
ber 15 and 17, at 10,500 feet altitude.

121813. No. 1407. *Dromar*. A bearded,
red, spring wheat.

121814. No. 1408. *Droral*. A spring
wheat.

121815. No. 1409. *Drochen*. A good
strain of spring wheat.

121816. No. 1442. *Drokar*. From Miru,
Ladak District, at 14,000 feet altitude,
September 25, 1936. A strain of white
spring wheat grown near the cultiva-
tion limit.

Nos. 121817 and 121818 were from
Kolung, Lahul District, at 12,000 feet
altitude, October 10, 1936.

121817. No. 1556. *Drokar*. A bearded
white spring wheat.

121818. No. 1557. *Dromar*. A bearded
red spring wheat.

121819. *ZEA MAYS* L. Poaceae. Corn.

No. 1750. *Chelli*. From Kulu, Kulu
District, Punjab Province, November 16,
1936, at 4,000 feet altitude. Native corn
of the Kulu Valley. A monsoon crop.

121820. *PYRUS COMMUNIS* L. Malaceae.
Common pear.

From Pennsylvania. Scions presented by the
Pennsylvania State College, State College.
Received March 5, 1937.

Scions of a blight-resistant pear.

121821. *MANGIFERA INDICA* L. Anacar-
diaceae. Mango.

From the United States Plant Introduction
Garden, Coconut Grove, Fla. Seedlings
of P. I. 11645. Numbered March 10, 1937.

Tree 4, Row 1, Avocado Circle. The par-
ent of 121821 is in turn a seedling of P. I.
11645, a mango introduced from Cochin China
under the name *Mangifera cambodiana*, later
re-identified as *Mangifera indica*.

121822. *ERICA FERVIDA* L. Bolus. Erica-
ceae. Heather.

From England. Seeds presented by Sir Lio-
nel de Rothschild, London. Received
March 15, 1937.

An erect heath up to 2 feet high, with small
linear acute leaves and small, intensely red
flowers about one fourth of an inch long.
Native to Cape of Good Hope Province, South
Africa.

121823. DACTYLIS GLOMERATA L. Poaceae. Orchard grass.

From Sweden. Seeds presented by the Swedish Seed Co., Svalöf, through Dr. Hernfrid Witte, Director, the Swedish State Seed Testing Station, Stockholm. Received March 9, 1937.

121824. BETULA CYLINDROSTACHYA Wall. Betulaceae. Birch.

From India. Seeds presented by the Range Officer, Takdah, Darjeeling District, North Bengal, at the request of Walter Koelz, Bureau of Plant Industry. Received March 10, 1937.

A Himalayan birch, 50 to 60 feet high, which grows at altitudes of 5,000 to 10,000 feet along the northeastern border of India. The young branches are bright reddish brown and the ovate, acuminate leaves, dull dark green above and bright green beneath, are 2½ to 5 inches long. The wood is red, hard, and heavy and seasons well.

For previous introduction see 60640.

121825 to 121998.

From India. Seed collected by Walter Koelz, Bureau of Plant Industry. Received February 18, 1937.

This material was all collected in 1936.

121825. ABELMOSCHUS ESCULENTUS (L.) Moench. Malvaceae. Okra.

No. 1695. *Hava Blindi*. Presented by the Director of Agriculture, Kashmir Province. A variety which grows 8 feet high, with pods 7 to 9 inches long.

121826 to 121837. ALLIUM spp. Liliaceae.

121826 to 121831. ALLIUM CEPA L. Onion.

121826. No. 1331. *Tsong*. From Kapalu, Baltistan, Kashmir, August 26. A white, thin-skinned globe onion.

121827. No. 1370. *Tsong*. From Kampuk, Baltistan, Kashmir, September 9, at 9,000 feet altitude. A white thin-skinned globe onion of mild flavor, which is not injured by freezing.

121828. No. 1430. *Tsong*. From Leh, Ladak, Kashmir, September 16, at 10,500 feet altitude. A red onion.

121829. No. 1668. *Piyaz*. From Kulu, Kulu, Punjab, November 14, at 4,000 feet altitude. A mild red globe onion that is very pleasant to eat until mid-June, when it becomes strong; poor keeper.

121830. No. 1353. From Biokdang, Baltistan, Kashmir, at 9,500 feet altitude, September 3. An onion with fine round leaves 1 foot high, growing in clumps on a dry slope.

121831. No. 1413. Purchased at Leh, Ladak, Kashmir, September 16; originally from Yarkand. A strong onion, used to flavor soups.

121832. ALLIUM sp.

No. 1438. Purchased near Leh, Ladak, Kashmir, September 17, from a Yarkandi. An edible onion near Yarkand.

121833. ALLIUM sp.

No. 1545. *Tsong*. From Kolung, Lahul, Punjab, August 16 at 11,500 feet altitude. An almost leafless species with

121825 to 121998—Continued.

an inflated flower stalk and small head of white flowers. Bulb small, foliage used for flavoring.

121834. ALLIUM sp.

No. 1612. *Kotze*. From Pukar, Lahul, Punjab, in August, at 12,000 feet altitude. An onion with fine, rounded leaves and rose-purple flowers of possible ornamental use.

121835. ALLIUM sp.

No. 1729. Presented by the Director of Agriculture of Kashmir.

121836. ALLIUM sp.

No. 1613. *Ritsong*. From Kolung, Lahul, Punjab, in August. An onion with flat leaves 5 mm. wide and large heads of rose-purple flowers. Used for flavoring, also as an ornamental.

121837. ALLIUM THOMSONI Baker.

No. 1356. From Sdongpa, Baltistan, Kashmir, at 15,000 feet altitude, September 4. A Himalayan allium up to 2 feet high, with 4 to 5 fleshy linear leaves sheathing the lower third of a stout scape which bears a head, about an inch in diameter, of rose-purple flowers. Found growing in clumps on a dry slope.

121838. BETA VULGARIS L. Brassicaceae. Common beet.

No. 2100. *Palog*. From Calcutta, January 3. A potherb.

121839 to 121854. BRASSICA spp. Brassicaceae.

121839 and 121840. BRASSICA CAMPESTRIS L. Rutabaga.

121839. No. 1535. *Samsou*. From Koti, Kulu, Punjab, October 27. A variety planted for its oil-bearing seeds. The tough pungent roots are dried and used as food.

121840. No. 1700. *Zanundoz*. Presented by the Director of Agriculture, Kashmir. A large form.

121841 and 121842. BRASSICA OLERACEA GONGYLODES L. Kohlrabi.

Presented by the Director of Agriculture, Kashmir.

121841. No. 1699. A native variety with a very large white root.

121842. No. 1704. *Gandgobi*. A good purple variety.

121843 to 121847. BRASSICA RAPA L. Turnip.

121843. No. 1237. *Mulu*. From Skardo, Baltistan, Kashmir, August 16.

121844. No. 1304. *Mulu*. From Kapalu, Baltistan, Kashmir, August 25, a white, top-shaped root with purple top.

121845. No. 1398. *Nyungma*. From Leh, Ladak, Kashmir, at 10,500 feet altitude, September 16. A white turnip from Baltistan.

121846. No. 1401. From Leh, Ladak, Kashmir, at 10,500 feet altitude. An early purple variety.

121847. No. 1707. *Japanese Shogin*. From the Director of Agriculture,

121825 to 121998—Continued.

Kashmir. A large white winter variety with tender edible tops.

Nos. 121848 to 121852 were from Leh, Ladak, Kashmir, at 10,500 feet altitude, September 16 and 17.

121848. BRASSICA sp.

No. 1414. *Tram*. A good potherb.

121849. BRASSICA CAPESTRIS L.
Rutabaga.

No. 1420. *Yarkandi Salat*. Originally from Yarkand. A bushy annual whose leaves are picked and used as a potherb.

121850. BRASSICA sp.

No. 1421. *Yarkandi Salat*. Like No. 1420 (P. I. 121849), but from plants matured at Leh.

121851. BRASSICA CAPESTRIS L.
Rutabaga.

No. 1436. *Salat*. An interesting potherb that grows after the fashion of Swiss chard.

121852. BRASSICA sp.

No. 1441. *Yarkandi Tram*. A good potherb.

121853. BRASSICA sp.

No. 1621. *Tramyung*. From Kolung, Lahul, Punjab, at 12,000 feet altitude, in October. A large top-shaped, orange-yellow root.

121854. BRASSICA sp.

No. 1696. *Karm Sag*. Presented by the Director of Agriculture, Kashmir. An excellent potherb which grows like brussels sprouts, without the sprouts. The leaves are picked and new ones formed as the plant continues to grow taller.

121855 to 121859. CAPSICUM ANNUM L.
Solanaceae. Common red pepper.

121855. No. 1336. *Nirma*. From Surno, Baltistan, Kashmir, at 6,000 feet altitude, August 28. A very pungent fruit, 1 inch across at base and 2 inches long.

121856. No. 1697. *Mirch*. Presented by the Director of Agriculture, Kashmir. A native variety, long and very hot.

121857. No. 1706. *Cayenne Red*. Presented by the Director of Agriculture, Kashmir. A variety which produces well and is a good color.

121858. No. 1773. *Mirch*. From Kulu, Kulu, Punjab, at 4,500 feet altitude, November 12. A red pungent variety with fruits 2 to 3 inches long.

121859. No. 1787. *Pipli*. From Mandi, Mandi, Punjab, November 21. Fruit red, 1½ inches long, and considered one of the most pungent varieties when grown in Mandi; planted in Kulu, it is said to lose much of this quality.

Nos. 121860 to 121911 were collected in Baltistan Province, Kashmir, from August 16 to 26.

121860 to 121876. CITRULLUS VULGARIS
Schrad. Cucurbitaceae. Watermelon.

Nos. 121860 to 121863. *Bwar*. From Skardo, at 6,500 feet altitude, August 16.

121825 to 121998—Continued.

121860. No. 1142. Fruit globose, up to 10 inches in diameter, medium green, finely veined with darker green; rind very hard; flesh with no large air spaces, but with fine air spaces that give a crisp, firm, very agreeable character; flesh yellow and sweet, but very seedy.

121861. No. 1152. Fruit 11 inches long, pale green, finely netted with darker green; flesh pink, creamy with a delicate flavor; seeds large, otherwise a good novelty.

121862. No. 1162. Fruit globose, 1 foot in diameter, pale green with heavy blotched stripes of darker green; flesh red.

121863. No. 1163. Fruit globose, 11 inches in diameter, medium green mottled and faintly ribbed with darker green; rind thick; flesh coarse, red and sweet.

121864. No. 1164. *Bwar*. From Keris, at 6,500 feet altitude. Fruit globose, 1 foot in diameter, pale green veined with darker green; flesh yellow, sweet and very seedy.

121865 and 121866. *Bwar*. From Dagoni at 6,000 feet altitude. Fruit glabrous, 6 inches in diameter, green with blotched stripes of darker green; flesh white and insipid.

121865. No. 1305.

121866. No. 1305-A.

Nos. 121867 to 121869. *Bwar*. From Kapalu, at 6,000 feet altitude, August 26.

121867. No. 1308. Fruit globose, 6 inches in diameter, light green with blotched stripes of darker green; flesh white, faintly sweet, firm and crisp.

121868. No. 1313. Fruit globose, 6 inches in diameter, pale green with traces of fine veining; flesh white, crisp, fair.

121869. No. 1314. Fruit globose, 6 inches in diameter, dark green, unmarked; flesh red, insipid.

121870. No. 1339. *Bwar*. From Surmo at 6,000 feet altitude. Fruit globose, 10 inches in diameter, dark green, faintly blotched with paler green. Flesh red and sweet.

121871. No. 1341. Like 1339 (P. I. 121870) in appearance and quality, but with black seeds.

Nos. 121872 and 121873 were from Kapalu at 6,000 feet altitude.

121872. No. 1343. *Bwar*. A variety with red flesh.

121873. No. 1332. *Usse Bwar*; "mulberry watermelon."

Nos. 121874 and 121875 were from Leh, Ladak, September 16 and 17, at 10,500 feet altitude.

121874. No. 1419. Fruit globose, 10 inches in diameter, pale green, netted and striped with darker green; flesh red, low in sugar content.

121875. No. 1424. Fruit not seen.

121876. No. 1439. *Bwar*. From Kapalu, August 27 at 6,000 feet altitude.

121825 to 121998—Continued.

121877 to 121909. *CUCUMIS* spp. Cucurbitaceae.

121877 to 121905. *CUCUMIS* MELO L.
Muskmelon.

121877. No. 1323. *Ghon*. From the Raja's garden in Kapalu at 6,000 feet altitude. Flesh white, coarse, and sweet; said to be from Yarkandi seed.

Nos. 121878 to 121888 were from Skardo at 6,500 feet altitude.

121878. No. 1137. *Ber Ghon*. Fruits oval, 16 to 18 inches long, smooth with orange stripes and broken markings of dark green; flesh orange, but sometimes pale yellow; ripens early.

121879. No. 1138. *Ghon*. Fruit globose, 8 to 10 inches in diameter, smooth, unribbed, orange, marked with broken stripes and blotches of green; flesh thick, orange, sweet and pleasant.

121880. No. 1139. *Bwar*. Fruit globose to 10 inches in diameter, smooth, orange with more or less raised blotches of green; flesh thick, firm, and fragrant; no air space in cavity.

121881. No. 1145. Fruit oval up to 1 foot long, smooth, unribbed, pale yellow with lines of green; flesh thick, pale yellow, very sweet and agreeable; said to keep well; a casaba type.

121882. No. 1149. *Ston Ghon*. Fruit oval, elongate, pale yellow, usually unmarked; flesh orange, a bit fibrous, but fragrant and well flavored.

121883. No. 1150. *Naktrak*. Fruit subglobose, dark green, 1 foot long, heavily netted; flesh thick, orange with very good flavor; Persian melon type.

121884. No. 1151. Fruit oval, 1 foot long, blotched dark-green and orange, with traces of heavy veining; flesh orange, very good.

121885. No. 1157. Fruit oval, 1 foot long, furrowed, yellow; flesh green; casaba type, said to keep well.

121886. No. 1159. *Sarda*. Fruit very large, 18 inches long, heavily ribbed, smooth, green, mottled with orange.

121887. No. 1160. *Ston Ghon*. Fruit oval, 1 foot long, smooth but slightly furrowed, yellow; flesh green, not highly scented but sweet.

121888. No. 1161. *Shesgunn*. Fruit elongate, 1 foot long, faintly netted, green mottled with orange; flesh half green, half orange, very good.

121889. No. 1240. *Ghon*. From Saranica. Fruit 6 inches in diameter, slightly flattened, netted green and orange; flesh salmon or green, sweet.

121890. No. 1292. *Ghon*. From Shigar. Fruit elongate, 1 foot long, smooth, yellow; flesh white and sweet.

121891. No. 1293. *Ghon*. From Shigar. Fruit 8 inches in diameter, glabrous, faintly veined, mottled

121825 to 121998—Continued.

orange and green; flesh orange, sweet, no cavity.

Nos. 121892 to 121898 were from Kapalu, August 26 and 27 at 6,000 feet altitude. *Ghon*.

121892. No. 1307. Fruit globose, 3 inches in diameter, yellow, smooth, solid; flesh yellow to orange, sweet, not musky like the melons of southern India.

121893. No. 1309. Fruit elongate, 1 foot long, smooth, netted, orange yellow, faintly ribbed; flesh white, sweet, not musky.

121894. No. 1321. Fruit round, 4 inches in diameter, mottled orange and green, faintly netted; flesh thin, yellow, sweet.

121895. No. 1322. Fruit elliptical, 10 inches long, netted and ribbed, orange; flesh orange, sweet, good.

121896. No. 1324. Flesh orange, sweet; entire fruit not seen.

121897. No. 1325. Fruit oval, 14 inches long, green blotched with orange, faintly netted; flesh green, thick, sweet, very poor.

121898. No. 1330. Fruit smooth, unribbed, oval, 1 foot long, green flecked with orange; flesh orange or green, sweet, very good.

121899. No. 1335. *Ghon*. From Surmo at 6,000 feet altitude. Fruit globular, 10 inches in diameter, smooth, netted, green and orange; flesh thin, sweet, green.

121900. No. 1340. *Ghon*. From Surmo at 6,000 feet altitude. Fruit elongate, 1 foot long, green blotched orange, with trace of netting; flesh thick, salmon color, sweet and very fragrant.

121901. No. 1344. *Ghon*. Purchased at Kapalu August 28 at 6,000 feet altitude.

121902. No. 1345. *Ghon*. Purchased at Kapalu August 28 at 6,000 feet altitude. Said to be good.

Nos. 121903 to 121905 were presented by the Director of Agriculture, Kashmir.

121903. No. 1682. *Punjabi Sarda*. A sweet native melon of medium size.

121904. No. 1705. *Shalabagh*. A melon of fine flavor which is a good keeper.

121905. No. 1719. A native Kashmir melon of good quality; weight from 4 to 6 pounds.

121906 to 121909. *CUCUMIS* SATIVUS L.
Cucumber.

121906. No. 1016. From Sofor at 5,000 feet altitude; found as a weed in fields; fruits green with blotch stripes of darker green.

121907. No. 1289. *Laru*. From Shigar. August 20. Fruit 10 by 3 inches.

121908. No. 1346. Bought at Kapalu, at 6,000 feet altitude.

121825 to 121998—Continued.

121909. No. 1692. *Tar*. Presented by the Director of Agriculture, Kashmir. Described as from 2 to 3 feet long, of good quality.
- 121910 to 121930. *CUCURBITA* spp. Cucurbitaceae.
- 121910 to 121916. *CUCURBITA* MAXIMA Duchesne. Squash.
121910. No. 1680. *Etampes pumpkin*. From the Director of Agriculture, Kashmir. Said to be popular and sometimes to weigh 100 pounds.
121911. No. 1328. From Kapalu, at 6,000 feet altitude. Fruit 10 inches high, 18 inches across, ribbed, orange colored; flesh yellow, very good.
121912. No. 1629. *Kadu*. From Manali, Kulu, Punjab, October 28. Fruit pale gray, of Hubbard squash form; flesh not sweet like our squash; weight 10 to 15 pounds.
121913. No. 1631. *Kadu*. From Kulu, Kulu, Punjab, October 29. Fruit weighs 40 pounds, Hubbard squash form, orange-red with pale deep ribs; flesh not sweet, but the best of the Kulu squashes to eat.
121914. No. 1630. *Kadu*. From Manali, Kulu, Punjab, October 27. Fruit red-orange like our Hubbard squash, but not sweet; up to 15 pounds in weight.
121915. No. 1633. From Kulu, Kulu, Punjab, October 29. Fruit white, smooth, elongate, pointed at both ends or more or less rounded. Flesh not sweet and 2 inches thick; weight up to 60 pounds.
121916. No. 1628. From Koti, Kulu, Punjab, October 27. A good vegetable.
- 121917 to 121920. *CUCURBITA* MOSCHATA Duchesne. Cushaw.
121917. No. 1788. *Kadu*. From Jagendernaga, Mandi, Punjab, at 4,000 feet altitude, November 22. Fruit oval, 18 inches long, ribbed, green, veined and spotted with creamy buff; flesh sweet.
- Nos. 121918 and 121919 were from Kulu, Kulu, Punjab, October 29 and November 10, between 4,000 and 4,500 feet altitude.
121918. No. 1634. *Kadu*. Fruit to 16 inches wide, flattened by nearly half, creamy buff with conspicuous ribs; flesh very sweet.
121919. No. 1775. *Kadu*. Seed purchased and said to represent a type so far not collected on this trip.
121920. No. 1636. *Kadu*. From Kairain, Kulu, Punjab, October 31. A large fruit that looks like an *Etampes* pumpkin, smooth orange-red, 2 feet wide and 18 inches high, weighs up to 60 pounds.
- 121921 to 121929. *CUCURBITA* PEPO L. Pumpkin.
- Nos. 121921 to 121926. From the Baltistan Province, Kashmir, between 6,000 and 6,500 feet altitude, from August 14 to 27.

121825 to 121998—Continued.

121921. No. 1147. From Skard o. Fruit elongate to compressed, pale yellow; flesh not sweet; no fiber.
121922. No. 1284. *Kadu*. From Shigar. Fruit flattened, 7 inches across and 5 inches high, green and yellow mottled; flesh not sweet.
- Nos. 121923 to 121926. From Kapalu.
121923. No. 1310. *Wan*. Fruit elongate, 16 inches long, pale yellow, unribbed, and said to keep all winter when ripe; flesh not sweet, but a good vegetable.
121924. No. 1311. *Wan*. Fruit elongate, 16 inches long, orange yellow, veined more or less with green. This is the *Gangeri* of the lower Himalayas and resembles our summer squash.
121925. No. 1312. *Wan*. Fruit elongate, 18 inches long, green black, finely mottled with paler green, much like Nos. 1310 and 1311 (P. I. 121923 and 121924.)
121926. No. 1327. *Wan*. Fruit elongate, 16 inches long, blue green, finely veined darker. A variant of *Gangeri*, like Nos. 1310 to 1312 (P. I. 121923-121925).
121927. No. 1534. *Gangeri*. From Koti, Kulu, Punjab, October 27. Fruit elongate, 18 inches long, green and gray green. Eaten stewed, but is not so sweet as our squash or pumpkins.
121928. No. 1536. *Gangeri*. From Kyelang, Lahul, Punjab, at 10,500 feet altitude, October 19. A pale-yellow variety like No. 1534 (P. I. 121927), but ripens earlier.
121929. No. 1632. *Kadu*. From Kulu, Kulu, Punjab, at 5,000 feet altitude, October 29. Fruit salmon pink, Hubbard squash form, weighs 4 pounds; flesh pink, 2 inches thick, not sweet.
121930. *CUCURBITA* sp.
- No. 1347. *Bwan*. A mixed sample bought at Kapalu, Baltistan, Kashmir, at 6,000 feet altitude, August 28.
- 121931 to 121933. *DAUCUS* CAROTA L. Apiaceae. Carrot.
121931. No. 1429. *Sarakturmang*. From Leh, Ladak, Kashmir, September 16, at 10,500 feet altitude. A white-rooted form.
121932. No. 1244. From Shigar, Baltistan, Kashmir, August 18. A plant 3 feet high, found growing wild.
121933. No. 1252. From Safaranga, Baltistan, Kashmir. A cultivated vegetable with a large coarse white root.
121934. *DOLICHOS* LABLAB L. Fabaceae. Hyacinth-bean.
- No. 1683. *Lalsem*. Presented by the Director of Agriculture, Kashmir. A climber, sometimes 10 feet high, with tender fleshy pods, some of which have a fine flavor.
- 121935 to 121947. *LACTUCA* spp. Cichoriaceae.
- 121935 to 121940. *LACTUCA* SATIVA L. Garden lettuce.

121825 to 121998—Continued.

121935. No. 1318. *Dums*. From Kapalu, Baltistan, Kashmir, August 26.
121936. No. 1397. *Dums*. From Kam-puk, Baltistan, Kashmir. A cultivated variety.
121937. No. 1415. *Dums*. From Leh, Ladak, Kashmir, at 10,500 feet altitude, September 16. A variety which grows 7 feet high.
121938. No. 1425. *Dums*. From Leh, Ladak, Kashmir, at 10,500 feet altitude, September 16. A variety which grows 8 feet high.
121939. No. 1440. *Dums*. From Petuk, Ladak, Kashmir, September 19, at 10,000 feet altitude. A cultivated variety which grows between 6 and 7 feet tall.
121940. No. 1717. *Cos French White*. Presented by the Director of Agriculture, Kashmir. An early French variety with upright leaves of good quality.
121941. *LACTUCA* sp.
No. 1299. From Morungkor, Baltistan, Kashmir, at 9,000 feet altitude, August 23. A plant 3 feet high, with purple flowers, used as a field border.
Nos. 121942 and 121943. From Bordes, Baltistan, Kashmir, at 8,000 feet altitude, August 24.
121942. *LACTUCA* sp.
No. 1301. A plant 4 feet high, with purple flowers. Found on a dry slope.
121943. *LACTUCA* sp.
No. 1302. A plant 3 feet high, with yellow flowers. Found on a dry slope.
121944. *LACTUCA* sp.
No. 1503. *Katakumur*. From Kolung, Lahul, Punjab, at 11,000 feet altitude, in October. An annual up to 6 feet high, used as a potherb when young.
121945. *LACTUCA* sp.
No. 1540. From Rahla, Kulu, Punjab, at 9,000 feet altitude, October 27. An annual 4 feet tall, found at the edge of a stream in the fir forest.
121946. *LACTUCA* sp.
No. 1529. From the Rotang Pass, Kulu, Punjab, at 13,000 feet altitude, October 29. Found growing in clumps 12 to 18 inches high, on wet cliffs. The flower heads are large and purplish blue.
121947. *LACTUCA* sp.
No. 1350. From Banu, Baltistan, Kashmir, at 3,000 feet altitude, September 1. A bushy plant 18 inches high, with small yellow flower heads. Found on dry slopes.
- 121948 to 121953. *LACENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.
121948. No. 1286. From Shigar, Baltistan, Kashmir, August 25, at 6,500 feet altitude. Cultivated sparingly in the Shyok Valley to at least 9,000 feet altitude.
121949. No. 1489. Purchased at Kapalu, Baltistan, Kashmir, August 28, at 6,000 feet altitude. Cultivated sparingly in the Shyok Valley.

121825 to 121998—Continued.

121950. No. 1669. *Ghia*. From Bajaura, Kulu, Punjab, November 14, at 3,500 feet altitude. A smooth green and white gourd, sometimes over 2 feet long, with the neck somewhat bent at the tip. Eaten while immature.
121951. No. 1681. *Lamba Ghia*. Presented by the Director of Agriculture, Kashmir. A gourd 3 to 4 feet long, which weighs 6 to 8 pounds. Used as food while immature.
121952. No. 1685. *Gol Ghia*. Presented by the Director of Agriculture, Kashmir. A globular variety which weighs between 4 and 6 pounds; of good flavor.
121953. No. 1774. *Tumba*. From Kulu, Kulu, Punjab, November 10, at 4,500 feet altitude. A long-necked variety used for dippers.
121954. *LENS ESCULENTA* Moench. Fabaceae. Lentil.
No. 1780. *Kolt*. From Kulu, Kulu, Punjab, November 10, at 4,500 feet altitude. The seeds are used as food.
- 121955 to 121957. *LUFFA* spp. Cucurbitaceae. Towelgourd.
Presented by the Director of Agriculture, Kashmir.
121955. *LUFFA ACUTANGULA* (L.) Roxb. Singkwa towelgourd.
No. 1702. A good strain adapted to cool climates, esteemed as a vegetable.
- 121956 and 121957. *LUFFA CYLINDRICA* (L.) Roemer. Suakwa towelgourd.
121956. No. 1708. A fine vegetable.
121957. No. 1698. A whitish vegetable of fine flavor.
- 121958 to 121972. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.
Cultivated beans.
121958. No. 1163-A. From Skardo, Baltistan, Kashmir, August 16. A collection of garden beans; all are sown together.
121959. No. 1578. *Rong*. From Tinu, Lahul, Kashmir, in September, at 11,500 feet altitude. Probably of Indian origin.
Nos. 121960 to 121974. *Rong*. From Kulu Province, Punjab, from November 1 to 10, between 4,500 and 9,000 feet altitude.
121960. No. 1640. From Koti.
121961. No. 1641. From Koti.
121962. No. 1642. From Katrain. One of the commonest types in India.
121963. No. 1643. From Katrain.
121964. No. 1768. From Kulu.
121965. No. 1769. From Kulu.
Nos. 121966 to 121972. Types grown by one man.
121966. No. 1770. A mixed sample.
121967. No. 1770-A.
121968. No. 1770-B.
121969. No. 1770-C.
121970. No. 1770-D.

121825 to 121998—Continued.

121971. No. 1770-E.
 121972. No. 1770-F.
 121973. *VIGNA SINENSIS* (Torner) Savi.
 Fabaceae. Cowpea.
 No. 1779. *Burt*. From Kulu, Kulu,
 Punjab, November 10, at 4,500 feet alti-
 tude. Roasted and eaten like peanuts.
 121974. *PHASEOLUS VULGARIS* L. Fabaceae.
 Common bean.
 No. 1772. *Rong*. From Kulu, Kulu,
 Punjab, November 10, at 4,500 feet alti-
 tude.
 121975. *PICEA SMITHIANA* (Wall.) Boiss.
 Pinaceae. Spruce.
 No. 1660. *Rai*. From above Bandrole,
 Kulu, Punjab, November 14, at 8,000 feet
 altitude. An adaptable spruce, commonly
 growing to a diameter of more than 6 feet.
 For previous introduction see 116605.
 121976 to 121979. *PISUM SATIVUM* L. Faba-
 ceae. Pea.
 121976. No. 1411. *Shandil*. From Leh,
 Ladak, Kashmir, September 17, at
 10,500 feet altitude. Seeds used both
 green or dried.
 121977. No. 1165. *Mata*. From Bena-
 res, United Provinces, December 16.
 A winter crop with purple-madder
 flowers.
 121978. No. 1566. *Shrakkar*. From
 Kolung, Lahul, Punjab, October 11, at
 12,000 feet altitude. Used as food
 both fresh and dried.
 121979. No. 1554. *Srangnak*. From
 Kolung, Lahul, Punjab, October 10, at
 12,000 feet altitude. Planted for the
 seeds which are eaten like lentils.
 121980 to 121985. *RAPHANUS SATIVUS* L.
 Brassicaceae. Radish.
 121980. No. 1423. *Marpo Labuk*. From
 Leh, Ladak, Kashmir, September 16.
 A red radish, originally from Yarkand.
 121981. No. 1432. *Labuk Karpo*. From
 Leh, Ladak, Kashmir, September 16,
 at 10,500 feet altitude. A native
 white radish.
 121982. No. 1620. *Labuk*. From Ko-
 lung, Lahul, Punjab, in October, at
 12,000 feet altitude. A long white
 radish.
 Nos. 121983 to 121985. Presented by
 the Director of Agriculture, Kashmir.
 121983. No. 1703. *Muzapparabad*. A
 long white radish with a small top.
 121984. No. 1711. A native black rad-
 ish, 9 inches long and 5 inches in cir-
 cumference, grown for winter use.
 121985. No. 1714. *Muli*. A native win-
 ter radish, round, white, and turnip-
 like.
 121986 to 121989. *RHEUM* spp. Polygona-
 ceae. Rhubarb.
 121986. *RHEUM AUSTRALE* Don.
 No. 1731. From the Director of Ag-
 riculture, Kashmir.
 121987. *RHEUM* sp.
 No. 1363. From Brokdang Nulla,
 Baltistan, Kashmir, September 5, at

121825 to 121998—Continued.

- 12,000 feet altitude. Plant dry, stalk
 3 feet high; found at the edge of a dry
 watercourse.
 121988. *RHEUM* sp.
 No. 1444. *Aytzo*. From below Tak-
 lung Pass, Ladak, Kashmir, September
 26, at 15,000 feet altitude. A low, cold-
 tolerant and drought-tolerant form with
 leaves not more than 1 foot long; will
 stand freezing every day all summer.
 121989. *RHEUM* sp.
 No. 1518. From Kolung, Lahul, Pun-
 jab, August 15, at 11,000 feet altitude.
 A vigorous plant with edible petioles
 that under good conditions grow as large
 as those of our common rhubarb.
 121990 to 121993. *SOLANUM MELONGENA* L.
 Solanaceae. Eggplant.
 Nos. 121990 to 121992 were presented by
 the Director of Agriculture, Kashmir.
 121990. No. 1709. *Bengan*. A round,
 black native eggplant, growing to 3
 pounds weight and maturing 8 weeks
 after planting. The flesh is crisp with
 few seeds.
 121991. No. 1712. *Bengan*. A native
 variety, purple, 9 inches long and of
 excellent flavor, which matures in 7½
 weeks.
 121992. No. 1744. *Bengan*. A good
 purple variety, 12 inches long, which
 matures in 11 weeks.
 121993. No. 1776. *Shigotri*. From Kulu,
 Kulu, Punjab, November 10, at 4,500
 feet altitude. A red-purple, elongate
 sort, to about 4 inches long; grown
 in the rainy season.
 121994. *SPINACIA OLERACEA* L. Chenopodi-
 aceae. Common spinach.
 No. 1710. Presented by the Director of
 Agriculture, Kashmir. An early variety;
 slow to go to seed.
 121995 to 121997. *VICIA FABA* L. Fabaceae.
 Broadbean.
 Varieties cultivated for the seed which
 is used as food.
 121995. No. 1285. *Makshrang*. From
 Shigar, Baltistan, Kashmir, August 20.
 121996. No. 1434. *Shrangnak*. From
 Marsalong, Ladak, Kashmir, Septem-
 ber 24, at 11,500 feet altitude.
 121997. No. 1771. *Bali*. From Kulu,
 Kulu, Punjab, November 10, at 4,500
 feet altitude.
 121998. *VIGNA SINENSIS* (Torner) Savi.
 Fabaceae. Cowpea.
 No. 1786. *Rong*. From Mandi, Mandi,
 Punjab, November 21. Pods eaten green
 and beans stewed.
 121999. *SEMECARPUS* sp. *Anacardia-*
ceae.
 From New Caledonia. Seeds presented by
 Charles Jacques, secretary, Chamber of
 Agriculture, Noumea, through E. W.
 Brandes, Bureau of Plant Industry. Re-
 ceived February 25, 1937.
 A genus of tropical trees, closely related
 to *Anacardium*.

122000. ACACIA CYANOPHYLLA Lindl.
Mimosaceae. Blueleaf acacia.

From South Australia. Seeds presented by J. Howard Johnson, St. Peters. Received February 26, 1937.

For previous introduction see 48040.

122001 to 122033.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 27, 1937.

This material was all collected in 1936.

122001 to 122003. ASTRAGALUS spp. Fabaceae.

122001. ASTRAGALUS sp.

No. 1584. From Tinu, Lahul, Punjab, October 15, at 11,000 feet altitude. A perennial up to 5 feet in height, with attractive rose-purple flowers.

122002. ASTRAGALUS sp.

No. 1602. *Rangzu Guram Kyelang*. From Pukar, Lahul, Punjab, in August, at 2,000 feet altitude. *Wanie*, or "horse sugarcane." This name is applied to several species of *Astragalus* which grow 3 feet tall. They are more or less attractive ornamentals, and are all relished by horses.

122003. ASTRAGALUS sp.

No. 1446. *Tartagaon*. From Zingzingbar, Lahul, Punjab, October 8, at 13,000 feet altitude. A perennial about 1 foot high, with woolly leaves and a large inflated pod.

122004 to 122009. FAGOPYRUM ESCULENTUM Moench. Polygonaceae. Buckwheat.

122004. No. 1542. *Gangri*. From Bikri, Kulu, Punjab, October 31, at 6,000 feet altitude. Superior to the common Lahul races and a good yielder.

122005. No. 1547. *Banbrau*. From Kasar, at 11,000 feet altitude. A form of buckwheat that is raised chiefly in this locality; as it shatters easily it must be harvested before it is fully ripe.

122006. No. 1560. *Mita bres*. From Jalma, Lahul, Punjab, October 10, at 9,000 feet altitude. This is considered the best of the four kinds of Lahul buckwheat, but it is the poorest yielder, perhaps because there are no honeybees.

122007. No. 1568. *Drau*. From Kolung, Lahul, Punjab, October 10, at 12,000 feet altitude. A bitter variety, but the best yielder of all the Lahul buckwheats.

122008. No. 1570. *Bostor*. From Jalma, Lahul, Punjab, October 17, at 9,000 feet altitude. The earliest of the buckwheats, maturing in 90 days, but of poor quality, with a heavy husk.

122009. No. 1627. *Kattu*. From Koti, Kulu, Punjab, October 27. A buckwheat 4 feet tall, much like the Lahul *drau* (P. I. 122007), but not quite so good.

122010 to 122021. HORDEUM VULGARE L. Poaceae. Barley.

122010. No. 1355. *Nemas*. From Sdongpa, Baltistan, Kashmir, September 5, at 15,000 feet altitude. An early barley, 3½ feet high, with large heads, growing near the limit of cultivation.

122001 to 122033—Continued

122011. No. 1379. *Afangma*. From Karzong, Baltistan, Kashmir, September 13, at 15,000 feet altitude. Barley grown at the limit of cultivation.

122012. No. 1391. *Yangama*. From Leh, Ladak, Kashmir, September 15, at 10,500 feet altitude. The earliest variety, maturing in about 90 days.

122013. No. 1405. *Shirok Kapo*. From Leh, Ladak, Kashmir, September 16, at 10,500 feet altitude. A barley sown in the spring and harvested in September.

122014. No. 1406. *Soshirok*. From Tiktse, Ladak, Kashmir, September 18, at 11,000 feet altitude. An early barley and the only husk barley grown in the vicinity.

122015. No. 1410. *Yangnak*. Probably the same as No. 1391 (P. I. 122012). An early-maturing variety.

122016. No. 1433. *Shirok*. From Upshi, Ladak, Kashmir, September 24, at 13,000 feet altitude. A strain of barley grown near the cultivation limit.

122017. No. 1443. *Shirok*. From Gya, Ladak, Kashmir, September 25, at 15,000 feet altitude. A strain of spring huskless barley grown at the world's cultivation limit.

122018. No. 1549. *Salzot*. From Kolung, Lahul, Punjab, October 16, at 12,000 feet altitude. A huskless barley, of good yield; considered the best in the valley.

122019. No. 1551. *Sermo Ringruo*. From Kolung, Lahul, Punjab, October 12, at 12,000 feet altitude. One of the best barleys for yield and quality. Sown in May, harvested in September.

122020. No. 1555. *Tangzot*. From Ja'ma, Lahul, Punjab, October 20, at 9,000 feet altitude. An early barley, but a poor yielder.

122021. No. 1559. *Sermo Tuqun*. From Kolung, Lahul, Punjab, October 11, at 12,000 feet altitude. One of the best yielding barleys; sown in May, harvested in September.

122022. LOTUS sp. Fabaceae.

No. 1623. *Tuljima*. From Kolung, Lahul, Punjab, August, at 12,000 feet altitude. A low plant with fragrant yellow flowers and leaves.

122023 to 122029. MEDICAGO SATIVA L. Fabaceae. Alfalfa.

122023. No. 1283. *Buksup*. From Shigar, Baltistan, Kashmir, August 20; a cultivated variety.

122024. No. 1283-A. *Buksup*. From Shigar, Baltistan, Kashmir, August 16; a cultivated variety.

122025. No. 1303. *Buksup*. From Kapalu, Baltistan, Kashmir, August 25. A variety which grows between 4 and 5 feet high and gives two cuttings a season. The flowers are white, yellow, and purple.

122026. No. 1392. *Yarkandi Buksup*. From Leh, Ladak, Kashmir, September 17, at 10,500 feet altitude. A variety that grows 8 feet high, originally from Yarkand.

122001 to 122033—Continued

122027. No. 1393. *Buksup*. From Kam-puk, Ba'tistan, Kashmir, at 9,000 feet, September 9. A cultivated alfalfa.

122028. No. 1394. *Buksup*. From Kam-puk, Baltistan, Kashmir, September 9, at 9,000 feet altitude. A cultivated alfalfa.

122029. No. 1418. *Buksup*. From Leh, Ladak, Kashmir, September 16, at 10,500 feet altitude. An alfalfa that grows 8 feet high.

122030. MELILOTUS sp. Fabaceae.

No. 1561. From Kyelang, Lahul, Punjab, August 14, at 10,500 feet altitude.

122031. MEDICAGO SATIVA L. Fabaceae. Alfalfa.

No. 1565. *Lahuli Buksup*. From Kye-lang, Lahul, Punjab, August 18, at 10,500 feet altitude. A yellow-flowered form about 3 feet high; excellent as hay.

122032. MELILOTUS OFFICINALIS (L.) Lam. Fabaceae. Sweet clover.

No. 1596. From Pukar, Lahul, Punjab, August, at 12,000 feet altitude.

122033. NICOTIANA TABACUM L. Solanaceae. Common tobacco.

No. 1287. *Kara tsotma*. From Shigar, Baltistan, Kashmir. Tobacco is grown to 1,000 feet altitude in Lahul.

122034 to 122047.

From Argentina and Paraguay. Seeds and bulbs collected by W. A. Archer, Bureau of Plant Industry. Received February 17, 1937.

Unless otherwise mentioned, the material was received as seeds.

122034. ADESMIA BICOLOR (Poir.) DC. Fabaceae.

No. 4568. From the Jardín Botánico de la Facultad de Agronomía, Buenos Aires, Argentina, November 27, 1936. An erect or prostrate legume with yellow flowers. Native to South America, where it is used as a forage plant.

122035. ARISTOLOCHIA ELEGANS Masters. Aristolochiaceae. Cauliflower.

No. 4946. From the Jardín Botánico, Santissima Trinidad, Paraguay, January 9, 1937.

For previous introduction see 114861.

122036. HORDEUM sp. Poaceae.

No. 4790. *Cebada Paraguaya*. From Asunción, Paraguay, December 27, 1936. Seed used in making beverages.

122037. CHODANTHUS SPLENDENS (Bur. and Schum.) Hassler. Bignoniaceae.

No. 4923. From the Jardín Botánico, Santissima Trinidad, Paraguay, January 6, 1937. An ornamental evergreen woody climber with decussate, leathery leaves and racemes of 6 to 8 erect campanulate, more or less 2-lipped, yellow flowers. Native to southern Brazil.

122038. Cocos sp. Phoenicaceae.

No. 4919. From the Jardín Botánico, Santissima Trinidad, Paraguay, January 6, 1937.

122039. CYPELLA CORIFOLIA Baker. Iridaceae.

No. 4921. *Ruiberbo*. From the Jardín Botánico, Santissima Trinidad, Paraguay,

122034 to 122047—Continued

January 6, 1937. Bulb of a herbaceous perennial up to 3 feet high, with fleshy linear leaves and fugitive yellow flowers. Native to Paraguay.

122040. DIOCLEA PARAGUARIENSIS Hassler. Fabaceae.

No. 4912. *Curuguay*. From the Jardín Botánico, Santissima Trinidad, Paraguay, January 5, 1937. A shrubby twiner up to 60 feet long, with trifoliolate leaves and dense umbels of beautiful violet flowers. Native to Paraguay where the natives burnish pottery by rubbing it with the seeds.

122041. HYMENAEA STIGONOCARPA Mart. Caesalpinaceae.

No. 4947. *Yataibá*. From the Jardín Botánico, Santissima Trinidad, Paraguay, January 7, 1937. A tall evergreen tree with paired oblong leaflets 3 to 6 inches long and dense terminal clusters of white flowers. Native to Brazil.

For previous introduction see 19178.

122042. MELOTHRIA sp. Cucurbitaceae.

No. 4896. Along the road between Caacupé and Tobatý, Paraguay, January 2, 1937. A slender herbaceous climber about 6 feet long, with ovate-cordate leaves 2 to 3 inches long and small yellow flowers, solitary in the leaf axis. Native to Brazil.

122043. PANICUM PANTRICHUM Hack. Poaceae.

No. 4886. From Sierra de Tobatý, Paraguay, January 2, 1937. A slender, branching, spreading, perennial grass. Native to shady places in northern South America; said to resist some freezing.

122044. PASSIFLORA CAERULEA L. Passifloraceae. Bluecrown passionflower.

No. 4942. From Campo Grande near Jardín Botánico, Santissima Trinidad, Paraguay, January 9, 1937.

For previous introduction and description see 119823.

122045. PASSIFLORA MISERA H. B. K. Passifloraceae.

No. 4850. Along the road between Caacupé and Tobatý, Paraguay, January 2, 1937. A woody climber with cordate trilobed leaves about 1 foot long and solitary violet flowers about 1 inch across. Native to Colombia.

122046. SCOPARIA DULCIS L. Scrophulariaceae.

No. 4924. *Typychá Carátá*. Purchased in the market at Asunción, Paraguay, January 8, 1937. A glabrous annual 1 to 3 feet high.

For previous introduction see 110194.

122047. ZEA MAYS L. Poaceae. Corn.

No. 4877. From Caacupé, Paraguay, January 1, 1937. Cultivated corn.

122048 to 122152.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 16, 1937.

This material was all obtained at Darjeeling, December 23 to 25, 1936, unless otherwise mentioned.

122048 to 122152—Continued

122048. *TSUGA DUMOSA* (D. Don) Eichler.
Pinaceae. Hemlock.

No. 2017. A fine ornamental forest tree sometimes 120 feet high with gracefully drooping branches, native to northwestern India between 8,000 and 10,000 feet altitude.

For previous introduction see 108303.

122049. *ABIES SPECTABILIS* Lambert (A. webbiana Lindl.). Pinaceae.
Himalayan fr.

No. 2018. A tree sometimes 150 feet high, native to the Himalayas at altitudes between 7,000 and 13,000 feet. The dark-green leaves are arranged in two opposite series so as to leave a V-shaped opening along the top; the individual leaves are 1 to 2 inches long. The cones, about 5 inches long, are violet purple at first, later becoming brown.

For previous introduction see 102816.

122050 to 122053. *ACER* spp. Aceraceae.
Maple.

122050. *ACER CAMPBELLII* Hook. f. and Thoms.

No. 2052. Said to have come from nearby at 8,000 feet altitude.

122051 to 122053. *ACER CAUDATUM* Wall.

A large tree with dark-gray bark and 5-lobed, red-stemmed leaves from 2 to 5 inches long. The shiny, compact, moderately hard wood is white with a faint pink tinge. This maple is found in the temperate Himalayas between 7,000 and 11,000 feet altitude.

For previous introduction see 99709.

122051. No. 1969.

122052. No. 2004.

122053. No. 2044.

122054 to 122057. *ACONITUM* spp. Ranunculaceae.
Monkshood.

122054. *ACONITUM FEROX* Wall.

No. 2055. A plant with an erect stem 3 to 6 feet high, rounded, palmately trifid leaves cut into irregularly indented lobes. The large pale-blue flowers are in a dense terminal raceme. The root of this plant is used medicinally.

For previous introduction see 51744.

122055. *ACONITUM LURIDUM* Hook. f. and Thoms.

No. 1961. A perennial herb with simple erect stems 2 to 3 feet high, native to the alpine slopes of the Himalayas in India. The palmately 5-lobed leaves, 2 to 3 inches across, have coarsely crenate margins, and the dull-red flowers, borne in a simple raceme, have a long straight beak and a broad domelike dorsal prominence.

For previous introduction see 99713.

122056. *ACONITUM SPICATUM* (Brühl) Stapf.

No. 2054. A herbaceous perennial up to 6 feet high, with terminal racemes of many large pale-blue flowers. Native to the Himalayan region.

122057. *ACONITUM* sp.

No. 2056. An ornamental perennial, said to have come from Sikkim at high altitudes.

122048 to 122152—Continued

122058. *ALLIUM VICTORIALIS* L. Liliaceae.
Onion.

No. 1964. Obtained at Darjeeling, but grown in adjacent highlands at 14,000 feet altitude. One of the most distinctive European alliums, with stems about 2 feet high, leaves resembling those of the lily-of-the-valley, and white to greenish-white flowers.

For previous introduction see 110648.

122059. *ALLIUM WALLICHIANUM* Steud.
Liliaceae. Onion.

No. 1987. Grown near Darjeeling at 12,000 feet altitude. A tall eastern onion, native to Asia, with narrow flat leaves about 3 feet long and purple flower heads.

For previous introduction see 99715.

122060 and 122061. *ANEMONE* spp. Ranunculaceae.

Obtained at Darjeeling, but grown in the nearby highlands from 12,000 to 14,000 feet altitude.

122060. *ANEMONE POLYANTHES* D. Don.

No. 1990. An alpine anemone with stems 2 feet high, reniform or cordate leaves 2 to 4 inches across, and numerous white umbellate flowers about 1 inch in diameter. Native to the Himalayas at altitudes of 10,000 to 12,000 feet.

122061. *ANEMONE RIVULARIS* Buch.-Ham.

No. 1980. A silky pubescent ornamental from 1 to 3 feet high, with 3-parted basal leaves up to 6 inches in diameter and white or bluish flowers, over 1 inch long, in compound cymes.

For previous introduction see 102310.

122062. *ARENARIA CILIATA* L. Silenaceae.

No. 2035. Grown in Tibet at 14,000 feet altitude.

122063. *AMORPHOPHALLUS BULBIFER* Blume
Araceae.

No. 1953. A long-flowered species which may prove useful as an ornamental. From the Rangit River District, Darjeeling District, December 24, 1936, at 2,000 feet altitude.

122064. *ARISAEMA* sp. Araceae.

No. 1954. Obtained at Darjeeling, but grown along the Rangit River at 2,000 feet altitude, in a thicket. A plant with large scarlet seeds, on a stalk 6 inches high.

122065 to 122067. *ASTER* spp. Asteraceae.

Ornamentals grown in the nearby highlands from 12,000 to 14,000 feet altitude.

122065. *ASTER DIPLOSTEPHOIDES* (DC.) Benth.

No. 2036. A perennial 2 to 3 feet high, native to the alpine slopes of the Indian Himalayas up to 16,000 feet altitude. The entire lanceolate leaves are 2 to 3 inches long, and the solitary blue to blue-purple flower heads are 1 to 3 inches across.

For previous introduction see 99719.

122066. *ASTER STRACHEYI* Hook. f.

No. 2003. A dwarf, nearly stemless aster with radical obovate-spatulate leaves about 1 inch long and pale lilac-blue solitary flower heads about three-

122048 to 122152—Continued

fourths of an inch in diameter. Native to the western Himalayas at altitudes of 12,000 to 16,500 feet.

122067. *ASTER TRICEPHALUS* Clarke.

No. 1968. A small vigorous subtropical herbaceous perennial, with reddish flower heads. Native to Sikkim, India.

For previous introduction see 99653.

122068. *A. STILBE RIVULARIS* Buch.-Ham. Saxifragaceae.

No. 2006. Obtained at Darjeeling, but grown in Sikkim at 9,000 feet altitude.

For previous introduction see 46581.

122069. *BETULA* sp. Betulaceae. Birch.

No. 2042. Grown in Tibet at 13,000 feet altitude. An ornamental birch received under the name "balsamifera," for which a place of publication has not been found.

122070. *Berberis umbellata* Wall. Berberidaceae.

No. 1994. A hardy, half-evergreen shrub, native to the Himalayas, about 3 feet high, with reddish-brown grooved branchlets, obovate leaves an inch long, and umbellike racemes of yellow flowers which are followed by red berries.

For previous introduction see 80077.

122071. *Berberis* sp. Berberidaceae.

No. 1995.

122072. *Calceolaria gracilis* H. B. K. Scrophulariaceae.

No. 1946. An annual calceolaria about 18 inches high, with pinnate leaves and attractive yellow flowers about one-half inch long. Native to Ecuador.

122073. *Castanopsis indica* (Roxb.) A. DC. Fagaceae.

No. 2043. An evergreen tree with thin, leathery, oblong or obovate-oblong leaves 5 to 8 inches long. Native to the temperate Himalayan region and Assam.

122074. *Clintonia alpina* (Royle) Kunth. Convallariaceae.

No. 2047. Grown in Tibet at 13,000 feet altitude. A low perennial, native to the temperate slopes of the Himalayas in India. The lanceolate leaves are 4 to 9 inches long, and the small white funnel-shaped flowers are borne in a loose raceme on a scape 1 to 2 feet high.

For previous introduction see 99658.

122075. *Codonopsis thalictrifolia* Roxb. Campanulaceae.

No. 1956. Grown at 10,000 feet altitude in the hills of Sikkim or Tibet. An herbaceous perennial with flexuose stems ascending to sub-scandent, small ovate or reniform leaves, and solitary flowers about 1 inch long. Native to Nepal.

122076. *Coix lacryma-jobi* L. Poaceae. Jobs-tears.

No. 1930. Plants 6 feet high, found along a stream at 7,000 feet altitude near Darjeeling, Bengal.

122077 to 122080. *Cotoneaster* spp. Malacaeae.

122077. *Cotoneaster* sp.

No. 2013. Grown in Tibet at 13,000 feet altitude.

122048 to 122152—Continued

122078. *Cotoneaster* sp.

No. 2014. Grown at high altitudes in Sikkim.

122079. *Cotoneaster* sp.

No. 1921. A tree much like an apple tree in size and form, covered with large red berries; from 7,000 feet altitude.

122080. *Cotoneaster* sp.

No. 2057. A cultivated tree.

122081. *Crawfordia* sp. Gentianaceae.

No. 1929. A herbaceous twiner with large axillary, bell-shaped, blue-purple flowers and attractive maroon capsules, grown at 7,000 feet altitude.

122082. *Crepis depressa* Hook. f. and Thoms. Cichoriaceae.

No. 1963. Grown at 12,000 feet altitude.

122083. *Cynanchum vincetoxicum* (L.) Pers. Asclepiadaceae.

No. 2026. A white-flowered perennial 2 to 3 feet high, grown at 12,000 feet altitude in Sikkim.

122084. *Cynoglossum denticulatum* A. DC. Boraginaceae.

No. 2038. Grown at 9,000 feet altitude in Sikkim. A hardy perennial with small blue flowers in long open one-sided spikes and stems 1½ to 2 feet high. Native to India.

122085. *Datura arborea* L. Solanaceae. Floripondio.

No. 1937. A shrub or small tree, with ovate-lanceolate leaves and large trumpet-shaped, greenish-white, fragrant flowers. Native to Peru and Chile.

For previous introduction see 110925.

122086. *Delphinium vestitum* Wall. Ranunculaceae. Larkspur.

No. 1960. Grown at nearly 12,000 feet altitude. An alpine perennial with a hispid stem 1 to 3 feet high, palmately 5- to 7-lobed leaves sometimes a foot across, on long stems, and blue flowers in long dense racemes. Native to the temperate Himalayas from 8,000 to 12,000 feet altitude.

For previous introduction see 104368.

122087. *Deutzia corymbosa* R. Br. Hydrangeaceae.

No. 1996. A deutzia with pure-white flowers.

For previous introduction see 53696.

122088. *Erigeron* sp. Asteraceae.

No. 2022. Grown at high altitudes in Sikkim.

122089. *Euonymus* sp. Celastraceae.

No. 1825. From the Government gardens, Saharanpur, United Provinces.

122090. *Fritillaria stracheyi* Hook. f. Liliaceae.

No. 1999. A bulbous plant with narrow linear leaves 4 to 6 inches long on slender stems up to a foot in length and solitary pale-purple flowers 1½ to 2 inches long. Native to the Himalayan region at altitudes of 9,000 to 13,000 feet.

122048 to 122152—Continued

122091. *GENTIANA TIBETICA* King. Gentianaceae. Himalayan gentian.

No. 1997. An erect perennial 18 inches high, with oblong-ovate leaves 5 to 7 inches long and small dull yellowish-white axillary flowers an inch long. Native to Tibet.

For previous introduction see 80285.

122092. *GENTIANA SIKKIMENSIS* C. B. Clarke. Gentianaceae. Gentian.

No. 1998. A decumbent perennial, native to the Sikkim Himalayas at altitudes between 10,000 and 14,000 feet. The radical leaves are orbicular and those of the stem are elliptic to oblong, and 1 inch long. The tubular, funnel-shaped blue flowers, about 1 inch long, are in headlike clusters.

For previous introduction see 102315.

122093. *HYDRANGEA ANOMALA* D. Don (*H. altissima* Wall.). Hydrangeaceae.

No. 2039. A climbing shrub up to 15 feet high, with ovate leaves 3 to 6 inches long and large corymbs of white flowers. Native to Nepal at 4,000 to 10,000 feet altitude.

For previous introduction see 114753.

122094. *HYPERICUM* sp. Hypericaceae.

No. 2020.

122095. *ILEX INSIGNIS* Hook. f. Aquifoliaceae. Holly.

No. 1919. An evergreen holly, native to the Sikkim Himalayas, where it grows at 7,000 feet altitude. It forms a small tree or shrub with thick grooved branches which are purplish when young. The dark-green, leathery leaves, 5 to 9 inches long, are armed at the margins with small spine-tipped teeth. The bright-red, oval berries are nearly one-half inch long.

For previous introduction see 102906.

122096. *ILEX* sp. Aquifoliaceae. Holly.

No. 1920. A tree much like the American holly.

122097. *IMPATIENS* sp. Impatiensaceae.

No. 2009. From high altitudes in the Sikkim mountains.

122098. *IPOMOEA* sp. Convolvulaceae.

No. 1948. A woody vine, with large cordate leaves, bearing an abundance of orange capsules 1 inch in diameter.

122099. *IRIS CLARKEI* Baker. Iridaceae.

No. 2025. From the Sikkim Himalayas.

122100. *LACTUCA* sp. Cichoriaceae.

No. 2045. Grown in the Sikkim highlands at 13,000 feet altitude.

122101. *LACTUCA MACRANTHA* Clarke. Cichoriaceae.

No. 2046. A stout perennial lettuce up to 2 feet high, with large pinnatifid leaves and loosely paniced heads of blue flowers. Native to the Sikkim Himalayas at altitudes of 10,000 to 14,000 feet.

For previous introduction see 116593.

122102. *LIGULARIA* sp. Asteraceae.

No. 1957.

122103. *LIGUSTRUM CONFUSUM* Decaisne. Oleaceae.

No. 1962. A small tree up to 40 feet high, which is one of the tropical relatives

122048 to 122152—Continued

of the California privet (*Ligustrum ovalifolium*). The obtuse leathery leaves are about 9 inches long, and the small white flowers are in panicles 1 to 5 inches long.

For previous introduction see 116594.

122104. *LILIUM* sp. Liliaceae. Lily. No. 2021.

122105. *LOBELIA* sp. Campanulaceae.

No. 2048. From 12,000 feet altitude in the Sikkim Highlands. Received as *Lobelia erecta*, an invalid name.

122106. *LONICERA TOMENTELLA* Hook. f. and Thoms. Caprifoliaceae. Honeysuckle.

No. 2040. Grown at 12,000 feet altitude in the Sikkim Highlands.

122107 to 122109. *MECONOPSIS* spp. Papaveraceae.

Native to the Sikkim Himalayas between 10,000 and 12,000 feet altitude.

122107. *MECONOPSIS SINUATA* Prain.

No. 2031. An annual 1 to 2 feet high, with irregularly lobed, sparsely prickly leaves and blue flowers 2 to 3 inches in diameter.

122108. *MECONOPSIS PANICULATA* (Don) Prain.

No. 2032. A tall perennial, soft-hairy throughout, with yellow flowers in lax cymes, found on the slopes of the Himalayas of western India and Tibet.

For previous introduction see 111065.

122109. *MECONOPSIS SIMPLICIFOLIA* (Don) Hook. f. and Thoms.

No. 2030. A stemless annual or biennial, native to temperate regions of northern India. The ovate-lanceolate, toothed or entire leaves, 2 to 3 inches long, are in a tufted rosette from which rise the deflexed hairy scapes, 12 to 18 inches high, bearing solitary, poppylike, clear-blue flowers 3 inches across.

For previous introduction see 102320.

122110. *DESMODIUM FLORIBUNDUM* (D. Don) G. Don. Fabaceae.

No. 1967. A woody, thickly pubescent, Himalayan plant with very copious axillary and terminal racemes of pale pink or lavender flowers.

For previous introduction see 116598.

122111. *MICHELIA EXCELSA* Blume. Magnoliaceae.

No. 1971. A tall tree, native to the temperate Himalayas of northeastern India between 5,000 and 6,000 feet altitude. The long narrow leaves are silky, brown beneath, and the handsome white flowers are from 4 to 5 inches across.

For previous introduction see 116602.

122112. *MOMORDICA CHARANTIA* L. Cucurbitaceae.

No. 2085. *Karela*. From Calcutta, January 1, 1937.

122113. *OSBECKIA NEPALENSIS* Hook. Melastomaceae.

No. 2051. An evergreen shrub, native to the Himalayas, with a rough erect stem 18 inches high, opposite, lanceolate, rigid leaves, and large purplish-rose flowers in terminal and axillary panicles or corymbs.

For previous introduction see 47744.

122048 to 122152—Continued

122114 and 122115. MELASTOMA MALABATH-
RICUM L. Melastomaceae.

An attractive spreading shrub up to 6 feet high, with broad-lanceolate leaves about 4 inches long and showy purple flowers about 2 inches across and 1 to 5 in a cluster. Native to the East Indies.

122114. No. 2041.

122115. No. 2074. From Siliguri, Bengal, December 29, 1936.

122116. PHILADELPHUS sp. Hydrangeaceae.

No. 2007. Grown in the Sikkim Himalayas at 9,000 feet altitude.

122117. PIPTANTHUS NEPALENSIS (Hook.)
Sweet. Fabaceae.

No. 1981. A shrub 2 to 11 feet high, with palmately trifoliolate leaves made up of lanceolate leaflets 2 to 4 inches long; the yellow pea-shaped flowers, 1 inch long, are borne in dense racemes resembling bunches of grapes.

For previous introduction see 103464.

122118. POLYGONUM CAMPANULATUM Hook.
f. Polygonaceae. Fleecflower.

No. 2008. A hardy perennial of compact bushy habit with handsome foliage; during the summer and autumn it produces dense racemes of charming bell-shaped, fragrant rosy-white flowers. Native to the Sikkim Himalayas up to 10,000 feet altitude.

For previous introduction see 60252.

122119. POLYGONUM MOLLE D. Don. Poly-
gonaceae. Fleecflower.

No. 2015. Grown in the Sikkim Himalayas at 12,000 feet altitude. A shrubby perennial 2 to 3 feet high, with white flowers in large thyrselike terminal panicles. Allied to *Polygonum polystachyum*. Native to Nepal.

For previous introduction see 116608.

122120 to 122123. PRIMULA spp. Primula-
ceae. Primrose.

122120. PRIMULA ELWESIANA King.

No. 2066. A Himalayan primrose with ovate-lanceolate leathery leaves about 4 inches long and solitary violet flowers on scapes up to 6 inches high.

122121. PRIMULA KINGII Watt.

No. 2067. A glabrous perennial native to high altitudes in the Sikkim Himalayas. The elliptic-lanceolate, crenulate leaves, 2 to 3 inches long, are in a crowded rosette, and the slender scapes, 6 to 10 inches high, bear 4 or 5 claret-colored, funnel-shaped flowers nearly an inch across.

For previous introduction see 108996.

122122. PRIMULA STUARTII Wall.

No. 2068. A mealy or quite glabrous perennial herb, native throughout the alpine and subalpine Himalayas of India and Tibet at altitudes between 12,000 and 16,000 feet. The coriaceous oblanceolate leaves, with entire or crenulate margins, are 4 to 10 inches long, and the scapes, 12 to 18 inches high, bear loose umbels of light-yellow, drooping flowers.

For previous introduction see 115984

122123. PRIMULA sp.

No. 2069. Native to the Sikkim Himalayas at high altitudes.

122048 to 122152—Continued

122124. PRUNUS ACUMINATA (Wall.) Hook.
f. (*Laurocerasus acuminata* (Wall.)
Roemer). Amygdalaceae. Laurel cherry.

No. 1984. A slender-branched tree 30 to 40 feet high, with narrow leaves up to 7 inches long and many-flowered racemes of yellowish-white flowers. The fruit is a small oval drupe. The tree is found in central and eastern Himalayas at altitudes between 5,000 and 7,000 feet.

For previous introduction see 62811.

122125. PRUNUS CERASOIDES D. Don (*P.*
puddum Roxb.). Amygdalaceae.
Sikkim cherry.

No. 1974. An Indian cherry, native to the temperate slopes of the Himalayas, with sharply serrate, lanceolate leaves 3 to 5 inches long, umbels of pendulous, campanulate, rosy-red to white flowers, and red fruits half an inch long with scanty red or yellowish acid flesh.

For previous introduction see 77594.

122126. RHAMNUS sp. Rhamnaceae.

No. 2023.

122127 to 122131. RHODODENDRON spp.
Ericaceae.

122127. RHODODENDRON ARBOREUM J. E.
Smith. Tree rhododendron.

No. 2060. A bushy tree.

For previous introduction see 105908.

122128. RHODODENDRON DALHOUSIAE
Hook. f.

No. 2062. A large epiphytic evergreen shrub, native to the Sikkim Himalayas at altitudes of 6,000 to 8,000 feet. The oblanceolate to obovate, obtuse leaves, 2 to 6 inches long, are scaly and papillose beneath. The funnel-shaped, fragrant, white flowers, tinged with rose outside, are 3 to 4 inches long with five broad lobes.

For previous introduction see 102778.

122129. RHODODENDRON MADDENI Hook. f.

No. 2063. A shrub 6 to 8 feet high, with red-stemmed, dark-green leaves. The large, delicately fragrant flowers, tinged with rose, are produced in threes at the ends of the branches. Native to the Himalayas.

For previous introduction see 103139.

122130. RHODODENDRON sp.

No. 2059. Received under the name "umbellatum," for which a place of publication has not been found.

122131. RHODODENDRON sp.

No. 2064.

122132. ROSA MACROPHYLLA Lindl. Rosa-
ceae. Bigleaf rose.

No. 1975. A large nearly thornless bush, native to the temperate Himalayas up to 10,000 feet altitude. The compound leaves have 9 to 11 oblong to ovate leaflets 1 to 2 inches long, pubescent beneath, and the red flowers, 2 inches across, in clusters of 1 to 3, are followed by oblong-ovoid red fruits which are sometimes 2 inches long.

For previous introduction see 115986.

122048 to 122152—Continued

122133. *ROSA* sp.

No. 1976. From 12,000 feet altitude in nearby highlands.

122134. *SAMBUCUS EBULUS* L. Caprifoliaceae.

No. 1973. Received under the name "odorata" for which a place of publication has not been found.

122135. *SAUSSUREA* sp. Asteraceae.

No. 2037. Grown at 10,000 feet altitude in the Sikkim Himalayas.

122136. *SAXIFRAGA HOOKERI* Engl. and Irm-scher. Saxifragaceae.

No. 1991.

122137. *SAXIFRAGA DIVERSIFOLIA* Wall. Saxifragaceae.

No. 1992.

122138. *SENECIO SCANDENS* Buch-Ham. Asteraceae. Climbing groundsel.

No. 1993. An attractive autumn-flowering composite from the Himalayas, with a woody stem and climbing habit. The yellow flower heads are in few-flowered, loose, paniclelike clusters.

For previous introduction see 111089.

122139. *SENECIO* sp. Asteraceae.

No. 1970.

122140. *SMILAX FEROX* Wall. Smilacaceae.

No. 1941. A stout prickly shrub with ovate leathery leaves about 3 inches long and umbels of small red berries. Native to the Himalayas at altitudes of 5,000 to 8,000 feet.

For previous introduction see 111090.

122141. *SPIRAEA* sp. Rosaceae.

No. 1965. Grown at 12,000 feet altitude in nearby highlands.

122142. *STYRAX HOOKERI* C. B. Clarke. Styracaceae. Snowbell.

No. 1979. A tree often 40 feet high, native to Sikkim and Bhutan at altitudes between 6,000 and 7,000 feet. The white flowers, 1 inch long, are tomentose outside, and the young branches are stellate-pubescent. The wood is white, close grained, and moderately hard.

For previous introduction see 99754.

122143. *SWERTIA HOOKERI* C. B. Clarke. Gentianaceae.

No. 1978. Grown at 12,000 feet altitude in nearby highlands. A perennial herb with a thick hollow stem 2 to 4 feet high, native to the Sikkim Himalayas between 12,000 and 13,000 feet altitude. The elliptic long-petioled leaves are lanceolate; the nodding purple flowers with blue nerves, on pedicels 2 inches long, are borne in dense axillary cymes.

For previous introduction see 102330.

122144. *TALAUMA HODGSONI* Hook. f. and Thoms. Magnoliaceae.

No. 2050. A tall evergreen tree, related to *Magnolia*, with obovate-oblong leaves 8 to 20 inches long and large fragrant flowers with white petals and purple calyx. Native to the Sikkim Himalayas between 4,000 and 5,000 feet altitude.

For previous introduction see 39139.

122048 to 122152—Continued

122145. *THALICTRUM CHELIDONII* DC. Ranunculaceae. Meadowruie.

No. 2001. A handsome perennial 15 inches high, with pale-green foliage, pubescent beneath. The delicate silvery lavender flowers, over 1 inch across, are borne in graceful sprays. Native to the temperate Himalayas at altitudes between 8,000 and 12,000 feet.

For previous introduction see 111097.

122146. *THALICTRUM FOLIOLOSUM* DC. Ranunculaceae. Meadowruie.

No. 2005. A stiff erect perennial, 4 to 8 feet high, native to the temperate slopes of the Himalayas at altitudes of 5,000 to 8,000 feet. The pinnately compound leaves are made up of orbicular leaflets less than 1 inch across, and the white, pale-green, or dull-purple flowers are in much-branched panicles.

For previous introduction see 102332.

122147. *TRACHYSPERMUM* sp. Apiaceae.

No. 2076. A handsome evergreen climber with an abundance of fragrant white flowers.

122148. *TRACHYCARPUS MARTIANUS* (Wall.) Wendl. Phoenicaceae. Martius palm.

No. 2065. A slender-trunked, fan-leaved palm from the temperate regions of the Himalayas, where it grows to a height of 20 to 50 feet. The unarmed trunk bears at its summit a crown of rigid leathery roundish leaves 4 to 5 feet in diameter, which are cut about half way down into narrow 2-lobed segments. The yellow flowers, followed by blue fruits, are borne on a nodding spadix about a foot long.

For previous introduction see 99758.

122149. *TRICHOSANTHES* sp. Cucurbitaceae.

No. 1922. An attractive vine with orange to madder-red globose fruits, 6 inches in diameter.

122150. *VIBURNUM STELLULATUM* Wall. Caprifoliaceae.

No. 2016. A large evergreen shrub with elliptic-lanceolate leaves about 3 inches long and small red berries. Native to the Sikkim Himalayas.

For previous introduction see 116620.

122151. *VIBURNUM NERVOSUM* D. Don. Caprifoliaceae.

No. 2024. A large shrub or small tree with elliptic-oblong, shiny green leaves about 3 inches long and cymes of few small rose-colored flowers followed by purple-black drupes. Native to the Himalayas at altitudes of 10,000 to 13,000 feet.

For previous introduction see 119657.

122152. (Undetermined.)

No. 2071. A scandent perennial up to 25 feet high, covered in the fall with small red fruits.

122153 to 122156.

From Argentina and Uruguay. Seeds collected by W. A. Archer, Bureau of Plant Industry. Received February 25, 1937.

122153. *CUCURBITA ANDREANA* Naud. Cucurbitaceae.

No. 5005. From Córdoba, Argentina. Presented by Dr. L. R. Parodi, of the Fac-

122153 to 122156—Continued

ultad de Agronomía, Buenos Aires, in December 1936. A cucurbit related to the cushaw (*Cucurbita moschata*). The obovoid fruits, about 8 inches long, are marked with white and yellow. Native to Uruguay.

122154. *MEDICAGO DISCIFORMIS* DC. Fabaceae. Medick.

No. 4957. From Puerto Colonia, Uruguay, January 18, 1937.

For previous introduction see 90014.

122155. *PASPALUM Plicatulum arenarium* Arechav. Poaceae.

No. 4953. From Puerto Colonia, Uruguay, January 17, 1937. A perennial grass, native to South America, used as a binder on sand dunes.

122156. *SPARTIUM JUNCEUM* L. Fabaceae. Spanish broom.

No. 4969. From Puerto Colonia, Uruguay, January 18, 1937. A large round bush when grown in the open and is covered with light-yellow flowers.

For previous introduction see 110151.

122157 to 122206.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received February 26, 1937.

This material was all collected in 1936, unless otherwise mentioned.

122157. *ALLIUM* sp. Liliaceae. Onion.

No. 1348. From Pranu, Baltistan, Kashmir, September 1, at 8,000 feet altitude. Found growing in a field; an onion with rather fragrant white flowers one-half inch across.

122158 to 122165. *AMYGDALUS* spp. Amygdalaceae.

122158. *AMYGDALUS COMMUNIS* L. Almond.

No. 1238. *Badam*. From Skardo, Baltistan, Kashmir, August 17. The best variety grown in this district.

122159 to 122165. *AMYGDALUS PERSICA* L. Peach.

122159. No. 1249. *Tabushu*. From Skardo, Baltistan, Kashmir, August 16. A small tree said to live about 10 years. Fruit deep yellow with pink cheek, freestone, 2 inches in diameter; flesh white, rather watery.

122160. No. 1316. From Kapalu, Baltistan, Kashmir, August 26, at 6,000 feet altitude. Fruit greenish yellow with faint pink cheek, quince-shaped, freestone; flesh white, sweet, and of good flavor.

122161. No. 1319. From Kapalu, Baltistan, Kashmir, August 26, at 6,000 feet altitude. Fruit greenish yellow, freestone; flesh greenish yellow, coarse.

122162. No. 1329. From Kapalu, Baltistan, Kashmir, August 26, at 6,000 feet altitude. Fruit greenish yellow with trace of pink on cheek, 2½ inches in diameter, freestone; flesh yellow, very good flavor.

122163. No. 1342. From Marcha, Baltistan, Kashmir, August 29, at 6,000 feet altitude. Fruit yellowish green,

122157 to 122206—Continued

freestone, 2 inches in diameter; flesh yellow, sweet, of good flavor. Tree said to reach great age and size.

122164 and 122165. From Bandrole, Kulu, Punjab, November 14, at 6,000 feet altitude. Fruit small, white, and not of much account, but the large attractive tree is used as stock.

122164. No. 1657.

122165. No. 1658. *Aru*.

122166. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 1928. *Kubendi*. From Darjeeling, Bengal, December 23. Fruit elongate, 14 by 8 inches. Used for confections and also as a vegetable.

122167. *CAPSICUM ANNUUM* L. Solanaceae. Common redpepper.

No. 1908. From Benares, United Provinces, December 24.

122168. *CORYLUS COLURNA* L. Betulaceae. Tree hazelnut.

No. 1644. Collected by the Seraj Forest Department in the Seraj Forest, Kulu, Punjab, between 7,000 and 8,000 feet altitude. Trees up to about 4 feet in diameter, well formed and attractive.

122169. *CORYLUS COLURNA* L. Betulaceae. Tree hazelnut.

No. 1778. *Shirori*. Seeds collected by the Forest Department of Kulu Division, Punjab. A large tree growing from 7,000 to 9,000 feet altitude.

122170. *CUCURBITA PEPO* L. Cucurbitaceae. Pumpkin.

No. 1399. *Rghon*. From Leh, Ladak, Kashmir, September 16, at 10,500 feet altitude. A mixed sample.

122171. *FRAGARIA* sp. Rosaceae.

No. 934. From Koti, Kulu, Punjab, June 4, at 8,000 feet altitude. Fruits one-half inch in diameter, crimson, well-flavored, but a shy bearer.

122172. *JUGLANS REGIA* L. Juglandaceae. Persian walnut.

No. 1659. *Akhrot*. From Rupi, Kulu, Punjab, November 14, at 6,000 feet altitude. A good thin-shelled walnut, of which there are many types in the Kulu Valley.

122173. *JUGLANS REGIA* L. Juglandaceae. Persian walnut.

No. 1626. *Akrot*. From Rahla, Kulu, Punjab, at 10,000 feet altitude. A large forest tree, with a trunk up to 6 feet or more in circumference.

122174. *LAGENARIA LEUCANTHA* (Duchesne) Rusby. Cucurbitaceae. Calabash gourd.

No. 2108. *Lauki*. From Calcutta, January 3, 1937. A long sweet gourd.

122175. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 1931. Darjeeling, Bengal, December 24, at 7,000 feet altitude. Purchased in the market.

122176 to 122182. *MORUS* spp. Moraceae. Mulberry.

122176 to 122180. *MORUS ALBA* L. White mulberry.

From Skardo, Baltistan, Kashmir, August 16, at 6,500 feet altitude.

122157 to 122206—Continued

122176. No. 1167—A. *Karpo osse*. A sweet early variety.
122177. No. 1168—A. *Longrifino*.
122178. No. 1169—A. *Shah tut*. A sweet lavender variety.
122179. No. 1170—A. *Narzin osse*.
122180. No. 1171—A. *Gang osse*.
122181. *MORUS NIGRA* L. Black mulberry.
No. 1166—A. A delicious mulberry, sweet and juicy when mature.
- For previous introduction and description see 121453.
122182. *MORUS* sp.
No. 1158. Fruit 1 inch long, sweet, late, very good.
122183. *PHOENIX SYLVESTRIS* (L.) Roxb. Phoenicaceae. India date palm.
No. 2123. Presented by the Calcutta Botanic Garden, Calcutta, January 6, 1937.
122184. *POTENTILLA ATROSANGUINEA* Lodd. Rosaceae.
No. 1513. *Romentok*. From Tinu, Lahul, Punjab, September 16. An ascending or erect perennial, 2 to 3 feet high, growing in clumps and branching from the roots, with silvery digitate leaves and dark crimson, mahogany, or orange flowers three-fourths to over an inch in diameter. Native to the temperate Himalayas at altitudes of 6,000 to 12,000 feet.
- 122185 to 122195. *PRUNUS* spp. Amygdalaceae.
- 122185 and 122186. *PRUNUS ARMENIACA* L. Apricot.
From Shigar, Baltistan, Kashmir, August 16 and 20.
122185. No. 1291. Fruit round, reddish, 1½ inches in diameter; flesh sweet, liquid.
122186. No. 1260. Fruit round, greenish yellow, 1½ inches in diameter; flesh sweet, liquid.
122187. *PRUNUS CERASUS* L. Sour cherry.
No. 1435. From Shigar, Baltistan, Kashmir, August 19. A cherry much like our Montmorency in size, appearance, and taste, but the tree is less bushy.
- 122188 and 122189. *PRUNUS CORNUTA* (Wall.) Steud. Himalayan bird cherry.
A deciduous tree 50 to 60 feet high, native to the Himalayan region up to 10,000 feet altitude. The cylindrical racemes of small white flowers are followed by round red fruits, one-third of an inch in diameter, which become dark purple. Closely allied to *Prunus padus*.
- For previous introduction see 119232.
122188. No. 1564. *Krunn*. From Gunde, Lahul, Punjab, September 1, at 10,500 feet altitude.
122189. No. 1739. *Jamnoo*. From above Bandrole, Kulu, Punjab, November 14, at 10,000 feet altitude. A form of the Lahul *Krunn* and probably less hardy.
122190. *PRUNUS DOMESTICA* L. Common plum.
No. 1290. From Shigar, Baltistan, Kashmir, August 20. Fruit shaped like the German plum, 2 inches long.

122157 to 122206—Continued

- 122191 to 122194. *PRUNUS TOMENTOSA* Thunb. Manchur cherry.
122191. No. 1280. *Shogun*. From Shigar, Baltistan, Kashmir, August 20. An attractive small tree with curling bark; fruit very pale pink, hairy, not so good to eat as the red variety.
122192. No. 1281. *Shogun*. From Shigar, Baltistan, Kashmir, August 20, at 6,500 feet altitude. An attractive tree with curly bark; fruits red, hairy, one-half inch in diameter, pleasant to eat.
122193. No. 1320. *Shogun*. From Kapalu, Baltistan, Kashmir, August 26, at 6,000 feet altitude. An attractive tree with curly bark on trunk and branches; fruit hairy, red, three-fourths of an inch in diameter, pleasant flavor.
122194. No. 1326. *Shogun*. From Kapalu, Baltistan, Kashmir, August 26, at 6,000 feet altitude. Tree small, attractive with curly bark on trunk and branches; fruit very pale pink, edible.
122195. *PRUNUS* sp.
No. 1512. From Tinu, Lahul, Punjab, October 10, at 11,000 feet altitude. A low shrub to 2 feet high, with small red fruits. Found in dry situations; fruits sparingly.
- 122196 to 122201. *RIBES* spp. Grossulariaceae.
122196. *RIBES ORIENTALE* Desf.
No. 1457. *Nyanka*. From the upper Bhaga Valley, Lahul, Punjab, October 8, at 11,000 feet altitude. A well-formed dense shrub up to 5 feet high, found on dry slopes; fruit yellow to orange yellow, sweet, less than half an inch in diameter.
- For previous introduction see 58639.
122197. *RIBES RECLINATUM* L. European gooseberry.
No. 1465. *Pilitse*. From Kolung, Lahul, Punjab, October 10 at 12,000 feet altitude. Bush dense, well formed, up to 6 feet high; fruit orange, hirsute, pleasantly but strongly acid, much like a gooseberry. Used here as we use lemons or oranges.
- 122198 and 122199. *RIBES RUBRUM* L. Currant.
Rasta. A shrub, found usually in damp situations, up to 4 feet tall, fruits one-half inch in diameter, black with purple-red juice, acid.
- For previous introduction see 40478.
122198. No. 1458. From the Upper Bhaga Valley, Lahul, Punjab, at 12,000 feet altitude.
122199. No. 1609. From Pukar, Lahul, Punjab, at 12,000 feet altitude.
122200. *RIBES* sp.
No. 1114. From above Sodpur, Baltistan, Kashmir, August 10, at 12,500 feet altitude. Bush spreading, up to 4 feet high; fruit one-half inch in diameter, reddish black, fragrant; flavor pleasant, but slightly acid; seeds small.

122157 to 122206—Continued

122201. RIBES sp.

No. 1563. *Rupshu*. From Tinu, Lahul, Punjab, October 16, at 10,500 feet altitude. Bush low, to 3½ feet high, found in damp situations; fruit about one-half inch in diameter, greenish; flavor subacid; seeds small.

122202 to 122204. RUBUS spp. Rosaceae.

122202. RUBUS NIVEUS Thunb.

No. 1746. *Sura chlanch*. Purchased from the Director of Agriculture, Kashmir.

122203. RUBUS PURPUREUS Bunge.

No. 1517. *Kantakari*. From Pukar, Lahul, Punjab, September 1, at 12,000 feet altitude. A raspberry about 3 feet high, with usually trifoliate leaves 2 to 4 inches long and red fruits with a pleasant flavor. Native to eastern Asia.

122204. RUBUS sp.

No. 1647. From Jangi, Rampur-Bashahr, July 18 at 9,000 feet altitude.

122205. VITIS VINIFERA L. Vitaceae.
European grape.

No. 1369. From Surmo, Baltistan, Kashmir, August 28, at 9,000 feet altitude. Fruits blackish, elliptical, about 1 inch long, bunches large, 1 foot long; seed coats in most fruits so thin as to give the impression of the fruits being seedless.

122206. VITIS sp. Vitaceae. Grape.

122207 to 122413.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 21, 1937.

This material was all collected in the summer and autumn of 1936.

122207. ACANTHUS sp. Acanthaceae.

No. 3437. From Alma Dag, June 28.

122208. ADONIS sp. Ranunculaceae.

No. 3317. A wild plant from near Ankara, May 18.

122209. ADONIS sp. Ranunculaceae.

No. 3401. From Ankara, June 25. A plant with red, pink, and yellow flowers.

122210. ANCHUSA AZUREA Mill. Boraginaceae.

No. 3397. From Ankara, June 25. Flowers light blue with white center.

122211 to 122214. ALLIUM spp. Liliaceae.

122211. ALLIUM sp.

No. 1568. From 40 km. southeast of Diyarbekir, July 7. Low plants with pink to lavender flowers.

122212. ALLIUM sp.

No. 1584. From 40 km. southeast of Diyarbekir, July 7. Tall plants with large heads of white flowers.

122213. ALLIUM sp.

No. 2984. From the Kutahya bazar, September 28. Grown for the extra large purplish flower heads.

122214. ALLIUM sp.

No. 1249. *Cheragate*. From the Bursa bazar, June 18.

122207 to 122413—Continued

122215. AMARANTHUS sp. Amaranthaceae.

No. 2867. From the sea beach, 1 km. west of Yalova, September 12.

122216. ANCHUSA sp. Boraginaceae.

No. 2265. From 25 km. east of Erzincan, August 9.

122217. ANTHEMIS sp. Asteraceae.

No. 2803. From south of Dyke, at the summit of Ulu Dag, August 9. A small perennial with white flowers.

122218. ANTHEMIS sp. Asteraceae.

No. 2773. From Ulu Dag, 39 km. east of Bursa. A low perennial found growing in clumps. The white flowers appear early.

122219 to 122224. ANTIRRHINUM spp. Scrophulariaceae. Snapdragon.

122219. ANTIRRHINUM sp.

No. 2193. From 95 km. southeast of Susheri, August 7.

122220. ANTIRRHINUM sp.

No. 2628. From 34 km. southwest of Samsun, August 24.

122221. ANTIRRHINUM sp.

No. 595. From the Antalya bazar, June 4.

122222. ANTIRRHINUM sp.

No. 819. From the ruins of Ephesus, May 24. A perennial abundant on the rock walls of the ruins. Flowers deep and light pink, a mixed sample.

122223. ANTIRRHINUM sp.

No. 1135. From the ruins of Ephesus, June 12. A perennial with deep-pink flowers.

122224. ANTIRRHINUM sp.

No. 1137. From the ruins of Ephesus, June 12. A perennial with pale-pink flowers.

122225. AQUILEGIA sp. Ranunculaceae.

No. 611. From the Antalya bazar, June 4.

122226. ARBUTUS ANDRACHNE L. Ericaceae.

No. 3488. From between Haydarpasha and Shile, October 25. An evergreen shrub with large glossy-green leaves and abundant clusters of white or pale-pink flowers in October; fruits bright red, three-fourths to 1 inch in diameter, maturing the following fall. A very attractive shrub, common in the hills and mountains of western Turkey.

For previous introduction see 109035.

122227. ASPARAGUS sp. Convallariaceae.

No. 2656. From 66 km. southeast of Merzifon, August 25. A wild, semi-climbing asparagus with long coarse leaves.

122228. ASPARAGUS sp. Convallariaceae.

No. 2826. From Yalova Kaplijalari, August 11. A prickly, woody variety.

122229. ASTRAGALUS sp. Fabaceae.

No. 1512. From 25 km. east of Gaziantep, July 5.

122207 to 122413—Continued

122230. *BEGONIA SEMPERFLORENS* Link and Otto. Begoniaceae.

No. 1275. From the Bursa bazar, June 18. A low bushy succulent begonia with ovate leaves and few-flowered axillary clusters of white or rose-colored flowers. Native to Brazil.

122231. *BEGONIA TUBEROSA* Lam. Begoniaceae.

No. 1263. From the Bursa bazar, June 18. A herbaceous perennial about 6 inches high, with white flowers. Native to the East Indies.

122232. *BERBERIS* sp. Berberidaceae. **Barberry.**

No. 2316. From 24 km. north of Gemushane, August 10. A large shrub with red fruits.

122233. *BERBERIS* sp. Berberidaceae. **Barberry.**

No. 2414. From 29 km. west of Rize, August 13. A barberry with small red berries in clusters.

122234 to 122236. *BETA VULGARIS* L. Chenopodiaceae. **Common beet.**

122234. No. 2379. From the Trabzon bazar, August 11. Sugar beets.

122235. No. 3240. From the Adapazari bazar, October 20. Sugar beets.

122236. No. 3168. Sugar beets from the Kastamonu bazar, October 14.

122237 to 122247. *CAMPANULA* spp. Campanulaceae.

122237. *CAMPANULA* sp.

No. 1302. Tall bluebells from the hills 30 km. east of Bursa, June 19.

122238. *CAMPANULA* sp.

No. 1755. Bluebells from 30 km. southeast of Elaziz, July 13.

122239. *CAMPANULA* sp.

No. 1078. From Bergama, June 10.

122240. *CAMPANULA* sp.

No. 1117. From near Kirkagach, June 11.

122241. *CAMPANULA* sp.

No. 1141. From walls in the ruins of Ephesus, June 12.

122242. *CAMPANULA* sp.

No. 1269. From the Bursa bazar, June 18.

122243. *CAMPANULA* sp.

No. 2331. From 60 km. south of Trabzon, August 10.

122244. *CAMPANULA* sp.

No. 2382. From 60 km. south of Trabzon, August 10. A variety with very large clusters of beautiful blue flowers.

122245. *CAMPANULA* sp.

No. 2457. From 60 km. south of Trabzon, August 10. A variety with white flowers.

122246. *CAMPANULA* sp.

No. 2473. From 75 km. south of Giresun, August 17. A variety with large clusters of blue flowers.

122207 to 122413—Continued

122247. *CAMPANULA* sp.

No. 2486. From 40 km. south of Giresun, August 18. A large plant with light and dark-blue flowers in clusters.

122248. *MENTHA PULEGIUM* L. Menthaceae.

No. 2815. From Yalova Kaplijalari, September 11. A prostrate, much-branched mint with small oval leaves and dense axillary whorls of small bluish-lilac flowers. Native to Europe and Asia.

122249. *CAMPANULA* sp. Campanulaceae.

No. 2979. From the ruined walls of Ephesus, September 25. A perennial with large pale-blue flowers.

122250. *CENTAUREA* sp. Asteraceae.

No. 3313. From Kechioren, Ankara, May 13.

122251. *CENTAUREA* sp. Asteraceae.

No. 770. From near Denizli, May 31.

122252. *CHENOPODIUM* sp. Chenopodiaceae.

No. 2850. From Yalova Kaplijalari, September 12.

122253. *COCHLEARIA* sp. Brassicaceae.

No. 2443. From the Cilician Gates, July 24.

122254. *CHRYSANTHEMUM CORONARIUM* L. Asteraceae. **Crowndaisy.**

No. 634. From near Koshadasi, May 25. An edible chrysanthemum, the leaves of which are used as a garnish, as flavoring, and also cooked as greens.

For previous introduction see 113325.

122255. *CHRYSANTHEMUM SEGETUM* L. Asteraceae. **Corn-marigold.**

No. 725. From the mountains 30 km. southeast of Mugla, June 28. A wild chrysanthemum with yellow flower heads.

122256. *ANTHEMIS* sp. Asteraceae.

No. 2792. From Uludag at 7,000 feet altitude, September 9. An alpine daisy.

122257 to 122262. *CLEMATIS* spp. Ranunculaceae.

122257. *CLEMATIS* sp.

No. 1185. From the hills 35 km. west of Balikesir, June 16. A variety with purple flowers.

122258. *CLEMATIS* sp.

No. 1297. From 43 km. east of Bursa, June 19.

122259. *CLEMATIS* sp.

No. 1298. From 40 km. east of Bursa, June 19.

122260. *CLEMATIS* sp.

No. 2319. From 76 km. north of Gemushane, August 10.

122261. *CLEMATIS* sp.

No. 2509. From 35 km. east of Ordu, August 19. A blue and purple variety.

122262. *CLEMATIS* sp.

No. 2723. From Urgup, August 28. A variety with yellow flowers.

122263. *CLEOME* sp. Capparidaceae.

No. 2270. From 24 km. east of Erzincan, August 9.

122207 to 122413—Continued

- 122264 to 122266. CONVULVULUS spp. Convolvulaceae.
122264. CONVULVULUS sp.
No. 1509. From 25 km. east of Gasi-antep, July 5. Pink flowers, growing in clumps.
122265. CONVULVULUS HIRSUTUS Stev.
No. 1579. From 5 km. east of Siverek, July 7. A perennial decumbent or climbing bindweed, about 3 feet long, with pinkish or creamy white flowers. Native to Asia Minor.
122266. CONVULVULUS sp.
No. 2298. From 68 km. north of Gemushane, August 10. A herbaceous perennial vine with large white flowers.
122267. CORCHORUS sp. Tiliaceae.
No. 3108. From the Chankiri bazar, October 12.
122268. CORNUS sp. Cornaceae.
No. 2833. From Yalova Kaplijalari, September 11.
122269. CORNUS sp. Cornaceae.
No. 2313. From 75 km. north of Gemushane, August 10.
122270. CRATAEGUS sp. Malaceae.
No. 2472. From 106 km. south of Giresun, August 17.
- 122271 to 122273. DATURA spp. Solanaceae.
122271. DATURA sp.
No. 532. From the Mugla bazar, May 28.
122272. DATURA sp.
No. 600. From the Izmir bazar, May 23.
122273. DATURA METEL FASTUOSA (L.) Safford.
No. 612. From the Antalya bazar, June 4. An ornamental herbaceous annual, common throughout India and the East Indies, which varies in height from 2 to 6 feet. It has entire or deeply-toothed leaves about 4 inches long, and flowers, 7 or more inches in length, varying in color from white to lavender or rose.
- For previous introduction see 110187.
- 122274 to 122279. DELPHINIUM spp. Ranunculaceae. Larkspur.
122274. DELPHINIUM sp.
No. 1743. From the mountains south-east of Elaziz, July 13.
122275. DELPHINIUM sp.
No. 1778. From 35 km. southwest of Elaziz, July 14. Low-growing plants with flowers not borne in spikes.
122276. DELPHINIUM sp.
No. 2005. From 7 km. west of Chiftchane, July 25.
122277. DELPHINIUM sp.
No. 2336. A tall perennial from 50 km. south of Trabzon, August 10.

122207 to 122413—Continued

122278. DELPHINIUM sp.
No. 2450. From 45 km. north of Nigde, July 26.
122279. DELPHINIUM sp.
No. 2693. From 21 km. south of Tokat, August 28.
- 122280 to 122321. DIANTHUS spp. Silenaceae.
122280. DIANTHUS BARBATUS L. Sweet-william.
No. 3032. From the Amasya bazar, October 6.
122281. DIANTHUS sp.
No. 580. From the Izmir bazar, May 23.
122282. DIANTHUS sp.
No. 719. From the Lulum river bed, May 28. A species with white lace petals.
122283. DIANTHUS sp.
No. 769. From Denizli, May 31.
122284. DIANTHUS CARTHUSIANORUM L.
No. 1066. From Bergama, June 10.
122285. DIANTHUS sp.
No. 1084. A small plant from the ruins of Bergama, June 10.
122286. DIANTHUS sp.
No. 1091. From dry slopes 65 km. northwest of Izmir, June 10.
122287. DIANTHUS sp.
No. 1092. From a dry slope 80 km. northwest of Izmir, June 10.
122288. DIANTHUS sp.
No. 1093. A small plant from the ruins at Bergama, June 10.
122289. DIANTHUS sp.
No. 1107. From limestone hills south of Kirkagach, June 11.
122290. DIANTHUS CARTHUSIANORUM L.
No. 1179. From 10 km. west of Balikesir, June 16.
122291. DIANTHUS sp.
No. 1200. From 50 km. west of Balikesir, June 16, on a dry rocky area.
122292. DIANTHUS CARTHUSIANORUM L.
No. 1300. From 17 km. east of Bursa, June 19.
122293. DIANTHUS sp.
No. 1314. From Gemlik Bay, June 20.
122294. DIANTHUS sp.
No. 1452. From 6 km. north of Gaziantep, July 2. A plant with cream-colored, lacy petals.
122295. DIANTHUS sp.
No. 1453. From 31 km. north of Gaziantep, July 2. A species with pink flowers.
122296. DIANTHUS sp.
No. 1635. From 47 km. south of Diyarbekir, July 9.

122207 to 122413—Continued

122297. *DIANTHUS* sp.
No. 1574. From 41 km. southeast of Diyarbekir, July 7.
122298. *DIANTHUS* sp.
No. 1675. From 25 km. east of Diyarbekir, July 10.
122299. *DIANTHUS* sp.
No. 1724. From 32 km. east of Elaziz, July 13.
122300. *DIANTHUS CARTHUSIANORUM* L.
No. 1740. From 28 km. southeast of Elaziz, September 13.
122301. *DIANTHUS* sp.
No. 1963. From Birejik, July 22. A plant with dark-pink flowers.
122302. *DIANTHUS CARTHUSIANORUM* L.
No. 2064. From Alma Dag, 25 km. southeast of Ankara, August 1.
122303. *DIANTHUS* sp.
No. 2097. From Alma Dag, 25 km. southeast of Ankara, August 1.
122304. *DIANTHUS* sp.
No. 2202. From 95 km. southeast of Susheri, August 7.
122305. *DIANTHUS* sp.
No. 2279. From 55 km. east of Erzinjan, August 9. Flowers white, unusually long and graceful, petals deeply fringed.
122306. *DIANTHUS* sp.
No. 2288. From 203 km. east of Erzinjan, August 9. Flowers shell pink with slightly fringed petals.
122307. *DIANTHUS* sp.
No. 2294. From 203 km. east of Erzinjan, August 9. Flowers white, petals slightly fringed.
122308. *DIANTHUS* sp.
No. 2329. From 35 km. north of Gemshane, Aug. 9. Flowers red, borne in clusters.
122309. *DIANTHUS HAEMATOCALYX* Boiss. and Heldr.
No. 2474. From 106 km. south of Giresun, August 17.
122310. *DIANTHUS* sp.
No. 2483. From 97 km. south of Giresun, August 17.
122311. *DIANTHUS* sp.
No. 2492. From 75 km. south of Giresun, August 17.
122312. *DIANTHUS* sp.
No. 2602. From 4 km. west of Sam-sun, August 23.
122313. *DIANTHUS* sp.
No. 2637. From 50 km. southeast of Amasya, August 25.
122314. *DIANTHUS CARTHUSIANORUM* L.
No. 2670. From 16 km. south of Tokat, August 26. Flowers red.
122315. *DIANTHUS CARTHUSIANORUM* L.
No. 2671. From 41 km. south of Tokat, August 26.

122207 to 122413—Continued

122316. *DIANTHUS* sp.
No. 2692. From 21 km. south of Tokat, August 26.
122317. *DIANTHUS* sp.
No. 2747. From Ulu Dag, 35 km. south of Bursa, September 7.
122318. *DIANTHUS CARTHUSIANORUM* L.
No. 2823. From Yalova Kaplijalari, September 11.
122319. *DIANTHUS* sp.
No. 2801. From the summit of Ulu Dag, September 8.
122320. *DIANTHUS CARTHUSIANORUM* L.
No. 2831. From Yalova Kaplijalari, September 11.
122321. *DIANTHUS* sp.
No. 3355. From 35 km. east of Bandirma, June 18.
- 122322 to 122324. *ECHIUUM* spp. Boraginaceae.
122322. *ECHIUUM* sp.
No. 810. From 25 km. north of Antalya, June 3, on a limestone plateau. Flowers light blue.
122323. *ECHIUUM PLANTAGINEUM* L.
No. 679. From near Koshadasi, May 26.
122324. *ECHIUUM* sp.
No. 668. From near Chine, May 26. Flowers pink.
122325. *ERICÁ* sp. Ericaceae.
No. 2756. From Ulu Dag, 35 km. south of Bursa, September 7. A heather found growing by springs.
122326. *ERICA* sp. Ericaceae.
No. 2387. From 16 km. east of Trabzon, August 12.
122327. *FUCHSIA* sp. Onagraceae.
No. 3033-A. From the Amasya bazar.
- 122328 to 122331. *GENTIANA* spp. Gentianaceae. Gentian.
122328. *GENTIANA* sp.
No. 3146. From 25 km. north of Kastamonu, October 13.
122329. *GENTIANA* sp.
No. 2673. From the mountains, 46 km. south of Tokat, August 26.
122330. *GENTIANA* sp.
No. 2487. From 92 km. south of Giresun, August 17. Flowers blue, borne next to ground; found in mountain meadows.
122331. No. 2471. *GENTIANA* sp.
No. 2471. From 50 km. south of Giresun, August 17.
122332. *GLADIOLUS* sp. Iridaceae.
No. 1950. From Birejik, July 22.
- 122333 to 122335. *GYPSOPHILA* spp. Silenaceae.
122333. *GYPSOPHILA* sp.
No. 1870. From 50 km. north of Malatya, July 17.

122207 to 122413—Continued

122334. GYPSOPHILA sp.

No. 1430. *Babysbreath*. From 17 km. north of Gaziantep, July 2.

122335. GYPSOPHILA sp.

No. 2163. *Dwarf babysbreath*. From 49 km. east of Sivas, August 6.

122336. INULA sp. Asteraceae.

No. 2847. From Yalova Kaplijalari, September 11. A freely branching yellow-flowered perennial which blooms in the autumn.

122337. INULA CONYZA DC. Asteraceae.

No. 2864. From Yalova Kaplijalari, September 12. A tall herb with yellow flowers in umbellike clusters.

122338 to 122346. IRIS spp. Iridaceae.

122338. IRIS GATESII Foster.

No. 3376. From the Mission garden, Gaziantep, June 19. Seed from hand-pollinated, isolated plants. An iris native to Asia Minor with 1-flowered stems about 19 inches high. The outer flower segments, 3 to 5 inches across, are creamy white, covered with fine veins, producing a light-gray effect; the inner segments are larger, pale purple or yellow.

122339. IRIS LUPINA Foster.

No. 3365. *Wolf's ear* or *Duluk*. From the Mission garden, Gaziantep, June 19. An *Oncocylus* iris with a fleshy, creeping rhizome and about 6 erect narrow leaves 9 inches or more high. The stem, 6 inches high, bears a single flower with falls and standards greenish yellow marked with brownish-red veins. Native to Asia Minor.

For previous introduction see 106024.

122340. IRIS sp.

No. 627. Found on moist land near Ephesus, May 24. Flowers white.

122341. IRIS sp.

No. 734. From 50 km. southeast of Mugla, May 28, in moist soil. Flowers bright yellow.

122342. IRIS sp.

No. 1142. From a hillside near Ephesus, June 12.

122343. IRIS sp.

No. 2267. From 50 km. east of Erzincan, August 9.

122344. IRIS sp.

No. 2407. From 29 km. west of Rize, August 13.

122345. IRIS sp.

No. 2431. From 25 km. east of Ordu, August 19.

122346. IRIS sp.

No. 3105. From 15 km. north of Kalejik, October 12.

122347. LEPIDIUM SATIVUM L. Brassicaceae. Garden cress.

No. 585. From the Antalya bazar, June 4.

122348. LIMONIUM sp. Plumbaginaceae.

No. 2980. From Ephesus, September 25. Flowers blue.

122207 to 122413—Continued

122349. LINUM sp. Linaceae.

No. 635. From near Koshadasi, May 25. Wild flax.

122350. FUMANA sp. Cistaceae.

No. 641. From 25 km. southeast of Izmir, May 25. A perennial flaxlike rock plant related to *Helianthemum*, with yellow flowers.

122351 to 122360. LINUM spp. Linaceae. Flax.

122351. LINUM sp.

No. 647. Wild flax from the roadside 20 km. south of Izmir, May 25.

122352. LINUM sp.

No. 728. Wild flax from 60 km. south-east of Mugla, June 28.

122353. LINUM sp.

No. 732. From the Lulum Valley, May 28.

122354. LINUM sp.

No. 1098. Wild flax from Kirkagach, June 11.

122355. LINUM sp.

No. 1111. Wild flax from the road 20 km. east of Kirkagach, June 11.

122356. LINUM sp.

No. 1191. Wild flax from 85 km. west of Balikesir, June 16.

122357. LINUM sp.

No. 1203. Wild flax from 10 km. west of Balikesir, June 16.

122358. LINUM PUBESCENS Russ.

No. 1414. From bottom land, 48 km. north of Gaziantep, July 2. An annual flax 1 to 1½ feet high with oblong or oblong lanceolate leaves and pink flowers in cymes with spikelike branches. The handsome fragrant blossoms do not drop during the day. Native to Asia Minor.

122359. LINUM sp.

No. 1418. A perennial flax with yellow flowers, from dry lands 6 km. north of Gaziantep, July 2.

122360. LINUM sp.

No. 1674. A perennial flax with blue flowers, from 25 km. east of Diyarbekir, July 10.

122361. LITHOSPERMUM sp. Boraginaceae.

No. 1501. From 5 km. southeast of Gaziantep, July 4. A dry-land plant with gray foliage, found among limestone rocks.

122362 to 122365. LINUM spp. Linaceae. Flax.

122362. LINUM sp.

No. 2412. From 32 km. west of Rize, August 13. A flax with yellow miniature flowers.

122363. LINUM PERENNE L.

No. 2582. Wild flax from 20 km. west of Samsun, August 23.

122364. LINUM sp.

No. 2589. From 4 km. west of Samsun, August 23. A flax with yellow flowers, very attractive but very small.

122207 to 122413—Continued

122365. *LINUM* sp.
No. 2655. From 24 km. southeast of Merzifon, August 25.
122366. *LITHOSPERMUM* sp. Boraginaceae.
No. 1753. From 25 km. southeast of Elaziz, July 13. An attractive rock plant with nodding inflorescence.
122367. *LYCHNIS* sp. Silenaceae.
No. 3407. From a dry rocky slope, 3 km. northeast of Ankara, June 26.
122368. *MIMOSA PUDICA* L. Mimosaceae. Sensitiveplant.
No. 1276. *Kusen*. From the Bursa bazar, June 18.
122369. *MUSCARI* sp. Liliaceae. Grape-hyacinth.
No. 1132. From Kirkagach, June 11.
122370. *NERIUM OLEANDER* L. Apocynaceae. Oleander.
No. 2726. From Talas, but the seed was originally collected in the Taurus Mountains back of Antalya. A mixed sample from trees with red and white flowers.
For previous introduction see 109529.
122371. *NERIUM OLEANDER* L. Apocynaceae. Oleander.
No. 2947. From 5 km. north of Kemal Pasha, September 23.
122372. *PICEA* sp. Pinaceae. Spruce.
No. 2422. From 70 km. south of Giresun, August 17.
- 122373 to 122375. *RHAMNUS PETIOLARIS* Boiss. Rhamnaceae.
A spreading shrub or small tree 6 to 12 feet high, with fruits used as a yellow dye. Native to Asia Minor.
122373. No. 2921. From Gaziantep, but collected at the Izmir Fair, September 22.
122374. No. 2920. From Marash, but collected at the Izmir Fair, September 22.
122375. No. 1260. From the Bursa bazar, June 18.
122376. *RHODODENDRON* sp. Ericaceae.
No. 2616. From 30 km. southwest of Samsun, August 24.
122377. *RUMEX* sp. Polygonaceae.
No. 681. Found in pine woods on the road to Milas, June 26.
122378. *RUMEX* sp. Polygonaceae.
No. 1652. From 70 km. south of Diyarbekir, July 9; seeds boiled and the extract used as a dye.
122379. *SALVIA* sp. Menthaceae. Mint.
No. 3490-B. From Eskishehir.
122380. *SALVIA* sp. Menthaceae. Mint.
No. 1103. From Kirkagach, June 9.
122381. *SCABIOSA* sp. Dipsacaceae.
No. 3385. From Ankara, June 25. Occurs as a weed in all parts of Turkey.
122382. *SECALE CEREALE* L. Poaceae. Rye.
No. 2882. From Chanak Kale bazar, September 18.

122207 to 122413—Continued

- 122383 to 122390. *SILENE* spp. Silenaceae.
122383. *SILENE LATIFOLIA* (Mill.) Britten and Rendle.
No. 677. *Campion*. On the road to Milas, June 26.
122384. *SILENE* sp.
No. 1673. *Campion*. From 16 km. east of Diyarbekir, July 10.
122385. *SILENE* sp.
No. 2863. *Campion*. From the sea beach 1 km. west of Yalova, September 12.
122386. *SILENE* sp.
No. 1274. *Kayakurogi*. From the Bursa bazar, June 18.
122387. *SILENE* sp.
No. 1469. From 45 km. north of Gaziantep, July 3.
122388. *SILENE ARMERIA* L.
No. 2406. From 50 km. east of Trabzon, August 13.
122389. *SILENE ARMERIA* L.
No. 3348. From limestone cliffs 65 km. west of Balikesir, June 16. Flowers deep red, in large clusters.
122390. *SILENE* sp.
No. 1183. From hills 10 km. west of Balikesir, June 16.
122391. *LYCHNIS ALBA* Mill. Silenaceae.
No. 1301. From 43 km. east of Bursa, June 19. Flowers yellow.
- 122392 to 122394. *SILENE* spp. Silenaceae.
122392. *SILENE* sp.
No. 1756. From 39 km. southeast of Elaziz, July 13.
122393. *SILENE SEDOIDES* Poir.
No. 1783. From 52 km. southwest of Elaziz, July 14. A branching annual about 1 foot high, with fleshy oblong to oblong-spatulate leaves and reddish flowers in racemes. Native to the Mediterranean region.
122394. *SILENE* sp.
No. 1786. From 35 km. southwest of Elaziz, July 14. A low-growing plant with purplish flowers.
- 122395 to 122400. *SORGHUM VULGARE* Pers. Poaceae. Sorghum.
122395. No. 2941. *Urfa milo*. From the Izmir Fair, September 22.
122396. No. 540. From the Mugla bazar, May 28.
122397. No. 3017. From the Kutahya bazar, September 28.
122398. No. 2612. From 5 km. west of Samsun, August 23, where it is planted along the borders of corn fields.
122399. No. 3165. From the Kastamonu bazar, October 14.
122400. No. 1622. *Durra*. From the Diyarbekir bazar, July 8.

122207 to 122413—Continued

122401. *SPARTIUM JUNCEUM* L. Fabaceae. Spanish broom.
No. 2558. *Scotch broom*. From 4 km. east of Samsun, August 22.
122402. *SWERTIA* sp. Gentianaceae.
No. 2789. From Ulu Dag, 35 km. south of Bursa, September 9. A low plant found near springs on the mountain slope.
122403. *ANCHUSA* sp. Boraginaceae.
No. 3442. From Alma Dag, June 28.
- 122404 and 122405. *TRIGONOCARYUM INVOLUCRATUM* (Stev.) Johnst. Boraginaceae.
A low annual related to the forget-me-not, with white or blue flowers. Native to the Caucasus region at altitudes of 4,000 to 9,000 feet.
122404. No. 615. From Ephesus, May 28. Flowers deep blue with white center.
122405. No. 3320. From Ankara, May 20. Flowers deep blue with white center.
122406. *TRIGONELLA FOENUM-GRÆCUM* L. Fabaceae. Fenugreek.
No. 3173. From the Kastamonu bazar, October 14. Used for flavoring meat.
122407. *VERBASCUM LYCHNITIS* L. Scrophulariaceae. Mullein.
No. 2290. From 143 km. east of Erzincan, August 9. A tomentose biennial with oblong-elliptic, crenate leaves and panicles of small yellow flowers.
For previous introduction see 106534.
- 122408 to 122412. *VIOLA* spp. Violaceae. Violet.
122408. No. 2736. From near the old baths, 14 km. west of Yalova, September 6. A plant with a climbing habit.
122409. No. 743. From the mountains 11 km. south of Denizli, May 30.
122410. No. 745. From the mountains 11 km. south of Denizli, May 30.
122411. No. 1309. From 25 km. north-east of Bursa, June 19.
122412. No. 2781. From Ulu Dag, 36 km. south of Bursa, September 8.
122413. (Undetermined.)
No. 1369. *Camion*. From the Marash bazar, July 2. Used to flavor meat.
- 122414 and 122415. *PHASEOLUS VULGARIS* L. Fabaceae. Common bean.
From Australia. Seeds from the Hawkesbury Agricultural College, presented through Dr. H. Wenholtz, Director of Plant Breeding, Department of Agriculture, Sydney, New South Wales. Received March 11, 1937.
122414. *Canadian Wonder*, Burnley selection.
122415. *Pale Dun*.
- 122416 to 122418.
- From the Union of South Africa. Bulbs purchased from the Winton Nurseries, Bonnie Vale, Cape Province. Received March 19, 1937.
122416. *ACIDANTHERA CAPEENSIS* (Ker.) Benth. and Hook. Iridaceae.

122416 to 122418—Continued

- A South African bulbous plant resembling gladiolus, with numerous linear sword-shaped leaves about 1 foot long and spikes of pinkish-blue flowers on stems about 18 inches high.
122417. *BUPHANE CILIARIS* (L.) Herbert. Amaryllidaceae.
The creamy yellow flower stalks of this remarkable plant appear before the leaves and bear 50 to 100 flowers, chocolate purple with a pinkish flush, in a spherical umbel. The thick broad, strap-shaped leaves appear later. Native to South Africa.
For previous introduction see 61246.
122418. *GLADIOLUS ALATUS* L. Iridaceae.
For previous introduction and description see 119274.
- 122419 to 122427.
- From England. Plants purchased from Laxton Bros. Bedford Ltd., Bedford. Received March 19, 1937.
- 122419 to 122421. *FRAGARIA* spp. Rosaceae. Strawberry.
122419. *King George V* (Laxton).
122420. *Oberschlesien*.
122421. *Royal Sovereign* (Laxton).
- 122422 to 122427. *RUBUS* spp. Rosaceae.
122422. *Bedford Giant*, a new blackberry.
122423. *Bountiful*. A raspberry.
122424. *Renown*, a new raspberry.
122425. *Reward*, a new raspberry.
122426. *Red cross* raspberry.
122427. *Pyne's Royal* raspberry.
- 122428 to 122440. *SACCHARUM*. Poaceae. Sugarcane.
- From India. Cuttings presented by the Department of Agriculture, Bangalore, Mysore. Received March 20, 1937.
122428. No. H. M. 14.
122429. No. H. M. 320.
122430. No. H. M. 487.
122431. No. H. M. 544.
122432. No. H. M. 603.
122433. No. H. M. 606.
122434. No. H. M. 607.
122435. No. H. M. 608.
122436. No. H. M. 613.
122437. No. H. M. 619.
122438. No. H. M. 627.
122439. No. H. M. 629.
122440. *Ashy Mauritius*.
- 122441 to 122583.
- From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 22, 1937.
- This material was all collected in the summer and autumn of 1936.
122441. *ACANTHUS* sp. Acanthaceae.
No. 2085. From Alma Dag, August 1.

122441 to 122583—Continued

- 122442 to 122454. *ALTHAEA* spp. Malvaceae.
- 122442 and 122443. *ALTHAEA OFFICINALIS* L. Marshmallow.
122442. No. 716. From the mountains 25 km. southeast of Mugla, May 28.
122443. No. 722. From near Lake Gulguas, May 28.
- 122444 to 122454. *ALTHAEA ROSEA* (L.) Cav. Hollyhock.
122444. No. 562. From the Izmir bazar, May 23.
122445. No. 601. From the Antalya bazar, June 4.
122446. No. 609. From the Antalya bazar, June 4.
122447. No. 631. From Ephesus, May 24.
122448. No. 1064. From the Bergama ruins, June 30.
122449. No. 1505. From 22 km. southeast of Gaziantep, July 4. Flowers blue.
122450. No. 1773. From 9 km. southwest of Elaziz, July 14. Flowers white.
122451. No. 1415. From 15 km. south of Marash, July 2. Flowers white.
122452. No. 1866. From 22 km. west of Malatya, July 16. A hollyhock of recumbent habit with very deeply lobed leaves; flowers white.
122453. No. 1919. From Birejik, July 22. Plant 11 to 13 feet high; flowers pink.
122454. No. 1735. From the mountains 25 km. southeast of Elaziz, July 13. Plant recumbent; flowers white.
122455. *MALVA* sp. Malvaceae.
- No. 813. From Antalya, June 4. Growing on rocks.
- 122456 to 122458. *CISTUS* spp. Cistaceae.
122456. *CISTUS* sp.
- No. 718. From 10 km. southeast of Mugla, May 28. A shrub with white flowers, common on dry rocky soil.
122457. *CISTUS VILLOSUS CORSICUS* (Loisel.) Grosser.
- No. 2841. From Yalova Kaplijalari, September 11.
122458. *CISTUS* sp.
- No. 2863. From Yalova Kaplijalari, September 12. A perennial with pink flowers; occurs in many of the mountainous parts of Turkey.
- 122459 to 122475. *DELPHINIUM* spp. Ranunculaceae.
122459. *DELPHINIUM AJACIS* L.
- No. 1138. From Ephesus, June 12. Flowers light blue.
122460. *DELPHINIUM* sp.
- No. 1408. From 20 km. north of Gaziantep, July 2.
122461. *DELPHINIUM* sp.
- No. 1426. From 20 km. north of Gaziantep, July 2.

122441 to 122583—Continued

122462. *DELPHINIUM* sp.
- No. 1805. From 52 km. southwest of Elaziz, July 14. Flowers small, dark blue.
122463. *DELPHINIUM* sp.
- No. 1849. From 15 km. west of Malatya, July 16.
122464. *DELPHINIUM AJACIS* L.
- No. 1972. From Birejik, July 23. Common annual; flowers pink.
122465. *DELPHINIUM* sp.
- No. 1971. From Birejik, July 23. Flowers bronze, not a common type.
122466. *DELPHINIUM AJACIS* L.
- No. 1995. From Ulukishla, July 25.
122467. *DELPHINIUM* sp.
- No. 2072. From Alma Dag, June 29. Flowers purple.
122468. *DELPHINIUM* sp.
- No. 2167. From 49 km. east of Sivas, August 6.
122469. *DELPHINIUM* sp.
- No. 2190. From 30 km. northwest of Erzinjan, August 7.
122470. *DELPHINIUM AJACIS* L.
- No. 2449. From Ulukishla, July 25.
122471. *DELPHINIUM* sp.
- No. 2644. From 94 km. southeast of Merzifon, August 25.
122472. *DELPHINIUM* sp.
- No. 3316. From near Ankara, May 18; flowers dark purple.
122473. *DELPHINIUM* sp.
- No. 3337. From 80 km. north of Antalya, June 6. An annual larkspur.
122474. *DELPHINIUM* sp.
- No. 3389. From 2 km. southwest of Ankara, June 25; flowers deep purple.
122475. *DELPHINIUM* sp.
- No. 3395. From 3 km. southwest of Ankara, June 24; flowers blue.
122476. *GERANIUM* sp. Geraniaceae.
- No. 2314. From 64 km. north of Gemushane, August 10; plants tall; flowers large, brilliant dark red, cup-shaped with black centers.
- 122477 to 122491. *GLAUCIUM* spp. Papaveraceae.
122477. *GLAUCIUM* sp.
- No. 766. From near Isparta, June 2; flowers orange colored; pods long and slim.
122478. *GLAUCIUM* sp.
- No. 815. From rocks near Antalya, June 4; flowers flame colored; pods long, slender, smooth.
122479. *GLAUCIUM* sp.
- No. 1067. From 10 km. west of Soma, June 10; flowers orange; pods long and slender.

122441 to 122583—Continued

122480. *GLAUCIUM* sp.
No. 1119. From Akhisar, June 11; flowers orange and yellow; pods long and smooth.
122481. *GLAUCIUM* sp.
No. 1163. From near Edremit, June 16. Flowers light yellow.
122482. *GLAUCIUM* sp.
No. 1291. From 45 km. east of Bandirma, June 18; flowers flame colored with dark centers.
122483. *GLAUCIUM* sp.
No. 1508. From 20 km. east of Gaziantep, July 5.
122484. *GLAUCIUM* sp.
No. 1983. From Birejik, July 24.
122485. *GLAUCIUM* sp.
No. 1985. From Birejik, July 24.
122486. *GLAUCIUM CORNICULATUM* (L.) Curt.
No. 2000. From 25 km. southeast of Ulukishla, July 25. A hardy annual about 2 feet high, with pinnatifid leaves and medium large, scarlet flowers. Native to the Mediterranean region.
122487. *GLAUCIUM* sp.
No. 2017. From 9 to 25 km. north of Nigde, July 26; flowers orange.
122488. *GLAUCIUM* sp.
No. 2164. From 59 km. east of Sivas, August 6.
122489. *GLAUCIUM* sp.
No. 2874. From 1 km. west of Yalova on the sea beach, September 12; a perennial, flowers yellow.
122490. *GLAUCIUM* sp.
No. 3319. From near Ankara, May 18.
122491. *GLAUCIUM* sp.
No. 3402. From Ankara, June 25. Flowers orange yellow, pods long and slender.
- 122492 to 122504. *HYPERICUM* spp. Hypericaceae. St. Johnswort.
122492. *HYPERICUM* sp.
No. 1466. From 45 km. north of Gaziantep, July 3.
122493. *HYPERICUM* sp.
No. 1572. From 30 km. northeast of Urfa, July 7.
122494. *HYPERICUM* sp.
No. 1725. From 32 km. east of Elaziz; plant of medium height; flowers in umbellike clusters.
122495. *HYPERICUM* sp.
No. 1941. From Birejik, July 12.
122496. *HYPERICUM* sp.
No. 2285. From 55 km. east of Erzincan, August 9.
122497. *HYPERICUM* sp.
No. 2737. From near the old baths, 14 km. west of Yalova, September 6.

122441 to 122583—Continued

122498. *HYPERICUM* sp.
No. 2763. From Ulu Dag, 11 km. south of Bursa, September 7. Flowers large, yellow; seed capsule long.
122499. *HYPERICUM CALYCIUM* L.
No. 2729. From Yalova Kaplijalari, September 6.
122500. *HYPERICUM CALYCIUM* L.
No. 2764. From Ulu Dag, 16 km. south of Bursa, September 7. Large yellow flowers, borne singly.
122501. *HYPERICUM* sp.
No. 2774. From Ulu Dag, 35 km. south of Bursa, September 8.
122502. *HYPERICUM* sp.
No. 2904. From the ruins of Blagden's site of Troy, September 18. Plants 12 to 18 inches high; flowers medium size.
122503. *HYPERICUM* sp.
No. 2905. From the ruins of the old city of Troy, September 18. Plant about 4 inches high, spreading; flowers small.
122504. *HYPERICUM CALYCIUM* L.
No. 2806. From Ulu Dag, 35 km. south of Bursa, September 10; an ornamental shrub.
- 122505 to 122507. *IPOMOEA* spp. Convolvulaceae.
122505. *IPOMOEA* sp.
No. 602. From the Antalya bazar, June 4.
122506. *IPOMOEA* sp.
No. 2548. From the Samsun bazar, August 25.
122507. *IPOMOEA* sp.
No. 3268. From the Adapazari bazar, October 20.
122508. *AGROSTEMMA GITHAGO* L. Silenaceae.
No. 1282. From 70 km. west of Bursa, June 18.
122509. *LYCHNIS* sp. Silenaceae.
No. 1785. From 35 km. southwest of Elaziz, July 14. An ornamental.
122510. *MALOPE* sp. Malvaceae. Mallow.
No. 642. From near Aydin, May 25.
122511. *MALOPE* sp. Malvaceae. Mallow.
No. 1289. From 25 km. east of Bandirma, June 18. An annual mallow.
122512. *LAVATERA THURINGIACA* L. Malvaceae. Treemallow.
No. 2566. From 9 km. east of Samsun, August 22. A herbaceous perennial or winter annual about 4 feet high, with magenta flowers. Native to southern Europe.
122513. *MALOPE* sp. Malvaceae. Mallow.
No. 669. From the road between Aydin and Milas, May 26. Flowers large, deep pink.
122514. *MALVA SYLVESTRIS* L. Malvaceae. Mallow.
No. 622. From Ephesus, May 24.

122441 to 122583—Continued

122515 and 122516. *ALTHAEA HIRSUTA* L.
Malvaceae.

A hardy annual about 1 foot high, with obliquely lobed to palmatifid leaves and solitary white flowers. Native to the Mediterranean region.

122515. No. 650. From 20 km. south of Izmir, May 25.

122516. No. 676. On the road to Milas, May 26.

122517. *MALVA* sp. Malvaceae. Mallow.

No. 2653. From 123 km. southeast of Merzifon, August 25.

122518. *MALVA SYLVESTRIS* INCANESCENS Griseb. Malvaceae. Mallow.

No. 2353. From the Trabzon bazar, August 11.

122519. *MECONOPSIS* sp. Papaveraceae.

No. 2276. From 55 km. east of Erzincan, August 9. A low, profusely branching plant with orange flowers.

122520. *MYOSOTIS* sp. Boraginaceae.
Forget-me-not.

No. 788. From 25 km. west of Isparta, June 2.

122521. *MYOSOTIS* sp. Boraginaceae.
Forget-me-not.

No. 703. On the road between Milas and Mugla, May 27.

122522 to 122526. *NIGELLA* spp. Ranunculaceae.
Love-in-a-mist.

122522. *NIGELLA* sp.

No. 1801. From 45 km. southwest of Elaziz, July 14.

122523. *NIGELLA* sp.

No. 1867. From 16 km. west of Malatya, July 16. Flowers whitish and cream colored.

122524. *NIGELLA* sp.

No. 1868. From 16 km. west of Malatya, July 16.

122525. *NIGELLA* sp.

No. 1996. From Ulukishala, July 25; flowers yellow.

122526. *NIGELLA* sp.

No. 2650. From 25 km. southeast of Merzifon, August 25.

122527 to 122530. *PAEONIA* spp. Ranunculaceae.
Peony.

122527. *PAEONIA* sp.

No. 1918. From a mountain slope near Birejik, July 21. A wild peony.

122528. *PAEONIA* sp.

No. 2327. From 46 km. north of Gemushane, August 10.

122529. *PAEONIA* sp.

No. 2559. From 16 km. east of Sam-sun, August 22. A wild peony.

122530. *PAEONIA* sp.

No. 2588. From 30 km. west of Sam-sun, August 23.

122441 to 122583—Continued

122531 to 122542. *PAPAVER* spp. Papaveraceae.
Poppy.

122531. *PAPAVER MACROSTOMUM* Boiss. and Huet.

No. 648. From 20 km. south of Izmir, May 25.

122532. *PAPAVER RHOEAS* L.

No. 619. From Ephesus, May 24. Flowers red.

122533. *PAPAVER* sp.

No. 758. From 15 km. south of Denizli, May 20. Flowers orange colored.

122534. *PAPAVER* sp.

No. 782. From 17 km. west of Isparta, June 2. Flowers purple.

122535. *PAPAVER* sp.

No. 786. From 15 km. west of Isparta, June 2. Flowers pink and black.

122536. *PAPAVER* sp.

No. 803. En route from Isparta to Antalya, June 3. Flowers pink.

122537. *PAPAVER* sp.

No. 1846. From 12 km. west of Malatya, July 16.

122538. *PAPAVER* sp.

No. 1925. From Birejik, July 21.

122539. *PAPAVER* sp.

No. 2194. From 102 km. southeast of Susheri, August 7. A profusely branching perennial; flowers small, red.

122540. *PAPAVER SOMNIFERUM* L.

No. 3325. From Ankara, May 20. Flowers small, red.

122541. *PAPAVER* sp.

No. 3226. From Ankara, May 20. Flowers black.

122542. *PAPAVER* sp.

No. 3435. From Alma Dag, June 28.

122543. *POINSETTIA* sp. Euphorbiaceae.

No. 2968. From near Izmir, September 24; leaves orange and green.

122544. *PORTULACA* sp. Portulacaceae.

No. 602. From the Izmir bazar, May 23.

122545. *PRIMULA* sp. Primulaceae.
Primrose.

No. 2311. From 53 km. north of Gemushane, August 19.

122546 to 122574. *ROSA* spp. Rosaceae.
Rose.

122546. *ROSA* sp.

No. 1464. From 30 km. northwest of Gaziantep, July 3; flowers yellow, a wild rose.

122547. *ROSA* sp.

No. 729. A wild rose from near Mugla, May 28.

122548. *ROSA* sp.

No. 1407. A wild rose from 15 km. north of Gaziantep, July 2.

122441 to 122583—Continued

122549. *ROSA* sp.
No. 1909. From mountains 35 km. southeast of Elaziz, July 13.
122550. *ROSA* sp.
No. 1913. A wild yellow rose from 60 km. north of Malatya, July 17.
122551. *ROSA* sp.
No. 1967. A dwarf wild rose from Birejik, July 22.
122552. *ROSA* sp.
No. 2209. From 100 km. southeast of Susheri, August 7.
122553. *ROSA* sp.
No. 2175. A wild rose from 84 km. east of Sivas, August 6.
122554. *ROSA* sp.
No. 2173. From 84 km. east of Sivas, August 6.
122555. *ROSA* sp.
No. 2174. From 59 km. east of Sivas, August 6.
122556. *ROSA* sp.
No. 2263. From 70 km. east of Erzincan, August 9. A wild rose with large red fruits.
122557. *ROSA* sp.
No. 2458-A. From 34 km. east of Trabzon, August 12.
122558. *ROSA* sp.
No. 2459-B. From 34 km. east of Trabzon, August 12.
122559. *ROSA* sp.
No. 2461. From 34 km. east of Trabzon, August 12.
122560. *ROSA* sp.
No. 2462. From 29 km. west of Rize, August 13.
122561. *ROSA* sp.
No. 2463. From 29 km. west of Rize, August 13.
122562. *ROSA* sp.
No. 2563. From 5 km. east of Samsun, August 22.
122563. *ROSA* sp.
No. 2659. From 66 km. southeast of Merzifon, August 25.
122564. *ROSA* sp.
No. 2749. From Ulu Dag, 35 km. south of Bursa. September 7. Large deep-red fruits, somewhat spiny.
122565. *ROSA* sp.
No. 2765. From Ulu Dag, 16 km. south of Bursa, September 7.
122566. *ROSA* sp.
No. 2778. From Ulu Dag, 35 km. south of Bursa, September 8.
122567. *ROSA* sp.
No. 2785. From Ulu Dag, 37 km. south of Bursa, September 8.

122441 to 122583—Continued

122568. *ROSA* sp.
No. 2790. From Ulu Dag at 6,500 feet altitude, 35 km. south of Bursa, September 9.
122569. *ROSA* sp.
No. 2844. From Yalova Kaplijalar, September 11.
122570. *ROSA* sp.
No. 2845. From Yalova Kaplijalari, September 11; growing in partial shade.
122571. *ROSA* sp.
No. 2862. From Yalova Kaplijalari, September 12; growing in an exposed area.
122572. *ROSA* sp.
No. 3469. From 25 km. north of Chankiri, October 12.
122573. *ROSA* sp.
No. 3470. From 25 km. north of Chankiri, October 12.
122574. *ROSA* sp.
No. 3478. From 10 km. south of Inebolu, October 14.
- 122575 to 122578. *RUMEX* spp. Polygonaceae.
122575. *RUMEX* sp.
No. 2161. From 84 km. east of Sivas, August 6.
122576. *RUMEX* sp.
No. 2191. From 115 km. southeast of Susheri, August 7. Apparently an annual with a single short fruiting stalk.
122577. *RUMEX* sp.
No. 2142. From the Sivas bazar, August 5; used for medicine.
122578. *RUMEX* sp.
No. 2207. From 95 km. southeast of Susheri, August 7. An edible plant, also used as medicine.
122579. *TAGETES* sp. Asteraceae. Marigold.
No. 2222. From the Erzincan bazar, August 8.
- 122580 to 122583. *TEUCRIUM* spp. Mentha-ceae. Germander.
122580. *TEUCRIUM* sp.
No. 2168. From 84 km. east of Sivas, August 6. A perennial; flowers light blue with white streaks.
122581. *TEUCRIUM* sp.
No. 2500. From 128 km. southwest of Shebinkarahisar, August 18. A perennial with blue flowers.
122582. *TEUCRIUM* sp.
No. 1586. From 30 km. northeast of Urfa, July 7.
122583. *TEUCRIUM* sp.
No. 2010. From 9 km. north of Nigde, July 26. A perennial.

122584 and 122585. RUBUS spp. Rosaceae.

From England. Plants purchased from George Pyne, Denver Nurseries, Topsham, Devon. Received March 22, 1937.

122584. RUBUS sp.

Pyne's Imperial Raspberry, No. 22297.

122585. RUBUS sp.

Shirley Prolific Blackberry.

122586 to 122595.

From China. Seeds presented by Dr. Albert N. Steward, Department of Botany, College of Agriculture and Forestry, Nanking University, Nanking. Received February 24, 1937.

Seeds and fruits collected at Men Shan, Shantung Province, during the season of 1936.

122586. ARONIA sp. Malaceae.

No. 85. A shrub 5 feet high covered with red fruits. Used medicinally.

122587. CRATAEGUS sp. Malaceae.

No. 96.

122588. EUONYMUS sp. Celastraceae.

No. 100.

122589. GLEDITSIA MACRACANTHA Desf. Caesalpiniaceae. Honeylocust.

No. 94. A tree with large spines, closely related to *Gleditsia sinensis*.

For previous introduction see 33165.

122590. PINUS MASSONIANA Lambert. Pinaceae.

No. 88. A tall tree up to 80 feet high, with spreading branches and yellowish-brown branchlets. The thin slender light-green leaves, in pairs, are 5 to 8 inches long, and the dull-brown, ovate cones are 3 to 5 inches long. Native to southeast China, and closely related to *Pinus densiflora*.

For previous introduction see 91790.

122591. PYRUS sp. Malaceae.

No. 95.

122592. RUBUS sp. Rosaceae.

No. 3. A vine with sweet edible red fruits.

122593. VITIS sp. Vitaceae.

No. 2. A woody vine with dark-purple edible fruits.

122594. ZANTHOXYLUM sp. Rutaceae.

No. 1. A shrub, cultivated at the hill-foot for the seed coat which is used as a stimulant.

122595. ZIZIPHUS sp. Rhamnaceae.

No. 98.

122596 to 122607.

From France. Plants and scions purchased from Paul Lecolier, La Celle, St. Cloud. Received March 25, 1937.

122596. AMYGDALUS PERSICA L. Amygdalaceae. Peach.

Malta. Received as plants.

122596 to 122607—Continued

122597 to 122605. MALUS SYLVESTRIS Mill. Malaceae. Apple.

Received as scions.

122597. *Belle Fille*.

122598. *Binet Blanc*.

122599. *Binet Rouge*.

122600. *Bramtot*.

122601. *Gendreville*.

122602. *Court Pendu Rouge*.

122603. *Cramoisie de Gascogne*.

122604. *Grise Dieppoise*.

122605. *Reinette Franche*.

122606 and 122607. PYRUS COMMUNIS L. Malaceae. Common pear.

Received as plants.

122606. *Beurre Dumont*.

122607. *Louis Pasteur*.

122608 to 122614.

From India. Bulbs collected by Walter Koelz, Bureau of Plant Industry. Received March 25, 1937.

122608 to 122613. ALLIUM spp. Liliaceae.

122608. ALLIUM CEPA L. Onion.

No. 2304. From Bangalore, Mysore, February 9, 1937. A common type of onion grown in the south of India. Considered of better flavor than the large ones.

122609 to 122613. ALLIUM SATIVUM L. Garlic.

Nos. 122609 to 122611. *Lassan*. From Madras, February 6, 1937.

122609. No. 2234.

122610. No. 2235.

122611. No. 2236.

122612. No. 2249. *Tellagada*. From Bangalore, Mysore, February 8, 1937. Locally grown.

122613. No. 2233. *Lassan*. From Madras, February 6, 1937. Said to have been introduced from Italy.

122614. SOLANUM TUBEROSUM L. Solanaceae.

No. 2312. *Riekot* potato. From Bangalore, Mysore, February 9, 1937. Said to be a descendant of potatoes introduced into India about 50 years ago.

122615 to 122629.

From France. Plants purchased from F. Delaunay, Angers, Maine et Loire. Received March 25, 1937.

122615 to 122621. MALUS SYLVESTRIS Mill. Malaceae. Apple.

122615. *Calville D'août*.

122616. *Doux-amer*.

122617. *Fertile de Doué*.

122618. *Gros Bois de Doudeville*.

122619. *Pomme D'or*.

122620. *Pres. Descours-Desacres*.

122621. *Souvenir du Marais*.

122615 to 122629—Continued

- 122622 to 122628. *PYRUS COMMUNIS* L.
Malaceae. Common pear.
122622. *Beau Present d'Artois*.
122623. *Beurré des Enfants Nantais*.
122624. *Bon Chrétien Antoine Lorimer*.
122625. *Duc de Bordeaux*.
122626. *Francois Coppée*.
122627. *Prof. Lemoine*.
122628. *Williams d'Angers*.
122629. *RIBES* sp. Grossulariaceae.
Prolifique du Grand Jardin.

122630 to 122742.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 25, 1937.

This material was all collected in the summer and autumn of 1936.

122630. *ABIES* sp. Pinaceae. Fir.
No. 2925. From Ulu Dag, September 7.
122631. *ATRIPLEX HORTENSIS* L. Chenopodiaceae. Garden orach.
No. 613. From the Izmir bazar, May 23.

For previous introduction see 105936.

122632. *ATRIPLEX* sp. Chenopodiaceae.
No. 3102. From a garden in Yozgat, October 9.
122633. *BOREAVA ORIENTALIS* Jaub. and Spach. Brassicaceae.
No. 3386. From dry plains, 4 km. southwest of Ankara, June 25. An annual herb about 1 foot high, with small oblong leaves and pale-yellow flowers. Native to Asia Minor.
122634. *CEPHALARIA* sp. Dipsacaceae.
No. 2059. From Alma Dag, 26 km. southeast of Ankara, August 1.
122635 to 122638. *COIX LACRYMA-JOBI* L. Poaceae. Jobs-tears.
122635. No. 2982. From a village near Balikesir, September 26.
122636. No. 3025. From Bursa, October 1.
122637. No. 2930. From the prison at Balikesir, October 19.
122638. No. 3226. From Adapazari, October 20.

122639. *CORCHORUS* sp. Tiliaceae.
No. 1513. From the hotel garden at Urfa, July 5. A plant with small greenish flowers.
122640 to 122644. *CORIANDRUM SATIVUM* L. Apiaceae. Coriander.
122640. No. 3266. From the Adapazari bazar, October 20.
122641. No. 2132. From the Sivas bazar, August 5.
122642. No. 2225. From the Erzincan bazar, August 8.
122643. No. 2373. From the Trabzon bazar, August 11.
122644. No. 2522. From the Samsun bazar, August 21.

122630 to 122742—Continued

122645. *CORONILLA SCORPIOIDES* (L.) Koch. Fabaceae.
No. 1080. From near Soma, June 10. An erect yellow-flowered herbaceous perennial about 8 inches high, native to the Mediterranean countries.
For previous introduction see 104931.
122646. *CORONILLA* sp. Fabaceae.
No. 1201. From 60 km. west of Balikesir, June 16.
122647. *CREPIS* sp. Cichoriaceae.
No. 2791. From Ulu Dag, 35 km. south of Bursa, September 9.
122648. *CUMINUM CYMINUM* L. Apiaceae. Cumin.
No. 570. From the Isparta bazar, June 2.
122649. *CYNANCHUM* sp. Asclepiadaceae.
No. 3456. From 5 km. west of Samsun, August 23. A perennial vine, growing in sands on the Black Sea beach.
122650. *PERIPLOCA GRAECA* L. Asclepiadaceae.
No. 3464. From 10 km. north of Selchuk, September 25. A tall woody vine with ovate-lanceolate leaves and wheel-shaped brownish-green flowers 1 inch across in loose, terminal cymes. Native to Asia Minor and southern Europe.
122651. *DIANTHUS* sp. Silenaceae.
No. 597. From the Antalya bazar, June 4.
122652. *DICENTRA* sp. Papaveraceae.
No. 3432. From Alma Dag, June 28.
122653 to 122656. *EREMURUS* sp. Liliaceae.
122653. *EREMURUS* sp.
No. 820. From Ephesus, June 24.
122654. *EREMURUS* sp.
No. 637. From 2 km. west of Aydin, May 28.
122655. *EREMURUS* sp.
No. 1400. From 20 km. north of Gaziantep, July 2.
122656. *EREMURUS* sp.
No. 1852. From 11 km. west of Malatya, July 16.
122657. *ERYTHERINA* sp. Fabaceae.
No. 2944. From near Izmir, September 23. An ornamental tree with enormous clusters of brilliant red flowers.
122658. *EUCALYPTUS* sp. Myrtaceae.
No. 1348. From Adana, June. A species said to have a bright-red trunk and branches, with reddish leaves.
122659 to 122670. *HELIANTHUS ANNUUS* L. Asteraceae. Common sunflower.
For previous introduction see 119771.
122659. No. 3080. From the Yozgat bazar, October 9.
122660. No. 3149. From the Kastamonu bazar, October 14.
122661. No. 3213. From Chankiri, October 15.

122630 to 122742—Continued

122662. No. 3227. From the Adapazari bazar, October 20.
122663. No. 3277. From Edirne, October 22.
122664. No. 614. From the Izmir bazar, May 23.
122665. No. 1148. From the Balikesir bazar, June 16. A form with white seeds.
122666. No. 1375. From the Marash bazar, July 2.
122667. No. 1665. From the Diyarbekir bazar, July 10.
122668. No. 2026. From the Nigde bazar, July 27.
122669. No. 3012. From the Kutahya bazar, September 28.
122670. No. 2152. From the Sivas bazar, August 5.
122671. *HYPERICUM* sp. Hypericaceae.
No. 1499. From 5 km. south of Gaziantep, July 4.
122672. *HYPERICUM* sp. Hypericaceae.
No. 3438. From Alma Dag, June 28.
122673. *ILEX* sp. Aquifoliaceae. Holly.
No. 2401. From 23 km. east of Trabzon, August 12.
122674. *ISATIS* sp. Brassicaceae.
No. 1902. From 50 km. north of Malatya, July 17. A plant with narrow succulent, cabbagelike leaves and a flower stalk 2 to 3½ feet high, bearing a large broad panicle of numerous bright-yellow flowers about one-half inch across.
- 122675 to 122682. *JUNIPERUS* spp. Pinaceae.
Juniper.
122675. *JUNIPERUS DRUPACEA* Labill.
No. 1917. From Birejik, July 21. A juniper up to 60 feet high, of pyramidal habit, in the wild state, but usually columnar in cultivation. Native to Asia Minor.
122676. *JUNIPERUS* sp.
No. 742. A dwarf juniper from 20 km. south of Denizli, May 30.
122677. *JUNIPERUS* sp.
No. 1931. A tall tree from Birejik, July 21.
122678. *JUNIPERUS* sp.
No. 1932. From Birejik, July 21. A scrubby tree.
122679. *JUNIPERUS* sp.
No. 2304. From 10 km. north of Gemushane, August 10.
122680. *JUNIPERUS* sp.
No. 2648. From 61 km. southeast of Merzifon, August 25.
122681. *JUNIPERUS* sp.
No. 2658. From 61 km. southeast of Merzifon, August 25.
122682. *JUNIPERUS* sp.
No. 2664. From the mountains 46 km. south of Tokat, August 26. A dwarf juniper.

122630 to 122742—Continued

122683. *LATHYRUS ANNUUS* Hoejer. Fabaceae. Pea.
No. 1081. From 40 km. northwest of Izmir, June 10.
122684. *LIGUSTRUM* sp. Oleaceae. Privet.
No. 3145. From 25 km. north of Kastamonu, October 13.
- 122685 to 122687. *LONICERA* spp. Caprifoliaceae. Honeysuckle.
122685. *LONICERA* sp.
No. 2335. From 60 km. south of Trabzon, August 10. A shrub 10 feet high with deep-red berries.
122686. *LONICERA* sp.
No. 2767. From Ulu Dag, 35 km. south of Bursa, September 8. A low shrub with large black fruits.
122687. *LONICERA* sp.
No. 2945. From Kemal Pasha, September 23.
122688. *LUPINUS* sp. Fabaceae.
No. 735. From 25 km. southeast of Mugla, May 28.
122689. *LYCHNIS* sp. Silenaceae.
No. 690. From near Milas, May 26. A species with deep-pink flowers.
122690. *PANICUM MILIACEUM* L. Poaceae. Broomcorn millet.
No. 1228. From the Bursa bazar, June 18.
122691. *PHASEOLUS CARACALLA* L. Fabaceae. Snail bean.
No. 561. From the Izmir bazar, May 23.
- 122692 to 122697. *PINUS* spp. Pinaceae.
122692. *PINUS* sp.
No. 1482. From 5 km. southeast of Marash, July 3.
122693. *PINUS* sp.
No. 2922. From the mountains between Sivas and Susheri, August 6.
122694. *PINUS* sp.
No. 3350. From 30 km. west of Balikesir, June 16.
122695. *PINUS* sp.
No. 3333. From 30 km. north of Koycegiz, May 31.
122696. *PINUS* sp.
No. 3468. From 55 km. north of Chankiri, October 12.
122697. *PINUS* sp.
No. 3475. From 5 km. north of Kastamonu, October 13.
- 122698 to 122708. *PORTULACA OLERACEA* L. Portulacaceae. Common purslane.
The fleshy leaves are sometimes used in salads, but more frequently boiled and served like spinach.
For previous introduction see 34510.
122698. No. 3000. From the Kutahya bazar, September 28.
122699. No. 3055. From the Amasya bazar, October 6.

122630 to 122742—Continued

122700. No. 3286. From the Edirne bazar, October 22.
122701. No. 3140. From the Inebolu bazar, October 12.
122702. No. 2367. From the Trabzon bazar, August 11.
122703. No. 2707. From the Amasya bazar, August 25.
122704. No. 3233. From the Adapazari bazar, October 20.
122705. No. 3199. From the Chankiri bazar, October 15.
122706. No. 2896. *Semizote*. From the Chanak Kale bazar, September 18.
122707. No. 527. From the Mugla bazar, May 28.
122708. No. 3445. From Alma Dag, June 28.
122709. RHODODENDRON sp. Ericaceae.
No. 2460. From between Trabzon and Rize, August 12.
122710. RHUS sp. Anacardiaceae. Sumac.
No. 2861. From Yalova Kapiljalari, September 12.
122711. RHUS sp. Anacardiaceae. Sumac.
No. 1507. From Gaziantep, July 5. Grown commercially for tannin.
122712. RUBIA TINCTORUM L. Rubiaceae.
Madder.
No. 3466. *Kökboja* (village dye). From gardens along the river near Amasya, October 7.
For previous introduction see 43037.
122713. RUMEX sp. Polygonaceae.
No. 1488. A shrub found on dry rocky hills 25 km. northwest of Gaziantep, July 3.
122714. SAMBUCUS sp. Caprifoliaceae.
No. 2439. From Birejik, July 22.
122715. SAPONARIA OFFICINALIS L. Silenaceae.
Bouncing-bet.
No. 2625. From 85 km. southwest of Samsun, August 24.
For previous introduction see 4758.
- 122716 to 122720. SCABIOSA spp. Dipsacaceae.
122716. SCABIOSA ATROPURPUREA L.
No. 1286. From 31 km. northeast of Bandirma, June 18. An annual about 2 feet high, with pinnately-parted stem leaves and white to dark-purple flowers in large peduncled heads. Native to southern Europe.
122717. SCABIOSA sp.
No. 1316. From 21 km. north of Bursa, June 20.
122718. SCABIOSA sp.
No. 2738. From 2 km. west of Yalova, September 6. A form with lavender flowers.
- 122719 and 122720. SCABIOSA PALAESTINA L.
Bird's eye. An annual with branching stems 2 feet high, linear to oblong, entire or lyrate-pinnatifid leaves and

122630 to 122742—Continued

- cream-colored to bluish flowers. Common everywhere in Turkey and native to Asia Minor.
122719. No. 1747. From 26 km. west of Diyarbekir, July 9.
122720. No. 1484. From 44 km. north of Gaziantep, July 3.
122721. SCORZONERA sp. Cichoriaceae.
No. 1969. From Birejik, July 23.
122722. SCORZONERA sp. Cichoriaceae.
No. 3425. From Alma Dag, 25 km. southeast of Ankara, June 28.
122723. SESAMUM ORIENTALE L. Pedaliaceae.
Sesame.
No. 2928. From Chanak Kale, September 19.
122724. SESAMUM ORIENTALE L. Pedaliaceae.
Sesame.
No. 1547. From the Urfa bazar, July 6.
122725. SETARIA ITALICA (L.) Beauv. Poaceae.
Millet.
No. 1834. *Proso*. From the Malatya bazar, July 16.
122726. SETARIA ITALICA (L.) Beauv. Poaceae.
Millet.
No. 1682. From the Elaziz bazar, July 13.
- 122727 to 122737. SILENE spp. Silenaceae.
122727. SILENE sp.
No. 1879. From 50 km. north of Malatya, July 17.
122728. SILENE sp.
No. 1770. From 35 km. southeast of Elaziz, July 13. A small compact plant with red flowers.
122729. SILENE sp.
No. 1989. From Ulukishla, July 25 and 26.
122730. SILENE sp.
No. 3404. From Ankara, June 25. An early spring wild ornamental.
122731. SILENE sp.
No. 3420. A form with pink flowers from dry hills, 3 km. north of Ankara, June 26.
122732. SILENE sp.
No. 643. From southwest of Izmir, May 25.
122733. SILENE sp.
No. 662. Small pale flowers from near Aydin, May 25.
122734. SILENE sp.
No. 759. From 30 km. south of Denizli, May 30. A compact dwarf rock plant with very attractive bright-red flowers.
122735. SILENE sp.
No. 1445. From 20 km. north of Gaziantep, July 2.
122736. SILENE sp.
No. 1764. From 39 km. southeast of Elaziz, September 13. A form with large pink flowers.

122630 to 122742—Continued

122737. *SILENE NOCTIFLORA* L.

No. 1954. From Birejik, July 22. A tall plant.

122738. *SCORZONERA* sp. Cichoriaceae.

No. 3312. From 20 km. south of Narle, May 4.

122739. *VERBASCUM SPECIOSUM* Schrad. Scrophulariaceae. Mullein.

No. 2293. From 34 km. east of Erzincan, August 9. A tall biennial mullein with pale-green, oblong-lanceolate leaves more than a foot long at the base of the stem, becoming much smaller toward the top. The yellow flowers are in a large paniced raceme. Native to eastern Europe.

For previous introduction see 108778.

122740. *VERBASCUM* sp. Scrophulariaceae. Mullein.

No. 1637. From 47 km. south of Diyarbakir, July 9. Not the common mullein, flowers more handsome.

122741. *VICIA VILLOSA* Roth. Fabaceae. Hairy vetch.

No. 3496. From the ruins of Philippi, Greece, November 11.

122742. *VITEX* sp. Verbenaceae.

No. 2931. From Ephesus, September 25.

122743. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.

From Canada. Tubers presented by M. E. Davis, Central Experiment Farm, Ottawa. Received March 26, 1937.

*Early St. George.*122744 to 122752. *VITIS* spp. Vitaceae. Grape.

From Austria. Cuttings presented by Prof. Andre Teleki, Vienna. Received March 26, 1937.

122744. *Chasselas Tompa.*122745. *Ezerevesand.*122746. *Madam Johanna Mathias.*122747. *Memory of Queen Elizabeth.*122748. *Neuberger.*122749. *Reine des Vignes.*122750. *Riesling of the Rhine.*122751. *Veltliner* (red).122752. *Veltliner* (red and white).122753 to 122757. *FICUS* spp. Moraceae. Fig.

From Japan. Cuttings presented by Dr. T. Tanikawa, Acting Director, Imperial Horticultural Experiment Station, Okitsu. Received March 27, 1937.

122753. No. 9. *Hative d'argenteuil* × (*H. d'arg.* × *Roeding* No. 2).122754. No. 32. *Hative d'argenteuil* × (*H. d'arg.* × *Roeding* No. 2).122755. No. 45. *Hative d'argenteuil* × (*H. d'arg.* × *Roeding* No. 2).122756. *Horaigaki.* A fig, native to Japan.122757. No. 60. *Violet Dauphine* × *Roeding* No. 2.122758 and 122759. *ERICA* spp. Ericaceae. Heath.

From England. Seeds presented by Sir Lionel de Rothschild, St. Swithin's Lane, London. Received March 18, 1937.

122758. *ERICA* sp.

Received under the name "mimosa," for which a place of publication has not been found. Described as a red heather.

122759. *ERICA PILLANSII* Bolus.An evergreen shrub with ascending branches, small imbricate linear leaves, and scarlet flowers about one-half inch long. It is related to *Erica mertensiana*. Native to South Africa.122760. *INDIGOFERA TINCTORIA* L. Fabaceae. True indigo.

From France. Seeds presented by Vilmorin-Andrieux & Cie., Paris. Received March 18, 1937.

French-grown seed.

122761 and 122762. *LYCOPERSICON ESCULENTUM* Mill. Solanaceae. Tomato.

From Peru. Seeds presented by A. Martin Lynch, Chief, Estación Agronómica de Lambayeque. Received March 19, 1937.

122761. No. 1. Wild tomato.

122762. No. 2. Wild tomato.

122763. *MEDICAGO SATIVA* L. Fabaceae. Alfalfa.

From the Netherlands. Seeds presented by Zwaan & Van Der Molen, Plant Breeding & Seed Growing Co., Voorburg. Received March 22, 1937.

Giant alfalfa. A strain said to produce 70 percent more than any other European stock.122764 and 122765. *PRUNUS* spp. Amygdalaceae.

From New Zealand. Seeds presented by W. Meikle & Sons, New Lynn Nurseries, Auckland. Received March 30, 1937.

122764. *PRUNUS* sp.*George Wilson.* A blood plum which has no bitterness or sourness near the seed. It will keep 6 to 8 weeks after picking, and if kept long enough will dry like a prune, but will not rot. The tree is immune to brown rot.122765. *PRUNUS* sp.*Victory plum.* A freestone with dark red skin and orange flesh which will keep from 6 to 8 weeks after picking.

122766 to 122984.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received March 1, 1937.

122766. *ABIES PINDROW* Spach. Pinaceae. Fir.No. 1666. *Tos.* From above Bandrole, Kulu, Punjab, at 8,000 feet altitude, November 14, 1936. A tall fir with short branches forming a narrow pyramid and lustrous, dark-green, slender leaves 1 to 2 inches long. Native to the Himalayan region.

122766 to 122984—Continued

122767. *ACACIA* sp. Mimosaceae.

No. 2138. From Calcutta, January 7, 1937. A shrub 8 feet high.

122768. *ACACIA* sp. Mimosaceae.

No. 933. From Bandrole, Kulu, Punjab, June 2, 1936, at 5,000 feet altitude. A bushy tree of medium size, growing in semiarid situations. For 2 weeks in the spring it is covered with fragrant yellow flowers.

122769. *ACONITUM HETEROPHYLLUM* Wall. Ranunculaceae. Monkshood.No. 1527. *Patish*. From Kolung, Lahul, Punjab, August 20, 1936, at 12,000 feet altitude. A common plant in the meadows, growing 3 feet tall.122770. *ACONITUM* sp. Ranunculaceae.No. 1380. *Ladora*. From Karzong Pass, Ladak, Kashmir, at 15,000 feet altitude, September 14, 1936. An attractive perennial 18 inches high, growing in clumps, with large tomentose, blue-purple flowers which have a strong musky odor.122771. *ADONIS CHRYSOCYATHUS* Hook. f. and Thoms. Ranunculaceae.

No. 1721. From the Department of Agriculture, Kashmir. A tufted perennial with stems about 1 foot high, much divided leaves 3 to 6 inches long, and golden-yellow flowers 2 inches or more across. Native to the alpine Himalayan region.

122772. *ALLIUM* sp. Liliaceae.

No. 1354. From La Dang, Baltistan, Kashmir, September 4, 1936, at 15,000 feet altitude. Plants 18 inches high, growing in clumps on a dry slope.

122773. *ALNUS* sp. Betulaceae.No. 1649. *Chag*. From Chitkul, Rampur-Bushahr, August 20, 1936.122774. *AMARANTHUS* sp. Amaranthaceae.No. 1693. *Bhaji sag*. From the Director of Agriculture, Kashmir. A good pot herb with red leaves.122775. *ANAPHALIS* sp. Asteraceae.

No. 1495. From Rotang Pass, Kulu, Punjab, October 26, 1936, at 13,000 feet altitude. Clumps 1 foot high, with corymbs of small whitish flowers; found on a dry rock.

122776. *ANAPHALIS* sp. Asteraceae.

No. 1543. From Rotang Pass, Kulu, Punjab, October 26, 1936, at 13,000 feet altitude. A small-flowered species that grows on damp cliffs.

122777 to 122780. *ANEMONE* spp. Ranunculaceae.122777. *ANEMONE TETRASEPALA* Royle.

No. 1678. Presented by the Director of Agriculture, Kashmir. A large robust anemone with leathery, 5-lobed leaves and white flowers. Native to the Himalayan region from 8,000 to 11,000 feet altitude.

122778. *ANEMONE* sp.No. 1586. *Guantsimento*. From Pukar, Lahul, Punjab, July 31, 1936, at 12,000 feet altitude. A plant up to 2½ feet high, found in clumps in meadows. The attractive white flowers, more or less fragrant, are in clusters.

122766 to 122984—Continued

122779. *ANEMONE* sp.No. 1588. *Tsitaka*. From Pukar, Lahul, Punjab, at 12,000 feet altitude, August 1936. A form 2 feet high, with few small flowers; found in meadows.122780. *ANEMONE* sp.No. 1498. *Japshren*. From Kyelang, Lahul, Punjab, October 23, 1936, at 10,000 feet altitude.122781. *ANETHUM GRAVEOLENS* L. Apiaceae. Dill.No. 1426. *Badien*. From Leh, Ladak, Kashmir, September 16, 1936, at 10,500 feet altitude.122782. *ANGELICA* sp. Apiaceae.No. 1577. *Bodunger*. From Pukar, Lahul, Punjab, September 15, 1936, at 12,000 feet altitude. An umbellifer 6 feet tall with a fragrant celeriac-like root which is used along with garlic to flavor meat.122783. *ANTHEMIS* sp. Asteraceae.No. 1607. *Durchit*. From Dilburig, Lahul, Punjab, August 1936, at 13,000 feet altitude. A stemless perennial with a fragrant root; used in India as incense.122784 to 122787. *AQUILEGIA* spp. Ranunculaceae. Columbine.122784. *AQUILEGIA* sp.

No. 1357. From La Dang, Baltistan, Kashmir, September 4, 1936, at 15,000 feet altitude. Plants 2 feet high, growing in a colony on a dry rocky slope; flowers not seen.

122785. *AQUILEGIA* sp.

No. 1374. From Hundar, Baltistan, Kashmir, September 10, 1936. Plants 3 feet high, growing in clumps along a stream. Flowers not seen.

122786. *AQUILEGIA* sp.No. 1589. *Gerrimenbok*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. Attractive plants, 2 feet high; the large, very fragrant flowers, 1½ inches in diameter, have yellowish bells and pale blue-purple spurs.122787. *AQUILEGIA* sp.

No. 1648. From Chitkul, Rampur-Bushahr, August 19, 1936.

122788. *ARENARIA* sp. Silenaceae.No. 1520. *Autong makpo*. From Kolung, Lahul, Punjab, August 16, 1936, at 11,000 feet altitude. A low plant with an abundance of white flowers; found growing in mats on dry slopes.122789. *ARENCA PINNATA* (Wurmb.) Merr. Phoenicaceae. Sugar palm.

No. 2125. From the Royal Botanical Gardens, Calcutta, January 6, 1937. A handsome palm 20 to 40 feet high, with about 25 immense pinnate leaves and enormous bunches of fruit; the individual fruits are the size of an apple. A rich-flavored palm sugar is made from the sap which flows from the bruised fruitstalk.

122790. *ARTABOTRYS UNCINATUS* (Lam.) Merr. Annonaceae. Fragrant tailgrape.

No. 2130. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A half-scandent shrub with long slender drooping branches and greenish flowers. The inedible fruits are ovoid with a

122766 to 122984—Continued

pointed, slightly curved apex and are yellowish when ripe. The plant is very highly esteemed by the Chinese because of the rich fragrance of the flowers and fruits, and it is commonly planted in their monasteries.

For previous introduction see 95085.

122791. *ARTEMISIA* sp. Asteraceae.

No. 1492. *Karkatrag*. From the Upper Bhaga Valley, Lahul, Punjab, October 4, 1936, at 12,000 feet altitude. Plants 2 feet high, growing abundantly in clumps on dry slopes. It is eaten by horses, sheep, and goats when it is tender in the spring and also when dry in late fall and winter.

122792. *ARTEMISIA MARITIMA* L. Asteraceae.

No. 1544. *Burtsi*. From Kolung, Lahul, Punjab, October 17, 1936. A low straggly undershrub, up to 18 inches high, growing abundantly on dry slopes; grazed by all the domestic animals.

For previous introduction see 78477.

122793. *ASTER* sp. Asteraceae.

No. 1499. *Lukmik*. From Kolung, Lahul, Punjab, October 9, 1936, at 11,000 feet altitude. Found growing in clumps 18 inches high in both dry and damp situations. The lavender flower heads are very attractive.

122794. *ASTRAGALUS* sp. Fabaceae.

No. 1624. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. Plants 12 to 18 inches high, found in damp places.

122795. *PELTOPHORUM INERME* (Roxb.) Llanos (*P. ferrugineum* Benth.). Caesalpinaceae.

No. 2163. From Dacca, Bengal, January 14, 1937. A large handsome leguminous tree bearing large terminal spikes of bright yellow flowers. A good shade tree, used for roadside planting.

122796. *BENINCASA HISPIDA* (Thunb.) Cogn. Cucurbitaceae. Waxgourd.

No. 1684. *Petha*. Presented by the Director of Agriculture, Kashmir. A form with large fruits, weighing from 20 to 30 pounds, whose flesh is used principally for candying.

122797 to 122802. *BERBERIS* spp. Berberidaceae. Barberry.122797. *BERBERIS* sp.

No. 1298. From Shigar Nulla, Baltistan, Kashmir, August 21, 1936. A very attractive caespitose shrub 4 feet high, with abundant foliage and fruits. The flowers are clear yellow; found on dry slopes.

122798. *BERBERIS* sp.

No. 1404. From Karzong, Baltistan, Kashmir, September 13, 1936. An attractive caespitose shrub up to 3 feet high, mostly unbranched, with an abundance of small leaves and glaucous berries. As it stands drought and cold, it should be useful as a low hedge plant.

122799. *BERBERIS ARISTATA* DC.

No. 1662. From 8,000 feet altitude, above Bandrole, Kulu, Punjab, November 14, 1936. A handsome shrub of elegant spreading habit, becoming at times 10 feet high. The spine-tipped leaves are

122766 to 122984—Continued

often whitish beneath, and the numerous flowers are bright golden yellow. The spindle-shaped berries, about half an inch in length, are red covered with a blue-white bloom. This is said to be one of the most vigorous of the Himalayan barberries.

For previous introduction see 66542.

122800. *BERBERIS* sp.

No. 1663. From 8,000 feet altitude, above Bandrole, Kulu, Punjab, November 14, 1936. A bush up to 6 feet high, with an abundance of red fruits; seems to prefer cooler locations than No. 1662 (P. I. 122799).

122801. *BERBERIS* sp.

No. 1785. *Kerpa*. From Labuktrang, Lahul, Punjab, at 11,000 feet altitude, November 1, 1936. A shrub 3 to 5 feet high, with handsome red berries.

122802. *BERBERIS ARISTATA* DC.

No. 1713. *Kawadach*. Purchased from the Director of Agriculture, Kashmir.

For previous introduction and description see 122799.

122803. *BETULA* sp. Betulaceae. Birch.

No. 1541. *Krosh*. A quick-growing tree found usually in river bottoms from 3,000 to 6,000 feet altitude. The trunks are commonly over 6 feet in diameter.

122804. *BETULA UTILIS* D. Don. Betulaceae. Birch.

No. 1480. *Takpa*. From Pukar, Lahul, Punjab, October 15, 1936, at 12,000 feet altitude. A tree 40 to 60 feet high, with a creamy-white trunk and branches, the bark peeling off in papery flakes. The oval, coarsely-toothed, sharp-pointed leaves, 3 inches long, are dark-green above and paler beneath. In winter the orange-chocolate color of the twigs is very striking.

For previous introduction see 99654.

122805. *BRASSICA* sp. Brassicaceae.

No. 1777. *Rai*. From Kulu, Kulu, Punjab, November 10, 1936, at 4,500 feet altitude. Seeds used for flavoring.

122806. *BRASSICA* sp. Brassicaceae.

No. 1431. *Asur*. From Leh, Ladak, Kashmir, September 17, 1936. Seeds and leaves used as spices.

122807. *BUXUS WALLICHIANA* Bail. Buxaceae.

No. 1652. From Bandrole, Kulu, Punjab, November 14, 1936. An attractive evergreen shrub of good habit, up to 18 inches in diameter; the linear-lanceolate leaves are from 2 to 4 inches long.

For previous introduction see 79521.

122808. *CALAMAGROSTIS PSEUDOPHRAGMITES* (Hall. f.) Koel. Poaceae.

No. 1569. From Lahul, Punjab, October 20, 1936. A conspicuous grass found on dry, rather inaccessible isolated slopes.

For previous introduction see 113088.

122809. *CAMPANULA COLORATA* Wall. Campanulaceae.

No. 1525. From Gundla, Lahul, Punjab, October 23, 1936, on dry rock at 10,000 feet

122766 to 122984—Continued

altitude. A small perennial usually found growing in crevices in dry cliff faces. The pale, bluish-purple, campanulate flowers are 6 inches in diameter and very attractive.

For previous introduction see 42615.

122810. CAMPANULA sp. Campanulaceae.

No. 1594. From Tinu, Lahul, Punjab, August 1936, at 12,000 feet altitude. A rare plant, 5 feet tall, with large flowers 2 inches across, white tinged with red inside.

122811. CANAVALLIA sp. Fabaceae.

No. 2166. From Dacca, Bengal, January 15, 1937. The tender pods of this vine are used as a vegetable.

122812. CARAGANA sp. Fabaceae.

No. 1448. *Drama*. From the Taklung Pass, Ladak, Kashmir, September 27, 1936, at 15,000 feet altitude. A low shrub found in dense clumps 3 to 4 feet across and 12 to 18 inches high; found on dry slopes and plains where it is browsed by sheep and goats when other forage is scarce.

122813. CAREX sp. Cyperaceae.

No. 1496. *Longams*. From Tsokar, Rupshu, October 1, 1936, at 15,000 feet altitude. A stout sedge with heavy stiff leaves 1 foot long; growing in masses in both wet and dry situations and forming one of the most important grazing associations of the Tibetan plateau.

122814 to 122816. CARUM CARVI L. Apiaceae. Caraway.

For previous introduction see 86309.

122814. No. 1591. From Pukar, Lahul, Punjab, August 1936, at 10,000 feet altitude. Found in dry isolated places.

122815. No. 1595. *Gonyot*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A pink-flowered species that grows 2 feet high in hayfields; the seeds are used as spice.

122816. No. 1614. *Gonyot*. Said to have come from Zanskar, Punjab, a high province adjoining Lahul. Used as spice and considered better than the Lahul sort.

122817. CARUM OPTICUM (L.) Benth. and Hook. Apiaceae.

No. 1235. *Shuts; sheneid*. From Skardo, Baltistan, Kashmir, where it is used medicinally.

122818. CARYOTA MITIS Lour. Phoenicaceae. Fishtail palm.

No. 2124. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A palm, native to the Malay Peninsula, about 20 feet high, with a straight cylindrical spineless ringed trunk 4 inches or more in diameter and bipinnate leaves 4 to 9 feet in length. The purple fruits are about the size of cherries.

For previous introduction see 81584.

122819. CARYOTA URENS L. Phoenicaceae. Toddy palm.

No. 2126. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A fishtail palm up to 80 feet high and 18 inches in diameter, with bipinnate leaves 20 feet long by 12 feet wide, with curved and drooping segments. Native to the Malay Archipelago.

For previous introduction see 103160.

122766 to 122984—Continued

122820. CASSIA sp. Caesalpiniaceae.

No. 2127. From Calcutta, January 7, 1937. Said to be an ornamental shrub 8 feet high, with orange and red flowers.

122821. CEDRUS DEODARA (Lamb.) Loud. Pinaceae. Deodar cedar.

No. 1751. *Keoru*. From above Kulu, Kulu, Punjab, November 16, 1936, at 5,000 feet altitude.

122822. CEDRUS LIBANI Loud. Pinaceae. Cedar of Lebanon.

No. 2010. Presented by the Botanical Gardens at Darjeeling, December 25, 1936.

122823. CENTAUREA sp. Asteraceae.

No. 1241. From Safaranga, Baltistan, Kashmir, August 18, 1936, at 6,500 feet altitude. Found growing in clumps a foot high on rock faces; flowers small, rose-purple and thistlelike.

122824. CHAEROPHYLLUM sp. Apiaceae.

No. 1581. *Shakara*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A biennial 3 feet high, with a white, carrotlike root, and umbels of white flowers.

122825 to 122827. CHENOPODIUM spp. Chenopodiaceae.

122825. CHENOPODIUM BOTRYS L.

No. 1493. *Sokann*. From Kolung, Lahul, Punjab, at 12,000 feet altitude, October 15, 1936. A wild plant 1 foot high whose leaves are used for flavoring.

122826. CHENOPODIUM sp.

No. 1400. *Ostahak*. From Leh, Ladak, Kashmir, September 16, 1936, at 10,500 feet altitude. A plant about 6 feet high, used as a potherb.

122827. CHENOPODIUM sp.

No. 1715. *Ostahak*. Presented by the Director of Agriculture, Kashmir. A delicious native potherb; sown in the fall and available early in the spring.

122828. CIRSIUM sp. Asteraceae.

No. 1519. *Tultsoak*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A thistle 18 to 24 inches high, with attractive rose-purple flowers. Found on dry slopes and eaten by horses and donkeys when green.

122829 to 122832. CLEMATIS spp. Ranunculaceae.

122829. CLEMATIS ORIENTALIS L. Oriental clematis.

No. 1677. Presented by the Director, Department of Agriculture, Kashmir. An ornamental vine with finely cut leaves and erect, green-tinted yellow flowers, 1½ inches across. The seeds are borne in terminal clusters, each seed having a fluffy or featherlike appendage. Native to Iran (Persia).

For previous introduction see 115071.

122830. CLEMATIS sp.

No. 1526. *Emong*. From Gundla, Lahul, Punjab, October 16, 1936, at 10,500 feet altitude. A creeping vine with gold-sprinkled brown flowers 1 inch in diameter.

122766 to 122984—Continued

122831. CLEMATIS sp.

No. 1364. *Emong*. From the Shyok Valley, Tarkalung, Baltistan, Kashmir, at 10,000 feet altitude, September 6, 1936. An ornamental vine which covers bushes to a height of 8 feet. The small golden-yellow flowers are sprinkled with brown. The fruits are also attractive.

122832. CLEMATIS sp.

No. 1296. From Shigar Nulla, Baltistan, Kashmir, at 9,000 feet altitude, August 21, 1936. An ornamental vine found on a dry slope; the flowers, bell-shaped, are golden, sprinkled with brown and 1 inch across.

122833. CODONOPSIS FOETENS Hook. f. and Thoms. Campanulaceae.

No. 1530. *Ludut*. From Kolung, Lahul, Punjab, August 18, 1936, at 12,000 feet altitude. A tufted perennial 2 feet high, with large, pale blue-purple flowers which have an unpleasant odor. It is closely related to *Codonopsis thalictrifolia*.

122834. CORYDALIS sp. Papaveraceae.

No. 1445. *Tongzil*. From the Taklung Pass, Ladak, Kashmir, September 26, 1936, at 15,000 feet altitude. An ornamental yellow-flowered species about 18 inches high.

122835. CORYDALIS sp. Papaveraceae.

No. 1724. Purchased from the Director of the Department of Agriculture, Kashmir. Received as *Corydalis rumex*, for which a place of publication has not been found.

122836. CORTUSA MATTHIOLI L. Primulaceae.

No. 1738. Purchased from the Director of the Department of Agriculture, Kashmir. A herbaceous perennial about 6 inches high, with long-stalked, cordate leaves having 7 to 9 lobes, and an umbel of about 7 small, rosy-purple, drooping flowers. Native to the Alps.

122837 to 122839. CORYPHA sp. Phoenicaceae. Palm.

122837. CORYPHA ELATA Roxb.

No. 2128. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A tall palm up to 60 feet high, with a spirally ridged trunk and lunate, fan-shaped leaves 8 to 10 feet across, made up of 80 to 100 sword-shaped segments. Native to Burma and Bengal.

For previous introduction see 105349.

122838. CORYPHA TALLIERA Roxb.

No. 2131. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A stout unarmed fan palm up to about 30 feet high, with subtrotund leaves 6 feet long and 15 feet broad.

122839. CORYPHA UMBRACULIFERA L. Talipot palm.

No. 2132. Presented by the Royal Botanic Gardens, Calcutta, January 6, 1937. A large palm up to 80 feet high. The leaves, 12 feet long and 16 feet broad, are made up of lobed segments, and the creamy white flowers are in terminal panicles 20 feet long. It is native to Ceylon.

122766 to 122984—Continued

For previous introduction see 101386.

122840 to 122844. COTONEASTER spp. Malvaceae.

122840. COTONEASTER sp.

No. 1597. *Landepilitsi*. From Tinu, Lahul, Punjab, October 11, 1936, at 11,000 feet altitude. A slender attractive tree with long-stalked pink flowers. The fruits are bright crimson.

122841. COTONEASTER sp.

No. 1567. *Roktrolto*. From Kyelang, Lahul, Punjab, October 18, 1936, at 11,000 feet altitude. A low dense bush up to 5 feet high, with small leaves and black berries. Found on a dry slope.

122842. COTONEASTER sp.

No. 1753. From Chamba, Punjab, August 1936.

122843. COTONEASTER sp.

No. 1671. From above Bandrole, Kulu, Punjab, November 12, 1936, at 10,000 feet altitude. A small tree with handsome crimson fruits.

122844. COTONEASTER sp.

No. 1619. From Pukar, Lahul, Punjab, September 1936, at 12,000 feet altitude. An attractive small tree with red fruits.

122845. CRATAEGUS sp. Malaceae.

No. 1349. From Pranu, Baltistan, Kashmir, September 1, 1936, at 8,000 feet altitude. A small, well-formed tree with beautiful crimson fruits.

122846. CRATAEGUS sp. Malaceae.

No. 1130. From Skardo, Baltistan, Kashmir, August 12, 1936, at 6,500 feet altitude. A small ornamental tree with the usual *Crataegus* features. The red fruits are one-half inch in diameter.

122847. CUCUMIS SATIVUS L. Cucurbitaceae. Cucumber.

No. 2214. From Ellou, Madras Presidency.

122848. CYCLANTHERA sp. Cucurbitaceae.

No. 1599. *Serimentok*. A climbing annual with yellow flowers.

122849. DIANTHUS sp. Silenaceae.

No. 1531. From Kyelang, Lahul, Punjab, August 20, 1936, at 11,000 feet altitude. A small-flowered pink with glaucous leaves, growing in clumps on dry ground. The pink flowers are about one-half inch across.

122850. DELPHINIUM sp. Ranunculaceae.

No. 1582. *Jar Kang*. From Tinu, Lahul, Punjab, October 1, 1936, at 11,000 feet altitude. A species with large flowers clear cobalt blue to white, and 2 inches across.

122851. DIPSACUS INERMIS Wall. Dipsacaceae.

No. 1716. *Dapathak*. Presented by the Department of Agriculture, Kashmir. A stout erect shrub whose leaves are used as a potherb. The stems are 4 to 10 feet high, the leaves large, lanceolate to pinatifid, and the many small white flowers are in round dense heads about 1 inch in diameter. Native to the Himalayas from 6,000 to 10,000 feet altitude.

122766 to 122984—Continued

122852. DRACOCEPHALUM MOLDAVICA L. Menthaceae.

No. 1338. *Tsemnik*. From Kapalu, Baltistan, Kashmir, August 28, 1936, at 6,000 feet altitude. Seed used as a condiment. An annual with lanceolate, crenate leaves and loose clusters of small blue or white flowers. Native to Europe.

122853. EPHEDRA PACHYCLADA Boiss. Gnetaeae.

No. 1358. *Tscpat*. From Tarkalung, Baltistan, Kashmir, September 5, 1936, at 9,000 feet altitude, in both dry and damp situations. An attractive shrub growing in large rounded clumps 3 to 4 feet high, loaded with red berrylike fruits. Native to central Asia.

122854. FRAXINUS XANTHOXYLOIDES (G. Don) Wall. Oleaceae.

No. 1466. *Fungmaniguk*. From Tirot, Lahul, Punjab, October 22, 1936, at 9,600 feet altitude. A shrub or small tree found on dry slopes. The branches are spreading, and the leaves have 5 to 9 oval to oblong leaflets. Native to the western Himalayan region.

122855. FRITILLARIA sp. Liliaceae.

No. 1745. Presented by the Director, Department of Agriculture, Kashmir.

122856. FRITILLARIA ROYLEI Hook. Liliaceae.

No. 1679. Presented by the Director, Department of Agriculture, Kashmir. A fritillaria with whorled or opposite linear-lanceolate leaves, 2 to 4 inches long, and solitary or few nodding flowers on stems 1 to 2 feet high. The flowers are 1½ to 2 inches long, campanulate, yellow-green, tessellated with dull purple. Native to the Himalayan region at altitudes of 8,000 to 10,000 feet.

122857. GALIUM VERUM L. Rubiaceae. Yellow bedstraw.

No. 1552. From Kyelang, Lahul, Punjab, October 10, 1936, at 10,500 feet altitude. An attractive perennial found in dry places, growing in mats about 1 foot high, with very small, fragrant yellow flowers.

122858 to 122861. GENTIANA spp. Gentianaceae.

Nos. 122858 to 122860. *Tikta*. From Pukar, Lahul, Punjab, September 1936, from 12,000 to 13,000 feet altitude.

122858. GENTIANA sp.

No. 1611.

122859. GENTIANA sp.

No. 1603.

122860. GENTIANA sp.

No. 1605.

122861. GENTIANA sp.

No. 1500. *Tikta*. From Gundla, Lahul, Punjab, October 23, 1936, at 11,000 feet altitude. A biennial or perennial, growing 18 inches high in rather dry soil. The large blue-purple flowers are three-fourths of an inch across.

122862 to 122865. IMPATIENS spp. Impatiaceae.

122862. IMPATIENS sp.

No. 1539. From Manali, Kulu, Punjab, October 27, 1936, at 6,500 feet alti-

122766 to 122984—Continued

tude, in shady places. A tall plant up to 10 feet high, with large pink flowers.

122863. IMPATIENS sp.

No. 1592. *Mardonn*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. An attractive annual 2½ to 3 feet high, growing in hayfields. The flowers, about 1 inch long, are rose-purple with yellow in the throat.

122864. IMPATIENS sp.

No. 1593. *Fidonn*. A coarse annual growing to 10 feet high, in and along water. Flowers rose purple and 1 inch long.

122865. IMPATIENS sp.

No. 1782. A collection of seeds brought from Lahul by a native.

122866. INDIGOFERA LEPTOSTACHYA DC. Fabaceae.

No. 1524. From Koti, Kulu, Punjab, at 9,000 feet altitude. A well-formed graceful slender-branched shrub up to 8 feet high, producing an abundance of very attractive small, rose-purple flowers. Native to the Himalayan region.

122867. DESMODIUM THIAEFOLIUM (D. Don) G. Don. Fabaceae.

No. 1532. From Koti, Kulu, Punjab, October 26, 1936, at 9,000 feet altitude. An attractive deciduous shrub with loose slender branches, thick green trifoliolate leaves about 4 inches long, and rose to pink flowers in lax racemes often a foot long. The plant grows on dry isolated slopes and will stand freezing.

For previous introduction see 116600.

122868. INULA ROYLEANA DC. Asteraceae. Blackbud inula.

No. 1487. *Manruta*. From Kolung, Lahul, Punjab, October 14, 1936, at 12,000 feet altitude. A cultivated plant with large ovate, hairy leaves and orange-yellow flower heads 2 to 3 inches across, borne on a stem up to 5 feet high.

For previous introduction see 51037.

122869 to 122875. IRIS spp. Iridaceae.

122869 and 122870. IRIS KUMAONENSIS Wall.

A dwarf iris of the *Pseudevansia* section, 2 to 12 inches high, native to the western Himalayas from Kashmir to Kumaon between 9,000 and 12,000 feet altitude. The flaccid linear leaves are 12 to 14 inches long, and the solitary flowers have a perianth tube 2 to 3 inches long. The bright lilac falls, 1 to 2 inches long, are blotched with darker lilac, and the claw has a beard of yellow-tipped hairs on a white crest. The erect standards are 1½ inches broad.

For previous introduction see 110098.

122869. No. 1571. *Prangalch*. From Kolung, Lahul, Punjab, August 15, 1936, at 12,000 feet altitude.

122870. No. 1730. Presented by the Director, Department of Agriculture, Kashmir.

122871. IRIS sp.

No. 1646. From Chitkul, Rampur-Bushahr, August 26, 1936. A plant 2 feet high, with nearly stemless bloom and leaves 5 mm. wide.

122766 to 122984—Continued

122872. IRIS sp.

No. 1523. From Naggar, Kulu, Punjab, October 28, 1936. A tall species growing in dry pine forest or along streams. Flowers $2\frac{1}{2}$ inches across; falls wine, blotched darker, standards with bluish tinge.

122873. IRIS sp.

No. 1155. *Tisma*. From Skardo, Baltistan, Kashmir, August 15, 1936, at 6,500 feet altitude, common along water-courses and roads. Plants 3 feet high; leaves three-eighths of an inch wide; flowers said to be blue.

122874. IRIS sp.

No. 1377. From Deskit, Nubra, Shyok Valley, Kashmir, September 11, 1936, at 9,000 feet altitude. Found growing in clumps along the borders of fields. The plant is about 2 feet high and of the *Iris ensata* type.

122875. IRIS sp.

No. 1402. From Leh, Ladak, Kashmir, September 16, 1936, at 10,500 feet altitude. An iris $2\frac{1}{2}$ feet high, found in field borders; leaves 2 inches wide, flowers bluish.

122876. JAESCHKEA CANALICULATA (Royle) Knobl. (*J. latiseptala* C. B. Clarke). Gentianaceae.

No. 1736. Presented by the Director, Department of Agriculture, Kashmir. An erect-stemmed annual about 2 feet high, with oblong leaves about $1\frac{1}{2}$ inches long and small blue flowers in cymes. Native to the Himalayan region at altitudes of 9,000 to 13,000 feet.

122877 to 122879. JUNIPERUS spp. Pinaceae. Juniper.

122877. JUNIPERUS COMMUNIS L.
Common juniper.

No. 1562. *Pama*. From Kolung, Lahul, Punjab, October 10, 1936, at 12,000 feet altitude.

For previous introduction see 109093.

122878. JUNIPERUS MACROPODA Boiss.

No. 1455. *Shukpas*. From Kolung, Lahul, Punjab, October 10, 1936, at 11,000 feet altitude. A tree up to 50 feet high, with a trunk 33 feet in girth and light-green foliage. Native to the Himalayan region and westward between 5,000 and 14,000 feet altitude.

122879. JUNIPERUS sp.

No. 1111. From above Sodpur, Baltistan, Kashmir, August 10, 1936, at 2,000 feet altitude. The tree has a diameter of over 5 feet, is most attractively gnarled, and has an abundance of large fruits over one-fourth of an inch in diameter.

122880. LAVATERA THURINGIACA L. Malvaceae. Treemallow.

No. 1282. From Shigar, Baltistan, Kashmir, August 20, 1936, at 6,500 feet altitude. A cultivated perennial, 4 feet high, with rose-colored flowers 2 inches across.

122881. LIGUSTRUM sp. Oleaceae.

No. 1972. From Darjeeling, December 25, 1936, at 6,000 feet altitude. An ornamental shrub.

122766 to 122984—Continued

122882 to 122889. LONICERA spp. Caprifoliaceae. Honeysuckle.

122882. LONICERA sp.

No. 1297. From Shigar Nulla, Baltistan, Kashmir, August 22, 1936, at 9,000 feet altitude. A bush 5 feet high, growing along a river on a dry slope. The crimson fruits turn black as they ripen.

122883. LONICERA sp.

No. 1383. *Chenchen*. From Karzong, Baltistan, Kashmir, September 13, 1936. A low dense shrub about 3 feet high with small narrow leaves and large rose-pink flowers which are exceedingly fragrant.

122884. LONICERA sp.

No. 1447. *Chenchen*. From Rachogba, Rupshu, October 5, 1936, at 13,000 feet altitude. A low dense shrub up to 3 feet high, with large fragrant pink flowers. Like No. 1383 (P. I. 122883).

122885. LONICERA OBOVATA Royle.

No. 1461. *Peltsishing*. From Pukar, Lahul, Punjab, October 16, 1936, at 12,000 feet altitude. A low bushy shrub 1 to $1\frac{1}{2}$ feet high with slender branches and small leaves, growing usually in damp places. The flowers are yellowish and the fruit has a bluish bloom.

For previous introduction see 76264.

122886. LONICERA sp.

No. 1476. *Sett*. From Kyelang, Lahul, Punjab, October 21, 1936, at 10,500 feet altitude. A large shrub 10 to 12 feet high; very attractive when loaded with large currantlike translucent persistent white berries in which can be seen the black seeds.

122887. LONICERA sp.

No. 1494. *Sett*. From Kolung, Lahul, Punjab, October 19, 1936, at 11,000 feet altitude. A well-formed shrub 6 feet high; very attractive in the autumn when covered with bright-red translucent berries.

122888. LONICERA sp.

No. 1583. *Sett*. From Pukar, Lahul, Punjab, September 20, 1936, at 12,000 feet altitude. A low bushy honeysuckle up to 5 feet high, with black fruits.

122889. LONICERA sp.

No. 1782—H. Presented by a native.

122890. LUDWIGIA sp. Onagraceae.

No. 1793. From Dal Lake, Kashmir, November 23, 1936. A very attractive woody perennial growing in the water to a height of about 5 feet. The rosy-pink flowers are borne in long spikes and last for weeks.

122891. L Y C H N I S CASHEMERIANA Royle. Silenaceae.

No. 1585. *Chambozi*. From Kolung, Lahul, Punjab, September 1, 1936, at 12,000 feet altitude. An erect rigid perennial $2\frac{1}{2}$ feet high, related to *Lychnis indica*, with erect or nodding white flowers in contracted cymes. Native to Kashmir.

122892 to 122894. MALVA spp. Malvaceae. Mallow.

122766 to 122984—Continued

122892. MALVA SYLVESTRIS L.

No. 1417. *Gralchampa*. From Leh, Ladak, Punjab, September 16, 1936, at 10,500 feet altitude. A cultivated winter annual 4 feet tall with dark-magenta flowers $1\frac{1}{4}$ inches across, borne over a long season.

For previous introduction see 122518.

122893. MALVA VERTICILLATA L.

No. 1610. *Nikantsi*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude.

122894. MALVA PARVIFLORA L.

No. 1782—I. Seeds presented by a native.

122895. MECONOPSIS ACULEATA Royle. Papaveraceae.

No. 1766. Presented by the Director, Department of Agriculture, Kashmir. A biennial Himalayan plant with hairy stems and rosettes of blunt pointed leaves. The flowers, bright blue with golden yellow throats, are borne in spikelike racemes, the flowers opening from the top of the raceme downward.

For previous introduction see P. I. 55300.

122896. MECONOPSIS sp.

No. 1782—D. Seeds presented by a native.

122897. MELIA sp. Meliaceae.*

No. 1505. From Kulu, Kulu, Punjab, November 12, 1936, at 4,500 feet altitude. An attractive tree with long trusses of large purple flowers.

122898. MELOTHRIA sp. Cucurbitaceae.

No. 1508. From Lahul, Punjab, November 1936.

122899. MELOTHRIA sp. Cucurbitaceae.

No. 2165. From Dacca, Bengal, January 14, 1936. An annual climber, hairy throughout, with small red fruits.

122900. MOMORDICA CHARANTIA L. Cucurbitaceae. Balsam-pear.

No. 1676. *Karela*. Presented by the Director, Department of Agriculture, Kashmir. A form with large fruits, less bitter than usual.

122901. MORINA sp. Dipsacaceae.

No. 1300. *Dohila*. From Morungkor, Baltistan, Kashmir, August 2, 1936. Found on a dry slope. The snowy white flowers, 3 inches across, have a strong Madonna-lily scent.

122902. MYRICARIA sp. Tamaricaceae.

No. 1360. *Ombu*. From Tarkalung, Baltistan, Kashmir, September 6, 1936, at 9,000 feet altitude. An attractive well-formed bush 8 feet high, with small leaves and long terminal spikes of small rose-colored flowers.

122903. NEPETA sp. Menthaceae.

No. 1546. From Koti, Kulu, Punjab, October 27, 1936, at 9,000 feet altitude. A tall perennial mint 3 feet high, with pale, bluish-purple flower heads $1\frac{1}{2}$ inches long. Found growing along the edges of fields.

122904. PAEONIA EMODI Wall. Ranunculaceae.

No. 1722. Presented by the Director, Department of Agriculture, Kashmir. A

122766 to 122984—Continued

peony up to 2 feet high, with ternatisect leaves 6 to 12 inches long and white flowers. Native to the temperate Himalayas.

122905. PASTINACA sp. Apiaceae.

No. 1601. *Shuass*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. An umbellifer 4 feet tall, found growing in meadows.

122906 to 122912. PEDICULARIS spp. Scrophulariaceae.

Nos. 122906 to 122908 were purchased from the Director, Department of Agriculture, Kashmir.

122906. PEDICULARIS EICORNUTA Klotzsch.

No. 1765.

122907. PEDICULARIS PECTINATA Wall.

No. 1764.

122908. PEDICULARIS SIPHONANTHA D. Don.

No. 1767.

122909. PEDICULARIS SIPHONANTHA D. Don.

No. 1522. *Hunamentok*. From Kulu, Lahul, Punjab, October 1, 1936, at 12,000 feet altitude. An attractive perennial 1 foot high; flowers large, old rose, with a large white eye. Found growing in sod, watered well by springs.

122910. PEDICULARIS sp.

No. 1572—A. From Pukar, Lahul, Punjab, August 20, 1936, at 12,000 feet altitude. An attractive pink-flowered species.

122911. PEDICULARIS sp.

No. 1576. *Lugruserpo*. From Pukar, Lahul, Punjab, August 15, 1936, at 12,000 feet altitude. A showy species 1 foot high with large yellow flowers.

122912. PEDICULARIS sp.

No. 1361. From Chalunka Nulla, Baltistan, Kashmir, September 5, 1936, at 10,000 feet altitude. A pedicularis about 8 inches high, with white flowers, the beaks tipped with rose.

122913. PHLOMIS SPECTABILIS Falc. Menthaceae.

No. 1723. Purchased from the Director, Department of Agriculture, Kashmir. A tall herbaceous perennial about 6 feet high, with large ovate-cordate basal leaves, the stem leaves smaller upwards, and whorls of rather large rose-purple flowers. Native to the Himalayas from 3,000 to 8,000 feet altitude.

122914. PHLOMIS sp. Menthaceae.

No. 1782—A. Seeds presented by a native.

122915. PICRORRHIZA KURROA Benth. Scrophulariaceae.

No. 1725. Purchased from the Director, Department of Agriculture, Kashmir.

122916. PINUS ROXBURGHII Sargent (*P. longifolia* Roxb.). Pinaceae.

No. 1673. *Kail*. From above Kulu, Kulu, Punjab, November 15, 1936, at 5,000 feet altitude. A tree, native to the lower Himalayas at altitudes of 1,500 to 7,500 feet, often over 100 feet high, with a round symmetrical head, but sometimes stunted and gnarled. The light green pendulous

122766 to 122984—Continued

leaves, in clusters of 3, are 9 to 12 inches long, and persist for 3 or 4 years. The ovoid-conical cones are 4 to 7 inches long. When young, this pine is attractive for its long drooping pale-green foliage.

For previous introduction see 102771.

122917. PLANTAGO TIBETICA Hook. f. and Thoms. Plantaginaceae.

No. 1606. *Naram*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A dooryard perennial weed, also a potherb under certain conditions. Native to the Himalayan region.

122918. PLEUROSPERMUM sp. Apiaceae.

No. 1625. *Hurgatt*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A stout perennial up to 2 feet high; root used as a condiment.

122919. PODOPHYLLUM EMODI Wall. Berberidaceae. Himalayan mayapple.

No. 1528. *Mukutumtsi*. From Pukar, Lahul, Punjab, October 6, 1936, at 10,000 feet altitude.

122920. PODOPHYLLUM EMODI Wall. Berberidaceae. Himalayan mayapple.

No. 1732. Presented by the Director, Department of Agriculture, Kashmir.

122921. POLYGONATUM sp. Convallariaceae.

No. 1575. *Birshaka*. From Pukar, Lahul, Punjab, August 20, 1936, at 12,000 feet altitude. The root is used to wash woollens.

122922. POLYGONATUM sp. Convallariaceae.

No. 1782-G. Seeds presented by a native.

122923 to 122927. POLYGONUM spp. Polygonaceae.

122923. POLYGONUM ALPINUM All.

No. 1734. Presented by the Director, Department of Agriculture, Kashmir. A hardy herbaceous perennial with very small white flowers. Native to Europe and Asia.

122924. POLYGONUM POLYSTACHYUM Wall. Fleecflower.

No. 1490. *Mushutsi*. From the Upper Bhaga Valley, Lahul, Punjab, October 1936, at 12,000 feet altitude. An attractive perennial sometimes 6 feet tall, with large dense panicles of creamy flowers. The stems, when young, may be stewed as rhubarb.

For previous introduction see 48340.

122925. POLYGONUM sp.

No. 1491. From Rahla, Kulu, Punjab, October 26, 1936, at 9,000 feet altitude. An attractive perennial 3 feet high, with sagittate leaves 6 inches long and spikes 4 inches long, of lovely crimson flowers.

122926. POLYGONUM sp.

No. 1449. *Nielo*. From Zingzingbar, Lahul, Punjab, October 9, 1936, at 13,000 feet altitude. A bushy perennial about 1 foot high, with small heads of cream-colored flowers. The plant is very ornamental in the fall when the leaves turn orange and red.

122927. POLYGONUM sp.

No. 1574. Presented by a collector.

122766 to 122984—Continued

122928. POTENTILLA ARGYROPHYLLA Wall. Rosaceae.

No. 1737. Purchased from the Director, Department of Agriculture, Kashmir. A perennial herb up to 3 feet high, with digitate leaves and many showy yellow flowers about 1 inch across, in panicles. Native to the Himalayan region from 8,000 to 13,000 feet altitude.

122929. POTENTILLA NEPALENSIS Hook. Rosaceae.

No. 1514. From Rahla, Kulu, Punjab, October 26, 1936, at 9,000 feet altitude. An erect or ascending perennial with stout stems about 2 feet high and showy purple flowers about 1 inch across. Native to the Himalayas between 5,000 and 9,000 feet altitude.

122930. GERANIUM NEPALENSE Sweet. Geraniaceae.

No. 1645. From Chitkul, Rampur-Bushahr, August 1936. Found growing in clumps 2 feet high, near springs in pine-fir forest. A perennial, sometimes procumbent, with cordate deeply five-lobed leaves with bright pink or red flowers. Native to Nepal.

For previous introduction see 115981.

122931. PRIMULA sp. Primulaceae.

No. 1333. From Talela, Baltistan, Kashmir, August 24, 1936, at 14,000 feet altitude. Plants 1 foot high; flowers rose-purple with a white eye.

122932. PRIMULA sp. Primulaceae.

No. 1385. From Karzong Pass, Ladak, Kashmir, September 14, 1936, at 15,000 feet altitude. Plants 18 inches high; flowers not seen.

122933. RAPHANUS SATIVUS L. Brassicaceae. Radish.

No. 1622. From Leh, Ladak, Kashmir, September 17, 1936, at 10,500 feet altitude.

122934. RHAMNUS sp. Rhamnaceae.

No. 1653. From above Bandrole, Kulu, Punjab, November 14, 1936, at 8,000 feet altitude. A spreading bush about 8 feet high; covered in spring with small fragrant green flowers and later with black fruits.

122935. RHAMNUS sp. Rhamnaceae.

No. 1579. *Tsado*. From Kolung, Lahul, Punjab, August 31, 1936, at 12,000 feet altitude. A low, gnarled dense bush growing at high altitudes.

122936. RHODODENDRON sp. Ericaceae.

No. 1558. *Balu*. From Dilburig, Lahul, Punjab, October 20, 1936, at 12,000 feet altitude. A low evergreen shrub 13 inches high with pale-yellow flowers 1 inch across.

122937. RHODODENDRON CAMPANULATUM Don. Ericaceae.

No. 1600. *Raduk*. Below Kukti Pass, Chamba, Punjab, July 1936, at 12,000 feet altitude. An evergreen 6 inches high, growing in masses; flowers large, purple-lavender and fragrant.

122938 to 122947. ROSA spp. Rosaceae.

Rose.

122938. ROSA EGLANTERIA L. Sweetbrier.

No. 1456. *Seaserpo*. From Kyelang, Lahul, Punjab, October 14, 1936, at 10,-

122766 to 122984—Continued

500 feet altitude. An ornamental shrub 5 to 6 feet high, covered in July with golden-yellow double flowers over 2 inches across.

122939 to 122942. *ROSA MACROPHYLLA* Lindl. Bigleaf rose.

122939. No. 1362. From Biokdang Nulla, Baltistan, Kashmir, September 5, 1936, at 10,000 feet altitude along a stream. A large shrub, 8 feet high, loaded with large globular red fruits one-half inch in diameter, crowned by persistent sepals.

122940. No. 1481. *Seamapo*. From the Upper Bhaga Valley, Lahul, Punjab, October 1936, at 12,000 feet altitude. A dense shrub 6 to 8 feet high, covered in the spring with very fragrant single flowers, over 2 inches across; some orange red and others three shades of pink, followed by large red hips. It grows well in dry situations.

122941. No. 1553. *Seamapo*. From Tsokang, Lahul, Punjab, October 21, 1936, at 9,000 feet altitude. Like No. 1481 (P. I. 122940), but collected at a lower altitude.

122942. No. 1482. Like No. 1481 (P. I. 122940), but this plant sent long thin shoots 20 feet up the tree among the branches of a juniper; fruited abundantly.

122943. *ROSA MOSCHATA* Mill. Musk rose.

No. 1635. *Kuāzi*. From above Bandrole, Kulu, Punjab, October 20, 1936, at 8,000 feet altitude. A climber 20 feet high, filled in June with intensely fragrant, single white flowers over an inch across.

For previous introduction see 105910.

122944. *ROSA* sp.

No. 1366. From Hund, Baltistan, Kashmir, September 7, 1936, at 9,000 feet altitude. A dense bush 20 feet high, filled with hips.

122945. *ROSA* sp.

No. 1375. From Hundar, Baltistan, Kashmir, September 10, 1936, at 9,000 feet altitude. Like No. 1376 (P. I. 122946), but with larger fruit.

122946. *ROSA* sp.

No. 1376. From Hundar, Baltistan, Kashmir, September 10, 1936, at 9,000 feet altitude. A large bush, 20 feet high, with a large crop of hips.

122947. *ROSA* sp.

No. 2145. From Parachinar, North West Frontier Province, December 1936. Presented by Ibrahim Shah, of the Department of Agriculture. A yellow rose with single flowers as big as a dime, borne profusely. The bush is about 5 feet high.

122948. *RUBUS SAXATILIS* L. Rosaceae.

No. 1516. *Sholshol*. From Pukar, Lahul, Punjab, September 1, 1936, at 13,000 feet altitude. A low unarmed woody perennial with trifoliate leaves about 6 inches long, found in a birch forest. The few fruits are scarlet, rather acid, but pleasant.

For previous introduction see 92301.

122766 to 122984—Continued

122949. *RUMEX* sp. Polygonaceae.

No. 1604. *Chumtsan*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. Found along streams.

122950. *SALVIA HIANIS* Royle. Menthaceae.

No. 1728. Presented by the Director, Department of Agriculture, Kashmir. A viscid-hairy perennial herb 2 to 3 feet high, with cordate toothed leaves, 4 to 7 inches long, on petioles often 10 inches long. The blue flowers, 1 to 2 inches long with inflated throats, are borne in large spreading panicles.

For previous introduction see 103326.

122951. *SALVIA* sp. Menthaceae.

No. 1618. *Zluptsi*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. An attractive mint, up to 2 feet high, found growing in field borders. The blue-purple flowers are in long heads.

122952. *SAPINDUS MUKOROSI* Gaertn. Sapindaceae. Chinese soapberry.

No. 1784. *Ritha*. From Kulu, Kulu, Punjab, November 20, 1936, at 4,500 feet altitude. A Chinese tree about 35 feet high, with alternate, pinnate leaves and round yellow fruits an inch in diameter. The flesh of the fruit is used as a soap to wash woolens.

For previous introduction see 105633.

122953 to 122955. *SAUSSUREA* spp. Astera-ceae.

122953. *SAUSSUREA* sp.

No. 1381. *Pangtsi*. From Karzong Pass, Ladak, Kashmir, September 14, 1936, at 15,000 feet altitude. The plant consists of a head of large flowers, 2 inches in diameter, with blue-purple stamens and a few basal leaves. Received under the name "minor," for which a place of publication has not been found.

122954. *SAUSSUREA* sp.

No. 1573. *Romentok*. From Tinu, Lahul, Punjab, September 16, 1936. A very attractive species, growing in clumps up to 2 feet high. The leaves are silvery and the flowers are a delicate mahogany brown.

122955. *SAUSSUREA* sp.

No. 1616. *Dafā*. From above Tinu, Lahul, Punjab, September 1936, at 11,000 feet altitude. A perennial over 3 feet tall, growing on dry slopes. The small rose-purple flowers are borne in clusters.

122956. *SAXIFRAGA* sp. Saxifragaceae.

No. 1580. *Shabora*. From Tinu, Lahul, Punjab, October 16, 1936. A species 10 inches high, with greenish flowers, but its chief attraction consists in the large oval leaves which turn red in the fall.

122957. *SCABIOSA* sp. Dipsacaceae.

No. 1521. From Gundla, Lahul, Punjab, October 23, 1936. A perennial growing on dry slopes, with attractive rose-purple flowers 2 inches across.

122958. *SCROPHULARIA SCOPOLI* Hoppe. Scrophulariaceae.

No. 1735. Presented by the Director, Department of Agriculture, Kashmir. A variable biennial with stout stems 2 to 3

122766 to 122984—Continued

feet high, ovate-oblong to cordate leaves 1 to 3 inches long, and large panicles of small greenish-purple flowers. Native to eastern Europe and western Asia.

122959. *SEDUM* sp. Crassulaceae.

No. 1384. *Sralto*. From Karzong Pass, Ladak, Kashmir, September 14, 1936, at 15,000 feet altitude. Found growing in clumps 18 inches high with corymbs, 1 inch across, of yellow flowers which turn red with age.

122960. *SENECIO* sp. Asteraceae.

No. 1587. *Zerjung*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A perennial about 2 feet high, with corymbs of yellow flowers less than one-half inch across.

122961. *SENECIO* sp. Asteraceae.

No. 1752. From Tandl, Lahul, Punjab, October 26, 1936, at 10,000 feet altitude. A small perennial 1 foot high, growing in clumps in dry situations. The yellow flower heads are 1 inch across.

122962. *SIUM SISARUM* L. Apiaceae.

Skirret.

No. 1763. *Zirra*. From Kyelang, Lahul, Punjab, October 1936, at 10,500 feet altitude. A popular Indian spice.

122963. *SOLANUM* sp. Solanaceae.

No. 1242. From Shigar, Baltistan, Kashmir, August 18, 1936. A xerophytic shrub 4 feet high, with much flattened black berries; found on the sand plain of a river.

122964. *SPIRAEA CANESCENS* D. Don. Rosaceae.

No. 1515. *Katishing*. From Koti, Kulu, Punjab, at 9,000 feet altitude. A shrub from 6 to 12 feet high, with long slender arching branches, small broad-oval to ovate leaves, and rather small white flowers in dense corymbs 2 to 3 inches across. Native to the Himalayan region.

122965. *SORBARIA SORBIFOLIA* (L.) A. Br. Rosaceae.

No. 1473. *Kahan*. From Tirot, Lahul, Punjab, October 22, 1936, at 9,000 feet altitude. A shrub about 6 feet high, of spreading habit, with large compound leaves which turn red in the fall, and huge panicles of creamy white flowers in the spring. Found in dry open places.

122966. *SORBARIA SORBIFOLIA* (L.) A. Br. Rosaceae.

No. 1474. From Naggar, Kulu, Punjab, October 27, 1936, at 6,000 feet altitude. Much like No. 1473 (P. I. 122965), but will stand only light frost.

122967. *PTERYGOTA ALATA* (Roxb.) R. Br. Sterculiaceae.

No. 2139. From Calcutta, January 7, 1937. A large tree, native to India, with ash-colored bark and yellow-tomentose branchlets. The large, heart-shaped leaves, 10 inches long by 7 inches wide, are clustered at the ends of the branches. The panicles of small tomentose flowers, without petals, are shorter than the leaves.

For previous introduction see 116789.

122968. *STERCULIA* sp. Sterculiaceae.

No. 2144. *Peshawari Badam* (Peshawari almonds). From Calcutta, January 7, 1937; said to have come from Peshawar.

122766 to 122984—Continued

A handsome shade tree; the seeds are eaten.

122969. *SYRINGA EMODI* Wall. Oleaceae. Himalayan lilac.

No. 1462. From Kyelang, Lahul, Punjab, October 14, 1936, at 10,500 feet altitude. A shrub up to 8 feet high, inclined to be scraggly but nevertheless attractive with its large trusses of creamy fragrant flowers. This strain is the hardiest and most attractive of any found in the Himalayas.

122970. *SPINACIA OLERACEA* L. Chenopodiaceae. Spinach.

No. 1412. *Palag*. From Leh, Ladak, Kashmir, September 16, 1936, at 10,500 feet altitude. A potherb, perhaps not different from the ones sent from lower altitudes.

122971. *TOONA CILIATA* Roemer. Meliaceae. Toon tree.

No. 1781. From Kulu, Kulu, Punjab, November 17, 1936, at 4,500 feet altitude. A roadside tree, growing to a diameter of about 2 feet. The small whitish flowers are in long clusters, but the chief value of the tree is that the leaves stay green late in the fall.

122972. *TRAGOPOGON* sp. Cichoriaceae.

No. 1617. *To*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude. A form with yellow flowers, found on dry slopes.

122973. *TRAGOPOGON* sp. Cichoriaceae.

No. 1754. From Pukar, Lahul, Punjab, September 1936, at 12,000 feet altitude.

122974 to 122977. *TRICHOSANTHES* spp. Cucurbitaceae.

122974 and 122975. *TRICHOSANTHES ANGUINA* L. Snakegourd.

Presented by the Director, Department of Agriculture, Kashmir.

122974. No. 1686. *Chichenda*. A white gourd about 3 feet long.

122975. No. 1694. *Hara Chichenda*. A green fruit about 3 feet long.

122976. *TRICHOSANTHES BRACTEATA* (Lam.) Voigt.

No. 1655. From Naggar, Kulu, Punjab, November 14, 1936, at 6,000 feet altitude. A vigorous vine, about 20 feet long, bearing an abundance of orange-red fruits the size and shape of duck eggs.

122977. *TRICHOSANTHES* sp.

No. 1791. From Kangra, Kangra, Punjab, November 23, 1936, at 2,500 feet altitude. An annual with an abundance of globose fruits three-fourths of an inch in diameter, brick-red with long blotches of white.

122978 to 122980. *TRIGONELLA FOENUM GRAECUM* L. Fabaceae. Fenugreek.

122978. No. 1701. *Methi*. Presented by the Director, Department of Agriculture, Kashmir.

122979. No. 1164. *Methi*. From Skardo, Baltistan, Kashmir, August 16, 1936. A potherb.

122980. No. 1422. *Shamilik*. From Leh, Ladak, Kashmir, September 17, 1936, at 10,500 feet altitude. A potherb.

122766 to 177984—Continued

122981. *VERBASCUM* sp. Scrophulariaceae.

No. 1573. *Kut*. From Kyelang, Lahul, Punjab, October 1, 1936, at 10,500 feet altitude. Cultivated for the roots, used in native medicine. The yield is heavy; one root may weigh 4 pounds when dried.

122982. *VERBASCUM* sp. Scrophulariaceae.

No. 1615. *Kolonasta*. From Pukar, Lahul, Punjab, August 1936, at 12,000 feet altitude.

122983. *VIBURNUM NERVOSUM* D. Don. Caprifoliaceae.

No. 1733. Presented by the Director, Department of Agriculture, Kashmir.

122984. *VICIA FABA* L. Fabaceae.
Broadbean.

No. 1172. [Received without notes.]

122985. *TRITICUM AESTIVUM* L. Pca-
ceae. Common wheat.

From Canada. Seeds presented by M. S. J. McMurachy, McConnell, Manitoba. Received March 22, 1937.

122986. *GOSSYPIUM* sp. Malvaceae.

From the Canal Zone. Seeds presented by S. P. Williams, Balboa Heights. Received January 12, 1937.

A tree cotton, native to the Canal Zone and to the Republic of Panama. It is not cultivated, but grows wild and becomes a small tree about 10 feet high.

122987 and 122988.

From the Straits Settlements. Seeds presented by the Botanic Gardens. Received March 22, 1937.

122987. *FICUS VARIEGATA* Blume. Mora-
ceae. Fig.

The "Gondang" tree of Java and Sumatra. A large forest tree with enormous numbers of long pedicelled fruits an inch or more across; when ripe, these are red marked with white streaks and dots.

For previous introduction see 67588.

122988. *ORYZA LATIFOLIA* Desv. Poaceae.
Rice.

A perennial wild rice distributed through parts of tropical Asia, Africa, and America. The tufted stems become 6 to 8 feet high, and the plant is said to flower and produce seeds throughout the year. The smooth leaves are 1 to 2 feet long and about an inch wide, and the erect spike is up to 4 inches long.

For previous introduction see 97259.

122989. *ALNUS NEPALENSIS* D. Don. Betulaceae.

From India. Seeds presented by the Range Officer, Ghum-Simana, Sukhiapokhri, Bengal, at the request of Walter Koelz, Bureau of Plant Industry. Received March 24, 1937.

A tree up to 70 feet high, with a trunk 3 to 4 feet in diameter, found between 4,000 and 7,000 feet altitude. It is a rapid grower, used chiefly for firewood.

For previous introduction see 116579.

122990 to 123002.

From the Union of Soviet Socialist Republics. Seeds purchased; received March 25, 1937.

122990 to 122996. *IRIS* spp. Iridaceae.

122990. *IRIS KOROLKOWI* Regel.
No. 53. Redvein iris.

For previous introduction see 112798.

122991. *IRIS ORCHIOIDES* Carr.

No. 54. A Juno iris from the mountains of Turkistan, with about 6 lanceolate leaves up to 9 inches long and a 3- to 6-headed stem, often a foot high. The bright-yellow falls have purple blotches on each side of the crest.

For previous introduction see 115077.

122992. *IRIS HALOPHILA SOGDIANA* (Bunge) Skeels.

No. 55. Leaves pale green, 1 to 1½ feet long; the stout terete stem, up to 2 feet high, often bears one or two spicate clusters of pale gray-lilac flowers below the end one. Native to Asia from Asia Minor eastward to Kashmir and Mongolia.

For previous introduction see 115078.

122993. *IRIS SONGARICA* Schrank.

No. 60. A densely tufted Apogon iris about 1 foot high, with narrow-linear, strongly ribbed leaves up to a foot in length and 2 or 3 lilac-colored flowers over an inch long. Native to central Asia.

For previous introduction see 113873.

122994. *IRIS STOLONIFERA* Maxim.

No. 59.

For previous introduction see 112802.

122995. *IRIS VICARIA* Vved.

No. 57. A Juno iris with about 6 lanceolate leaves 6 to 9 inches long, stems about twice as long, and lilac flowers with a bright yellow blotch in the center of the fall. Native to Turkistan.

122996. *IRIS WARLEYENSIS* Foster.

No. 58.

122997 to 123002. *TULIPA* spp. Liliaceae.
Tulip.

122997. *TULIPA FERGANICA* Vved.

No. 108.

122998. *TULIPA FOSTERIANA* Hoog.

No. 101.

For previous introduction see 109796.

122999. *TULIPA INGENS* Hoog.

No. 102.

123000. *TULIPA PRAESTANS* Hoog.

No. 104.

For previous introduction see 108413.

123001. *TULIPA KUSCHKENSIS* B. Fedtsch.

No. 113.

For previous introduction see 109800.

123002. *TULIPA TUBERGENIANA* Hoog.

No. 106.

123003. EVODIA MELIAEFOLIA (Hance)
Benth. Rutaceae.

From Cuba. Seeds presented by the Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received March 3, 1937.

Originally from the Forest Research Institute, Dehra Dun, India. A small, much-branched tree, native to India. The pinnately compound leaves are made up of 3 to 5 pairs of obliquely lanceolate leaflets 3 to 4 inches long, and the small white flowers are in cymes 8 inches across.

For previous introduction see 99671.

123004 to 123138.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received January 28, 1937.

123004. AGRIMONIA EUPATORIA L. Rosaceae.

No. 2398. From 16 km. east of Trabzon, August 12, 1936. An ornamental plant with attractive spikes of delicate yellow flowers.

123005. AJUGA sp. Menthaceae.

No. 1122. From between Akhisar and Manisa, June 11, 1936. A low-growing perennial with yellow flowers, found on dry rocky slopes.

123006. AJUGA sp. Menthaceae.

No. 1441. From 20 km. north of Gaziantep, July 2, 1936. An ornamental rock plant.

123007. AJUGA sp. Menthaceae.

No. 3323. From Ankara, June 20, 1936. A short, hairy rock plant with yellow flowers.

123008. NIGELLA SATIVA L. Ranunculaceae.
Black cumin.

No. 1386. From the Marsh bazar, July 2, 1936. Used as a flavoring for bread and other foods.

For previous introduction see 73490.

123009. ALLIUM sp. Liliaceae.

No. 1630. From 26 km. south of Diyarbakir, July 9, 1936.

123010. ALLIUM sp. Liliaceae.

No. 1150. *Charekotu*. From the Balikesir bazar, June 16, 1936. Used as flavoring for bread and other foods.

123011. ALLIUM sp. Liliaceae.

No. 1797. From 52 km. southwest of Elaziz, July 14, 1936.

123012. ALSINE sp. Silenaceae.

No. 2086. An ornamental rock plant from 25 km. southeast of Ankara on Alma Dag, August 1, 1936.

123013. ALYSSUM sp. Brassicaceae.

No. 566. From the Izmir bazar, June 23, 1935.

123014. ALYSSUM sp. Brassicaceae.

No. 1262. From the Bursa bazar, June 18, 1936.

123015. ANETHUM GRAVEOLENS L. Apiaceae.

No. 525. From the Mugla bazar, June 28, 1936.

123004 to 123138—Continued**123016. ANTHEMIS sp.** Asteraceae.

No. 791. From dry hills 46 km. north of Antalya, June 3, 1936.

123017. AQUILEGIA. Ranunculaceae.

No. 596. From the Izmir bazar, June 23, 1936. Garden hybrids.

123018. AQUILEGIA sp. Ranunculaceae.

No. 1273. *Hasake Kupe*. From the Bursa bazar, June 18, 1936.

123019 to 123022. ARENARIA spp. Silenaceae.**123019. ARENARIA sp.**

No. 2200. A rock plant from 102 km. southeast of Susheri, August 7, 1936.

123020. ARENARIA sp.

No. 2780. A rock plant from 35 km. south of Bursa, August 8, 1936.

123021. ARENARIA sp.

No. 2177. An ornamental rock plant from 100 km. southeast of Susheri, August 7, 1936.

123022. ARENARIA sp.

No. 721. A plant with small blue flowers, found in pine lands 5 km. south of Mugla, May 28, 1936.

123023. ASPARAGUS sp. Convallariaceae.

No. 1861. A wild asparagus from 26 km. west of Malatya, July 16, 1936.

123024. ATRIPLEX sp. Chenopodiaceae.

No. 3103. From the police station at Yozgat, October 9, 1936.

123025. BOREAVA sp. Brassicaceae.

No. 783. From a valley near Isparta, June 2, 1936.

123026. BRASSICA sp. Brassicaceae.

No. 2590. From 14 km. west of Sam-sun, August 23, 1936.

123027. BUPLEURUM sp. Apiaceae.

No. 726. From 2 km. south of Mugla, May 28, 1936.

123028. CAMPANULA sp. Campanulaceae.

No. 2761-A. A campanula with small blue bell-shaped flowers from Bursa.

123029. CENTAUREA sp. Asteraceae.

No. 1403. From 20 km. north of Gaziantep, July 2, 1936.

123030. CENTAUREA sp. Asteraceae.

No. 1490. A yellow composite from 42 km. north of Gaziantep, July 3, 1936.

123031. CEPHALARIA sp. Dipsacaceae.

No. 1487. From 44 km. north of Gaziantep, July 3, 1936.

123032. CERINTHE ASPERA Roth. Boraginaceae.

No. 638. From near Koshadasi, May 25, 1936. An annual with oval, auricled, often-spotted leaves, terminal clusters of rather large yellow flowers with dark crimson rings at the base, and the upper bracts often beautifully colored. Native to Europe.

123033. CHRYSANTHEMUM sp. Asteraceae.

No. 2333. From 60 km. south of Trabzon, August 10, 1936.

123004 to 123138—Continued

123034. *CISTUS* sp. Cistaceae.
No. 1186. *Second rose*. A pink-flowered shrub from 75 km. west of Balikesir, June 16, 1936. Found well distributed in Turkey.
123035. *CISTUS* sp. Cistaceae.
No. 2752. An ornamental shrub from Ulu Dag, 10 km. south of Bursa, September 7, 1936.
123036. *CONIUM* sp. Apiaceae.
No. 1631. From 70 km. south of Diyarbekir; found by a desert spring.
123037. *CORIANDRUM SATIVUM* L. Apiaceae.
Coriander.
No. 2646. From 24 km. southeast of Merzifon, August 25, 1936.
123038. *CORNUS* sp. Cornaceae.
No. 2409. A shrub from 32 km. west of Rize, August 13, 1936.
123039. *COTONEASTER* sp. Malvaceae.
No. 2639. From 66 km. southeast of Merzifon, August 25, 1936. A small tree with quantities of small, single-seeded red fruits.
123040. *COTONEASTER* sp. Malvaceae.
No. 2754. An ornamental shrub from Ulu Dag at 3,000 feet altitude, September 7, 1936.
123041. *CUMINUM CYMINUM* L. Apiaceae.
Cumin.
No. 1222. From the Bursa bazar, June 18, 1936. Used as a flavoring for meats.
- 123042 to 123044. *DELPHINIUM* spp. Ranunculaceae.
123042. *DELPHINIUM* sp.
No. 1664. From 44 km. east of Diyarbekir, July 10, 1936. A tall plant with blue-spurred flowers.
123043. *DELPHINIUM* sp.
No. 1667. From 25 km. east of Diyarbekir, July 10, 1936. A low plant with blue-spurred flowers.
123044. *DELPHINIUM* sp.
No. 1776. From 35 km. southwest of Elaziz, July 14, 1936.
123045. *VELEZIA RIGIDA* L. Silenaceae.
No. 1728. From 39 km. southeast of Elaziz, July 13, 1936. A rock plant with pink flowers.
- 123046 to 123048. *DIANTHUS* sp. Silenaceae.
123046. *DIANTHUS* sp.
No. 596. From the Antalya bazar, June 4, 1936.
123047. *DIANTHUS* sp.
No. 1788. From 9 km. southwest of Elaziz, July 14, 1936.
123048. *DIANTHUS* sp.
No. 2396. From 47 km. east of Trabzon, August 12, 1936. A small plant with attractive small flowers.
123049. *DRACOCEPHALUM* sp. Menthaceae.
No. 1721. From 39 km. east of Elaziz, July 13, 1936.

123004 to 123138—Continued

123050. *LALLEMANTIA PELTATA* (L.) Fisch. and Mey. Menthaceae.
No. 1860. From 11 km. west of Malatya, July 16, 1936.
123051. *EUONYMUS* sp. Celastraceae.
No. 2505. From 35 km. east of Ordu, August 19, 1936.
123052. *FERULA* sp. Apiaceae.
No. 613. From Ephesus, May 24, 1936.
123053. *FIBIGIA CLYPEATA* (L.) Medic. Brassicaceae.
No. 1739. From 30 km. southeast of Elaziz, July 13, 1936. A low herbaceous perennial 18 inches high, with small yellow flowers. Native to Europe.
123054. *FOENICULUM VULGARE* Hill. Apiaceae.
Fennel.
No. 1397. From the Marash bazar, July 2, 1936. Used for flavoring.
123055. *FUMANA* sp. Cistaceae.
No. 1311. From 20 km. north of Bursa, June 20, 1936. A perennial with yellow flowers, found in the hills among rocks.
123056. *HELIANTHEMUM* sp. Cistaceae.
No. 787. On the road to Dinar, west of Isparta, June 2, 1936. An annual with small yellow flowers.
123057. *HIPPOPHAE RHAMNOIDES* L. Elaeagnaceae.
Common sea-buckthorn.
No. 2397. From 68 km. east of Trabzon, August 12, 1936. A tree, growing near the seashore.
For previous introduction see 115076.
123058. *HYOSCYAMUS* sp. Solanaceae.
No. 814. From Antalya, June 4, 1936.
123059. *HYPERICUM* sp. Hypericaceae.
No. 1519. From 25 km. east of Gaziantep, July 5, 1936. A species with beautiful brown flowers.
123060. *INULA* sp. Asteraceae.
No. 2970. From 17 km. northeast of Izmir, September 24, 1936. A rock plant with handsome white, feltlike foliage.
123061. *LATHYRUS ODORATUS* L. Fabaceae.
Sweet pea.
No. 563. From the Izmir bazar, May 23, 1936.
123062. *LYCHNIS* sp. Silenaceae.
No. 2793. From Ulu Dag, at 8,000 feet altitude, September 9, 1936. A rock plant.
123063. *AGROSTEMMA GITHAGO* L. Silenaceae.
No. 640. On the road to Milas, May 26, 1936. A form of this species with beautiful large purple flowers $2\frac{1}{2}$ inches across, borne profusely. Plant slender and much branched.
123064. *LYCHNIS* sp. Silenaceae.
No. 1503. From 5 km. southeast of Gaziantep, July 4, 1936.
123065. *LYTHRUM* sp. Lythraceae.
No. 2292. From 45 km. east of Erzincan, August 9, 1936.

123004 to 123138—Continued

123066. *MATTHIOLA* sp. Brassicaceae.
No. 1567. From 30 km. north of Urfa, July 7, 1936. A plant with crumpled lavender flowers, common in dry waste places in Anatolia; it makes a good cover crop in the spring.
123067. *ERYSIMUM* sp. Brassicaceae.
No. 1798. From 9 km. southwest of Elaziz, July 14, 1936.
123068. *MIMOSA PUDICA* L. Mimosaceae.
Sensitiveplant.
No. 598. From the Antalya bazar, June 4, 1936.
For previous introduction see 88157.
123069. *MUSCARI* sp. Liliaceae.
No. 1529. From 22 km. southeast of Urfa, July 6, 1936.
123070. *NICOTIANA* sp. Solanaceae.
No. 2399. From 68 km. east of Trabzon, August 12, 1936. A species with yellow flowers.
123071. *PAPAVER* sp. Papaveraceae.
No. 1729. From 42 km. southeast of Elaziz, July 13, 1936.
123072. *PASTINACA* sp. Apiaceae.
No. 2413. From 32 km. west of Rize, August 3, 1936. A fragrant umbellifer with leaves like the parsnip.
123073. *RANUNCULUS* sp. Ranunculaceae.
No. 2303. From 76 km. north of Gemushane, August 10, 1936. A species with double yellow flowers.
123074. *RANUNCULUS* sp. Ranunculaceae.
No. 1591. From 32 km. east of Siverek, July 7, 1936. Plants growing near a spring in the desert.
123075. *RAPISTRUM* sp. Brassicaceae.
No. 771. From ruins near Denizli, May 31, 1936.
- 123076 to 123078. *RHAMNUS* sp. Rhamnaceae.
123076. *RHAMNUS* sp.
No. 2310. A shrub found on dry rocks 10 km. north of Gemushane, August 10, 1936.
123077. *RHAMNUS* sp.
No. 2405. A large bush or small tree; from 45 km. east of Trabzon, August 13, 1936.
123078. *RHAMNUS* sp.
No. 2576. A shrub from 7 km. west of Terme, August 27, 1936.
123079. *RHUS* sp. Anacardiaceae.
No. 3415. From a dry rocky slope, 3 km. northeast of Ankara, June 26, 1936.
123080. *RINDERA* sp. Boraginaceae.
No. 1420. From 17 km. north of Gaziantep, July 2, 1936.
123081. *RUTA GRAVEOLENS* L. Rutaceae.
No. 1451. From 17 km. north of Gaziantep, July 2, 1936.
- 123082 to 123095. *SALVIA* spp. Menthaceae.
Sage.

123004 to 123138—Continued

123082. *SALVIA* sp.
No. 1444. From 37 km. north of Gaziantep, July 2, 1936.
123083. *SALVIA* sp.
No. 714. From 2 km. south of Mugla, May 28, 1936. A mint with white flowers.
123084. *SALVIA TRILOBA* L.
No. 1100. Along the road between Manisa and Izmir, June 11, 1936.
123085. *SALVIA* sp.
No. 1101. From near Kirkagach, June 11, 1936. A mint with light-blue flowers.
123086. *SALVIA* sp.
No. 1210. From 40 km. west of Balikesir, June 16, 1936.
123087. *SALVIA NAPIFOLIA* Jacq.
No. 1280. From 25 km. east of Bandirma, June 18, 1936. A perennial sage similar to *Salvia verticillata*, with stems about 2 feet high, the lower leaves lyrate, the upper ones ovate-subcordate, and dark-blue flowers. Native to the Mediterranean region.
123088. *SALVIA* sp.
No. 1670. From 16 km. east of Diyarbekir, July 10, 1936.
123089. *SALVIA* sp.
No. 1781. From 52 km. southwest of Elaziz, July 14, 1936.
123090. *SALVIA* sp.
No. 1787. From 9 km. southwest of Elaziz, July 14, 1936.
123091. *SALVIA* sp.
No. 1921. From Birejik, July 21, 1936.
123092. *SALVIA* sp.
No. 1955. From Birejik, July 22, 1936.
123093. *SALVIA* sp.
No. 2002. From 7 km. west of Chiftahane, July 25, 1936. A mint with white sickle-shaped flowers, spaced far apart.
123094. *SALVIA* sp.
No. 2166. From 84 km. east of Sivas, August 6, 1936.
123095. *SALVIA FORSKAHLII* L.
No. 2330. From 50 km. south of Trabzon, August 10, 1936. A hardy perennial sage up to 18 inches high, with broad ovate leaves and violet flowers in long racemes. Native to Asia Minor.
123096. *MELISSA OFFICINALIS* L. Menthaceae.
Common balm.
No. 2392. From 16 km. east of Trabzon, August 12, 1936.
For previous introduction see 73488.
- 123097 to 123100. *SALVIA* spp. Menthaceae.
123097. *SALVIA* sp.
No. 2501. From 125 km. southwest of Shebinkarahisar, August 18, 1936. A species with the leaves covered with long silky hairs.

123004 to 123138—Continued

123098. *SALVIA* sp.
No. 3357. From 65 km. west of Bursa, June 18, 1936. A species with white flowers.
123099. *SALVIA* sp.
No. 3436. From Alın Dag, June 28, 1936.
123100. *SALVIA* sp.
No. 1096. A pungent herb from 15 km. northwest of Izmir, June 11, 1936.
123101. *SCABIOSA* sp. Dipsacaceae.
No. 1730. A low, white-flowered rock plant from the mountains 32 km. southeast of Elaziz, July 13, 1936.
123102. *SCABIOSA* sp. Dipsacaceae.
No. 3106. From 40 km. north of Kalejik, October 12, 1936. A spiny compact rock plant, very attractive when in bloom.
123103. *PTEROCEPHALUS PLUMOSUS* (L.) Coult. Dipsacaceae.
No. 628. From Ephesus, May 24, 1936. An ornamental plant with lavender flowers.
- 123104 to 123106. *SCABIOSA* spp. Dipsacaceae.
123104. *SCABIOSA SICULA* L.
No. 1310. From 20 km. north of Bursa, June 20, 1936. A low annual with red flowers. Native to the Mediterranean region.
123105. *SCABIOSA* sp.
No. 1312. From 20 km. north of Bursa, June 20, 1936. An ornamental plant with white flowers.
123106. *SCABIOSA* sp.
No. 3321. *Bird's eye*. From Ankara, May 20, 1936. An ornamental found both wild and cultivated.
123107. *SCORZONERA* sp. Cichoriaceae.
No. 752. From the mountains between Denizli and Tavas, May 30, 1936.
123108. *SCUTELLARIA* sp. Menthaceae.
No. 1746. From 39 km. east of Elaziz, July 13, 1936.
- 123109 to 123112. *SEDUM* spp. Crassulaceae.
123109. *SEDUM GRACILE* C. A. Mey.
No. 2301. From 53 km. north of Gemushane, August 10, 1936. A low succulent with white flowers borne next to the ground.
123110. *SEDUM HISPANICUM* L.
No. 2328. From 35 km. north of Gemushane, August 10, 1936. A succulent with pink flowers.
123111. *SEDUM ALBUM* L.
No. 2481. From 97 km. south of Giresun, August 17, 1936.
123112. *SEDUM* sp.
No. 2684. From the mountains 46 km. south of Tokat, August 26, 1936. A succulent with brilliant red flowers and leaves.
123113. *SENECIO NEBRODENSIS* L. Astera-ceae.
No. 2176. From 84 km. east of Sivas, August 6, 1936. An annual or, under some

123004 to 123138—Continued

- conditions, a perennial, with tall erect stems, pinnatisect leaves, and attractive yellow flower heads. Native to southern Europe.
123114. *SERRATULA* sp. Asteraceae.
No. 687. On the road to Milas, June 26, 1936, in dry pine woods. A purple-flowered, thistlelike composite.
123115. *SETARIA ITALICA* (L.) Beauv. Poa-ceae. Millet.
No. 1898. From 50 km. north of Malatya, in dry rocky soil. July 17, 1936.
- 123116 to 123124. *SILENE* spp. Silenaceae.
123116. *SILENE* sp.
No. 2761. From south of Bursa, September 7, 1936.
123117. *SILENE* sp.
No. 2799. A rock plant from Ulu Dag, September 9, 1936.
123118. *SILENE* sp.
No. 706. From 15 km. west of Mugla, May 27, 1936.
123119. *SILENE* sp.
No. 1184. From 10 km. west of Balıkesir, June 16, 1936, on a dry slope.
123120. *SILENE* sp.
No. 1585. From 5 km. east of Siverek, July 7, 1936.
123121. *SILENE* sp.
No. 1777. From 52 km. southwest of Elaziz, July 14, 1936.
123122. *SILENE* sp.
No. 1671. From 44 km. east of Diyarbekir, July 10, 1936.
123123. *SILENE* sp.
No. 2411. From 29 km. west of Rize, August 13, 1936. An ornamental with pink flowers.
123124. *SILENE GALLICA* L.
No. 2630. From 43 km. southwest of Samsun, August 24, 1936.
123125. *STAPHYLEA PINNATA* L. Staphyleaceae. European bladdernut.
No. 2385. In the woods between Trabzon and Rize, August 12, 1936. A tree-like shrub with deciduous leaves and terminal clusters of small white flowers and much inflated membranous podlike fruits.
For previous introduction see 109162.
- 123126 to 123128. *TEUCRIUM* spp. Menthaceae.
123126. *TEUCRIUM* sp.
No. 1569. From 30 km. north of Urfa, July 7, 1936.
123127. *TEUCRIUM* sp.
No. 1761. From the mountains 25 km. southeast of Elaziz, July 13, 1936. A fragrant, low-growing plant.
123128. *TEUCRIUM* sp.
No. 2093. A rock plant from Alma Dag, 25 km. southeast of Ankara, August 1, 1936.

123004 to 123138—Continued

123129 to 123131. *THYMUS* spp. Mentha-ceae.

123129. *THYMUS* sp.

No. 2308. From 53 km. north of Gemushane, August 10, 1936. Flowers borne in cloverlike heads.

123130. *THYMUS* sp.

No. 2099. From Alma Dag, 25 km. southeast of Ankara, August 1, 1936. A low compact shrub, covered with very fragrant flowers.

123131. *THYMUS SERPYLLUM* L.

No. 3447. From Alma Dag, June 28, 1936. A plant with fragrant leaves, found growing in cushionlike clumps among rocks.

123132. *TRIFOLIUM REPENS* L. Fabaceae.
White clover.

No. 1295. A large-flowered white clover, found 40 km. east of Bursa, June 16, 1936.

123133. *TUNICA PROLIFERA* (L.) Scop. Silenaceae.

No. 646. From Tire, May 25, 1936.

123134. *TUNICA* sp. Silenaceae.

No. 1079. From dry slopes 80 km. northwest of Izmir, June 10, 1936.

123135. *VERONICA* sp. Scrophulariaceae.

No. 2484. From 40 km. south of Giresun, August 17, 1936.

123136. *VIBURNUM* sp. Caprifoliaceae.

No. 2326. A shrub from 46 km. north of Gemushane, August 10, 1936.

123137. *VICIA TETRASPERMA* (L.) Moench. Vetch.

No. 1350. From Adana, June 10, 1936.

123138. *VIOLA* sp. Violaceae.

No. 1257. From the Bursa bazar, June 18, 1936.

123139 to 123143. *ORYZA SATIVA* L. Poaceae. Rice.

From China. Seeds presented by the Rice and Wheat Imperial Institute, Nanking. Received March 3, 1937.

123139. No. 28785. A pure line selection.

123140. No. 28865. Var. *Red chaff*.

123141. *Moh Tse Oza*.

123142. *Fee Lah Fow*.

123143. No. 30305. A pure line rice.

123144 to 123270.

From India. Seeds collected by Walter Koelz, Bureau of Plant Industry. Received March 23, 1937.

123144. *ABIES PINDROW* Spach. Pinaceae.
Fir.

No. 2300. *Tos*. Presented by the Kulu Forest Service, Kulu, Punjab, February 10, 1937.

For previous introduction see 122766.

123145. *ACACIA CONCINNA* (Willd.) DC. Mimosaceae.

No. 2225. *Sikaka*. From Madras, February 4, 1937. A large and very prickly woody climber with bipinnate leaves of

123144 to 123270—Continued

12 to 6 pinnae, 2 to 3 inches long, and small cream-colored to pink flowers in panicled globose heads. Native to southeastern Asia.

123146. *ALBIZZIA FALCATA* (L.) Backer. Mimosaceae.

No. 2259. From Bangalore, Mysore, February 9, 1937. A rapid-growing tropical Asiatic tree with large feathery leaves and small globular flower heads. It is used for shade in coffee plantations.

For previous introduction see 81406.

123147. *ALBIZZIA ODORATISSIMA* (L. f.) Benth. Mimosaceae.

No. 2261. From Bangalore, Mysore, February 9, 1937. A tall erect unarmed tree, with bipinnate leaves and very numerous small heads of fragrant white flowers. Native to the central Himalayas.

For previous introduction see 66648.

123148. *ALLIUM CEPA* L. Liliaceae. Onion.

No. 2271. From Bangalore, Mysore, February 9, 1937. A red globe onion; said to be native.

123149. *AMARANTHUS* sp. Amaranthaceae.

No. 2290. *Harive*. From Bangalore, Mysore, February 9, 1937. An all-season potherb.

123150. *AMARANTHUS* sp. Amaranthaceae.

No. 2291. *Clukarive*. From Bangalore, Mysore, February 9, 1936. An all-season potherb.

123151. *ANETHUM GRAVEOLENS* L. Apiaceae.

No. 2292. *Sabakshi*. Bangalore; Mysore, February 9, 1936. A common potherb in the hot parts of India.

123152. *ARGYREIA* sp. Convolvulaceae.

No. 2185. From Mahendra, Madras Presidency, January 23, 1937, at 4,000 feet altitude. A vigorous evergreen woody climber with large heart-shaped leaves nearly a foot long.

123153. *PELTOPHORUM INERME* (Roxb.) Llanos (*P. ferrugineum* Benth.). Caesalpiniaceae.

No. 2228. From Madras. A large unarmed tree used for street planting, with finely pinnate leaves and showy terminal racemes of small yellow fragrant flowers, followed by short flattened pods.

123154 to 123157. *BAUHINIA* spp. Caesalpiniaceae.

123154. *BAUHINIA VAHLII* Wight and Arn. Malu-creeper.

No. 2181. From Mahendra, Madras Presidency, January 22, 1937, at 4,000 feet altitude. A vigorous woody climber up to 40 feet high, with large velvety coriaceous leaves a foot long and terminal dense racemes of flowers. The large flat velvety brown pods are gathered by the natives of India, roasted, and the seeds eaten.

For previous introduction see 103489.

123155. *BAUHINIA ACUMINATA* L.

No. 2137. From Calcutta, January 7, 1937. A small ornamental shrub 5 feet high.

123144 to 123270—Continued

123156. *BAUHINIA* sp.
No. 2229. From Madras, Madras Presidency, February 6, 1937. A shrub about 6 feet high, bearing unscented white, starlike flowers about 1 inch across.
123157. *BAUHINIA* sp.
No. 2303. From Bangalore, Mysore, February 9, 1937.
- 123158 and 123159. *BRASSICA OLERACEA* *BO-TRYTIS* L. Brassicaceae. Cauliflower.
123158. No. 2133. *Phulgobi*. From Calcutta, January 6, 1937. Said to be a Patna variety.
123159. No. 2248. *Snowball*. From Bangalore, Mysore, February 7, 1937. A native variety, said to produce good heads throughout the year.
123160. *BUTEA MONOSPERMA* (Lam.) Taub. Fabaceae.
No. 2250. From Bangalore, Mysore, February 9, 1937. A small erect tree with large trifoliate leaves 4 to 8 inches long and large orange-red flowers 1 inch across in axillary and terminal racemes. Native to the Himalayas up to 4,000 feet altitude.
For previous introduction see 32792.
123161. *DICHOSTACHYS NUTANS* (Pers.) Benth. Mimosaceae.
No. 2190. From Mahendra, Madras Presidency, January 25, 1937, at 2,000 feet altitude. A spiny scraggly shrub about 8 feet high, native to central Africa, with rose-colored flowers in dense axillary spikes. The bipinnate leaves are composed of 5 to 10 pairs of pinnae, each with 10 to 20 pairs of leaflets.
For previous introduction see 50152.
123162. *CAJANUS INDICUS* Spreng. Fabaceae.
Pigeon pea.
- No. 2197. *Barda Kandals*. From Bengasai, Madras Presidency, January 26, 1937.
123163. *CANAVALIA VIROSA* (Roxb.) Wight and Arn. Fabaceae.
No. 2203. From Rati, Madras Presidency, January 29, 1937. An ornamental perennial climber which grows 10 feet long in thickets. The large fragrant flowers are deep rose color; the pods are not edible.
- 123164 to 123167. *CAPSICUM ANNUM* L. Solanaceae. Common redpepper.
123164. No. 2171. *Mirchi*. From Islampur, Bengal, January 15, 1937. Fruit red, about 2 inches long by three-fourths of an inch wide; flesh slightly pungent; seeds hot.
123165. No. 2212. *Mupokai*. From Ellore, Madras Presidency, February 1, 1937. A hot, red, elongate pepper, 3 to 4 inches long and 1 inch wide at the base.
123166. No. 2230. From Madras, Madras Presidency, February 6, 1937. A hot redpepper about 2 inches long by five-eighths of an inch wide.
123167. No. 2177. From Bengasai, Madras Presidency, January 22, 1937. Fruit scarlet, very hot, 3 inches long and pointed, wrinkled and furrowed, quite different from the usually grown strains.

123144 to 123270—Continued

- 123168 to 123170. *CASSIA* spp. Caesalpiniaceae.
123168. *CASSIA JAVANICA* L.
No. 2247. From Bangalore, Mysore, February 7, 1937. A small tree with gorgeous pink flowers over 2 inches across, borne in large clusters during the spring and early summer. It is deciduous in the dry season.
For previous introduction see 97954.
123169. *CASSIA NODOSA* Buch-Ham.
No. 2288. From Bangalore, Mysore, February 9, 1937.
For previous introduction see 116778.
123170. *CASSIA RENIGERA* Wall.
No. 2278. From Bangalore, Mysore, February 9, 1937. A tropical tree with compound leaves a foot long; the 30 to 40 obtuse leaflets, 1½ inches long, are leathery and finely hairy beneath. The small reddish flowers are in short dense racemes, and the cylindrical pod is a foot in length. Native to northern Burma.
For previous introduction see 103835.
123171. *CEDRUS DEODARA* (Lamb.) Loud. Pinaceae. Deodar cedar.
No. 2302. *Kelo*. Presented by the Kulu Forest Service, Punjab, February 10, 1937.
For previous introduction see 122821.
123172. *CENTROLOBIUM PARAENSE* Tul. Fabaceae.
No. 2286. *Porcupine tree*. From Bangalore, Mysore, February 9, 1937. A medium-sized, attractive Brazilian tree, with compound leaves and large clusters of orange-yellow flowers, followed by curious fruits like gigantic maple keys with wings 6 inches long which whirl with a circular motion as they fall. The egg-shaped basal portion, as large as a pullet's egg, is covered with spines like a sea-urchin.
For previous introduction see 97977.
123173. *CHENOPODIUM* sp. Chenopodiaceae.
No. 2289. *Chakavathe*. From Bangalore, Mysore, February 9, 1937. An all-season potherb.
- 123174 to 123181. *CITRULLUS* spp. Cucurbitaceae.
123174. *CITRULLUS COLOCYNTHIS* (L.) Schrad. Colocynth.
No. 2226. From Madras, Madras Presidency, February 5, 1937. A perennial herbaceous vine, allied to the watermelon. The small globose fruits, less than 3 inches in diameter, are mottled green and brown.
For previous introduction see 91528.
- 123175 to 123181. *CITRULLUS VULGARIS* Schrad. Watermelon.
123175. No. 2118. *Matira*. From Calcutta, January 4, 1937. Fruit subglobose, mottled, about 1 foot long.
123176. No. 2120. *Matira*. From Calcutta, January 4, 1937. An unmarked, dark-green, subglobose fruit 1 foot long.
123177. No. 2121. *Matira*. From Calcutta, January 4, 1937. A deep-green, unmarked, subglobose fruit 1 foot long.

123144 to 123270—Continued

123178. No. 2209. From Ellore, Madras Presidency, February 1, 1937. Fruit much attenuated, about 16 inches long by 6 inches in diameter; rind medium green with irregular blotched lines of lighter green, very tough; flesh red, firm, of fair quality.
123179. No. 2220. *Tarbuuz*. From Madras, Madras Presidency, February 4, 1937. Seeds used as medicine.
123180. No. 2282. *Tarbuuz*. From Bangalore, Mysore, February 9, 1937. Said to be a native variety.
123181. No. 2178. From Bengasai, Madras Presidency, January 22, 1937. An ornamental form with globose fruit 4 inches across, of a lovely maroon color.
123182. *COIX LACHRYMA-JOBI* L. Poaceae.
Jobs-tears.
No. 1790. From Jagendernaga, Mandi State, November 22, 1936, at 3,500 feet altitude.
123183. *COLVILLEA RACEMOSA* Boj. Caesalpinaceae.
No. 2273. From Bangalore, Mysore, February 9, 1937. An evergreen tree 30 to 40 feet high, with pinnate leaves 3 feet long and brilliant scarlet, curiously shaped flowers with 10 protruding stamens, borne in drooping racemes more than a foot long. Native to Madagascar.
For previous introduction see 103476.
123184. *CROTALARIA* sp. Fabaceae.
No. 2188. From Mahendra, Madras Presidency, January 24, 1937, at 4,000 feet altitude. An attractive perennial about 3 feet high, bearing spikes of large yellow flowers followed by large inflated pods.
- 123185 to 123189. *CUCUMIS MELO* L. Cucurbitaceae.
Muskmelon.
123185. No. 2134. *Kumriya*. From Calcutta, January 6, 1937; a Lucknow variety.
123186. No. 2135. *Kumriya*. From Calcutta, January 7, 1937; a Patna variety.
123187. No. 2281. *Kharbuza*. From Bangalore, Mysore, February 9, 1937. A native variety.
123188. No. 2297. From Montgomery, Punjab, February 10, 1937. Presented by the Deputy Director of Agriculture. An excellent native melon which will tolerate much heat.
123189. No. 2223. From Madras, February 4, 1937. A mixed sample.
- 123190 to 123193. *CUCUMIS SATIVUS* L. Cucurbitaceae.
Cucumber.
123190. No. 2198. From Mahendra, Madras Presidency, January 25, 1937, at 2,000 feet altitude. Fruit 2 inches long; skin yellow green, tough, flesh bitter. Probably keeps for months.
123191. No. 2221. *Vildreveli*. From Madras, February 4, 1937.
123192. No. 2214. *Doskai*. From Ellore, Madras Presidency, February 1, 1937. Fruit ovoid, to 6 inches long; rind yellow, more or less marked with brown blotches; pulp sour; used fried; a good keeper.

123144 to 123270—Continued

123193. No. 2246. *Sandakai*. From Bangalore, Mysore, February 7, 1937. Possibly a mixture of green and white varieties.
- 123194 to 123198. *CUCURBITA MOSCHATA* Duchesne. Cucurbitaceae.
Cushaw.
123194. No. 2122. *Kadu*. From Calcutta, January 4, 1937. Fruit oval, 18 inches long, orange brown mottled sparingly with green, moderately sweet.
123195. No. 2175. From Behrampur, Orissa, January 21, 1937. A smooth, cream-colored, pumpkin-shaped fruit with faint ribs, weighing about 10 pounds.
123196. No. 2176. From Behrampur, Orissa, January 21, 1937. A cream-colored, pumpkin-shaped fruit, mottled with green and spotted with darker green. Possibly the same as No. 2175 (P. I. 123195); it weighs 15 pounds.
123197. No. 2210. *Kumsa*. From Ellore, Madras Presidency, February 1, 1937. Fruits small, flattened, 1 by 6 inches, sometimes nearly globose and larger, smooth, ribbed, and orange buff. The flesh, orange yellow, is sweet and about 2 inches thick.
123198. No. 2232. *Kumsa*. From Madras, February 6, 1937.
123199. *DALBERGIA* sp. Fabaceae.
No. 2254. From Bangalore, Mysore, February 6, 1937. A medium-sized tree used as roadside shade.
123200. *DERRIS SCANDENS* (Roxb.) Benth. Fabaceae.
No. 2173. From Dacca, Bengal, January 16, 1937. A woody climber with compound leaves 3 to 6 inches long, composed of 9 to 19 leathery oblong leaflets, 1 to 2 inches in length. The pale-rose flowers are in dense axillary racemes. Native to the East Indies.
For previous introduction see 116744.
123201. *DOLICHOS LABLAB* L. Fabaceae.
Hyacinth-bean.
No. 2222. *Machukuti*. From Madras, February 4, 1937. Used both green and as dried beans.
123202. *DOLICHOS LABLAB* L. Fabaceae.
Hyacinth-bean.
No. 2242. *Awara*. From Bangalore, Mysore, February 7, 1937. A drought-resistant field crop, usually planted with *Eleusine indica*, and allowed to creep over the field.
123203. *DUABANGA SONNERATIODES* Buch-Ham. Lythraceae.
No. 2280. From Bangalore, Mysore, February 9, 1937. A handsome tree with shining evergreen leaves and white flowers, from the subtropical regions of north-eastern India. The light-brown bark peels off in thin flakes, and the gray, soft-yellow-streaked wood is used extensively in Bengal and Assam for making tea boxes, as it seasons well, takes a good polish, and does not warp.
For previous introduction see 61602.

123144 to 123270—Continued

123204. *ELAEOCARPUS SPHAERICUS* (Gaertn.) Schum. *Elaeocarpaceae*.

No. 2255. From Bangalore, Mysore, February 9, 1937. A medium-sized tree which bears small blue fruits about the size of a plum; the curious seeds are rough and attractive and are often used as ornaments.

For previous introduction see 66264.

123205. *ELYMUS SIBIRICUS* L. *Poaceae*.
Grass.

No. 1386. From Katzong Pass, Ladak, Kashmir, September 15, 1936, at 13,000 feet altitude. A grass growing in very dry places where it forms clumps 18 inches tall.

123206. *ERYTHRINA VARIEGATA* Stickm. *Coraltree*.

No. 2204. From Rati, Madras Presidency, January 29, 1937. A tree 20 to 30 feet high, native throughout India, with clusters of large bright-red flowers which appear before the leaves. The pods are 4 to 8 inches long and contain dark carmine seeds.

For previous introduction see 116038.

123207. *ERYTHRINA VARIEGATA ORIENTALIS* (L.) Merr. *Fabaceae*. *Coraltree*.

No. 2257. From Bangalore, Mysore, February 9, 1937. A moderate-sized spineless tree native to the East Indies. It is of very rapid growth, with trifoliolate leaves and red flowers. In Ceylon the tree is used to shade crop plants; also the foliage is lopped for use as green manure.

For previous introduction see 94188.

123208. *EUPATORIUM ODORATUM* L. *Asteraceae*.

No. 2169. From Dacca, Bengal, January 15, 1937. An erect or semiscandent shrubby perennial often seen in thickets where it is covered with ageratumlike lavender flowers.

For previous introduction see 110189.

123209 to 123211. *FICUS* spp. *Moraceae*. *Fig*.

123209. *FICUS RUBIGINOSA* Desf. *Rusty fig*.

No. 2309. From Bangalore, Mysore, February 9, 1937. An evergreen tree 60 to 80 feet high, with wide-spreading branches, throwing out aerial roots like the banyan tree. The elliptical coriaceous leaves, 3 to 4 inches long, are smooth above and covered with attractive rusty tomentum beneath. Native to Australia.

For previous introduction see 101333.

123210. *FICUS BENJAMINA* L. *Benjamin fig*.

No. 2307. From Bangalore, Mysore, February 9, 1937.

For previous introduction see 92948.

123211. *FICUS KRISHNAE* C. DC.

No. 2308. From Bangalore, Mysore, February 9, 1937. A very distinct small tree with large cup-shaped leaves. The yellow fruits are axillary, sessile, and about one-half inch in diameter. It has been considered a horticultural variety of *Ficus benghalensis*.

123144 to 123270—Continued

123212. *GARCINIA* sp. *Clusiaceae*.

No. 2189. *Olakuli*. From Mahendra, Madras Presidency, January 20, 1937, at 4,000 feet altitude. A beautiful tree with horizontal branches and handsome elliptical leaves nearly 1 foot long. The yellow fruits, 2 to 3 inches across, are shaped like tomatoes and are delightfully acid.

123213. *LIMNANTHEMUM CRISTATUM* (Roxb.) Griseb. *Menyanthaceae*.

No. 2206. From Mandassa, Madras Presidency, January 30, 1937. An aquatic herb with an abundance of small fragrant white flowers, borne over a long period, at the base of the nymphaealike leaf.

123214. *GLIRICIDIA SEPIUM* (Jacq.) Kunth. *Fabaceae*.

No. 2258. From Bangalore, Mysore, February 9, 1937.

For previous introduction see 110930.

123215 to 123218. *IPOMOEA* spp. *Convolvulaceae*.

123215. *IPOMOEA* sp.

No. 2184. From Mahendra, Madras Presidency, January 22, 1937, at 3,000 feet altitude. A herbaceous climber 20 feet long, found in thickets. The yellow flowers are about 3 inches across.

123216. *IPOMOEA* sp.

No. 2237. From Madras, February 6, 1937. A plant with large-toothed palmate leaves and yellow blossoms about 2 inches across with a wine-madder spot in the throat.

123217. *IPOMOEA* sp.

No. 2216. From Ellore, Madras Presidency, February 2, 1937. A convolvulus with flowers over 2 inches across, wine colored with a deep throat, remaining open all day. Found growing on the edge of mudholes; the long runners float on the water and bear an abundance of beautiful flowers.

123218. *IPOMOEA* sp.

No. 2208. From Rati, Madras Presidency, January 20, 1937. A small morning-glory with small linear leaves and whitish flowers about one-half inch across, with a magenta spot in the throat.

123219. *JACARANDA MIMOSIFOLIA* Don. *Bigoniaceae*. *Green-ebony*.

No. 2253. From Bangalore, Mysore, February 9, 1937.

For previous introduction see 116043.

123220. *JOANNESIA PRINCEPS* Vell. *Euphorbiaceae*.

No. 2306. From Bangalore, Mysore, February 9, 1937. A large tropical American tree with handsome evergreen 3- to 7-foliolate leaves about 4 inches long and coconutlike fruits about 5 inches in diameter with 4 large oily seeds. It is related to the tung-oil tree (*Aleurites fordii*).

For previous introduction see 102624.

123221. *LUFFA ACUTANGULA* (L.) Roxb. *Cucurbitaceae*. *Singka towelgourd*.

No. 2136. *Gina tori*. From Calcutta, January 7, 1937. A small variety, used as a vegetable when young.

For previous introduction see 121955.

123144 to 123270—Continued

123222. *MEDICAGO* sp. Fabaceae.

No. 2283. From Bangalore, Mysore, February 9, 1937. Purchased from the Government Seed Farm; said to be Mysore naturalized seed and the best grown in this region.

123223. *MEDICAGO* sp. Fabaceae.

No. 2284. From Bangalore, Mysore, February 9, 1937. Purchased in the market.

123224. *MILLETIA OVALIFOLIA* (Wight and Arn.) Kurz. Fabaceae.

No. 2129. From Calcutta, January 6, 1937. Presented by the Royal Botanical Gardens. A medium-sized tree with odd-pinnate leaves from 4 to 18 inches long and slender axillary racemes of small blue fragrant flowers.

For previous introduction see 116049.

123225. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 2086. *Uckhey*. From Calcutta, January 1, 1937. Fruits smaller and less bitter than the usual sorts.

123226. *MOMORDICA CHARANTIA* L. Cucurbitaceae. Balsam-pear.

No. 2211. From Ellore, Madras Presidency, February 1, 1937. Fruit pale green to whitish, about 1 foot long, thin and tapering; less bitter than most.

123227. *NYCTANTHES ARBOR-TRISTIS* L. Oleaceae. Nightjasmine.

No. 2256. From Bangalore, Mysore, February 9, 1937. A large evergreen shrub or small tree with ovate leaves about 4 inches long and small, very fragrant white night-blooming flowers in sessile heads. The flowers yield a yellow dye. Cultivated generally in India between 1,000 and 3,000 feet altitude.

For previous introduction see 33577.

123228. *NYMPHAEA* sp. Nymphaeaceae.

No. 2207. From Mandassa, Madras Presidency, January 30, 1937. A waterlily which grows in shallow ponds. The fragrant single, blue-violet flowers are on a stem 2 inches above the water and close at night.

123229. *NYMPHAEA* sp. Nymphaeaceae.

No. 2215. From Kula Lake, Madras Presidency, February 2, 1937. A plant which grows in about 3 feet of water; the elongate leaves, about 1 foot long, are conspicuously toothed; and the white flowers, 6 inches across, are closed in the daytime.

123230 to 123233. *ORYZA SATIVA* L. Poaceae. Rice.

123230. No. 2158. *Katakara*. From the Government Rice Farm, Dacca, Bengal, January 14, 1937. A medium-fine, highland rice, sown broadcast; high yielding and maturing in 4 months.

123231. No. 2159. *Surpamukhi*. From the Government Rice Farm, Dacca, Bengal, January 14, 1937. A medium-fine highland rice, sown broadcast.

123232. No. 2161. *Charmok*. From the Government Rice Farm, Dacca, Bengal, January 14, 1937. A very fine highland rice suited to lighter soils. A medium-ripening variety, recommended for quality and yield.

123144 to 123270—Continued

123233. No. 2201. *Oryabim*. From Mandassa, Madras Presidency, January 27, 1937. One of the most popular of the locally grown varieties.123234. *PARKIA BIGLANDULOSA* Wight and Arn. Mimosaceae.

No. 2268. From Bangalore, Mysore, February 9, 1937. A large, handsome, quick-growing tree with feathery leaves 12 to 20 inches long and dense heads of small creamy flowers on a long peduncle. Native to the Malayan region.

123235. *PARMENTIERA CEREIFERA* Seem. Bignoniaceae. Candletree.

No. 2311. From Bangalore, Mysore, February 9, 1937. A tropical tree, native to Panama, which grows 30 to 40 feet high and produces from its stem and old branches a profusion of almost sessile, white flowers. These are followed by yellowish, cylindrical, smooth fruits 1 to 4 feet long and about 1 inch in diameter, resembling wax candles.

For previous introduction see 41722.

123236 to 123242. *PHASEOLUS* spp. Fabaceae.123236 and 123237. *PHASEOLUS LUNATUS* L. Lima beans.

123236. No. 2251. From Bangalore, Mysore, February 9, 1937. Sold in the market as green beans.

123237. No. 2196. From Bengasai, Madras Presidency, January 26, 1937. From the hill people who say they gather the beans in the forest.

123238 to 123242. *PHASEOLUS VULGARIS* L. Common bean.

123238. No. 2272. From Bangalore, Mysore, February 9, 1937.

123239. No. 2244. *Hurulikia*. From Bangalore, Mysore, February 7, 1937. Said to be disease resistant. Used both as green beans and as dry beans.

123240 to 123242. From Bengasai, Madras Presidency, January 26, 1937. From the hill people who say they gather the beans in the forest.

123240. No. 2196-A.

123241. No. 2196-B.

123242. No. 2196-C.

123243. *PHRAGMITES COMMUNIS* Trin. Poaceae. Grass.

No. 1378. From Deskit, Baltistan, Kashmir, September 9, 1936, at 9,000 feet altitude. A grass up to 18 inches high found on sand dunes; said to be eaten by cattle.

123244. *PICEA SMITHIANA* (Wall.) Boiss. Pinaceae. Himalayan spruce.

No. 2299. *Rai*. Presented by the Kulu Forest Service, Kulu, Punjab, February 10, 1937. A lofty tree, native to the mountains of northwestern India at altitudes of 7,000 to 11,000 feet; the terminal, drooping, pale-green cones are 4 to 6 inches long. The stiff, sharp, spirally arranged green leaves are crowded on pendulous, taillike twigs.

For previous introduction see 116605.

123144 to 123270—Continued

123245. *PINUS GRIFFITHII* McClelland (*P. excelsa* Wall.). Pinaceae.

No. 2301. *Kail*. Presented by the Kulu Forest Service, Kulu, Punjab, February 10, 1937. A pine, 50 to 100 feet high, growing between 5,000 and 11,000 feet altitude in the Himalayan region. The slender gray-green leaves, in fives, are 5 to 8 inches long, and the pale-brown, cylindrical cones are 6 to 12 inches long.

123246. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 2224. *Patani*. From Madras, Madras Presidency, February 4, 1937. Said to be mildew resistant.

123247. *PISUM SATIVUM* L. Fabaceae. Pea.

No. 2243. *Batani*. From Bangalore, Mysore, February 7, 1937. Said to be a hardy, disease-resistant pea.

123248. *SEMECARPUS ANACARDIUM* L. f. Anacardiaceae.

No. 2194. *Baliakuli*. From Bengasai, Madras Presidency, January 26, 1937, at 5,000 feet altitude. An attractive tree with large oval leaves and an abundance of yellow fruits that lose their astringency when fully ripe, and are eaten after roasting.

123249 to 123251. *SOJA MAX* (L.) Piper. Fabaceae. Soybean.

From the Government Gardens, Bangalore, Mysore, February 7, 1937. Said to have come from Java.

123249. No. 2240.

123250. No. 2238.

123251. No. 2239.

123252 to 123259. *SOLANUM* spp. Solanaceae.

123252 to 123258. *SOLANUM MELONGENA* L. Eggplant.

123252. No. 2170. *Pegan*. From Islampur, Bengal, January 15, 1937. Fruit pale green, about 10 inches long and 2 inches in diameter.

123253. No. 2172. *Pegan*. From Islampur, Bengal, January 15, 1937. Fruit greenish purple, elongate, 1 foot long and about 5 inches wide.

123254. No. 2205. From Islampur, Bengal, January 16, 1937. Fruit greenish purple, globose, weighs about 3 pounds. Of good flavor; the plant is a good bearer and is one of India's best eggplants.

123255. No. 2218. *Wangkai*. From Ellore, Madras Presidency, February 3, 1937.

123256. No. 2245. *Badanskai*. From Bangalore, Mysore, February 7, 1937. A mixture of long purple and long green eggplants which grow 8 or 9 inches long, but are usually used when much smaller. The purple form is said to be alkali tolerant.

123257. No. 2260. From Bangalore, Mysore, February 9, 1937. A strong bushy shrub about 4 feet high, said to be peculiar to Mysore. The fruit is green, finally about 9 inches long, but cut when about 5 inches long.

123258. No. 2287. From Bangalore, Mysore, February 9, 1937. Fruit globose, about 3 inches across, green

123144 to 123270—Continued

streaked with pink purple. A common type here.

123259. *SOLANUM* sp.

No. 2285. From Bangalore, Mysore, February 9, 1937. A wild plant 4 feet high, with purplish flowers followed by red-orange berries about one-half inch in diameter.

123260 and 123261. *STIPA SPLENDENS* Trin. Poaceae. Feathergrass.

Silkia. Found in clumps 8 feet high, with large loose tops; stems used for making baskets, brooms, etc. The grass is found in dry, well-isolated places and is quite ornamental.

123260. No. 1437. From Leh, Ladak, Kashmir, September 17, 1936.

123261. No. 1367. From Hundl, Baltistan, Kashmir, September 17, 1936, at 9,000 feet altitude.

123262. *TAGETES* sp. Asteraceae.

No. 2179. From Mahendra, Madras Presidency, January 22, 1937, at 2,000 feet altitude. Flowers orange, consisting mostly of conspicuous tubular disk flowers with only a row of small reflexed rays. Said to have been grown in the hills from earliest times.

123263. *TERMINALIA CHEBULA* Retz. Combretaceae.

No. 2187. *Harar*. From Mahendra, Madras Presidency, January 24, 1937, at 4,000 feet altitude. An ornamental tree with oval-elliptic leaves and terminal racemes of small white flowers. The fresh fruit is rich in tannin, and the dried fruit yields a black or yellow dye.

For previous introduction see 114456.

123264. *THYSANOLAENA MAXIMA* (Roxb.) Kuntze. Poaceae. Grass.

No. 2186. From Mahendra, Madras Presidency, January 22, 1937, at 4,000 feet altitude. A forest grass growing also in half shade, up to 6 feet high, with broad leaves and light airy heads which are often used as ornaments.

123265 and 123266. *TRICHOSANTHES ANGUINA* L. Cucurbitaceae. Snakegourd.

Fruits from 3 to 10 feet long. Used as a vegetable when young.

For previous introduction see 116761.

123265. No. 2219. *Potalokai*. From Ellore, Madras Presidency, February 3, 1937.

123266. No. 2241. From Bangalore, Mysore, February 7, 1937.

123267. *VIGNA CYLINDRICA* (Stickm.) Skeels. Fabaceae. Catjang.

No. 2227. *Kharannuli*. From Madras, Madras Presidency, February 5, 1937. Used as food both as green beans cooked in the pods and as dried beans.

123268. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.

No. 2231. *Kharamuni*. From Madras, February 6, 1937. Used as dried beans.

123269. *VITIS* sp. Vitaceae.

No. 2294. From Bangalore, Mysore, February 9, 1937. A naturalized Asiatic grape, the only sort grown here. Vine

123144 to 123270—Continued

resembles our *Concord* in habit and appearance; bunches 5 inches long, compact; berries blue-black, ovoid, three-fourths of an inch long, sweet, keep well. Vines give two crops a year here.

123270. *ALSTONIA VENENATA* R. Br. Apocynaceae.

No. 2193. From Mahendra, Madras Presidency, January 26, 1937, at 1,000 feet altitude. A low shrub 5 feet high, said to bear an abundance of attractive white flowers.

For previous introduction see 65248.

123271. *GOSSEYIUM* sp. Malvaceae.
Cotton.

From Cuba. Seeds presented by Thomas R. Towns, Holguin. Received February 25, 1937.

123272 to 123341.

From Turkey. Seeds collected by H. L. Westover and F. L. Wellman, Bureau of Plant Industry. Received February 1, 1937.

123272. *AJUGA* sp. Menthaceae.

No. 3419. An attractive mint from 3 km. northeast of Ankara, June 26, 1936.

123273. *MATTHIOLA* sp. Brassicaceae.

No. 3030. From the Amasya bazar, October 6, 1936.

123274. *ANTHEMIS TINCTORIA DISCOIDEA* (All.) Vahl. Asteraceae.

No. 2735. From 5 km. west of Yalova.

123275. *ASCLEPIAS* sp. Asclepiadaceae.

No. 1926. From Birejik, July 21, 1936.

123276. *ASPHODELUS FISTULOSUS* L. Liliaceae.

No. 603. From Antalya, June 4, 1936.

123277. *BRASSICA* sp. Brassicaceae.

No. 2143. From the Sivas bazar, August 5, 1936.

123278. *CAESALPINIA* sp. Caesalpiniaceae.

No. 1270. *Gil Abershim*. From the Bursa bazar, June 18, 1936.

123279. *CEPHALARIA SYRIACA* (L.) Schrad. Dipsacaceae.

No. 2254. From the Erzincan bazar, August 8, 1936. Seeds mixed with wheat flour to add flavor to bread.

123280. *CERINTHE* sp. Boraginaceae.

No. 3439. From Alma Dag, June 28, 1936.

123281. *CORONILLA* sp. Fabaceae.

No. 1947. From Birejik, July 22, 1936.

123282. *CUMINUM CYMINUM* L. Apiaceae.
Cumin.

No. 2149. From the Sivas bazar, August 5, 1936.

123283. *DAPHNE* sp. Thymelaeaceae.

No. 3147. From 25 km. north of Kastamonu, October 10, 1936. A shrub with handsome foliage and insignificant greenish flowers.

123284. *DAPHNE* sp. Thymelaeaceae.

No. 2794. From Ulu Dag, September 9, 1936, at 7,000 feet altitude. A low orna-

123272 to 123341—Continued

mental shrub with bright salmon-colored berries. Found growing on rocks.

123285. *DAUCUS* sp. Apiaceae.

No. 2287. From 55 km. east of Erzincan, August 9, 1936.

123286. *DAUCUS* sp. Apiaceae.

No. 2606. A plant with pink flowers, from 30 km. west of Samsun, August 23, 1936.

123287. *DELPHINIUM* sp. Ranunculaceae.
Larkspur.

No. 1973. From Birejik, July 23, 1936.

123288. *DIGITALIS* sp. Scrophulariaceae.
Foxtail.

No. 2482. From 97 km. south of Giresun, August 17, 1936.

123289. *DIOTIS MARITIMA* (L.) Smith. Asteraceae.

No. 2873. From the sea beach, 1 km. west of Yalova, September 12, 1936. An erect or ascending herbaceous perennial about 1 foot high, with alternate oblong leaves and dense terminal clusters of small yellow flower heads. The plant is covered with white cottony down. Native to Asia Minor.

123290. *HELICHRYSUM* sp. Asteraceae.

No. 2686. From 16 km. south of Tokat, August 26, 1936. A yellow-flowered composite.

123291. *EREMOSTACHYS* sp. Menthaceae.

No. 2870. From 1 km. west of Yalova, September 12, 1936. A compact mint found on the sea beach.

123292. *ERODIUM* sp. Geraniaceae.

No. 757. From 11 km. south of Denizli, May 30, 1936.

123293. *ERUCA* sp. Brassicaceae.

No. 1986. From Ulukishla, July 25, 1936.

123294. *EUONYMUS* sp. Celastraceae.

No. 2697. From 15 km. south of Samsun, August 24, 1936.

123295. *EUPATORIUM* sp. Asteraceae.

No. 2687. From 41 km. south of Tokat, August 26, 1936.

123296. *FERULA* sp. Apiaceae.

No. 2022. From gardens in Nigde, July 27, 1936.

123297. *FERULA* sp. Apiaceae.

No. 2023. From gardens in Nigde, July 27, 1936.

123298. *GYPSOPHILA* sp. Silenaceae.

No. 1885. From 50 km. north of Malatya, July 17, 1936.

123299. *CONRINGIA ORIENTALIS* (L.) Dum. Brassicaceae.

No. 1994. From Ulukishla, July 25, 1936.

123300. *CONRINGIA ORIENTALIS* (L.) Dum. Brassicaceae.

No. 3387. From dry plains 4 km. south-west of Ankara, June 25, 1936.

123301 to 123303. *HYOSCYAMUS* spp. Solanaceae.

123272 to 123341—Continued

123301. *HYOSCYAMUS* sp.
No. 1990. From Ulukishla, July 25, 1936.
123302. *HYOSCYAMUS* sp.
No. 2480. From 34 km. south of Giresun, August 17, 1936.
123303. *HYOSCYAMUS* sp.
No. 3324. From Ankara, June 20, 1936.
123304. *INULA* sp. Asteraceae.
No. 2098. From Alma Dag, 25 km. southeast of Ankara, August 1, 1936.
123305. *INULA* sp. Asteraceae.
No. 2668. From 46 km. south of Tokat, August 26, 1936. A composite with narrow yellow ray flowers.
- 123306 to 123308. *JASMINUM* spp. Oleaceae.
123306. *JASMINUM* sp.
No. 1065. A shrub from the ruins at Bergama, June 10, 1936.
123307. *JASMINUM* sp.
No. 2657. A shrub from 61 km. southeast of Merzifon, August 25, 1936.
123308. *JASMINUM FRUTICANS* L.
No. 2731. A low ornamental shrub with black fruits, from woods near Yalova Kaplijalari, September 6, 1936. A half-evergreen, shrubby jasmine with a mass of slender erect stems 3 to 5 feet high and smooth deep-green leaflets. The yellow flowers are produced in early summer, usually in threes or fives at the ends of short twigs, and the round shining-black fruits are the size of peas.
For previous introduction see 62020.
123309. *LEPIDIUM* sp. Brassicaceae.
No. 2160. From 84 km. east of Sivas, August 6, 1936.
123310. *LIGUSTRUM* sp. Oleaceae.
No. 569. An ornamental border plant from the Izmir bazar, May 25, 1936.
123311. *LINUM* sp. Linaceae. Flax.
No. 3383. From dry plains around Ankara, June 25, 1936.
123312. *LINUM* sp. Linaceae. Flax.
No. 3399. A flax with yellow flowers, from dry hillsides near Ankara, June 25, 1936.
123313. *LITHOSPERMUM* sp. Boraginaceae.
No. 1401. A rock plant from 20 km. north of Gaziantep, July 2, 1936.
123314. *LITHOSPERMUM* sp. Boraginaceae.
No. 2654. From 94 km. southeast of Merzifon, August 25, 1936.
123315. *SILENE DENSIFLORA* D'Urv. Silenaceae.
No. 1924. From Birejik, July 21, 1936. A perennial with tall stems and distant, dense whorls of many small pale yellow flowers. Allied to *Silene otites*. Native to the Crimean region.

123272 to 123341—Continued

123316. *LYCHNIS* sp. Silenaceae.
No. 2720. From Talas, August 27, 1936.
123317. *LYSIMACHIA* sp. Primulaceae.
No. 2946. From 20 km. west of Tutumlu, September 23, 1936.
123318. *ONONIS* sp. Fabaceae.
No. 2498. From 8 km. south of Shebinkarahisar, August 18, 1936.
123319. *PEDICULARIS* sp. Scrophulariaceae.
No. 2067. From Alma Dag, 25 km. southeast of Ankara, August 1, 1936.
123320. *PETROSELINUM CRISPUM* (Mill.) Nym. Apiaceae. Parsley.
No. 1863. From 26 km. west of Malatya, July 16, 1936.
123321. *PHYTOLACCA* sp. Phytolaccaceae.
No. 1945. From Birejik. July 22, 1936.
123322. *PHYTOLACCA AMERICANA* L. Phytolaccaceae. Pokeberry.
No. 2418. From Trabzon, August 14, 1936.
123323. *POTENTILLA RECTA* L. Rosaceae.
No. 1956. From Birejik, July 22, 1936.
- 123324 to 123326. *SALVIA* spp. Menthaceae.
123324. *SALVIA* sp.
No. 1581. From 54 km. north of Urfa, July 7, 1936.
123325. *SALVIA* sp.
No. 2075. From Alma Dag, 25 km. southeast of Ankara, August 1, 1936.
123326. *SALVIA* sp.
No. 3310. From 25 km. south of Gaziantep, June 1, 1936.
123327. *SCUTELLARIA* sp. Menthaceae.
No. 1495. A rock plant from 5 km. southeast of Gaziantep, July 4, 1936.
123328. *SCUTELLARIA* sp. Menthaceae.
No. 1782. An attractive rock plant for dry areas, from 52 km. southwest of Elaziz, July 14, 1936.
123329. *SCORZONERA* sp. Cichoriaceae.
No. 2800. From the summit of Ulu Dag, September 8, 1936.
123330. *SCROPHULARIA* sp. Scrophulariaceae.
No. 1959. From Birejik, July 22, 1936.
123331. *SEDUM* sp. Crassulaceae.
No. 2302. From 53 km. north of Gemushane, August 10, 1936.
123332. *SILENE* sp. Silenaceae.
No. 1897. From 50 km. west of Malatya, July 16, 1936.
123333. *SILENE* sp. Silenaceae.
No. 2065. From 25 km. southeast of Ankara, June 25, 1936.
123334. *SILENE* sp. Silenaceae.
No. 2796. From the summit of Ulu Dag, September 8, 1936.

123272 to 123341—Continued

123335. *TEUCRIUM* sp. Menthaceae.

No. 1875. From 50 km. north of Malatya, July 13, 1936.

123336. *TEUCRIUM ARDUINI* L. Menthaceae.

No. 2849. From the Yalova Baths, Kaplijalari, September 11, 1936. An erect or ascending herbaceous perennial over a foot high, with ovate leaves 1 to 2 inches long and dense spikes of yellow flowers. Native to Europe.

123337. *TRIGONELLA* sp. Fabaceae.

No. 1992. From Utukishia, July 25, 1936.

123338. *TRIGONELLA* sp. Fabaceae.

No. 2652. From 24 km. southeast of Merzifon, September 25, 1936.

123272 to 123341—Continued

123339. *CELSIA ORIENTALIS* L. Scrophulariaceae.

No. 2488. From 58 km. west of Shebin-karahisar, August 18, 1936. An annual with simple or sparingly branched stems about a foot high, pinnatisect leaves, and small yellow flowers. Native to Asia Minor.

123340. *VERBASCUM* sp. Scrophulariaceae.

No. 3028. From the Amasya bazar, October 6, 1936.

123341. *ORIGANUM VULGARE* L. Menthaceae.

No. 2830. From the Yalova Baths, Kaplijalari, September 12, 1936.

INDEX OF COMMON AND SCIENTIFIC NAMES

- Abelmoschus esculentus*, 120660, 120661,
 120825-120841, 121291, 121825.
Abies sp., 122630.
 pindrowi, 122766, 123144.
 spectabilis, 122049.
 webbiana. See *A. spectabilis*.
Acacia spp., 122767, 122768.
 concinna, 123145.
 cyanophylla, 122000.
 nilotica, 119890.
 raddiana, 120641.
Acacia, blueleaf. See *Acacia cyanophylla*.
Acanthorhiza aculeata, 120279.
Acanthus spp., 122207, 122441.
Acer campbellii, 122050.
 caudatum, 122051-122053.
Acidanthera capensis, 122416.
Aconitum spp., 122057, 122770.
 ferox, 122054.
 heterophyllum, 122769.
 luridum, 122055.
 spicatum, 122056.
Aësmia bicolor, 122034.
Adonis spp., 122208, 122209.
 chrysoyanthus, 122771.
Aegilops bicornis, 119594.
 mutica, 119595, 119596.
 speltoides, 119597, 119598.
 speltoides aucheri, 119593.
Agomandra brasiliensis, 121556.
Agrimonia eupatoria, 123004.
Agropyron spp., 119607, 119608, 121785,
 121791-121793.
 cristatum, 119599-119601, 121786,
 121787.
 divaricatum, 119602.
 elongatum, 121788.
 intermedium, 119603, 121789, 121790.
 juncum, 119604.
 orientale lasianthum, 119605.
 panormitanum, 119606.
 trichophorum, 121784.
Agrostemma githago, 122508, 123063.
Agrostis spp., 119612-119615.
 spica-venti, 119609, 119610.
 tenuis, 121078.
 verticillata, 119611.
Ajuga spp., 123005-123007, 123272.
Albizia falcata, 123146.
 odoratissima, 123147.
 Alfalfa. See *Medicago sativa*.
 yellow-flower'd. See *Medicago falcata*.
Allium spp., 120855, 121371-121395, 121832-
 121836, 122157, 122211-122214,
 122772, 123009-123011.
 ampeloprasum, 120252.
 cepa, 119709-119720, 119891, 120662-
 120681, 121292-121295, 121578,
 121579, 121826-121831,
 122608,
 123148.
 porrum, 120843-120854.
 sativum, 120682-120685, 121508-121512,
 122609-122613.
 thomsoni, 121837.
 victorialis, 122058.
 wallichianum, 122059.
 Almond. See *Amygdalus communis*.
Añus sp., 122773.
 nepalensis, 122989.
Alopecurus pratensis, 119616.
Alsine sp., 123012.
Alstonia venenata, 123270.
Athaea hirsuta, 122515, 122516.
 officinalis, 122442, 122443.
 rosea, 122444-122454.
Alyssum spp., 123013, 123014.
Amaranthus spp., 122215, 122774, 123149,
 123150.
Ammocharis heterostyla, 119708.
Amorphophallus bulbifer, 122063.
Amygdalus sp., 121439.
 communis, 122158.
 davidiana, 119835.
 persica, 119836-119843, 122159-122165,
 122596.
 persica nectarina, 119844.
 persica platycarpa, 119845, 119846.
Ananas comosus, 119875, 121053.
 macrodonates. See *Pseudananas macro-*
 donates.
Anaphalis spp., 122775, 122776.
Anchusa spp., 122216, 122403.
 azurea, 122210.
Andropogon ischaemum, 119617.
Anemone spp., 122778-122780.
 polyanthes, 122060.
 rivularis, 122061.
 tetrasepala, 122777.
Anethum graveolens, 120686, 120856-120870,
 122781, 123015, 123151.
Angelica sp., 122782.
 Anise. See *Pimpinella anisum*.
Anthemis spp., 122217, 122218, 122256,
 122783, 123016.
 tinctoria discoidea, 123274.
Anthoxanthum odoratum, 119618.
Anthyllis sp., 121087.
 vulneraria, 121086, 121088.
Antirrhinum spp., 122219-122224.
 Apple. See *Malus sylvestris*.
Apium graveolens, 120687, 120871-120881.
Aplopappus cuneifolius, 119267.
 Apricot. See *Prunus armeniaca*.
Aquilegia spp., 122225, 122784-122787,
 123017, 123018.
Arachis spp., 121778, 121781-121783.
 glabrata, 121777.
 hypogaea, 119810-119815, 119876,
 119877, 119879-119881, 119911,
 119920-119924, 121054-121071,
 121493, 121518-121521.
 marginata, 119878, 121494, 121779,
 121780.
Arbutus andrachne, 122226.
Arenaria spp., 122788, 123019-123022.
 cihiata, 122062.
Arenga pinnata, 122789.
Argyrea sp., 123152.
Argyrobolium sp., 121089.
Arisaema sp., 122064.
Aristida pungens, 120642.
Aristolochia eleans, 122035.
 gigantea, 119936.
Aronia sp., 122586.
Arrhenatherum elatius, 119619-119622.
Artabotrys uncinatus, 122790.
Artedia squamata, 120033.
Artemisia sp., 122791.
 maritima, 122792.
Asclepias sp., 123275.
Asparagus sp., 122227, 122228, 123023.
Asphodelus fistulosus, 123276.
Aster sp., 122793.
 diplostephioides, 122065.
 stracheyi, 122066.
 tricephalus, 122067.
Astilbe rivularis, 122068.
Astragalus spp., 121090-121106, 122001-
 122003, 122229, 122794.

- Atriplex* spp., 122632, 123024.
hortensis, 122631.
Arcaea sativa, 119474-119478.
Axonopus compressus, 119912.
- Balm, common. See *Melissa officinalis*.
 Balsam-pear. See *Momordica charantia*.
 Barberry. See *Berberis* spp.
 Berley. See *Hordeum vulgare*.
 Basil, common. See *Ocimum basilicum*.
Bauhinia spp., 123156, 123157.
acuminata, 123155.
macrantha, 119937.
vahlii, 123154.
- Bean. See *Phaseolus* spp.
 common. See *Phaseolus vulgaris*.
 lima. See *P. lunatus*.
 scarlet runner. See *P. coccineus*.
 snail. See *P. caracalla*.
- Bedstraw, yellow. See *Galium verum*.
 Beet, common. See *Beta vulgaris*.
Begonia semperlorens, 122230.
tuberosa, 122231.
- Renincasa hispida*, 122166, 122796.
 Bentgrass. See *Agrostis* spp.
Berberis spp., 122071, 122232, 122233, 122797, 122798, 122800, 122801.
aristata, 122799, 122802.
umbellata, 122070.
- Beta*
vulgaris, 119892, 120251, 120282,
 120688-120707, 121296, 121297,
 121397, 121398, 121838, 122234-
 122236.
vulgaris cicla, 120708-120714, 121396.
- Betula* spp., 122069, 122803.
cylindrostachya, 121824.
utilis, 122804.
- Birch. See *Betula* spp.
 Bittervetch. See *Lathyrus sativus*.
 Bladder-nut, European. See *Staphylea pin-
 nata*.
- Bomarea caldasii*, 119932-119934.
Borvea sp., 123025.
orientalis, 122633.
- Bouncing-bet. See *Sonaria officinalis*.
Brachypodium pinnatum, 119623-119625.
Brassica spp., 120920, 120922-120926, 120928,
 121582, 121848, 121850, 121852-
 121854, 122805, 122806, 123026,
 123277.
campestris, 120921, 121580, 121581,
 121839, 121840, 121849, 121851.
oleracea botrytis, 119893, 120882-120884,
 121298-121303, 123158, 123159.
oleracea capitata, 119706, 119721,
 119722, 120885-120905, 121304.
oleracea gongyloides, 121841, 121842.
rapa, 120906-120919, 121843-121847.
- Briza humilis*, 119627, 119628.
maxima, 119626.
- Broadbean. See *Vicia faba*.

Triticum aestivum, 119299-119407, 119587-
 119592, 121813-121818, 122985.
aestivum ferrugineum × *agropyron glaucum*, 121798.
dicoccum farrum × *agropyron glaucum*,
 121795.
durum × *agropyron glaucum*, 121797.
hordeiforme × *agropyron glaucum*,
 121796.
spelta × *agropyron glaucum*, 121794.
 Trumpetflower, East Indian. See *Oroxylon indicum*.
Tsuga dumosa, 122048.
 Tulip. See *Tulipa* spp.
Tulipa ferganica, 122997.
fosteriana, 122998.
ingens, 122999.
kuschkenensis, 123001.
praestans, 123000.
tubergeniana, 123002.
Tunica sp., 123134.
prolifera, 123133.
 Turnip. See *Brassica rapa*.
 Undetermined, 120823, 122152, 122413.
Urtica sp., 120502.
Velezia rigida, 123045.
Venidium fastuosum, 119294.

Verbascum spp., 122740, 122981, 122982, 123340.
lychnitis, 122407.
speciosum, 122739.
Verbena bonariensis s., 121505.
laciniata, 119916.
platensis, 119917.
Veronica sp., 123135.
 Vetch. See *Vicia* spp.
 bitter. See *Lathyrus sativus*.
 common. See *Vicia sativa*.
 hairy. See *V. villosa*.
 kidney. See *Anthyllis vulneraria*.
Viburnum sp., 123136.
nervosum, 122151, 122983.
stellulatum, 122150.
Vicia spp., 119986, 119987, 119990, 119997-120001, 120006-120011, 120014, 120015, 120017-120020, 120022, 120026, 120028, 121266, 121270, 121272, 121273, 121276, 121278, 121282, 121283, 121289, 121290.
angustifolia, 120021, 121265, 121271, 121275.
dasycarpa, 119944, 119946, 119950, 119981, 119989.
ervilia, 121144, 121264, 121285.
faba, 120013, 120116, 121263, 121287, 121365, 121429, 121995-121997, 122984.
hirsuta, 119993, 121268.
hybrida, 119957, 119963, 121151.
lathuroides, 119940, 119942, 119955, 119970, 119979, 121136, 121148, 121155.
lutea hirta, 119983, 119984, 121274.
monanthos, 119941, 119954.
peregrina, 119947, 119949, 119961, 119971, 119977, 121146.
sativa, 119943, 119975, 119988, 119994, 119996, 120004, 120005, 120029, 121161, 121182, 121267, 121269.

Vicia—Continued
seriocarpa microphylla, 119960, 119966, 121147.
serratifolia integrifolia, 119945, 119953, 119992, 119995, 120003, 120012, 120023, 120025, 121279, 121286.
tetrasperma, 119991, 121281, 123137.
villosa, 119982, 119985, 120024, 122741.
Vigna cylindrica, 120636, 120637, 121649, 123267.
sinensis, 119798, 120634, 120635, 120638, 121430-121433, 121973, 121998, 123268.
Viola spp., 122408-122412, 123138.
 Violet. See *Viola* spp.
Vitex sp., 122742.
Vitis spp., 120491-120495, 121434, 122206, 122593, 122744-122752, 123269.
vinifera, 121367-121369, 122205.
 Walnut, Persian. See *Juglans regia*.
 Watermelon. See *Citrullus vulgaris*.
 Waxgourd. See *Benincasa hispida*.
 Wheat. See *Triticum* spp.
 common. See *Triticum aestivum*.
 Wheatgrass, crested. See *Agropyron cristatum*.
Xanthosoma spp., 119808, 119809.
atrovirens, 119805.
caracu, 119806.
sagittaeifolium, 119807.
 Yautia. See *Xanthosoma caracu*. See also *X. sagittaeifolium*.
Zanthoxylum sp., 122594.
Zea mays, 119296-119298, 119549-119586, 119799-119802, 119929, 119930, 121075, 121435, 121506, 121507, 121819, 122047.
Zephyranthes spp., 119803, 119804, 119931, 121076.
Ziziphus sp., 122595.
